

A nighttime photograph of a city street. In the foreground, a traffic light is visible with its red, yellow, and green lights. The background shows a large, classical-style building with columns and a dome, illuminated by streetlights. Long, colorful light trails from cars and streetlights create a sense of motion and energy. A bright yellow diagonal stripe cuts across the middle of the image.

# Worldwide Corporate Tax Guide

2015

Building a better  
working world

---

## Preface

---

Governments worldwide continue to reform their tax codes at a historically rapid rate. Taxpayers need a current guide, such as the *Worldwide Corporate Tax Guide*, in such a shifting tax landscape, especially if they are contemplating new markets.

The content is straightforward. Chapter by chapter, from Afghanistan to Zimbabwe, we summarize corporate tax systems in 161 jurisdictions. The content is current on 1 January 2015, with exceptions noted.

Each chapter begins with contact information for the key people in that country's EY offices. Symbols precede the names of individuals who hold the following functions:

- ★ National director of the listed tax specialty
- ◆ Director of the listed specialty in the local office

We then lay out the facts about the jurisdiction's corporate taxes, beginning with an at-a-glance summary. With some variation, the topics covered are taxes on corporate income and gains, determination of trading income, other significant taxes, miscellaneous matters (including foreign-exchange controls, debt-to-equity rules, transfer pricing, controlled foreign companies and anti-avoidance legislation) and treaty withholding tax rates.

At the back of the guide, you will find a list of the names and symbols for all national currencies and a list of contacts for other jurisdictions.

For many years, the *Worldwide Corporate Tax Guide* was joined by two companion guides on broad-based taxes: the *Worldwide Personal Tax Guide* and the *Worldwide VAT, GST and Sales Tax Guide*. In recent years, those three have been joined by additional tax guides on more specialized topics, including the *International Estate and Inheritance Tax Guide*, the *Transfer Pricing Global Reference Guide*, the *Global Oil and Gas Tax Guide*, the *Worldwide R&D Incentives Reference Guide* and the *Worldwide Cloud Computing Tax Guide*.

Each of the guides represents thousands of hours of tax research. They are available free online along with timely Global Tax Alerts and other great publications on [ey.com](http://ey.com) or in our EY Global Tax Guides app for tablets.

Please contact us if you need more copies of the *Worldwide Corporate Tax Guide*. Keep up with the latest updates at [ey.com/GlobalTaxGuides](http://ey.com/GlobalTaxGuides), and find out more about the app at [ey.com/TaxGuidesApp](http://ey.com/TaxGuidesApp).

## EY's Global Tax Desk Network

---

EY has over the last 30 years made a significant investment in building a Global Tax Desk Network. It consists of a highly integrated team of more than 200 professionals spanning approximately 45 countries. The purpose of the Tax Desk Network is to enable home-country tax experience to be integrated within other jurisdictions and provide services across several of our tax disciplines from hubs in the United States, Brazil, Europe, and Asia-Pacific and China. The Global Tax Desk Network offers clients a tremendous resource – accessible, timely and integrated tax-planning advice on cross-border investments, providing them worldwide with a forum for information and idea exchange as well as offering cross-disciplinary tax workshops for multinationals. Our Global Tax Desk Network can be contacted at the numbers listed below.

## A. At a glance

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Business Receipts Tax Rate (%)	2/5/10 (a)
Withholding Tax (%) (b)	
Dividends	20 (b)
Interest	20 (b)
Royalties from Patents, Know-how, etc.	20 (b)
Commissions	20 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (c)

- (a) This tax is imposed on total gross revenue before deductions. It is a deductible expense in computing taxable income.
- (b) This withholding tax is considered a final settlement of the tax liability.
- (c) Losses can be generally carried forward in equal proportions to each of the following three years. Unrestricted loss carryforwards are allowed for specified companies.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies that are resident in Afghanistan are subject to tax on their worldwide income. Tax is levied on the total amount of income earned during the tax period.

**Tax rates.** The corporate income tax rate is 20%.

Certain types of income are subject to final withholding taxes. For information regarding these taxes, see *Withholding taxes*.

**Business receipts tax.** Business receipts tax (BRT) is imposed on total gross revenue before deductions. BRT is a deductible expense in computing taxable income for the same tax year. It is imposed at rates of 2%, 5% or 10% of the gross receipts, depending on the nature of the business and/or category of the receipt.

In addition, importers of goods are subject to BRT at a rate of 2% at the time of import. The Customs Office collects the BRT. This tax is treated as an advance payment against the BRT paid by the importer based on its receipts from the sale of goods.

The BRT return must be filed and BRT must be paid on a quarterly basis within 15 days after the end of the quarter.

BRT does not apply to the following categories of income:

- Interest income
- Fees earned from banking transactions
- Proceeds of futures contracts whether settled in cash or otherwise
- Insurance or reinsurance premiums
- Distributions received by shareholders with respect to their interests in the company
- Exports of goods and services
- Salaries, dividends, royalties and other payments that are subject to withholding tax
- Income received from the rent or lease of residential property to a natural person if the tenant uses the property for residential purposes for more than six months of the tax year
- Income of persons not having a business license that are taxed at fixed rates (see *Fixed tax scheme*)

**Fixed tax scheme.** For certain categories of income and persons, the Afghanistan Income Tax Law (AITL) provides for a fixed tax scheme under which taxpayers are required to pay a fixed tax during the year instead of income tax and BRT. The fixed tax applies to income received by importers and contractors that do not hold a business license in Afghanistan for the supply of goods, services transporters, entertainers and natural persons deriving business income below certain limits. The amount of the tax varies, depending on the category of income and the person deriving the income.

**Tax incentives.** Some of the significant tax incentives available in Afghanistan are described in the following paragraphs.

Income derived from the operation of aircraft under the flag of a foreign country and income derived by the aircraft's staff is exempt from tax if the foreign country grants a similar exemption to aircraft under the flag of Afghanistan and the aircraft's staff.

Organizations that are established under the laws of Afghanistan and operating exclusively for educational, cultural, literary, scientific or charitable purposes are exempt from income tax.

Income derived from agricultural or livestock production is not subject to income tax.

Scholarships, fellowships or grants for professional and technical training are exempt from income tax.

The above incentives are subject to a private ruling obtained from the Ministry of Finance (MoF) of the Government of Afghanistan.

**Capital gains.** Gains arising from the sale, exchange or transfer of capital assets, including depreciable assets, shares of stock and trades or businesses are included in taxable income. However, gains derived from the sale or transfer of movable or immovable

property acquired by inheritance is not included in taxable income.

Legal persons transferring movable or immovable property must pay a 1% tax on the amount received or receivable with respect to the transfer of ownership of such property. The tax paid may be used as a credit against tax payable when the tax return is filed.

Losses incurred on the sale or exchange of capital assets used in a trade or business are deductible from the taxable income in the tax year of the sale or exchange if the gain from such sale or exchange would have been taxable.

Losses incurred on the sale or exchange of shares of stock may be offset only against gains from the sale or exchange of shares of stock in the same year. If the gains exceed the losses from such transactions, the excess is taxable. However, if the losses exceed the gains, the excess is not deductible.

### Administration

*Filing requirements.* Afghanistan follows the solar year as its tax year (that is, 21 December through the following 20 December). If a legal person wishes to use a 12-month period other than the solar period as its tax year, it may apply to the MoF in writing and provide the reasons for the change. The MoF may grant such application if it is justifiable.

The income tax return, together with the balance sheet, must be filed within three months following the end of the tax year (that is, by 20 March).

*Withholding taxes.* Withholding tax is an interim tax payment that may or may not be the final tax liability. Amounts withheld that are not final taxes are credited against the eventual tax liability of the taxpayer for the relevant year.

The following are the rates of significant withholding taxes under the Afghanistan income tax law.

Type of payment	Rate (%)
Rent for immovable property used for commercial, industrial and other economic purposes	10/15 (a)
Salaries and wages	2/10/20 (b)
Payments for imports by importers that have a business license	4 (c)
Payments to persons that have a business license for the providing of goods, material, construction and services under contracts to government agencies, municipalities, state entities, private entities and other persons	2
Dividends	20 (d)
Interest	20 (d)
Royalties	20 (d)
Prizes	20 (b)
Rewards	20 (d)

(a) The rate depends on the monthly rent.

(b) The rate depends on the monthly salary.

- (c) The tax is calculated based on the cost of the imported goods including customs duty and is collected by the customs office where the custom duty is paid. Half of the tax (that is, 2% of the value of imports) may be offset against the BRT payable by the importer while the balance is treated as a tax credit against the tax liability for the year. See the discussion of the BRT in Section B.
- (d) This is a final withholding tax.

*Interest and penalties.* A legal person that fails to file a tax return by the due date without reasonable cause may be subjected to additional income tax of AFN500 per day.

In addition, if a person fails to pay the tax by the due date, penalties amounting to 0.1% of the tax per day may be imposed. If no tax is paid, an additional tax of 10% may be imposed in addition to the 0.1% penalty.

A person that is determined to have evaded income tax may be required to pay the income tax due and the following additional tax:

- In the first instance, additional tax of double the evaded tax
- In the second instance, additional tax of double the evaded tax and termination of the person's business activity by order of the court

A person that fails to withhold tax from payments without reasonable cause may also be subject to additional tax of 10%.

**Dividends.** A company paying a dividend must withhold tax at a rate of 20% of the gross amount. Dividends are regarded as Afghan-source if they are received from resident companies operating in Afghanistan.

If a branch in Afghanistan of a nonresident person pays or incurs an amount to the head office or any person connected to the nonresident person, that amount is also treated as a dividend.

Dividends paid in cash, from which tax has been deducted at source, are allowed as deductions for the payers of the dividends. However, such deductions are not allowed to branch offices in Afghanistan making payments of dividends to their head offices and other affiliates.

Dividends paid in the form of securities for shares or loans of a similar nature are not deductible from the income of corporations or limited liability companies.

**Foreign tax credit.** If a resident person derives income from more than one foreign country, proportionate foreign tax credit is allowed against income from each country.

### C. Determination of taxable income

**General.** The determination of taxable income is generally based on the company's financial statements, subject to certain adjustments.

Business expenses incurred during a tax year or in one of the preceding three tax years are deductible for purposes of calculating taxable income.

**Inventories.** Inventory for a tax year is valued at the lower of cost or market value of the inventory on hand at the end of the year.

All taxpayers engaged in manufacturing, trading, or other businesses must value inventories in accordance with the method prescribed by the MoF.

**Tax depreciation.** Depreciation of movable and immovable property (except agricultural land) used in a trade or business or held for the production of income is allowed as an expense. The total depreciation deductions for property may not exceed the cost of the property to the taxpayer.

A person is not entitled to claim depreciation for that part of the cost of an asset that corresponds to a payment for which the person failed to withhold tax.

Enterprises registered under the Law on Domestic and Foreign Private Investment in Afghanistan are entitled to a deduction for the depreciation of buildings and other depreciable assets over the following time periods:

- Buildings: four years
- Other depreciable assets: two years

Depreciation is calculated using the straight-line method, in equal proportions. However, if a depreciable asset is held by the enterprise for less than half of the year, depreciation is calculated and deducted for half of the year. If a depreciable asset is held for more than half of the year, depreciation is calculated and allowed for one year.

Net operating losses incurred by a taxpayer on account of depreciation may be carried forward by the enterprise until such loss is fully offset. However, to claim such offset, the enterprise must be an approved enterprise under the AITL.

Depreciation and expenditure that relate to a period covered by a tax exemption or to a period before an enterprise becomes an approved enterprise for the first time may not be included in the calculation of a net operating loss.

**Relief for losses.** A corporation or limited liability company that incurs a net operating loss in a tax year may deduct the loss from its taxable income of the following three years in equal proportions.

Net operating losses incurred by approved enterprises as a result of depreciation may be carried forward until they are fully offset.

#### **D. Other significant taxes**

Afghanistan does not impose value-added tax or goods and services tax. Customs duties apply to the import of goods.

#### **E. Miscellaneous matters**

**Foreign-exchange controls.** In general, remittances in foreign currency are regulated and are required to be converted to afghanis (AFN) at the established rate of the Da Afghanistan Bank. In certain cases in which the Da Afghanistan Bank does not trade for a particular currency, the currency is first converted into US dollars and then into afghanis.

**Anti-avoidance rules.** All transactions between connected persons are expected to be carried out at an arm's length. If transactions

are not conducted on an arm's-length basis, the tax authorities may determine the arm's-length standard under prescribed methodologies. These methods are similar to the methods as available under the commentary to the Organisation for Economic Co-operation and Development (OECD) model convention.

If a person enters into any transaction or arrangement with the intent to cause reduction of liability to pay tax, the MoF may disregard such transaction or arrangement and assess all persons affected by the transaction or arrangement as if the disregarded transaction or arrangement had not taken place.

## **F. US and North Atlantic Treaty Organization agreements**

A bilateral agreement between Afghanistan and the United States exists in the form of Diplomatic Notes exchanged between the countries. Under the Diplomatic Notes, tax exemption is provided to the US government and its military, contractors and personnel engaged in activities with respect to the cooperative efforts in response to terrorism, humanitarian and civic assistance, military training and exercises, and other activities that the US government and its military may undertake in Afghanistan.

Military and technical agreements have also been entered into with International Security Assistance Forces, which allow similar exemptions.

On 30 September 2014, Afghanistan signed a Bilateral Security Agreement with the government of the United States and a Status of Force Agreement for North Atlantic Treaty Organization (NATO) forces. These agreements, which enter into force on 1 January 2015, replace all previous agreements applicable until 31 December 2014 and amend the previously offered exemptions for NATO foreign and local contractors and subcontractors.

Exemptions available under these agreements are subject to private rulings obtained from the MoF. In addition, the agreements generally do not provide exemptions from the obligation to withhold tax from all payments to employees, vendors, suppliers, service providers, lessors of premises and other persons, as required under the local tax laws.

## B. Taxes on corporate income and gains

**Corporate income tax.** Albanian companies are companies that are incorporated in Albania or have their place of effective management in Albania. Albanian companies are subject to corporate income tax on their worldwide income. Foreign companies are subject to tax on profits generated from activities performed through a permanent establishment in the country and on income from Albanian sources.

**Rates of corporate tax.** The corporate income tax rate is 15% for taxpayers with a turnover exceeding ALL8 million (approximately EUR57,000).

Small businesses (taxpayers with annual turnover ranging between ALL2 million to ALL8 million (approximately EUR14,000 to

EUR57,000) are subject to a reduced profit tax rate of 7.5%, but the tax computed using such rate may not be less than ALL25,000 (approximately EUR180). Micro-businesses with an annual turnover below ALL2 million (approximately EUR14,000) are taxed at a fixed amount of ALL25,000 (approximately EUR180) payable within the first half of the year.

**Capital gains and losses.** Capital gains derived from the disposal of assets, including shares, are subject to tax at the standard rate of 15%. Capital losses are deductible for tax purposes.

Capital gains derived by a foreign company from the sale of domestic shares are taxed if the gains are attributable to a local permanent establishment or if the buyer of the shares is a domestic entity.

**Administration.** The tax year is the calendar year.

Taxpayers subject to corporate income tax make advance payments of corporate income tax on a quarterly basis. The payments must be made by 30 March for January through March, by 30 June for April through June, by 30 September for July through September and by 30 December for October through December. However, taxpayers may opt to make monthly advance payments of corporate income tax by the 15th day of each month. Newly established companies involved in production activities are not required to make quarterly advance payments for either a period of six months or the period until the end of the fiscal year, whichever is shorter.

The advance payments for January through March are calculated based on the taxable income of the tax year before the preceding tax year. The advance payments for April through December are calculated based on the taxable income of the preceding tax year. The tax rate for the calculation of the advance payment is 15%. If the company demonstrates to the tax authorities that the taxable income in the current year will be substantially lower than the taxable income of the reference period, the tax authorities may decide to decrease the advance payments. If the tax authorities approve the taxpayer's request for the reduction of the corporate advance payments and at year-end the corporate tax liability exceeds the amount of advance payments by more than 10%, default interest is applied to the difference. If the tax authorities determine that the taxable income of the current year will be increased by more than 10% compared with the taxable income realized in the reference period, they may decide to increase the advance payments. Companies that generated losses in the reference years make advance payments based on their taxable profit projections for the current year.

By 31 March, companies must file the annual tax return and pay the corporate tax due for the tax year less advance payments made. A 10 February deadline applies to taxpayers subject to the reduced profit tax regime.

Effective from 1 January 2014, taxpayers subject to the reduced profit tax regime make advance payments of simplified profit tax (profit tax applicable to small businesses; see *Rates of corporate tax*) on a quarterly basis. The payments must be made by 20 April for January through March, by 20 July for April through June, by 20 October for July through September and by 20 December for

October through December. Taxpayers with turnover of ALL2 million to ALL8 million are provided with tax stamps for each payment made during the year (total of four). Taxpayers with turnover below ALL2 million are subject to an annual payment of ALL25,000 and consequently are provided with only one tax stamp. Taxpayers must place the tax stamps in the upper corner of their National Registration Centre (Tax Identification Number) certificate.

Companies not complying with the filing and payment deadlines described above are subject to interest and penalties. Late tax payments are subject to interest at a rate of 120% of the interbanking loan interest rate, published by Bank of Albania. The interest is not deductible for corporate income tax purposes. Late tax payments and inaccurate tax return filings are charged with a penalty of 5% of the unpaid liability for each month of delay, capped at 25%. In addition, a penalty of ALL10,000 can be assessed if the tax return is not filed by the due date. If the unreported tax liability results from tax evasion, the penalty is 100% of the unpaid liability.

**Dividends.** Dividends paid by Albanian companies to resident and nonresident individuals and to foreign entities are subject to withholding tax at a rate of 15% unless the rate is reduced under an applicable double tax treaty (see Section F). Dividends received by Albanian companies are exempt from tax.

**Foreign tax relief.** Foreign direct tax on income and gains of an Albanian resident company may be credited against the corporate tax on the same profits. The foreign tax relief cannot exceed the Albanian corporate income tax charged on the same profits. If a company receives income from a country with which Albania has entered into a double tax treaty, other forms of foreign tax relief may apply, as stipulated in the provisions of the treaty.

### C. Determination of trading income

**General.** The assessment is based on the financial statements prepared in accordance with the local standards or International Financial Reporting Standards (IFRS), subject to certain adjustments for tax purposes as specified in the Albanian Tax Code and other supplementary legal acts.

All necessary and reasonable expenses incurred for the business activity that are properly documented are deductible, except for the following:

- In-kind compensation.
- Wages and salaries that are not paid through the banking system.
- Write-off of debts if all legal means for their collection have been exhausted.
- Expenses for cross-border technical services and consultancy and management fees if the corresponding withholding tax (10% through 31 December 2014 and 15% from 1 January 2015) has not been paid by 31 December of the year in which the service is provided. In case of tax treaty protection, the above restriction does not apply, and the provisions of the applicable treaty apply.

Other types of expenses may be deducted up to a ceiling. These expenses include, but are not limited to, the following:

- Representative and entertainment expenses are deductible up to 0.3% of annual turnover.
- Production waste and losses, including losses from impairment, are deductible to the extent provided by the relevant legislation.
- Sponsorships are generally deductible up to 3% of the income before tax and up to 5% for media-related sponsorships.
- Per diems are deductible up to ALL3,000 per day for traveling inside Albania and up to EUR60 per day for traveling abroad.
- Interest is deductible only to the extent that the rate does not exceed the average interest rate published by Bank of Albania and that the amount of the debt does not exceed four times the equity. Such limitation does not apply to banks, insurance companies and leasing companies.
- Costs of improvements and maintenance are fully deductible in the year in which they are incurred to the extent that they do not exceed 15% of the remaining value of the asset.
- Expenses settled in cash are tax deductible if they do not exceed ALL150,000 (approximately EUR1,070).
- Voluntary pension contributions made by employers in favor of their employees to professional pension plans are tax deductible up to an amount of ALL250,000 (approximately EUR1,786) per year.

**Inventories.** The inventory valuation rules stipulated in the accounting law also apply for tax purposes. Inventory is valued at historical cost, which is determined by using the weighted average, first-in, first-out (FIFO) or other specified methods. The method must be applied consistently. Changes in the method must be reflected in the books of the company.

**Provisions.** Companies may not deduct provisions, except for certain levels of special reserves specified by regulations regarding insurance companies and provisions of financial service companies created in compliance with International Financial Reporting Standards and certified by the external auditors.

**Tax depreciation.** Buildings are depreciated separately for tax purposes using the declining-balance method at a rate of 5%. If the remaining value of the asset at the beginning of a tax period is less than 3% of the historic acquisition cost of such asset, the entire remaining balance is recognized as a tax-deductible expense in that tax period.

Intangible assets are depreciated using the straight-line method at a rate of 15%.

Other assets are depreciated in groups, using the declining-balance method. The applicable rates are 25% for computers, information systems and software, and 20% for all other fixed assets. If the remaining value of the asset at the beginning of a tax period is less than 10% of the historic acquisition cost of such asset, the entire remaining balance is recognized as a tax-deductible expense in that tax period.

**Relief for losses.** Losses may be carried forward for three consecutive years. However, if a change of 50% in the entity's ownership occurs, the remaining losses are forfeited. Loss carrybacks are not allowed.

**Groups of companies.** Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; exempt supplies include leases of land, supplies of buildings and financial services	
Standard rate	20%
Exports of goods and supplies of services relating to international transportation	0%
Real estate property tax	
Buildings	ALL40 to ALL400 per square meter
Agricultural land	ALL700 to ALL5,600 per hectare
Real estate transfer tax	
Buildings	ALL100 to ALL2,000 per square meter
Other	2% of acquisition value
Social security contributions, on monthly salary up to ALL97,030; paid by	
Employer	15%
Employee	9.5%
Health insurance contributions on monthly gross salary; paid by	
Employer	1.7%
Employee	1.7%
Excise duties imposed on specified goods (tobacco products, coffee, alcoholic beverages, petrol, diesel, fuel, kerosene and lubricants); the tax is calculated as a specific amount per unit	Various
Consumption tax for petrol gas oil and coal	ALL27 per liter

## E. Miscellaneous matters

**Foreign-exchange controls.** Albania has a free foreign-exchange market. The Albanian currency, the lek (ALL), is fully convertible internally.

Residents and nonresidents may open foreign-currency accounts in Albanian banks or foreign banks authorized to operate in Albania. Residents may also open accounts in banks located abroad. All entities must properly document all of their money transfers to comply with the regulations of Bank of Albania. No limits are imposed on the amount of foreign currency that may be brought into Albania. Hard-currency earnings may be repatriated after the deduction of any withholding tax.

**Transfer pricing.** New transfer-pricing rules, which are aligned with the Organisation for Economic Co-operation (OECD) Transfer Pricing Guidelines of 2010, were introduced in June 2014. Under these rules, taxpayers engaged in controlled transactions carried out on or after 4 June 2014 and in recurring transactions continuing after that date are required for the first time to maintain transfer-pricing documentation, which must be submitted within 30 days after a request of the tax authorities. Failure to prepare transfer-pricing documentation is not sanctioned with penalties,

but fulfilling such requirement protects the taxpayer from the assessment of penalties in the event of transfer pricing-related audit adjustments. Such penalties equal 5% of additional tax liability and are applied for each month of delay, capped at 25%.

Only cross-border and controlled transactions are subject to the transfer-pricing rules. Consequently, domestic transactions are not subject to the rules. Controlled transactions are considered to be transactions between related parties, dealings between a permanent establishment and its head office, and transactions with an entity resident in a tax-haven jurisdiction. Two persons are considered related parties if either one of them participates directly or indirectly in the management, control or capital of the other, or the same person(s) participate(s) directly or indirectly in the management, control or capital of the two parties; that is, the same person owns 50% or more of the share capital of the other person or effectively controls the business decisions of the other person.

The new rules refer to the application of the most appropriate method among the OECD transfer-pricing methods, which are comparable uncontrolled price, resale price, cost-plus, transactional net margin and profit-split. If it can be proved that none of the approved methods can be reasonably applied, taxpayers are allowed to use other more appropriate methods.

Taxpayers are required to submit by 31 March of the following year a Controlled Transaction Notice, which lists the intercompany transactions and the transfer-pricing methods applied to these transactions, if their controlled transactions exceed in aggregate ALL50 million (approximately EUR357,000).

Failure to timely submit the Controlled Transaction Notice subjects the taxpayer to a penalty of ALL10,000 (approximately EUR70) for each month of delay.

**Debt-to-equity rules.** Albanian tax law includes thin-capitalization rules with respect to the deduction of interest on loans, which apply if the debt-to-equity ratio exceeds 4:1. The ratio applies to all debts owed to related and unrelated parties as well as to loans obtained from financial institutions. However, the limitation does not apply to banks and insurance and leasing companies.

## F. Treaty withholding tax rates

The rates of withholding tax in Albania's tax treaties are described in the following table.

	Dividends %	Interest %	Royalties %
Austria	5/15 (a)	5 (b)	5
Belgium	5/15 (a)	5	5
Bosnia and Herzegovina	5/10 (a)	10	10
Bulgaria	5/15 (a)	10	10

Non-treaty countries	15	15	15

- (a) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (b) Interest on government and central bank loans is exempt from withholding tax.
- (c) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 50% of the payer and that has invested at least USD250,000 in the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the payer. The 15% rate applies to other dividends.
- (d) The 5% rate applies to interest paid on loans granted by banks or other financial institutions. The 10% rate applies in all other cases.
- (e) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 75% of the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.
- (f) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
- (g) The 0% rate applies if the beneficial owner of the dividends is the government or a government institution or agency of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.
- (h) The 0% rate applies if the beneficial owner of the dividend is the government, a government institution or agency of the other contracting state. The 5% rate applies to other dividends.
- (i) The 5% rate applies if the beneficial owner of the dividend is a company that holds directly at least 25% of the capital of the payer or is a pension scheme. The 10% rate applies to other dividends.

Albania has signed tax treaties with Estonia, India, Luxembourg and the United Arab Emirates, but these treaties have not yet entered into force.

## A. At a glance

Corporate Income Tax Rate (%)	23 (a)
Capital Gains Tax Rate (%)	15/20 (b)
Branch Tax Rate (%)	23 (a)
Withholding Tax (%)	
Dividends	10/15 (b)
Interest	10
Royalties from Patents, Know-How, etc.	24
Foreign Services	24
Fees for Technical Assistance and Other Remuneration for Services	24
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	4

(a) This new rate, which was contained in the 2015 Finance Law, applies to the 2014 corporate income tax return, which must be filed by 30 April 2015.

(b) The higher rate applies to payments to nonresident individuals or companies.

## B. Taxes on corporate income and gains

**Corporate income tax.** The following companies are subject to corporate income tax (Impôt sur le Bénéfice des Sociétés, or IBS):

- Resident companies (those incorporated in Algeria)
- Nonresident companies that have a permanent establishment in Algeria

In general, IBS is levied on income realized in Algeria, which includes the following:

- Income derived from trading activities carried out by companies
- Income of representative agents of companies
- Income of companies that do not have an establishment or a representative agent but realize a complete cycle of commercial activities

**Tax rate.** The standard IBS rate is 23%. This new rate, which was contained in the 2015 Finance Law, applies to the 2014 corporate income tax return, which must be filed by 30 April 2015.

**Tax incentives.** Ordinance No. 01-03, dated 20 August 2001, relating to the development of investment, as amended, provides for investment regimes applicable to national and foreign investments made in the production of goods and services, and investments made within the framework of the granting of a license and/or a concession.

For purposes of the above ordinance, investments include the following:

- Acquisition of assets included in the creation of new activities, capacity of production extension, rehabilitation and restructuring
- Participation in the share capital of an Algerian company
- Takeover of an activity within the framework of a partial or total privatization

Before the investments are made, they must be declared to the National Agency for Investment Development (Agence Nationale pour le Développement des Investissements, or ANDI), together with the submission of the application for the granting of the advantages.

The advantages granted by the ANDI to the investors depend on the applicable regime.

*General Regime.* The General Regime applies to national and foreign investments made in the activities of production of goods and services as well as investments made within the framework of the granting of a license and/or a concession.

During the setting-up of their investments, companies benefit from the following advantages:

- Exemption from value-added tax (VAT) on non-excluded goods and services directly involved in the investment implementation
- Exemption from customs duties on non-excluded imported equipment directly involved in the investment implementation
- Exemption from property transfer tax on all property acquisitions made within the framework of the investment concerned
- Exemption from registration duties, land publication fees and state fee on concession, for granted built and unbuilt property assigned to the investment

When operating, companies may be granted the following advantages for three years:

- IBS exemption
- Tax on professional activity (TAP) exemption

These advantages can be granted for three to five years for investments that create more than 100 jobs at the beginning of the activity.

*Derogatory Regime.* Under the Derogatory Regime, investments realized in areas in which development requires a contribution of the state, as well as investments relating to a particular interest for the national economy, may benefit from particular advantages.

During the setting-up phase for investments realized in development areas, companies may benefit from the following advantages:

- Exemption from VAT on non-excluded goods and services imported or locally purchased
- Exemption from customs duties on non-excluded imported goods and services
- Registration fees at a reduced rate of 0.2%
- Total or partial payment by the government of costs with respect to infrastructure works necessary for the setting up of the investment
- Exemption from property transfer tax for all property acquisitions
- Exemption from registration duties, land publication fees and state fee on concession, for granted built and unbuilt property assigned to the investment

When operating, companies may be granted the following advantages:

- Exemption from IBS and TAP for a period of 10 years
- Exemption from property tax on property in the framework of the investment for a period of 10 years

During the setting-up phase, for investments involving a particular economic interest for Algeria, companies may benefit from the following advantages for a period not exceeding five years:

- Exemption from duties, taxes and other levies on all goods and services imported or locally purchased
- Exemption from registration fees on the incorporation deed and share capital increases
- Exemption from registration duties and land publication fees on the transfer of property assigned to production
- Exemption from property tax on real estate property assigned to production

When operating, these companies may be granted the following advantages for a period not exceeding 10 years:

- Exemption from IBS
- TAP exemption

Under the Algerian Direct Tax Code, the portion of companies' profits that results from the exemptions from IBS and other taxes under the incentives provided by the investment regulations (in both the General Regime and the Derogatory Regime) must be reinvested in the project within the four tax years following their realization. The obligation to reinvest is limited to benefits granted during the exploitation phase of the investment (particularly, the exemptions from IBS and TAP). Benefits granted during the implementation phase that are related to VAT, registration fees and customs duties are not subject to this requirement.

For a failure to comply with this reinvestment obligation, the amount of the tax advantage (the IBS exemption) and a penalty equaling 30% of this amount must be paid to the tax authorities.

**Capital gains.** Capital gains are included in ordinary income and taxed at the applicable IBS rate.

Capital gains derived from the sale of fixed assets are taxed differently, depending on whether they are short-term capital gains (on assets held for three years or less) or long-term capital gains (on assets held for more than three years).

The following percentages of capital gains derived from the partial or total sale of assets within the framework of industrial,

commercial, agriculture or professional activities are included in taxable profits:

- 35% of long-term capital gains
- 70% of short-term capital gains

Capital gains derived from the sale of shares realized by nationals are taxed at a rate of 15%.

Unless otherwise provided by a double tax treaty, nonresident individuals and companies that derive capital gains from the sale of shares of an Algerian entity are subject to a final withholding tax at a rate of 20%.

**Administration.** An annual tax return must be filed with the tax administration within four months after the end of the financial year. Foreign companies carrying out activities in Algeria through a permanent establishment are subject to the same filing obligations as companies incorporated in Algeria. These obligations include the filing of an annual corporate tax return (IBS return, named G4 form or G4 Bis form), by 30 April of each year.

The IBS is generally paid in three down payments from 20 February to 20 March, from 20 May to 20 June and from 20 October to 20 November of the year following the financial year, if profit has been realized and used for the base of tax calculation. The amount of each down payment is equal to 30% of the IBS due on profits realized during the last closed financial year.

Permanent establishments of foreign companies must make an IBS down payment equal to 0.5% of the amounts billed every month. When filing the annual IBS return, these IBS down payments are offset against the IBS due.

Certain listed documents must be attached to the IBS return, including the balance sheet and a summary of the profit-and-loss account.

Taxes withheld at source and those paid in cash must be declared on a monthly tax return ("G 50" form). These taxes include the following:

- Personal income tax (Impôt sur le Revenu Global, or IRG)
- Withholding tax due on passive income and remuneration paid to nonresident service suppliers
- TAP
- IBS down payments
- Value-added tax

This form must be filed within 20 days following the end of the month of payment of the relevant remuneration together with the payment of the related taxes.

**Dividends.** Dividends received by residents are subject to a 10% withholding tax.

Subject to double tax treaties, a 15% withholding tax is imposed on dividends paid to nonresident companies.

**Royalties.** Unless otherwise provided by double tax treaties, a 24% withholding tax is imposed on royalties and remuneration for services paid to nonresident entities.

For contracts relating to the use of computer software, a tax allowance at a rate of 80% is applicable on the amount of the royalties. Consequently, the effective rate of the withholding tax is 4.8%.

A tax allowance at a rate of 60% is applied to the amount of the rent amount paid under an international leasing contract. As a result, the effective rate of the withholding tax is 9.6%.

**Foreign tax relief.** The Algerian Direct Tax Code does not provide for foreign tax relief.

### C. Determination of taxable income

**General.** The computation of taxable income is based on financial statements prepared according to generally accepted accounting principles, provided they are not incompatible with the provisions of the Algerian Direct Tax Code.

Taxable income is determined on the basis of profits and losses. Taxable income includes operating income and “extraordinary income,” such as capital gains, gains from the revaluation of business assets and subventions, subject to certain exclusions and business incentives.

In the determination of taxable income, any expenditure that is wholly, exclusively and necessarily incurred for the purposes of the exploitation of the business and the generation of income is deductible from gross income.

Financial expenses related to overseas loans, royalties, technical assistance fees and other fees payable in foreign currencies may be deducted for tax purposes during only the financial year of their effective payment.

Certain expenses are not deductible for tax purposes, including the following:

- Expenses, costs and rents of any type that are not directly assigned to operations (for example, premises leased for accommodation of members of the company’s management)
- Fines, interest on late payments and penalties, interest and increases in duties as a result of defaults or insufficiencies in tax returns or payments
- Gifts (except those for advertisements, the value of which does not exceed DZD500 per beneficiary)
- Subsidies or donations except those made to humanitarian organizations or associations or those made to nonprofit research organizations up to DZD1 million
- Restaurant, hotel and entertainment expenses not directly linked to the business

**Inventories.** Inventories are valued at cost in accordance with the new Algerian accounting and financial system.

**Provisions.** Provisions are generally deductible for income tax purposes if they satisfy the following conditions:

- They are established for losses or charges that are clearly identified and likely to occur.
- They are recorded both in the books and financial statements.
- They are listed on the statement of reserves attached to the annual tax return.

Reserves or the portion of them that are not used in accordance with their intended purposes or no longer have a purpose in the following financial year must be added back to the income in such financial year. Abusive establishment of provisions may result in

the provisions being added back to taxable income and related penalties applied.

**Depreciation.** Under the Algerian Direct Tax Code, depreciation of fixed assets must be calculated in accordance with the following:

- Generally accepted limits
- Applicable practices for each type of industry, business or operations
- Rules provided in tax laws with respect to the depreciation system

The following are the three depreciation methods:

- Straight-line method
- Progressive method
- Declining-balance method

The straight-line method is the standard method, while progressive or declining-balance methods may alternatively be used on election.

Under the Algerian Direct Tax Code, the basis of computation of deductible depreciation is limited for private passenger-type vehicles to a purchase value of DZD1 million. This cap of DZD1 million does not apply if such vehicles constitute the main object of the company's activities.

**Relief for losses.** Tax losses may be carried forward four years. They cannot be carried back.

**Groups of companies.** Under the Algerian Direct Tax Code, related companies subject to IBS may elect to form a tax-consolidated group. The parent company must make the election for this regime for a four-year period and the election must be accepted by the affiliated companies.

The group tax consolidation regime is based on the consolidation of the balance sheets of the related companies with the parent company.

A tax consolidation group may consist of an Algerian parent company and Algerian subsidiaries in which the parent company owns directly at least 90% of the capital if both of the following conditions are satisfied:

- The capital of the parent company is not owned partially or totally by the subsidiaries.
- 90% or more of the parent company is not owned by another company eligible to be a parent company.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; standard rate	17
Tax on professional activity	
General rate	2
Transport by pipeline of hydrocarbons	3
Apprenticeship tax	1
Training tax	1
Social security contributions; paid by	
Employer	26
Employees	9

Nature of tax	Rate (%)
Registration duties	
On sales of shares in stock companies and private limited companies	2.5
On sales of goodwill	5

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Algeria is the dinar (DZD).

Foreign-exchange regulations in Algeria are based on the principle of non-convertibility of Algerian dinars outside Algeria.

Payments or transfers made with respect to regular transactions within the meaning of Algerian regulations (including foreign-trade transactions and goods and services) are free, provided that certain conditions are fulfilled (particularly the bank domiciliation [the procedure under which a local party registers a contract with a local bank] and the delivery of a transfer certificate by the tax authorities). Algerian accredited intermediary banks must operate these transactions.

Dividends, profits and net proceeds from investments or the liquidation of investments can also be freely transferred outside Algeria, subject to compliance with certain requirements (particularly, the delivery of a transfer certificate by the tax authorities.

The realization of foreign investments, directly or in partnership, except for share capital, must be financed through Algerian financing institutions.

Foreign loans from foreign banks are prohibited in Algeria. However, an exception is provided for foreign financing through a current-account contribution by a foreign shareholder. Executive Decree No. 13-320 of 26 September 2013 determines the terms and conditions for a current-account contribution by a foreign shareholder.

Nonresidents may open bank accounts in Algerian dinars and/or in foreign currencies at Algerian accredited intermediary banks. These bank accounts are subject to specific conditions on opening and operation.

**Transfer pricing.** Under the Algerian tax rules, for Algerian taxpayers that are owned or controlled by an enterprise located in Algeria or outside Algeria or that own or control an enterprise located in Algeria or outside Algeria, the income indirectly transferred to the related enterprise, either through an increase or decrease of purchase or sale price or through any other means, may be added back to the Algerian taxpayer's taxable income. In the absence of any relevant information for the reassessment of tax, the taxable income is determined by comparison with income of similar enterprises that are regularly operated.

*Transfer-pricing documentation requirements.* On request of the tax authorities, in the framework of a tax audit, enterprises or companies operating in Algeria and undertaking cross-border and domestic transactions with related parties must provide supporting documentation relating to their transfer-pricing policies. Failure to answer or providing an insufficient answer triggers a

25% penalty per fiscal year calculated on the basis of the transfer-pricing reassessments resulting from the tax audit.

In addition, Algerian-based taxpayers that have tax issues are under the responsibility of the Department for Big-sized Enterprises (mainly companies belonging to foreign international groups, legal entities or businesses operating in the hydrocarbon industry) must file transfer-pricing documentation with their annual tax returns to the tax authorities. The lack of documentation or insufficient documentation at the time of the tax return filing triggers a DZD500,000 tax penalty, and in the case of a tax audit, an additional penalty of 25% of deemed transferred profits applies.

## F. Treaty withholding tax rates

*The changes reflected in Provisions and Tax depreciation in Section C are contained in a draft law, which had not yet been approved. Readers should obtain updated information before engaging in transactions.*

## A. At a glance

Corporate Income Tax Rate (%)	30 (a)(b)
Capital Gains Tax Rate (%)	30 (c)
Branch Tax Rate (%)	30 (a)(b)
Withholding Tax (%)	
Dividends	10 (d)
Interest	10/15 (e)
Royalties	10
Payments for Services	6.5 (f)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (g)

- (a) Income from certain activities, such as agriculture, forestry and cattle raising, is subject to tax at a rate of 15%. Mining activities are subject to tax at a rate of 25%. Oil and gas companies are subject to Oil Income Tax rather than Industrial Tax (corporate income tax). See Section B.
- (b) Tax exemptions or tax reductions are available under the Private Investment Law as well as specific legislation for micro, small- and medium-sized companies. For details, see Section B.

- (c) Gains derived from the sale of securities that are not subject to corporate income tax or personal income tax are subject to tax at a rate of 10%. If such gains are derived from treasury bills, treasury bonds and titles issued by the Angolan Central Bank (Banco Nacional de Angola, or BNA) with a maturity of at least three years or from shares of listed companies, a 50% tax relief may apply.
- (d) Certain dividends are exempt from tax (see Section B). A 5% rate applies to dividends paid by listed companies during a five-year period beginning on 19 November 2014.
- (e) In general, interest is subject to a 15% rate. However, certain interest, such as interest on shareholders loans, corporate bonds, bank deposits, treasury bills, treasury bonds and titles issued by the BNA is subject to a 10% rate. Interest on treasury bills and treasury bonds and titles issued by the BNA is subject to a reduced rate of 5% if the maturity is at least three years.
- (f) Some exceptions exist.
- (g) Mining companies may carry forward losses for seven years, up to a limit of 50% of the turnover.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies carrying out industrial and commercial activities in Angola are subject to Industrial Tax (corporate income tax).

An Angolan company, which is a company that has its head office or effective place of management and control in Angola, is subject to Industrial Tax on its worldwide profits.

Foreign entities with a permanent establishment in Angola are subject to Industrial Tax only on profits imputed to the permanent establishment. The tax law provides a force of attraction principle for permanent establishments.

All companies, regardless of whether they have a permanent establishment in Angola, are subject to withholding tax on payments received for services rendered (for details, see *Rates of corporate tax*).

**Rates of corporate tax.** The standard Industrial Tax rate is 30%.

Income from certain activities, such as agriculture, forestry and cattle raising, is subject to a reduced tax rate of 15%.

In addition, the Private Investment Law, which concerns private investment in Angola, provides tax relief for companies that operate in the most disfavored regions of Angola and to companies operating in industries that make use of local resources. The regions are grouped into the following three zones:

- Zone A, which consists of the region of Luanda, some main municipalities of Benguela, Cabinda and Huíla, and the municipality of Lobito
- Zone B, which consists of some regions of the municipalities of Benguela, Cabinda and Huíla, and the regions of Bengo, Cuanza-Norte, Cuanza-Sul, Malange, Namibe and Uíge
- Zone C, which consists of the regions of Bié, Cuando-Cubango, Cunene, Huambo, Luanda-Norte, Luanda-Sul, Moxito and Zaire

The law provides for the following tax incentives, which vary among the zones:

- Up to a 6-year exemption from customs duties (including consumption tax but excluding stamp duty and service fees) or reduced rates for used machinery and equipment
- Up to a 10-year exemption or tax rate reduction (up to 50%) for Industrial Tax

- Up to a 9-year exemption or tax rate reduction for dividend withholding tax
- Exemption or tax rate reduction for property transfer tax

Micro, small- and medium-sized companies covered by special legislation can benefit from the following reductions of the Industrial Tax rate:

- Micro companies: payment of a special tax at a rate of 2% on gross sales for the first two to five years of activity, depending on the localization
- Small- and medium-sized companies: tax rate reduction between 10% and 50% for the first two to five years of activity, depending on the localization

Micro, small- and medium-sized industrial companies benefit from an exemption from consumption tax on raw materials. Micro companies also benefit from a stamp duty exemption.

All companies, regardless of whether they have a permanent establishment in Angola, are subject to withholding tax on payments received for services rendered. The withholding tax applies regardless of whether the services are rendered in or outside Angola. The rate of the withholding tax is 6.5%.

The following services are excluded from withholding tax:

- Teaching and similar services
- Health services
- Services for which the amount paid does not exceed AOA20,000
- Passenger transportation services
- Lease of machinery and equipment subject to Investment Income Tax

A similar exclusion applies to financial and insurance intermediation services, hotel and similar services, and telecommunication services, if the service provider has a taxable presence in Angola. For local service providers, withholding tax does not apply to documented recharges between related parties. The withholding tax base excludes payments for raw materials, parts and other materials, if the service provider has a taxable presence in Angola.

The payer must withhold the tax from each payment and remit the withholding tax to the Angolan government. The tax withheld is considered to be a payment on account if the recipient has a residence, head office or permanent establishment in Angola. Excess withholding tax can be carried forward for five years. Otherwise, the tax is final.

Income from oil and gas extraction is subject to Oil Income Tax at a total rate of 50% (under production-sharing agreements) or 65.75% (under other types of joint-ventures). Angolan companies benefit from a reduced Oil Income Tax rate equivalent to that of Industrial Tax. In addition, companies engaged in exploration for and production of oil, gas and similar products must pay Oil Production Tax at a total rate of 20%. Oil Transaction Tax and a Surface Surcharge may also be levied at rates of 70% and USD300 per square kilometer, respectively. Oil Production Tax and Oil Transaction Tax are not payable under production-sharing agreements.

Contracts, such as production-sharing agreements, between oil and gas companies and the Angolan government generally override the Oil Production Tax and Oil Transaction Tax and may set forth different taxes and applicable rates.

Additional taxes and charges apply within the oil and gas and mining industries. Also, specific tax rules apply to the liquefied natural gas (LNG) project, including withholding tax exemptions on certain interest, dividends, royalties and services income.

**Capital gains.** Capital gains on profits derived from the sale of fixed assets are subject to Industrial Tax at the regular tax rate of 30%. Capital gains on shares or other instruments generating investment income that is not taxable for Industrial Tax or personal income tax purposes are subject to Investment Income Tax at a rate of 10%.

However, a 50% relief is available for capital gains derived from listed shares or from corporate bonds, other securities, treasury bonds, treasury bills and BNA securities, if they are negotiated in a regulated market and if their maturity is of at least three years.

**Administration.** The tax year is the calendar year.

All companies engaging in activities in Angola must register with the tax department to obtain a taxpayer number.

Companies, including foreign companies with a permanent establishment in Angola, must file an annual corporate income tax return, together with their financial statements and other documentation, by 31 May in the year following the tax year.

Companies must make an advance payment of Industrial Tax in July or August of the tax year, depending of the type of taxpayer. The tax base is the turnover from the sale of goods computed during the first six months of the tax year. A 2% rate is applied to this amount of turnover to compute the amount of the advance payment.

Penalties are imposed for a failure to file tax returns and other required documents. If, on the final assessment, the tax authorities determine that a further payment is required and that the taxpayer is at fault, interest is imposed on the amount of the additional payment. Fines, which are generally based on the amount of tax due, are also imposed. If the tax due is not paid, additional interest is imposed from the date of the tax authorities' notice that an additional payment is due.

**Dividends.** Companies are not subject to Industrial Tax on the gross amount of dividends received.

A 10% Investment Income Tax, which is withheld at source, is imposed on dividends.

The Investment Income Tax Code contains a participation exemption measure. Under this measure, the 10% withholding tax exemption applies to dividends received by Angolan parent companies from Angolan subsidiaries, subject to minimum 25% and one-year holding requirements.

**Foreign tax relief.** In general, no relief is granted for foreign taxes paid by Angolan taxpayers.

### C. Determination of trading income

**General.** Taxable income is the income reported in companies' financial statements, subject to certain adjustments. Expenses considered indispensable in the production of income and the maintenance of a production unit are deductible. The following expenses, among others, are not deductible for Industrial Tax purposes:

- Representation expenses, such as travel expenses, deemed to be unreasonable by the tax authorities
- Interest on shareholders loans
- Investment Income Tax and Urban Property Tax
- Costs associated with rented property
- Costs related to previous years
- Donations not covered by the Law of Patronage
- Non-documented expenses and improperly documented expenses
- Confidential expenses (an expense is considered a confidential expense if no valid documentation legally supports the expense and if its nature, function or origin are not materially justifiable)
- Fines and penalties

Rental income subject to Urban Property Tax and income subject to Investment Income Tax is excluded from the computation of the Industrial Tax base.

**Inventories.** Inventories may be valued by any currently acceptable method provided that the method is consistently applied and is based on documented purchase prices.

**Provisions.** Provisions for the following items are allowable:

- Bad debts that do not exceed 10% of the balance of receivables (and do not exceed 20% of that balance on an accumulated basis)
- Risks that cannot be insured and may have to be paid
- Depreciation in the value of inventory, provided that it does not exceed 0.5% to 3% (depending on the nature of the activity), up to a limit that can vary between 2.5% and 12% of the value of the inventory

**Tax depreciation.** Depreciation rates are provided in the law. The following are some of the applicable rates.

<b>Asset</b>	<b>Rate (%)</b>
Vehicles	25
Office buildings	4
Industrial buildings	4
Machinery, equipment and devices	12.5 to 33.33
Furniture	8.33 to 50

These rates may vary depending on the industry sector.

**Relief for losses.** Companies may carry forward tax losses for three years. This period is increased to seven years for mining companies (up to a limit of 50% of the turnover). No carryback is allowed.

**Groups of companies.** The Large Taxpayers Statute entered into force in October 2013. It establishes that Angolan Large Taxpayers that are integrated in a group of companies may be taxed on the sum of the taxable results obtained by the entities included in the group. For such purpose, a special request through a specific official form (Modelo 5), still pending approval, must be submitted

to the tax authorities by the end of February following the tax year for which the application of this special regime is requested. The Chief of the Large Taxpayer's Tax Office must expressly approve this request and, accordingly, the application of the group taxation regime.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Training levy, on oil and gas exploration and production companies and their subcontractors	
Production companies and companies engaged in refining and processing of petroleum	USD0.15 per barrel
Companies owning a prospecting license	USD100,000 a year
Exploration companies	USD300,000 a year
Subcontractors under a contract with a term exceeding one year (levied on annual gross income) and entities engaged in the storage, transport, distribution and trading of petroleum (levied on revenue derived from such activities)	0.5%
Stamp duty	
On the amount of receipts	1%
On the acquisition of real estate	0.3%
On leasing and subleasing of real estate	0.1%/0.4%
On company's capital	0.1%
On guarantees	0.1% to 0.3%
On financing	0.1% to 0.5%
On financial leasing of real estate	0.3%
On leasing of movable property	0.4%
On imports	1%
On certain exports	0.5%
Consumption tax; rate varies according to type of good and service	2% to 30%
Custom duties on imports	2% to 50%
Customs emoluments	2%
Urban Property Tax; imposed on 60% of the gross rent	25%
Property transfer tax	2%
Social security contributions, on salaries and additional remuneration; the contributions are not payable by expatriates working in Angola if they make contributions to the social security scheme or a similar scheme in their home countries; paid by	
Employer	8%
Employee	3%

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Ministry of Economy, together with the BNA, supervises all foreign-exchange operations. Commercial banks usually act as intermediaries of companies to obtain clearance from the BNA.

The BNA issued Bank Order No. 13/13, of 31 July 2013, which was published in the *Official Gazette* of 6 August 2013. This order sets out the new foreign-exchange procedures to be adopted with respect to current invisible operations. Notwithstanding the foreign exchange integrated reporting system (SINOC), to simplify the monitoring procedures regarding the current invisible operations, the order establishes the following new thresholds for transactions that do not require prior approval by the BNA:

- Transactions amounting up to AOA300 million (approximately USD3 million) or the equivalent in another currency carried out by oil and gas service providers
- Other transactions up to AOA100 million (USD1 million) or the equivalent in another currency

Operations with a value exceeding the above mentioned thresholds must be cleared in advance by the BNA. No thresholds are provided regarding the transfer of salaries.

In general, repatriation of profits is allowed for approved foreign-investment projects if certain requirements are met. In certain cases, a time schedule for repatriation of profits may be imposed.

However, the oil and gas sector is subject to a specific foreign-exchange control regime, which aims primarily to establish uniform treatment in this sector by replacing the multiple exchange regimes that have been applied to oil and gas upstream companies operating in Angola, thereby providing fair treatment to all investors.

These foreign-exchange control rules cover the trade of goods, current invisible operations (according to the Angolan National Bank Instructive, these operations are services, royalties, interest, travel costs and salaries) and capital movements arising from the prospecting, exploration, evaluation, development and production of crude oil and natural gas.

For purposes of the rules, exchange operations encompass the following:

- Purchase and sale of foreign currency
- Opening of foreign currency bank accounts in Angola by resident or nonresident entities and the transactions carried out through these bank accounts
- Opening of national currency bank accounts in Angola by nonresident entities and the transactions carried out through these bank accounts
- Settlement of all transactions of goods, current invisible operations and capital movements

The National Company of Petroleum of Angola (Sociedade Nacional de Petróleos de Angola, or SONANGOL, the national concessionaire) and domestic or foreign corporate investors must carry out the settlement of foreign-exchange transactions through bank institutions that are domiciled in Angola and are authorized to conduct foreign exchange business. They must open bank accounts in foreign currency and deposit sufficient funds for tax payments and other mandatory tax payments and for settlement of goods and services provided by residents or nonresident entities.

The BNA has established a phased implementation of the procedures and mechanisms to be adopted by the agents carrying out foreign-exchange transactions. Under this phased implementation, the following regime applies:

- Effective from 1 July 2013, all payments made by oil and gas upstream companies related to the acquisition of goods and services from local suppliers must be carried out through Angolan bank accounts in local currency.
- Effective from 1 October 2013, all payments made to nonresident entities must be carried out through Angolan bank accounts.

**Thin-capitalization rules.** No thin-capitalization rules are in effect in Angola.

**Anti-avoidance legislation.** The arm's-length principle applies in Angola. Consequently, the tax authorities may adjust the taxable income derived from transactions between related parties.

**Related-party transactions.** The Large Taxpayers Statute contains specific rules governing "special relations" between taxpayers, which entered into force in October 2013. Under this regime, a special relationship is deemed to occur if one entity exercises, directly or indirectly, a significant influence on the management decisions of another entity. The law also establishes that a Large Taxpayer that has annual turnover exceeding AOA7 billion (approximately USD70 million) at date of closing the accounts must prepare and submit a transfer-pricing file to the Angolan tax authorities. This transfer-pricing file, which must be prepared on an annual basis, must detail the relationships and prices established by the Large Taxpayers with the companies and entities with which they have "special relations." The transfer-pricing file must be submitted by the end of the sixth month following the year-end to which the file relates. With respect to the economic analysis of the transactions, the new regime provides for the application of the following methods only:

- Comparable uncontrolled price method
- Resale-minus method
- Cost-plus method

**Invoice requirements.** Effective from 1 December 2013, new requirements are imposed with respect to the keeping and archiving invoices or equivalent documents by individuals or legal entities with their domicile, registered office, effective management or permanent establishment in Angola.

**Tax-neutrality regime for mergers and demergers.** A tax-neutrality regime for mergers and demergers has been introduced for Industrial Tax purposes at the level of the merged or spun-off companies, but not at the level of the respective shareholders. However, this regime applies only to companies that are classified as Large Taxpayers in the Large Taxpayers Statute (see *Groups of companies* in Section C).

**Stand-alone tax.** In addition to being nondeductible, certain expenses will be subject to a stand-alone tax, effective from 2017. This tax is expected to apply to improperly documented expenses (2%), non-documented expenses (4%), confidential expenses (30%, or 50% in certain situations) and donations not made in accordance with the Law of Patronage (15%).

**F. Tax treaties**

Angola does not have any tax treaties in force. Tax treaty negotiations between Angola and Portugal have begun, and the treaty will follow the United Nations model convention. In addition, it is expected that Angola will implement a tax treaty network with countries with which it has preferential socioeconomic relations, which are Southern Africa Development Community (SADC) countries and member countries of the Community of Portuguese Language Countries (CPLP).

Angola has entered into an agreement with Portugal on the reciprocal promotion and protection of investments. However, this agreement does not provide any specific tax benefits.

Portugal provides a participation exemption regime for Angolan-source dividends paid to Portuguese corporate shareholders if certain conditions are met.

**A. At a glance**

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	15/35 (b)
Branch Tax Rate (%)	35 (a)
Withholding Tax (%)	
Dividends	10/41.5 (c)
Interest	15.05/35 (d)
Royalties from Patents, Know-how, etc.	21/28/31.5 (d)
Branch Remittance Tax	10/41.5 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) A Tax on Minimum Presumed Income is payable to the extent it exceeds regular corporate income tax for the year. For details, see Section B.
- (b) The 15% rate applies to capital gains derived by foreign residents from sales of shares, quotas, and other participations in entities, titles, bonds and other securities. Similar treatment is granted to Argentine individuals. Argentine corporate residents are subject to the regular 35% corporate rate.
- (c) The 10% dividend withholding tax is calculated on after-tax dividend distributions. However, if the amount of a dividend distribution or a profit remittance exceeds the after-tax accumulated taxable income of the taxpayer, a separate final withholding tax of 35% may be imposed on the excess, regardless of the application of the general 10% withholding tax, thereby resulting in an effective rate of 41.5%.
- (d) These are final withholding taxes imposed on nonresidents only. For details concerning the rates, see Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are taxed on worldwide income. Any profits, including capital gains, are taxable. Companies incorporated in Argentina and branches of foreign companies are considered to be resident companies.

**Rates of corporate tax.** Corporate tax is payable at a rate of 35%.

**Tax on Minimum Presumed Income.** The Tax on Minimum Presumed Income (TMPI) is imposed on resident companies and branches of foreign companies. The TMPI is payable to the extent it exceeds regular corporate income tax for the year.

The tax base for the TMPI is the resident company's or branch's worldwide assets at the end of the tax year. Certain specified assets are excluded from the calculation of the tax base.

The standard rate of TMPI is 1%, but special rates apply to certain types of companies.

TMPI that is paid may offset regular income tax in the following 10 tax years.

**Capital gains.** Capital gains derived by tax-resident companies are included in taxable income and taxed at the regular corporate tax rate. Capital gains derived by non-Argentine companies from the sale, exchange, barter or disposal of shares, quotas, participations in entities, titles, bonds and other securities are subject to a 15% tax. This tax may be calculated on actual net income or on 90% presumed income, thereby resulting in an effective 13.5% tax on the sale price.

**Administration.** The tax year for a company is its accounting year. Companies are required to make 10 advance payments of corporate income tax. The first payment is equal to 25% of the preceding year's tax and the other payments are each equal to 8.33% of such tax. The payments are due monthly beginning in the sixth month after the end of the accounting year. The due dates depend on the company's taxpayer registration number.

Under certain circumstances, advance payments of TMPI (see *Tax on Minimum Presumed Income*) may be required.

Companies must file their tax returns and pay any balance due by a specified date in the fifth month after their accounting year. If the payment is late, interest is charged.

**Dividends.** Dividends and branch remittances are subject to a 10% withholding tax calculated on after-tax dividend distributions. If the amount of a dividend distribution or a profit remittance exceeds the after-tax accumulated taxable income of the payer (determined in accordance with rules in the income tax law), a separate final withholding tax of 35% is imposed on the excess, regardless of the application of the general 10% dividend withholding tax, thereby resulting in an effective rate of 41.5%.

**Withholding taxes on interest and royalties.** Final withholding taxes are imposed on interest and royalties paid to nonresidents.

A withholding tax rate of 15.05% applies to the following types of interest payments:

- Interest on loans obtained by Argentine financial entities.
- Interest on loans granted by foreign financial entities located in the following jurisdictions:
  - Jurisdictions listed as cooperators for purposes of fiscal transparency under the Argentine income tax regulations
  - Jurisdictions that have signed exchange-of-information agreements with Argentina and have internal rules providing that no banking, stock market or other secrecy regulations can be applied to requests for information by the Argentine tax authorities
- Interest on loans for the importation of movable assets, except automobiles, if the loan is granted by the supplier of the goods.
- Under certain conditions, interest on investments in Argentine financial entities.

The withholding tax rate for all other interest payments to non-residents is 35%.

The general withholding tax rate for royalties is 31.5%. If certain requirements are satisfied, a 21% rate may apply to technical assistance payments and a 28% rate may apply to certain royalties.

**Foreign tax relief.** Resident companies may credit foreign income taxes against their Argentine tax liability, up to the amount of the increase in that liability resulting from the inclusion of foreign-source income in the tax base.

Direct and indirect foreign tax credits are available. To qualify for an indirect foreign tax credit, an Argentine company must own directly at least 25% of a first-tier subsidiary's shares. In addition, for a foreign tax credit regarding a second-tier subsidiary, an Argentine company must have an indirect ownership interest of at least 15%. The credit does not apply below the second tier.

### C. Determination of trading income

**General.** Tax is applied to taxable income, which is the accounting profit (not adjusted for inflation) earned in the tax period after adjustments provided for by the tax law. Exemptions are usually insignificant.

Expenses are deductible to the extent incurred in producing taxable income, subject to certain restrictions and limitations, including, among others, those applicable to the following:

- Representation expenses
- Directors' fees
- Royalties for patents and trademarks paid to nonresidents

Depreciation, rental payments and all other automobile expenses, such as license fees, insurance, fuel and maintenance, are also deductible, subject to certain restrictions. In general, certain limitations apply to the deductibility of interest payments to foreign related entities that are not subject to the withholding tax rate of 35% (see Section E).

Any expense incurred by an Argentine company in favor of a foreign related party that is deemed Argentine-source income for the recipient of the payment can be deducted for tax purposes in the year of accrual only if the payment is made by the date when the income tax return for that year is due. Otherwise, such expenses must be deducted in the year of payment. This limitation also

applies to expenses paid to individuals or entities located in tax havens, regardless of whether they are related parties.

**Foreign-exchange losses.** Non-capital foreign-currency gains and losses arising from customary business transactions are treated as business income or expenses for the year in which the exchange fluctuation occurs.

**Inventories.** Stock is valued according to procedures established by the tax law, which result in values nearly equal to its market value or replacement cost at the end of the tax period, depending on the type of goods.

**Provisions.** A provision for bad debts is allowed. However, it must be computed according to rules prescribed by the tax law.

**Depreciation.** Tangible assets may be depreciated using the straight-line method over the assets' expected lives. A method based on effective use may also be acceptable. In general, buildings are depreciated at an annual rate of 2%. However, a higher rate may be acceptable if it is established that, because of the materials used to construct the building, the expected useful life is less than 50 years. The law does not specify rates for movable assets. Intangible property may be depreciated only if it has a limited life based on its characteristics. Certain assets, such as goodwill and trade names, may not be depreciated.

**Relief for losses.** Tax losses may be carried forward for five tax periods. Losses resulting from sales of shares or from foreign-source activities may offset only the same type of income. Loss carrybacks are not permitted.

Except for hedge transactions, losses resulting from the rights contained in derivative instruments or contracts may offset only the net income generated by such rights during the fiscal year in which the losses were incurred or in the following five fiscal years. For this purpose, a transaction or contract involving derivatives is considered a hedge transaction if its purpose is to reduce the impact of future fluctuations in market prices or fees on the results of the primary economic activities of the hedging company.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods delivered and services rendered in Argentina, on services rendered outside Argentina that are used or exploited in Argentina, and on imports	
Standard rate	21
Other rates	10.5/27
Tax on financial transactions; generally imposed on debits and credits with respect to checking accounts; a portion of the tax may be creditable against other taxes	
General rate	0.6
Other rates	0.05/0.075/0.1/ 0.25/0.5/1.2

Nature of tax	Rate (%)
Various local taxes on gross receipts, real estate and other items	Various
Social security taxes (including medical care contributions), on monthly salaries; paid by employer; a portion may be creditable against VAT; the creditable portion varies depending on where the employees render services	23/27
Export duties; general rates; higher rates apply to certain exports (oil, grains and meat)	5/10
Tax on personal assets; imposed on all legal persons and individuals domiciled abroad holding ownership interests in Argentine companies; tax is calculated based on the equity value of the Argentine company; tax is paid by the Argentine company, but the company may recover the tax paid from the foreign shareholder	0.50

## E. Miscellaneous matters

**Foreign-exchange controls.** The Executive Branch and the Central Bank have issued regulations that establish certain requirements for the transfer of funds abroad.

Exporters must repatriate into Argentina the cash derived from exports of goods and services within a specified time period.

Funds deriving from loans granted from abroad must be received in Argentina and remain in the country for a minimum term. In certain circumstances, 30% of the funds received from abroad must be held as foreign currency in a non-interest-bearing deposit for a one-year period.

Various types of payments abroad, including dividends, principal and interest and payments for services and for imports of goods, are subject to certain requirements. In addition to Central Bank regulations, import transactions must be approved in advance by the tax authorities through an Early Import Declaration (*Declaración Jurada Anticipada de Importación*, or DJAI). Payments for services, royalties and similar items are subject to the Early Declaration System for Services (*Declaración Jurada Anticipada de Servicios*, or DJAS). Payments of interest, dividends and other items are subject to the Early Declaration System of Payments Abroad (*Declaración Anticipada de Pagos al Exterior*, or DAPE).

**Debt-to-equity rules.** Under general principles, transactions between related parties must be made on an arm's-length basis.

A debt-to-equity ratio of 2:1 for the deduction of interest applies to loans granted by foreign entities that control the Argentine borrower company (according to the definition provided for transfer-pricing purposes), except for those cases in which interest payments are subject to a withholding tax rate of 35%.

If the debt-to-equity ratio is applicable, interest paid on liabilities in excess of the ratio is nondeductible. The interest expenses disallowed as a deduction as a result of this limitation are treated as dividends and may not be deducted in future years.

**Transfer pricing.** The Argentine law includes transfer-pricing rules that generally apply to transactions between related parties. In addition, transactions between unrelated parties may also be subject to these rules. Transactions with entities and individuals located in jurisdictions not considered as cooperators for purposes of fiscal transparency (the federal tax authorities are in charge of creating and updating the list of jurisdictions qualifying as cooperators) are deemed to be not carried out at arm's length. The law provides for the following transfer-pricing methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

If exports of agricultural commodities and other products with a publicly quoted price are made to related parties and if an international intermediary who is not the effective purchaser of the products participates in the transaction, the appropriate transfer price is deemed to be the higher of the market quote on the day the products are delivered and the price agreed to by the parties. This rule does not apply if the foreign intermediary meets the following requirements:

- It has a real presence and maintains a commercial establishment to manage its own activities in its country of residence, and it has assets, risks and functions (operations) that correspond with the volume of its transactions.
- Its principal source of income is not passive income, income from trading goods to or from Argentina, or income from intra-group trading.
- Its intragroup operations do not exceed 30% of its annual transactions.

A taxpayer must submit the following to the tax authorities to demonstrate the reasonableness of its transfer-pricing policy: special tax returns; and a special report signed by an independent certified public accountant, which is based on a mandatory transfer-pricing study.

## F. Treaty withholding tax rates

Some of Argentina's tax treaties establish maximum tax rates lower than those under general tax law. To benefit from a reduced treaty withholding tax rate, certain formal requirements must be met. The following table shows the lower of the treaty rate and the rate under domestic tax law.

	<b>Dividends (a)</b> %	<b>Interest (e)</b> %	<b>Royalties (e)</b> %
Australia	10/15 (b)	0/12	10/15
Belgium	10/15 (b)	0/12	3/5/10/15 (f)
Bolivia	10/41.5 (d)	15.05/35	21/28/31.5
Brazil	10/41.5 (d)	15.05/35	21/28/31.5
Canada	10/15 (b)	0/12.5	3/5/10/15 (f)
Denmark	10/15 (b)	0/12	3/5/10/15 (f)
Finland	10/15 (b)	0/15	3/5/10/15 (f)
France	10/15 (c)	15.05/20	18
Germany	10/15 (c)	10/15	15
Italy	10/15 (c)	15.05/20	10/18 (g)

	<b>Dividends (a)</b> %	<b>Interest (e)</b> %	<b>Royalties (e)</b> %
Netherlands	10/15 (b)	0/12	3/5/10/15 (f)
Norway	10/15 (b)	0/12	3/5/10/15 (f)
Russian Federation	10/15 (b)	15	15
Spain	10/15 (b)	0/12	3/5/10/15 (f)
Sweden	10/15 (b)	0/12	3/5/10/15 (f)
United Kingdom	10/15 (b)	0/12	3/5/10/15 (f)
Uruguay	10/41.5 (d)	15.05/35	21/28/31.5
Non-treaty countries	10/41.5 (d)	15.05/35 (h)	21/28/31.5 (h)

- (a) As discussed in Section B, under domestic law, a 10% withholding tax applies to dividends paid. If the dividend distributions exceed the after-tax accumulated taxable income of the payer, a separate final 35% withholding tax applies to the excess, regardless of the application of the general 10% withholding tax, thereby resulting in a total effective rate of 41.5%. If the treaty establishes reduced rates, the maximum applicable withholding rate is the treaty rate. Footnotes (b) and (c) are referenced to the treaties that establish maximum rates.
- (b) These treaties establish maximum rates of 10% or 15%. The 10% rate applies if the beneficial owner of the dividend is a company that controls, directly or indirectly, at least 25% of the voting power of the payer. The 15% rate applies to other cases. These rates are the maximum rates applicable to dividend payments and accordingly may limit the applicable withholding rate if the 41.5% rate applies. If only the general 10% withholding tax applies, no effective reduction results from the application of the treaties.
- (c) These treaties establish a maximum rate of 15%. This rate is the maximum rate applicable to dividend payments and accordingly may limit the applicable withholding rate if the 41.5% rate applies. If only the general 10% withholding applies, no effective reduction results from the application of the treaties.
- (d) These treaties do not establish a maximum withholding rate. The general 10% and the 41.5% withholding tax rates established by the domestic law may apply.
- (e) The rates listed are the lower of the treaty or statutory rates. For details concerning the domestic rates, see Section B.
- (f) In general, the rates apply to the following categories of payments:
- 3% for the use of, or right to use, news
  - 5% for the use of, or right to use, copyrights of literary, dramatic, musical or other artistic works (but not royalties with respect to motion picture films and works on film or videotape or other means of production for use in connection with television)
  - 10% for the use of, or right to use, industrial, commercial or scientific equipment or patents, trademarks, designs, models, secret formulas or processes, or for the use of or information concerning scientific experience, including payments for the rendering of technical assistance
  - 15% for other royalties
- These categories may differ slightly from treaty to treaty.
- (g) The 10% rate applies to royalties for the use of, or right to use, copyrights of literary, artistic or scientific works. The 18% rate applies to other royalties.
- (h) For details concerning these rates, see Section B.

Carryback	0
Carryforward	5

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident and nonresident entities pay corporate income tax in Armenia. Resident entities are entities and investment funds established in Armenia except for pension funds and separate subdivisions (branches or representation offices) of foreign organizations. Nonresident entities are entities established in foreign countries, international organizations and organizations established by them outside Armenia. Resident entities are taxed on their worldwide income, which consists of income received from sources in and outside Armenia. Nonresident entities are taxed on Armenian-source income only.

Income earned through a permanent establishment in Armenia, net of tax-deductible expenses, is taxed at the regular corporate income tax rate of 20%. A permanent establishment is defined as a fixed place of business activities in Armenia recognized by the

tax authorities through which the enterprise wholly or partly carries on its business. It generally includes organizations or natural persons who represent foreign legal entities conducting commercial activities in Armenia. Domestic tax law and double tax treaties list activities that do not result in a taxable permanent establishment. Foreign legal entities deriving income from the source in Armenia without a permanent establishment there are subject to withholding tax on their Armenian-source income at a rate of 5%, 10% or 20% (see the withholding tax rates in Section A).

Armenian law allows foreign investment in various forms, including investment through wholly or partially foreign-owned subsidiaries, share participations in joint stock companies and joint ventures with Armenian legal entities and citizens, permanent establishments and other types of presence.

**Tax rate.** The regular corporate income tax rate is 20%. For investment funds, the corporate income tax rate is 0.01% of net assets.

**Capital gains.** No separate capital gains tax is imposed in Armenia. Realized capital gains are included in taxable income and are subject to tax at the regular corporate income tax rate.

Realized capital losses can be carried forward together with other losses and be offset against taxable income of future tax years.

**Administration.** The tax year is the calendar year.

Both Armenian and foreign legal entities conducting business activities in Armenia through a permanent establishment must make advance payments of corporate income tax during the year. Armenian legal entities must make quarterly advance payments, in the amount of 18.75% of the actual amount of the corporate income tax for the preceding year, by the 15th day of the last month of the quarter. Permanent establishments of foreign legal entities must make half-yearly advance payments in equal parts, in the amount of 1/4 of the corporate income tax for the preceding year, by 1 July and 31 December of the tax year.

Permanent establishments of foreign legal entities are not required to make advance payments if their corporate income tax for the preceding year was less than AMD2 million.

If the total sum of advance payments exceeds the tax due for the tax year, the excess shall be refunded to the taxpayer according to the Law of Armenia "On Taxes" if the taxpayer applies for a refund. However, in practice, refunds are rare, and accordingly taxpayers apply overpayments against future tax liabilities.

The annual corporate income tax calculation must be filed and submitted to the Tax Inspectorate by 15 April of the year following the tax year. The corporate income tax must be paid to the state budget by 25 April of the year following the tax year.

Fines are charged on late tax payments at a rate of 0.15% of the tax due for each day of delay, up to a maximum of 365 days. If the taxpayer fails to submit the corporate income tax declaration to the Tax Inspectorate by the due date, a penalty equal to 5% of the total amount of calculated tax is imposed on the taxpayer for each 15-day period. The total amount of the penalties cannot exceed the total amount of the principal tax liability. For the underreporting

of taxable income, a penalty equal to 50% of the underreported amount is assessed to the taxpayer. For the overreporting of losses in the corporate income tax calculation filed with the Tax Inspectorate, the taxpayer is subject to a penalty equal to 20% of the overreported loss. If a taxpayer fails to keep accounts or incorrectly prepares accounting reports, calculations, returns, and other documents and information stipulated by the tax law, a penalty equal to 10% of the amount of the reduction in calculated tax resulting from these violations is imposed on the taxpayer.

**Dividends.** Dividend withholding tax at a rate of 10% is imposed on dividends paid from Armenian sources to nonresident legal entities. Dividends paid to individuals and resident legal entities are not subject to withholding tax. Dividends received by resident taxpayers from participations in the equity of other legal entities or enterprises that do not have the status of a legal entity are not subject to tax.

**Interest.** Interest withholding tax at a rate of 10% is imposed on interest paid from Armenian sources to individuals and nonresident legal entities. Armenian legal entities receiving interest payments include such payments in their taxable income and are subject to tax on these payments at the normal corporate income tax rate.

**Foreign tax relief.** The amount of corporate income tax withheld from Armenian residents in foreign countries in accordance with the laws of the foreign countries is credited against the corporate income tax payable in Armenia. However, the amount of the credit may not exceed the amount of the corporate income tax payable in Armenia on the income received in the foreign country. If the amount of the credit exceeds the corporate income tax liability for the tax year, the excess amount may be credited against the corporate income tax in subsequent tax years.

### C. Determination of taxable income

**General.** Taxable income is defined as a positive difference between gross income of the taxpayer and all deductions allowed by the law.

Gross income comprises all revenues of the taxpayer received in the reporting year, except for revenues that are not treated as income according to the law. Gross income includes the following:

- Trading income
- Capital gains
- Income from financial activities
- Gratuitously received assets and income from discounts or remissions of liabilities
- Other items of income

Income received in foreign currency is converted into drams at the daily exchange rate determined by the Central Bank of Armenia for the date of receipt of the income.

Deductible expenses include all necessary and documentary supported expenses that are exclusively and directly related to the conducting of business and the receiving of income. However, certain expenses are nondeductible or partially nondeductible for tax purposes.

Nondeductible expenses include the following:

- Fines, penalties and other proprietary sanctions transferred to the state and municipal budgets
- Assets provided free of charge and remitted debts
- Allocations provided for unions and other structures of non-state administration
- Expenses for the maintenance of servicing units (free provision of buildings and the settling of fees for utilities of public catering enterprises)
- Expenses for services that are not related to the production of goods (for example, planning activities for towns and other populated areas and promotion of agricultural activities)
- Expenses related to the obtaining of income that is deductible from gross income
- For taxpayers other than banks, credit organizations, insurance companies and investment funds, interest paid on loans and borrowings if such borrowings or loans are provided by the taxpayers to third parties free of interest
- Payments made by taxpayers for leased assets if the assets are provided by them to third parties for free-of-charge use

Partially nondeductible expenses include the following:

- Payments levied by the state for pollution of the environment that exceed 0.5% of gross income for the tax year.
- Expenses for advertisements outside Armenia that exceed 3% of the gross income for the tax year or 20% of the value of goods and services exported by the taxpayer during the tax year.
- Expenses for the training of staff outside Armenia that exceed 4% (but not more than AMD3 million per employee) of the gross income for the tax year.
- Expenses for additional training of staff outside Armenia that exceed 1% (but not more than AMD1 million per employee) of the gross income for the tax year.
- Expenses for marketing outside Armenia that exceed 2% of the gross income for the reporting year, 15% of the value of services and goods exported by the taxpayer during the tax year or 5% of the value of goods imported by the taxpayer during the tax year.
- Expenses for business trips outside Armenia that exceed 5% of the gross income for the tax year.
- Representative expenses exceeding 0.5% (but not more than AMD5 million) of the gross income for the tax year.
- Fees paid by the taxpayer for management services received from nonresident companies, foreign citizens and stateless persons, exceeding 2% of the taxpayer's gross income for the reporting year. This measure does not apply to management services rendered to resident companies by their nonresident founders if the companies are engaged in innovative activities in the information technology and computer technique fields, as well as management services rendered to resident companies within the framework of international credit agreements.
- Payments made by the employer for an employee that are within the terms of voluntary pension insurance in accordance with the legislation and that exceed 5% of the employee's remuneration.
- Other expenses exceeding the rates established by the government of Armenia (daily expenses for local trips, expenses for sponsorship and management services, expenses for special

nutrition, uniforms and other equipment for employees as well as other types of compensation defined by the law and expenses for the maintenance of public health institutions, nursing homes for the aged and disabled, nurseries, rehabilitation camps, cultural, educational and sports institutions and objects of the housing fund).

- Interest paid on loans and borrowings to the extent that it exceeds twice the bank interest rate defined by the Central Bank of Armenia (currently the deduction is limited to a rate of 24%).
- Current repair expenses for fixed assets that exceed 10% of the initial (purchase) cost of the corresponding fixed asset. Any excess is subject to capitalization and is included in the base for depreciation purposes.
- For taxpayers other than banks and credit organizations, the amount of interest payable on borrowings from entities other than banks and credit organizations in excess of twice the net assets.
- For banks and credit organizations, the amount of interest payable on borrowings from entities other than banks and credit organizations in excess of nine times the net assets.

To calculate taxable income, the taxpayer must account for income and expenses on an accrual basis. Income and expenses are accounted for, respectively, from the moment of the acquisition of the right to receive such income or to recognize the expenses, regardless of the actual period of the deriving of such income or the making of such payments.

**Inventories.** Inventories are valued at acquisition cost. Costs for storage and transportation must be included in the value of inventory. The first-in, first-out (FIFO) method may be used to value inventory.

**Provisions.** Bad debts are deductible in accordance with the procedure established by the government of Armenia. Banks, lending organizations, investment companies and insurance companies may deduct bad debts in accordance with the procedure established jointly by the authorized body of the government of Armenia and the Central Bank of Armenia.

In addition, the gross income of banks, lending organizations, stock funds, investment companies or insurance companies may be reduced by a reserve for possible losses in accordance with the procedure established jointly by the authorized body of the government of Armenia and the Central Bank of Armenia.

**Tax depreciation.** Depreciation allowances for fixed and intangible assets are deductible for tax purposes in accordance with the terms and conditions provided by the corporate income tax law of Armenia.

*Fixed and intangible assets acquired before 1 January 2014.* The annual amount of depreciation allowances of fixed assets acquired before 1 January 2014 is calculated by dividing the initial cost or revalued cost (the revaluation is carried out according to the procedure established by the law) by the number of years in the depreciation period for the appropriate group of fixed assets or for intangible assets. The following are the minimum depreciation periods.

<b>Group</b>	<b>Assets</b>	<b>Minimum depreciation period (years)</b>
1	Buildings and constructions of hotels, boarding houses, rest homes, sanitariums and educational institutions	10
2	Other buildings, constructions and transmission devices	20
3	Robot equipment and assembly lines	3
4	Calculating devices and computers	1
5	Other fixed assets, including growing cattle, perennial plants, and investments intended for improving the land	5

For purposes of the determination of taxable income, taxpayers may choose a depreciation period for fixed assets other than the periods mentioned in the above table, but the chosen period may not be less than one of the above-mentioned periods for the appropriate group.

The minimum depreciation period for the buildings, constructions and transmission devices located in a disaster area is one year.

The minimum depreciation period for fixed assets with a value of less than AMD50,000 is one year.

Intangible assets acquired before 1 January 2014 are amortized over their useful economic lives. If it is impossible to determine the useful life of an intangible asset, the minimum amortization period for the asset is set at 10 years, but it may not exceed the period of the taxpayer's activity.

Under the law, land cannot be depreciated.

*Fixed and intangible assets acquired on or after 1 January 2014.* The annual amount of depreciation allowances of fixed assets acquired after 1 January 2014 is calculated by multiplying the net book (residual) value (as at the last day of reporting period) of each group of fixed assets by the annual depreciation rate for the appropriate group of fixed assets. The following are the annual maximum depreciation rates for each group of fixed assets.

<b>Group</b>	<b>Assets</b>	<b>Maximum annual depreciation rate (%)</b>
1	Buildings and constructions of hotels, boarding houses, rest homes, sanitariums and educational institutions	15
2	Other buildings, constructions and transmission devices	7.5
3	Robot equipment and assembly lines	50
4	Calculating devices and computers	100
5	Other fixed assets, including growing cattle, perennial plants, and investments intended for improving the land	30

For purposes of the determination of taxable income, taxpayers may choose an annual depreciation rate for fixed assets other than the rates mentioned in the above table, but the chosen rates may not exceed one of the above-mentioned rates for the appropriate group.

The maximum annual depreciation rate for buildings, constructions and transmission devices located in a disaster area is 100%.

The maximum annual depreciation rate for a group of fixed assets with a book (residual) value of less than AMD50,000 (as of the last day of reporting period) is 100%.

Intangible assets are amortized over their useful economic lives. If it is impossible to determine the useful life of a group of intangible asset, the maximum annual amortization rate is set 20%, but it may not be less than the rate calculated based on the period of the taxpayer's activity.

**Relief for losses.** Enterprises may carry forward a loss incurred in a tax year to the following five years. Losses may not be carried back.

**Groups of companies.** Armenian law does not contain any measures allowing members of a group to offset profits and losses.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on the delivery of goods and rendering of services, free or partially free consumption and the importation of goods through the "Importing for Free Turnover" customs regime, with the exception of cases specified by law; reverse-charge VAT is imposed on entrepreneurial activities subject to VAT that are performed in Armenia by foreign entities (including the import of goods to be used by such entities)	0/20
Excise tax; imposed on certain goods (tobacco products, alcoholic beverages, petrol, diesel fuel and motor oils imported or produced in Armenia, as well as passenger vehicles that have more than AMD25 million customs value or that are two years old and have a 4.5-liter engine capacity); the tax is calculated as a specified amount per unit or as a certain percentage of the price of goods subject to excise tax	Various
Property tax; generally imposed at local (municipal) level	
Buildings and constructions; tax base is cadastral value	0.1 to 1
Vehicles; tax base is traction-motor power	Various

Land tax is also generally imposed at the local level in Armenia. Hotel tax, which will be imposed at the local level, will become effective after parliament enacts the relevant law.

## E. Foreign-exchange controls

The Armenian currency is the dram (AMD). The dram is a non-convertible currency outside Armenia. Enterprises may buy or sell foreign currencies through specialized entities in Armenia (banks, branches of foreign banks operating in Armenia, credit organizations, payment and settlement organizations, foreign-currency dealers and brokers licensed by the Central Bank of Armenia, foreign-currency exchange offices and foreign-currency auction organizers).

Armenia does not impose restrictive currency-control regulations. Individuals and enterprises may open bank accounts abroad without any restriction if they declare such accounts with the tax authorities. In general, all transactions performed in Armenia between resident legal entities or individuals must be performed in Armenian drams. Transactions between resident legal entities or private entrepreneurs and nonresident legal entities or private entrepreneurs may be conducted in other currencies.

## F. Treaty withholding tax rates

Armenia has entered into tax treaties with 41 countries. The following table lists the withholding tax rates under these treaties. In general, if the withholding tax rate provided in a treaty exceeds the rate provided by the Law of Armenia on "Corporate income tax," the domestic rate applies.

	Dividends %	Interest (1) %	Royalties %
Austria	5/15 (a)	0/10 (v)	5
Belarus	10/15 (b)	10	10
Belgium	5/15 (a)	0/10 (v)	8
Bulgaria	5/10 (c)	10	10
Canada	5/15 (d)	10	10
Czech Republic	10	5/10 (e)	5/10 (f)
China	5/10 (g)	10	10
Croatia	0/10 (h)	10	5
Cyprus	0/5 (x)	5	5
Estonia	5/15 (i)	10	10
Finland	5/15 (i)	5	5/10 (j)
France	5/15 (k)	0/10 (v)	5/10 (l)
Georgia	5/10 (g)	10	5
Germany	15	5	0
Greece	10	10	5
Hungary	5/10 (g)	10	5
India	10	10	10
Iran	10/15 (m)	10	5
Ireland	0/5/15 (bb)	5/10 (cc)	5
Italy	5/10 (n)	0/10 (w)	7
Kazakhstan	10	10	10
Kuwait	5	5	10
Latvia	5/15 (i)	10	10
Lebanon	5/10 (g)	8	5
Lithuania	5/15 (i)	10	10
Luxembourg	5/15 (a)	10	5
Moldova	5/15 (o)	10	10
Netherlands	5/10 (p)	0/5 (v)	5
Poland	10	5	10

	<b>Dividends</b>	<b>Interest (1)</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Qatar	5/10 (q)	5	5

Non-treaty countries	10	10	10

- (1) In several treaties, a 0% rate applies to interest paid to governmental entities, political or administrative-territorial subdivisions, local authorities, central banks or financial institutions owned or controlled by the government. This provision is not reflected in the rates shown in the table.
- (a) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (b) The 10% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (c) The 5% rate applies if the actual owner of the dividends is a company that has invested in the payer more than USD40,000 (or the equivalent amount in Armenian currency). The 10% rate applies in all other cases.
- (d) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends and if the capital invested by the beneficial owner exceeds USD100,000 (or the equivalent amount in Armenian currency) on the date of declaration of the dividends. The 15% rate applies in all other cases.
- (e) The 5% rate applies to interest on loans or credits granted by banks.
- (f) The 5% rate applies to royalties for the use of, or the right of use, literary, artistic or scientific works, including television or radio content (films and compact discs). The 10% rate applies in all other cases.
- (g) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital (assets) of the company paying the dividends. The 10% rate applies in all other cases.
- (h) The 0% rate applies if the actual owner of the dividends is a company that directly or indirectly holds at least 25% of the capital of the company paying the dividends for a minimum period of two years before the payment of the dividends and if the dividends are not subject to tax in Croatia. The 10% rate applies in all other cases.
- (i) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the assets of the company paying the dividends. The 15% rate applies in all other cases.
- (j) The 5% rate applies to the royalties for the use of, or the right of use, computer software, patents, trademarks, designs or models, plans or secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies in all other cases.
- (k) The 5% rate applies if the actual owner of the dividends is a company that directly or indirectly holds at least 10% of the assets of the company paying the dividends. The 15% rate applies in all other cases.
- (l) The 5% rate applies to the royalties for the use of, or the right to use, copyrights. The 10% rate applies in all other cases.
- (m) The 10% rate applies if the actual owner of the dividends is a company (other than a partnership) that owns at least 25% of the assets of the company paying the dividends. The 15% rate applies in all other cases.
- (n) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends for a minimum period of 12 months before the date of declaration of the dividends and if the capital invested by the beneficial owner exceeds USD100,000 or the equivalent amount in Armenian currency. The 10% rate applies in all other cases.

- (o) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (p) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 15% rate applies to dividends in all other cases.
- (q) The 5% rate applies if the capital invested by the actual owner of the dividends exceeds USD100,000. The 10% rate applies in all other cases.
- (r) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 25% of the assets of the company paying the dividends. The 10% rate applies in all other cases.
- (s) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 25% of the share capital of the company paying the dividends. The 10% rate applies in all other cases.
- (t) The 5% rate applies if the actual owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and if the capital invested by the beneficial owner exceeds CHF200,000 (or the equivalent amount in Armenian currency) on the date of receipt of the dividends. The 15% rate applies in all other cases.
- (u) The 5% rate applies if the actual owner of the dividends is a company that owns at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (v) The 0% rate applies to interest connected to sales on credit of industrial, commercial or scientific equipment or business assets, and to interest on loans granted by banking enterprises.
- (w) The 0% rate applies to the interest on loans granted by banking enterprises.
- (x) The 0% rate applies if the capital invested by the actual owner of the dividends exceeds EUR150,000. The 5% rate applies in all other cases.
- (y) The 0% rate applies if all of the following conditions are satisfied:
- The beneficial owner of the dividends is a resident of the other contracting state.
  - The beneficial owner of the dividends has held, directly or indirectly, at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment.
  - Such dividends are not liable to profit tax in the other contracting state.
- (z) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting. The 10% rate applies in all other cases.
- (aa) The 0% rate applies if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the beneficial owner of the dividends satisfies all of the following conditions:
- It is a company that is a resident of the other contracting state.
  - It holds, directly or indirectly, at least 25% of the share capital of the company paying the dividends at the date of payment of the dividends.
  - It has invested at least GBP1 million (or the equivalent amount in any other currency) in the share capital of the company paying the dividends at the date of payment of the dividends.
- The 15% rate applies if dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 by an investment vehicle that distributes most of this income annually and if such vehicle's income from this immovable property is exempted from tax. The 10% rate applies in all other cases.
- (bb) The 0% rate applies if the beneficial owner is a company (other than a partnership) that satisfies the following conditions:
- It holds directly at least 25% of the capital of the company paying the dividends.
  - It owned the holding for a period of at least two years before it made the claim for the 0% rate.
  - In the contracting state in which the company is resident, the company is relieved from tax on dividends by an exemption or would, but for this measure in the tax treaty, be entirely relieved by a credit for tax paid with respect to dividends paid by the company paying the dividends.
- The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (cc) The 5% rate applies if interest is paid with respect to loans granted by banking enterprises. The 10% rate applies in all other cases.

## A. At a glance

Corporate Income Tax Rate (%)	28
Capital Gains Tax Rate (%)	28
Branch Tax Rate (%)	28
Withholding Tax (%)	
Dividends	0/5/10 (a)
Interest	0
Royalties from Patents, Know-how, etc.	0
Foreign-Exchange Commission	1.3 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The 0% rate applies to dividends paid to resident holding companies. The 5% rate applies to dividends paid to nonresident publicly traded companies and to dividends paid on qualifying shareholdings under applicable tax treaties. The 10% rate applies in all other circumstances.
- (b) A foreign-exchange commission is imposed on all payments by residents to nonresidents. The commission is withheld by banks on behalf of the Central Bank of Aruba.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax is levied on resident and nonresident entities. A domestic entity is an entity that is established in Aruba or incorporated under Aruban law.

Tax is levied on total profits earned from all sources during the company's accounting period. "Profit" means the total of net gains, under any name or in any form. Branches of foreign entities are taxed on Aruban-source income, such as profits earned through a permanent establishment.

*Permanent establishment.* A permanent establishment is deemed to exist in Aruba in the case of the following:

- A permanent representative in Aruba.
- A foreign enterprise that builds, installs, maintains, cleans or repairs capital assets on Aruba for more than 30 days. These 30 days include, among others, days spent on the technical preparation and cleaning up of the site.

**Rates of corporate income tax.** Corporate income tax is imposed at a flat rate of 28%.

Companies operating in the free zone are subject to corporate income tax at a rate of 2% on profits derived from their activities and to a free zone facility charge of up to 0.75% on their annual gross turnover. The free zone is a defined territory in which no import duties are levied if the goods are not imported for use in the domestic market. In addition, free-zone companies are not subject to turnover tax and are exempt from the foreign-exchange commission.

**Special tax regimes for certain companies.** Special tax regimes available for certain companies in Aruba are described below.

*Imputation Payment Companies.* Imputation Payment Companies (IPCs) are subject to the regular corporate tax rate of 28%. However, on the distribution of profits, the Aruban government makes an imputation payment to the shareholders of the IPC. The effective corporate tax rate for an IPC can be as low as 2%. An IPC may engage in the following qualifying activities only:

- Hotel operations
- Aviation operations
- Shipping operations
- Sustainable energy business
- Developing, acquiring, holding, maintaining and licensing intellectual and industrial rights, similar rights and usage rights
- Insuring special entrepreneurial risks (activities of captive insurance companies)
- Financing that is different from the financing offered by credit institutions
- Making portfolio investments (other than in real estate)
- Holding of shares and participation rights

*Aruba Exempt Companies.* An Aruba Exempt Company is exempt from corporate income tax and withholding tax on dividends paid if it performs one of the following activities:

- Financing (if the company does not qualify as a credit institution)
- Investing other than in real estate
- Holding of shares and participation rights
- Licensing of intellectual and industrial rights, similar rights and usage rights

**Fiscal transparency.** Aruban limited liability companies can opt for fiscal transparency for Aruban corporate income tax and dividend withholding tax purposes within one month after incorporation. If fiscal transparency is granted, the limited liability company is treated for tax purposes as a partnership; that is, only the partners can be taxed in Aruba on Aruban-source income. It is also possible to obtain an advance ruling from the local tax authorities on the treatment of the local presence.

**Branch profits tax.** Branches of foreign companies are taxed at the same rate as resident companies. No additional withholding taxes are imposed on remittances of profits.

**Capital gains.** Capital gains are taxed as ordinary income. However, certain capital gains are exempt from corporate income tax under the participation exemption (see *Participation exemption*).

**Administration.** The corporate income tax return for the preceding accounting period must be filed within 60 days after issuance of the tax return forms. The tax return form is normally issued within five months after the year-end. The corporate income tax due is payable two months after the receipt of the assessment.

**Dividends.** A 10% withholding tax is imposed on dividends distributed to nonresidents. The rate is reduced to 5% for dividends distributed to publicly traded companies. A 0% rate applies to dividends distributed to resident companies that qualify for the benefits of the participation exemption.

The Tax Regulation for the Kingdom of the Netherlands provides for special dividend withholding tax rates (see Section E).

**Participation exemption.** Aruban resident companies are exempt from corporate income tax on dividends and capital gains derived from qualifying participations. A qualifying foreign participation must satisfy both of the following conditions:

- The shares must not be held as inventory or as a portfolio investment.
- The participation must be subject to a tax on profits.

**Foreign tax relief.** Foreign tax relief is available through the Tax Regulation for the Kingdom of the Netherlands. Foreign tax relief is also available under the state decree for the avoidance of double taxation.

### C. Determination of trading income

**General.** Commercial profits must be calculated in accordance with “sound business practice” and generally accepted accounting standards.

**Inventories.** Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted average methods.

**Depreciation.** Depreciation may be calculated by the straight-line, declining-balance or flexible methods.

### D. Miscellaneous matters

**Foreign-exchange controls.** The Central Bank of Aruba regulates the foreign-exchange market and carries out the necessary transactions as executor of exchange policy. Remittances abroad require an exchange license issued by the Central Bank of Aruba.

**Debt-to-equity rules.** Aruba does not impose a debt-to-equity ratio.

**Controlled foreign companies.** Aruba does not have specific controlled foreign company legislation. However, numerous measures limit intercompany transactions that are not at arm’s length and intercompany transactions with low-taxed entities.

**Transfer pricing.** If a company or individual participates, directly or indirectly, in the management, supervision or the capital of two or more corporate entities, the conditions that apply to the supply of goods and the rendering of services between these entities must be at arm's length. These conditions are similar to the conditions that would have applied in transactions with unrelated parties. Information to substantiate arm's-length transactions must include, among other items, the following:

- The agreement between the entities
- Transfer-pricing method that was chosen and why it was chosen
- How the consideration was determined

## **E. Tax treaties**

Provisions for double tax relief are contained in the Tax Regulation for the Kingdom of the Netherlands. These provisions avoid double taxation between the countries of the Kingdom of the Netherlands (Aruba, Curaçao, the Netherlands [including Bonaire, Sint Eustatius and Saba; these islands are known as the BES-Islands] and Sint Maarten) regarding taxes on income, capital and other items.

Under the Tax Regulation for the Kingdom of the Netherlands, the general withholding tax rate of 10% on dividend distributions from an entity resident of Aruba may be reduced to the following rates:

- 7.5% if the recipient of the dividends is a company that has capital divided in shares and that has a share interest in the nominal paid-up capital of the Aruba entity of at least 25%
- 5% if the recipient of the dividends is subject to tax on profit at a rate of at least 5.5%

Effective from 10 October 2010, the Netherlands Antilles (which consisted of five island territories in the Caribbean Sea) was dissolved as a country. As a result, the island territories of Curaçao and St. Maarten became autonomous countries within the Dutch Kingdom. The island territories of Bonaire, St. Eustatius and Saba (BES-Islands) have become a part of the Netherlands as extraordinary overseas municipalities.

The Tax Regulation for the Kingdom of the Netherlands remains in place until bilateral tax treaties have been concluded between the countries in the Dutch Kingdom.

Aruba has entered into tax information exchange agreements with Antigua and Barbuda, Argentina, Australia, Bermuda, the British Virgin Islands, Cayman Islands, Denmark, Faroe Islands, Finland, Greenland, Iceland, Mexico, Norway, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States.

Aruba is recognized by the Organisation for Economic Co-operation and Development as a jurisdiction that has substantially implemented the internationally agreed tax standard and, as such, is white listed.

*Australia is reforming its tax system through various tax reviews and government reform initiatives. As a result, various tax settings are changing over time. Because of these developments, readers should obtain updated information before engaging in transactions.*

**A. At a glance**

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (a)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	
Franked	0 (b)
Unfranked	30 (c)
Conduit Foreign Income	0 (d)
Interest	
General	10 (e)
Interest Paid by Australian Branch of Foreign Bank to Parent	5 (f)
Interest (Debentures, State and Federal Bonds and Offshore Banking Units)	0 (g)
Royalties from Patents, Know-how, etc.	30 (h)
Construction and Related Activities	5 (i)
Fund Payments from Managed Investment Trusts	15 (j)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (k)
Carryforward	Indefinite

- (a) The government has foreshadowed a “tax cut for small business companies of at least 1.5 per cent” (the precise threshold is not known) to apply from 1 July 2015, and indications are that a corporate tax cut will not be provided for larger companies. The government also announced that the proposed Paid Parental Leave Scheme funded by a 1.5% levy on companies with taxable income in excess of AUD5 million will not proceed. For corporations, capital gains are taxed at the corporate income tax rate, with no reduced tax rates.
- (b) Franking of dividends is explained in Section B.
- (c) This is a final tax that is imposed on payments to nonresidents only. A reduced rate (in recent treaties, reduced rates typically are 0%, 5% or 15%, depending on the level of ownership) applies to residents in treaty countries.
- (d) An exemption from dividend withholding tax applies to the part of the unfranked dividends that is declared in the distribution statement to be conduit foreign income.
- (e) In general, this is a final withholding tax that is imposed on payments to nonresidents only. However, withholding tax is imposed in certain circumstances on interest paid to residents carrying on business overseas through a permanent establishment (branch). Modern Australian tax treaties exempt government and unrelated financial institutions from withholding tax.
- (f) Interest paid by an Australian branch of a foreign bank to its parent is subject to a rate of 5% on the notional interest rate based on the London Interbank Offered Rate (LIBOR).
- (g) Unilateral exemptions from interest withholding tax are provided for certain publicly offered debentures, for state and federal government bonds and for offshore borrowing by offshore banking units.
- (h) In general, this is a final withholding tax that is imposed on gross royalties paid to nonresidents. A reduced rate (5% in recent treaties) applies to residents of treaty countries.
- (i) The filing of an Australian tax return to obtain a refund may be required if this withholding results in an overpayment of tax. A variation of the rate to mitigate the adverse cash flow impact is available to certain taxpayers that have previously filed tax returns in Australia.
- (j) The 7.5% rate applied for fund payments made with respect to the 2012 income year. Effective from 1 July 2012, managed investment trusts that hold only newly constructed energy-efficient commercial buildings may be eligible for a 10% withholding tax rate.
- (k) The loss carryback rules were repealed, effective from the beginning of the 2013–14 income year. Effective from 1 July 2012, companies could carry back up to AUD1 million of losses to obtain a refund of tax paid in the preceding year (see *Relief for losses* in Section C).

## B. Taxes on corporate income and gains

**Corporate income tax.** An Australian resident corporation is subject to income tax on its non-exempt worldwide income. A non-resident corporation is subject to Australian tax only on Australian-source income.

Corporations incorporated in Australia are residents of Australia for income tax purposes, as are corporations carrying on business in Australia with either their central management and control in Australia or their voting power controlled by Australian residents.

**Rates of corporate tax.** For the 2014–15 income year, resident corporations are subject to tax at a rate of 30%. Income of non-resident corporations from Australian sources is similarly taxable at 30% if it is not subject to withholding tax or treaty protection. However, a nonresident corporation not operating in Australia through a permanent establishment is generally subject to tax only on Australian-source passive income, such as rent, interest, royalties and dividends.

The government has foreshadowed a “tax cut for small business companies of at least 1.5 per cent” (the precise threshold is not known) to apply from 1 July 2015, and indications are that a corporate tax cut will not be provided for larger companies. The government also announced that the proposed Paid Parental Leave

Scheme funded by a 1.5% levy on companies with taxable income in excess of AUD5 million will not proceed. For corporations, capital gains are taxed at the corporate income tax rate, with no reduced tax rates.

**Resource taxation.** The Petroleum Resource Rent Tax (PRRT) was expanded effective from 1 July 2012. Previously, the PRRT applied only to offshore projects (that is, companies undertaking petroleum activities in Commonwealth waters, excluding projects located in the North West Shelf and certain areas within the Australian/East Timor Joint Petroleum Development Area [JPDA]).

The expanded PRRT applies to all projects, including onshore petroleum projects and projects in the North West Shelf, but projects in the JPDA continue to be excluded. Transitional measures apply to pre-existing projects. The PRRT is imposed at a rate of 40% on project profits from the extraction of non-renewable petroleum resources.

The Mining Resources Rent Tax (MRRT) was repealed, effective from 1 October 2014. It applied to iron ore and coal production, effective from 1 July 2012. The MRRT applied at a rate of 30% less a 25% extraction allowance (resulting in an effective tax rate of 22.5%) on mining profits after allowance for certain operating and capital expenditure. A credit against MRRT was allowed for state royalties. MRRT was deductible for corporate income tax purposes.

The federal government has introduced legislation in parliament for a new Exploration Development Initiative. Mineral exploration companies undertaking “greenfields minerals exploration” in Australia will be able to issue tax credits to shareholders for a portion of eligible exploration costs, effective from 1 July 2014. However, total tax credits available for issuance by all entities combined will be capped at AUD25 million for the 2015 income year, AUD35 million for the 2016 income year and AUD40 million for the 2017 income year.

For mining rights and information that begin to be held after 7:30 p.m. on 14 May 2013, an immediate deduction is no longer available for the cost of exploration rights and information first used for exploration if the price paid reflects the value of resources already discovered. Costs of acquiring exploration rights or information first used for exploration that are not eligible for an immediate deduction will be depreciated over the lesser of 15 years or the effective life of the mine. Further rules are proposed to confirm the immediate deduction for farm-out arrangements, and also to clarify the treatment of interest realignments in joint venture common developments.

The immediate tax deduction for exploration of geothermal energy sources was repealed, effective from 1 July 2014.

**Carbon-pricing mechanism.** The carbon-pricing mechanism was repealed, effective from 1 July 2014. Australia’s carbon-pricing mechanism began on 1 July 2012 with a fixed-price period for three years that would transition to an emissions-trading scheme, effective from 1 July 2015. The federal government has announced a Direct Action Plan to replace these schemes.

## Capital gains

*Income and capital gains.* Australia's tax law distinguishes income (revenue) gains and losses from capital gains and losses, using principles from case law. Broadly, capital gains and losses are not assessable or deductible under the ordinary income tax rules. However, the capital gains tax (CGT) provisions in the tax law may apply.

*CGT.* The CGT provisions apply to gains and losses from designated CGT events. The list of designated CGT events includes disposals of assets, grants of options and leases, and events arising from the tax-consolidation rules (see Section C).

Capital gains are calculated by identifying the capital proceeds (money received or receivable or the market value of property received or receivable) with respect to the CGT event and deducting the cost base. CGT gains are reduced by amounts that are otherwise assessable.

Special rules apply to assets acquired before 20 September 1985.

*CGT deferrals or rollovers.* CGT rollover relief may be elected for various transfers, restructures and takeovers, including scrip takeovers. The effect of the relief is the deferral of taxation until a subsequent disposal or CGT event, if further rollover relief is not available. Transfers within a tax-consolidated group are ignored for tax purposes (see Section C).

Capital losses are deductible only from taxable capital gains; they are not deductible from ordinary income. However, ordinary or trading losses are deductible from net taxable capital gains.

*Foreign residents and CGT.* Foreign residents are subject to CGT if an asset is "taxable Australian property," which includes broadly the following:

- Taxable Australian real property: real property located in Australia including a leasehold interest in land, or mining and quarrying or prospecting rights, if the minerals, petroleum or quarry materials are located in Australia.
- Indirect Australian real property interest: broadly, a non-portfolio interest in an Australian or foreign entity if more than 50% of the market value of the entity's assets relates to assets that are taxable Australian real property. A law change was announced to introduce stricter asset valuation rules for mining rights and mining information, effective from 14 May 2013, to protect the integrity of the principal asset test, but these rules may no longer be required after the recent Full Federal Court decision in *Resource Capital Fund III* decided in favor of the Australian Tax Office. Integrity rules to prevent the double counting of intercompany assets apply to consolidated and multiple-entry consolidated groups (see *Tax consolidation* in Section C) from 14 May 2013 and to other entities from 13 May 2014.
- The business assets of an Australian permanent establishment.

The government has announced that it will introduce a non-final withholding regime to support the operation of the foreign resident CGT regime, effective from 1 July 2016.

*CGT participation exemption for disposals of shares in foreign companies.* The capital gain or capital loss derived by a company

from the disposal of shares in a foreign company may be partly or wholly disregarded to the extent that the foreign company has an underlying active business, if the company has held a direct voting interest in the foreign company of at least 10% for a period of at least 12 months in the 2 years before the disposal. This participation exemption can also reduce the attributable income arising from the disposal of shares owned by a controlled foreign company in another foreign company (see Section E).

**Administration.** The Australian tax year ends on 30 June. For corporate taxpayers with accounting periods ending on other dates, the tax authorities may agree to use a substituted accounting period.

In general, companies with an income year-end of 30 June must file an annual income tax return by the following 15 January. Companies granted permission to adopt a substituted accounting period must file their returns by the 15th day of the 7th month after the end of their income year.

Under a pay-as-you-go (PAYG) installment system, in general, companies must make quarterly payments of income tax within 21 days after the end of each quarter of the tax year. The amount of each installment is based on the income earned in the quarter. The installment obligations for larger companies are gradually being changed to monthly payments. Companies with more than AUD1 billion of turnover moved to monthly installments, effective from January 2014; companies with turnover over AUD100 million will move to monthly installments, effective from January 2015; and companies with turnover over AUD20 million will move to monthly installments, effective from January 2016.

**Dividends.** Dividends paid by Australian resident companies are franked with an imputation credit to the extent that Australian corporate income tax has been paid by the company on the income being distributed. If enacted, the proposed Paid Parental Leave Scheme Levy of 1.5% will not create franking credits (see *Rates of Corporate tax*). Tax rules discourage companies from streaming imputation credits to those shareholders that can make the most use of the credits, at the expense of other shareholders.

A company may select its preferred level of franking with reference to its existing and expected franking account surplus and the rate at which it franked earlier distributions. However, under the “benchmark rule,” all distributions made by a private company within a franking period must generally be franked to the same extent.

The consequences of receiving a franked dividend vary depending on the nature of the recipient shareholder.

A New Zealand company may choose to maintain an Australian franking account and attach Australian franking credits to dividends paid to Australian resident shareholders, for Australian company tax paid on that income.

*Resident corporate shareholders.* Franked distributions received by resident companies from other Australian resident companies are effectively received free from tax. A resident company receiving franked distributions grosses up the dividend amount received

by the amount of its franking credit (the credit equals the tax paid by the paying entity). The grossed-up amount is included in the assessable income of the recipient company. The recipient company is entitled to a tax offset (rebate) equal to the amount of the franking credit on the distribution that may be used against its own tax payable. In addition, the recipient company is allowed a franking credit in its own franking account, which may in turn be distributed to the company's shareholders.

A resident company is subject to tax on unfranked dividends received, but special rules apply for certain income passed to non-resident shareholders (see *Nonresident shareholders: corporate and non-corporate*).

If a company's entitlement to a tax offset exceeds its tax payable, it can convert the excess franking offset into an equivalent amount of tax loss. The tax loss may then be carried forward indefinitely for deduction in subsequent years.

*Resident individual shareholders.* The shareholder includes the dividend received plus the full imputation credit in assessable income. The imputation credit can be offset against personal tax assessed in the same year. Excess credits relating to dividends received are refunded to the shareholder.

*Nonresident shareholders: corporate and non-corporate.* Issues relevant to dividends and foreign shareholders include the following:

- Franked dividends paid to nonresidents are free from dividend withholding tax.
- Refunds of imputation credits are not available for nonresidents.
- Special rules apply to unfranked dividends received and flowed on by an Australian company to its nonresident parent company. If the Australian company receives unfranked non-portfolio dividends (from holdings of at least 10% of the voting power in the company paying the dividends) and in turn pays a flow-on dividend to its nonresident parent company, the Australian company may be eligible for a deduction equivalent to the unfranked non-portfolio dividend. Various conditions must be satisfied.
- Special rules apply to "conduit foreign income" that flows through Australian companies to foreign investors. Broadly, conduit foreign income is foreign-source income earned by an Australian company that is not taxed in Australia. A distribution that an Australian corporate tax entity makes to a foreign resident is not subject to dividend withholding tax and is not assessable income, to the extent that the entity declares it to be conduit foreign income.

**Foreign tax relief.** Australian residents are subject to Australian tax on their worldwide income, but they may receive a foreign income tax offset for foreign taxes paid on foreign-source income included in assessable income. Foreign income tax offsets must be used in the year in which the related foreign-source income is included in assessable income. Otherwise, they are lost without having provided any relief from double taxation. For controlled foreign companies (CFCs; see Section E), a modified system applies.

### C. Determination of trading income

**General.** Taxable income is defined as assessable income less deductions. Assessable income includes ordinary income and statutory income (specifically listed in the tax law as being assessable income). Non-cash business benefits may be included as income in certain circumstances.

Australia's tax law distinguishes income (revenue) gains and losses from capital gains and losses, using principles from case law. Broadly, capital gains and losses are not assessable or deductible under the ordinary income tax rules; however, the capital gains provisions in the tax law may apply, and, for corporations and foreign residents, capital gains tax is paid at the income tax rate (see Section B).

Broadly, the following types of income are not included in assessable income:

- Profits from foreign branches of Australian companies (other than, broadly, income that would be attributable under the CFC rules, see Section E).
- Amounts paid out of income previously taxed under the CFC rules (see Section E).
- Non-portfolio dividends received up until 16 October 2014 on shares held in foreign companies by corporate shareholders holding at least 10% of the voting power in the payer (special rules allow debt deductions in deriving such income).
- Foreign equity distributions received after 16 October 2014. This covers dividends or non-share dividends made by a foreign company with respect to an interest in a company classified as equity under Australian tax rules, subject to a 10% participation requirement. Distributions received through interposed entities, such as trusts and partnerships, may now also be eligible. The government is not proceeding with a previously foreshadowed targeted integrity rule to address certain conduit funding arrangements.

*Expenses.* Expenses are deductible to the extent they are incurred in gaining or producing assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing assessable income. However, expenses of a capital nature (except business black hole expenditure; see *Five-year deduction for black hole business expenditure*) and those incurred in the production of exempt income are not deductible. Apportionment of expenses having dual purposes is possible.

Fringe benefits tax (see Section D) is deductible. Entertainment expenses are not deductible unless they represent fringe benefits provided to employees. Penalties and fines are not deductible.

Under commercial debt forgiveness rules, the net amount of debts forgiven during an income year reduces the debtor's accumulated revenue tax losses, capital losses, certain undeducted expenditure and cost bases of assets.

**Research and development.** A tax credit system applies for research and development (R&D) expenditure. The incentives apply to companies incorporated in Australia for R&D conducted in Australia. The location of ownership of the resulting intellectual property is not a barrier to a tax concession.

Core and supporting R&D activities must be registered under the new R&D tax credit system. Supporting R&D activities must be directly related to core R&D activities. Activities that result in the production of goods or services are eligible only if they are undertaken for the dominant (or sole) purpose of supporting the core R&D activity (the “dominant purpose” test).

Eligible expenditure in excess of AUD20,000 is not deductible but gives rise to the following:

- Nonrefundable tax credits of 40% for large companies (proposed reduction to 38.5%, effective from 1 July 2014)
- For companies with group turnover of less than AUD20 million, refundable tax credits of 45% (proposed reduction to 43.5%, effective from 1 July 2014)

The above turnover thresholds also apply to local companies conducting foreign-owned R&D.

Legislation has been passed to cap R&D expenditure claims at AUD100 million. This replaces earlier proposals to deny R&D tax incentives to large companies.

**Debt and equity classification.** Specific debt-and-equity rules focus on economic substance rather than on legal form. If the debt test is satisfied, a financing arrangement is generally treated as debt, regardless of whether the arrangement could also satisfy the test for equity. The test is complex and extends well beyond an examination of whether a borrower has a non-contingent obligation to repay an amount of principal. The debt-and-equity rules are under review, with a Board of Taxation report expected by March 2015.

The debt or equity classification affects the taxation of dividends (including the imputation requirements), payments from nonresident entities, thin-capitalization regime, dividend and interest withholding taxes and related measures.

**Financial arrangements.** Extensive rules deal with the taxation of “financial arrangements” (as defined) for specified taxpayers.

The default methods are accruals and realization methods. These are supplemented by various methods available at a taxpayer’s election, using accounting approaches with respect to certain financial arrangements. The elective accounting methods include hedge treatment, fair-value reporting, retranslation for foreign-currency arrangements and, in certain cases, use of the values in financial reports for the financial arrangements.

Individuals are not mandatorily covered by these rules. Superannuation entities must apply the rules if the value of their assets exceeds AUD100 million. Approved deposit-taking institutions or securitization vehicles must apply the rules if their aggregate turnover exceeds AUD20 million. All other entities must apply the rules if either their aggregate turnover exceeds AUD100 million or if the value of their assets exceeds AUD300 million. Taxpayers not covered by the rules can nevertheless elect to apply the rules.

The rules apply to financial arrangements first held in income years beginning on or after 1 July 2010.

**Foreign-exchange gains and losses.** Specific rules govern the tax treatment of foreign-currency gains and losses. Broadly, they provide the following:

- Foreign-currency gains and losses are brought to account when realized, regardless of whether an actual conversion into Australian currency occurs.
- Foreign-currency gains and losses generally have a revenue character.
- Specific translation rules apply to payments, receipts, rights and obligations denominated or expressed in a foreign currency.
- Functional-currency rules allow an entity that operates predominantly in a particular foreign currency to determine its income and expenses in that currency, with the net results being translated into Australian currency for the purposes of calculating its Australian income tax liability.

**Inventories.** In determining trading income, inventories may be valued at cost, market-selling value (the current selling value of an article of trading stock in the particular taxpayer's trading market) or replacement price, at the taxpayer's option. The last-in, first-out (LIFO) method may not be used. If the cost method is elected, inventories must be valued using the full-absorption cost method.

**Provisions for future expenditure.** Provisions for amounts not incurred during the year, such as leave entitlements of employees, are generally not deductible until payments are made. Similarly, provisions for doubtful trading debts are not deductible until the debt, having been previously brought to account as assessable income, becomes bad and is written off during an income year.

### **Capital allowances (depreciation)**

*Uniform capital allowance regime.* Capital allowance rules allow a deduction for the decline in value of a "depreciating asset" held during the year.

A "depreciating asset" is defined as an asset with a limited effective life that may be expected to decline in value over the time it is used. Land, trading stock and intangible assets not specifically included in the regime are not considered to be depreciating assets.

The depreciation rate for a depreciating asset depends on the effective life of the asset. Taxpayers may choose to use either the default effective life determined by the tax authorities or their own reasonable estimate of the effective life. A taxpayer may choose to recalculate the effective life of a depreciating asset if the effective life that was originally selected is no longer accurate as a result of market, technological or other factors. Taxpayer re-estimation of effective life is not available for certain intangible assets; the law prescribes their effective lives (for example, 15 years for registered designs or 20 years for standard patents). Statutory life caps that result in accelerated rates are provided for certain assets used in the oil and gas, petroleum, agricultural, and transport industries, and by irrigation water providers as well as for Australian-registered ships.

Taxpayers may choose the prime cost method (straight-line method) or the double diminishing value method (200% of the straight-line rate) for calculating the tax-deductible depreciation

for all depreciating assets except intangible assets. For certain intangible assets, the prime cost method must be used.

The cost of a depreciating asset is generally the amount paid by the taxpayer plus further costs incurred while the taxpayer holds the asset. The depreciable cost of a motor car is subject to a maximum limit of AUD57,466 for the 2014–15 income year.

Pooling of assets may be chosen for pool assets costing more than AUD300 but less than AUD1,000 as well as assets that have been depreciated to less than AUD1,000. The pool balance is depreciable at a rate of 37.5% (18.75% for additions during the year), applying the declining-balance method. If the choice is not exercised, the relevant assets are depreciated on the basis of their respective effective lives.

Software development expenditure may be allocated to a software development pool. Beginning in the year following the year of the expenditure, the expenditure is deductible at a rate of 40% for two years followed by a 20% rate in the final year.

*Construction of buildings.* Capital expenditure on the construction of buildings and structural improvements may be eligible for an annual deduction of either 2.5% or 4% of the construction expenditure, depending on the type of structure and the date on which construction began. The 2.5% rate applies to construction begun after 15 September 1987.

*Disposals of depreciable assets.* Depreciation on assets other than buildings is recaptured if the proceeds received on the disposal of an asset exceed its adjustable value. Any amounts recaptured are included in taxable income. If the proceeds received on the disposal of an asset are less than its adjustable value, a deductible balancing adjustment is allowed.

*Five-year deduction for black hole business expenditure.* Certain types of business expenditure of a capital nature may be deducted under the capital allowance regime to the extent that the expenditure is not taken into account elsewhere in the income tax law and is not expressly nondeductible for tax purposes. This type of expenditure is known as “black hole business expenditure.” The deduction is available on a straight-line basis over five years. Expenditure qualifying for the deduction includes expenditure to establish or alter a business structure, expenditure to raise equity and expenditure in an unsuccessful takeover attempt or takeover defense.

**Relief for losses.** Tax losses may be carried forward indefinitely against assessable income derived during succeeding years. A loss is generated after adding back net exempt income.

To claim a deduction for past losses, companies must satisfy either a continuity of ownership test (more than one-half of voting, dividend and capital rights) or a same business test. A modified continuity of ownership test applies to widely held companies. The modified rules simplify the application of the continuity test by making it unnecessary to trace the ultimate owners of shares held by certain intermediaries and small shareholdings. As a result of the introduction of the tax consolidation regime (see *Tax consolidation*), losses are generally not transferable to other group members.

*Designated infrastructure projects loss concessions.* Companies that only carry on activities for certain designated infrastructure projects are not required to test the recoupment of losses incurred in the 2012–13 and following income years under the continuity of ownership or same business tests. The losses are also increased by the long-term government bond rate. Projects must be designated by Infrastructure Australia by 30 June 2017, and a cap of AUD25 billion on the value for all projects applies.

*Corporate loss carrybacks.* The loss carryback rules have been repealed, effective from the beginning of the 2013–14 income year. Effective from 1 July 2012, all companies (and entities that were taxed like companies) were able to carry back up to AUD1 million worth of losses to obtain a refund of tax paid in the previous year and record it in their franking account. An anti-avoidance rule denied carrybacks in limited circumstances.

**Tax consolidation.** Tax consolidation is available for groups of wholly owned companies and eligible trusts and partnerships that elect to consolidate. Australian resident holding (head) companies and their wholly owned Australian resident subsidiary members of the group are taxed on a consolidated basis. Consolidation is desirable because no grouping concessions (such as the ability to transfer losses to other group members) are otherwise provided. The head company becomes the taxpayer, and each subsidiary member of the group is treated as if it were a division of the head company. Transactions between members of a consolidated group are disregarded for most Australian income tax purposes. The head company assumes the income tax liability and the associated income tax compliance obligations of the group.

Tax consolidation is also available for Australian entities that are wholly owned by a single foreign holding company. The resulting group is referred to as a multiple entry company (MEC) group, which includes the Tier-1 companies (Australian resident companies directly owned by a foreign member of the group) and their wholly owned Australian resident subsidiaries. A Tier-1 company is selected as the head company. The types of entities that may be subsidiary members of an MEC group are generally the same as those for a consolidated group.

The consolidation rules are very significant for merger and acquisition and restructuring transactions. If a tax consolidated group acquires a “joining entity,” the tax cost base of the underlying assets of the joining entity is reset, under complex rules, which can affect the tax treatment of those assets (including the calculation of any tax deductions with respect to such assets). If an entity leaves a consolidated group, the group’s cost base of shares in the leaving entity is reset under specific exit rules. MEC groups are subject to cost base pooling rules on entry and exit to determine the cost base of shares in Tier-1 companies.

The tax-consolidation rules are subject to complex ongoing changes. The treatment of rights to future income and residual assets when an entity joins a consolidated group was altered in 2010, applying retrospectively from 2002. However, the 2010 changes were heavily modified in 2012, affecting arrangements that began on or after 31 March 2011 (but transitional rules preserve aspects of the 2010 changes for some groups). Going forward, no tax costs (and consequently no deductions) arise for

rights to future income, and residual asset tax costs are treated for tax purposes as if an acquisition of a business occurred (generally capital in nature).

The government has confirmed that the following proposed integrity measures affecting acquisitions and divestments from 14 May 2013 will proceed:

- Certain deductible accounting liabilities held by a “joining entity,” which are taken into account in tax cost resetting of the entity’s assets will be assessable income over 12 months (for current liabilities) or 48 months (for non-current liabilities).
- No tax cost resetting will be allowed with respect to assets held by a “joining entity” for foreign-owned consolidated groups or MEC groups if the underlying majority beneficial ownership of the joining entity has not changed and if the foreign resident CGT exemption applies to the transferor of the “joining entity.”
- The tax cost on the disposal of assets subject to encumbrance arising from intra-group arrangements will be limited.

On 13 May 2014, the government released a Treasury report following a review of the rules applying to MEC groups. No immediate changes were recommended, with three potential minor amendments referred for further consultation.

Assets that are subject to the taxation of financial arrangements rules (see *Financial arrangements*) are subject to separate tax consolidation interaction rules. These complex rules may affect transactions and reorganizations.

**Demergers.** Tax relief is available if eligible company or fixed-trust groups divide into two separately owned entities. The demerging company (or fixed trust) must dispose of at least 80% of its ownership interests in the demerged entity, and the underlying ownership interests must not change as a result of the demerger. The rules provide investors optional CGT rollover relief, as well as dividend exemptions, which are available at the option of the demerging entity. The demerger group is also provided with limited CGT relief.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and services tax	10
Fringe benefits tax on non-cash employee benefits	
From 1 April 2014	47
From 1 April 2015 (under a Temporary Budget Repair Levy, the highest personal marginal income tax rate applicable for individuals is increased by two percentage points, effective from 1 July 2014 until 30 June 2017; a corresponding increase in the fringe benefits tax rate from 47% to 49% is effective from 1 April 2015 until 31 March 2017)	49
From 1 April 2017	47
Payroll taxes paid by employers (vary by state)	4.75 to 6.85

Customs duty is levied on imports of various products into Australia. Other significant taxes include stamp duty and land tax.

## E. Miscellaneous matters

**General anti-avoidance regime.** The general income tax anti-avoidance regime (Part IVA) plays an important role in complementing specific anti-avoidance rules. However, it also creates significant uncertainty for taxpayers. The Australian courts have dealt with several cases in which taxpayers entered into complex commercial transactions that resulted in tax benefits. They applied Part IVA in some cases but not in others.

Part IVA applies if, taking into account eight specified matters, it is determined that the dominant purpose of the parties entering into a scheme was to enable the taxpayer to obtain a tax benefit. If the Commissioner of Taxation makes a Part IVA determination, the tax benefit is denied and significant penalties may be imposed.

Part IVA was amended to limit the scope for taxpayers to argue that no tax benefit exists and that Part IVA is therefore inoperative. The amendments apply with respect to schemes entered into on or after 16 November 2012.

**Value shifting.** A general value-shifting regime applies to counter certain transactions involving non-arm's-length dealings between associated entities that depress the value of assets for certain income tax and CGT purposes.

**Transfer pricing.** Australia's tax law includes measures to ensure that Australian taxable income associated with cross-border transactions is based on arm's-length prices. Several methods for determining the arm's-length price are available. The Australian Taxation Office provides guidance in a binding tax ruling on the appropriate methods, and taxpayers can enter into Advance Pricing Arrangements.

For transactions with parties entitled to benefit from foreign tax treaties, the law confirms the Australian Tax Office view that Australia's tax treaties provide a separate and unconstrained transfer pricing taxing power. The amendments also allow the use of the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidance material.

For all other transactions, a new law applies to income years beginning on or after 1 July 2013, to bring the transfer-pricing rules into the self-assessment regime. It requires broader and timely documentation. The new law increases the risk of transfer-pricing adjustments, particularly for companies that are involved in significant intragroup financing arrangements or business restructurings or that have losses or low levels of profits. Significant aspects include the following:

- The onus is on the Public Officer who signs the income tax return to confirm that the actual conditions are in line with arm's-length conditions. If the actual and arm's-length conditions do not align and if a transfer-pricing benefit is received, the taxpayer must adjust taxable income, tax losses or other tax attributes. Penalties apply if a Public Officer makes a false or misleading statement in this regard.
- As a basic rule, the arm's-length conditions should be based on the form and substance of the actual commercial or financial relations. However, documentation must address reconstruction,

which refers to situations in which the transactions or arrangements actually entered into are ignored and (in some cases) other transactions or arrangements are substituted.

- Taxpayers are treated as not having a reasonably arguable position with respect to any international related-party transaction that is not appropriately documented. A transfer-pricing adjustment with respect to such undocumented transactions attracts a penalty of at least 25%.
- The law incorporates the 2010 OECD guidelines.
- Adjustments can only be within seven years of the date on which the Commissioner of Taxation gives the notice of assessment.

For business income tax returns, the International Dealings Schedule (IDS) requires detailed disclosures designed to flag potential risk areas.

**Debt-to-equity (thin-capitalization) rules.** Thin-capitalization measures apply to the total debt of Australian operations of multinational groups (including foreign and domestic related-party and third-party debt). In addition, the transfer-pricing measures may affect the deductions available for related-party debt.

*Thin-capitalization.* The thin-capitalization measures apply to the following:

- Foreign-controlled Australian entities and foreign entities that either invest directly into Australia or operate a business through an Australian branch (inward investing entities)
- Australian entities that control foreign entities or operate a business through an overseas branch (outward investing entities)

Exceptions to the thin-capitalization rules apply in either of the following circumstances:

- The total debt deductions of the taxpayer are AUD2 million or less for the year of income, effective from income years beginning on or after 1 July 2014 (previously AUD250,000).
- Australian assets account for 90% or more of total assets of outward investing entities (that are not also inward investing entities).

Debt deductions are partially denied if the company's adjusted average debt exceeds the maximum allowable debt.

In most cases, the maximum allowable debt is calculated by reference to the safe harbor debt amount. The safe harbor debt amount approximates a debt-to-equity ratio of 1.5:1 (or 60% debt-to-total-assets ratio), effective from income years beginning on or after 1 July 2014 (previously 3:1, or a debt-to-total-assets ratio of 75%). Separate methodologies apply to financial institutions or consolidated groups with at least one member classified as a financial entity (these ratios were also reduced, effective from income years beginning on or after 1 July 2014).

Taxpayers can also determine the maximum allowable debt by reference to an arm's-length debt amount that is based on what amount an independent party would have borrowed from an independent lender. This determination requires the consideration of several factors. The operation of the arm's-length debt test is under review, with a Board of Taxation report expected by December 2014.

Effective from income years beginning on or after 1 July 2014, inward investors can also determine the maximum allowable debt of an Australian entity by reference to the group's worldwide gearing debt amount (previously this was only available to outward investors that were not also inward investors). The ratio for the worldwide gearing debt is reduced from 120% to 100%, effective from 1 July 2014.

*Transfer pricing.* The transfer-pricing provisions apply to the pricing of related-party debt, even if an arrangement complies with the thin-capitalization rules. The Commissioner of Taxation can substitute a hypothetical arm's-length capital structure to set an arm's-length interest rate if the amount of debt is considered not to be arm's length, even if the taxpayer is within the thin-capitalization safe harbor debt levels. The arm's-length interest rate is then applied to the actual amount of debt.

**Controlled foreign companies.** A foreign company is a CFC if five or fewer Australian residents hold at least 50% of the company or have de facto control of it, or if a single Australian entity holds a 40% interest in the company, unless it is established that actual control does not exist.

A foreign company is a CFC if five or fewer Australian residents hold at least 50% of the company or have de facto control of it, or if a single Australian entity holds a 40% interest in the company, unless it is established that actual control does not exist.

The tainted income of a CFC is attributed to its Australian resident owners, which are required to include such income in their assessable income. In general, the tainted income of a CFC is its passive income and income from certain related-party transactions.

Income is generally not attributable if the CFC passes an active-income test. To pass this test, the CFC's tainted income may not exceed 5% of the CFC's gross turnover.

Whether an amount earned by a CFC is attributable to Australian residents depends on the country in which the CFC is resident. The CFC rules identify "listed countries," which have tax systems that are considered to be closely comparable to the Australian system. The following are the "listed countries":

- Canada
- France
- Germany
- Japan
- New Zealand
- United Kingdom
- United States

All other countries are "unlisted countries."

Certain amounts are unconditionally attributed regardless of whether the CFC is resident in a listed or unlisted country.

If a CFC resident in a listed country fails the active-income test, its attributable income includes "adjusted tainted income," which is eligible designated concession income prescribed by the regulations on a country-by-country basis. This income includes items such as income subject to tonnage taxation or concessionally taxed capital gains.

If a CFC resident in an unlisted country fails the active-income test, its attributable income includes all of its adjusted tainted income, such as passive income (including tainted interest, rental or royalty income) and tainted sales or services income.

Income derived by a CFC is exempt from Australian income tax if it is remitted as dividends or non-share dividends made with respect to an interest in the company classified as equity under Australian tax rules to an Australian company.

*Foreign investment fund rules.* Foreign investment fund (FIF) rules dealing with attribution of income related to certain non-controlling interests were repealed and last applied to the 2009–10 income year. The FIF rules were to be replaced by a narrowly defined anti-avoidance measure targeting “interest-like returns in certain foreign entities,” but this project has not progressed.

**Withholding taxes.** Interest, dividends and royalties paid to non-residents are subject to Australian withholding tax (also, see Section F for treaty withholding tax rates).

The 10% withholding tax rate on interest is generally the same as the rate prescribed by Australia’s treaties (see Section F). However, modern treaties provide for a 0% rate for government and unrelated financial institutions. The interest paid by an Australian branch of a foreign bank to its parent is subject to a rate of 5% of the notional interest paid by the branch on internal funds of the foreign bank entity; the notional interest is limited by reference to the LIBOR. Unilateral exemptions from interest withholding tax are provided for certain publicly offered debentures, state and federal government bonds and offshore borrowing by offshore banking units.

For dividends paid, the withholding tax rate of 30% applies only to the unfranked portion of the dividend. A reduced rate applies if dividends are paid to residents of treaty countries. An exemption from dividend withholding tax applies to the part of the unfranked dividends that is declared in the distribution statement to be conduit foreign income.

A final withholding tax at a rate of 30% is imposed on gross royalties paid to nonresidents. The withholding tax rate is typically reduced under a double tax treaty.

A concessional withholding tax regime applies to distributions by eligible managed investment trusts (MIT) to nonresidents, other than distributions of dividends, interest and royalties. The withholding tax rate is 30%, but a reduced 15% rate applies if the nonresident’s address or place of payment is in a country that is listed in the regulations as an “information exchange country” (see *Countries listed as “information exchange countries”*). MITs that hold only newly constructed energy efficient commercial buildings may be eligible for a 10% withholding tax rate.

The government has announced that it will proceed with a new taxation system for MITs, effective from 1 July 2015. The new taxation system will use an “attribution model” to determine tax distributions from MITs that meet certain criteria. Limited information is available on how this will interact with withholding tax obligations.

Under interim Australian investment manager regime (IMR) rules, certain widely held foreign managed funds and their non-resident investors may qualify for a conduit foreign income exemption for certain income from qualifying investments, effective from the 2010–11 income year. It is proposed to expand the IMR to Australian-source income from certain passive, portfolio investments and other financial arrangements from 1 July 2011; the exposure draft law is under revision.

**Countries listed as “information exchange countries.”** The concessional withholding tax rates for eligible MITs and benefits from the proposed IMR are restricted to investors in countries listed in the relevant regulation as an “information exchange country.” At time of writing, the regulation listed 60 countries, including the countries that have entered into double tax treaties with Australia except Austria and the Philippines (the information exchange articles in their tax treaties need to be updated) and Switzerland (the treaty, which entered into force on 14 October 2014, contains modern information exchange and mutual assistance provisions, but the regulation needs to be updated). Recent additions to the list include the following:

- Bahamas, Belize, the Cayman Islands, Monaco, St. Kitts and Nevis, St. Vincent and the Grenadines, San Marino and Singapore (effective from 1 July 2011)
- Anguilla, Aruba, Belgium, Malaysia and the Turks and Caicos Islands (effective from 1 January 2012)
- Cook Islands, Korea (South), Macau and Mauritius (effective from 1 July 2012)

**Foreign-exchange controls.** The Financial Transaction Reports Act 1988 requires each currency transaction involving the physical transfer of notes and coins in excess of AUD10,000 (or foreign-currency equivalent) between Australian residents and overseas residents, as well as all international telegraphic and electronic fund transfers, to be reported to the Australian Transaction Reports and Analysis Centre. This information is then available to the Commissioner of Taxation, Federal Police, Australian Customs Service and other prescribed law enforcement agencies.

## F. Treaty withholding tax rates

The table below provides treaty withholding tax rates for dividends, interest and royalties paid by Australian companies to non-residents.

Under Australian domestic law, certain dividends and interest payments to nonresidents are exempt from withholding tax.

For dividends, Australian domestic law provides that no withholding tax is imposed on dividends to the extent they are franked under Australia’s imputation system introduced in 1987 (see Sections B and E). Some of Australia’s double tax treaties specifically refer to withholding taxes imposed on franked dividends in some circumstances but, under the domestic tax law, dividend withholding tax is not imposed with respect to franked dividends.

For interest, Australia does not impose withholding tax on interest paid to nonresidents on certain publicly offered company

debentures or on interest paid on state and federal government bonds. No withholding tax is imposed on interest paid on off-shore borrowings by offshore banking units.

	<b>Unfranked dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Argentina	10/15 (b)	12	10/15 (c)

Non-treaty countries	30	10	30

- (a) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 0% or 5%, if the beneficial owner of the dividends is a company that holds at least 80% or 10%, respectively, of the voting power in the payer. In all other cases, the rate is generally 15%.

- (b) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 10% for franked dividends paid to a person holding directly at least 10% of the voting power in the payer). To the extent dividends are unfranked, the withholding tax rate is 15%, regardless of voting power.
- (c) The 10% rate applies to specified types of royalties.
- (d) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 25%, or 15% if a tax rebate or credit is granted against Australian tax to the beneficial owner of the dividends.
- (e) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for dividends paid out of fully taxed profits if the recipient is a company that holds directly at least 10% of the capital of the payer). To the extent dividends are unfranked, the withholding tax rate is 15%, regardless of voting power.
- (f) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 20% rate applies to dividends paid to a company that holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies if the condition described in the preceding sentence is satisfied and if the payer is engaged in an industrial undertaking.
- (g) The 0% rate applies to government institutions and unrelated financial institutions.
- (h) The 10% rate applies if any of the following conditions are satisfied:
- The recipient is a bank or insurance company.
  - The interest is derived from bonds and securities traded on a recognized securities market.
  - The payer is a bank or the purchaser of machinery and equipment with respect to a sale on credit.
- (i) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 0% rate applies if the recipient of the dividends is a company holding directly at least 10% of the voting power in the payer, and the 15% rate applies in all other cases.
- (j) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for dividends paid out of fully taxed profits to a company that holds at least 10% of the capital of the payer and that has invested at least AUD700,000 [or the equivalent in Russian rubles] in the payer). To the extent dividends are unfranked, the withholding tax is 15%, regardless of voting power.
- (k) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for franked dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer). To the extent dividends are unfranked, the rate is 15%, regardless of voting power.
- (l) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for franked dividends). To the extent dividends are unfranked, the rate is 15%.
- (m) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 10% for franked dividends). To the extent dividends are unfranked, the rate is 15%.
- (n) The 10% rate applies to interest derived by financial institutions or insurance companies.
- (o) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 0% or 5% if the recipient holds at least 80% or 10%, respectively, of the voting power in the payer and 10% in other cases. However, a 15% withholding tax rate applies to fund payments from managed investment trusts but, under Australian law, this rate is reduced to 10% for funds payments by clean building managed investment trusts.
- (p) The withholding tax rates listed in the table apply to income derived by non-residents on or after 1 January 2015.
- (q) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a 0% rate if the dividends paid out of profits that have borne the full company tax and if the recipient is a company that holds directly at least 10% of the voting power of the payer). To the extent dividends are unfranked, the rate is 15%, or it is 5% if the dividends are paid to a company that holds at least 10% of the voting power of the payer.
- (r) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate on unfranked dividends is 15%, or 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting power of the company paying the dividend.

- (s) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 5% rate applies to dividends paid by a company that is resident in Australia to a company (other than a partnership) that holds directly at least 10% of the voting power in the company paying the dividends. The 15% rate applies in all other cases.
- (t) Australia is renegotiating its double tax treaty with the United Kingdom. An exemption from withholding tax for interest payments to related financial institutions is one area for potential change. However, further details are not yet available.
- (u) These countries are not currently listed as “information exchange countries” (see Section E).
- (v) Interest derived from the investment of official reserve assets by the government of a contracting state, its central bank or a bank performing central banking functions in that state is exempt from tax in the other contracting state. The 10% rate applies in all other cases.
- (w) Australia has most-favored-nation clauses in its treaties with Austria, Finland, France, Italy, Korea (South), Malaysia, the Netherlands, Norway and Switzerland. Under the most-favored-nation clause, Australia and the other treaty country must try to renegotiate their tax treaties if the withholding tax rates in another of Australia’s tax treaties are lower.
- (x) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 0% rate applies if the recipient holds at least 80% of the payer or if the dividends are paid with respect to portfolio investments by government bodies including government investment funds. The 5% rate applies if the recipient holds at least 10% of the payer. The 15% rate applies to other dividends.
- (y) The 0% rate applies to interest paid to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.
- (z) The withholding tax rates listed in the table apply to income derived on or after 1 April 2013.
- (aa) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 5% rate applies if the recipient beneficially owns at least 10% of the voting power in the company paying the dividends. The 15% rate applies in all other cases.
- (bb) The 5% rate applies if the recipient is a financial institution that is unrelated to and dealing wholly independently with the payer. The 10% rate applies in all other cases.
- (cc) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (dd) An amending protocol to the treaty signed on 16 December 2011 entered into force on 2 April 2013. It updates various aspects of the agreement including cross-border services, source-country taxation and assistance in collection of taxes. However, it does not contain any changes to withholding tax rates.
- (ee) Australia and Switzerland signed a revised tax treaty, which entered into force on 14 October 2014. It applies to withholding taxes on income that is derived by a resident of Switzerland on or after 1 January 2015.
- (ff) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, a 0% rate applies to dividends paid to the following:
- Publicly listed companies or subsidiaries thereof, and unlisted companies in certain circumstances, that hold 80% or more of the paying company
  - Complying Australian superannuation funds and tax-exempt Swiss pension schemes that did not hold more than 10% of the direct voting power or capital in the company, respectively, during the preceding 12-month period
- The 5% rate applies to dividends paid to companies that hold 10% or more of the paying company. The 15% rate applies in all other cases.
- (gg) Under the revised treaty, the 0% rate applies to interest paid to the following:
- Bodies exercising governmental functions and banks performing central banking functions
  - Banks that are unrelated to, and dealing independently with, the payer
  - Complying Australian superannuation funds and tax-exempt Swiss pension schemes
- The 10% rate applies in all other cases.
- (hh) Under the revised treaty, royalties are taxed in the source (of the royalty) country at a rate of up to 5%. The revised definition of “royalties” in the revised tax treaty excludes the right to use industrial, commercial or scientific equipment from the definition, and accordingly, may lower the costs for companies that lease such equipment.

## A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25
Withholding Tax (%)	
Dividends	25 (b)
Interest (from Bank Deposits and Securities only)	0/25 (c)
Royalties from Patents, Know-how, etc.	20 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

- (a) Applies to distributed and undistributed profits.  
 (b) In general, applicable to dividends paid to residents and nonresidents. Certain dividends paid to Austrian and European Union (EU) companies are exempt from tax (see Section B).  
 (c) For details, see Section B.  
 (d) Applicable to nonresidents.  
 (e) The offset of loss carryforwards against taxable income is limited to 75% of taxable income (see Section C).

## B. Taxes on corporate income and gains

**Corporate income tax.** In general, all companies resident in Austria and foreign companies with a branch or permanent establishment in Austria are subject to corporate income tax. (For the scope of income subject to tax, see *Foreign tax relief*.) A company is resident in Austria if it has its legal seat or its effective place of management in Austria. Nonresident companies are subject to tax on their Austrian-source income only.

**Rates of corporate income tax.** The corporate tax rate is generally 25%.

All companies, including those incurring tax losses, are subject to the minimum tax. In general, the minimum tax is EUR1,750 for an Austrian private limited company (*Gesellschaft mit beschränkter Haftung*, or GmbH), EUR3,500 for a stock corporation (*Aktiengesellschaft*, or AG) and EUR6,000 for a European stock corporation (*Societas Europea*, or SE). For banks and insurance companies, the minimum tax is EUR5,452. Minimum tax may be credited against corporate tax payable in future years.

A reduced minimum tax applies to Austrian private limited companies incorporated after 30 June 2013. For such companies, the minimum tax is EUR500 per year for the first five years and EUR1,000 for the following five years. This is known as the “foundation privilege.”

**Participation exemptions.** The Austrian tax law provides for national and international participation exemptions.

*National.* Dividends (including hidden profit distributions) received by an Austrian company from another Austrian company are exempt from corporate income tax (no minimum holding is required). Capital gains derived from the sale of shares in Austrian companies are treated as ordinary income and are subject to tax at the regular corporate tax rate. In general, capital losses on and depreciation of the participation may be deducted from taxable income, spread over a period of seven years.

*International participation.* An Austrian company is entitled to the international participation exemption if it holds at least 10%

of the share capital of a foreign corporation that is comparable to an Austrian corporation for more than one year. The one-year holding period begins with the acquisition of the participation. The international participation exemption applies to dividends and capital gains.

A decrease in the value of an international participation is generally not tax deductible, but an Austrian company can irrevocably opt for such tax deductibility in the annual tax return for the year of acquisition. If this irrevocable option is exercised, capital gains are subject to tax, and decreases in value and capital losses are tax deductible. In general, capital losses and depreciation of the participation may then be deducted from the taxable income, spread over a period of seven years. In the event of insolvency or liquidation, final losses may be deducted even if the option for tax effectiveness was not exercised. The option does not affect the tax treatment of dividends.

According to an anti-abuse rule, the international participation exemption does not apply if both of the following conditions are met:

- The subsidiary earns primarily specified types of passive income, which are interest, income from leasing property other than land and buildings and capital gains (active business test).
- The subsidiary is not subject to income tax at an effective rate of more than 15% in its home country (low taxation test).

To determine whether a company is a passive company, the Austrian corporate income tax guidelines refer to the company's focus. The focus is determined from an economic perspective, based on the use of capital, employees and the character of the revenues. A company is considered to be a passive company if it derives more than 50% of its revenues from passive operations.

If the passive income and low taxation tests described above are not met, dividends and capital gains are taxed at the general Austrian corporate tax rate of 25%. For dividends, income taxes paid by the foreign subsidiary (underlying tax), as well as withholding taxes imposed, are credited against the income tax payable by the Austrian parent company (this represents a switchover from the exemption method to the credit method). Abuse may also be assumed if one of the criteria is "strongly given" and the second element is "almost given." "Strongly given" means that the statutory threshold is exceeded by more than 25%. "Almost given" means that the company fails to meet the statutory threshold by less than 25% of such threshold. If the creditable foreign tax exceeds the amount of tax to be paid in Austria, the excess amount of foreign tax can be carried forward and credited in future tax periods.

*International portfolio participation.* Dividends from participations that do not meet the criteria for international participations are subject to the general corporate income tax rate of 25%. However, shareholdings in EU corporations, certain European Economic Area (EEA) corporations (currently only Liechtenstein and Norway) and corporations that are resident in third countries and that have agreed to exchange tax information qualify as international portfolio participations. Dividends from such international portfolio participations are exempt from tax. Capital gains (and

losses) are tax-effective (the treatment corresponds to the treatment of national participations).

If a foreign entity is subject to a tax rate lower than 15%, the exemption for dividends from portfolio participations does not apply. Instead, dividends are taxed at the general Austrian corporate income tax rate of 25%. Income taxes paid by the foreign subsidiary (underlying tax), as well as withholding taxes imposed, are credited against the income tax payable by the Austrian parent company (this represents a switchover from the exemption method to the credit method). If the creditable foreign tax exceeds the amount of tax to be paid in Austria, the excess amount of foreign underlying tax can be carried forward and be credited in future tax periods.

*Hybrid financing.* Dividends from international participations (including portfolio participations) are not exempt from tax in Austria if such payments are deductible for tax purposes in the country of the distributing company.

*Expenses.* Business expenses are generally deductible. However, an exception applies to expenses that are related to tax-free income. Although dividends from national and international participations and portfolio participations are tax-free under the Austrian participation exemption, interest incurred on the acquisition of such participations is deductible for tax purposes. However, interest from debt raised to finance the acquisition of participations from affiliates is generally not deductible. In addition, interest and royalty payments to domestic and foreign affiliated corporations are not tax deductible if the income of the recipient corporation is completely or predominantly not subject to tax or taxed at a rate of less than 10%. If the recipient corporation is not the beneficial owner, the taxation of the beneficial owner is relevant. An exception applies to payments to entities that meet the EU law privileges for risk capital measures, which are contained in Regulation (EU) No. 345/2013 of the European Parliament and of the Council of 17 April 2013 on European venture capital funds. If these specific rules of EU law are fulfilled and if the income of the recipient corporation is taxed at a rate of less than 10%, interest and royalty payments to domestic and foreign affiliated corporations remain deductible for tax purposes.

**Capital gains.** Capital gains derived from sales of shares in Austrian companies are treated as ordinary income and are subject to tax at the regular corporate tax rate. Capital gains derived from sales of shares in non-Austrian companies may be exempt from tax under the international participation exemption; otherwise, they are treated as ordinary income and subject to tax at the regular corporate tax rate.

### **Withholding taxes on dividends and interest**

*Dividends.* In general, dividends paid by Austrian companies are subject to a withholding tax of 25% if they do not represent a repayment of capital. However, this withholding tax does not apply to dividends (other than hidden profit distributions) paid to either of the following:

- An Austrian parent company (fulfilling certain criteria) holding directly or indirectly an interest of at least 10% in the distributing company.

- A parent company resident in another EU country holding directly or indirectly an interest of at least 10% in the distributing company for at least one year.

In addition, the withholding tax rate may be reduced for dividends paid to foreign shareholders in accordance with double tax treaties. Depending on the situation, this reduction may be in the form of an upfront reduction at source or a refund of withholding tax.

For dividends paid to parent companies resident in the EU or EEA (if the EEA country grants full administrative assistance; currently only Liechtenstein and Norway meet this condition) that are subject to tax in Austria, Austrian withholding tax is refunded if the shareholder can prove that the withholding tax cannot be credited in the state of residence of the shareholder under tax treaty law.

*Interest.* Interest paid on loans (for example, intercompany loans) is not subject to withholding tax in Austria. A 25% withholding tax is imposed on interest income from bank deposits and securities held in Austrian banks. Interest paid to nonresident companies on bank accounts, savings accounts and similar accounts is exempt if the recipient confirms in writing that it is a nonresident company. In addition, interest income is exempt from withholding tax if the debtor has neither an ordinary residence nor a registered office in Austria or if it is not a domestic branch of a foreign bank. EU withholding tax may apply if certain requirements are met.

Interest income earned by a company engaged in business in Austria through a permanent establishment is considered business income and must be included in the taxable income of the permanent establishment. For such companies, the 25% withholding tax (if due) is credited against corporate income tax due. If the withholding tax exceeds the tax due, it is refunded. The withholding tax is not imposed if a declaration of exemption stating that the interest is taxed as business income is filed with the Austrian bank.

**Administration.** In principle, the Austrian tax year corresponds to the calendar year. However, other fiscal years are possible. The tax base is the income earned in the fiscal year ending in the respective calendar year. Annual tax returns must be filed by 30 April (30 June, if submitted electronically) of the following calendar year. Extensions may be granted. A general extension to 31 March (or 30 April) of the second following year is usually granted if a taxpayer is represented by a certified tax advisor (tax returns may be requested earlier by the tax office).

Companies are required to make prepayments of corporate income tax. The amount is generally based on the (indexed) amount of tax payable for the preceding year, and payment must be made in equal quarterly installments on 15 February, 15 May, 15 August and 15 November.

Interest is levied on the amount by which the final tax for the year exceeds the total of the advance payments if this amount is paid after 30 September of the year following the tax year. To prevent interest, companies may pay the amount due as an additional advance payment by 30 September of the year following the tax year.

**Foreign tax relief.** In general, resident companies are taxed in Austria on their worldwide income, regardless of where that income is sourced. However, the following exceptions exist:

- The Finance Ministry may, at its discretion, allow certain types of income that have their source in countries with which Austria has not entered into a double tax treaty to be excluded from the Austrian tax computation, or it may allow foreign taxes paid to be credited against Austrian corporate income tax. Under a decree of the Ministry of Finance, an exemption is granted in case of active income and taxation of at least 15%. Otherwise, only a credit of foreign taxes is allowed.
- Income earned in countries with which Austria has a double tax treaty is taxable or exempt, depending on the treaty.
- Dividends and capital gains derived from participations of 10% or more in foreign subsidiaries are exempt from corporate income tax under the international participation exemption (see *Participation exemptions*).
- Dividends from foreign portfolio shareholdings in companies resident in countries that have agreed to exchange tax information are exempt from tax unless the subsidiary is low-taxed (see *Participation exemptions*).

### C. Determination of trading income

**General.** In general, taxable income is based on the profit or loss shown in the financial statements prepared in accordance with Austrian generally accepted accounting principles. The financial statement profit or loss must be adjusted in accordance with special rules set forth in the tax acts. Taxable income is calculated as follows.

Profit per financial statements	X
+ Nondeductible taxes (such as corporate income tax)	X
+ Nondeductible expenses (such as donations, lump-sum accruals and certain interest)	X
– Special allowances and non-taxable income (intercompany dividends and loss carryforwards*)	<u>(X)</u>
= Taxable income	<u><u>X</u></u>

\* The offset of loss carryforwards against taxable income is limited to 75% of taxable income in most cases.

**Inventories.** In determining trading income, inventories must be valued at the lower of cost or market value. Cost may, at the taxpayer's option, be determined using any of the following methods:

- Historical cost
- Average cost
- First-in, first-out (FIFO)
- Under certain circumstances, last-in, first-out (LIFO)

The highest-in, first-out (HIFO) method is not allowed.

**Provisions.** Accruals for severance payments and pension costs are allowable to a limited extent. Accruals for corporate income tax and lump-sum accruals are not deductible for tax purposes. Provisions with a term of 12 months or more are tax-deductible at a rate of 80%, except for accruals for severance payments and pension costs, which are tax-deductible to the extent of 100% of

their tax value. This lump-sum discounting for long-term accruals, except accruals for severance payments, jubilees (premium payments for long-term employees) and pension costs, has been abolished and replaced by a mandatory fixed discounting rate of 3.5% per year for new provisions. The amendment is effective for all first-time accrued long-term provisions made for financial years ending after 30 June 2014.

**Depreciation.** In general, depreciable assets are depreciated over the average useful life. For certain assets, such as buildings and passenger cars, the tax law provides depreciation rates. The following are some of the applicable annual rates.

Asset	Rate (%)
Buildings	2 to 3
Office equipment	10 to 25
Motor vehicles	12.5
Plant and machinery	10 to 20

**Research and development.** Companies may claim a research and development (R&D) bonus (cash payment) equal to 10% of certain expenses for research and experimental development (according to the Frascati manual, these expenses consist of material costs, labor costs, energy costs and attributed interest). The R&D must be conducted by an Austrian company in Austria or by an Austrian permanent establishment of a foreign company.

**Training.** Similar to R&D expenses, a bonus of 6% can be claimed for training expenses. Instead of the bonus, the company can deduct an additional, notional expense of 20% of the training expenses in its tax return.

**Relief for losses.** Losses incurred by resident companies may be carried forward without time limit. The offset of loss carryforwards against taxable income is limited to 75% of the taxable income. The remaining balance of the loss carryforward may be offset against income in future years, subject to the same 75% limitation.

The loss carryforward is attributable to the corporation, not to the shareholders. Consequently, a change in shareholders does not affect the loss carryforward, provided no corresponding substantial change in the business and management of the company occurs. Losses may not be carried back. Foreign companies with permanent establishments in Austria may claim tax losses only under certain circumstances.

**Groups of companies.** The group taxation regime allows parent and subsidiaries to consolidate their taxable income. The head of the tax group must be an Austrian corporate entity (or branch of an EU/EEA corporate entity) that has held more than 50% of the capital and voting rights in the subsidiary since the beginning of the subsidiary's fiscal year. The shareholding can be direct, or it can be held indirectly through a partnership or a group member. Only corporations (not partnerships) qualify as group members. If the holding requirement is satisfied, 100% of the taxable income (profit or loss) of domestic group members is allocated to the taxable income of the group parent, regardless of the percentage of the shareholding in the subsidiary. No actual profit or loss transfer takes place (only an agreement on the split of the tax

burden is required). The tax group must exist for at least three full financial years. Otherwise, retroactive taxation on a stand-alone basis applies.

Group taxation also allows a cross-border tax consolidation if the foreign subsidiary is directly held by an Austrian parent (first foreign tier) and if the type of entity is comparable to an Austrian corporation from a legal perspective. Effective from 1 March 2014, certain companies are excluded from the group taxation regime. Only corporations resident in the EU and in countries with which Austria has agreed on comprehensive administrative assistance can be included in a tax group. The Austrian Ministry of Finance has published a list of all qualifying third countries.

Existing foreign group members that are resident outside the EU or in countries without a comprehensive administrative assistance agreement are suspended from the group tax regime as of 1 January 2015, as a matter of law. If, based on this rule, the three-year minimum holding period cannot be fulfilled, no retroactive reversal of group taxation tax effects will occur. The recapture of foreign prior year losses of the suspended group members may be spread over three years (see below for details regarding the recapture of foreign losses).

Foreign losses must be recalculated under Austrian tax law. In addition, the deductibility of foreign losses is limited to the lower of the amount according to Austrian tax law and actual losses calculated under foreign tax law. Losses from foreign group members can be deducted from the Austrian tax base in proportion to the shareholding only. Beginning with the 2015 tax year, the utilization of losses of foreign group members is limited to 75% of the domestic group income. Excess losses are included in the loss carryforwards for subsequent years. Profits of a foreign group member are generally not included in the Austrian group parent's income.

To avoid double utilization of losses of a foreign group member, foreign losses that have been deducted from income of the Austrian group shareholder are added to the Austrian profit if the losses can be offset in the foreign jurisdiction at a subsequent time. Consequently, if the foreign country takes into account the losses in subsequent years (as part of a loss carryforward), the tax base in Austria is increased by that amount in order to prevent a double dip of losses. Foreign losses must also be added to the Austrian income tax base if the foreign subsidiary leaves the group. A recapture is also required if a significant reduction occurs in the size of the foreign subsidiary's business. This measure is designed to prevent dormant foreign entities from remaining in the group to avoid the recapture of foreign losses. Relief for capital losses is provided only in the event of a liquidation or insolvency.

If an Austrian participation is acquired and if the acquired company becomes part of the group, goodwill depreciation (from a share deal) over a period of 15 years is possible. The goodwill is computed as the spread between the equity of the acquired company (pro rata to the acquired shares) and the acquisition price for the shares. This spread is reduced by hidden reserves attributable to non-depreciable long-term assets (primarily real estate). The

basis for the goodwill depreciation is capped at 50% of the acquisition cost. Under a new law, acquisitions of participations after 28 February 2014 are no longer entitled to goodwill amortization. Remaining amortization amounts (1/15 per year) from past acquisitions basically remain deductible for tax purposes in accordance with the rules discussed above.

Depreciation to the fair market value of a participation within the group is tax-neutral.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard	20
Reduced	10
Payroll taxes, paid by employer	
Family allowance fund; varies by state	4.86 to 4.94
Community tax	3
Real estate sales tax (including 1.1% registration fee)	4.6
Capital duty, on contributions to capital of companies (this duty will be abolished, effective from 1 January 2016)	1
Stamp duties, on certain legal transactions, such as leases and hire contracts	0.8 to 2
Stability tax for banks; on adjusted balance sheet total (an additional stability surcharge of 45% applies from 2015 through 2017)	0.09 to 0.11

#### E. Miscellaneous matters

**Foreign-exchange controls.** No restrictions are imposed on the transfer of nominal share capital, interest and the remittance of dividends and branch profits. Royalties, technical service fees and similar payments may be remitted freely, but routine documentation may be required.

**Debt-to-equity rules.** Austrian tax law does not provide special debt-to-equity rules. Although, in general, shareholders are free to determine whether to finance their company with equity or loans, the tax authorities may reclassify loans granted by shareholders, loans granted by group companies, and loans granted by third parties guaranteed by group companies as equity, if funds are transferred under legal or economic circumstances that typify equity contributions, such as the following:

- The equity of the company is insufficient to satisfy the solvency requirements of the company, and the loan replaces equity from an economic point of view.
- The company's debt-to-equity ratio is significantly below the industry average.
- The company is unable to obtain any loans from third parties, such as banks.
- The loan conveys rights similar to shareholder rights, such as profit participations.

If a loan is reclassified (for example, during a tax audit), interest is not deductible for tax purposes, withholding tax on hidden

profit distributions may become due, and capital duty of 1% on the loan amount is imposed. This duty will be abolished, effective from 1 January 2016.

**Transfer pricing.** Austria has accepted the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines and published a summary of the interpretation of the OECD guidelines by the Austrian tax administration in 2010. Under these guidelines, all transactions with related parties must be conducted at arm's length. If a transaction is considered not to be at arm's length, the transaction price is adjusted for corporate income tax purposes. This adjustment may be deemed to be a hidden profit distribution subject to withholding tax or a capital contribution subject to capital duty.

## F. Treaty withholding tax rates

The following summary is intended purely for orientation purposes; it does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic tax law.

	Dividends		Interest (a)		Royalties

A General.

B Dividends received from subsidiary company. Shareholding required varies from 10% to 95%, but generally is 25%.

C General.

D Mortgages.

E General.

F Royalties from 50% subsidiary.

(a) Under domestic tax law, a 25% withholding tax is imposed only on interest income from bank deposits and securities. However, interest paid to non-residents is generally not subject to withholding tax. For details, see Section B.

(b) No reduced rate applies.

(c) No withholding tax is imposed, but the income is subject to tax at the regular corporate rate.

(d) Austria is honoring the USSR treaty with respect to the republics comprising the Commonwealth of Independent States (CIS), except for those republics that have entered into tax treaties with Austria. Austria has entered into tax treaties with Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. The withholding tax rates under these treaties are listed in the above table.

(e) Interest paid by banks is subject to a 4.95% withholding tax.

(f) Trademark royalties are subject to a 25% withholding tax. The withholding tax rate is 15% for royalties paid for literary, artistic and scientific items.

(g) The rate is 10% for royalties paid for the use of films or other means of production used for radio or television.

(h) The 5% rate applies if the participation of the recipient of the dividends exceeds USD250,000. The 10% rate applies if the participation of the recipient of the dividends exceeds USD100,000 but does not exceed USD250,000.

(i) The rate is 5% for royalties paid for technologies not older than three years.

(j) The rate is 0% for royalties paid for literary, artistic and scientific items.

(k) Royalties paid for computer software, patents and know-how are exempt if the royalties are taxed in the state of residence of the recipient.

(l) The rate is 5% for royalties paid to licensors engaged in industrial production.

(m) This rate applies to dividends received from a 10%-subsidiary.

(n) The rate is 2% for amounts paid for the use of commercial or scientific equipment.

(o) The rate is 20% for dividends paid by non-industrial Pakistani corporations.

(p) The rate is 10% for royalties paid for literary, artistic and scientific items.

(q) The 5% rate applies to amounts paid for the use of industrial or scientific equipment.

(r) The 5% rate applies to dividends received from a 25%-subsidiary; the 10% rate applies to dividends received from a 10%-subsidiary.

(s) The rate is 10% for interest paid to a bank if the interest arises from the transacting of bank business and if the recipient is the beneficiary of the interest.

(t) The 5% rate applies to participations of at least 70%. The 10% rate applies to participations of at least 25%.

(u) The rate is 7.5% for technical services.

(v) The rate is reduced to 10% for interest received from a bank. Interest on loans granted by the Österreichische Kontrollbank to promote exports or similar institutions in Turkey is subject to a withholding tax rate of 5%.

- (w) The treaty with Montenegro has been signed but has not yet entered into force.
- (x) A shareholding of at least 5% is required.
- (y) The 10% rate applies to industrial royalties.

The tax treaty with Argentina was suspended by Argentina, effective from 1 January 2009.

A tax treaty with Chile is expected to enter in force in 2015.

A tax treaty with Taiwan has been signed, but it has not yet been ratified.

*Because of the rapidly evolving economic situation in Azerbaijan, readers should obtain updated information before engaging in transactions.*

## A. At a glance

Corporate Profits Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Permanent Representation Tax Rate (%)	20
Withholding Tax (%)	
Dividends	10 (a)
Interest or Financial Lease Payments	10 (b)
Royalties from Patents, Know-how, etc.	14 (a)
Management Fees	10 (c)
Income from International Transportation and Telecommunication Services	6 (c)
Insurance Payments	4 (c)
Payments of other Azerbaijani-Source Income to Foreign Companies	10 (c)
Branch Remittance Tax	10 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) These are final withholding taxes applicable to payments to Azerbaijani and foreign legal entities.
- (b) This is a final withholding tax applicable to payments to Azerbaijani and foreign legal entities, excluding Azerbaijani banks and leasing entities, and foreign banks and leasing entities operating in Azerbaijan through a permanent representation.
- (c) This is a final withholding tax applicable to payments to foreign legal entities.

## B. Taxes on corporate income and gains

**Corporate profit tax.** Enterprises carrying on activities in Azerbaijan, including enterprises with foreign investment, joint ventures and legal entities operating through a permanent representation, are subject to tax.

Azerbaijani resident legal entities are subject to tax on their worldwide income. For tax purposes, Azerbaijani resident legal entities are entities incorporated in Azerbaijan and entities that

have their effective management located in Azerbaijan, including 100%-owned subsidiaries of foreign companies.

Nonresident legal entities are subject to tax on profits earned through a permanent representation only. A permanent representation is defined as the following:

- Persons who are performing the function of a permanent establishment of a nonresident legal entity or natural person and who are authorized to conclude contracts on behalf of such nonresident entity or natural person
- A bureau, office or agency
- A location where activities are carried out relating to the development of natural resources
- The rendering of consultation services
- A fixed base used for entrepreneurial activities for a cumulative amount of 90 days during any 12-month period

The Azerbaijan Law on the Protection of Foreign Investments allows foreign investment in various forms, including investment through 100% foreign-owned subsidiaries, share participations in joint stock companies and in joint ventures with Azerbaijani legal entities and citizens, permanent representations and other types of participations.

**Tax rate.** All entities operating in Azerbaijan are subject to corporate profit tax at a rate of 20%.

**Capital gains.** Capital gains are included in taxable income and taxed at the regular rate.

**Administration.** The tax year is the calendar year. The tax year for newly created enterprises or permanent representations of foreign legal entities runs from the date of formation through 31 December of the year of formation.

All entities operating in Azerbaijan must make advance payments of corporate profit tax by the 15th day following the end of each quarter. Each advance payment must equal at least one-quarter of the profit tax liability for the prior tax year. Alternatively, the amounts of the advance payments may be determined by multiplying the company's revenues for the quarter by the company's effective tax rate for the prior year. The effective tax rate is equal to tax as a percentage of revenues.

If, at the end of the tax year, it is determined that the total of the advance payments exceeds the tax due for the year, the excess may be credited against future tax obligations or refunded. In practice, however, the tax authorities rarely, if ever, issue refunds. Consequently, entities generally credit overpayments against future taxes.

**Dividends.** Dividends paid are subject to income tax withholding at a rate of 10%. This is considered a final tax and companies do not include the dividends in taxable profits.

**Foreign tax relief.** Foreign income tax paid by taxpayers in Azerbaijan on income derived from sources outside Azerbaijan may be credited against Azerbaijani tax imposed on the same income, limited to the amount of Azerbaijani tax imposed on such income. In determining the amount of the allowable foreign tax credit, it is unclear if a limitation based on the country of source is imposed or if all foreign-source income is pooled.

### C. Determination of trading income

**General.** Taxable profit is determined by computing the profit or loss from business activities and then adding income from non-trading operations, such as leasing income and capital gains, but excluding dividends received. Income received in foreign currency is converted into manats (AZN) at the daily exchange rate determined by the Central Bank of Azerbaijan.

Statutory norms limit the deductions for certain categories of expenses, such as business travel expenses, repair expenses, interest paid on foreign borrowings and interest paid between related parties. Expenses for meals and entertainment as well as for the providing of food and housing to employees are disallowed except for companies providing therapeutic nourishment items, milk and similar products to their employees. Such deductions will be allowed within norms, which have not yet been introduced by the government.

Foreign legal entities doing business through a permanent representation in Azerbaijan are taxed on actual profits. If actual profits cannot be determined, the tax authorities may determine taxable profits based on either income or expenses, with a deemed profit margin of 20%.

**Tax depreciation.** Fixed assets, other than buildings, are subject to depreciation by a group method. Under this method, fixed assets are allocated to groups, and the groups are depreciated in aggregate. Depreciation rates, which are specified by law, are applied to the aggregate book values for each of the groups. The depreciable balance for a group is reduced by the depreciation accrued for the year by the group. If any assets of a group are sold during the year, the depreciable balance of the group is reduced by the residual value of such assets. The profit or loss on the sale of such assets is separately determined.

An acquisition of assets under a finance lease is treated as a loan from the lessor to the lessee and a purchase of assets by the lessee. The lessee may then claim depreciation on the assets.

**Relief for losses.** An enterprise incurring a loss in a tax year may carry forward the loss to the following five years, without limitation on the amount, to offset the profit in such following years.

**Groups of companies.** There are no provisions permitting related enterprises to offset profits and losses among members of a group.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods sold and services rendered, in Azerbaijan; the tax law contains specific rules for determining when services are deemed to be provided in Azerbaijan; Azerbaijani taxpayers that make payments to entities that are not registered taxpayers in Azerbaijan for goods and services provided in Azerbaijan must calculate VAT on the payments	

Nature of tax	Rate (%)
Assets tax, on the annual average net book value of fixed assets or the market price of the asset if the insurance value of assets exceeds the net book value	1
Import tariffs	0 to 15

### E. Foreign-exchange controls

The manat (AZN) is a non-convertible currency outside Azerbaijan. Enterprises may buy or sell foreign currency through authorized banks or foreign-exchange offices in Azerbaijan.

To receive foreign-currency income in Azerbaijan, an enterprise must obtain a license issued by the Central Bank of Azerbaijan.

### F. Treaty withholding tax rates

Azerbaijan currently considers none of the tax treaties of the former USSR to be in force. Azerbaijan has entered into tax treaties with various countries.

The withholding rates under Azerbaijan's ratified treaties are listed below. Because of recent reductions in domestic withholding tax rates, the tax treaties may now specify rates that are the same as, or in excess of, domestic rates and, consequently, offer little or no savings with respect to withholding taxes. The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest %	Royalties %

## A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

## B. Taxes on corporate income and gains

No taxes are levied on corporate income or capital gains.

## C. License fees and other duties

**Business license fees.** For corporations designated as residents for exchange-control purposes, their business revenue in the Bahamas is subject to an annual license fee, which varies according to annual revenue or turnover. Businesses that have annual turnover not exceeding BSD50,000 are required to pay a business license fee of BSD100. If the turnover exceeds BSD50,000 per year, the fee varies from 0.5% to 1.75%, based on the business annual revenue or turnover. However, for most professional businesses, the business license fee equals 1% of revenue.

As an anti-tax avoidance measure, a subsidiary in the Bahamas is subject to the same business license tax rate as is its parent in the Bahamas.

Business license fees must be paid by 31 March each year, and proof of payment of real property tax must be produced before the license is issued.

Corporations regulated by specific legislation may not be subject to this fee.

**Bank and trust company license fees.** Offshore banks and trust companies licensed under the Bank and Trust Companies Regulation Act are subject to business license fees, which vary depending

on the value of the assets under management. The annual business license fees range from BSD450,000 to BSD3,750,000 per license. Domestic banks and other domestic financial institutions licensed under the Bank and Trust Companies Regulation Act are subject to a business license fee, which equals 3% of annual revenue or turnover.

**International business companies.** International business companies (IBCs) pay an annual license fee based on authorized capital. Government fees related to the creation of an IBC equal BSD330. The annual license fee is BSD350 if turnover is less than BSD50,000, and the fee is BSD1,000 if turnover is BSD50,000 or more. IBCs are exempt from all other taxes (except potentially value-added tax (VAT), effective from 1 January 2015; see Section G) and stamp duties for a period of 20 years from the date of incorporation, except for transactions involving real estate in the Bahamas. IBCs are normally created through service providers that charge separate fees for their services.

**Limited duration companies.** Limited duration companies (LDCs) pay an application fee of BSD850 and an annual license fee based on authorized capital. LDCs may be classified as partnerships for US tax purposes. By complying with certain formalities, an existing IBC may change its status to an LDC.

**Insurance companies.** Insurance companies that are incorporated in the Bahamas pay stamp tax on authorized capital (for details, see Section D). They also pay the fees described below.

Resident insurance companies that write local business pay an initial registration fee of BSD1,000 and a premium tax of 3% of gross premiums collected each quarter. The minimum tax is BSD25.

Restricted offshore insurance companies pay an initial registration fee of BSD2,500 and an annual fee of BSD2,500 in subsequent years. Unrestricted companies pay an initial registration fee of BSD3,500 and an annual fee of BSD3,500 in subsequent years. Offshore insurance companies also pay an annual fee of BSD1 for each licensed resident insurance manager who provides underwriting as a service. Offshore insurance companies are exempt from all other taxes for a period of 20 years from the date of registration.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Customs duties, on imported items; exemptions may be granted to businesses licensed under certain legislation; rate varies by type of item (effective from 1 January 2015, several customs duty rates will be reduced to compensate for the introduction of VAT; see Section G)	Various
Hotel guest tax, on room rate (expected to be repealed on the introduction of VAT)	10% plus BSD10 per additional adult per day

Nature of tax	Rate
Stamp tax	
On property conveyances; rate depends on selling price	4% to 10%
On imported items (average rate)	10%
On authorized capital of a domestic limited company (payable at time of incorporation)	
First BSD5,000	2%
Each additional BSD1,000	0.5%
Repatriation out of the Bahamas of substantial profits by trading concerns; tax is imposed on each transfer of funds exceeding BSD500,000 per year if the transfer represents dividends, profits or payments for services rendered by a related party	
Repatriated foreign currency	5%
Repatriated Bahamian dollars	1.5%
Leasing, subleasing or licensing of marina slips; tax rate applied to value	
BSD0 to BSD20,000	4%
BSD20,001 to BSD50,000	6%
BSD50,001 to BSD100,000	8%
BSD100,001 and above	10%
Real property tax; application of tax varies depending on appraised value, location, nationality of owner and development of property	0.75% to 2%
National insurance contributions on weekly wages up to BSD620 or on monthly wages up to BSD2,687; for employees earning BSD60 or more a week; paid by	
Employer	5.9%
Employee	3.9%

### **E. Foreign-exchange controls**

Corporations doing business in the Bahamas fall into the categories of resident or nonresident.

A resident company is one dealing in or holding assets in the Bahamas. Business is carried out in Bahamian dollars. All transactions requiring foreign currency need prior approval of the Central Bank of the Bahamas to convert Bahamian dollars into another currency.

A nonresident company is one whose shareholders are not designated residents of the Bahamas and whose principal business activity takes place outside the Bahamas. Bank accounts in all currencies other than the Bahamian dollar can be operated free of any exchange controls. Shares of nonresident companies incorporated under the Companies Act cannot be transferred without the prior permission of the Central Bank of the Bahamas. Exchange-control regulations generally do not apply to companies incorporated under the International Business Companies Act.

Nonresident companies are subject to an annual fee of BSD300.

**F. Tax treaties**

The Bahamas does not have any existing tax treaties. The Bahamas has entered into tax information exchange agreements with various countries.

**G. New value-added tax**

VAT is expected to be introduced, effective from 1 January 2015. At the time of writing, the VAT Act had been finalized. However, the VAT regulations were still in draft form. In general, VAT will be charged on any taxable supply of goods and services, as well as importations. The default position is for VAT to be applied at the standard rate of 7.5%, unless an exception applies such as zero rating or VAT exemption. Although standard and zero-rated supplies allow input VAT recovery on purchases made, VAT exemption results in input VAT being a cost. The legislation provides limited exceptions.

In general, VAT registration will be mandatory if a person makes taxable supplies and/or importations through a business and if the value exceeds BSD100,000 in any period of 12 months or less. The legislation also provides for voluntary registration.

## A. At a glance

Corporate Income Tax Rate (%)	0*
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

\* Oil and gas companies are subject to a special income tax (see Section B).

## B. Taxes on corporate income and gains

Except for the income tax levied on oil and gas companies, no taxes are levied on corporate income or gains. Oil and gas companies are subject to tax on income derived from the sale of finished or semifinished products manufactured from natural hydrocarbons in Bahrain and from the sale of such raw materials if produced from the ground in Bahrain. The rate of tax is 46%.

## C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Customs duties; effective from 1 January 2003, the customs duties of the Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates) are unified; the guidelines for implementation of the unified tariff are being developed; Bahrain applies the unified tariff in accordance with the Harmonized System codes, issued by the World Customs	

Nature of tax	Rate
Organization (WCO); under the unified customs tariff, for all products, except for tobacco and tobacco-related products, customs duties are calculated by applying percentage rates; for tobacco and tobacco-related products, the customs duty equals the higher of an amount calculated by applying a rate of at least 100% to the value of the product or an amount based on the quantity or weight; in general, products are divided into four groups Rates for the four groups	Free duty/ 5%/100%/125%
Social insurance contributions; payable on compensation of up to BHD4,000 per month for each employee	
Pension fund contributions; applicable to base salaries of Bahraini nationals	
Employer	9%
Employee	6%
Insurance against employment injuries; payable by employers; applicable to base salaries of Bahraini nationals and expatriates	
Unemployment insurance; payable by employees; applicable to Bahraini nationals and expatriates	1%
Training levy; payable by employers; applicable to base salaries of expatriate employees	4%
Municipal tax; payable by companies and individuals renting property in Bahrain; the tax rate varies according to the nature of the property and the payer of the utilities (that is, landlord or tenant)	7% to 10%
Foreign workers levy; payable monthly by all private and public companies with respect to each employed expatriate	BHD5 for the first five expatriate employees and BHD10 for each additional expatriate employee

## D. Foreign-exchange controls

Bahrain does not impose foreign-exchange controls.

## E. Tax treaties

Bahrain has entered into tax treaties with Algeria, Austria, Barbados, Belarus, Bermuda, Brunei Darussalam, Bulgaria, China, the Czech Republic, Egypt, Estonia, France, Georgia, Iran, Ireland, Isle of Man, Jordan, Korea (South), Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Philippines, Seychelles, Singapore, Sri Lanka, Syria, Thailand, Turkey, Turkmenistan, the United Kingdom, Uzbekistan and Yemen.

Bahrain has signed tax treaties with Belgium, Hungary and Sudan, but these treaties are not yet in force.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies and societies with restricted liability that are resident in Barbados are subject to corporation tax. Resident and domiciled companies are subject to corporation tax on their worldwide income, regardless of whether the income is remitted to Barbados. Resident companies that are not domiciled in Barbados are subject to corporation tax on income derived from Barbados and income from foreign sources to the extent that such foreign income is remitted to Barbados. Nonresident companies carrying on business through a branch pay tax on Barbados-source income only. Income is considered to be Barbados-source if the property that constitutes the source is physically located in Barbados.

A company is considered to be resident in Barbados if its management and control are located in Barbados. The domicile of a company is based on the country of incorporation. Consequently, a company incorporated in Barbados is domiciled there.

**Rates of corporate tax.** All domestic companies, including branches of nonresident companies, are subject to tax at a basic rate of 25%. A 15% rate applies to manufacturing companies and to net income derived from the rental of residential property. Income derived from Barbados government securities by domestic companies is taxed at a rate of 12.5%.

A branch operating in Barbados pays an additional 10% on its after-tax profits if those profits are remitted or deemed to be remitted.

The following are the tax rates for companies established in the International Business and Financial Services Sector.

<b>Types of companies</b>	<b>Rate (%)</b>
International Business Companies	2.5 reducing to 0.25 (a)
International Banks	2.5 reducing to 0.25 (a)
International Societies with Restricted Liability	2.5 reducing to 0.25 (a)
Exempt Insurance Companies	0
Exempt Insurance Management Companies	0
Qualifying Insurance Companies	
General insurance	1.75 (b)
Life insurance	0.35 (b)

(a) These rates are effective for the 2013 income year and subsequent income years.

(b) This is the minimum effective tax rate.

No tax is required to be withheld from the payment of dividends, interest, royalties, management fees and rents if paid to nonresidents by companies operating in the International Business and Financial Services Sector.

**Foreign-currency earnings credit.** Companies subject to the Income Tax Act may claim a tax credit with respect to foreign-currency earnings derived from qualifying overseas construction projects or qualifying overseas professional services, including qualifying insurance activities. The tax credit may reduce the effective tax rate to 0.35% or 1.75%, depending on the company's activities.

**Tax incentives.** Tax incentives available in Barbados are described below.

*Small Business Development Act.* Under the Small Business Development Act, small businesses qualify for the following tax benefits:

- Corporation tax rate of 15%
- Exemption from withholding tax on dividends or interest paid
- Exemption from import duty on plant and equipment
- Exemption from stamp duty on the execution and registration of financial documents

Only income directly related to the business qualifies for the above tax benefits.

To qualify as a small business, a company must meet the following requirements:

- Its authorized capital does not exceed BBD1 million.
- Its annual sales do not exceed BBD2 million.
- It does not have more than 25 employees.
- It is not a wholly owned or majority-owned subsidiary in a group of companies.

*Tourism Development Act.* Under the Tourism Development Act, duty-free and income tax concessions are available for approved tourism projects and certain tourism entities. These concessions include the following:

- Exemption from the payment of customs duty on specified items
- Tax deduction equal to 150% of expenditure incurred with respect to the development of a tourism product, tourism research, an apprenticeship scheme or the organization and hosting of tourism exhibitions and trade fairs
- Offset of approved capital expenditure against assessable income
- An investment tax credit (subject to conditions)
- Exemption from withholding tax on dividends paid to shareholders

*Fiscal Incentives Act.* A business that manufactures approved products may be deemed to be an approved enterprise under the Fiscal Incentives Act. An approved enterprise may be eligible for several tax incentives, including the following:

- An income tax holiday for up to 11, 13 or 15 years
- Relief from withholding tax on dividends paid during the tax holiday
- Exemption from the payment of customs duty on imported items (including plant and machinery) for the manufacturing of an approved product

*Special Development Areas Act.* Under the Special Development Areas Act, persons carrying out work in designated special development areas in Barbados, as well as persons financing such work, are entitled to certain tax relief. An approved developer is entitled to a reduced corporation tax rate of 15% and exemption from certain taxes, such as the following:

- Import duty, environmental levy and value-added tax on inputs for the construction of new buildings and the renovation or refurbishment of existing buildings
- Charges on the repatriation of interest and capital

- Land tax on the improved value of land
- Property transfer tax on the initial purchase of property

*Renewable Energy Incentives.* Persons engaged in the development, manufacturing, installation or repair of renewable energy systems and energy-efficient products may be entitled to one or more of the following tax benefits if the required criteria are met:

- Ten-year income tax holiday
- Tax deduction of 150% for the following expenditure with respect to the generation, supply and sale of renewable energy, or the installation or supply of renewable energy systems or energy-efficient products:
  - Interest paid on loans with respect to the construction or upgrading of a property
  - Expenditure on the training of staff
  - Expenditure on the marketing of products
  - Expenditure on research and development
- Ten-year exemption from withholding tax on dividends paid to shareholders

In addition, interest earned by financial intermediaries from financing the development, manufacturing and installation of renewable energy systems and energy-efficient products is exempt from tax for 10 years.

**Capital gains.** Capital gains are not taxed in Barbados.

**Administration.** The fiscal (income) year is the period for which the accounts of the business are normally prepared. Tax is calculated on the profits for the accounting period that ends during the fiscal year.

A corporation is required to determine its own tax liability and to prepare and file a corporation tax return. Corporations with year-ends from 1 January to 30 September must prepay tax by 15 September and file their returns by 15 March of the following year. If the year-end is after 30 September, the tax must be prepaid on 15 December of the income year and on the following 15 March. The return is filed 15 June of the year following the income year. Each tax prepayment must be 50% of the previous year's tax. Any balance of tax due is paid when the return is filed. Tax returns may be filed using the Barbados Revenue Authority's electronic filing system.

The Revenue Commissioner of the Barbados Revenue Authority may levy a penalty of BBD500 plus 10% of tax payable and interest of 1% a month for failure to file a return and pay tax due, and a penalty of 10% and interest of 0.5% a month for failure to prepay corporation tax.

**Dividends.** Dividends received by a resident company from another resident company are not taxable.

Dividends received from a nonresident company are not subject to tax in Barbados if the Barbados company owns 10% or more of the share capital of the nonresident company and if the shareholding in the nonresident company is not held as a portfolio investment.

**Foreign tax relief.** A tax credit is allowed for taxes paid to foreign jurisdictions by Barbados resident companies on profits, income or gains earned from such foreign jurisdictions, regardless of whether Barbados has entered into a double tax treaty with the foreign jurisdiction. This credit is allowed up to the amount of the Barbados taxes payable on the income. An underlying tax credit is also allowed with respect to foreign dividends if the Barbados company owns at least 10% of the capital of the foreign company. Some form of unilateral relief may be granted on income arising from British Commonwealth countries that provide reciprocal relief.

### C. Determination of trading income

**General.** Taxable income is determined on the basis of accounts prepared in accordance with International Financial Reporting Standards, subject to specific adjustments identified in the Income Tax Act.

**Inventories.** The authorities generally accept a method of valuation of inventory that conforms to standard accounting practice in the trade or business, provided it is applied consistently. Average cost or first-in, first-out (FIFO) are the generally accepted methods.

**Provisions.** Reserves or provisions of a general nature for doubtful accounts receivable, inventory shrinkage, inventory obsolescence and other items are not allowable. However, write-offs of specific amounts or balances are generally allowed.

**Tax depreciation.** Depreciation and amortization reported in the financial statements are not allowed as deductions in calculating taxable income. However, a company may claim capital allowances. Annual allowances of between 5% and 33 $\frac{1}{3}$ % are given on the original cost of fixed assets, calculated on a straight-line basis. An annual allowance of 100% is granted with respect to capital expenditure on software. An initial allowance of 20% is given on the cost of equipment. Industrial buildings qualify for an initial allowance of 40% and an annual allowance of 4% of the cost. An allowance of 1% is given on the improved value of commercial buildings. Fifty percent of expenditure on intellectual property is deductible over a 10-year period. In addition, 20% of expenditure on energy audits and the retrofitting of buildings or on the installation of systems to provide electricity from sources other than fossil fuels is deductible over a period of 5 years.

An investment allowance of 20% is granted on the cost of capital expenditure on new plant and machinery to be used in a basic industry. A 40% investment allowance is granted for new plant and machinery to be used in manufacturing and refining sugar and in manufacturing products from clay and limestone. In addition, manufacturing companies are allowed an annual allowance of 150% for assets used in the industry.

Persons who export products outside the Caribbean Community and Common Market (CARICOM) also qualify for an investment allowance of 40% of the cost of new plant and machinery purchased during the tax year.

The investment allowance is not deductible from the cost of the asset for the purpose of determining the annual allowance.

**Relief for losses.** Losses may be carried forward nine years to offset income derived in those years. Losses may not be carried back.

**Groups of companies.** A member of a group of companies (the surrendering company) may surrender current trading losses to another member of the group (the claimant company). The claimant company may then claim a deduction for the losses in calculating its taxable income.

To qualify for group relief, the surrendering company and the claimant company must be resident in Barbados and must be members of the same group throughout the fiscal year for which group relief is claimed. Two companies are members of the same group if one is a 75% subsidiary of the other or both are 75% subsidiaries of a third company. In determining whether a company is a 75% subsidiary of another company, share capital is excluded if profits from sales of such shares would be trading receipts of the direct owner of the shares. Share capital is also excluded if it is owned directly or indirectly in a company not resident in Barbados. In addition, the parent company must be beneficially entitled to at least 75% of the profits available for distribution to shareholders of the subsidiary and to at least 75% of the subsidiary's assets available for distribution to shareholders of the subsidiary on a winding up.

Trading losses may not be surrendered to the extent they include the following:

- The surrendering company's capital allowances
- Expenses payable to a group member that are claimed as deductions but are not included in the income of that group member for the same fiscal year

Group relief is available only if the claimant company has used its capital allowances and offset its loss carryforwards against its current profits. A claim for group relief must be made within two years of the end of the surrendering company's fiscal year, and must be consented to by that company. Group relief is not available to international business companies, exempt insurance companies, societies with restricted liability, offshore banks and other companies granted special tax concessions, excluding companies operating under the Hotel Aids Act. Groups of companies that owe taxes or national insurance contributions are also ineligible for group relief.

Group consolidated returns may not be filed with the tax authorities.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax (VAT), on the supply of goods and services in Barbados and on goods imported into Barbados	
Standard rate	17.5
Hotel accommodation and supplies related to tourism	7.5
Basic food items	0
Excise tax, on imports of vehicles; this tax is imposed in addition to the VAT	46.95 to 120

Nature of tax	Rate (%)
Import duty	5 to 20
National insurance contributions, on monthly insurable earnings up to BBD4,360; paid by	
Employer	11.25
Employee	10.1
Self-employed individual	16.1

### E. Miscellaneous matters

**Foreign-exchange controls.** Foreign-exchange controls in Barbados are administered by the Central Bank, which considers all applications. Certain transactions and routine commercial matters are delegated to the commercial banks. The Central Bank generally allows the repatriation of funds previously registered as an investment if it has been established that all local tax liabilities have been met. Certain types of entities operating in the International Business and Financial Services Sector, such as offshore banks, exempt (captive) insurance companies, international business companies and international societies with restricted liability, are effectively exempt from foreign-exchange regulations with respect to their offshore activities.

**Debt-to-equity rules.** No thin-capitalization rules are imposed in Barbados.

**Anti-avoidance legislation.** Anti-avoidance provisions may be applied to transactions between related persons that are not carried out at arm's length and to artificial transactions if the primary purpose of the transaction is the reduction of taxable income.

### F. Treaty withholding tax rates

The withholding tax rates in the table below apply to payments made to nonresidents of Barbados under the various treaties entered into by Barbados. However, no tax is withheld from dividends, interest, royalties and management fees paid to nonresidents by International Business Companies or International Societies with Restricted Liability. In addition, International Banks and Exempt (Captive) Insurance Companies are exempt from the payment of withholding tax on dividends and interest.

	Dividends %	Interest %	Royalties %

- (a) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payor of the dividends.
- (b) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payor of the dividends.
- (c) The Caribbean Community and Common Market (CARICOM) multilateral treaty has been entered into by 10 member states of CARICOM. The treaty follows a source-based model of taxation, with double tax relief typically provided in the form of an income exemption in the state of residence.
- (d) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- (e) This treaty has been ratified by Barbados only. Consequently, the provisions of the treaty are not yet in effect.
- (f) The rate is reduced to 5% if the interest is derived by a bank that is resident in Ghana.
- (g) The rate is reduced to 0% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months before the decision to distribute the dividends.
- (h) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 5% of the capital of the payor of the dividends.
- (i) The term "royalties" includes payments derived from the alienation of rights or property that are contingent on the productivity, use or disposition of such property.
- (j) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payor of the dividends and if the recipient of the dividends is a company resident in the Netherlands that is not subject to Netherlands company tax on the dividends.
- (k) The rate is reduced to 0% for royalties paid for the use of, or the right to use, literary, artistic or scientific works, including royalties with respect to cinematographic films, and films, discs or tapes for radio or television broadcasting.
- (l) The rate equals 75% of the statutory nominal rate applicable at the time of the dividend distribution. It is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payor of the dividends.
- (m) The rate is reduced to 5% if the interest is derived by a bank that is resident in Panama.
- (n) The treaty does not contain an interest article. Consequently, the normal tax rate applies.
- (o) The rate is 15% for royalties paid for motion picture or television films.
- (p) The rate is reduced to 5% for interest paid to banks.
- (q) The rate is reduced to 0% if the dividends are paid out of income earned from foreign sources.
- (r) This treaty has been signed by both parties, but it has not yet been ratified. Consequently, the provisions of the treaty are not yet in effect.
- (s) The rate is reduced to 5% if the beneficial owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends.

- 
- (t) The rate is reduced to 0% if the beneficial owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends.
  - (u) The rate is reduced to 5% for royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for radio or television broadcasting.
  - (v) This treaty is effective from 1 January 2015.
  - (w) The rate is reduced to 0% if the interest is paid to the government of the other contracting state or any agency or instrumentality thereof, including the central bank of that contracting state (subject to certain restrictions).
  - (x) The treaty language is unclear and may be read either as providing an exemption from Barbados withholding tax, or as providing no restriction of Barbados withholding tax. The government has not yet issued guidance as to the correct interpretation.

## A. At a glance

Corporate Profits Tax Rate (%)	18 (a)
Capital Gains Tax Rate (%)	9/18 (b)
Withholding Tax Rate (%) (c)	
Dividends	12
Interest	0/10 (d)
Royalties	15
Freight and Transportation	6
Capital Gains	12
Other Income	15 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	10

- (a) This is the standard profits tax rate. Certain activities are subject to special tax rates and tax incentives are available. For details, see Section B.
- (b) A 9% rate applies to profits from the sale of shares (equity interests in charter capital).
- (c) Withholding tax applies to income derived from sources in Belarus by foreign legal entities that do not carry out business activities in Belarus through a permanent establishment. Withholding tax rates may be reduced or eliminated under applicable double tax treaties. For a table of treaty withholding tax rates, see Section F.
- (d) This withholding tax applies to income derived from debt obligations, such as borrowings or loans, that are not formalized by securities. Exemption is available for certain public debts and corporate bonds.
- (e) The Tax Code specifies the types of income subject to withholding tax.

## B. Taxes on corporate income and gains

**Corporate profits tax.** Companies incorporated in Belarus are subject to corporate profits tax on their worldwide income. Non-residents that carry out business activities in Belarus through a permanent establishment are subject to the corporate profits tax only on the income derived from their activities carried out in Belarus through such permanent establishment.

Income derived from sources in Belarus by nonresidents that do not carry out business activities in Belarus through a permanent establishment is subject to withholding tax. For withholding tax rates, see Sections A and F.

**Rates of corporate profits tax.** The standard corporate profits tax rate is 18%.

Reduced tax rates apply to the following types of income:

- Profits of producers of laser-based optical devices (on the condition that these devices account for 50% or more of the total value of production): 10%
- Profits of producers of high-technology products: 10%
- Dividends paid to Belarusian companies: 12%
- Income derived from the sale of shares in the charter capital (equity interests) of companies established in Belarus: 9%

**Tax exemptions and reductions.** Belarus offers various tax exemptions and reductions. Some of these exemptions and reductions are summarized below.

Certain types of income are not subject to tax, including dividends accruing to the following:

- Belarusian societies of disabled people, Belarusian societies of deaf people, Belarusian societies of sight-disabled people (for dividends received from unitary enterprises [commercial organizations that do not have shares or participatory interests] owned by these Belarusian societies)
- Venture organizations and Belarusian innovation funds (for dividends received from innovation organizations)

If certain conditions are met, profits subject to tax can be decreased by amounts used to finance state social objects (including educational, health care, sports and religious organizations) or used for construction or reconstruction of sports facilities, up to 10% of taxable profits.

Profits derived from certain business activities are exempted from the tax, including the following:

- Manufacturing of food products for infants
- Services of hotels located in tourist locations approved by the President of Belarus for the first three years of operation
- Plant growing (except for flowers and ornamental plants), livestock farming, fish breeding and bee farming
- Transactions with government securities, securities of the national Bank of the Republic of Belarus and some other securities
- Roadside services of objects located close to republican roads within five years from the date of setup
- Investment of insurance reserves on voluntary life insurance agreements if the profit is used to increase funds accumulated in the personal accounts of the policyholders

All the benefits described above can be claimed only if special conditions and procedures are met and, in certain circumstances, if special state permits are received.

**Free-economic zones.** A free-economic zone (FEZ) is located in each of the six regional centers of Belarus (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). An FEZ resident is exempt from profits tax for five years beginning on the date on which profits are declared for the first time. After the end of the five-year period, the FEZ resident pays corporate profits tax at 50% of the standard rate, but the tax rate may not exceed 12%.

In addition, an FEZ resident may apply a reduced value-added tax (VAT) rate of 10%.

The benefits mentioned above are provided to an FEZ resident with respect to the following profits:

- Profits received from goods (works and services) manufactured by an FEZ resident and sold to other FEZ residents, foreign legal entities or foreign individuals
- Profits from goods manufactured by a resident of an FEZ and realized in Belarus if the goods are defined as substitutes for imported goods on the list specified by the government and approved by the President of Belarus

**Special tax regimes.** Belarus has several tax regimes, which are summarized below.

*Simplified system of taxation.* Business entities may pay a unified tax under a simplified system of taxation. Business entities that pay the unified tax are not subject to corporate profits tax, and under certain conditions, to VAT (and some other taxes). Under this system, the tax due is either 5% of gross revenues or, if the business entity continues to pay VAT, 3% of gross revenues.

*Unified tax on agricultural producers.* Agricultural producers may pay a unified tax at a rate of 1% of gross revenues from the sale of goods (works and services) and other property and income derived from non-sales transactions. An agricultural entity can pay the unified tax if its annual gross revenue consists of at least 50% of revenue from the sale of its own manufactured crop products (excluding flowers and ornamental plants), livestock products, fish breeding and bee breeding products.

*Tax on gambling industry.* Gambling (except for lotteries) is subject to fixed tax rates, depending on the number of items of operational equipment used (for example, gambling tables, slot machines and gambling equipment used to register betting). The positive difference between the amount of received bids and the composed winning fund (fund to be paid to the winner) is subject to additional gambling tax at a rate of 4%.

*Tax on income generated by lottery sales.* Lottery sales are subject to an 8% tax rate on the gross revenue less the awarded prize fund.

*Tax on electronic interactive games.* The tax base for the tax on electronic interactive games equals the difference between the amount of revenue from electronic interactive games and the composed winning fund (fund to be paid to the winner). The tax rate is 8%. Revenue from electronic interactive games is exempt from corporate profits tax. Turnover received from stakes (bets) with respect to the holding of electronic interactive games is exempt from VAT.

*Tax on imputed income.* Providers of car maintenance and repair services are subject to 5% tax on imputed income. The tax base for the tax on imputed income is calculated by multiplying the average monthly number of employees by the monthly basic profitability of car maintenance and repair services per employee.

*Taxation of commercial organizations and individual entrepreneurs engaged in medium-sized or small towns and rural areas.*

Commercial organizations and individual entrepreneurs engaged in business in medium-sized or small towns and rural areas may qualify for exemption from the following taxes, duties and other obligations:

- Corporate profits tax and personal income tax, respectively, during the seven-year period after the registration of the business
- Real estate tax on assets located in medium-sized or small towns and rural areas during the seven-year period after the registration of the business
- State duties for obtaining special permissions (licenses), the introduction of changes into special permissions, the extension of such special permissions and the obligatory sale of foreign currency received under transactions with Belarusian nonresidents

They may apply for the above tax incentives if special conditions are met and special procedures are followed. They may also receive other benefits.

*Taxation of residents of the High Technologies Park.* The High Technologies Park was established in 2005 for a period of 15 years. Park residents are exempt from taxes, contributions and other obligatory payments to the state budget and state non-budget funds with respect to revenue derived from the sale of goods (works, services and property rights for intellectual property). Business entities operating in the park may engage only in the high technology activities set forth in the Decree of the President of Belarus “Concerning the Park of High Technologies.”

*Taxation of the members of the Infopark Science and Technology Association.* The members of the Infopark Science and Technology Association are exempt from taxes and other obligatory payments to state non-budget funds with respect to revenue derived from the sale of information technologies and services for the development of such technologies, except for profits tax paid at a rate of 5% and Social Fund contributions.

*China-Belarus Industrial Park (The Great Stone).* The China-Belarus Industrial Park (The Great Stone; CBIP) was created in 2012 as a territory with a special regime for entrepreneurial activity. Residents of the CBIP may benefit from tax incentives, such as the following:

- Exemption for 10 years from the date of state registration from corporate profits tax from the realization of their own manufactured goods (works and services) produced in the CBIP territory
- Real estate tax on buildings and constructions located in the CBIP
- Land tax on land located in the CBIP territory

Personal income tax at a rate of 9% applies to the income of a CBIP resident’s employees, and social security contributions are calculated on the basis of an amount that is not more than the average salary in Belarus for the preceding month. Other benefits are also available.

**Capital gains.** Capital gains derived from the alienation of equity interests in the charter capital of Belarusian companies are taxed at a corporate profits tax rate of 9%. The same tax rate applies to gains from operations involving securities, except for bonds which are exempt from corporate profits tax in certain cases.

Capital gains derived by nonresidents without a permanent establishment in Belarus are subject to a 12% withholding tax, unless otherwise provided by a double tax treaty.

**Administration.** The basic tax reporting period is the calendar quarter. The tax return must be filed by the 20th of the month following the reporting quarter. In general, the corporate profits tax must be paid by the 22nd of the month following the reporting quarter.

Corporate profits tax for the fourth quarter of 2014 must be paid by 22 December 2014 in an amount equal to two-thirds of the tax payable in the third quarter of 2014 with subsequent additional payment or reduction not later than 22 January 2015.

Non-payment or incomplete payment of tax is subject to a fine of 20% of the unpaid tax but not less than 10 basic units (approximately EUR110 or USD140). A fine for late submission of the tax return can be up to 10% of the unpaid tax but not less than 10 basic units. In addition to these fines, a penalty is applied for every day of delay in tax payment. The penalty is assessed on the basis of the refinance rate established by the National Bank of the Republic of Belarus (currently, 20%).

**Dividends.** Dividends paid to foreign legal entities without a permanent establishment in Belarus are subject to a 12% withholding tax, unless otherwise provided by a double tax treaty. The distribution of dividends to resident companies is also subject to withholding tax.

**Foreign tax relief.** A tax credit for foreign tax paid by, or withheld from, a Belarusian taxpayer is granted on submission to the local tax authorities of a certificate issued by the competent authorities of the foreign country that confirms the amount of tax paid (withheld) in that foreign state.

### **C. Determination of taxable profits**

**General.** Taxable profits are based on the financial statements prepared according to the accounting standards of Belarus. The taxable profits are determined by adjusting the profits reported in the financial statements by items stipulated by the Tax Code. Adjustments relate to special income and expense items and usually act to restrict tax-deductible expenses. For example, travel expenses are deductible within certain limits. The list of deductible expenses is open. Special rules determine the taxable profits of banks and insurance companies.

**Inventories.** Inventories are carried at actual cost. The allowed accounting methods for determining cost value are cost of each unit, average cost and valuation price, including first-in, first-out (FIFO).

**Provisions.** Banks can establish deductible provisions for unrecoverable loans and securities. The National Bank of the Republic of Belarus regulates the establishment of such provisions.

**Tax depreciation.** The amount of depreciation reported in the financial statements may be deducted for tax purposes if the fixed assets are used in an entrepreneurial activity.

**Investment deduction.** On the acquisition and/or reconstruction of tangible assets, a taxpayer can immediately deduct a percentage of the initial value of the assets (value of investments for reconstruction) for corporate profits tax purposes. The following are the percentages:

- Buildings and structures: not more than 10%
- Machinery and equipment, and certain transport vehicles: not more than 20%

The investment deduction does not reduce the base for calculation of the depreciation deduction for tax purposes, which is defined as the initial cost of the asset.

**Relief for losses.** Belarusian tax law contains loss carryforward rules under which losses can be carried forward to the following 10 years, beginning with those incurred in 2011. Losses are carried forward in groups of operations against identical types of income. The following are the groups:

- First group: operations with financial derivatives and securities
- Second group: alienation of fixed assets, construction-in-progress sites and uninstalled equipment

The remaining losses are carried forward regardless of the operations and activities in which they were incurred. To apply the loss carryforward rules, a company must maintain separate accounting and keep documents confirming the amount of losses.

The Belarusian tax law does not provide for loss carrybacks.

**Groups of companies.** The Belarusian tax law does not provide for tax groups. Each legal entity is a separate taxpayer.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	20
Sales of specified products (for example, goods for children and foods)	10
Exports of goods and services	0
Excise duties; imposed at fixed amounts per unit of goods (specific rates) or as a percentage of the value of goods (ad valorem rates); levied on various products (alcohol, tobacco products, certain types of fuel, cars and other items)	Various
Payroll taxes	
Social fund contributions; paid by the employer	34
Pension tax; withheld from employee	1
Land tax; annual tax imposed at fixed amount per hectare of land area	Various
Ecological tax; imposed at fixed amount per units of various contaminants	Various
Asset tax; annual tax imposed on real estate, including construction-in-progress	1 to 2
Local taxes and dues	Various

Nature of tax	Rate (%)
Offshore levy; imposed on payments or transfers of cash by residents to nonresidents registered in tax havens; paid by residents	15

## E. Miscellaneous matters

**Foreign-exchange controls.** The Belarusian ruble (BYR) has limited convertibility. The Council of Ministers of the Republic of Belarus, the National Bank of the Republic of Belarus, The State Control Committee and State Customs are the currency regulation and control bodies in Belarus.

Belarus imposes detailed and severe currency control regulations. These regulations impose restrictions, controls and special reporting with respect to transactions involving the use of foreign and national currency, as well as to settlements with nonresidents.

Companies doing business in Belarus must open a bank account with a bank in Belarus.

**Debt-to-equity ratios.** The amount of interest that Belarusian legal entities can deduct for tax purposes is limited if the interest pertains to a controlled debt obligation and if the debt-to-equity ratio of the entity exceeds 3:1. The following types of indebtedness are considered to be controlled debt obligations:

- Indebtedness to a foreign company that directly or indirectly owns more than a 20% share in the charter fund of a Belarusian company
- Indebtedness to a Belarusian company that is an affiliate entity of a foreign company described in the first bullet above

Thin-capitalization rules do not apply to banks or insurance companies, or to lessors or landlords if the received rental payments (lease payments) exceed 50% of the total revenue from the sale of goods (works and services) and property rights as well as income from rent-out and lease-out operations).

**Transfer pricing.** Tax authorities may control prices during an on-site tax audit only in the following cases:

- Sales of immovable property: if the prices are more than 20% lower than the market prices on the date of the sale of the immovable property
- Foreign sales (including related-party transactions): if transactions with one entity at the date of sale of goods exceeds BYR60 billion in one calendar year and if the price of a transaction deviates by more than 20% from the market price on the sale date

The comparability of prices to market prices is reviewed only for the purpose of calculating corporate profits tax, and the prices are adjusted only if this will increase the tax. The following methods are used to determine for tax purposes the conformity of transaction prices to market prices:

- Comparable uncontrolled prices method
- Resale-minus method
- Cost-plus method

## F. Tax treaties

Belarus has entered into double tax treaties with Armenia, Austria, Azerbaijan, Bahrain, Belgium, Bulgaria, China, Croatia, Cyprus, the Czech Republic, Egypt, Estonia, Finland, Germany, Hungary, India, Iran, Ireland, Israel, Italy, Kazakhstan, Korea (North), Korea (South), Kyrgyzstan, Kuwait, Laos, Latvia, Lebanon, Lithuania, Macedonia, Moldova, Mongolia, the Netherlands, Oman, Pakistan, Poland, Qatar, Romania, the Russian Federation, Saudi Arabia, Singapore, the Slovak Republic, Slovenia, South Africa, Sri Lanka, Sweden, Switzerland, Syria, Tajikistan, Thailand, Turkey, Turkmenistan, Ukraine, United Arab Emirates, Uzbekistan, Venezuela, Vietnam and Yugoslavia (applied to Serbia).

The double tax treaties with Laos and Sri Lanka apply to withholding taxes on income derived on or after 1 January 2015.

Belarus has also signed double tax treaties with Bangladesh, Indonesia and Libya, but these treaties have not yet entered into force.

Belarus honors several of the double tax treaties entered into by the former USSR, including treaties with Denmark, France, Japan, Malaysia, Spain, the United Kingdom and the United States. The Ministry of Taxes and Collections has indicated that the treaties with Canada and Norway are no longer effective.

The following table presents the withholding tax rates under Belarusian tax treaties and under the former USSR's treaties honored by Belarus.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Armenia	10/12 (a)	0/10 (v)	10/15 (tt)

Non-treaty countries	12	10	15

(a) The 10% rate applies if the recipient owns more than 30% of the capital of the payer company. The 12% rate applies in all other cases.

(b) The 5% rate applies if the recipient owns more than 30% of the capital of the payer company. The 10% rate applies in all other cases if the recipient is the actual owner of dividends. The 12% rate applies in all other cases.

(c) The 3% rate applies to amounts paid for the use of, or the right to use, patents and secret formulas or processes or for information concerning industrial, commercial or scientific experience. The 5% rate applies to amounts paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies if the recipient is the actual owner of royalties. The 15% rate applies in all other cases.

- (d) The 5% rate applies if the recipient has invested at least ECU200,000 in the share capital of the payer. The 10% rate applies if the recipient owns more than 25% of the capital of the payer company. The 12% rate applies in all other cases.
- (e) The 5% rate applies if the recipient owns at least 25% of the capital of the payer company. The 12% rate applies in all other cases (however, for the Netherlands, also see footnote [w]).
- (f) The 3% rate applies to amounts paid for the use of, or the right to use, patents, brand names, designs, models, plans and secret formulas or processes, or for information related to industrial, commercial or scientific expertise. The 5% rate applies to payments for the use of, or the right to use, industrial, commercial or scientific equipment (including vehicles). The 10% rate applies to amounts paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including motion pictures and films or tapes used for television and radio broadcasting. The 15% rate applies in all other cases.
- (g) The 10% rate applies if the recipient owns more than 25% of the capital of the payer company. The 12% rate applies in all other cases.
- (h) The 8% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (i) The 5% rate applies to amounts paid for copyrights of works of literature, art or science, including motion pictures, films, tapes and other means of transmitting images or sounds. The 10% rate applies to amounts paid for the following:
- Patents, trademarks, designs, drafts, models, schemes and secret formulas or processes
  - Information concerning industrial, commercial or scientific experience
  - The use of, or the right to use, industrial, commercial or scientific equipment, or means of transportation
- The 15% rate applies in all other cases.
- (j) The 5% rate applies if the actual owner of the dividends is a company that owns USD100,000 or more in the company paying the dividends. The 10% rate applies in all other cases.
- (k) The 5% rate applies to amounts paid for the following:
- The use of, or the right to use, copyrights of scientific works, patents, brand names, designs, models, plans and secret formulas or processes
  - The right to use information related to industrial, commercial or scientific equipment or vehicles
  - Information related to industrial, commercial or scientific expertise
- The 10% rate applies to amounts paid for the use of, or the right to use, copyrights of literary or artistic works, including motion pictures or films and tapes used for television or radio broadcasting. The 15% rate applies in all other cases.
- (l) The 0% rate applies if the recipient of the interest income is the government or a government authority. The 5% rate applies if the recipient of the interest income is a bank or other financial institution. The 10% rate applies in all other cases.
- (m) The 5% rate applies to amounts paid for industrial, commercial or scientific equipment, or vehicles. The 10% rate applies in all other cases.
- (n) The 0% rate applies to amounts paid for the use of, or the right to use, copyrights of works of literature, art or science, including motion pictures, films or tapes for television or radio broadcasting. The 10% rate applies to amounts paid for the following:
- The use of, or the right to use, patents, trademarks, designs, drafts, models, schemes and secret formulas or processes
  - Information concerning industrial, commercial or scientific experience
  - The use of, or the right to use, industrial, commercial or scientific equipment
- The 15% rate applies in all other cases.
- (o) The 10% rate applies to amounts paid for the following:
- The use of, or the right to use, patents, brand names, designs, models, plans, secret formulas or processes, or copyrights of scientific works
  - The use of, or the right to use, industrial, commercial or scientific equipment
  - The use of, or the right to use, information related to industrial, commercial or scientific expertise
- The 15% rate applies to amounts paid for the use of, or the right to use, copyrights of motion pictures or magnetic tapes for television and radio broadcasting, or of literary and artistic works.
- (p) The 0% rate applies if the interest income is derived from sales on credit of industrial, commercial or scientific equipment or if the recipient of the interest income is the government or central bank. The 10% rate applies in all other cases.

- (q) Belarus honors the double tax treaty entered into by the former USSR and this country. The table lists the tax rates under the treaty.
- (r) The 0% rate applies to interest on bank and commercial loans. The 10% rate applies in all other cases.
- (s) The 0% rate applies to interest on loans guaranteed by the government. The 10% rate applies in all other cases.
- (t) The 0% rate applies if the recipient of the interest income is the government or central bank. The 5% rate applies if the recipient of the interest income is a bank or other financial institution. The 10% rate applies in all other cases.
- (u) The 0% rate applies in the following cases:
- The payer or payee of the interest income is the government, a political and administrative division, a local government body or the central bank.
  - The loan is approved by the government.
  - The loan is provided, guaranteed or insured by the government, the central bank or other body under state control.
  - The loan is provided or guaranteed by a financial institution to promote development, or the loan is granted with respect to the acquisition of industrial, business, commercial, medical or scientific equipment.
- (v) The 0% rate applies if the recipient of the interest income is the government or central bank (in the case of Turkey, the 0% rate also applies to interest accrued in Belarus and paid by Eximbank of Turkey on loans for the purchase of industrial, business, commercial, medical or scientific equipment). The higher rates apply in all other cases.
- (w) The 0% rate applies if either of the following conditions is satisfied:
- The recipient owns more than 50% of the capital of the payer company and its capital contribution is at least ECU250,000.
  - The recipient owns more than 25% of the capital of the payer company and its capital contribution is guaranteed or insured by the government.
- (x) The 0% rate applies if the recipient of the dividends is the government or central bank. The 5% rate applies in all other cases.
- (y) The 0% rate applies to amounts paid for the use of, or the right to use, copyrights of works of literature, music, art or science other than motion pictures or films and tapes for television or radio broadcasting. The 5% rate applies in all other cases.
- (z) The 0% rate applies if any of the following conditions is satisfied:
- The loan is approved by the government.
  - The interest income is derived from sales on credit of industrial, medical or scientific equipment or from service supply contracts.
  - The loan relates to industrial, medical or scientific equipment or service supply contracts, it is guaranteed by the government, and it is aimed at supporting exports.
- The 10% rate applies in all other cases.
- (aa) The 0% rate applies if any of the following conditions is satisfied:
- The loan is approved by the government.
  - The interest income is derived from sales on credit of industrial, medical or scientific equipment.
  - The interest income is derived from government securities.
- The 5% rate applies to interest on loans granted by banks. The 8% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (bb) The 0% rate applies if the loan is approved by the government. The 10% rate applies in all other cases.
- (cc) The 5% rate applies to amounts paid for copyrights of works of literature, art or science, except motion pictures, or for the right to use industrial, commercial or scientific equipment or means of transportation. The 10% rate applies if the recipient is the actual owner of the royalties. The 15% rate applies in all other cases.
- (dd) The 5% rate applies if the recipient owns more than 20% of the capital of the payer company and contributes at least EUR81,806.70 to the share capital of the payer. The 12% rate applies in all other cases.
- (ee) The 0% rate applies to the following interest payments:
- Interest arising in Belarus and paid to the government of Germany, Deutsche Bundesbank, Kreditanstalt für Wiederaufbau or Deutsche Finanzierungsgesellschaft für Beteiligungen in Entwicklungsländern
  - Interest paid with respect to a loan guaranteed by the Hermes-Deckung if the recipient of the interest income is the government or central bank of Belarus
- The 5% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (ff) The 3% rate applies to amounts paid for the following:
- The use of, or the right to use, copyrights of scientific works, patents, brand names, designs, models, plans and secret formulas or processes

- The right to use information related to industrial, commercial or scientific expertise
- The 5% rate applies to amounts paid for the use of, or the right to use, copyrights of literary and artistic works, including motion pictures and films or tapes used for television or radio broadcasting or for the use of, or right of use, all types of equipment and transportation. The 15% rate applies in all other cases.
- (gg) The 0% rate applies if any of the following conditions is satisfied:
- The loan is approved by the government.
  - The recipient of the interest income is the government or central bank.
  - The interest paid on the loan or credit is guaranteed or secured by the government (including the Osterreichische Kontrollbank Aktiengesellschaft).
- The 5% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (hh) The 0% rate applies if the recipient of the interest income is the government, the central bank, the Finnish Fund for Industrial Cooperation (FINNFUND) or Finnish Export Credit (FINNVERA). The 5% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (ii) The 0% rate applies if the recipient of the dividends is the government, central bank or the Governmental General Reserve Fund of Oman. The 5% rate applies in all other cases.
- (jj) The 5% rate applies if the recipient owns at least 25% of the capital of the payer company. The 10% rate applies in all other cases.
- (kk) The 0% rate applies if any of the following conditions is satisfied:
- The recipient of the interest income is the government or a government authority.
  - The interest is paid on loans guaranteed by the government.
  - The interest is paid on loans aimed at promoting exports or connected to the supply of all types of equipment and transport vehicles by an enterprise of the other contracting state.
  - The interest is paid with respect to sales of all types of equipment and transport vehicles.
- The 5% rate applies in all other cases.
- (ll) The 5% rate applies if the royalties are paid for the use of, or the right to use, the following:
- Scientific copyrights, software or trademarks
  - All types of equipment and transport vehicles
- The 10% rate applies in all other cases.
- (mm) The 0% rate applies if any of the following conditions is satisfied:
- The interest is paid by the government or a government authority.
  - The interest is paid to the government or a government authority, local agency or body (including a financial institution) that fully belongs to the state or governmental body.
  - The interest is paid to any other agency or body (including a financial institution) on loans provided with respect to the application of an agreement entered into between the contracting states.
- The 8% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (nn) The 0% rate applies if the loan is provided to the government or central bank. The 10% rate applies in all other cases.
- (oo) The 0% rate applies if the recipient of the dividends is one of the following:
- National Treasury Management Agency of Ireland
  - National Reserve Pension Fund of Ireland
  - Any other organization, including an agency or institution, that is fully or mainly owned by the government
- The 5% rate applies if the recipient owns at least 25% of the capital of the payer company. The 10% rate applies in all other cases.
- (pp) The 0% rate applies if the recipient or payer of the interest income is the government, a local authority or central bank. The 5% rate applies in all other cases.
- (qq) The 0% rate applies if the recipient of the interest income is the government, central bank or an institution with capital that is fully owned by the government or local authorities.
- (rr) The 0% rate applies in the following cases:
- The payer or payee of the interest income is the government, a political and administrative division, a local government body or the central bank.
  - The loan is approved by the government.
  - The loan is granted and guaranteed by the state financial body to promote exports if the loan is provided or guaranteed on preferential terms.
  - The loan is granted by a bank to promote exports.

- Interest is paid on a debt that arises with respect to the sale on credit of merchandise or industrial, business or scientific equipment.  
The 5% rate applies if the recipient is the actual owner of interest. The 10% rate applies in all other cases.
- (ss) The 0% rate applies if the recipient of the interest income is the government, central bank, other government agency or a financial institution. The 10% rate applies in all other cases.
- (tt) The 10% rate applies if the recipient is the actual owner of the royalties. The 15% rate applies in all other cases.
- (uu) The 5% rate applies if the recipient is the actual owner of royalties. The 15% rate applies in all other cases.
- (vv) The 0% rate applies if the recipient of the interest income is the government or a local government body, the central bank or other government company or financial institution. The higher rate applies in all other cases.
- (ww) The 10% rate applies if the recipient is the actual owner of the dividends. The 12% rate applies in all other cases.
- (xx) The 5% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (yy) The 6% rate applies if the recipient is the actual owner of the royalties. The 15% rate applies in all other cases.
- (zz) The 5% rate applies if the actual owner of the dividends is a company that directly owns at least 20% of the capital of the company paying the dividends. The 10% rate applies if the recipient is the actual owner of dividends. The 12% rate applies in all other cases.
- (aaa) The 0% rate applies if the actual owner of interest income is the following:
  - In Belarus: the government of Belarus, the National Bank of Belarus or a Belarusian local government body
  - In Laos: the government of Laos, the Bank of Laos or a Laotian local government body
 The 8% rate applies if the recipient is the actual owner of the interest income. The 10% rate applies in all other cases.
- (bbb) The 0% rate applies to dividends received by the following:
  - In Belarus: the government of Belarus, the National Bank, a legal body, an institution wholly or predominantly owned by the government of Belarus, or institutions on a list of institutions that may be approved from time to time by the government of Belarus or bodies authorized by the government of Belarus and a competent Singaporean body
  - In Singapore: the government of Singapore, the Monetary Authority of Singapore (central bank), the Government of Singapore Investment Corporation, a legal body, an institution wholly or predominantly owned by the government of Singapore, or institutions on a list of institutions that may be approved from time to time by a competent Singaporean body, the government of Belarus or bodies authorized by the government of Belarus
 The 5% rate applies to dividends received by the actual owner of the dividends. The 12% applies in all other cases.
- (ccc) The 0% rate applies to interest received by the following:
  - In Belarus: the government of Belarus, the National Bank, a legal body, a bank, an institution wholly or predominantly owned by the government of Belarus, institutions on a list of institutions that may be approved from time to time by the government of Belarus bodies authorized the government of Belarus, and by a competent Singaporean body
  - In Singapore: the government of Singapore, the Monetary Authority of Singapore (central bank), the government of Singapore Investment Corporation, a legal body, a bank, an institution wholly or predominantly owned by the government of Singapore or institutions on a list of institutions that may be approved from time to time by a competent Singaporean body, the government of Belarus or bodies authorized by the government of Belarus
 The 5% rate applies to interest received by the actual owner of the interest income. The rate of 10% applies in all other cases.
- (ddd) The 7.5% rate applies if the actual owner of dividends is a company that directly owns at least 25% of the capital of the company paying the dividends. The 10% rate applies if the recipient is the actual owner of dividends. The 12% rate applies in all other cases.
- (eee) The 0% rate applies if the actual owner of the interest income is the government or a local government body, the national (central) bank, financial organizations (institutions) that are wholly owned by the government, or organizations on a list of organizations (institutions) that may be approved from time to time by the governments of the treaty states or bodies authorized by such governments. The 10% rate applies in all other cases.

**A. At a glance**

Corporate Income Tax Rate (%)	33 (a)(b)
Capital Gains Tax Rate (%)	0.4/25/33 (b)(c)
Branch Tax Rate (%)	33 (b)
Fairness Tax Rate (%)	5 (a)(b)
Withholding Tax (%)	
Dividends	10/15/25 (d)(e)
Interest	15/25 (e)
Royalties from Patents, Know-how, etc.	25 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (g)

(a) See Section B.

(b) In addition, a 3% surtax (crisis contribution) is imposed.

(c) Certain capital gains are exempt from tax (see Section B).

(d) The general rate of withholding tax for dividends is 25%. Liquidation bonuses are taxed at a rate of 25%, effective since 1 October 2014. Effective from accounting years closing on 31 December 2014 or later, it is possible for small companies to allocate a part of their taxed profits to a separate account at a tax charge of 10%. No additional tax is levied on these funds at the time of the liquidation of the company. The distribution of the funds to the

shareholders before the liquidation of the company is subject to an additional tax of 5% (distribution after five years following the last day of the tax period in which the reserve is formed) or 15% (distribution within five years). Dividends from residential real estate companies are taxed at a rate of 15%. For further details, see Section B.

- (e) The standard withholding tax rate for interest is 25%.
- (f) The withholding tax rate on royalties relating to copyright income and income from legal licenses is 15% on the first EUR37,500 and 25% on any excess amount.
- (g) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide income. Nonresident companies are subject to tax on their Belgian-source income only. A company is resident in Belgium if its central management or registered address is located in Belgium.

**Rates of corporate income tax.** The normal corporate income tax rate is 33% for both resident companies and branches. If the income of a company or a branch is below EUR322,500, it is taxed at rates ranging from 24.25% to 34.5%. The reduced rates apply only if the company pays annual remuneration of at least EUR36,000 to at least one director. The reduced rates also do not apply to a company if any of the following circumstances exist:

- The company is a holding company.
- 50% or more of the company is owned by another company.
- The company makes a dividend distribution exceeding 13% of the paid-in capital.

In addition to the applicable rates, a 3% surtax (crisis contribution) is levied.

**Notional interest deduction.** Belgian companies and foreign companies with a Belgian permanent establishment or real estate in Belgium may benefit from a tax deduction equal to a percentage of the “risk capital.” This deduction is not reflected in the financial accounts. The “risk capital” equals the total equity, including retained earnings, as reported in the non-consolidated closing balance sheet of the financial year preceding the tax year (upward or downward adjustments of the risk capital are taken into account on a pro rata basis), excluding, among others, the following items:

- The net tax value of the company’s own shares and shares held in other companies that qualify for the participation exemption.
- The net book value of assets allocable to foreign permanent establishments and foreign immovable property and property rights, the income of which is exempt from tax in Belgium based on double tax treaties. In the *Argenta* case, the Court of Justice of the European Union (EU) held that the exclusion of the net book value of permanent establishments located in other member states of the European Economic Area (EEA) was incompatible with the EU freedom of establishment. On 31 December 2013, a law containing miscellaneous tax and financial provisions was published in the Belgian *Official Gazette*. This law includes, among other tax provisions, a measure providing that, effective from the 2014 tax year, foreign permanent establishments and foreign immovable property are included in the calculation basis for the notional interest deduction.
- Capital grants (subsidies)
- The tax credit for research and development (R&D)

The tax deduction is computed by multiplying the risk capital by the average interest rate applicable for a risk-free, long-term Belgian government bond (the 10-year obligations linéaires – lineaire obligaties, or OLO) for the third quarter of the penultimate year before the tax year. The average OLO rate in the third quarter of 2014 was 1.562%. For the 2015 tax year, the rate is 2.630% for large companies and 3.130% for small companies. For the 2016 tax year, the rates will be 1.630% for large companies and 2.130% for small companies. The notional interest deduction rate is capped at 3% (3.5% for small companies) if the above calculation method would result in a higher percentage. The deduction may not be carried forward in the event of a loss.

**Tax incentive for audiovisual investments.** A tax incentive is available to support the production of Belgian audiovisual works. To qualify for the incentive, several conditions must be satisfied. These conditions relate to the production company, the investors and the nature of the investments, as well as to the audiovisual work itself. The following conditions must be fulfilled:

- The Belgian audiovisual work must be produced by a Belgian resident production company.
- The investor must be either a resident Belgian company or a Belgian branch of a foreign company. However, the investor may not be a Belgian production company or a television broadcasting company.
- To qualify for the incentive, the investments must be loans granted to the production company or rights linked to the production and exploitation of the audiovisual work. Other expenditures may not be taken into consideration. Consequently, sponsorship and advertising expenses are excluded, but they remain tax-deductible under the ordinary tax rules.
- The total of the qualifying sums invested in the production of an audiovisual work may not exceed 50% of the total estimated amount of the expenses for the production of the audiovisual work. In addition, the total of the investments in loans may not exceed 40% of the total qualified investments (loans and rights).

The investors are entitled to a tax exemption of 150% of the invested funds. However, for each accounting period, the exemption is limited to 50% of the taxable reserved profit (profit retained by the company), with an absolute maximum of EUR750,000. If the investor does not have sufficient profit, the tax exemption may be carried forward indefinitely.

The tax exemption becomes final after the competent authorities have certified that the conditions were met. This certification must be established within a maximum period of approximately four years following the investment.

A recently enacted law limited the exemption and provided some anti-abuse measures. Existing programs are not affected because the new law applies only to framework contracts signed on or after 1 January 2015.

The new incentive requires a “tax-shelter certificate,” which provides the following:

- It guarantees that the invested amounts flow to the production company to a maximum extent.

- It confirms that the production company complies with all legal conditions.
- It guarantees the tax exemption on behalf of the investor.
- It determines the “tax value” of the project.

The new law introduces certain significant changes to the incentive, which include, but are not limited to, the following:

- The investing company receives a temporary tax exemption of 310% of the invested amounts (instead of 150% under the old regime), resulting in a tax-cost saving of approximately 105.4%. However, for each accounting period, the exemption is limited to 50% of the increase of the taxable reserved profit (profit retained by the company), with an absolute maximum of EUR750,000. If the investor does not have sufficient profit, the tax exemption may be carried forward indefinitely.
- The invested amounts no longer represent rights in or a loan to the production itself. Instead, they are a non-tax-deductible cost for the investing company.
- Production companies and third-party commissioners (companies that take care of all of the procedures regarding the tax exemption for the investors) that want to step into these tax-exemption arrangements must obtain upfront recognition from the regional authorities.
- Framework contracts must be notified to the tax authorities.
- Funding through these tax-exemption arrangements is limited to EUR15 million (tax value) per production.
- Late-payment interest is due if the tax exemption was claimed incorrectly (no certificate is delivered or the temporary exemption is claimed for an amount being too high).
- The tax audits resulting in the issuance of the tax certificates are performed by a specialized team within the central tax authorities (instead of the local tax inspector under the old regime).
- Except for commercial gifts with limited value (under reference of value-added tax [VAT] legislation), no other economic or financial benefit can be granted to the investor.

To ascertain that the production company uses the funds received from the investor for qualifying production costs in the European Economic Area (with a minimum percentage to be spent in Belgium), the total amount of the tax exemption is also limited to 150% of the tax value. This tax value should be estimated at the time of claiming the initial exemption and the exemption is considered final on receipt of the “tax-shelter certificate” (which mentions the tax value) delivered by the tax authorities as a result of a specific tax audit of the production company.

**Capital gains.** Capital gains are taxed at the ordinary rate. If the proceeds are reinvested in depreciable fixed assets within three years (or a longer period in certain circumstances) and if certain other conditions are satisfied, the taxation of the capital gains is deferred over the depreciation period of the newly acquired assets.

The net amount of capital gains on shares is taxable at a rate of 0.412% (or exempt from tax if the company is a small company) if dividends on such shares meet the taxation test and the holding period requirement of the participation exemption (see *Dividends*). If the taxation test is met, but the holding period requirement is not met, a 25.75% tax rate applies. If the taxation test is not met, the ordinary rate applies.

**Administration.** A tax year refers to the year following the financial year if the financial year ends on 31 December. If the financial year ends before 31 December, the tax year refers to the year in which the financial year closes. Consequently, the 2014 tax year relates to a financial year ending between and including 31 December 2013 and 30 December 2014.

To avoid a surcharge, tax must be paid in advance in quarterly installments. For the 2014 tax year, the percentage of the surcharge was 1.69%. For a calendar-year taxpayer, the quarterly installments in 2015 are due on 10 April, 10 July, 12 October and 21 December.

The balance of tax payable is due within two months after receipt of the notice of assessment.

**Advance rulings.** An advance decision in tax matters (tax ruling) is a unilateral written decision by the Belgian tax authorities at the request of a (potential) taxpayer about the application of the tax law in a specific situation that has not yet occurred, as described by the taxpayer. The purpose of such a ruling is to provide upfront certainty to the taxpayer.

The tax authorities must respond to a ruling request within a three-month period, which may be extended by mutual agreement. A ruling may be valid for a period of five years.

However, advance rulings are not issued in certain circumstances such as the following:

- Transactions that have already been implemented or that are in a tax litigation phase
- Transactions that lack economic substance in Belgium
- Transactions, essential parts of which involve tax havens that do not cooperate with the Organisation for Economic Co-operation and Development (OECD)

Ruling requests filed with the Belgian tax authorities that relate to multinational investments and transactions must disclose other ruling requests filed in EU or treaty countries regarding the same matters.

In principle, the advance rulings are published.

**Dividends.** Under the dividend participation exemption, 95% of the dividends received by a qualifying Belgian company or Belgian branch is exempt from tax. The participation exemption applies only if a minimum participation test and a taxation test are satisfied. To satisfy the minimum participation test, the following requirements must be met:

- The recipient company must own a minimum participation of 10% of the share capital or a participation with an acquisition value of at least EUR2,500,000.
- The shares must be held for at least one year.

The minimum participation thresholds and the one-year holding period requirement do not apply to dividends received by qualifying investment companies.

In the case of insufficient profits, the excess participation exemption can be carried forward indefinitely to the extent that it relates to qualifying dividends (that is, dividends from companies

established in the EEA or in a country with which Belgium has entered into a double tax treaty that has an equal treatment clause for dividends). Non-qualifying dividends can give rise to the participation exemption, but in the case of insufficient profits, the excess participation exemption cannot be carried forward.

Specific exclusion rules apply under the taxation test. However, certain of these exclusion rules contain exceptions or transparency rules.

The standard statutory withholding tax rate for dividends paid by Belgian companies is 25%. A reduced rate applies to dividends paid by small companies on nominative shares issued on or after 1 July 2013 if these shares are received in exchange for a contribution of cash into the company and if an ownership requirement and a holding period requirement are met. A 20% rate applies to dividends distributed during the third year following the contribution, and a 15% rate applies to dividends paid in or after the fourth year following the contribution.

Exemptions and reduced rates are available under Belgium's tax treaties or domestic legislation. For example, withholding tax is not imposed on dividends distributed to a qualifying treaty parent. This is a company that holds or commits itself to hold a shareholding of at least 10% in a Belgian company for an uninterrupted period of 12 months.

Effective from 1 October 2014, a 25% withholding tax is imposed in the event of the liquidation of a company. A transitory regime provides for the possibility of incorporating part of the existing retained earnings in the capital of a company at a tax rate of 10% before the increase of the tax rate and without the liquidation of the company. If these funds remain in the capital of the company for at least eight years following their incorporation into the capital (four years for small companies), they can be distributed tax-free through a subsequent capital reduction.

Effective from accounting years closing on 31 December 2014 or later, small companies may allocate a part of their taxed profits to a separate account at a tax charge of 10%. No additional tax is levied on these funds at the time of the liquidation of the company. The distribution of the funds to the shareholders before the liquidation of the company is subject to an additional tax of 5% (distribution after five years following the last day of the tax period in which the reserve is formed) or 15% (distribution within five years).

**Fairness tax.** In 2013, Belgium introduced the "fairness tax," which applies from the 2014 tax year to all Belgian companies that do not qualify as a small company under the Belgian company code and to permanent establishments of nonresident companies. The fairness tax is a separate corporate tax assessment of 5.15%. It is levied in the event of a dividend distribution if any part of the distributed profits has not been effectively taxed at the Belgian corporate income tax rate of 33.99%. The fairness tax is triggered when dividends are declared and the tax base is reduced by the application of the notional interest deduction or tax losses carried forward. The tax base for this tax is determined based on a formula in which the "untaxed" part of distributed profits is multiplied by a proportionality factor.

**Foreign tax relief.** Income derived from a permanent establishment abroad may be exempt under the provisions of a tax treaty. A Belgian company that receives foreign-source interest income and royalties subject to a foreign withholding tax can claim a foreign tax credit in Belgium if certain conditions are satisfied. The maximum foreign tax credit that may be claimed equals  $15/85$  of the net income at the border.

### C. Determination of trading income

**General.** Taxable income is based on income reported in the annual financial statements and includes all gains, profits, costs, dividends, interest, royalties and other types of income.

Certain business expenses are not deductible for tax purposes, such as certain car expenses, 31% of restaurant expenses and 50% of entertainment expenses.

**Inventories.** Stock values may not exceed the lower of cost or market value; cost is defined as the purchase price of raw materials plus direct and indirect production costs. However, the inclusion of indirect production costs is optional. Accepted valuation methods are first-in, first-out (FIFO); last-in, first-out (LIFO); and weighted average. Valuation of stocks at replacement cost is not allowed.

**Provisions.** Provisions are tax deductible only if they are accounted for and if they relate to specific charges that are probable taking into account events occurring during the applicable financial year.

**Depreciation.** In principle, depreciation rates are determined based on the anticipated useful economic life of the assets. The following straight-line rates are generally accepted.

Asset	Rate (%)
Office buildings	3
Industrial buildings	5
Chemical plants	8 to 12.5
Machinery and equipment	10 to 20
Office furniture and equipment	10 to 15
Rolling stock (motor vehicles)	20 to 33
Small tools	33 to 100

The declining-balance method and accelerated depreciation are also allowed under certain circumstances. For assets with an amortization period of less than five years, the annual depreciation rate under the declining-balance method may not exceed 40% of the acquisition value.

Audiovisual investments must be amortized using the straight-line or declining-balance method, with no minimum amortization period. Research and development (R&D) investments must be amortized for tax purposes using the straight-line method over a period of at least three years. All other intangible assets must be amortized for tax purposes using the straight-line method over a period of at least five years.

A 14.5% investment deduction is available for investments during the 2014 tax year in environmentally friendly R&D, energy savings and related patents by resident and nonresident companies. A

company can opt for a spread investment deduction of 21.5% and accordingly deduct each year 21.5% of the annual amortization. For security-related investments made by qualifying small companies, a 21.5% investment deduction (*de toevoeging wegnemen*) is available. If the company has insufficient taxable income, the investment deduction may be carried forward.

For investments in 2014 and 2015, small companies may apply an investment deduction of 4% to other professional investments. This investment deduction cannot be spread. In the case of insufficient taxable income, the deduction can be carried forward for one year only. In addition, the company must renounce the application of the notional interest deduction.

For investments in R&D, a company can irrevocably opt for a tax credit instead of a deduction at the same rate as the investment deduction. As opposed to the investment deduction, this tax credit is effectively paid out if a company has insufficient taxable income for five consecutive tax years.

Tax incentives exist for investment in Belgian audiovisual works (see Section B) and for the shipping industry.

**Patent box.** Effective from the 2008 tax year, resident and non-resident companies can benefit from the “patent income deduction.” This incentive provides a tax deduction equal to 80% of the gross income derived from certain new patents. The new government will look into the extension of the scope of the application of the patent income deduction to income from software licenses to the extent that this can be done in a budgetary-neutral framework.

Currently, the deduction applies to the following three types of patents:

- Self-developed patents by Belgian companies (or branches), developed in R&D centers in Belgium or abroad
- Patents acquired by Belgian companies (or branches) from related or unrelated parties, provided that they are being further developed in R&D centers in Belgium or abroad, regardless of whether such development results in additional patents
- Patents licensed from related or unrelated parties by Belgian companies (or branches), provided that they are being further developed in R&D centers in Belgium or abroad, regardless of whether such development results in additional patents

The tax deduction is available for income derived from the licensing of the patents to related or unrelated parties and for income derived from the use of these patents in the production process of patented products, either by a Belgian company or branch or on its behalf.

For patents that are licensed to related or unrelated parties by Belgian companies or branches, the deduction equals 80% of the patent income received, to the extent that the income is at arm’s length, resulting in an effective tax rate of 6.8%. This rate can be further reduced by taking into account other deductions, such as the notional interest deduction (see Section B).

For patents that are used in the production process by or on behalf of Belgian companies or branches, a deemed deduction may be

claimed with respect to the taxable profits of the Belgian company or branch, equal to 80% of the arm's-length royalty that would have been received by the Belgian company or branch if it had licensed the patents used in the production process to unrelated third parties.

For patents licensed or acquired from third parties, the base on which the 80% exemption is calculated must be reduced by the following:

- Compensation paid to obtain the ownership of licensee rights in such patents, to the extent that they were deducted from the Belgian tax base
- Amortization claimed with respect to the acquired value of the patents, to the extent that they were deducted from the Belgian tax base

The patent income deduction may be claimed in addition to the normal tax deductions of all R&D-related and other business expenses, such as R&D infrastructure costs, salary costs, R&D personnel costs and patent registration duties.

Any excess deduction for patent income may not be carried forward to future years.

The deduction for patent income is available only if it relates to income derived from patents that have not been used for the sale of goods or for services to third parties by Belgian companies or branches, licensees or related parties before 1 January 2007.

**Relief for losses.** In general, companies may carry forward tax losses without limitations. However, certain limitations may apply in cases of restructurings and changes of control.

Tax losses cannot be carried back.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, standard rate	21
Social security contributions, on gross salary	
Employer (approximately)	35
Employee	13.07
Real estate tax; rate depends on location (allowed as a deductible expense for corporate income tax purposes)	Various
Environmental tax; rate depends on the location and the activity or product; tax is not deductible for corporate income tax purposes	Various
Registration duties, on contributions to companies	0
Registration duties on the transfer of immovable property	10/12.5

## E. Miscellaneous matters

**Foreign-exchange controls.** Payments and transfers do not require prior authorization. However, for statistical purposes, financial institutions are required to report all transactions with foreign

countries to the National Bank of Belgium. Resident individual enterprises are also subject to this reporting obligation if they conclude the transactions through nonresident institutions or directly.

**Transfer pricing.** The Belgian Income Tax Code (ITC) contains anti-avoidance provisions that relate to specific aspects of transfer pricing. “Abnormal and gratuitous advantages” granted by a Belgian enterprise are added to the tax base of the Belgian enterprise, unless the advantages are directly or indirectly part of the taxable income of the recipient in Belgium. The ITC also contains anti-avoidance provisions concerning royalties, interest on loans and other items, as well as a provision on the transfer of certain types of assets abroad. Under these provisions, the taxpayer must demonstrate the bona fide nature of the transaction.

## F. Treaty withholding tax rates

The rates in the table below reflect the lower of the treaty rate and the rate under domestic tax law on outbound dividends. Effective from 1 January 2007, Belgium introduced an exemption from dividend withholding tax for companies located in countries with which Belgium has entered into a tax treaty. The exemption is subject to the same conditions as those contained in the EU Parent-Subsidiary Directive (see footnote [f]). However, the treaty must contain an exchange-of-information clause. As a result, certain countries are excluded (see footnote [k]).

In reaction to the OECD’s position regarding the application of Article 26 (exchange of information) of the model convention in treaties entered into by Belgium, Belgium began renegotiating all treaties in 2009. This has resulted in more than 40 new treaties (the vast majority of which have not yet become effective). It is expected that most of these treaties will enter into effect in the upcoming years. In some cases, the negotiations are limited to the exchange of information only. For certain treaties, other articles are also included in the negotiations.

Non-treaty countries	25 (q)	25	25

- (a) The domestic withholding tax rate is reduced to 15% for certain dividends (see Section B).
- (b) For securities issued or loans contracted on or after 1 March 1990, the withholding tax rate under Belgian domestic tax law is 15%. Interest paid on securities issued or loans contracted before that date is subject to withholding tax under Belgian domestic tax law at a rate of 25%. Please consult the relevant treaty for details concerning a possible exemption (Ukraine: exemption or 2% rate). Various exemptions under Belgian domestic tax law are not reflected in the table. Belgium also applies the EU Directive on Royalties and Interest between related companies (Council Directive 2003/49/EC). Under this directive, interest payments between companies located in the EU are exempt from withholding tax if one of the companies has a direct or indirect participation of 25% or more in the other company. The list of companies covered by this directive is more limited than the list contained in the EU Parent-Subsidiary Directive.
- (c) Royalties are subject to a withholding tax of 25% under Belgian domestic tax law. Belgium also applies the Directive on Royalties and Interest (Council Directive 2003/49/EC). Under this directive, royalties paid between companies located in the EU are exempt from withholding tax if one of the companies has a direct or indirect participation of 25% or more in the other company. The list of companies covered by this directive is more limited than the list contained in the EU Parent-Subsidiary Directive.
- (d) Belgium is honoring the Yugoslavia treaty with respect to Bosnia and Herzegovina, Macedonia, Montenegro and Serbia.
- (e) A lower rate applies to royalties for the use of works of art, science or literature, other than motion pictures. The lower rate is 5% under the Algeria and Azerbaijan treaties and 0% under the Israel treaty.
- (f) Under the EU Parent-Subsidiary Directive, which has been incorporated in Belgian domestic law, no withholding tax is imposed on dividends paid by a Belgian subsidiary to a parent company in another EU state if the recipient owns at least 10% of the capital of the payer for at least one year.
- (g) A 10% rate applies if the recipient owns more than 50% of the capital of the Belgian company.
- (h) A 0% rate applies to copyright royalties.
- (i) Please consult the treaty for further details.
- (j) A 0% rate (Algeria and Thailand, 5%) applies to copyright royalties other than for motion pictures.
- (k) Belgium has extended the application of the EU Parent-Subsidiary Directive to all companies located in a country with which Belgium has entered into a tax treaty. In addition to the conditions that must be met under the directive (10% participation for at least one year and qualifying company), the treaty must contain an extended exchange-of-information clause.
- (l) Belgium has signed new double tax treaties, additional treaties or protocols with Australia, Austria, Bahrain, Congo (Democratic Republic of), the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Isle of Man, Japan, Korea (South), Luxembourg, Macau SAR, Macedonia, Malaysia, Malta, Mexico, Moldova, the Netherlands, New Zealand, Norway, Oman, Qatar, Rwanda, San Marino, Seychelles, Spain, Tajikistan, Uganda and Uruguay, but the new treaties and protocols have not yet become effective. Negotiations for treaties with Canada and the Russian Federation have been concluded, but these treaties have not yet been signed.

- (m) The following lower rates apply to dividends paid by Belgian subsidiaries if the recipient holds the indicated level of participation.

	Lower rate %	Level of participation
Albania	5	25%
Argentina	10	25%
Armenia	5	10%
Azerbaijan	5	30% and USD500,000 (1)
Azerbaijan	5	USD10,000,000 (1)
Azerbaijan	10	10% and USD75,000 (1)
Belarus	5	25%

United Arab Emirates	5	25%
United Kingdom	0	10%
United States	0	10% of capital (5)
United States	5	10% of voting shares (5)
Uzbekistan	5	10%
Venezuela	5	25%
Vietnam	5	50%
Vietnam	10	25% but less than 50%
Yugoslavia	10	25%

- (1) Dividends may qualify for the 5% rate if the recipient holds any of the three listed levels of participation.

- (2) The 5% rate does not apply to dividends distributed by an Icelandic company if such dividends are deductible from the tax base in Iceland or if they can be carried forward as an operating loss of the company in Iceland.
- (3) Dividends may qualify for the 5% rate if the recipient holds either of the listed levels of participation.
- (4) The 0% rate applies if the beneficial owner of the dividends is a company that has owned directly shares representing at least 25% of the capital of the payer of the dividends for a 12-month period ending on the date on which the dividend is paid.
- (5) The 0% rate applies if the beneficial owner of the dividends is a company that has owned directly shares representing at least 10% of the capital of the payer of the dividends for a 12-month period ending on the date on which the dividend is declared. The 5% rate applies if the beneficial owner is a company that owns directly at least 10% of the voting shares of the payer of the dividends.
- (n) A 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (o) Belgium is honoring the USSR treaty with respect to Kyrgyzstan, Moldova, Tajikistan and Turkmenistan.
- (p) A 0% rate applies to interest paid by a company to another company if the recipient has a direct or indirect participation in the payer of less than 25%.
- (q) See Section B.
- (r) The EU and Switzerland entered into an agreement that contained, among other items, a measure providing that the EU Parent-Subsidiary Directive also applies to relations between EU member states and Switzerland. Consequently, a withholding tax exemption may be claimed for dividends paid by a Belgian company to a Swiss company if, at the time of payment of the dividends, the recipient of the dividends has held a 25% participation in the payer for at least two years and if certain other conditions are satisfied.

Belgium has signed new double tax treaties, additional treaties or protocols with Australia, Austria, Bahrain, Congo (Democratic Republic of), the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Isle of Man, Japan, Korea (South), Luxembourg, Macau SAR, Macedonia, Malaysia, Malta, Mexico, Moldova, the Netherlands, New Zealand, Norway, Oman, Qatar, Rwanda, San Marino, Seychelles, Spain, Tajikistan, Uganda and Uruguay, but these treaties and protocols have not yet taken effect. Negotiations for a treaty with the Russian Federation have been concluded, but this treaty has not yet been signed.

## A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

## B. Taxes on corporate income and gains

Bermuda does not impose income, withholding or capital gains taxes.

## C. Fees and payroll taxes

**Annual fee.** An annual government fee, based on the assessable capital, is imposed on companies. The following is a schedule of the fees for exempted companies (see Section D).

Capital of company		Annual fee BMD
Exceeding BMD	Not exceeding BMD	
0	12,000	1,995
12,000	120,000	4,070
120,000	1,200,000	6,275
1,200,000	12,000,000	8,360
12,000,000	100,000,000	10,455
100,000,000	500,000,000	18,670
500,000,000	—	31,120

Certain types of entities are not subject to the annual fee described above. These entities are required to pay the following annual fees.

Entity	Annual fee (BMD)
Overseas (Permit) company whose principal business is	
Finance, insurance or operation of an open-end mutual fund	4,125
Any other business	1,995

Entity	Annual fee (BMD)
Exempt company parent of a wholly owned exempted company carrying on insurance business	1,995
Unit trust management company	2,905
Exempted and overseas partnerships	2,235
Segregated accounts companies	280

**Payroll taxes.** Payroll tax is imposed on the total value of cash and benefits paid to employees for services rendered during the tax period. Graduated rates are imposed according to, in general, the annual payroll level of the taxpayer. Employers may withhold up to 5.25% of an employee's remuneration to pay the payroll tax.

The following are the payroll tax rates:

- A 14% rate applies to taxpayers with an annual payroll of greater than BMD1 million and to exempt undertakings.
- A 12.75% rate applies to taxpayers with an annual payroll of greater than BMD500,000 and up to BMD1 million.
- A 10.75% rate applies to taxpayers with an annual payroll of at least BMD200,000 and up to BMD500,000.
- A 9.75% rate applies to taxpayers operating a hotel or restaurant with an annual payroll of BMD200,000 or greater.
- A 7.75% rate applies to remuneration paid to employees in special situations. These are persons on jury duty or on duty with the Bermuda Regiment or Bermuda Volunteer Reserve, and hotel employees in November, December, January, February or March.
- A 7.25% rate applies generally to employers with an annual payroll of less than BMD200,000, self-employed persons carrying on business as taxi drivers, fishermen, farmers or horticulturists, the Bermuda Hospitals Board, the Corporation of Hamilton and educational, sporting or scientific institutions, associations or societies that, in the Minister of Finance's opinion, are operated for purposes other than for the purpose of gain by the entity's individual members.
- A 5.25% rate applies to the government and various government agencies, registered charities, religious and cultural organizations, the Bermuda Festival Ltd. and employers who establish a business that is located in an Economic Empowerment Zone (designated under Section 2A of the Economic Development Act 1968) and that are registered by the Bermuda Small Business Development Corporation under Section 4(1)(c) of the Bermuda Small Business Development Corporation Act 1980. However, such employers may not be chargeable to tax at the 5.25% rate for a period exceeding nine tax periods beginning in and including the tax period in which the business is established.

Items exempted from the payroll tax base include employers' contributions to social insurance, the Hospital Insurance Plan, approved retirement plans, hospital or health schemes, life insurance schemes and workers' compensation schemes.

Taxpayers must report actual remuneration up to a maximum annual remuneration of BMD750,000 per employee. However, taxpayers paying at the rates of 9.75%, 10.75%, 12.75% or 14% are allowed a quarterly reduction in remuneration of BMD600 per employee if the employee is on the payroll at the end of the

tax period and if the employee has worked for the employer for a minimum of 180 hours during the relevant quarter.

**Social security.** All employers and employees must contribute to the national insurance scheme. The social insurance contribution rate is BMD64.14 per employee per week (based on a 52-week year). The cost is typically shared equally between the employee and the employer. As a result, BMD160.35 is generally deducted from each employee's monthly paycheck in a five-week month and BMD128.28 is deducted from each employee's monthly paycheck in a four-week month. This amount, together with the employer's matching contribution, is remitted to the Bermuda Social Insurance Department.

**Incorporation fees.** The Bermuda Monetary Authority charge for an application to register a company is BMD291. The government fee for registering a memorandum of association is BMD86.

#### D. Stamp duty

Stamp duty is charged on various legal instruments, including those detailed below.

**Conveyance or transfer on sale of land or property.** The following are the rates of stamp duty for the sale of Bermuda land or property:

- On the first BMD100,000 of the amount or value, or any part thereof: 2%
- On the next BMD400,000 of the amount or value, or any part thereof: 3%
- On the next BMD500,000 of the amount or value, or any part thereof: 4%
- On the next BMD500,000 of the amount or value or any part thereof: 6%
- Amount in excess of BMD1,500,000: 7%

For non-Bermuda property, the rate is 1%.

**Lease or agreement for lease.** If property is granted in consideration for rent, the following are the amounts of stamp duty:

Monthly amount or value in rent BMD	Stamp duty BMD
Under 1,200	75
1,200 or more but under 1,500	100
1,500 or more but under 2,500	150
2,500 or more but under 3,500	200
3,500 or more but under 5,000	300
5,000 or more	400

#### E. Miscellaneous matters

**Types of companies.** The limited liability company is the most common form of business entity in Bermuda. Limited liability companies may be local, exempted or permit, as described below.

*Local companies.* Local companies are required to have at least 60% of their issued share capital beneficially owned and controlled by Bermudians. Because this type of company is usually formed for the benefit of residents of Bermuda, the local companies may transact business worldwide or in Bermuda only.

*Exempted companies.* An exempted company is the most common form used by international businesses to transact business from Bermuda. Exempted companies are exempted from the requirement imposed on local companies that at least 60% of the equity be owned and controlled by Bermudians, as provided for by the Companies Act of 1981. In general, exempted companies may not compete with local companies in the Bermuda market nor own real estate in Bermuda. However, they may carry on business outside Bermuda or with other exempted undertakings in Bermuda. Examples of exempted companies include investment holding companies, trading companies, mutual fund companies, insurance companies and foreign sales corporations.

*Permit companies.* Permit companies are companies incorporated in jurisdictions other than Bermuda, but have a permit to transact business from Bermuda. Permits are obtained through a license granted by the Ministry of Finance. An example of a permit company is a ship-owning company that is incorporated and has ships registered in another country, but by permit conducts business from Bermuda.

*Exempted Undertakings Tax Protection Act, 1966.* Under the Exempted Undertakings Tax Protection Act, 1966, as amended, all exempted undertakings in Bermuda, such as exempted and permit companies, partnerships and unit trusts, may apply for an undertaking by the government that taxation introduced in Bermuda will not apply to the exempted company until 28 March 2016. Under a recent amendment to this act, the assurance of tax-neutrality is extended from 28 March 2016 until 31 March 2035 if proper application is made with the Registrar of Companies and if a fee of BMD179 is paid.

**Foreign-exchange controls.** Exempted companies and permit companies are designated as nonresident for exchange control purposes. The nonresident designation allows these entities to operate free of exchange control regulations and enables them, without reference to the Bermuda Monetary Authority, to make payments of dividends, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency and purchase securities. However, the issuance and transfer of shares and the change of beneficial ownership of shares in a Bermuda exempted company must be approved by the Bermuda Monetary Authority. The remittance and repatriation of funds by exempted companies and permit companies are not subject to exchange controls. Similarly, trust settlements on behalf of nonresidents are generally free from exchange controls. Under the Exchange Control Act 1972 and the Exchange Control Regulations 1973, certain exchange controls apply to Bermuda residents and to local companies. No capital or exchange control regulations apply to nonresidents.

The Bermuda dollar (BMD) is pegged to the US dollar at an equal exchange rate, and the two currencies are used interchangeably in Bermuda.

The Bermuda-dollar accounts of residents and local companies are subject to a 1% tax on the purchase of a foreign currency.

**Transfer of shares.** Although the consent of the Bermuda Monetary Authority is ordinarily required for the issue or transfer of any share or security, blanket permission for share issues and transfers may be granted, such as for publicly traded securities.

## A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	12.5
Interest	12.5
Royalties	12.5
Professional Services	12.5 (c)
Branch Remittance Tax	12.5
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (d)

(a) See Section B.

(b) A 12.5% withholding tax is imposed on all payments of Bolivian-source income to foreign beneficiaries (see Section B).

- (c) This withholding tax applies to services fees received for specified professional services, including consulting, expert services, and technical, commercial or other advice.
- (d) A Bolivian-source loss incurred in a year may be carried forward to offset taxable income derived in the following three years. Loss carryforwards are not subject to inflation adjustment. For the oil and mining production sector and new projects with a minimum capital investment of BOB1 million, the carryforward period is five years. On the reorganization of companies, the carryforward period is four years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Bolivian companies and foreign companies with permanent establishments in Bolivia are subject to income tax on their Bolivian-source income.

**Rates of corporate tax.** The standard rate of corporate income tax is 25%.

*Mining operations.* Act No. 535 (New Mining Code), dated 28 May 2014, confirms the additional rate of corporate income tax of 12.5% (previously established by Act. No. 3787, dated 24 November 2007). This additional rate applies to additional taxable profits resulting from favorable price conditions for minerals and metals. The following are significant aspects of this additional rate:

- The 12.5% tax rate applies if mineral and metal quotations are equal or higher than the base quotations established by law.
- The 12.5% tax does not apply to taxable profits attributable to sales that have lower quotations than the base quotations.

The tax referred to above must be paid on a monthly basis. The date of payment depends on the last digit of the Tax Identification Number. The monthly payments are considered advance payments of the tax determined at the end of the year. If the total of the advance payments is less than the amount determined at the end of the year, this difference must be paid. If the total of the advance payments exceeds the amount determined at the end of the year, the difference can be claimed as a tax credit against the standard corporate income tax for the year or the additional amount of corporate income tax for the following year.

*Surtax.* A 25% surtax is imposed on net income derived from mining, reduced by the following two special deductions:

- A percentage of up to 33%, which varies according to the type of business, of accumulated investment in exploration, development, assets that qualify for environmental incentives and environmental protection, which is directly related to mining extractive activities performed after the 1991 tax year.
- 45% of net income derived from non-renewable natural resource extractive activities. This deduction is limited to BOB250 million. The amount of BOB250 million is adjusted annually to reflect changes in the Unidad de Fomento de Vivienda (UFV) for each extracting operation. The UFV is an index published by the Statistics National Institute (INE) that reflects changes in Consumer Prices Index (IPC).

For mineral-producing companies, the net income for an extraction operation is the value of the commercialized product in the mining market.

**Hydrocarbon Direct Tax.** The Hydrocarbon Direct Tax is imposed at a rate of 32% on hydrocarbon production in oil wells located in Bolivia. The Hydrocarbon Direct Tax is calculated and paid in the same manner as the 18% royal prerogatives, which apply to all extractive fields. The 18% royal prerogatives consist of the following:

- A regional royal prerogative equal to 11% of the gross hydrocarbon production from oil wells, which is paid to the region where the hydrocarbons are produced
- A national royal prerogative equal to 1% of the gross hydrocarbon production, which is paid to Beni and Pando
- An amount equal to 6% of the gross hydrocarbon production in oil wells, which is paid to the National Treasury after the deduction of the necessary amounts for the management of the contracts

**Capital gains.** In general, capital gains are taxed in Bolivia. However, capital gains derived from transactions on the Bolivian Stock Exchange are exempt from tax.

**Administration.** The law specifies the following tax year-ends, which vary according to the type of business.

<b>Business</b>	<b>Tax year-end</b>
Industry (including oil and gas)	31 March
Agriculture and agribusiness	30 June
Mining	30 September
All other businesses	31 December

Annual tax returns and financial statements must be filed with the Internal Revenue Service and income tax paid within 120 days after the end of the tax year. Advance payments are not required except for mining companies, which must make payments of income tax when they export minerals or metals.

Debts owed to and credits due from the state are adjusted to reflect changes in the UFV (see *Rates of corporate tax*).

Fines and interest charges apply to late tax payments and other non-compliance with tax obligations. The Internal Revenue Service publishes interest rates for late tax payments.

The tax code provides that fraud exists if a tax debt exceeds an amount equal to 10,000 UFV, calculated as of the date of determination of the fraud.

The following are the statutes of limitation for tax audits:

- 2012 fiscal year: 4 years
- 2013 fiscal year: 5 years
- 2014 fiscal year: 6 years
- 2015 fiscal year: 7 years
- 2016 fiscal year: 8 years
- 2017 fiscal year: 9 years
- 2018 fiscal year: 10 years

The statute of limitation periods described may be increased by three years if the entity does comply with the obligation to register or registers under a different tax regime.

**Withholding taxes.** Local entities, including Bolivian permanent establishments of foreign companies, that pay Bolivian-source income to foreign beneficiaries must withhold 12.5% of the amounts paid. For this purpose, Bolivian-source income includes all dividends, interest payments, branch remittances, royalties, professional service fees (includes consulting, expert services, and technical, commercial or other advice), commissions and other income. In general, Bolivian-source income is income that is derived from assets located, placed or economically used in Bolivia, or from activities developed in Bolivia. This rule applies regardless of the nationality, address, or residence of the recipient of the income or the parties involved in the activities, or where the relevant contract is executed.

For dividends paid by Bolivian companies, the withholding tax is payable when the dividends are actually paid, remitted or credited. However, branch profits are deemed remitted when the corporate income tax return is due (120 days after the end of the tax year; see *Administration*).

**Dividends.** The 12.5% withholding tax on payments to foreign beneficiaries applies to dividends paid by Bolivian companies (see *Withholding taxes*). Dividends received from Bolivian companies subject to Bolivian corporate income tax are not taxed.

**Foreign tax relief.** The Bolivian tax code does not provide foreign tax relief.

### C. Determination of taxable income

**General.** Taxable income is the income reported in the companies' financial statements prepared in accordance with generally accepted accounting principles in Bolivia, subject to certain adjustments for tax purposes. In general, all expenses necessary to generate income and to maintain the existence of the company (for example, contributions to regulatory-supervisory organizations, contributions for social benefits and certain national and municipal taxes) are deductible. Donations and other gratuitous transfers to nonprofit organizations that are exempt from income tax may be deducted up to a maximum limit of 10% of taxable income derived in the year of the donation or gratuitous transfer.

Certain expenses are not deductible, including the following:

- Personal withdrawals by owners or partners
- Corporate income tax
- Bonuses and other benefits that are not paid to employees within the time period in which the annual form must be presented for the year of payment
- Interest paid to related parties, to the extent it exceeds, for foreign loans, the London Interbank Offered Rate, plus 3%, or, for local loans, the official lending rate. In addition, interest paid to related parties may not exceed 30% of the interest paid to third parties

Royalties paid with respect to mining activities are creditable or deductible, depending on the price of the minerals and subject to certain limits established by law.

Revenue and expenses are reflected in the year they are accrued.

*Documentation for deduction of expenses.* To deduct expenses in an amount of BOB50,000 or greater, the taxpayer must have payment supports issued by a financial intermediation entity regulated by the Authority of Supervision of the Financial System (Autoridad de Supervisión del Sistema Financiero, or ASFI). These documents must have the following information:

- Financial institution (issuer) business name
- Transaction or operation number
- Transaction date
- Transaction amount

Taxpayers must provide to the tax authorities the payment supports of transactions on a monthly basis.

**Inventories.** Inventories are valued at the lower of market value or replacement cost.

**Provisions.** Provisions and reserves are not deductible for tax purposes, with the exception of the following:

- Technical reserves in insurance companies
- Severance provisions
- Bad debt provisions
- Provisions for environmental restoration

To claim deductions, certain conditions must be satisfied.

**Depreciation and amortization.** Fixed assets are generally depreciated using the straight-line method at rates specified by law. The following are some of the annual depreciation rates.

<b>Assets</b>	<b>Rate (%)</b>
Buildings	2.5
Machinery, equipment and installations	12.5
Vehicles	20
Furniture and office equipment	10
Computer equipment	25

Trademarks and similar intangible assets may be amortized in five years if they are valued using the purchase price.

Depreciation charges resulting from changes in value based on professional appraisals carried out after 31 December 1994 are not deductible for tax purposes.

**Groups of companies.** Groups of companies may not file consolidated returns in Bolivia.

**Relief for losses.** A Bolivian-source loss incurred in a year may be carried forward to offset taxable income derived in the following three years. Loss carryforwards are not subject to inflation adjustment. For the oil and mining production sector and new projects with a minimum capital investment of BOB1 million, the carryforward period is five years. On the reorganization of companies, the carryforward period is four years.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), on all sales of goods and services and on imports; VAT on capital goods imported by companies in the agriculture and cattle raising industries and non-extractive industries that will be used to produce goods for export may be deferred for up to 3 years if an advance payment of 10% is made	13%
Transactions Tax, on gross revenue; corporate income tax from the preceding year may be credited against Transactions Tax; sales of a limited liability partnership's capital quota are exempt	3%
Real estate tax, imposed annually on the assigned value of real property and vehicles	Various
Excise tax, on the production or importation of specified goods	
Beer	BOB3 per liter plus 1%
Wine	BOB2.77 per liter plus 5%
Tobacco products; rate applied to the price	56%
Vehicles; rate applied to the price	10% to 18%
Special Tax on Hydrocarbons and Derived Products; maximum rate of BOB6.48 per liter	
Premium gasoline	BOB4.79 per liter
Special gasoline	BOB3.74 per liter
National diesel oil	BOB3.72 per liter
Aviation gasoline	BOB4.57 per liter
Kerosene	BOB2.72 per liter
National jet fuel	BOB2.77 per liter
Agrofuel	BOB2.55 per liter
Fuel oil	BOB2.78 per liter
Mining royalty; imposed on gross revenue; rates vary according to the type of mineral	Various
Financial Transactions Tax (ITF); imposed on the amounts of debits and credits to savings and checking accounts. ITF is not deductible for purposes of any other tax; the current ITF Act is effective from 13 April 2012 for a period of three years; certain items are exempt including transactions regarding savings accounts in US dollars if available balance is not higher than USD2,000, savings accounts in local currency or in UFV, securities transactions and payments resulting from foreign remittances; tax is withheld by banks and other financial institutions and other entities carrying out transactions in payment system	0.15%

<b>Nature of tax</b>	<b>Rate</b>
Tax on foreign-currency sales; applicable to banking and nonbanking financial institutions and exchange houses; tax imposed on the gross transaction amount	0.7%
Additional financial aliquot (tax rate) for corporate income tax; applicable to banking and nonbanking institutions regulated by the ASFI; tax applicable if return on equity exceeds 13%; tax is neither offsettable nor deductible	12.5%
<b>Social security contributions</b>	
<b>Employer</b>	
Health care; on monthly gross revenue per employee	10%
Housing fund; on monthly gross revenue per employee	2%
Professional risk insurance; on monthly gross revenue per employee	1.71%
Solidarity Fund	3%
Solidarity Fund for mining entities	2%
<b>Employees</b>	
Retirement fund	10%
Common risk insurance	1.71%
Solidarity Fund (fixed contribution)	0.5%
Solidarity Fund (variable and cumulative contribution)	
Difference between the total salary and BOB35,000	10%
Difference between the total salary and BOB25,000	5%
Difference between the total salary and BOB13,000	1%
Christmas bonus (Aguinaldo); general paid between 1 December and 20 December each year; if employment is less than a year, the bonus is reduced pro rata	One month's salary
Second Christmas bonus (second Aguinaldo); must be paid if Bolivian gross domestic product increases by more than 4.5%	One month's salary
Termination compensation; bonus for termination of employment; amount depends on length of employment and whether the employee was fired or resigned	Various

## **E. Miscellaneous matters**

**Foreign-exchange controls.** The Bolivian currency is the boliviano (BOB).

No restrictions are imposed on foreign-exchange transactions, including the repatriation of capital and the remittance of dividends and royalties abroad. A system of free-floating exchange rates exists in Bolivia. No special registration requirements apply to foreign investment.

The current exchange rate is BOB6.96 = USD1.

**Transfer pricing.** Transactions between “Bolivian companies comprised of foreign capital” and foreign companies and individuals who directly or indirectly control the company are deemed to be entered into by independent parties. For this purpose, control is defined as the holding of 50% or more of the capital or decision-making power in the company. The tax authorities may adjust the prices in the transaction to reflect normal market practices between independent entities.

For purposes of the above rules, a “Bolivian company comprised of foreign capital” is a company that is directly or indirectly controlled by individuals residing or established abroad.

Branches and other legal establishments of foreign companies in Bolivia must maintain their accounting records separately from their head office and other branches and establishments abroad.

In 2014, Bolivia introduced a law that includes transfer-pricing definitions and empowers the tax authority to audit values of transactions between related parties, comparing them with transactions between third parties. Various aspects of the regime, including procedures and forms, have not yet been regulated, but the law will become effective beginning in the 2015 fiscal year, which varies according to the type of economic activity of the company.

**Reorganizations.** Profits arising from company reorganizations, which are mergers, divisions or transformations, are not subject to corporate income tax. Regulations on reorganizations are expected to be issued in the near future.

## **F. Tax treaties**

Bolivia has entered into tax treaties with Argentina, France, Germany, Spain, Sweden and the United Kingdom. It has also signed the Andean Pact, which includes a tax treaty, with Colombia, Ecuador and Peru. However, the government is reviewing these treaties to determine whether they accomplish new government policies. As a result, these treaties may be ratified or revoked.

## Bonaire, Sint Eustatius and Saba (BES-Islands; extraordinary overseas municipalities of the Netherlands)

ey.com/GlobalTaxGuides  
ey.com/TaxGuidesApp

Please direct all requests regarding the BES-Islands to the following persons:

- Noraima P. Bentura (Curaçao office telephone: +599 (9) 430-5071; mobile telephone: +599 (9) 678-5566; fax: +599 (9) 465-6770; email: noraima.bentura@an.ey.com)

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. A new tax regime applies to the BES-Islands, effective from 1 January 2011. The following chapter provides information on taxation in the BES-Islands only. Chapters on Curaçao and Sint Maarten appear in this guide.

### A. At a glance

Profit Tax	– (a)
Capital Gains Tax	– (a)
Real Estate Tax Rate (%)	10/17.5 (b)
Yield Tax Rate (%)	5 (c)

- (a) The BES-Islands do not have a profit tax or capital gains tax.  
 (b) The profit is fixed at 4% of the fair market value of the real estate. The standard rate of the real estate tax is 17.5% of the fixed profit. Consequently, in principle, the effective annual tax rate is 0.7% of the fair market value of the real estate. A reduced rate of 10% applies to hotels, unless the hotel is owned by an individual. Consequently, the effective annual tax rate with respect to

hotels is 0.4%. This real estate tax applies if an entity using the real estate, by virtue of ownership, possession or a limited right, is deemed to be resident in the BES-Islands. If the entity is deemed to be resident in the Netherlands, the Dutch corporate income tax and the Dutch dividend withholding tax apply instead. For further details, see Section B.

- (c) This tax applies if the entity from which distributions of profits are derived is deemed to be resident in the BES-Islands. If the entity is deemed to be resident in the Netherlands, the Dutch corporate income tax and the Dutch dividend withholding tax apply instead. For further details, see Section B.

## B. Taxes on corporate income and gains

**New BES-Islands tax regime.** Effective from 1 January 2011, a new tax regime applies in the BES-Islands. This tax regime does not include a profit tax. A yield tax and a real estate tax have been introduced in the BES-Islands to replace the profit tax.

**Residency fiction.** The yield tax and real estate tax mentioned above are not automatically applicable as a result of a residency fiction. In principle, all entities established on the BES-Islands are deemed to be established in the Netherlands for tax purposes and accordingly subject to Dutch corporate income tax (up to 25%) and Dutch dividend withholding tax (in principle, 15%). For details on the Dutch taxes, see the chapter on the Netherlands in this guide.

However, on request, entities that have sufficient nexus with the BES-Islands may be subject to the fiscal system of the BES-Islands. In such case, no Dutch corporate income tax applies, but the yield tax and real estate tax apply. Entities are deemed to have sufficient nexus with the BES-Islands if any of the following circumstances exist:

- The entity is a foundation or trust that is a resident of the BES-Islands.
- The entity has been admitted to a special trade and service depot.
- On request, the entity has obtained a ruling from the tax authorities that, for tax purposes, the entity is deemed to be a resident of the BES-Islands. A request for such a ruling should be made with the tax authorities within six months after the beginning of the calendar year.

The ruling referred to above is issued in the following cases:

- The assets of the entity in the BES-Islands consist of less than 50% of mobile assets, including, among other portfolio investments, participations and cash.
- An entity that does not meet the requirement above can still obtain a ruling if it employs at least three residents of the BES-Islands that manage the entity's assets and if it has at its disposal business premises in the BES-Islands for a period of at least 24 months with a value of at least USD50,000.
- The entity is a holding company that holds at least 95% of the shares in an entity that is admitted to a special trade and service depot or already has obtained such a ruling.
- The entity has a small business with a turnover of no more than USD80,000, the assets of the company in general do not exceed USD200,000, and the company does not carry out financial services, insurance or trust (fiduciary) activities.

**Yield tax.** The yield tax is levied on distributions (in whatever form) of profits by entities resident in the BES-Islands. The rate

of the yield tax is 5%. The entity making the distribution acts as withholding agent. Interest and royalty payments are not subject to the yield tax. The yield tax is not levied on the remittances of profits by branches to their foreign head offices.

**Real estate tax.** The real estate tax is levied on gains derived from real estate located in the BES-Islands. The real estate tax is levied on a taxpayer (person or entity) that, at the beginning of the year, has the use of real estate by virtue of ownership, possession or a limited right.

The profit is fixed at 4% of the fair market value of the real estate. The rate of the real estate tax is 17.5% of the fixed profit. Consequently, the effective annual tax rate is 0.7% of the fair market value of the real estate. A reduced rate of 10% applies to hotels, unless the hotel is owned by an individual. Consequently, the effective annual tax rate with respect to hotels is 0.4%. The value of the real estate is determined by the Tax Inspector. The value is set at the beginning of the period for which the value is determined and is in principle determined for five consecutive calendar years.

Real estate tax is not levied on owner-occupied homes, real estate included in the business assets of a privately run enterprise (that is not operating in the form of an entity) and real estate with a value of less than USD50,000, if the person having use of the real estate is a resident of the BES-Islands.

In addition, entities that are deemed to be residents of the Netherlands (see *Residency fiction*) are exempt from real estate tax.

### Administration

*Real estate tax.* The real estate tax is levied over a period of one calendar year. The Tax Inspector imposes a tax assessment, and the filing of a tax return is not required.

*Yield tax.* The withholding agent must withhold the yield tax at the time the profit distribution is put at the disposal of the recipient. The withholding agent must file a quarterly tax return and remit the yield tax due within 15 days after the end of the quarter. The tax return does not need to be filed for periods in which no distributions take place.

### C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
General expenditure tax; levied on the delivery of manufactured goods in the BES-Islands by a manufacturer as part of its business, on the rendering of services in the BES-Islands by an entrepreneur as part of its business and on imports of goods	
Bonaire	
Delivery of goods (different rates apply to passenger cars)	8
Insurance	7
Other taxable activities	6

Nature of tax	Rate (%)
St. Eustatius and Saba	
Delivery of goods (different rates apply to passenger cars)	6
Insurance	5
Other taxable activities	4
Real estate transfer tax	5
Customs duties	0

#### D. Tax treaties

The Dutch treaty network does not apply to entities deemed to be residents of the BES-Islands. However, the Dutch standard treaty does not exclude entities deemed to be residents of the Netherlands (by the residency fiction) from the application of the treaty.

Provisions for double tax relief are included in the Tax Regulation for the Netherlands. Under a measure in the Tax Regulation for the Netherlands, dividend distributions by a qualifying Dutch subsidiary to its BES-Islands parent company are not subject to Dutch dividend withholding tax.

## A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (b)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	7.5
Interest	15
Royalties	15
Management and Technical Fees	15
Payments under Construction Contracts	3 (c)
Brokerage Commission	10 (d)
Rent paid for use of buildings and land	5 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (e)
Carryforward	5

(a) For approved manufacturing companies, the rate is 15%.

(b) See Section B.

(c) This tax is imposed on gross receipts derived from construction contracts. This tax is an advance payment that may be offset against the actual tax due.

(d) This tax is an advance payment that may be offset against the actual tax due.

(e) Farming enterprises may carry back losses for two years.

## B. Taxes on corporate income and gains

**Corporate income tax.** All companies operating in Botswana are subject to tax on earnings in Botswana.

**Rates of corporate tax.** The corporate tax rate for companies other than manufacturing companies is 22%. Approved manufacturing companies are subject to tax at a reduced tax rate of 15%.

The tax rate for a branch is 30%. Botswana does not impose a branch remittance tax.

International Financial Services Centre (IFSC) companies (as defined) are taxed at a rate of 15%.

Diamond-mining companies are taxed in accordance with tax agreements entered into by the companies with the government. Other mining companies are taxed at a rate of 22% or at a rate determined by a formula, whichever is higher. The following is the formula:

$$x = \frac{70 - \frac{1500}{x}}{\frac{\text{Taxable income}}{\text{Gross income}}} \times 100$$

**Capital gains.** The capital gains tax applies to gains on the sale of capital assets of a business carried on in Botswana and on the sale of corporate shares and debentures of private companies.

For computing gains on sales of immovable property acquired before 1 July 1982, the cost of acquisition and improvements is first increased by a 10% rate, compounded for each complete 12-month period from the date of acquisition to 1 July 1982. It is then indexed for inflation from 1 July 1982 to the date of sale. For computing gains on immovable property acquired on or after 1 July 1982, the cost of acquisition and improvements is indexed for inflation during the period of ownership.

Only 75% of the gain derived from the sale of shares is subject to capital gains tax. Gains on the sale of shares held for at least one year that are listed on the Botswana Stock Exchange are exempt from capital gains tax if the seller holds no more than 49% of the shares. Sales of shares in IFSC companies are exempt from capital gains tax.

Taxable capital gains are subject to tax at a rate of 22% for resident companies and 30% for nonresident companies.

**Administration.** The tax year ends on 30 June. Companies are taxed on the profits reported in their latest completed accounting period.

Under an advance payment of tax and self-assessment system, companies must estimate their tax in advance and pay the estimated tax in four equal quarterly installments. The first payment is due three months after the beginning of the accounting period and the subsequent payments are due at the end of every subsequent three-month period. Tax returns must be filed, and any balance of tax due must be paid, within four months of the end of the tax year, or in the case of a company with an accounting period that is different from the tax year, within four months from the end of such accounting period. Underpayments and late payments are subject to interest at a rate of 1.5% per month or part of a month (compounded).

**Dividends.** A withholding tax of 7.5% is imposed on dividends paid to residents and nonresidents. It is a final tax.

Dividends distributed by investment or similar companies are exempt from tax if they are paid out of dividends received that suffered withholding tax.

### C. Determination of trading income

**General.** Taxable income is net income reported in the financial statements, modified by certain provisions of the tax law. Expenses are deductible to the extent incurred in producing assessable income.

The rules for determining taxable income for an IFSC company are different from those for a normal company.

Collective-investment undertakings (as defined) are subject to tax on their undistributed income only.

**Inventories.** For tax purposes, inventory is valued at the lower of cost or net realizable value.

**Provisions.** Specific identifiable provisions are allowable for tax purposes; general provisions are not allowed.

**Depreciation.** Depreciation is computed using the straight-line method. Official rates vary according to the type of asset. The following are some of the official straight-line rates.

Asset	Rate (%)
Industrial buildings	2.5*
Commercial buildings	2.5
Office equipment	10
Motor vehicles	25
Plant and machinery	15 to 25

\* An initial allowance of 25% is also granted.

Capital allowances are subject to recapture on the sale of an asset to the extent that the sales proceeds exceed the tax value after depreciation.

Mining companies may deduct 100% of their mining capital expenditure (as defined) in the year in which the expenditure is incurred.

**Relief for losses.** In general, tax losses may be carried forward for five years. Mining, prospecting and farming losses may be carried forward indefinitely. In general, losses may not be carried back. However, farming enterprises may carry back losses to the preceding two years.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on almost all supplies of goods and services consumed in Botswana	12
Capital transfer tax, paid by the recipient on all gratuitous receipts of property, corporate shares and inheritances, less allowable deductions	12.5

## E. Foreign-exchange controls

No foreign-exchange controls are imposed in Botswana. However, certain forms must be completed for statistical purposes.

## F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %	Management and technical fees %
Barbados	5/7.5 (e)	10	10	10 (f)
France	5/7.5 (a)	10	10	7.5
India	10 (c)	10	10	10
Mauritius	5/7.5 (b)	12	12.5	15
Mozambique	10/12 (c)	10	10	10
Namibia	10 (c)	10	10	15
Russian Federation	5/10 (i)	10	10	10
Seychelles	5/7.5 (g)	7.5	10	10
South Africa	10 (c)	10	10	10
Sweden	7.5 (d)	15 (d)	15 (d)	15
United Kingdom	5/7.5 (h)	10	10	7.5
Zimbabwe	5/7.5 (g)	10	10	10
Non-treaty countries	7.5	15	15	15

- (a) The 5% rate applies if the recipient is a company that holds at least 25% of the share capital of the payer.
- (b) The 5% rate applies if the recipient holds at least 25% of the shares of the payer.
- (c) The domestic rate of 7.5% applies because the treaty rate is higher than the domestic rate.
- (d) If a lower rate is negotiated with any other state in a future treaty, such rate also applies under the Sweden treaty.
- (e) The 5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 7.5% rate applies in all other cases.
- (f) If a lower rate is negotiated with any other state in a future treaty, such rate also applies under the Barbados treaty.
- (g) The 5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 7.5% rate applies in all other cases.
- (h) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 25% of the voting power in the company paying the dividends. The 7.5% rate applies in all other cases.
- (i) The 5% rate applies if the recipient holds at least 25% of the shares of the payer. A 7.5% rate applies in all other cases (although the treaty provides for a 10% rate in all other cases, the domestic rate of 7.5% applies because it is lower than the treaty rate of 10%).

## A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 (a)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	0
Interest	15 (b)(c)
Royalties from Patents, Know-how, etc.	15 (b)(c)(d)
Services	15 (b)(c)(d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

- (a) A 10% surtax is also levied (see Section B).
- (b) The withholding tax is imposed on payments, credits, deliveries or remittances abroad, and on the use of amounts in Brazil for the benefit of non-residents.
- (c) The withholding tax rate may increase to 25% if the recipient is resident in a jurisdiction that taxes income at a rate lower than 17% to 20% (that is, a low-tax jurisdiction for Brazilian tax purposes; for details, see Section E). In general, for jurisdictions that meet certain requirements regarding alignment with international standards of tax transparency, the threshold is 17%. For all other jurisdictions, it is 20%.
- (d) A 10% Contribution for Intervention in the Economic Domain (Contribuição de Intervenção no Domínio Econômico, or CIDE) is imposed on royalties and on technical and administrative service payments.
- (e) For details, see Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Brazilian resident companies are subject to corporate income tax (CIT) on their worldwide income. Companies resident in Brazil are those incorporated under the Brazilian laws and managed in Brazil.

Foreign branches, agencies or representative offices of Brazilian companies are also subject to Brazilian tax on their income earned overseas. In general, foreign-source losses may not offset Brazilian-source income. A foreign tax credit is available (see *Foreign tax relief*).

In addition to CIT, Social Contribution Tax (SCT) is imposed on worldwide income (see *Rates of tax*).

### Rates of tax

*Corporate income tax.* The basic rate of CIT is 15%, increased by a surtax of 10% on annual taxable profits exceeding BRL240,000 (approximately USD93,000).

Exemption from, or reduction of, CIT is granted to businesses in certain underdeveloped areas.

*Social Contribution Tax.* SCT is levied at a general rate of 9%. For financial institutions, private insurance companies and capitalization companies, the SCT rate is 15%.

SCT is not deductible in calculating CIT. The tax bases for SCT and CIT are basically the same. However, certain specific adjustments that are required for CIT purposes do not apply to SCT. The total effective tax rate on corporate profits is 34% (25% CIT [including the 10% surtax] plus 9% SCT).

Losses for SCT purposes are subject to the same tax rules applicable to losses for CIT purposes.

**Capital gains.** Capital gains are treated as ordinary income and, accordingly, are subject to CIT and SCT. In general, capital gains derived by nonresidents on shares are subject to capital gains tax at a rate of 15%. A 25% rate applies to nonresidents located in low-tax jurisdictions.

### **Administration**

*Filing and payment.* The fiscal year is the calendar year. In general, companies must file returns in an electronic format by the last working day of June of the following year. Extensions to file returns are generally not available.

Effective from the 2014 calendar year, income tax returns were replaced by a new electronic filing called Escrituração Contábil-Fiscal (ECF), which must be submitted to by the end of June of the following calendar year.

Companies may elect to pay CIT and SCT on an annual or quarterly basis. In general, this election may not be changed during the calendar year. Companies that elect the annual basis must make advance monthly payments of CIT and SCT. The advance payments are equal to the income tax applicable to either the company's actual taxable income or the company's income calculated in accordance with an estimated method, whichever is lower.

For monthly payments of CIT that are calculated based on the estimated method, the tax base is generally 8% of the company's gross income. Different percentages apply to specific industries, such as the following:

- 16% for financial institutions and transportation services
- 32% for services in general
- 1.6% for gas distribution

For the purpose of computing the advance income tax payments, the applicable rate is 15%. An additional 10% rate is applied to monthly taxable income in excess of BRL20,000 (approximately USD7,600).

The difference between the tax shown on the annual tax return and the amounts paid in advance must be paid by the last working day of March following the end of the fiscal year. If the amounts paid in advance exceed the tax shown on the annual tax return, the excess may be used to offset the tax due in a month following the fiscal year-end. A refund may be requested from the tax authorities within five years of the tax payment.

Alternatively, companies may pay tax quarterly based on actual quarterly income, computed under the accrual method.

The tax base for monthly estimated payments of SCT is generally 12% of gross income plus capital gains and other income, including financial income. This percentage is increased to 32% for service companies. SCT payments must be made at the same time as the income tax payments. The applicable tax rate is generally 9%.

*Interest and penalties for late payments.* The late payment of taxes is generally subject to the following:

- Interest calculated at the rate applicable to the Special Liquidation and Custody System (Sistema Especial de Liquidação e Custódia, or SELIC), which is published each month by the government
- A daily fine of 0.33% of the tax due, up to a maximum penalty of 20% of the tax due (excluding interest)

In general, assessments resulting from a tax audit are subject to a penalty of 75% on the tax due. The penalty increases to 150% in the case of fraud. These penalties can be reduced by 50% if the payment is made by the last day of the appeal period (other penalty reductions are available during the appeal process). In such case, the effective penalty is 37.5%.

**Dividends.** Withholding tax is not imposed on dividends paid to residents and nonresidents out of profits generated on or after 1 January 1996.

For earnings recognized in 2014, the excess of dividends paid based on the statutory financial statements over the dividends determined under a “tax balance sheet” is subject to tax. A 15% withholding tax applies to such excess dividends paid to nonresidents. Dividends generated before 2014 are not subject to tax even if they are in excess of the dividends determined under the “tax balance sheet.” Dividends generated after 2014 are not subject to tax because the concept of “tax balance sheet” has ceased to exist.

**Foreign tax relief.** A foreign tax credit is available to Brazilian companies on income taxes paid overseas. In general, the foreign tax credit is limited to the amount of Brazilian CIT and SCT on the foreign income.

### C. Determination of taxable income

**General.** CIT and SCT are due on a company’s taxable income, which is the net book income, as adjusted by the tax law. In general, operating expenses are deductible if the following conditions are satisfied: they are necessary, usual and common to the company’s activity; they are actually incurred; and they are supported by proper documentation. However, the following expenses, among others, are not deductible:

- Expenses related to fixed assets, including financial and operating lease payments, depreciation and amortization, if the assets are not directly used in the production or commercialization of products and services.
- Fringe benefits furnished to shareholders and officers if the beneficiaries are not identified and individualized (a 35% [effective rate of 53.84%] withholding tax is imposed on such payments). Neither the fringe benefits nor the withholding tax is deductible.
- Donations in general, gifts and other non-compulsory payments.

Simplified methods are available for calculating the tax liability applicable to small businesses.

**Inventories.** Companies that have an integrated cost system must value inventory for tax purposes at the lower of cost or market value, using either the average cost or the first-in, first-out (FIFO) method. Direct cost and last-in, first-out (LIFO) methods cannot be used. In general, companies that do not have an integrated cost system must value finished products at 70% of the highest sales price of the product sold in the tax period. Work-in-process must be valued at either 80% of the finished product cost or 1.5 times the highest cost of the material content. Supermarkets and similar enterprises that sell a large number of goods may use a specific system for inventory valuation based on periodic and simplified counting.

**Provisions.** In general, the only deductible provisions are those for vacation pay and the 13th month salary (annual bonus).

**Depreciation.** Fixed assets may be depreciated using the straight-line method at rates provided by the Brazilian tax authorities. The following are some of the annual depreciation rates:

- Real estate assets: 4%
- Machinery and equipment: 10%
- Vehicles: 20%
- Computer hardware and software: 20%

Companies that operate two work shifts per day may depreciate machinery and equipment at 1.5 times the normal rate. If the company operates three shifts, it may double the normal rate.

For accounting purposes, companies may calculate depreciation at different rates (taking into account International Financial Reporting Standards [IFRS] criteria, which can affect, in addition to depreciation rates, inventory and other items).

**Tax losses.** Tax losses may be carried forward indefinitely, but can only offset up to 30% of the company's taxable income for a tax period. No carryback is allowed.

Tax losses may be jeopardized if a company experiences a change in business activity and ownership control between the period in which losses were generated and the period in which losses would otherwise be used to offset taxable income. In general, non-operating tax losses can be offset only against non-operating gains. In a corporate restructuring involving a merger, the tax losses of the merged company must be written off.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
State value-added tax (ICMS)	0 to 25
General rate for intrastate transactions	17/19
General rate for interstate transactions	12
Transactions in which taxpayers located in the South or Southeast (except for Espírito Santo State) regions that remit goods and services taxable under ICMS to taxpayers resident in the states of the North, Northeast or Centre-West regions or Espírito Santo State	7
Exports	Exempt

Nature of tax	Rate (%)
Federal value-added tax (IPI); the top rate applies to luxury or superfluous goods, such as alcoholic beverages and cigarettes	0 to 330
Tax on Financial Operations (IOF); imposed on credit transactions, foreign-exchange transactions, insurance operations and financial investments	
Loan operations	
Daily rate (maximum annual rate of 1.5%)	0.0041
Additional rate	0.38
Foreign-exchange transactions	0.38 to 6.38
Insurance operations	0.38 to 7.38
Financial investments	Various
Social Integration Program (PIS) tax; levied on gross income at a rate of 1.65%; the tax is a non-cumulative (VAT-type) tax for certain taxpayers; certain companies, including local financial institutions and companies that manufacture goods in the Manaus Free Trade Zone, are subject to the cumulative regime and make the contribution at a 0.65% rate; the tax is also levied on imports of goods and services at a rate of 1.65%	0.65/1.65
Social security financing contribution (COFINS); levied on gross income at a rate of 7.6%; the tax is a non-cumulative (VAT-type) tax for certain taxpayers; certain companies, including local financial institutions and companies that manufacture goods in the Manaus Free Trade Zone, are subject to the cumulative regime and make the contribution at a 3% rate; the tax is also levied on imports of goods and services at a rate of 7.6% in most cases; however, for certain imported goods (for example, some plastic, rubber, textile, iron and steel products), the rate is 8.6%	3/7.6/8.6
Municipal Service Tax (ISS)	2 to 5
Social security contributions (INSS), on monthly salary; paid by	
Employer	26.8 to 28.8
Employee; rate varies depending on amount of remuneration (amount of employee contribution may not exceed BRL457.49 [USD215] a month)	8 to 11
Severance Pay Indemnity Fund (FGTS), on monthly salary	8
Withholding tax on local payments of professional service fees (creditable by the recipient against corporate income tax)	1.5
Contribution for development of cinematographic and video phonographic works (Condecine); in general, tax rate applied to amounts paid to producers, distributors and intermediaries abroad for the exploitation of cinematographic and video phonographic works	11

## E. Miscellaneous matters

**Foreign investment.** All foreign investments, such as equity or debt investments, must be registered with the Central Bank of Brazil (BACEN) to assure the payment of dividends and interest, or the repatriation of capital. Nonresidents holding assets and rights in Brazil, such as equity investments, portfolio investments and debt investments, must be registered with the Brazilian tax authorities. On registration, the nonresidents obtain a tax identification number (CNPJ). Failure to comply with the foreign-exchange regulations and associated requirements is subject to significant penalties. This particularly applies to evasion, false statements and private offsetting transactions.

Contracts for the supply of technology and technical services, and for the use of trademarks and patents between residents and nonresidents must also be registered with BACEN and the National Institute of Industrial Property (INPI). The registration allows Brazilian companies to pay and deduct the royalties up to the amounts prescribed by law.

**Transfer pricing.** Brazilian transfer-pricing rules apply only to cross-border transactions entered into between Brazilian companies and foreign related parties. A transaction entered into between a Brazilian company and a resident of a low-tax jurisdiction or a resident in a jurisdiction with a privileged tax regime is also subject to the transfer-pricing rules, even if the parties are not related. In general, Brazilian transfer-pricing rules do not follow the transfer-pricing guidelines outlined in the Organisation for Economic Co-operation and Development (OECD) Model Convention and the US rules. For example, Brazilian transfer-pricing rules adopt fixed-profit margins on transactions carried out between related parties. Safe harbor measures may be applied to Brazilian exports.

**Low-tax jurisdiction and privileged tax regime.** The Brazilian low-tax jurisdiction (LTJ) list (black list) and privileged tax regime (PTR) list (gray list) are contained in regulations issued by the Brazilian tax authorities. New definitions of LTJ and PTR were introduced, but the lists of LTJs and PTRs have not yet been amended.

**Thin-capitalization.** Under thin-capitalization rules, interest expense arising from a financial arrangement with a related party is deductible only if the related Brazilian borrower does not exceed a debt-to-net equity ratio of 2:1. In addition, interest expense arising from a financing arrangement executed with a party established in a LTJ or benefiting from a PTR is deductible only if the Brazilian borrower does not have a debt-to-net equity ratio of greater than 0.3:1.

**Controlled foreign companies.** Profits realized by a controlled foreign company (CFC) of a Brazilian company are subject to income taxation on 31 December of each year regardless of any actual distribution by the CFC. Law 12,973/2014 introduced a new CFC regime. Under the new regime, qualifying CFCs are taxed on an entity-by-entity basis (that is, individually regardless of the design of the corporate structure outside of Brazil). If certain conditions are met, a tax consolidation of CFCs can be

performed at the level of the Brazilian shareholder, through which the accounting losses of a qualifying CFC may offset taxable income of another CFC.

The earnings of CFC entities whose business is connected to oil and gas activities are exempt from tax in Brazil. Foreign tax credits of CFCs can be used against Brazilian corporate income tax, limited to the Brazilian corporate income tax due on CFC income. Under regulations issued by the Brazilian tax authorities (Ordinance 1,520/2014), the Brazilian shareholder can elect which non-Brazilian entities are subject to tax consolidation. Qualifying non-CFC entities are subject to tax in Brazil on an actual or deemed dividend distribution to a Brazilian shareholder.

The Brazilian corporate income tax on CFC income may be subject to installment payments over a period of eight years (12.5% payment per year), but the deferred tax liability is subject to adjustment based on London Interbank Offered Rate rate plus the US dollar currency exchange variation.

**Digital bookkeeping.** The Public System of Digital Bookkeeping (Sistema Público de Escrituração Digital, or SPED) is a unified electronic storage of accounting and tax bookkeeping. It is intended to replace bookkeeping prepared on paper and to unify the preparation, storage, and certification requirements of the Board of Trade and of the tax authorities at the municipal, state and federal levels. Most companies are now required to comply with the SPED.

**International Financial Reporting Standards.** Law 11,638/07 introduced changes to the Brazilian Corporate Law (Law 6,404/76) with respect to the preparation of financial statements for corporations as well as for large companies, regardless of whether they are organized as corporations. This law represents a major step in the process toward harmonization of Brazilian GAAP with IFRS. Under this law, which took effect on 1 January 2008, large companies must prepare their financial statements under new Brazilian GAAP, which is consistent with IFRS principles.

This harmonization process was not intended to generate any tax consequences in Brazil. Consequently, the Brazilian IRS issued guidance on achieving such tax neutrality (called the Transitional Tax Regime). Effective from 2015, Law 12,973/2014 revokes the Transitional Tax Regime by realigning the income tax rules with the accounting rules (Brazilian GAAP), unless otherwise prescribed by the tax law. The early adoption of Law 12,973/2014 for the 2014 calendar year is optional.

**Foreign trade of services integrated system.** The Brazilian tax authorities require the reporting of inbound and outbound services and intangible transactions outlined in Brazilian Services Codification (Nomenclatura Brasileira de Serviços, Intangíveis e Outras Operações que Produzam Variações no Patrimônio, or NBS) through an integrated system with the Brazilian IRS, named Integrated Foreign Trade System for Foreign Services, Intangibles and other Transactions (Sistema Integrado de Comércio Exterior de Serviços, Intangíveis e Outras Operações que Produzam Variações no Patrimônio, or SISCOSERV).

**Special tax benefits.** The Brazilian government has issued laws providing tax incentives to increase investments in Brazil. The following are the main programs:

- Special Tax Regime for the Olympic and Paralympic Games of 2016: tax benefits related to the preparation for the Olympic and Paralympic Games that will take place in Brazil in 2016
- Law 11,196/2005: tax benefits for investments in infrastructure and research and development (R&D)
- Special Tax Regime for the Renewal and Expansion of Port Structures (Regime Tributário para Incentivo à Modernização e à Ampliação da Estrutura Portuária, or REPORTO): suspension of IPI, PIS, COFINS and import tax for investments in ports, warehousing and surveillance and monitoring systems
- Reduction of employer social security contribution in some industries, such as hospitality information technology and air and sea transportation: a contribution of 1.5% to 2% of gross income replaces the contribution as a percentage of payroll

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest %	Royalties (k) %
Argentina	0	15 (d)	15 (n)
Austria	0	15 (d)	15 (b)(l)
Belgium	0	15 (a)(d)	15 (c)(m)
Canada	0	15 (a)(d)	15 (l)
Chile	0	15	15
China	0	15 (d)	15 (l)
Czechoslovakia (h)	0	15 (d)(f)	15 (l)
Denmark	0	15 (d)	15 (l)
Ecuador	0	15 (d)	15 (l)
Finland	0	15 (d)	15 (c)(l)
France	0	15 (a)(d)	15 (c)(l)
Hungary	0	15 (d)(g)	15 (l)
India	0	15 (d)	15 (l)
Israel	0	15 (d)	15 (i)
Italy	0	15 (d)	15 (l)
Japan	0	12.5 (d)	12.5 (e)(l)
Korea (South)	0	15 (a)(d)	10 (l)(p)
Luxembourg	0	15 (a)(d)	15 (l)
Mexico	0	15 (d)	10
Netherlands	0	15 (a)(d)	15 (l)
Norway	0	15 (d)	15 (l)
Peru	0	15 (d)	15
Philippines	0	15 (d)	15 (l)
Portugal	0	15 (d)	15
South Africa	0	15 (d)	10 (p)
Spain	0	15 (d)(f)	10 (o)(p)
Sweden	0	15 (d)	15 (l)
Trinidad and Tobago	0	15 (d)	15
Turkey	0	15 (q)	15 (i)
Ukraine	0	15 (d)	15
Venezuela	0	15 (d)	15
Non-treaty countries	0	15 (j)	15 (j)

(a) The withholding rate is 10% for interest on certain bank loans with a minimum term of seven years.

- (b) The withholding rate is 10% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, excluding cinematographic films and films or tapes for television or radio broadcasting, produced by a resident of a contracting state.
- (c) The withholding rate is 10% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works or for the use of, or the right to use, cinematographic films or television or radio films or tapes produced by a resident of a contracting state.
- (d) Interest paid to the government of the other contracting state, a political subdivision thereof or an agency (including a financial institution) wholly owned by that government or political subdivision is exempt from tax.
- (e) The withholding rate is 15% for royalties with respect to copyrights of cinematographic films and films or tapes for radio or television broadcasting.
- (f) The withholding rate is 10% for interest on certain long-term (at least 10 years) bank loans.
- (g) The withholding rate is 10% for interest on certain long-term (at least eight years) bank loans.
- (h) Brazil is honoring the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
- (i) This rate applies to royalties related to the use of, or the right to use, trademarks. For other royalties, including payments for technical assistance and technical services, the rate is 10%.
- (j) The withholding tax rate may increase to 25% if the recipient is resident in a low-tax jurisdiction or benefits from a privileged tax regime (see Section E).
- (k) The tax treaties do not apply to the CIDE (see footnote [d] to Section A).
- (l) The withholding tax rate is 25% for royalties paid for the use of trademarks.
- (m) The withholding tax rate is 20% for royalties paid for the use of trademarks.
- (n) The treaty does not provide a maximum rate for royalties, but provides that the domestic rate applies.
- (o) The withholding rate is 15% for royalties for the use of, or the right to use, trademarks.
- (p) The withholding tax rate applicable to royalties was reduced as a result of the most favorable clause contained in the protocol to the treaty. This clause provides for a rate reduction if a future treaty establishes a lower rate. Because of the treaty between Brazil and Israel, the withholding tax rate on royalties was reduced to 10% (except for trademark royalties).
- (q) Interest paid from Turkey to the Brazilian government, Central Bank of Brazil or the National Economic and Social Development Bank (BNDES) are exempt from Turkish tax. Interest paid from Brazil to the Turkish government, the Central Bank of the Republic of Turkey (Türkiye Cumhuriyet Merkez Bankası) or the Turkish Bank of Exportation and Importation (Eximbank) are exempt from Brazilian tax.

Brazil has signed a tax treaty with the Russian Federation, but the treaty has not yet been ratified.

## A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

## B. Taxes on corporate income and gains

The BVI Business Companies Act, 2004 (BVI BC Act) entered into force on 1 January 2005. Under the BVI BC Act, companies incorporated under the British Virgin Islands (BVI) Companies Act are exempt from all taxes provided under the BVI Income Tax Ordinance. The BVI BC Act is essentially an amalgamation of the International Business Companies (IBC) Act and the BVI Companies Act, which contained a regime under which all domestic companies incorporated in the BVI were governed. In addition, on 1 January 2007, all International Business Companies on the companies register in the BVI were automatically reregistered under the BVI BC Act and, consequently, the IBC Act was repealed in full.

All Business Companies (BCs) are statutorily exempt from BVI taxes. However, such companies must pay an annual license fee (see Section C). In general, a BC may not transact business with persons resident in the BVI or own interests in real property located in the BVI unless it obtains the relevant trade license from the BVI government. In addition, a BC may not carry on business as a bank, trust company, insurance company or reinsurance company without a license from the BVI Financial Services Commission.

## C. Payroll tax

Payroll tax is imposed on every employer and self-employed person who carries on business in the BVI. The tax rates are 10% for Class 1 employers and 14% for Class 2 employers. The tax is applied to the remuneration paid or deemed to be paid, 8% of which may be reclaimed and paid by the employees or deemed employees. Class 1 employers are those meeting the following conditions:

- Payroll during the financial year that does not exceed USD150,000
- Annual turnover that does not exceed USD300,000
- A total of seven or less employees and deemed employees

All employers not falling within the Class 1 category are deemed to be Class 2 employers.

The first USD10,000 of actual remuneration paid to an employee, deemed employee or self-employed person is exempt from tax.

#### D. Fees and stamp duties

The following table summarizes the fees and stamp duties payable in the BVI.

<b>Nature of fees and duties</b>	<b>Rate</b>
Annual license fees	
BCs incorporated under the BVI BC Act, with authorized share capital of	
Up to USD50,000 or foreign-currency equivalent or authorized to issue up to 50,000 shares	USD350
Exceeding USD50,000 or foreign-currency equivalent or authorized to issue more than 50,000 shares	USD1,100
Restricted Purpose Company	USD5,000
General banking license	USD50,000
Restricted Class I banking license	USD32,000
Restricted Class II banking license	USD32,000
Insurance company license	Up to USD10,000
Class I trust license	USD16,000
Class II trust license	USD14,000
Class III trust license	USD12,000
Restricted Class II trust license	USD1,000 to USD3,000
Restricted Class III trust license	USD500
Stamp duties, on various instruments and transfers of ownership	
Real estate, on higher of consideration or market value	
Sales to belongers (individuals born in the BVI or those granted BVI status and BVI companies that are at least 67% owned by such persons and do not have any non-belongers as directors)	4%
Sales to non-belongers	12%
Other instruments and transfers	0.2% to 5%

#### E. Miscellaneous matters

**Foreign-exchange controls.** The BVI does not have any foreign-exchange control regulations.

**European Union Savings Tax Directive.** As a result of the BVI's status as a British Overseas Territory, it is required to comply with the requirements of the European Union (EU) Savings Tax Directive (the Directive). Banks and other paying agents in the BVI must exchange certain information pertaining to EU residents.

Under the Mutual Legal Assistance (Tax Matters) (Automatic Exchange of Information) Order, 2011, effective from 1 January 2012, the former 35% withholding option under the Directive is no longer applicable because the BVI transitioned to the automatic exchange-of-information option instead of the withholding-tax option under the Directive. This order provides that BVI-based paying agents are no longer subject to the withholding tax option as a means of complying with the Directive. Instead, BVI institutions must disclose the minimum information to the BVI Inland Revenue, which in turn complies with the information-exchange policy under the Directive.

On 24 March 2014, the EU revised the Directive to strengthen the existing rules on exchange of information on savings income. The principal changes to the Directive are the following:

- A look-through approach based on “customer due diligence,” which prevents individuals from circumventing the Directive by using an interposed legal person located in certain non-EU countries
- Enhanced rules aimed at preventing individuals from circumventing the Directive by using an interposed legal person located in an EU member state
- Extending the scope of the Directive to include financial products that have similar characteristics to debt claims
- Inclusion of income obtained through undertakings for collective investment in transferable securities authorized by Directive 85/611/EEC (UCITS)

## **F. Tax treaties**

Although the United Kingdom’s double tax treaties with Japan and Switzerland have been extended to the BVI, these treaties are not used in practice. The BVI has not entered into any other tax treaties. However, the BVI has entered into tax information exchange agreements with Canada, China, Japan and the United States and with 22 European countries including France, Germany, Ireland, the Netherlands and the United Kingdom.

On 28 November 2013, the BVI and the United Kingdom signed an intergovernmental agreement (IGA) to enable the exchange of information for tax purposes, including on an automatic basis.

On 30 June 2014, the BVI and the U.S. Treasury signed and released a Model 1 IGA for the implementation of the US Foreign Account Tax Compliance Act.

## **G. Proposed new tax**

The BVI government has indicated an intention to introduce a compulsory national health care system. The initial proposals indicated that such a system might be funded by a 7.5% tax, split evenly between resident employees and employers. It remains to be seen whether the proposal will be implemented in its current form.

## A. At a glance

Corporate Income Tax Rate (%)	18.5 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	18.5 (a)
Withholding Tax (%) (b)	
Dividends	0
Interest	15
Royalties	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	6

(a) This is the standard rate, effective from 1 January 2014. The rate of petroleum income tax is 55%.

(b) For a listing of withholding taxes, see Section D.

## B. Taxes on corporate income and gains

**Corporate income tax.** Limited companies, regardless of whether they are incorporated overseas or locally or are registered as a branch of a foreign company, are subject to a tax on income accruing in, derived from or received in Brunei Darussalam.

Branches of foreign companies are taxed on their profits arising in Brunei Darussalam at the same rates as corporations.

**Rate of corporate income tax.** Effective from 1 January 2014, the income tax rate is 18.5% for resident and nonresident companies, except for those engaged in petroleum operations. The rate of petroleum income tax is 55%.

The first BND100,000 of chargeable income is taxed at a reduced rate of one quarter of the full rate, while the next BND150,000 is taxed at half the full rate. The balance of chargeable income is taxed at the full rate. For a new company, the first BND100,000

of chargeable income is exempt from tax. This exemption applies for a company's first three consecutive years of assessment.

Certain enterprises and industries may be exempted from taxation if they are considered essential for the development of the country.

**Capital gains.** Capital gains are not taxed. Capital losses are not deductible. However, if assets have been acquired for resale rather than for a company's use, any profit from the sale is regarded as taxable income.

**Administration.** The tax year is the calendar year.

Tax returns must be filed by electronic means.

Corporations must file an annual tax return by 30 June of each year and pay any tax due by the same date. Corporations must also file an Estimated Chargeable Income (ECI) return within three months after their accounting year-end if they are unable to file their annual tax return within this period. Any tax due under an ECI return must be paid by the due date for filing the ECI return. If tax is paid under an ECI return, the tax is adjusted accordingly in the annual tax return. In general, extensions of time are not granted.

**Foreign tax relief.** Foreign income that is not received in Brunei Darussalam is free from tax. Brunei Darussalam has entered into double tax treaties with Bahrain, China, Hong Kong, Indonesia, Japan, Kuwait, Laos, Malaysia, Oman, Pakistan, Singapore, the United Kingdom and Vietnam. Brunei Darussalam has signed double tax treaties with other countries, but these treaties have not yet been ratified. Both resident and nonresident companies may also apply for unilateral relief on income arising from British Commonwealth countries offering reciprocal relief. However, the maximum relief cannot exceed half the Brunei Darussalam rate.

### C. Determination of trading income

**General.** The following sources of income are subject to tax:

- Gains or profits from any trade, business, profession or vocation
- Gains or profits from employment
- Net annual value of land and improvements occupied or used rent-free for residential or enjoyment purposes
- Dividends, interest or discounts
- Pensions, charges or annuities
- Rents, royalties, premiums and any other profits arising from property

In computing taxable income, normal business expenses may be deducted.

Interest expenses are allowed as a deduction only if the loan generating the charge is used for the production of taxable income.

**Provisions.** Provisions for debts are tax-deductible only if they are made against specific bad debts.

**Tax depreciation.** Depreciation charged in the financial accounts is not deductible for tax purposes. Instead, capital allowances (tax depreciation) are permitted.

*Industrial buildings.* An initial allowance of 20% of the qualifying expenditure is given on industrial buildings in the year of expenditure, with a further annual allowance of 4% of qualifying expenditure provided on a straight-line basis until the total expenditure is written off.

*Plant and machinery.* An initial allowance of 40% of the cost of plant or machinery is given on expenditure incurred on or after 1 January 2009, and an annual allowance is given on the declining value of the asset. The rates depend on the type of asset and range from 3% to 25%. Alternatively, a company may choose to write off such expenditure over three years on a straight-line basis. For plant and machinery not exceeding BND2,000 per item, a company may choose to write off such expenditure fully in the year of acquisition subject to an aggregate cap of BND30,000 per year. For computer and office automation equipment, a company may also choose to write off such assets fully in the year of acquisition.

*Mining.* All expenditure incurred in connection with the working of a mine or other source of mineral deposit of a wasting nature is considered qualifying mining expenditure. An initial allowance of 10% of the qualifying expenditure is given in the year of expenditure, with annual depletion allowances deductible over the life of the mine. These are determined by multiplying the residue of the capital expenditure by the greater of 20% and the following fraction:

$$\frac{\text{Output for the year}}{\text{Output for the year plus estimated future output}}$$

*Disposals.* When an asset is sold, scrapped or destroyed, a balancing allowance or charge is made, based on the difference between the disposal price and the depreciated value on disposal. The balancing charge may be deferred if the plant and machinery disposed of are replaced by similar assets.

**Relief for losses.** Losses may be carried forward for up to six years to offset future profits. Continuity of trade or ownership is not required to carry forward losses. Losses in one trade or business may be set off against other sources of income for the same year of assessment.

Unabsorbed capital allowances may be carried forward indefinitely, provided the company continues to carry on the same trade or business.

**Groups of companies.** No special rules or reliefs apply to groups of companies; each company is taxed on its own income as appropriate.

#### **D. Domestic and treaty withholding tax rates**

Brunei Darussalam's domestic tax law imposes withholding tax on various payments made to nonresident persons, which include companies and bodies of persons. A company is considered to be a nonresident company if the control and management of its business are not exercised in Brunei Darussalam. The following are the withholding tax rates.

<b>Type of payment</b>	<b>Rate (%)</b>
Interest, commissions, fees or other payments with respect to loans or indebtedness	15
Royalties or other lump-sum payments for the use of movable properties	10
Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information	10
Technical assistance and service fees	20
Management fees	20
Rent or other payments for the use of movable properties	10
Nonresident directors' remuneration	20

The above withholding tax rates may be reduced under tax treaties. Brunei Darussalam has entered into double tax treaties with Bahrain, China, Hong Kong, Indonesia, Japan, Kuwait, Laos, Malaysia, Oman, Pakistan, Singapore, the United Kingdom and Vietnam.

## A. At a glance

Corporate Income Tax Rate (%)	10
Capital Gains Tax Rate (%)	10
Branch Tax Rate (%)	10
Withholding Tax (%) <sup>(a)</sup>	
Dividends	5 <sup>(b)(c)</sup>
Interest	0/10 <sup>(d)(e)(f)</sup>
Royalties from Patents, Know-how, etc.	0/10 <sup>(d)(e)</sup>
Fees for Technical Services	10 <sup>(e)</sup>
Rent and Payments Under Lease, Franchising and Factoring Agreements Derived from Sources in Bulgaria	10 <sup>(e)</sup>
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) A European Union (EU) or European Economic Area (EEA) recipient of Bulgarian-source income that is subject to withholding tax may claim a deduction for expenses incurred in earning that income by filing an annual corporate income tax return. The return must be filed by 31 December of the year following the year of accrual of the income.
- (b) This tax does not apply to payments to entities that are resident for tax purposes in Bulgaria or EU/EEA countries.
- (c) This rate may be reduced by tax treaties for dividends distributed to entities not resident for tax purposes in EU/EEA countries.
- (d) The zero rate applies to EU associated companies (a minimum holding of 25% of the share capital must be maintained for at least two years).

- (e) This tax applies to payments to nonresidents only and may be reduced in accordance with an applicable tax treaty.
- (f) Interest income on bonds or other debt instruments issued by Bulgarian resident companies on a regulated EU/EEA market is exempt from withholding tax. This exemption is granted to all corporate investors, regardless of their tax residency. Interest income paid to nonresident entities on bonds or other debt instruments is not subject to withholding tax in Bulgaria if all of the following conditions are met:
- The issuer of these bonds or debt instruments is a tax resident of an EU/EEA member state.
  - The purpose for the issuance of the bonds or other debt instruments is that the proceeds will be used for granting a loan to a Bulgarian tax resident company.
  - The bonds or other debt instruments are issued on a regulated market in Bulgaria or another EU/EEA member state.

## B. Taxes on corporate income and gains

**Corporate income tax.** Bulgarian companies are subject to corporate tax on their worldwide income. Bulgarian companies are companies incorporated in Bulgaria. Foreign companies are taxed in Bulgaria on their profits generated from activities conducted through a permanent establishment in the country and on income from Bulgarian sources.

**Rates of corporate tax.** The corporate tax rate is 10%.

A 10% tax is imposed on certain expenses, such as employee-related, in-kind fringe benefits and representation-related expenses, thereby increasing the effective tax rate for companies incurring such expenses (see Section D).

**Capital gains and losses.** Capital gains from disposals of assets, including shares, are subject to tax at the standard corporate tax rate of 10%. No rollover relief is provided. Capital losses are deductible for tax purposes.

Capital gains derived from the sale of shares through the Bulgarian stock market or stock exchanges in EU or EEA countries are exempt from tax. Similarly, losses from sale of shares through such stock exchanges are not deductible for tax purposes.

**Administration.** The tax year is the calendar year. Annual tax returns must be filed by 31 March of the year following the tax year.

Companies subject to tax must make monthly advance payments of tax. Only persons that have net sales revenue from the preceding year in excess of BGN3 million must make monthly advance payments. Newly established companies and companies with sales of less than BGN300,000 for the preceding tax year are not required to make advance payments. These taxable persons may opt for quarterly advance payments. Companies with sales ranging from BGN300,000 to BGN3 million for the preceding tax year are subject to quarterly advance corporate tax payments. The tax base for the monthly advance payments is one-twelfth of the company's forecasted annual taxable income for the tax year. The tax base of the quarterly advance payments is one-fourth of the company's forecasted annual taxable income for the tax year. The tax rate for calculating the advance payments is 10%. No quarterly payment is required for the last quarter.

The monthly advance payments for January, February and March are due on 15 April of the current tax year. For the months from

April through December, the monthly advance payments are due on the 15th day of the respective month. The quarterly advance payments for the first and second quarters are due on the 15th day after the end of the respective quarter. For the third quarter, the advance payment is due on 15 December. Companies must pay the corporate tax due for the tax year, less the advance installments, by 31 March of the following year.

The tax on certain expenses (see Section D) is payable on an annual basis by 31 March of the following year.

**Dividends.** A 5% withholding tax is imposed on dividends paid by Bulgarian companies to companies resident for tax purposes in non-EU/EEA countries, as well as on hidden profit distributions to residents of EU/EEA countries.

Remittances of profits by branches to their home countries are not subject to withholding tax.

**Foreign tax relief.** Bulgarian companies are entitled to a tax credit for identical or similar foreign taxes imposed abroad. The tax credit is limited to the amount of the Bulgarian tax that would have been paid in Bulgaria on the income subject to the foreign tax. In addition, a per-country limitation applies. Bulgarian tax treaties normally provide an exemption from Bulgarian taxation for income from foreign real estate and foreign permanent establishments.

### C. Determination of taxable income

**General.** Taxable income is based on annual accounts prepared in accordance with International Financial Reporting Standards (IFRS) or, for small and medium-sized enterprises, Bulgarian accounting standards. However, taxable income does not equal the profit shown in the accounts, because certain adjustments to expenses are required for tax purposes with respect to items, such as accrual for bonuses, unused leave, depreciation and impairment of assets.

The write-down of assets as a result of impairment is not deductible for tax purposes. The loss is deductible on realization.

**Inventories.** All cost methods that are applicable under IFRS may be used for tax purposes. For manufacturing entities, the quantity of raw material exceeding the usual quantity of raw materials required for the production of a particular unit is treated as avoidance of taxation and is subject to adjustment for tax purposes.

**Provisions.** Impairments and write-offs of receivables are not deductible for tax purposes until their materialization or the expiration of the five-year statute of limitation to pursue the claim at court. Provisions for payables are not deductible for tax purposes until their materialization.

**Tax depreciation.** Tax depreciation of fixed assets is determined using the straight-line method. The law provides the following tax depreciation rates for categories of assets.

Category	Assets	Rate (%)
1	Buildings, facilities, communication devices, electricity carriers and communication lines	4
2	Machines, manufacturing equipment and other equipment	30 (a)
3	Transportation vehicles, excluding automobiles, road coverings and aircraft runways	10
4	Computers, software and the right to use software, and mobile phones	50
5	Automobiles	25
6	Intangibles and other tangible assets that are legally protected for a limited time period	– (b)
7	Other tangible assets	15

(a) The rate may increase to as high as 50% for new machines for investment purposes.

(b) The depreciation rate is determined by dividing 100 by the number of years of the legal restriction. The maximum rate is 33⅓%.

The Corporate Income Taxation Act contains measures requiring companies to prepare tax depreciation plans.

Goodwill arising from business combinations is not treated as a depreciable asset for tax purposes.

**Relief for losses.** Tax losses may be carried forward for five years. Losses may not be carried back.

**Groups of companies.** Bulgarian law does not include measures for filing consolidated returns or relieving losses within a group.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on all domestic supplies of goods and services, imports and intra-EU acquisitions in Bulgaria	20
Tax on expenses; imposed on payers of fringe benefits, representation-related expenses and car expenses for management purposes; amount is not further subject to tax in the hands of the recipient	10
Real estate property tax; rate varies by municipality	0.01 to 0.45
Real estate transfer tax; rate varies by municipality	0.1 to 3

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Bulgarian currency is the leva (BGN). The exchange rate of the leva against the euro (EUR) is fixed at BGN1.95583 = EUR1.

Bulgaria does not impose foreign-exchange controls. However, some reporting requirements exist.

Each business transaction between local and foreign persons that involves financial credits or direct investment of a local company or sole proprietor abroad, must be declared for statistical purposes to the Bulgarian National Bank (BNB) within 15 days after the date of the transaction.

Under the act, bank payments of up to BGN25,000 may be made freely after the payer declares the purpose of the payments. For payments over BGN25,000, certain requirements must be satisfied, including the submission of certain documents to the bank.

The act does not restrict the amount of foreign currency that may be purchased or imported into Bulgaria. Bulgarian and foreign individuals may export foreign currency of up to the equivalent of EUR10,000 without filing a declaration. The individual must file a declaration for exports exceeding EUR10,000. For exports of cash exceeding EUR25,000 or the equivalent in another currency, the individual must provide to the customs authorities a certificate from the tax authorities stating that he or she has no outstanding tax liabilities.

**Debt-to-equity rules.** Thin-capitalization provisions regulate the deductibility of interest expenses related to certain transactions such as the following:

- Loans from related and unrelated parties
- Financial leases entered into with related parties
- Bank loans obtained from related parties or guaranteed by related parties

If the total amount of debt of a company exceeds three times the company's equity, the thin-capitalization restrictions on tax deductibility are triggered. The tax deductibility for the net amount of the interest expenses subject to the thin-capitalization provisions (after deduction of any interest income) is limited to 75% of Earnings Before Interest and Tax (EBIT). If the financial result before taking into account the interest expense is a loss, the entire amount of the interest expense is nondeductible.

The add-back under the Bulgarian thin-capitalization rules may be a timing difference because the thin-capitalization rules allow for a five-year carryforward of disallowed interest expenses, subject to the application of the limitations described above.

**Hidden distributions of profit.** Adjustments to taxable income as a result of violations of the arm's-length principle are treated as hidden distributions of profit. Hidden distributions are treated like dividends and are accordingly subject to 5% withholding tax. In addition, an administrative sanction in the amount of 20% of the distributed amount is imposed. However, voluntary disclosure of hidden-profit distributions in the annual corporate income tax return relieves taxpayers of the aforementioned administrative penalty. The definition of hidden profit distribution has been amended to include amounts not related to the business activity or exceeding the customary market levels for both expenses accrued and for amounts paid or distributed in any form in favor of shareholders, partners or persons related to them, excluding dividends.

**F. Treaty withholding tax rates**

The rates of withholding tax in Bulgaria's tax treaties are described in the following table.

	<b>Dividends (y)</b> %	<b>Interest (ss)</b> %	<b>Royalties</b> %
Albania	5/15 (h)	10	10
Algeria	10	10	10
Armenia	5/10 (m)	5/10 (ll)	5/10 (mm)

- (a) The 7% rate applies to royalties for the right to use industrial, commercial and scientific equipment; the 10% rate applies to other royalties.
- (b) The 5% rate applies if the beneficial owner is a company, other than a partnership, holding directly more than 25% of the capital of the payer.
- (c) This rate applies to dividends paid from Finland to Bulgaria. The treaty does not provide a withholding rate for dividends paid from Bulgaria to Finland.
- (d) The 5% rate applies to royalties for specified types of intellectual property. The rate for other royalties is 0%.
- (e) The 5% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds directly at least 15% of the capital of the payer; the 15% rate applies to other dividends.
- (f) The 10% rate applies if the recipient is a legal person owning at least 25% of the voting shares of the payer for at least six months before the end of the accounting period for which the distribution of profits is made. The 15% rate applies to other dividends.
- (g) The rate is 0% for dividends paid from Bulgaria to Malta. For dividends paid from Malta to Bulgaria, the withholding tax is the lower of 30% of the gross dividend or the tax imposed on the profits out of which the dividends are paid.
- (h) The 5% rate applies if the recipient is a company owning directly at least 25% of the capital of the payer; the 15% rate applies to other dividends.
- (i) The 5% rate applies if the recipient is a company, other than a general partnership, owning directly at least 25% of the payer. The 15% rate applies to other dividends.
- (j) The 5% rate applies if the recipient is a company that is the beneficial owner of the dividends and holds at least 15% of the capital of the payer. The 10% rate applies to other dividends.
- (k) The 10% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer. The 20% rate applies to other dividends.
- (l) The 10% rate applies if the beneficial owner of the dividends is a company that holds more than 25% of the capital of the payer. The 15% rate applies to other dividends.
- (m) The 5% rate applies if the beneficial owner of the dividends has invested at least USD100,000 or an equivalent amount in another currency in the capital of the payer. The 10% rate applies to other dividends.
- (n) The rate of 10% applies to dividends paid by a Canadian investment company, of which at least 10% of the voting shares are controlled directly or indirectly by a foreign company. The 15% rate applies to other dividends.
- (o) The 10% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds at least 25% of the payer. The 15% rate applies to other dividends.
- (p) The 5% rate applies if the beneficial owner of the dividends is a company, other than a partnership, holding directly at least 25% of the payer. The 15% rate applies to other dividends.

- (q) The 7% rate applies if the beneficial owner of the dividends is a company, other than a partnership, holding directly at least 15% of the capital of the payer. The 10% rate applies to other dividends.
- (r) The 5% rate applies if the recipient is a company owning directly at least 25% of the payer. The 10% rate applies to other dividends.
- (s) The 10% rate applies to interest paid to financial institutions, including insurance companies. The 15% rate applies to other interest payments.
- (t) The 5% rate applies to royalties received for the use of, or the right to use, copyrights. The 15% rate applies to other royalties.
- (u) The 5% rate applies to interest on loans from banks or financial institutions. The 10% rate applies to other interest payments.
- (v) The 0% rate applies if the beneficial owner is a company, other than a partnership, holding directly more than 25% of the capital of the payer.
- (w) The 7% rate applies to royalties received for the use of, or the right to use, copyrights, patents, logos, models, plans, secret formulas or processes. The 5% rate applies to other royalties.
- (x) The 5% rate applies to royalties received for the use of, or the right to use, copyrights (except for cinematographic movies), or scientific, commercial or industrial equipment. The 10% rate applies to other royalties.
- (y) A 0% rate applies to dividends paid to entities from EU countries if certain conditions are satisfied.
- (z) The 5% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of cultural, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television) and to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (aa) The 0% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds at least 10% of the payer. The 10% rate applies to other dividends.
- (bb) The 5% rate applies if the beneficial owner is a company that owns directly at least 10% of the voting stock of the company paying the dividends. The 0% rate applies if the beneficial owner is a pension fund resident for tax purposes in the United States. Other conditions must also be observed.
- (cc) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is an institution wholly owned by the state.
  - The beneficial owner is a financial institution, provided the interest is not paid with respect to a back-to-back loan.
  - The beneficial owner is a pension fund, provided that the interest is not derived from the carrying on of a business, directly or indirectly, by such pension fund.
  - The interest concerns debt claims guaranteed, insured or financed by the state.
- The 10% rate applies to the following payments:
- Contingent interest arising in the United States that does not qualify as portfolio interest under US law
  - Interest arising in Bulgaria that is determined with reference to receipts, sales, income, profits or other cash flow of the debtor or a related person, to a change in the value of any property of the debtor or a related person or to a dividend, partnership distribution or similar payment made by the debtor or a related person
- The 5% rate applies to other cases.
- (dd) The 0% rate applies if either of the following applies:
- The payer or the recipient of the interest is the government, an administrative territorial subdivision or a local authority thereof, the national bank of either contracting state, the state or the State Oil Fund of Azerbaijan.
  - The interest is paid with respect to a loan guaranteed by any of the institutions mentioned in the first bullet.
- The 7% rate applies to other cases.
- (ee) The 5% rate applies to royalties received for the use of patents, designs or models, plans, secret formulas or processes, or for information, regarding industrial, commercial and scientific experience (know-how). The 10% rate applies in all other cases.
- (ff) The 0% rate applies if the beneficial owner of the dividends is a company holding directly at least 10% of the capital of the payer. The 5% rate applies in all other cases.
- (gg) The 0% rate applies if any of the following circumstances exists:
- The interest is paid to the government, local authority or the central bank of a contracting state.
  - The interest is paid on a loan granted, insured or guaranteed by any of the institutions mentioned in the first bullet.

- The interest is paid with respect to the sale on credit of industrial, commercial or scientific equipment.
  - The interest is paid on a loan granted by a bank.
- (hh) The 0% rate applies to interest originating from one of the contracting states that is paid to the government or the central bank of the other state.
- (ii) The 0% rate applies if the beneficial owner of the income derived from one of the contracting states is any of the following:
- The other state or a political subdivision, local government, local authority or the central bank of the other state
  - The Abu Dhabi Investment Authority, Abu Dhabi Investment Council, International Petroleum Investment Company or any other institution created by the government, a political subdivision, a local authority or a local government of the other state, which is recognized as an integral part of the government, as agreed in an exchange of letters between the competent authorities of the contracting states
- (jj) The 0% rate applies to income originating from one of the contracting states that is paid to any of the following:
- The other state, a political subdivision, a local government, a local authority or the central bank of the other state
  - The Abu Dhabi Investment Authority, Dubai Investment Office, International Petroleum Investment Company, Abu Dhabi Investment Council or any other institution created by the government, a political subdivision, a local authority or a local government of the other state, which is recognized as an integral part of the government, as agreed through the exchange of letters between the competent authorities of the contracting states
- (kk) The 0% rate applies if any of the following circumstances exists:
- The interest is paid with respect to the sale on credit of industrial, commercial or scientific equipment.
  - The interest is paid with respect to the sale on credit of goods or merchandise delivered by an enterprise to another enterprise.
  - The interest is paid on a loan, not represented by bearer shares, granted by a financial institution or by the government.
- (ll) The 5% rate applies to interest paid on loans granted by banks or financial institutions.
- (mm) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.
- (nn) The 0% rate applies to dividends paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.
- (oo) The 0% rate applies to royalties paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.
- (pp) The 0% rate applies as long as the Netherlands' tax laws do not levy a tax at source on royalties.
- (qq) The 5% rate applies if the recipient of the income owns at least 10% of the capital of the company paying the dividends.
- (rr) The 0% rate applies to interest paid on the following loans:
- Loans granted or guaranteed by the Bulgarian government or municipal and state institutions
  - Loans guaranteed by Germany with respect to exports or foreign direct investment or granted by the government of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Investitions- und Entwicklungsgesellschaft
  - Loans related to the sale on credit of equipment and merchandise
  - Loans granted by banks
- (ss) A 0% rate (unless explicitly indicated otherwise in the table) broadly applies to interest paid to governments, statutory bodies or central banks. Under certain treaties, it may also extend to other financial institutions and/or local authorities, subject to explicit reference in the respective double tax treaty.
- (tt) A 0% rate applies to dividends distributed to Austrian companies. A 5% rate applies to distributions to partnerships and in all other cases.
- (uu) A 0% rate applies to interest paid on the following loans:
- Loans granted by banks
  - Loans granted to the government of Austria or to the government of Bulgaria
  - Loans granted, insured or guaranteed by the Oesterreichische Kontrollbank AG or any comparable Bulgarian institution for purposes of promoting exports
  - Loans granted in connection with the sale on credit of industrial, commercial or scientific equipment.
- A 5% rate applies in all other cases.

- (vv) A 5% rate applies to royalties.
- (ww) The 0% rate applies to interest paid on loans granted by the Bulgarian National Bank, the Qatar Central Bank, the Qatar Investment Fund, the capital pension authority of Qatar, administrative authorities, the Qatar Development Bank, other financial institutions wholly owned by the government of Qatar and other banks or institutions mutually agreed on by the contracting states.
- (xx) A 0% rate applies to dividends distributed to the following beneficial owners:
- Resident companies holding directly at least 10% of the capital in the company paying the dividend for at least one year before the payment of the dividend
  - Pension schemes
  - The central bank of the other contracting state
- A 10% rate will apply to distributions to partnerships and in all other cases.
- (yy) A 0% rate applies to interest paid on loans granted by the Bulgarian National Bank or, in the case of Uzbekistan, by the Central Bank or the National Bank of the Foreign Economic Activity of the Republic of Uzbekistan, or any other similar financial institution as agreed through an exchange of letters between the competent authorities of the contracting states.
- (zz) A 0% rate applies to interest paid on the following loans:
- Loans related to the sale on credit of equipment, merchandise or services
  - Loans granted by financial institutions
  - Loans granted to pension schemes
  - Loans granted to the government of Bulgaria or the government of Switzerland, a political subdivision or local authority, or the central bank of Bulgaria or Switzerland
  - Loans granted by a company to a company of the other contracting state if such company has directly held 10% of the capital for at least one year before the payment of the interest or if both companies are held by a third company and such company has directly held at least 10% of the capital of the first company and 10% of the capital of the second company, for at least one year before the payment of the interest
- (aaa) The 0% rate applies to interest paid on the following loans:
- Bonds or similar obligations of the government, political subdivisions or local authorities
  - Loans granted by the government or state-owned central banks
  - Loans and credits made, guaranteed or insured by the Export Development Corporation
  - Loans made, guaranteed or insured by the Bulgarian National Bank, the Bulgarian Foreign Trade Bank or other entity as agreed through an exchange of letters between the competent authorities of the contracting states
- (bbb) The 0% rate applies to interest paid on the following loans:
- Loans granted by the government, political subdivisions, local authorities or the central banks
  - Loans and credits extended or endorsed by the Bulgarian Foreign Trade Bank and the Export-Import Bank of India (Exim Bank) to the extent such interest is attributable to financing of exports and imports only, as well as by other institutions in charge of public financing of external trade
  - Loans and credits extended or endorsed by other persons to the extent that the loan or credit is approved by the government
- (ccc) The 15% rate applies to royalties relating to copyrights of literary, artistic or scientific works, other than cinematographic films or films or tapes used for radio or television broadcasting. The 20% rate applies to other royalties and technical service fees.
- (ddd) The 10% rate applies if the beneficial owner held directly 25% of the capital of the paying entity for an uninterrupted period of at least two years before the payment of the dividend.
- (eee) The 0% rate applies to interest paid on the following loans:
- Loans granted by the government, political subdivisions, local authorities or the central banks
  - Loans or credits made or guaranteed by the Export Import Bank of Korea and Korea Development Bank, as well as by the Bulgarian Foreign Trade Bank, or any other institution as agreed through an exchange of letters between the competent authorities of the contracting states
  - Loans related to the sale on credit of industrial, commercial or scientific equipment
- (fff) The existing treaty is being renegotiated.

## A. At a glance

Tax on Profit Rate (%)	20
Capital Gains Tax Rate (%)	20
Withholding Tax (%) (a)	
Dividends	14
Interest	14
Royalties	14
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (b)

- (a) The listed withholding tax rates apply to payments to nonresident taxpayers. For a listing of withholding taxes applicable to payments to resident taxpayers and further details regarding withholding taxes applicable to nonresident taxpayers, see Section B.
- (b) See Section C.

## B. Taxes on corporate income and gains

**Tax on profit.** Tax on Profit (ToP) is calculated on taxable income inclusive of capital gains and passive income, such as interest, royalties and rent.

The ToP is imposed on the worldwide income of resident taxpayers. It is imposed on the Cambodian-source income of nonresident taxpayers. For companies, resident taxpayers are enterprises organized, managed or having a principal place of business in Cambodia. A company that is not a resident taxpayer and that receives income from a Cambodian source is considered to be a nonresident taxpayer.

**ToP rates.** The standard rate of ToP for legal persons is 20%.

A tax rate of 30% applies to income derived from oil or natural gas production sharing contracts and from the exploitation of natural resources including timber, ore, gold, and precious stones.

A tax rate of 5% is imposed on the gross premium income of insurance companies engaged in the providing of insurance or reinsurance for life, property or other risks.

**Minimum tax.** Minimum tax is a separate annual tax imposed at a rate of 1% of annual turnover inclusive of all taxes, except value-added tax (VAT). If the ToP liability exceeds the amount of the minimum tax, the taxpayer is not liable for the minimum tax.

**Additional Tax on Profit.** Additional Tax on Profit (AToP) is imposed on the distribution of retained earnings to local and overseas shareholders. AToP is payable by the distributing company. The AToP rate varies according to the rate of ToP that was imposed on the retained earnings. The following are the rates of AToP.

Rate of ToP (%)	Amount of AToP
0	Dividend x 20/100
9	Dividend x 11/91
20	0
30	0

**Investment incentives.** A Qualified Investment Project (QIP) registered and approved by the Council for the Development of Cambodia is entitled to the incentives described below.

An exemption from minimum tax and an exemption from the ToP apply for a period that consists of the Trigger Period plus three years plus the Priority Period. The maximum Trigger Period is the first year of profit or the third year after the QIP earns its first revenue, whichever is earlier. The Priority Period, which is specified in the Finance Law and varies by project, may have a duration of up to three years.

QIPs are also eligible for import duty exemption with respect to the importation of production equipment, construction materials, raw materials, intermediate goods and accessories that serve production.

**Capital gains.** All realized gains (including capital gains) are considered to be income. Tax on capital gains is not separately imposed in Cambodia. Capital gains derived from the disposal of fixed assets are treated as ordinary income and generally taxed at the standard ToP rate of 20%.

**Administration.** Resident taxpayers must file annual ToP or minimum tax returns within three months after the end of the tax year.

Resident taxpayers must make monthly prepayments of ToP, which are each equal to 1% of monthly turnover inclusive of all taxes, except VAT. The prepayments must be made by the 15th day of the month following the month in which the tax liability arose. The tax payment can be used to offset the annual ToP or minimum tax liability. Prepayments of ToP are not required during the period of exemption from the ToP.

**Dividends.** Dividends paid to nonresident taxpayers are subject to withholding tax at a rate of 14%.

### Withholding taxes

*Payments to resident taxpayers.* Resident taxpayers carrying on business in Cambodia must withhold tax from payments made to other resident taxpayers at the following rates.

Payment	Rate (%)
Interest paid to recipients other than domestic banks and saving institutions	15
Interest paid on non-fixed term saving accounts by domestic banks or saving institutions	4
Interest paid on fixed-term saving accounts by domestic banks or saving institutions	6
Royalties	15
Rent paid for movable and immovable property	10
Payments to individuals for services, including management, consulting and similar services	15

*Payments to nonresident taxpayers.* Resident taxpayers must withhold tax at a rate of 14% on the following payments to nonresident taxpayers:

- Dividends
- Interest
- Royalties, rent and other income connected with the use of property
- Compensation for management or technical services (not defined)

*Deemed interest.* Interest expense is not deemed by the tax authorities with respect to loans recorded in the enterprise's balance sheet for withholding tax purposes, regardless of whether a record of interest expense appears in the income statement of the enterprise.

In general, the above withholding taxes are considered to be final taxes. However, the withholding tax on rent paid to registered resident taxpayers may be offset against the ToP liability.

If withholding tax is not withheld from the recipient, it is borne by the payer. Accordingly, the withholding tax is not deductible for purposes of the ToP.

*Withholding tax returns and payments.* Resident taxpayers must submit withholding tax returns and remit withholding taxes to the tax authorities by the 15th day of the following month.

**Foreign tax relief.** Cambodia allows a credit against the ToP for foreign taxes paid on foreign-source income if supporting documentation exists.

### C. Determination of trading income

**General.** Taxable profit equals the difference between total income and allowed expenses that are incurred to carry on the business.

Allowable deductions include most expenses incurred in the course of carrying on a business enterprise with certain limitations. These limitations include the following:

- The deduction of charitable contributions to specified organizations is limited to 5% of taxable profit before deducting the amount of the charitable contributions.
- Depreciation is allowed as a deduction in accordance with rates and methods set forth in the tax regulations.
- Deductions for interest are limited to interest income plus 50% of taxable profit excluding interest income and expenses. The disallowed interest may be carried forward to subsequent years and deducted subject to the same limitations (also, see *Special rules for loans*).

Nondeductible expenses include the following:

- Expenses incurred on activities generally considered to be amusement, recreation, entertainment or on the use of any means with respect to such activities
- Losses on direct or indirect sales or exchanges of property between related parties
- Penalties, additional tax and late payment interest imposed for violation of the tax regulations
- Donations, grants or subsidies made to other than specified organizations

*Special rules for loans.* Loans that are interest-free or that have below-market interest rates are allowed. In assessing the taxable income of an enterprise, the tax authorities do not deem a subsidy with respect to a loan without interest or with interest below the market rate.

For above-market-interest loans, limitations are imposed on deductible interest expenses claimed by Cambodian taxpayers. The following are the applicable rules:

- For third-party loans, the interest rate may not exceed 120% of the market rate at the time of borrowing.
- For related-party loans, the interest rate may not exceed the market interest rate at the time of borrowing.

For purposes of the above rules, the market interest rate is the annual market interest rate issued by the General Department of Taxation (GDT), which is based on the average interest rate of at least five major commercial banks. At the time of writing, the market interest rate for 2014 had not yet been issued. The market interest rate issued by the GDT for 2013 was 12%. Interest expense that is higher than the above is adjusted and the excess amount is excluded from the deductible interest expense for tax purposes.

In addition, the annual deductible interest expense is capped at the sum of 50% of the taxpayer's non-interest income and 100% of its interest income for a tax year.

An enterprise is required to notify the GDT no later than 30 days after a loan transaction occurs, and all loan agreements or documentation certifying the loan transaction must be attached to the notification. If the enterprise fails to notify the GDT about a loan transaction or no proper documentation is provided, the loan is considered a loan without supporting documents, and the loan proceeds are included in taxable income subject to the 20% ToP.

**Provisions.** Provisions for losses or expenses that have not occurred are not allowed for tax purposes even if the incurrence of

such losses or expenses is probable. However, domestic banks or savings institutions may establish provisions for bad debts.

**Tax depreciation and amortization.** The tax regulations divide fixed assets into four classes for purposes of depreciation and specify the depreciation methods and rates for the classes. The following are the classes.

Classes	Assets	Method	Rate (%)
1	Building and structures	Straight-line	5
2	Computers, electronic information systems, software and data handling equipment	Declining-balance	50
3	Automobiles, trucks, and office furniture and equipment	Declining-balance	25
4	Other tangible property	Declining-balance	20

A QIP (see Section B) may apply a special depreciation rate of 40% in the year of purchase or in the first year the tangible assets are placed into operation, if later. If the enterprise elects to use the exemption period for the ToP, the special depreciation rate does not apply.

Intangible assets with a limited useful life, such as patents, copyrights, drawings, models, and franchises, can be amortized over their useful life on a straight-line basis. If the life of intangible assets cannot be determined, the assets are amortized using the straight-line method at a rate of 10%.

**Relief for losses.** Losses can be carried forward to offset future taxable profit for the following five years. The carryback of losses is not allowed.

The carryforward of losses is subject to restrictions including continuity of ownership and conducting the same business activities.

**Groups of companies.** Cambodia does not allow consolidated tax filing or provide other group tax relief.

## D. Other significant taxes

**Value-added tax.** Resident taxpayers providing taxable supplies must register for value-added tax (VAT). Taxable supplies include supplies of goods or services by taxable persons in Cambodia.

The standard rate of VAT is 10%. A 0% rate of VAT applies to exports of goods and services including international transportation of passengers and goods and services with respect to such transportation. It also applies to enterprises in supporting industries and subcontractors that supply certain goods and services to exporters.

The tax law specifies certain non-taxable supplies.

A resident taxpayer must complete the registration for VAT within 30 days after the date on which it becomes a taxable person. The filing of the VAT returns and payment of VAT must be made by the 20th day of the following month.

**Other taxes.** Cambodia imposed various other taxes, including the following:

- Specific Tax on Certain Merchandises and Service
- Tax for Public Lighting
- Accommodation Tax
- Patent Tax
- Registration Tax (property transfer tax)
- Fiscal Stamp Tax
- Tax on Immovable Property
- Tax on Unused Land
- Tax on Means of Transportation

### **E. Foreign-exchange controls**

The Cambodian currency is the Khmer riel (KHR).

Cambodia does not impose any restrictions on the purchase of foreign currencies through authorized financial institutions.

### **F. Tax treaties**

Cambodia has not entered into any double tax treaties.

## A. At a glance

Corporate Income Tax Rate (%)	33 (a)
Capital Gains Tax Rate (%)	33 (b)
Branch Tax Rate (%)	33 (a)(c)
Withholding Tax (%)	
Dividends	16.5 (d)(e)
Interest	0/16.5 (f)
Royalties from Patents, Know-how, etc.	15
Fees for Technical Services, Digital Services and Professional Activities	15 (g)
Specific Payments to Resident Individuals or Companies	5.5 (h)
Branch Remittance Tax	16.5
Net Operating Losses (Years)	
Carryback	0
Carryforward	4

- (a) The minimum tax is generally 2.2%, 3.3% or 5.5% of turnover. For further details, see Section B.
- (b) In certain circumstances, the tax is deferred or reduced (see Section B).
- (c) An optional final withholding tax is available for petroleum contractors and subcontractors of oil companies (foreign companies in Cameroon that have contracted with petroleum companies established in Cameroon). The rate of this special tax (TSR) is fixed at 15% of turnover. The 2011 Financial Law extended this tax regime to foreign individuals or companies that carry out activities on a casual (day-to-day) basis in Cameroon subject to the prior authorization of the Director General of Taxation, issued on written request of the service providers (companies) or authorized clients. Petroleum subcontractors admitted to the TSR regime must maintain supporting documentation that enables the tracing of the relevant tax bases. They must also display on all of their bills the gross amounts of the transactions, the TSR to be deducted at source, their customers, and the net amount to be paid.
- (d) This withholding tax also applies to directors' fees, nondeductible expenses and adjustments of profits following a tax examination. The withholding tax also applies to allowances granted to members of commissions, ad hoc or permanent committees and to members of public, semipublic, regional or local bodies.
- (e) This withholding tax applies to residents and nonresidents.

- (f) Interest on savings of up to XAF10 million is exempt from withholding tax. Interest on state bonds is exempt from corporate income tax and the tax on movable capital (this tax is withheld at a rate of 16.5% from income on shares and negotiable bonds and from certain other income). The 2014 Financial Law confirms that interest on loans paid to nonresident lenders or creditors is exempt from withholding tax. Special income tax applies to all types of deliveries that are part of public contracts or orders and that are paid for by state, regional or local authorities, public institutions, public corporations or semi-public companies, or that are paid for through external financing. The rate is 15%, which is withheld at source.
- (g) This withholding tax applies to nonresidents. The 2012 Financial Law provides that this tax also applies to “software,” which is defined as computer applications and programs relating to the operation or functioning of an enterprise.
- (h) This withholding tax applies to fees, commissions, emoluments and remuneration for services that are paid to resident individuals or companies. These payments include the following:
- Payments made to persons in the self-employed professions, such as consultants, experts, architects, physicians, auditors in charge of damages, trade intermediaries and salesmen
  - Payments made to magistrates and representatives of the law (attorneys, bailiffs and notaries)
  - Payments made to forwarding agents, customs brokers, stevedores, accounting firms and internet service providers.
- The withholding tax does not apply to payments made for services related to transport, bank interest, insurance premiums and commissions, air ticket expenses and commissions, and water, electricity and telephone expenses. The 10% surtax applies to the withholding tax rate of 5%, resulting in a total withholding tax rate of 5.5%.

## B. Taxes on corporate income and gains

**Corporate income tax.** Income tax in Cameroon is imposed on undertakings deemed to be operating in Cameroon, which are the following:

- Undertakings headquartered in Cameroon or with an effective management office in Cameroon
- Undertakings that have a permanent establishment in Cameroon
- Undertakings that have a dependent representative in Cameroon

The profits of undertakings that do not fulfil the conditions referred to above are taxed in Cameroon if they carry out activities that form a full business cycle in Cameroon.

**Tax rates.** The regular corporate income tax rate is 30% (plus a 10% additional tax council). For companies operating under the real earnings tax regime, the minimum tax payable is 2% (plus 10% additional council tax) of monthly gross sales (turnover). The minimum tax payable is higher for companies under the simplified tax regime (3.3% for non-importing traders, and 5.5% for producers, service providers and importation traders). The minimum tax is creditable against corporate tax due for the current financial year.

Profits realized in Cameroon by branches of foreign companies are presumed to be distributed and are consequently subject to a branch withholding tax of 16.5% on after-tax income. This rate is subject to reduction by treaty.

Deductions at source or advance payments apply to all purchases and importations by traders, including the following:

- Purchases and importations by traders subject to the flat-rate tax system
- Purchases of goods by traders from manufacturers, farmers, importers, wholesalers, retail-wholesalers and forestry operators

- Purchases of petroleum products by petrol station owners
- Purchases of staple products by exporters
- Purchases and importations by enterprises that do not hold the taxpayer's card (non-registered enterprises)

Exceptions to the advance payment rule apply to the following:

- Importation of goods by traders under the Specialized Management Units of the Directorate General of Taxation
- Purchases of goods by the state, councils and persons living abroad
- Purchases by registered industrialists for the operation of their enterprises if they are assessed under the real earnings tax system

The following are the applicable tax rates for advance payments:

- 0.5% for purchases of petroleum products by petrol station owners
- 1% of the amount of operations realized by registered traders under the real earnings tax regime
- 3% of the amount of operations realized by traders that are not importers and non-registered traders, if the traders are under the simplified tax system
- 5% of the amount of operations realized by registered importers that are subject to the simplified tax system
- 10% for transactions carried out by non-registered enterprises and by taxpayers engaging in imports operations, if they are subject to the flat-rate tax

The above rates are added to the sales price or customs value of the goods purchased. The advance payments are calculated without the council surtax of 10%. For companies, advance payments are creditable against their future monthly tax installments or minimum tax.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies depending on the nature of the project and the level of investments.

**Investment incentives.** The law of 18 April 2013 introduced investment incentives, which are summarized below.

*Installation phase.* Incentives that are available during the installation phase (five years after the issuance of the approval) include exemption from registration duties, transfer duties, customs duties and value-added tax for certain items.

*Operational phase.* Incentives available during the operational phase (10 years for all companies qualifying for the incentives) include exemptions or reductions with respect to minimum tax, corporate tax, customs duties on certain items and other specified taxes and fees.

In addition, companies may carry forward losses to the fifth year following the year in which the losses are incurred.

**Capital gains.** Capital gains are taxed at a rate of 16.5%, subject to tax treaties. Capital gains include gains on the sale of real estate, corporate shares and business assets. The tax, however, can be deferred or eliminated in the event of a merger.

Capital gains realized in Cameroon or abroad from the direct or indirect transfer of stocks, bonds and other capital shares of enterprises located in Cameroon are subject to tax.

If the business is totally or partially transferred or discontinued (such as in the event of a merger, liquidation or sale of the business), only one-half of the net capital gains is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased.

Capital gains realized on the Cameroonian stock market are exempt from corporate income tax and the tax on movable capital. However, under the 2014 Financial Law, capital gains realized in Cameroon or abroad that are derived from the sale of shares by an individual or corporate entity holding an exploitation or exploration permit for natural resources extracted from the Cameroonian subsoil are subject to income tax on the gains.

**Administration.** The fiscal year runs from 1 January to 31 December. However, companies that started operating during the six-month period before the prescribed closing date can report their first results at the end of the fiscal year following the fiscal year in which they began activities.

Corporate income tax must be paid by the deadline for filing the tax return. Companies must file their income tax return by 15 March of the year following the fiscal year. The late filing of a nil monthly or annual return or a return with credit after an official warning is subject to a fixed fine of XAF1 million.

Late returns are subject to interest of 1.5% of the tax due per month of delay. In addition, late payments are subject to a penalty of 10% per month of delay, up to a maximum of 30% of the tax due. This penalty applies only if payments are made at the initiative of the taxpayers. It does not apply in the case of a tax audit.

Tax receivables that are at least five years old from the date of issuance of the assessment notices and for which administrative redress procedures have been exhausted may be the subject of a negotiated settlement request a period of one year beginning on 1 January 2015.

The minimum tax is paid in accordance with the same rules applicable to the payment of corporate income tax. Manufacturers, farmers, wholesalers, retail-wholesalers, forestry operators, petrol station owners and exporters must pay to the tax authorities the advance payment of tax on purchases by the 15th day of the month following the month of the purchase (for further details regarding advance payments, see *Tax rates*).

**Dividends.** Dividends paid to residents in Cameroon are subject to a 16.5% withholding tax (15% plus the 10% council surtax). Resident recipients must include the gross dividend in taxable income, but they receive a corresponding 16.5% tax credit to prevent double taxation. Dividends paid to nonresidents are subject to a 16.5% withholding tax, which is a final tax.

A parent corporation may exclude up to 90% of the dividends received from a 25%-owned subsidiary if the parent company and the subsidiary have their registered office in a Central African Economic and Monetary Community (CEMAC) country (Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea

and Gabon). In this case, however, no withholding tax credit is allowed. Instead, the tax can be offset against any withholding tax due on its own dividend distributions.

**Foreign tax relief.** In general, foreign tax credits are not allowed; income of residents and nonresidents subject to foreign tax that is not exempt from Cameroonian tax under the territoriality principle is taxable, net of the foreign tax. The French tax treaty, however, provides a tax credit that corresponds to withholding tax on passive income.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the OHADA (organization for the harmonization of business law in French-speaking Africa) standard statements.

Business expenses are generally deductible unless specifically excluded by law or by the provisions of an international convention. Expenses that are not deductible include the following:

- Head office overhead, research costs and technical, financial and administrative assistance fees paid to residents or nonresidents that exceed any of the following:
  - 5% of taxable profits for ordinary law companies before their deduction
  - 2.5% of turnover for public works projects
  - 7.5% of turnover for design and engineering services
- Royalties from patents, brands, models or designs paid to a non-CEMAC corporation participating directly or indirectly in the management of, or owning shares in, the Cameroonian corporation are the deductible up to an overall limit of 2.5% of taxable income before the deduction of the expenses.
- Rent expense for movable equipment paid to a shareholder that manages the company in fact or by right and holds, directly or indirectly, more than 10% of the capital.
- Losses related to bad debts that do not comply with the enforcement measures provided in the OHADA Uniform Act relating to the organization of simplified procedures for collection and enforcement.
- Liberalities, gifts and subsidies exceeding 0.5% of the turnover of research, philanthropic, development, educational, sports, scientific, social and family institutions or bodies.
- Gifts and subsidies exceeding 5% of turnover of clubs participating in official national competitions and the bodies in charge of organizing these competitions.
- Interest paid to shareholders in excess of the central bank annual rate plus two points. Under the 2014 Financial Law, the deductibility of interest paid to shareholders owning directly or indirectly at least 25% of the capital or voting rights of the company is subject to the following two cumulative conditions:
  - Interest paid may not exceed one and one-half of the amount of real capital for all shareholders.
  - Interest paid to such affiliates may not exceed 25% of the income before income tax and deduction of such interest and depreciation.
- Commissions and brokerage fees for services on behalf of companies located in Cameroon that exceed 5% of purchased imports and sales of exports.

- Remuneration granted to wage earners that are excessive in comparison to the services rendered and that do not correspond to effective work and conventional norms.
- Amounts set aside for self-insurance.
- Certain specific charges (such as contributions other than those for retirement paid to a foreign social security organization, which are deductible up to a limit of 15%, and premium insurance paid to companies located in Cameroon for employees' retirement indemnities), gifts, subsidies and penalties (to some extent).
- Expenses paid in cash of XAF500,000 or more. The XAF500,000 limit is assessed with respect to the total amount of specific expenses recorded in the expenditures account. Accordingly, splitting an expense worth XAF500,000 into two equal parts of XAF250,000 each and paying them in cash does not result in the deductibility of the expenses. Under the 2014 Financial Law, all reimbursements of loan advances to shareholders paid in cash are treated as dividends and are accordingly subject to dividend withholding tax.
- Expenses paid to local suppliers without reference to a Cameroonian tax identification number and without an invoice that complies with the standard requirements for the deductibility of expenses.
- Remuneration paid to liberal professionals in violation of the regulations governing their respective professions.
- Expenses for services and certain purchases paid to natural persons or nonresident legal entities established in territories or states considered to be tax havens.
- Disbursements from tax havens invoiced to local companies by other companies located in or outside tax havens.

**Inventories.** Inventory is normally valued at the acquisition cost or at the lower of cost or market value. Cost must be determined on a weighted average cost-price method. The first-in, first-out (FIFO) method is also generally acceptable.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Insurance companies may deduct technical provisions provided by the Conférence Interafricaine des Marchés d'Assurance (CIMA) Code.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. Small equipment and other items that have a value not exceeding XAF400,000 without tax are directly accounted for as charges and considered deductible expenses.

**Legal revaluation of fixed assets.** The 2011 Financial Law established a regime for the legal revaluation of tangible and intangible fixed assets, regardless of whether the assets are depreciable. The revaluation must occur by 31 December 2013. The capital gain resulting from revaluation is subject to a withholding tax at

a rate of 5%. This is a final tax. The 5% withholding tax is not due if the amount of the capital gain is reinvested within two financial years.

**Relief for tax losses.** Losses may be carried forward for four years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** The Cameroonian tax law does not provide for the fiscal integration of Cameroonian companies equivalent to a consolidated filing position.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on transactions carried out in Cameroon; certain transactions are exempt	
Standard rate	19.25
Exports	0
Business license; rate varies depending on the amount of turnover	Various
Radio-television tax, equal to the business license; payable by companies subject to the business license	Various
Registration duties, on transfers of real property or businesses	2 to 15
Payroll taxes, paid by employer	2.5
Social security contributions on an employee's annual gross salary, limited annually to XAF3,600,000	
Family allowances, paid by employer	3.7 to 7
Old age, disability and survivor's pension; paid by	
Employer	4.2
Employee	2.8
Social security contributions on an employee's annual gross salary for job-related accidents and diseases; paid by employer	1.75 to 5

#### E. Miscellaneous matters

**Foreign-exchange controls.** Exchange control regulations exist in Cameroon for financial transfers outside the franc zone, which is the monetary zone including France and its former overseas colonies. A CEMAC rule (No. 0200/CEMAC/UMAC/CM, dated 29 April 2000) applies to all of the CEMAC countries.

**Transfer pricing.** In 2012, Article M19 bis in Book II of the General Tax Code on Manual of Tax Procedures was introduced to increase the regulation and control of transfer pricing.

Under the new rules, if in the course of an accounts auditing, the administration has evidence that a company has indirectly transferred profit, the administration may request that the company provide information and documents with respect to certain items, including the following:

- Relationships between the company and one or more companies or groups established outside Cameroon

- The pricing method for industrial, commercial or financial operations in which the company engages with the related parties mentioned in the first bullet and justification for this method and the agreed consideration in these operations
- The activities carried out by the related parties mentioned in the first bullet
- The tax treatment for the company and related parties mentioned in the first bullet with respect to the operations performed with the related parties

The 2014 Financial Law requires “a detailed statement of transactions with companies which control or which are controlled by them up to 25%, in addition to other existing disclosure and documentation requirements.”

Companies in the large taxpayers unit must transmit the following information to the tax authorities by 15 March of each year at the same time of the filing of the annual tax return:

- A statement of their shareholdings in other companies if the holdings exceed 25% of the share capital
- A detailed statement of intergroup transactions

## F. Treaty withholding tax rates

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Canada	15/20 (a)	15/20 (a)	15/20 (a)
Central African Republic	– (c)	16.5 (b)	– (d)
Chad	– (c)	16.5 (b)	– (d)
Congo	– (c)	16.5 (b)	– (d)
Equatorial Guinea	– (c)	16.5 (b)	– (d)
France	15	16.5 (b)	7.5/15 (e)
Gabon	– (c)	16.5 (b)	– (d)
Tunisia	12	15	15
Non-treaty countries	16.5	0 (f)	15

- (a) The 15% rate applies to payments from a Cameroonian source. The 20% rate applies to payments from a Canadian source.
- (b) If from a Cameroonian source, the payments are subject to withholding tax under Cameroonian domestic tax law. See Section A.
- (c) Withholding rates are determined under the domestic tax law of the state of domicile of the payer.
- (d) Withholding tax is not imposed. The income is subject to tax in the state of the recipient.
- (e) The 7.5% rate applies to payments for financial services, accounting services and technical assistance. The 15% rate applies to other royalties.
- (f) See footnote (f) to Section A.

**A. At a glance**

Federal Corporate Income Tax Rate (%)	15 (a)
Federal Capital Gains Tax Rate (%)	7.5 (a)(b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	25 (c)
Interest	0/25 (d)
Royalties from Patents, Know-how, etc.	25 (c)
Branch Remittance Tax	25 (e)
Net Operating Losses (Years)	
Carryback	3
Carryforward	20

- (a) These 2015 rates are applied to general income that is not eligible for the manufacturing and processing deduction or the small business deduction. The calculation of the rate is discussed in Section B. Additional tax is levied by the provinces and territories of Canada, and the combined federal and provincial or territorial rates on general income may vary from approximately 25% to 31%.

- (b) 50% of capital gains is subject to tax.
- (c) Final tax applicable only to nonresidents. This rate may be reduced by a tax treaty (see Section F).
- (d) In general, no withholding tax is imposed on interest paid to payees who are dealing at arm's length with the payer. However, withholding tax at a rate of 25% typically applies to interest paid or credited to related nonresidents (the rate may be reduced by a tax treaty). Other specific exemptions or specific inclusions may apply to change the general rules noted above.
- (e) This tax is imposed in addition to the regular corporate income tax. For details, see Section B. The rate may be reduced by a tax treaty.

## **B. Taxes on corporate income and gains**

**Corporate income tax.** Corporations resident in Canada (whether owned by Canadians or nonresidents) are taxed on their worldwide income from all sources, including income from business or property and net taxable capital gains. Nonresident corporations are taxed only on certain Canadian-source income. In general, a corporation is deemed to be resident in Canada if it is incorporated in Canada or has its central mind and management located there.

If a tax treaty exists between Canada and the country in which a nonresident corporation is resident, the determination of whether a nonresident is taxable in Canada may be restricted or modified, and lower rates may apply. In general, Canada's tax treaties provide that a nonresident that is resident in a treaty country is subject to Canadian tax on income derived from carrying on business in Canada only if the nonresident has a Canadian permanent establishment.

**Rates of income tax.** Corporations are taxed by the federal government and by one or more provinces or territories. The basic rate of federal corporate tax for 2015 is 38%, but it is reduced to 15% by an abatement of 10 percentage points on a corporation's taxable income earned in a province or territory and a general rate reduction of 13 percentage points on a corporation's full-rate taxable income. Provincial and territorial tax rates are added to the federal tax and generally vary between 10% and 16% of taxable income.

The federal government and the provincial and territorial governments may apply lower rates of tax to active small business earnings and earnings derived from manufacturing and processing.

Nonresident corporations carrying on business in Canada through a branch are taxable at the full corporate tax rate on their net business income earned in Canada, and they must pay an additional tax (branch tax) of 25% on after-tax income, subject to an allowance for investment in Canadian property. This branch tax may be reduced by treaty.

**Capital gains and losses.** The taxable portion of capital gains and the deductible portion of capital losses is 50%. See Section E for details concerning the taxation of capital gains of nonresidents.

The deductible portion of capital losses (other than allowable business investment losses) in excess of taxable capital gains is termed "net capital loss" and may be carried back three years and carried forward indefinitely, but may be applied only against taxable capital gains.

Proceeds from the disposition of capital property that exceed the tax cost of such property are generally taxed as capital gains. For

depreciable property, tax depreciation previously claimed that is recovered on disposition is generally fully included in income.

If control of a corporation is acquired by a person or group of persons, net capital losses incurred before the change of control cannot be deducted in a year after the acquisition of control. Also, the carryback of capital losses to years prior to such change of control is prohibited. A flow through of net capital losses is provided for on certain amalgamations and liquidations.

If a sale of what might otherwise be capital property is regarded as a sale in the course of a taxpayer's business (such as dealers in real estate, securities or art) or as an undertaking in the nature of normal trading, any resulting gain or loss is fully taxable or deductible.

**Administration.** A corporation's tax year usually ends on the same date as the financial statement year-end. If an acquisition of control occurs, the corporation is deemed to have a tax year ending immediately before the acquisition of control.

Corporate income tax returns are required to be filed within six months following a corporation's tax year-end. Subject to certain exceptions, nonresident corporations must file a Canadian income tax return if they carry on business in Canada or dispose of taxable Canadian property during the tax year. Nonresident corporations claiming relief from Canadian tax under a tax treaty with another country must disclose detailed information regarding their activities in Canada.

A penalty is levied on returns that are filed late, equal to 5% of the unpaid tax at the required filing date, plus an additional 1% per month (not exceeding 12 months) of such unpaid tax for each month that the return remains unfiled. Repeat offenders may be liable for additional penalties. Nonresident corporations that are required to file Canadian tax returns may be subject to another penalty of up to CAD2,500 even if no tax is payable.

Federal and provincial corporate tax installments must be made monthly during the corporation's tax year. The remaining balance of taxes owed must be paid by the end of the second month following the tax year-end (third month for Canadian-controlled private corporations that carry on an active business and claim a small business deduction).

Interest is charged on late or deficient tax payments based on the prescribed rate. The prescribed rate can vary each quarter. A penalty may apply to late or deficient tax installments.

**Dividends.** In general, dividends received by one Canadian corporation from another are fully deductible. However, to prevent the use of private companies to obtain significant tax deferrals on portfolio dividend income, such corporations are subject to a special 33½% refundable tax on dividends received from portfolio investments. Additional taxes may be imposed on dividends paid on certain preference-type shares.

Dividends paid by a Canadian corporation to a Canadian resident individual are generally taxable, but the individual also receives a tax credit because the income has already been taxed within the corporation. A dividend received from a nonresident corporation

that is a foreign affiliate of a Canadian taxpayer may be exempt from tax (see Section E).

**Foreign tax relief.** In general, taxpayers resident in Canada may deduct from their Canadian tax liability a credit for income or profits tax and for withholding tax paid to another country. The foreign tax credit is calculated separately for foreign business tax and foreign nonbusiness tax on a country-by-country basis.

If a Canadian corporation receives dividends from a foreign affiliate, the normal foreign tax credits are replaced by either a complete or partial deduction for such dividends (see Section E).

### C. Determination of taxable income

**General.** Taxable profits are computed in accordance with generally accepted commercial principles, modified by certain statutory provisions in the Canadian Income Tax Act.

In general, only 50% of meal and entertainment expenses is deductible for income tax purposes.

**Inventories.** For tax purposes, inventories may be valued at the lower of cost or fair market value. The last-in, first-out (LIFO) basis is not permitted for tax purposes, despite its acceptability for accounting purposes in certain instances. Corporations may use a different inventory valuation method for tax purposes than the one used for accounting purposes.

**Provisions.** In general, provisions, such as warranty reserves, are not deductible for income tax purposes. Only actual expenses incurred are tax-deductible.

**Depreciation and amortization.** Depreciation or amortization included in financial statements is added back, and tax depreciation, generally calculated on a declining-balance basis at prescribed rates, beginning when the asset is available for use, is deducted for tax purposes. The deduction is generally limited in the first year the asset is available for use. Tax depreciation may be fully or partially claimed at the taxpayer's option.

The following are the depreciation rates under the declining-balance method for major categories of assets.

Asset	Rate (%)
Commercial and industrial buildings	4 (a)
Computers	55
Office equipment	20
Motor vehicles	30
Machinery and equipment	20 (b)

(a) Certain eligible nonresidential buildings may qualify for a rate of 6% or 10% (election required).

(b) For machinery and equipment used primarily in manufacturing and processing, the rate is generally 30%. A straight-line rate of 50% applies if the machinery and equipment is acquired after 18 March 2007 and before 2016.

Capital assets are generally pooled into various classes, but, in certain cases, a corporation may elect to include individual pieces of certain types of equipment in separate classes. In general, if an asset is disposed of, the balance of the assets in the class is reduced by the proceeds from the disposition. However, if the proceeds from the disposition of an asset exceed the tax value of the

class after depreciation, the excess is recaptured and is subject to tax at the regular corporate tax rates. If the asset is the only asset in the class and if a balance remains after the proceeds are charged to the class, the balance may be deducted as a terminal loss.

**Groups of companies.** Canada does not allow consolidated tax reporting for related companies and does not provide relief for group losses.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST), a value-added tax, applies to a broad range of goods and services	5
Harmonized Sales Tax, a value-added tax, applies to a broad range of goods and services in certain provinces	Up to 15
Part VI tax on financial institutions, effectively a minimum tax, which is reduced by income taxes paid; applies on a non-consolidated basis to capital in excess of CAD1 billion	1.25
Provincial/territorial income taxes, on taxable income allocated to jurisdictions in which corporations have permanent establishments (lower rates may apply to manufacturing or processing earnings and active small business earnings)	10 to 16
Provincial payroll taxes; varies by province; paid by employers	Up to 4.26
Canada Pension Plan, on pensionable earnings between CAD3,500 and CAD52,500 (amounts in effect for 2014)	
Employer	4.95
Employee	4.95
Self-employed individual	9.9
(The Province of Quebec offers a similar plan for residents of Quebec.)	
Employment insurance, on insurable earnings up to a maximum of CAD48,600 (amount in effect for 2014)	
Employee	1.88
Employer (1.4 times the employee rate)	2.63

#### E. Miscellaneous matters

**Foreign-exchange controls.** Canada does not impose foreign-exchange control restrictions.

**Debt-to-equity rules.** Canada imposes a thin-capitalization rule limiting the ability of nonresidents to withdraw profits through deductible interest charges. In general, these rules restrict the deductibility of interest paid or payable by a Canadian resident corporation to a specified nonresident shareholder (or to a nonresident person who does not deal at arm's length with a specified shareholder) on debts exceeding 1.5 times the Canadian resident corporation's "equity." A specified shareholder is a shareholder

who, either alone or together with persons with whom the shareholder does not deal at arm's length, owns shares that satisfy either of the following conditions:

- They give the shareholder 25% or more of the votes that could be cast at an annual meeting of shareholders.
- They have a fair market value representing 25% or more of the fair market value of all of the issued and outstanding shares of the corporation.

Canada's thin-capitalization rule applies to Canadian resident corporations, trusts, nonresidents' Canadian branches and partnerships of which a Canadian resident corporation is a member.

In October 2014, the federal government tabled a detailed Notice of Ways and Means Motion (NWMM) that contains new rules designed to deal with back-to-back loan arrangements that circumvent the application of the thin-capitalization rule. These new rules, which were enacted into law in December 2014, apply to tax years that begin after 2014.

In general, these new rules apply to arrangements whereby a non-resident corporation (parent), or a person related to the parent, of a corporation resident in Canada (Canco) grants a loan (intermediary debt) or a specified right in a particular property (specified right) to an intermediary and the intermediary debt and/or specified right is "connected to" a debt owed by Canco to the intermediary (primary debt), provided that the amount of the intermediary debt and/or fair market value of the property subject to the specified right is not less than 25% of the amount of the primary debt. When applicable, the new rules deem the primary debt to be a debt between Canco and the parent for thin-capitalization purposes. These new rules also deem interest payments from Canco to the intermediary to be interest payments from Canco to the parent.

**Foreign affiliates.** A nonresident corporation is considered a foreign affiliate of a Canadian corporation if the Canadian corporation directly or indirectly owns at least 1% of any class of shares of the nonresident corporation and if the Canadian corporation and related persons directly or indirectly own together at least 10% of any class of shares of that nonresident corporation. Dividends received by a Canadian corporation from a foreign affiliate are fully deductible in Canada if the dividends are derived from active business profits earned in a country with which Canada has entered into a tax treaty or a Tax Information Exchange Agreement (TIEA). Dividends are taxable in Canada if they are derived from passive operations (with certain exceptions) or any operations in a non-treaty or non-TIEA country, with relief for foreign tax on such income.

**Foreign affiliate dumping rules.** In 2012, the federal government introduced a set of rules aimed at "surplus stripping." These new rules, commonly known as the "foreign affiliate dumping (FAD) rules," have been enacted. The FAD rules broadly apply to certain investments in foreign affiliates. They apply to an "investment" in a nonresident corporation (subject corporation) by a corporation resident in Canada (CRIC) if the following two conditions are met:

- The subject corporation must be a foreign affiliate of the CRIC immediately after the investment is made.

- The CRIC must be controlled by a nonresident corporation (parent) at the time the investment is made.

The concept of “investment” is broadly defined and includes equity and debt investments in foreign affiliates, as well as the acquisition of shares of another corporation resident in Canada if the fair market value of all of the foreign shares owned directly or indirectly by the Canadian corporation comprises more than 75% of the total fair market value of all the properties owned by the Canadian corporation.

If applicable, the FAD rules deem dividends to have been paid to the parent by the CRIC or will cause the paid-up capital (PUC) of the shares of the CRIC to be reduced. The rules also contain certain provisions to reduce PUC instead of triggering a deemed dividend, as well as a PUC reinstatement rule if the shares of the subject corporation (or substituted property) are later distributed (or sold) by the CRIC.

Certain exemptions limit the application of the FAD rules. For example, the rules do not apply if, broadly speaking, the business activities of the CRIC are more “closely connected” to the subject corporation than the business activities carried on by any related nonresident corporation, and if officers of the CRIC have and exercise the principal decision-making authority with respect to the investment. In addition, for the exception to apply, additional conditions need to be met regarding the officers of the CRIC. In particular, these conditions require that the officers be residents of Canada and that they work principally in Canada. In addition, the rules do not apply to certain internal reorganizations. The rules also do not apply if the debt owed by the foreign affiliate is a pertinent loan or indebtedness (PLOI). To qualify as a PLOI, the CRIC and the parent need to jointly elect to treat the debt obligation as a PLOI. In addition, the PLOI needs to generate a minimum amount of income for the CRIC in Canada (namely, interest computed based on the current government of Canada three-month Treasury bill rate plus 4%).

The October 2014 NWMM also includes rules that amend certain aspects of the FAD rules. The rules make the following changes, among others:

- It modifies various aspects of the rules that determine whether and when the application of the FAD rules would be triggered if an investment is made before the relevant corporation resident in Canada is controlled by a nonresident corporation, or after it ceases to be controlled by a nonresident corporation.
- It modifies the application of the PUC reinstatement rules in various technical respects, including the introduction of an automatic PUC reinstatement for circumstances in which offending investments are disposed of but the proceeds of disposition are reinvested rather than distributed.

The various changes contemplated in the October 2014 NVMM were enacted into law in December 2014.

In view of the complex nature of the new rules, taxpayers are advised to reach out to their tax advisor to determine whether they could be affected by these new rules.

**Passive income of controlled foreign affiliates.** Any Canadian taxpayer that controls (as defined) a foreign affiliate is taxed on its share of that entity's passive investment income (with certain exceptions) in the year such income is earned, regardless of whether such income is currently paid to the shareholder, except in certain specified circumstances. In addition, any taxpayer is taxed on its shares of any other type of income if the income is earned through a permanent establishment located in a non-treaty or non-TIEA country (except a country with which Canada has entered into negotiations for a TIEA or has sought to enter into such negotiations within the last 60 months).

**Upstream loans from foreign affiliates.** New rules dealing with upstream loans from foreign affiliates were enacted on 26 June 2013. These new rules are essentially anti-avoidance measures that are intended to prevent taxpayers from making synthetic dividend distributions from foreign affiliates to avoid what would otherwise be an income inclusion in Canada that would not be fully offset by a corresponding dividends-received deduction as described in *Foreign affiliates*.

The rules have a very broad application. In general, Canadian taxpayers may be required to include in their income a portion of the principal amount (referred to as the "specified amount") of loans made to them by their foreign affiliates. In addition, Canadian taxpayers may be required to include in their income a portion of the principal amount of loans made by their foreign affiliates to certain non-arm's-length persons (other than controlled foreign affiliates that are effectively Canadian controlled). If loans are made to other foreign affiliates, taxpayers may be required to include in their income the portion of such loans to the extent that the taxpayer's surplus entitlement percentage (SEP) in the creditor affiliate exceeds its SEP in the borrowing affiliate. Accordingly, a loan from one foreign affiliate to another foreign affiliate that is not a Canadian controlled foreign affiliate results in an income inclusion only to the extent that the taxpayer has a lower SEP in the borrowing affiliate than in the creditor affiliate.

Similar to the domestic shareholder loan rule, exceptions exist for indebtedness repaid within two years after the date on which the indebtedness arose, provided that the repayment is not part of a series of loans or other transactions and repayments, and for indebtedness arising in the ordinary course of business of the creditor. The new rules contain further transitional relief with respect to indebtedness that existed before 19 August 2011, which essentially extends the effective date of the rules with respect to such indebtedness to 19 August 2016 (because any 19 August 2011 indebtedness still outstanding at 19 August 2014 is deemed to have arisen on 19 August 2014, thereby extending the two-year period to 19 August 2016).

The income inclusion arising under the new upstream loan rule may essentially be offset in whole or in part by a deduction if the taxpayer demonstrates that a hypothetical dividend paid the year the loan is made would have enjoyed a full deduction from the income of the Canadian taxpayer with respect to the exempt surplus and/or taxable (and hybrid) surplus of a foreign affiliate of the taxpayer. In addition, the rules provide for a deduction equal to amounts previously included in income in the year that the loan

is eventually repaid. The new rules also extend the application of the reserve mechanism in certain circumstances to include a deduction for pre-acquisition surplus dividends (essentially equivalent to returns of tax basis), but only to the extent of the taxpayer's Canadian tax basis in the shares of the top-tier foreign affiliate. However, this particular deduction is not available if the borrower under the relevant loan is a nonresident person with whom the taxpayer does not deal at arm's length, which for example, includes a foreign parent or sister company. As a result, this deduction is normally only available regarding upstream loans from the foreign affiliate to the Canadian taxpayer.

**Cross-border cash redeployment and pooling using PLOI.** As noted in *Foreign affiliate dumping rules*, the FAD rules include an elective exception for certain foreign affiliate indebtedness (PLOI). Under a corresponding amendment to the shareholder loan rules, loans will be allowed to be made without triggering deemed dividends and withholding taxes, if they result in interest income inclusions at the higher of the prescribed rate (the prescribed rate for PLOI is equal to the three-month government of Canada treasury bill rate plus 4%) and essentially, any funding costs incurred by the CRIC to make the loan. The rules are relevant to all CRICs that are part of a foreign-based multinational group, not only to CRICs having foreign affiliates. In many cases, these proposals should facilitate commercially efficient and tax-neutral cross-border redeployments and pooling of cash among members of foreign-based multinational groups that include CRICs.

**Back-to-back loan rules and interest payments.** In February 2014, the federal government introduced draft legislation aimed at back-to-back loan arrangements that reduce the amount of withholding tax payable on interest payments made to nonresidents. A final version of these rules was included in the October 2014 NWMM, which was enacted into law in December 2014. These new rules closely resemble the back-to-back rules described in *Debt-to-equity rules* and apply to interest payments made after 2014.

In general, these new rules will apply to interest payments between a person resident in Canada (Canco) and an intermediary if the following conditions are met:

- A nonresident (parent) grants a loan (intermediary debt) or a specified right with respect to a particular property (specified right) to the intermediary.
- The intermediary debt or specified right is “connected to” an outstanding debt owed by Canco.
- The amount of intermediary debt and/or fair market value of the property subject to the specified right is not less than 25% of the amount of primary debt.
- The amount of withholding tax payable by Canco is less than the amount of withholding tax that would have been payable had the interest payment been made to the parent rather than the intermediary.

If the above conditions are met, the new rules will generally deem the interest payments to have been made to the parent rather than to the intermediary. In addition, specific rules will apply for determining the amount of interest deemed to have been paid to the parent.

**Corporate reorganizations.** In general, transactions between related corporations must be recognized at fair market value. However, some common types of domestic and foreign corporate reorganizations may be accomplished with little or no immediate Canadian tax cost.

**Anti-avoidance legislation.** The Canada Revenue Agency (CRA) may apply a general anti-avoidance rule to challenge transactions that it perceives to be abusive. This rule does not apply to a transaction that may reasonably be considered to have been undertaken or arranged primarily for bona fide purposes other than to obtain a tax benefit. The application of the rule may cause certain transactions to be ignored or recharacterized.

**Transfer pricing.** Under Canada's transfer-pricing rules, acceptable transfer-pricing methods are those recommended by the Organisation for Economic Co-operation and Development (OECD). These methods include comparable uncontrolled price, resale price and cost-plus. Other methods may be used if the result obtained is similar to the result that would be obtained from an arm's-length transaction. It is possible to enter into advance-pricing agreements with the CRA.

**Acquisition of control considerations.** If control of a corporation has been acquired, the target corporation is deemed to have a year-end immediately before the acquisition of control. A new tax year begins immediately thereafter, and a new year-end may be selected by the target corporation. If an acquisition of control occurs, special rules apply to the determination and treatment of capital losses, business losses, and certain tax attributes with respect to foreign affiliates.

**Capital gains realized by nonresidents.** Subject to applicable tax treaties, nonresidents must pay Canadian tax on their net taxable capital gains derived from the disposition of "taxable Canadian property" (TCP). Such property includes, but is not limited to, the following:

- Real property located in Canada
- Shares of private corporations, interests in partnerships or interests in trusts that, within the preceding 60 months, derived their value principally from real or immovable property located in Canada
- Canadian resource property and timber resource property, or interests in such properties
- Shares of Canadian public corporations (in limited circumstances)
- Property used in a business carried on by the nonresident in Canada

The above definition of TCP applies for determination of TCP status after 4 March 2010.

A nonresident vendor of TCP (other than property that qualifies as excluded property) must obtain a tax clearance certificate from the CRA. To obtain such certificate, the nonresident vendor must provide the CRA with acceptable security or must pay tax on the disposition at the time of sale. For dispositions of TCP occurring after 2008, excluded property includes, among other items, property that is treaty-protected property of the vendor. In the case of a disposition between a purchaser and a seller not dealing at arm's

length, for treaty-protected property to qualify as excluded property, a notice in a prescribed form must be sent to the CRA.

The purchaser must generally withhold and remit to the Receiver General up to 25% (50% in certain circumstances) of the amount by which the cost to the purchaser of the property (other than excluded property) exceeds the amount stipulated in the CRA clearance certificate on account of the nonresident's potential tax liability resulting from the disposition. In the absence of a clearance certificate, the purchaser must generally withhold and remit 25% of the purchase price (50% in certain circumstances). The withholding and remittance obligation is referred to as the "source deduction." Similar requirements apply for the province of Quebec.

The purchaser remains liable for any source deduction not made in the event it is later determined that the property disposed of does not qualify as excluded property, unless one of the safe harbor rules described below applies. The first safe harbor rule provides that a purchaser is not liable for any source deduction if the purchaser had no reason to believe that the vendor was not resident in Canada after reasonable inquiry. Similarly, a purchaser is not held liable for any source deduction if the property (disposed of after 2008) is acquired from a nonresident vendor and if all of the following conditions are satisfied:

- After reasonable inquiry, the purchaser concludes that the vendor is a resident of a country with which Canada has a tax treaty.
- The property is treaty-protected property of the vendor under the tax treaty with the particular treaty country.
- The purchaser sends a notice in a prescribed form to the CRA within 30 days after the acquisition, setting out the date of acquisition, the name and address of the nonresident vendor, a description of the property, the amount paid or payable by the purchaser of the property and the name of the particular treaty country.

In addition, the requirement for the nonresident vendor to file a Canadian tax return may be removed. In general, a nonresident vendor is exempt from filing a Canadian tax return with respect to taxable Canadian properties if the following criteria are satisfied:

- No Canadian "corporate income tax" is payable for the tax year.
- The nonresident is not currently liable to pay any Canadian tax with respect to any previous tax year.
- Each TCP that is disposed of during the year is "excluded property," which now includes treaty-protected property in certain circumstances (see above) and property with respect to which the Minister of National Revenue has issued a nonresident clearance certificate.

**Functional currency reporting.** Canada has introduced new rules with respect to functional currency reporting. These new rules are intended to address the concerns of Canadian corporations that are required to use a currency other than the Canadian dollar as their "functional currency" for financial statement reporting purposes and the Canadian dollar for tax purposes.

In general, all Canadian taxpayers are required to use the Canadian dollar as their reporting currency for tax purposes. However, "qualifying corporations" may now elect to determine their

“Canadian tax results” in their “functional currency.” In general, a “qualifying corporation” is a corporation resident in Canada (with some exceptions) that has a “functional currency” and makes an election in prescribed form. For these purposes, the taxpayer’s “functional currency” is defined as the currency of a country other than Canada if the following conditions are satisfied:

- The currency is a “qualifying currency.” A “qualifying currency” includes the US dollar, the euro, the British pound, and the Australian dollar. This is not an exhaustive list. A prescribed currency could also qualify.
- The currency is the primary currency in which the taxpayer maintains its records and books of account for financial reporting purposes.

## **F. Treaty withholding tax rates**

As noted in Section A, in general, Canada’s domestic tax law provides exemptions from Canadian withholding tax on interest paid or credited to arm’s-length nonresident persons, regardless of their country of residence. In addition, withholding tax does not apply to interest that is considered “fully exempt interest,” regardless of the recipient’s relationship to the payer. “Fully exempt interest” generally includes the following:

- Interest paid by a government body or crown corporation
- Interest on a mortgage or hypothecary obligation with respect to real property located outside of Canada (certain conditions apply)
- Interest paid to a prescribed international institution or agency
- Deemed interest amounts pertaining to securities lending arrangements (certain conditions apply)

However, regardless of the above general rules, a 25% withholding tax applies to all “participating debt interest.” “Participating debt interest” is generally interest, other than fully exempt interest, which satisfies either of the following conditions:

- It is paid or payable on an obligation, other than a prescribed obligation, and all or any portion of the interest is contingent or dependent on the use of or production from property in Canada.
- It is computed by reference to revenue, profit, cash flow, commodity price or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of a corporation.

Similarly, withholding tax applies to the following:

- Interest that is not “fully exempt interest” and is paid or payable to a person with whom the payer is not dealing at arm’s length
- Interest with respect to a debt or other obligation to pay an amount to a person with whom the payer is not dealing at arm’s length

The rates in the table below generally reflect the lower of the treaty rate and the rate under domestic tax law for dividends, interest and royalties paid from Canada to residents of various treaty countries. Certain exceptions or conditions may apply, depending on the terms of the particular treaty. The following table includes tax treaties currently in force and tax treaties that are signed but not yet in force.

<b>Residence of recipient</b>	<b>Dividends %</b>	<b>Interest %</b>	<b>Royalties (b)(c) %</b>

Non-treaty countries (k)	25	0	25

- (a) A 0% rate generally applies to royalties relating to computer software.
- (b) The lower rate usually applies to royalties on cultural works or to royalties relating to computer software, patents and know-how.
- (c) Withholding tax of 25% applies if the royalties relate to the use of real or immovable property, including resource property.
- (d) The treaty provides that the lower rate applies to dividends paid to a company that controls directly or indirectly at least 10% of the voting power in the payer. Interest on certain government-assisted debt and certain other categories of interest are exempt from withholding tax.

- (e) Belarus is honoring the USSR treaty, and consequently that treaty continues to be in force with respect to Belarus. Canada has entered into tax treaties with Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, the Russian Federation, Ukraine and Uzbekistan. Canada has signed tax treaties with Azerbaijan and Armenia, but these treaties have not yet been ratified. The withholding rates under these treaties are listed in the above table. Tajikistan and Turkmenistan have announced that they are not honoring the USSR treaty, but negotiations for new treaties with these countries have not yet begun.
- (f) Mortgage interest on Egyptian property is not eligible for reduced rates under the treaty. As a result, the higher rate applies if such interest is not exempt under Canadian domestic law.
- (g) The 0% rate applies to certain copyright royalties and to royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (h) The 5% rate applies to dividends paid to corporate shareholders owning at least 10% of the voting shares of the Canadian company. The 15% rate applies to other dividends.
- (i) The fifth protocol to the 1980 tax treaty between Canada and the United States, which entered into force on 15 December 2008, generally provides for a gradual reduction to the withholding tax rate on interest paid or credited to non-arm's-length US residents. Under the protocol, the following withholding tax rates apply:
- 7% for interest paid during the 2008 calendar year
  - 4% for interest paid during the 2009 calendar year
  - 0% for interest paid after the 2009 calendar year
- The reduced rates retroactively apply for the entire calendar year in which the protocol was ratified (that is, effective for interest paid as early as 1 January 2008). For further information regarding the protocol, see footnote (dddd). Withholding tax is not imposed on interest paid or credited to arm's-length nonresidents after the 2007 calendar year.
- (j) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 20% of the voting power in the payer.
- (k) In general, no withholding tax is imposed on interest paid to payees who are dealing at arm's length with the payer. However, withholding tax at a rate of 25% typically applies to interest paid or credited to related nonresidents (the rate may be reduced by a tax treaty). Other specific exemptions or specific inclusions may apply to change the general rules. In addition, most copyright royalties are exempt from withholding tax.
- (l) The 6% rate applies to royalties paid on cultural works, copyrights, computer software, patents and certain types of information.
- (m) The 5% rate applies if the dividends are paid by a Canadian corporation to a French corporation that controls directly or indirectly at least 10% of the votes of the payer.
- (n) The 5% rate applies to dividends paid to corporations owning at least 10% of the voting shares and capital of the payer. The 15% rate applies to other dividends. A protocol amending the tax treaty between Canada and Switzerland entered into force on 19 December 2011. The protocol provides that no tax will be withheld if a dividend is paid by a resident of a contracting state to a resident of the other contracting state that operates or administers pension or retirement plans for individuals who are resident in that other contracting state and if the dividend is not derived from the carrying on of a trade or a business.
- (o) The general rate is 15%, and payments for the use of, or the right to use, certain industrial, commercial or scientific equipment may qualify for a 10% rate.
- (p) The 0% rate applies to royalties on cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.
- (q) The 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 25% of the capital of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a resident of Denmark and that holds directly or indirectly at least 25% of the capital of the company paying the dividend. The 15% rate applies in all other cases.
- (r) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power of the payer.
- (s) The 5% rate applies if the beneficial owner of the dividends controls at least 70% of the voting power of the payer. The 10% rate applies if the beneficial owner of the dividends controls at least 25% but less than 70% of the voting power of the payer.
- (t) The 10% rate applies if the recipient of the dividends is a company that controls directly or indirectly at least 10% of the voting power of the payer.

- (u) The 10% rate applies if the beneficial owner of the dividends is a corporation that controls directly or indirectly at least 25% of the voting power of the payer.
- (v) The 12.5% rate applies if the recipient is a company that controls directly or indirectly at least 10% of the votes of the payer.
- (w) The 5% rate applies to dividends paid to a resident of Croatia that controls at least 10% of the voting power of the payer or that holds at least 25% of the capital of the payer.
- (x) The 5% rate applies if the beneficial corporate owner of the dividends controls directly at least 25% of the voting power of the payer of the dividends.
- (y) The 0% rate generally applies to royalties for certain cultural works and copyrights. It also applies to royalties for computer software, patents and information concerning industrial, commercial and scientific experience, if the payer and recipient are not associated persons (as defined).
- (z) The 10% rate applies to dividends paid to a company holding at least 25% of the capital of the payer.
- (aa) The 5% rate applies if the recipient of the dividends controls directly or indirectly at least 10% of the voting power of the payer. The 10% rate applies to dividends that are paid by a nonresident-owned investment corporation resident in Canada to a company that is a resident of Hungary and that controls at least 25% of the voting power in the company paying the dividends and the beneficial owner of such dividends. The 15% rate applies to all other cases.
- (bb) The 5% rate applies if the beneficial owner of the dividends is a corporation that controls directly at least 10% of the voting power of the payer or that holds directly at least 25% of the capital of the payer. The 10% rate applies to dividends paid by a nonresident-owned investment corporation resident in Canada to a beneficial owner resident in Sweden that controls directly at least 10% of the voting power, or holds at least 25% of the capital, of the corporation paying the dividends. The 15% rate applies to other dividends.
- (cc) The 0% rate applies to copyright royalties and similar payments with respect to cultural, dramatic, musical or other artistic works.
- (dd) The 5% rate applies to dividends paid to a company that owns at least 25% of the voting shares of the payer for the last six months of the accounting period for which the distribution of profits takes place.
- (ee) The 10% rate applies if the recipient is a company that controls at least 10% of the votes of the payer.
- (ff) The treaty was signed on 29 December 1998, but it is not yet in force. The 5% rate for dividends will apply if the recipient is a company that controls at least 10% of the votes of the payer. The 5% rate for royalties will apply to royalties for certain cultural works, and royalties for certain computer software, patents and know-how if the payer and the payee are not related.
- (gg) The 10% rate applies if the recipient is a company that controls at least 25% of the voting power of the payer directly or indirectly.
- (hh) The 5% rate applies if the recipient is a company that controls at least 10% of the voting power in the payer.
- (ii) The 0% rate generally applies to royalties relating to computer software or patents.
- (jj) The lower rate applies to royalties for certain cultural works, and generally to royalties for computer software, patents and know-how.
- (kk) The 5% rate applies if the beneficial owner of the dividends owns at least 25% of the capital or controls, directly or indirectly, 10% of the voting power of the payer. The 10% rate applies to dividends paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a company (other than a partnership) resident of the Netherlands and that owns at least 25% of the capital of, or controls directly or indirectly at least 10% of the voting power in, the company paying the dividends. The 15% rate applies to other dividends.
- (ll) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer.
- (mm) The 5% rate applies if the recipient is a company that controls directly or indirectly at least 25% of the voting power in the payer.
- (nn) The 10% rate applies if the recipient is a company that controls directly or indirectly at least 10% of the voting power in the payer.
- (oo) The 5% rate applies if the recipient is a company holding directly or indirectly at least 10% of the capital of the payer.
- (pp) The 5% rate for dividends applies if the recipient is a company that controls directly or indirectly at least 10% of the voting power in the payer.
- (qq) The 10% rate applies if the recipient of the dividends is a company that holds directly 25% of the capital of the payer. The 15% rate applies in all other cases.

- (rr) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer. The 15% rate applies in all other cases.
- (ss) The 5% rate applies if the recipient of the dividends is a company that owns at least 10% of the voting shares, or at least 25% of the value of the shares, of the payer.
- (tt) The 5% rate applies if the dividends are paid to a company that controls at least 10% of the voting power in the payer.
- (uu) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that owns directly at least 10% of the voting stock of the payer. The 15% rate applies to other dividends.
- (vv) The 5% rate for dividends applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the payer.
- (ww) Under the fourth protocol to the treaty, which was signed on 21 July 2014 but is not yet in force, interest paid to an arm's-length party is exempt from withholding tax.
- (xx) The 5% rate applies to dividends if the beneficial owner is a company that holds directly at least 10% of the voting power in the company paying the dividends.
- (yy) The 5% rate applies to dividends paid to a company (other than a partnership) that is a beneficial owner and controls directly at least 25% of the voting power in the payer.
- (zz) The 5% rate for dividends applies if the beneficial owner of the dividends is a company that controls at least 25% of the voting power in the payer.
- (aaa) The 10% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment.
- (bbb) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.
- (ccc) This treaty was signed on 14 November 2002, but it has not yet been ratified.
- (ddd) The 5% rate applies to dividends paid to a company that controls at least 10% of the voting power of the payer.
- (eee) The 0% rate applies to royalties pertaining to certain cultural works, computer software, patents or know-how.
- (fff) Payments for the use of computer software, patents and certain know-how are exempt.
- (ggg) The 10% rate applies if the recipient is a company holding directly or indirectly at least 10% of the voting power of the payer.
- (hhh) The 5% rate applies to certain royalties pertaining to certain computer software, patents or know-how.
- (iii) The general withholding tax rate for royalties is 10%. A 5% rate applies to royalties pertaining to certain cultural works, computer software, patents and know-how.
- (jjj) The general withholding tax for royalties is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt.
- (kkk) The general withholding tax rate is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt.
- (lll) The general withholding tax rate for royalties is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt from withholding tax.
- (mmm) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.
- (nnn) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.
- (ooo) The 15% rate applies if the recipient is a company that holds an equity percentage of at least 10% in the payer of the dividends.
- (ppp) The 10% rate applies if the recipient is a company that controls directly or indirectly at least 25% of the voting power in the payer.
- (qqq) The 5% rate applies to royalties with respect to certain cultural works, and to royalties for certain computer software, patents and know-how if the payer and payee are not related.
- (rrr) The general withholding tax for royalties is 10%. Royalties pertaining to certain cultural works and computer software and royalties for information concerning industrial, commercial or scientific experience are exempt.

- (sss) The 3% rate applies to royalties paid for rights to use news. The 5% rate applies to royalties pertaining to certain cultural works. The 10% rate applies to royalties pertaining to patents, trademarks, designs or models, plans, secret formulas and technical assistance.
- (ttt) The general rate for royalties is 15%. The 25% rate applies to royalties pertaining to the use of trademarks.
- (uuu) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the voting power in the payer of the dividends.
- (vvv) The 0% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works, but not including royalties with respect to the following:
- Computer software
  - Motion picture films
  - Works on film or videotape or other means of reproduction for use in connection with television broadcasting
- (www) The 15% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the payer.
- (xxx) The 15% rate applies to dividends paid to a company that owns at least 10% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividend.
- (yyy) The 5% rate applies to royalties pertaining to cultural works.
- (zzz) The 20% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 15% of the voting power in the payer.
- (aaaa) The 20% rate applies to the following:
- Patent royalties
  - Royalties for the use of, or the right to use, trademarks, motion picture films and films or videotapes for use in connection with television
  - Payments for the use of, or the right to use, industrial, commercial, scientific or harbor equipment
- (bbbb) The 7.5% rate applies to fees for technical services.
- (cccc) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly at least 25% of the capital of the payer and if the capital invested by the recipient exceeds USD100,000. The 15% rate applies in all other cases.
- (dddd) On 15 December 2008, the fifth protocol to the 1980 tax treaty between Canada and the United States entered into force. The following are amendments contained in the protocol that affect cross-border payments:
- The withholding tax on cross-border interest payments will be eliminated. The protocol provides that the withholding tax rate on interest payments will be reduced to 0% (phased out over a three-year period with respect to debt between parties that are “related”). For further details, see footnote (i).
  - A “Hybrid Entity Clause” is introduced with respect to income, profits or gains derived through or from certain “fiscally transparent” entities. The protocol can extend treaty relief to income earned through certain “fiscally transparent” entities, such as limited liability corporations and certain other hybrid entities. The protocol may also deny treaty benefits with respect to income derived through or from certain “fiscally transparent” entities.
  - The protocol provides that the existing limitation on benefits (LOB) provisions, which are currently applicable for US tax purposes only, will also become operative for Canadian tax purposes. The comprehensive LOB article, designed to counter “treaty shopping” abuses, is a significant development in the Canadian tax landscape and could operate to deny treaty benefits in many situations in which treaty entitlement had never come under question, including situations in which treaty shopping was not a consideration. Consequently, an analysis is required in each case in which payments are made to an entity that may have non-qualifying US or Canadian owners or owners that are residents of other countries, including in certain circumstances, public companies.
- (eeee) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works.
- (ffff) Tax treaty negotiations with the government of Israel began on 9 January 2012. The treaty is currently being renegotiated.
- (gggg) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies in all other cases.

- (hhhh) The withholding tax rate is 5% for copyright royalties and other similar payments with respect to literary, dramatic or artistic works and royalties for right-to-use patents or know-how. A 10% rate applies to royalties in all other cases.
- (iiii) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly or indirectly at least 25% of the capital of the payer. The 15% rate applies in all other cases.
- (jjjj) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of cultural or artistic works (excluding royalties with respect to motion picture films and royalties with respect to works on film or videotape or other means of reproduction for use in connection with television broadcasting).
- (kkkk) This treaty was signed on 25 March 2010, but it is not yet in force.
- (llll) The 5% rate applies if the recipient of the dividends is a company that owns directly at least 25% of the shares, or controls directly or indirectly 25% of the voting power, of the payer.
- (mmmm) A protocol to the tax treaty between Canada and Switzerland entered into force on 19 December 2011. It provides that interest payments made to a beneficiary in the other contracting state are not subject to withholding tax if the beneficiary is not related to the payer.
- (nnnn) The general withholding tax rate for royalties is 10%. The 5% rate applies to certain royalties pertaining to computer software and information concerning industrial, commercial or scientific experience. The withholding tax rate is 0% for copyright royalties and for similar payments with respect to literary, dramatic or artistic works.
- (oooo) The 15% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the voting power in the payer of the dividends.
- (pppp) The 0% rate applies to royalties pertaining to certain cultural works.
- (qqqq) The last paragraph of the royalties article contains a most-favored nation clause in favor of Canada.
- (rrrr) The 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the voting power of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a company (other than a partnership) resident in Luxembourg and that holds directly or indirectly at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (ssss) Tax treaty negotiations with the government of China began on 6 December 2010. The tax treaty is currently being renegotiated.
- (tttt) Negotiations to update the tax treaty with the United Kingdom began on 1 October 2011. On 21 July 2014, the fourth protocol to the treaty was signed, but it is not yet in force.
- (uuuu) The withholding tax rate for dividends is 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. A 15% rate applies to dividends in all other cases.
- (vvvv) These are the rates under the existing tax treaty between Canada and New Zealand. On 3 May 2012, the countries signed a new tax treaty, but the new treaty is not yet in force. Under the new treaty, the dividend withholding tax rates will be 5% (for holdings of 10% or more of the voting power) and 15%. For interest, the withholding tax rate will be 10%. The withholding tax rates for royalties will be 5% and 10%.
- (wwww) These are the rates under a new tax treaty between Canada and Serbia, which was signed on 27 April 2012, and entered into force on 31 October 2013.
- (xxxx) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer. A 15% rate applies to other dividends.
- (yyyy) Interest on certain government or government-assisted debt is exempt from withholding tax.
- (zzzz) This treaty entered into force on 29 October 2013.

### A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0

### B. Taxes on corporate income and gains

The Cayman Islands does not impose taxes on income, profits, wealth or capital gains.

### C. Corporate license fees

**Ordinary resident company.** An ordinary resident company may transact foreign and domestic business from within the Cayman Islands. A Trade and Business License is required if business is to be conducted within the Cayman Islands unless the business is exempted (see Section D). If Caymanians or persons with Cayman status do not own at least 60% of the issued share capital, hold 60% of board positions or otherwise control such a company, the company must also obtain a Local Companies (Control) Law License before it can do business in the Cayman Islands, unless the business is exempt from this requirement.

Incorporation fees range from a minimum of KYD300 to a maximum of KYD500. Annual fees range from a minimum of KYD300 to a maximum of KYD500. The fees are based on authorized capital.

**Ordinary nonresident company.** An ordinary nonresident company is similar to a resident company, but it is not permitted to conduct business within the Cayman Islands. However, it may transact within the Islands all matters necessary to conduct its business outside the Islands; for example, it can negotiate contracts or open bank accounts.

Incorporation fees range from a minimum of KYD575 to a maximum of KYD815. Annual fees range from a minimum of KYD675 to a maximum of KYD915. The fees are based on authorized capital.

**Exempted company.** An exempted company is the most common form of company used by the offshore investor. An exempted company, similar to an ordinary nonresident company, may not conduct business within the Cayman Islands, but may transact from within the Islands all the matters necessary to conduct its business outside the Islands. An exempted company has certain advantages over an ordinary resident or nonresident company, including the availability of a Tax Exemption Certificate, which make the exempted company attractive to an offshore investor. A Tax Exemption Certificate provides that no law enacted in the Cayman Islands imposing any tax on income, profits, capital gains or appreciations will apply to the exempted company and that no such tax, estate duty or inheritance tax will be payable on or with respect to the shares, debentures or other obligations (or the income derived from such instruments) of the exempted company. The exemptions provided in the certificate are for a renewable 20-year period.

Incorporation fees range from a minimum of KYD600 to a maximum of KYD2,468. Annual fees range from a minimum of KYD700 to a maximum of KYD2,568. The minimum fee applies to companies with authorized capital of up to KYD42,000; the fee increases on a sliding scale for authorized capital in excess of this amount until it reaches the maximum of KYD2,568, which applies to companies with authorized capital exceeding KYD1,640,000.

An exempted company, through its memorandum and articles of association, may be established as a company limited by shares, a company limited by guarantee or a limited duration company (LDC). LDCs may be treated by the authorities of the United States and other jurisdictions as partnerships for tax and other purposes. An exempted company is classified as an LDC if its corporate existence terminates on the happening of one or more specified events and if it has a maximum life of 30 years. If a company limited by shares has more than one share class, it may be established on the basis that some of its classes will have limited liability and some will have unlimited liability. LDCs must pay a fee of KYD200 on registration in addition to the regular fees described above.

#### **D. Miscellaneous matters**

**Foreign-exchange controls.** The currency of the Cayman Islands is the Cayman Islands dollar (KYD). The exchange rate of the US dollar against the Cayman Islands dollar is fixed at USD1.2 = KYD1.

The Cayman Islands has no foreign-currency exchange control regulations.

**Business licenses.** Unless exempted, every person or company carrying on a trade or business must have an annual license for each place where such trade or business is carried on. The amount of the fee depends on the type and location of the business, as well as on the number and type of employees.

Companies that engage in certain types of business, such as banking and insurance, may be required to be licensed or registered under relevant laws. These laws may expressly eliminate the requirement that a company obtain a Trade or Business License or a Local Companies (Control) Law License.

The following are the annual license renewal fees payable by insurance companies and banks registered in the Cayman Islands.

**Insurance companies (KYD)**

Class A (locally incorporated)	75,000
Class A (approved external insurer)	75,000
Class B (unrestricted)	8,500
Class B (restricted)	8,500

**Banking and trust companies (KYD)**

Class A (unrestricted)	1,000,000
Class A (restricted)	300,000 or 350,000
Class B (unrestricted)	60,000 to 100,000
Class B (restricted)	37,000 or 40,000

The fees for Class B banking and trust licenses depend on the corporate structure of the relevant bank (the structures are branches, subsidiaries and private/affiliated companies) and slightly higher fees may be payable on the application and grant of the license. Restricted trust companies must pay an annual fee of KYD7,000 for a restricted trust license alone.

Mutual funds registered or licensed under the Mutual Funds Law must pay an annual license fee of KYD3,500. Mutual fund administrators must pay the following license renewal fees:

- Restricted license: KYD7,000
- Unrestricted license: KYD30,000 or KYD35,000 (depending on the number of funds under administration)

Company managers and corporate service providers licensed under the Companies Management Law must pay an annual license fee. For managers, the annual license fee ranges from KYD750 to KYD20,000 (depending on the number of companies under management), plus KYD150 per managed company. For corporate service providers, the annual license fee ranges from KYD500 to KYD10,000, plus KYD75 per company.

**Stamp duties.** Stamp duties are charged on transfers of real property, leases, mortgages and the execution of various other documents within the Cayman Islands. Transfer duty is payable on transfers of shares in Cayman Islands companies that hold real property in the Cayman Islands, subject to certain exemptions.

**E. Tax treaties**

As of April 2014, the Cayman Islands has entered into bilateral tax information arrangements with Argentina, Aruba, Australia, Belgium, Brazil, Canada, China, Curaçao, the Czech Republic, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Guernsey, Iceland, India, Ireland, Italy, Japan, Malta, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Qatar, Seychelles, Sint Maarten, South Africa, Sweden, the United Kingdom and the United States. It has also agreed to share information under the unilateral mechanism with Austria, Belgium, the Czech Republic, Germany, Japan, Luxembourg, the Slovak Republic, South Africa and Switzerland.

The Cayman Islands has also entered into a double tax treaty with the United Kingdom.

## A. At a glance

Corporate Income Tax Rate (%)	40 (a)
Capital Gains Tax Rate (%)	40 (b)
Branch Tax Rate (%)	40 (a)(c)
Withholding Tax (%)	
Dividends	20 (d)(e)
Interest	20
Royalties from Patents, Know-how, etc.	25
Fees for Technical Services, Professional Activities and All Other Services Paid Abroad	25 (f)
Certain Payments to Resident Individuals	20 (g)
Rent under Leases Paid to Individuals	15/20 (h)
Branch Remittance Tax	20 (i)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The minimum tax equals 1.5% of turnover. For further details, see Section B.
- (b) In certain circumstances, the tax is deferred or reduced (see Section B).
- (c) An optional final withholding tax is available for CIE Petroleum Contractors and Subcontractors (foreign companies that have entered into subcontracts with oil companies registered in Chad). The rate of this final withholding tax is 12.5% of the net amount of the contract.
- (d) This withholding tax also applies to directors' allowances, nondeductible expenses and adjustments or reinstatements following a tax reassessment.
- (e) This withholding tax applies to residents and nonresidents.
- (f) This withholding tax applies to payments by Chadian resident companies to nonresidents.
- (g) This withholding tax applies to payments made to individuals in the self-employed professions, trade intermediaries, door-to-door salespersons and representatives of the law (attorneys, bailiffs and notaries).
- (h) The withholding tax rate is 15% for payments made to residents and 20% for payments made to nonresidents.
- (i) The income subject to tax corresponds to a portion of the distributions made by the head office company. This portion is determined by applying to the distributed amount a percentage corresponding to the ratio of the profits realized by the Chadian branch and the total head office profits.

## B. Taxes on corporate income and gains

**Corporate income tax.** Chadian companies are taxed on the territoriality principle. As a result, Chadian companies carrying on a trade or business outside Chad are not taxed in Chad on their foreign-source profits. Chadian companies are those registered in Chad, regardless of the nationalities of their shareholders or where they are managed and controlled. Foreign companies with activities in Chad are subject to Chadian corporate tax on Chadian-source profits.

**Tax rates.** Under the General Tax Code, the standard corporate income tax rate applicable to all companies is a flat rate of 40% of taxable income. Corporate income tax is calculated by applying the tax rate to taxable income, which is based on income reported in the audited financial statements.

Oil and gas contractors are subject to higher rates.

The minimum tax is paid on a monthly basis at a rate of 1.5% of the turnover of the previous month. The payment must be made by the 15th day of the month following the month of realization of the turnover.

Sales made by wholesale dealers to individuals are subject to withholding tax at a rate of 4%. Wholesale dealers must pay the amount due to the tax authorities by the 15th day of the following month. Purchases made by companies from individuals are also subject to withholding tax at the same rate.

Profits realized in Chad by branches of foreign companies are subject to a branch withholding tax of 20% levied on a percentage of the distributions made by the branch, which corresponds to the profits realized in Chad after corporate income tax.

Newly incorporated companies or new businesses conducted by existing companies can be exempt from corporate income tax for five years if they satisfy the following conditions:

- The newly incorporated company or new business must be created after 1967 and must be operating in specific sectors, which are the industry, mining, agriculture, forestry and real estate sectors.
- The newly incorporated company or new business must demonstrate a particular interest for Chad development.
- The newly incorporated company or new business must not compete in any way with existing companies.
- The newly incorporated company must have a regular accounting conducted in Chad.

If the above-mentioned conditions are met, the application can be submitted to the Ministry of Finance and Budget.

**Capital gains.** Capital gains are taxed at the regular corporate rate. Capital gains include gains on the sale of real estate, corporate shares and business assets. However, the tax can be deferred or eliminated in the event of a merger under certain conditions.

For a business that is totally or partially transferred or discontinued (such as through a liquidation or sale of the business), only one-third of the net capital gains is taxed if the event occurs more than five years after the beginning or purchase of the business,

and only one-half of the gains is taxed if the event occurs within the five years following the beginning or purchase of the business.

**Administration.** The fiscal year runs from 1 January to 31 December.

Companies must file income tax returns by 31 March of the year following the fiscal year. Late returns are subject to a penalty of 1.5% per month, up to 50% of the tax due. An additional penalty of 100% or 150% applies in case of bad faith or in case of fraud discovered through a tax audit. Corporate income tax must be paid by the deadline for filing tax returns. Late payments are subject to a penalty of 2% per month of delay, excluding the application of an additional penalty.

**Dividends.** Dividends paid to resident individuals in Chad are subject to a 20% withholding tax. Resident individuals must include the gross dividend in taxable income, but they receive a corresponding 20% tax credit to prevent double taxation. Dividends received by resident companies are included in their taxable income and are subject to corporate income tax at the regular rate of 40%. Dividends paid to nonresidents are subject to a final 20% withholding tax.

The participation exemption regime may exempt up to 90% of the dividends received from a 50%-owned subsidiary if the parent company and the subsidiary have their registered offices in a Central African Economic and Monetary Community (Commission de la Communauté Économique et Monétaire de l'Afrique Centrale, or CEMAC) member state. The CEMAC member states are Cameroon, Central African Republic, Chad, Congo (Republic of), Equatorial Guinea and Gabon.

**Foreign tax relief.** In general, foreign tax credits are not allowed. The income of residents and nonresidents subject to foreign tax that is not exempt from Chadian tax under the territoriality principle is taxable, net of the foreign tax.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the Organization for the Harmonization of Business Law in Africa (L'Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) standard statements.

Business expenses are generally deductible unless specifically excluded by law. Expenses that are not deductible include the following:

- Head office overhead, research costs, and technical, financial and administrative assistance fees paid to nonresidents that exceed 10% of taxable profits before their deduction. This limitation does not apply to technical assistance fees related to the assembly of a factory, which are deductible in their entire amount.
- Rent expenses for movable equipment paid to a shareholder that manages the company in fact or by right and holds, directly or indirectly, more than 10% of the capital.
- Interest paid to shareholders in excess of the central bank annual rate plus two points.

- Commissions and brokerage fees for services on behalf of companies located in Chad that exceed 5% of purchased imports and sales of exports.
- Amounts set aside for self-insurance.
- Certain specific charges (such as contributions other than those for retirement paid to a foreign social security organization, which are deductible up to 15%, and health insurance premiums paid to companies located abroad), gifts, subsidies and penalties (to some extent).
- Expenses paid to local suppliers without reference to a Chadian tax identification number.
- Disallowed expenses, such as personal expenses, family expenses, nonbusiness-related expenses, provisions for redundancy for economic purposes and for self-insurance and unsupported expenses.

**Inventories.** Inventory is normally valued at the acquisition cost or at the lower of cost or market value. Cost must be determined on a weighted-average cost-price method. The first-in, first-out (FIFO) method is also generally acceptable.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Insurance companies may deduct technical provisions provided by the Conférence Interafricaine des Marchés d' Assurance (CIMA) Code to the extent that the General Tax Code does not contain any limitation for such deduction.

Credit institutions may deduct provision for bad debts. Such deduction is limited to 25% for the first year, 50% for the second year and 25% for the third year, if the concerned debt is not covered by a guarantee. If the bad debt is covered by a real guarantee, the deductibility is limited to 15% for the first year, 30% for the second year, 30% for the third year and 25% for the fourth year.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. Accordingly, if the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed for tax purposes.

**Relief for tax losses.** Losses may be carried forward for three years. However, losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** The Chadian tax law does not provide for the fiscal integration of Chadian companies equivalent to a consolidated filing position.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on transactions carried out in Chad; certain transactions are exempt	
Standard rate	18
Exports	0
Business license; rate varies depending on the amount of turnover	Various
Registration duties, on transfers of real property or businesses	3 to 15
Social security contributions on an employee's annual gross salary, limited to XAF6 million	
Family allowances, paid by employer	7.5
Old age, disability and survivor's pension; paid by Employer	5
Employee	3.5
For job-related accidents; paid by employer	4
Inclusive tax; on gross salary and effective value of benefits in kind; paid by employer	7.2
Training tax; on gross salary and effective value of benefits in kind; paid by employer	1.2

### E. Foreign-exchange controls

Exchange-control regulations exist in Chad for financial transfers outside the franc zone, which is the monetary zone including France and its former overseas colonies. A CEMAC rule (No. 0200/CEMAC/UMAC/CM, dated 29 April 2000) applies to all of the CEMAC countries.

### F. Treaty withholding tax rates

Chad has a limited tax treaty network. Chad has only entered into the CEMAC multilateral tax treaty, dated 13 December 1966. Under this treaty, the following are the withholding tax rates.

	Dividends %	Interest %	Royalties %
Cameroon	20 (a)	20 (a)	– (b)
Central African Republic	20 (a)	20 (a)	– (b)
Congo (Republic of)	20 (a)	20 (a)	– (b)
Equatorial Guinea	20 (a)	20 (a)	– (b)
Gabon	20 (a)	20 (a)	– (b)
Non-treaty countries	20	20	25

- (a) Payments from a Chadian source are subject to withholding tax under Chadian domestic tax law.
- (b) Withholding tax is not levied. The income is subject to tax in the state of the recipient.

**A. At a glance**

Corporate Income Tax Rate (%)	22.5
Capital Gains Tax Rate (%)	22.5/35 (a)
Branch Tax Rate (%)	22.5
Withholding Tax (%)	
Dividends	35 (b)(c)
Interest	35 (b)(d)
Royalties from Patents, Trademarks, Formulas and Similar Items	0/15/20/30 (b)(e)
Technical Services	15/20 (f)
Other Fees and Compensation for Services Rendered Abroad	35 (b)
Branch Remittance Tax	35 (g)
Net Operating Losses (Years) (h)	
Carryback	Unlimited
Carryforward	Unlimited

(a) See Section B.

(b) The tax applies to payments to nonresidents.

(c) The 35% tax is applied to the amount of the grossed-up dividend. A credit equal to the corporate tax paid is available.

(d) A reduced rate of 4% applies to certain interest payments including, but not limited to, interest paid on loans granted by foreign banks, insurance companies, financial institutions, and interest paid with respect to import operations.

(e) No withholding tax is imposed on payments related to standard software if certain requirements are met. A reduced withholding tax rate of 15% applies to payments with respect to the following:

- Invention patents
- Models
- Industrial drawings and designs
- Layout sketches or layouts of integrated circuits
- New vegetable patents
- Use or exploitation of computer programs (software)

The reduced tax rate does not apply to payments made to related entities or to companies resident in countries included in a list prepared by the Chilean Ministry of Finance containing the territories considered to be tax havens. As a result, the withholding tax rate for such payments is 30%. Two companies are considered to be related if one of the following conditions is satisfied:

- Either company owns 10% or more of the other company's capital.
- Either company participates in 10% or more of the other company's revenues.

- A shareholder or owner owns 10% or more of each company or participates in 10% or more of its revenue.  
A reduced withholding tax rate of 20% applies to payments for television broadcasting and cinematographic materials.
- (f) A 15% rate applies to payments for engineering, technical assistance, professional and other technical services rendered in Chile or abroad. However, if the parties are related (see footnote [f] above) or if the payments are being made to a company domiciled in a country included in the tax-haven list (see footnote [e] above), the withholding tax rate is 20%.
- (g) The 35% tax is applied to the grossed-up branch remittance. A credit is available for the corporate tax paid at the branch level.
- (h) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Chilean resident corporations and branches of foreign entities are subject to income tax on their worldwide income. A resident corporation is one that is incorporated in Chile. The corporate income tax is applied to accrued net income, with the exception of foreign-source income, which is computed on a cash basis.

Effective from 2016, Chile will apply controlled foreign company (CFC) rules to the foreign passive income of controlled entities.

**Rates of corporate tax.** The corporate income tax rate is 22.5% for 2015 and will be 24% for 2016.

The corporate income tax serves as a credit against the tax applicable to the distribution of profits to nonresident partners or shareholders, or to resident individual partners or shareholders. Dividends or profit distributions between resident entities are not subject to tax.

**Mining tax.** A special tax on mining activities is imposed on individuals or legal entities that extract minerals subject to concession and sell these minerals in any state of production. The tax is imposed at progressive rates ranging from 0% to 14%, depending on the amount of the sales and the operational margin of the taxpayer. The tax base is corporate income with certain adjustments.

Sales made by related mining entities are attributed to the taxpayer for purposes of determining the tax rate.

The mining tax is imposed in addition to the income tax. However, the mining tax may be deducted as an expense for income tax purposes for the year in which the tax is due.

**Chilean Holding Company regime.** Under the Chilean Holding Company (CHC) regime, a participation exemption is granted with respect to dividends distributed by the CHC's foreign subsidiaries or capital gains derived by the CHC from the disposal of such entities. To apply for the regime, the requirements contained in Article 41 D of the Income Tax Law must be met.

**Capital gains.** Capital gains derived by foreign investors are taxed at the regular 35% corporate rate if the capital gains relate to the disposal of shares or quotas in Chilean entities. A capital gain can be subject to corporate tax of 22.5% for 2015 and 24% for 2016 as a sole tax if the following conditions are satisfied:

- The shares or quotas were owned for at least one year.
- The seller is not habitually engaged in the sale of shares.
- The parties to the transaction are not related.

If any of these conditions is not met, the 35% general rate applies to the amount of the capital gain.

Sales of shares of companies listed on the stock exchange are exempt from income tax under certain conditions. Under certain double tax treaties, the tax rate on capital gains may be reduced to 20%, 17% or 16%.

Indirect transfers of Chilean shares are subject to capital gains tax at a rate of 35% if either of the following circumstances exists:

- Chilean assets represent more than 20% of the fair market value of the foreign company that is transferred.
- The fair market value of the Chilean assets is greater than approximately USD200 million.

The above measure may also apply if a tax haven resident entity is transferred under certain conditions. Limitations apply to the measure if the indirect transfer is made within a group reorganization process and if no capital gains are triggered.

**Administration.** All accounting periods in Chile must end on 31 December. Income taxes must be paid during the month of April.

Provisional monthly payments on account of final annual income tax are due on the 12th day of each month.

**Foreign tax relief.** A foreign tax credit may be claimed up to a limit of 22.5%, 32% or 35% of the foreign-source income, depending on the nature of the income and the existence of a double tax treaty.

### C. Determination of trading income

**General.** Taxable income, determined in accordance with generally accepted accounting principles, includes all profits, with the exception of specified items that are not considered income for tax purposes.

In general, all necessary expenses for producing income, sustained and justified, may be deducted to determine taxable income. However, expenses related to automobiles are not deductible. Interest associated with investment in Chilean companies is deductible for corporate tax purposes.

**Inventories.** For inventory valuation, the first-in, first-out (FIFO) method and the weighted-average cost method are accepted by law. A corresponding monetary correction must be added to cost.

**Monetary correction.** The Income Tax Law contains monetary adjustment rules. These rules, known as monetary correction, require taxpayers to revalue certain assets and liabilities annually based on the changes reflected in the consumer price index (CPI) and in foreign-exchange rates. The different indices that are used to adjust assets and liabilities may result in taxable profits or losses.

The following adjustments must be made for monetary correction purposes:

- The initial net value of fixed tangible assets is restated based on the change in the CPI, which is fixed monthly by the National Statistical Service. Depreciation is computed on the value of the assets after restatement.

- Inventories existing at the balance-sheet date are restated to their replacement cost.
- Credits, rights and liabilities that are in a foreign currency or linked to price indices are adjusted based on the change in the foreign-exchange rate or the relevant index. Investments in foreign entities are treated as foreign-currency denominated assets.

**Depreciation.** Depreciation must be calculated using the straight-line method. The tax authority has established the following normal periods of depreciation.

<b>Manufacturing industry and trade</b>	<b>Years</b>
Machinery	15
Heavy tools	8
Light tools	3
General installations	10
Trucks	7
Cars, pickups, station wagons and buses	7
Computers, computer systems, peripherals and similar items	6
 <b>Building and mining industries</b>	 <b>Years</b>
Solid buildings	80
Semisolid buildings	20 to 50
Buildings of light materials	10
Bulldozers, tractors, Caterpillars and other machines employed in heavy construction	8
Drilling equipment, internal combustion engines, soldering equipment and similar equipment	6
Machines employed in mining activities (general rate)	9

Annual depreciation rates must be applied after the revaluation of fixed assets according to the rules of monetary correction (see *Monetary correction*). Accelerated depreciation may be applied to new or imported fixed assets and to imported fixed assets with normal useful lives of three years or more. The accelerated method allows the calculation of depreciation based on a useful life for an asset equivalent to one-third of the normal useful life established by the Chilean tax authorities. However, accelerated depreciation may be used only in determining trading income for corporate tax purposes.

**Relief for losses.** Losses must first be carried back to offset undistributed profits of prior years and then may be carried forward without a time limit. If a qualified change of ownership occurs, accumulated tax losses may not be deducted from income generated after the ownership change.

#### **D. Value-added tax**

Value-added tax (VAT) applies to sales and other transactions regarding tangible personal property, as well as to payments for certain services. It also applies to certain real estate transactions. The general tax rate is 19%. VAT is imposed under a credit-debit system.

#### **E. Miscellaneous matters**

**Foreign-exchange controls.** The Central Bank of Chile must be informed of all transactions exceeding USD10,000. Other annual information requirements are imposed.

**Transfer pricing.** Changes to the transfer-pricing regulations are designed to conform the Chilean rules to the Organisation for Economic Co-operation and Development (OECD) guidelines and to introduce tax filing obligations.

Acceptable transfer-pricing methods include the following:

- Comparable uncontrolled price
- Resale price
- Cost plus
- Profit split
- Transactional net margin

Any other method may be used if none of the above methods applies to the transaction. The most suitable method should be used, taking into account the facts and circumstances of each related-party transaction.

Taxpayers must file an annual sworn statement identifying related-party transactions and transfer-pricing methods, and providing other information requested by the Chilean Internal Revenue Service through regulations. In addition, taxpayers must keep all relevant information supporting compliance with the transfer-pricing rules.

**Debt-to-equity rules.** Excess indebtedness exists if the “debt” of a Chilean entity exceeds from three times its “equity.” For this purpose, “equity” equals the tax equity (*capital propio tributario*) with certain adjustments. “Debt” includes all debt, regardless of whether it is foreign or local or related or unrelated, as well as the debt at the level of the company’s permanent establishments abroad. If excess indebtedness exists, a 35% tax (with a credit for any withholding tax paid) applies to the foreign related-party debt subject to a withholding tax of 4% or lower, as a penalty tax to the debtor. The concept of relationship also includes any type of guarantee.

## F. Treaty withholding tax rates

The table below lists the withholding tax rates under the Chilean treaties in force. All of these treaties are based on the OECD model convention.

	Dividends %	Interest (f) %	Patent and know-how royalties %
Australia	15 (a)	4/15 (b)	5/10 (c)
Belgium	15 (a)	4/15 (b)	5/10 (c)
Brazil	10/15 (a)	4/15	15
Canada	10/15 (a)	4/15 (b)	15 (c)
Colombia	0/7 (a)	4/15	10 (c)
Croatia	5/15 (a)	4/15	5/10
Denmark	5/15 (a)	4/15 (b)	5/15 (c)
Ecuador	5/15 (a)	4/15 (b)	10/15 (c)
France	15 (a)	4/15	5/10
Ireland	5/15 (a)	4/15 (b)	5/10 (c)
Korea (South)	5/10 (a)	4/10/15 (b)	5/15 (c)
Malaysia	5/15 (a)	4/15 (b)	10
Mexico	5/10 (a)	4/15 (b)	15 (c)
New Zealand	15 (a)	4/10/15 (b)	10 (c)

	<b>Dividends</b>	<b>Interest (f)</b>	<b>Patent and know-how royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Norway	5/15 (a)	4/15 (b)	5/15 (c)
Paraguay	10 (a)	4/10/15 (b)	15 (c)
Peru	10/15 (a)	4/15	15 (c)
Poland	5/15 (a)	4/15 (b)	5/15 (c)
Portugal	10/15 (a)	4/10/15 (b)	5/10
Russian Federation	5/10 (a)	4/15 (b)	5/10
Spain	5/10 (a)	4/15 (b)	5/10 (c)
Sweden	5/10 (a)	4/15	5/10
Thailand	10 (a)	4/10/15	10/15
United Kingdom	5/15 (a)	3/15 (b)	5/10 (c)
Switzerland	15 (a)	4/15 (b)	5/10 (c)
Non-treaty countries	35 (e)	4/35 (d)(f)	15/30 (g)

- (a) With respect to Chile, the treaty withholding tax rates for dividends do not apply to the 35% withholding tax applicable under domestic law as long as the corporate tax is creditable against the withholding tax.
- (b) These treaties have a most-favored nation (MFN) clause with respect to interest.
- (c) These treaties have a most favored clause with respect to royalties. In the case of the Peru treaty, the clause applies after a five-year period beginning on the effective date of the Chile-Peru treaty.
- (d) From a Chilean standpoint, the Chile-Argentina treaty no longer applies as of 1 January 2013. Consequently, any payment made on or after that date is taxed under local law (that is, the non-treaty country rates apply).
- (e) For dividends paid from Chile, the withholding tax rate is 35% of the grossed-up dividend less a credit for the corporate tax paid (at the existing rate).
- (f) Under Chilean domestic law, a reduced 4% tax rate applies to the following interest payments:
- Interest paid on loans granted by foreign banks, financial institutions and insurance companies
  - Interest paid on bonds
  - Interest paid with respect to import operations
- (g) The withholding tax rate is reduced to 15% for payments with respect to the following:
- Invention patents
  - Models
  - Industrial drawings and designs
  - Layout sketches or layouts of integrated circuits
  - New vegetable patents
  - The use or exploitation of computer programs (software)
- The reduced tax rate does not apply to payments made to related parties or to companies resident in countries included in a list prepared by the Chilean Ministry of Finance containing the territories that are considered to be tax havens. The withholding tax rate for such payments is 30%.

Chile has signed tax treaties with Austria, South Africa and the United States, which are awaiting ratification by the Chilean Congress.

*This chapter refers only to the taxation of entities under the tax laws of Mainland China. The tax laws in the Special Administrative Regions (SARs) of Hong Kong and Macau and in Taiwan are separate sets of rules that are completely distinct from those in Mainland China. For information concerning the tax laws in Hong Kong, Macau and Taiwan, see the chapters concerning such jurisdictions in this guide.*

*Effective from 1 January 2008, a unified China Enterprise Income Tax Law applies to both domestic enterprises and business operations with foreign investment. The unified law replaces the previous Enterprise Income Tax Law (applicable to domestic enterprises) and Foreign Investment Enterprise and Foreign Enterprise Income Tax Law (applicable to business operations with foreign investment). Under the unified law, differences no longer exist between the taxation of domestic-owned enterprises and the taxation of foreign-owned enterprises.*

### A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	10
Interest	10
Royalties from Patents, Know-how, etc.	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) Capital gains derived by foreign enterprises from disposals of interests in foreign investment enterprises are subject to a final withholding tax of 10% instead of income tax. This rate may be reduced by applicable tax treaties.

(b) The statutory rate is 20%, which is reduced to 10% by the Enterprise Income Tax Law Implementation Regulations.

### B. Taxes on corporate income and gains

**Corporate income tax.** On 16 March 2007, China enacted the new China Enterprise Income Tax Law (the New Law), which took effect on 1 January 2008. Before the enactment of the New Law, two separate tax laws, one for domestic enterprises and the other for foreign-owned business operations, including foreign investment enterprises (FIEs) and foreign enterprises, were in effect for more than 15 years. The New Law applies to all business operations regardless of their ownership, except for sole proprietorships and partnerships to which the individual income tax law applies. FIEs that were incorporated (that is, obtained their business license) before 16 March 2007 are entitled to a five-year transitional period beginning 1 January 2008. During this transitional period, entitlement to tax incentives under the prior tax law can be grandfathered.

Corporate residents of China are taxed on their worldwide income, including income from business operations, investment and other sources. A foreign tax credit is allowed for income taxes paid in other countries. This credit is capped at the China income tax payable on the same income calculated under the New Law.

In general, a company is regarded as tax resident in China if it is incorporated in China or effectively managed in China. “Effective management” is defined as overall management and control over the production, business, personnel, accounting, and assets of a company.

Nonresident companies are taxed on China-source income only. However, if the nonresident company has an establishment in China, non-China source income effectively connected with the China establishment is also taxed.

The term “establishment” is broadly defined to include the following:

- A place of management
- A branch
- An office
- A factory
- A workshop
- A mine or an oil and gas well or any other place of extraction of natural resources
- A building site
- A construction, assembly, installation or exploration project
- A place for the provision of labor services
- Business agents

**Rates of corporate tax.** The statutory rate of enterprise income tax is 25%, effective from 1 January 2008. The withholding tax rate on passive income (including dividends, interest, royalties and capital gains) of non-China tax residents is 10%.

A reduced tax rate applies to the following enterprises, subject to the satisfaction of certain conditions:

- 20% rate and 50% reduction of annual taxable income for qualifying small and less-profitable enterprises, provided that they have annual taxable income not exceeding CNY100,000 (for the period of 1 January 2014 through 31 December 2016)
- 15% for High and New Technology Enterprises
- 15% for Technologically Advanced Service Companies in select cities (from 2009 to 2018)
- 15% for qualifying integrated circuit production enterprises
- 10% for key software enterprises, key animation and comics enterprises and integrated circuit designing enterprises
- 15% for western region enterprises and enterprises in Ganzhou in Jiangxi Province engaging in and deriving 70% of their total income from certain encouraged industries as stipulated in a new western region catalog (from 1 October 2014 to 2020)
- 15% for qualifying enterprises that are registered in the Guangdong Hengqin New Area (Hengqin), the Fujian Pingtan Comprehensive Pilot Zone (Pingtan) or the Qianhai Shenzhen-Hong Kong Modern Service Industry Cooperation Zone (Qianhai) (for further details, see below)

**Tax incentives.** A five-year tax holiday (exemption for the first two years and 50% reduction for the next three years) is granted to newly established and qualified High and New Technology Enterprises that are incorporated after 1 January 2008 and that are located in the Shanghai Pudong New Area or one of the five Special Economic Zones (SEZs), which are Hainan Province, Shantou, Shenzhen and Zhuhai in Guangdong Province, and Xiamen in Fujian Province. A five-year tax holiday also applies to qualifying software enterprises, animation and comics enterprises, integrated circuit designing enterprises and integrated circuit production enterprises. For qualified integrated circuit production enterprises, the tax holiday can be extended to 10 years (exemption for the first five years and 50% reduction for the next five years) under certain conditions. To enjoy the tax holidays described in the two preceding sentences, the qualifying software enterprises, animation and comics enterprises, and integrated circuit enterprises must make profits by the end of 2017.

During the period from 2010 to 2020, certain specified industries in selected areas of Xinjiang, such as agriculture and forestry, irrigation, coal production and related industries, electricity, new energy, oil and gas, production of certain metals and related industries, petrochemical, pharmaceutical, transportation, modern logistics, environmental protection and resources conservation, can also benefit from a five-year tax holiday based on the statutory rate of 25%. A five-year exemption applies to qualifying enterprises located in the Kashi and Huoerguosi Special Economic Development Zones of Xinjiang.

During the period of 1 January 2014 through 31 December 2020, enterprises that are established in Hengqin, Pingtan or Qianhai (the covered areas) and that engage in encouraged industries can be subject to a reduced corporate income tax rate of 15%. Enterprises engaging in encouraged industries are enterprises that satisfy the following conditions:

- They have their core businesses in the covered area.
- Their businesses relate to industries and projects stipulated in preferential corporate income tax catalogs.
- Their income derived from such core businesses account for more than 70% of their total income.

If enterprises have establishments both inside and outside the covered areas, only the income attributable to establishments inside the covered areas is eligible for the preferential corporate income tax rate of 15%. In determining whether enterprises meet the above-mentioned conditions for preferential corporate income tax rates, only their establishments inside the covered areas are counted; their establishments outside the covered areas are not considered.

Other tax incentives are available to enterprises engaged in industries, projects, or activities encouraged by national policies. The incentives granted to these encouraged industries, projects and activities typically include the following:

- Income from agriculture, forestry, animal husbandry and fishery projects is eligible for a full tax exemption or 50% reduction of tax, depending on the type of projects.

- Income from infrastructure projects is eligible for a full tax exemption for the first three years and a 50% reduction of tax for the next three years beginning with the first income-generating year. If certain requirements are met, enterprises that invest in a qualifying public infrastructure project and are approved to perform the project in phases are allowed to calculate the corporate income tax based on the taxable income of each phase and enjoy the tax holiday for different phases of the project separately.
- Income from environmental protection or water or energy conservation projects is eligible for a full tax exemption for the first three years and 50% reduction of tax for the following three years.
- Income from technology transfer is eligible for a tax exemption for the first CNY5 million and a 50% reduction for the amount over that threshold.
- 150% of qualified costs incurred for the research and development of new technologies and products can be tax deductible.
- 200% of qualified wages for disabled people can be tax deductible.
- Venture capital companies investing in the equity of unlisted small or medium-sized High and New Technology Companies can use 70% of its investment cost to offset the taxable income for the year in which the holding period reaches two years.
- Income derived from recycling business is eligible for a 10% reduction in calculating taxable income.
- 10% of the cost incurred in purchasing environmental protection, water and energy saving or production safety equipment can be credited against income tax payable for the year of the purchase.

**Capital gains and losses.** In general, capital gains and losses are treated in the same manner as other taxable income and losses, and are taxed at the normal income tax rate of 25%. However, China-source capital gains derived by nonresident enterprises, such as gains from the disposal of an FIE, are subject to a 10% withholding tax. In addition to income tax, real property gains tax is imposed on gains derived from transfers of real properties (see Section D).

**Administration.** The tax year in China is the calendar year.

An annual corporate income tax return, together with audited financial statements issued by a certified public accountant registered in China and a set of annual reporting forms for related-party transactions, is due within five months after the end of the tax year. Enterprises must settle all outstanding tax liabilities within the same period.

In addition, enterprises must also file quarterly provisional corporate income tax returns within 15 days after the end of each quarter, together with payments of provisional tax based on actual profits. If an enterprise has difficulty in filing a provisional tax return based on the actual quarterly profits, it may pay tax based on estimated profits. The estimated profits are normally computed by reference to one-quarter of the enterprise's actual taxable profits for the preceding year. Otherwise, they are computed under other methods approved by the tax bureau.

Late filing or late payment triggers a surcharge of 0.05% per day and a discretionary penalty of 50% to 500% of the unpaid tax liabilities. For adjustments made under anti-avoidance provisions, such as adjustments with respect to transfer pricing, thin capitalization and controlled-foreign corporations (see Section E), an interest charge is imposed on a daily basis, beginning on 1 June of the year following the tax year to which the tax underpayment is related and ending on the day the tax underpayment is settled. This charge is based on the renminbi yuan (CNY) loan base rate published by the People's Bank of China (PBOC) plus 5%. If related-party transaction annual reporting forms and other prescribed documentation are provided or if relevant documents, such as contemporaneous documentation, can be provided in accordance with the new China State Administration of Taxation (SAT) Announcement [2014] No. 54 during a monitoring and administration period of special tax adjustments (the five-year period beginning with the year following the year in which such special adjustments are made), the interest charge may be reduced to an amount based only on the CNY loan-based rate published by the PBOC.

**Dividends.** Profits of FIEs distributed as dividends are subject to withholding tax at a rate of 10% (this rate may be reduced under a tax treaty or arrangement) when remitted from China. The investor must obtain preapproval from the tax authorities responsible for administering the relevant treaty reliefs. Dividends paid between qualified resident companies may be exempted. For this purpose, resident companies are qualified if one tax resident has made a direct investment in the other tax resident. Dividends attributable to publicly traded shares are also treated as tax-exempt investment income if the holding period of the shares is longer than 12 months.

**Foreign tax relief.** A tax credit is allowed for foreign income taxes paid, or indirectly borne, by China resident enterprises, but the credit is generally limited to the amount of China corporate income tax payable on the foreign-source portion of an enterprise's worldwide taxable income. A nonresident enterprise with an establishment or place of business (generally referred to as a permanent establishment [PE]) in China that derives foreign-source income effectively connected to the PE can also claim a tax credit for income taxes paid in foreign jurisdictions, but the credit is limited to China corporate income tax payable on such income. Excess foreign tax credits may be carried forward for a period of five years. The tax credit limit mentioned above must be calculated on a country-by-country basis with an exception for Chinese oil companies, which are allowed to select either the country-by-country method or the general deduction method. Under the general deduction method, the tax credit limit is calculated based on the taxable income derived from all foreign countries. This method applies only to a specific class of worldwide income, which is foreign-source income relating to the exploration of crude oil and relevant technical services (upstream-related activities). Under the country-by-country method, the tax credit limit for each country is calculated by apportioning the total income tax on worldwide taxable income through the application of an apportionment ratio of the taxable income sourced in the relevant country to worldwide taxable income.

### C. Determination of trading income

**General.** Taxable income is defined as total revenue less the following:

- Non-taxable income
- Tax-exempt income
- Allowable deductions
- Tax losses

No major differences exist between tax and accounting methods for income computation purposes. Dividends, bonuses, interest, royalties, rent and other income are included in taxable income.

In general, all necessary and reasonable expenses incurred in carrying on a business are deductible for tax purposes. However, specified limits apply to the deductibility of advertisement expenses, entertainment expenses, union fees, employee welfare costs, employee education expenses, commissions and handling fees, supplementary pensions and supplementary medical insurance. Charitable donations of up to 12% of the total annual profit are deductible.

Management fees paid between enterprises, rental and royalty fees paid between business units of an enterprise, and interest paid between business units of nonbank enterprises are not deductible. Interest paid on related-party borrowing that does not meet debt-to-equity ratio rules (see Section E) may not be deductible. Other nondeductible expenses include the following:

- Sponsorship expenses
- Dividends and returns on equity investments
- Income tax payments including penalties and surcharges
- Donations not fulfilling prescribed requirements
- Provisions not yet approved
- Other expenses not related to production or business operations

For an establishment in China of an enterprise that is not a resident for tax purposes, reasonable expenses allocated from the overseas head office are deductible if these expenses are incurred by the head office for the production or business operations of such establishment and are supported by proper documents issued by the head office.

**Inventories.** For tax purposes, the cost of inventories is determined in accordance with the following rules:

- The cost of inventories that are paid for in cash is the sum of the purchase price and the related taxes and charges actually paid.
- The cost of inventories that are not paid for in cash is determined based on the fair market value of the consideration and the related taxes and charges actually paid.
- The cost of agricultural products generated from biological assets (for example, animals or woods) is determined based on the necessary raw material, labor and relevant overhead expenditure actually incurred.

Cost may be determined on a first-in, first-out (FIFO), weighted average, or specific identification basis. The last-in, first-out (LIFO) basis is not acceptable for tax purposes. The method chosen must be applied consistently.

**Provisions.** Provisions that have not been approved by the tax authorities are generally not deductible. These include various provisions and allowances for asset impairment and risk reserves.

**Tax depreciation.** Depreciation of tangible assets is generally computed using the straight-line method. The following are minimum useful lives for various assets.

Asset	Years
Buildings and structures	20
Aircraft, trains, vessels, machinery, equipment and other production plants	10
Appliances, tools, furniture and other assets related to production and business operations	5
Means of transport other than aircraft, trains and vessels	4
Electronic equipment	3
Productive biological assets in the nature of trees	10
Productive biological assets in the nature of livestock	3
Acquired software (subject to approval)	2

Accelerated depreciation is allowed with respect to certain fixed assets subject to rapid technological obsolescence and fixed assets exposed to constant shock and erosion. A qualified company can follow either the general depreciation rule or the accelerated depreciation rule.

Effective from 1 January 2014, accelerated depreciation or a shortened depreciation life is available with respect to specific industries, research and development (R&D) projects, and fixed assets with a unit value not exceeding CNY5,000.

Intangible assets, including technical know-how, patents and trademarks, are amortized over the contractual term or over a period of no less than 10 years if a time period is not specified. Self-developed goodwill cannot be amortized or deducted. Acquired goodwill is deductible only if the entire business is transferred or liquidated.

**Relief for losses.** Tax losses may be carried forward for up to five years. Carrybacks are not allowed.

**Groups of companies.** In general, consolidated returns of enterprises are not allowed, and all companies must file separate tax returns, unless specifically approved by government authorities. Tax resident enterprises in China must adopt combined filing for units (branches and establishments without legal person status) operating in different areas of China. On approval by the relevant tax authorities, nonresident enterprises that have two or more establishments in China may select a main establishment to file a combined tax return.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	17
Rate on specified products (primarily basic necessities), agricultural products and utility services	13

Nature of tax	Rate (%)
VAT pilot arrangements; implemented nationwide, effective from 1 August 2013; certain services previously subject to Business Tax are now subject to VAT under the pilot arrangements	17
Leasing of movable properties	17
Transportation services, railway transportation, postal services, courier services (transportation parts) and basic telecommunication	11
Certain modern services (including R&D and technology services, information technology services, cultural and creative services, logistics auxiliary services, authentication and consulting services and radio, film and television services), courier services (collection and delivery parts) and value-added telecommunication	6
Other reduced rates (applicable to small businesses or simplified VAT calculation method)	3/4/6
International transportation and space transportation services VAT rate	0
Postal and collection and delivery services provided for exportation of goods	Exempt
(VAT previously paid on the purchase of raw materials, parts and taxable services that are used in the production of export goods or in the provision of certain export services is refundable; applicable refund rates depend on types of goods or services that are exported.)	
Consumption tax (CT); on the production and importation of certain luxury items, such as cigarettes, gasoline, alcoholic beverages, jewelry, cosmetics, motor vehicles, motor vehicle tires, golf balls and equipment, luxury watches and yachts	Various
Business tax (BT); on various types of services (except for certain modern services) and income not derived from production, including construction, finance, insurance, sporting events, entertainment establishments, hotels and restaurants, rentals, tourism and the transfer of immovable properties; transfers of equity interests can be exempt from BT	
General rates	3 to 5
Finance and insurance businesses	5
Entertainment establishments	5 to 20
Transfers of immovable properties	5
Real property gains tax; imposed on real property transfers (after various deductions)	30 to 60
City construction tax; based on indirect taxes (including VAT, CT and BT) actually paid	
Taxpayers located in urban areas	7
Taxpayers located in county or township areas	3
Taxpayers located in rural areas	1
Education surcharge (ES); based on indirect taxes (including VAT, CT and BT) actually paid	3
Local education surcharge (LES); based on indirect taxes (including VAT, CT and BT) actually paid	2

## E. Miscellaneous matters

**Foreign-exchange controls.** In general, the Chinese government permits the free convertibility of current account items of China incorporated enterprises. Current account items are defined as transactions occurring daily that involve international receipts and payments. Current account foreign-exchange receipts and payments include trading receipts and payments, service receipts and payments, unilateral transfers and dividends paid from after-tax profits.

Recently, China has been relaxing its foreign-exchange controls in phases by permitting settlement in renminbi yuans (CNY) for cross-border trading transactions, including cross-border trades in commodities, services and other current account items, on a nationwide basis and then extending the CNY settlement to both inbound and outbound investments. Remittances of dividends to foreign investors and other items including income derived from share transfers, capital reductions, liquidations and early withdrawals of investments may be settled in renminbi yuans.

*Remittances of dividends and profits.* Remittances of after-tax profits or dividends to foreign investors in FIEs must be supported by written resolutions of the board of directors, and may not be made until a tax clearance is issued by the tax authorities.

*Remittances of interest and principal.* Interest payments on foreign loans are considered current account items. In general, after performing a tax-record filing with the tax authorities, these payments may be made through the enterprise's special foreign-exchange bank account or through conversion at designated foreign-exchange banks.

Since 13 May 2013, enterprises are not required to submit any formal application to the State Administration for Foreign Exchange for the approval of principal repayments. In general, the enterprise may repay the principal from its special foreign-exchange bank account or through conversion at designated foreign-exchange banks.

*Remittances of royalties and fees.* Instead of applying for tax clearance for settling outbound payments that exceed USD50,000, effective from 1 September 2013, enterprises can file a record with the responsible state tax authorities by submitting copies of contracts (stamped by the official seal) together with registration forms before making payments of royalties and fees, either out of the enterprise's special foreign-exchange bank account or through currency conversion and payment at a designated foreign-exchange bank. To enjoy treaty benefits with respect to royalties, the investor must obtain pre-approval from the in-charge tax authorities. Proper documentation (such as royalty agreements, invoices and other tax and business documents) is required for all payments of royalties and fees.

**Debt-to-equity requirements.** For FIEs in China, the following debt-to-equity ratios are applicable for the purpose of obtaining foreign-currency loans from foreign parties (including foreign related parties) and meeting corporate law requirements:

- For investment projects of up to USD3 million, the capital contribution must equal or exceed 70% of the total investment.

- For investment projects of over USD3 million but not exceeding USD10 million, the minimum capital requirement is 50% of the total investment, but not less than USD2,100,000.
- For investment projects of over USD10 million but not exceeding USD30 million, the minimum capital requirement is 40% of the total investment, but not less than USD5 million.
- For investment projects in excess of USD30 million, the minimum capital requirement is 33.3% of the total investment, but not less than USD12 million.

The New Law provides for a separate set of debt-to-equity rules for tax purposes. Subject to certain exceptions, in general, the debt-to-equity ratio for financial institutions is 5:1 and the ratio for non-financial institutions is 2:1. The interest expense on funds loaned by a related party that exceed the maximum debt calculated under the debt-to-equity ratio is not deductible for tax purposes.

In addition, the deduction of expenses on a loan from an investor may be limited if the investor has not yet paid up its committed investment capital. The nondeductible interest expense is calculated by apportioning the total interest expenses based on the ratio of the outstanding capital commitment to the total loan balance.

**Transfer pricing.** China has introduced transfer-pricing rules under which all amounts paid or charged in business transactions between related parties must be determined based on an arm's-length standard. If the parties fail to meet this requirement, the tax bureau may make reasonable adjustments by using one of the following methods:

- Comparable uncontrolled price (CUP)
- Resale price method (RPM)
- Cost-plus method (CPM)
- Transactional net margin method (TNMM)
- Profit split method (PSM)
- Other methods that are consistent with the arm's-length principle

Enterprises must disclose related-party transactions in Related-Party Transaction Forms, which should be submitted to the in-charge tax bureau together with the annual tax return by the due date for the annual return. The following related-party information must be disclosed in the forms:

- Related-party relationships
- Sales and purchases
- Services
- Transfers of intangible assets and fixed assets
- Financing
- Outbound investments and payments

Enterprises with aggregate related-party transactions exceeding one of the following thresholds must prepare contemporaneous documentation on an entity level unless their transactions are covered by an Advance Pricing Agreement (APA) or unless they meet the "domestic transaction" exemption:

- CNY200 million of related-party purchase or sale transactions
- CNY40 million of other kinds of transactions such as intangibles, services and interest from financing transactions

The contemporaneous documentation must be completed by 31 May of the year following the year in which the related-party transactions took place and be provided to the tax authorities within 20 days on request.

The New Law recognizes the concept of cost-sharing arrangements for group procurement and group marketing activities. Other types of service cost sharing are not currently entertained by the tax authorities. Entities that have executed a cost-sharing agreement must prepare and preserve contemporaneous documentation regardless of the related-party transactions thresholds.

Taxpayers may apply for APAs in China.

**Anti-avoidance rules.** The general anti-avoidance rules apply to transactions if the transactions may be considered to have been undertaken or arranged primarily for other than bona fide purposes and if the sole and dominant purpose for a company to enter into such transactions was the obtaining of tax benefits.

**Controlled foreign corporations.** The New Law introduces controlled foreign corporation (CFC) rules, which are designed to counter income deferral strategies. A resident company that holds an interest in a CFC incorporated in a jurisdiction with an effective tax rate of lower than 12.5% may be taxed on its share of profits of the CFC, regardless of whether a dividend has been declared. A non-resident company is considered to be controlled by a China resident company if either of the following conditions is satisfied:

- The China resident company directly or indirectly holds 10% or more of the voting shares in the nonresident company and jointly holds an interest of 50% or more in the nonresident company.
- The China resident company exercises effective control over the nonresident company by means of shares, capital, business operations, purchases and sales or other mechanisms.

China has issued a white list showing jurisdictions that are not subject to CFC rules, including Australia, Canada, France, Germany, India, Italy, Japan, New Zealand, Norway, South Africa, the United Kingdom and the United States. The CFC rules do not apply if one of the following conditions is satisfied:

- The CFC is located in one of the jurisdictions in the white list.
- The CFC carries out substantial and positive business activities.
- The CFC reports an annual profit of CNY5 million or less.

## F. Treaty withholding tax rates

The following table provides Chinese withholding tax rates for dividends, interest and royalties paid from Mainland China to residents of various treaty countries and arrangement jurisdictions (Hong Kong and Macau SARs). The rates reflect the lower of the treaty rate and the rate under domestic law. The following table is for general guidance only.

	Dividends	Interest	Royalties
	%	%	%

- (a) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (b) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (c) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.
- (d) The 7% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.
- (e) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends and that has invested more than EUR2 million in the capital of the company paying the dividends. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends and that has invested more than EUR100,000 in the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (f) The 5% rate applies if the beneficial owner of the dividends is a company that, before the moment of the payment of the dividends, directly held for an uninterrupted period of at least 12 months at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.

- (g) The 5% rate applies to interest paid to banks. The 10% rate applies to other interest payments.
- (h) The 7% rate applies to interest paid to banks or financial institutions. The 10% rate applies to other interest payments.
- (i) Payments for the use of industrial, commercial or scientific equipment are taxed on the basis of 60% of the gross payments. Consequently, the effective rate for such payments is 6%.
- (j) Payments for the use of industrial, commercial or scientific equipment are taxed on the basis of 70% of the gross payments. Consequently, the effective rate for such payments is 7%.
- (k) The 7% rate applies to royalties paid for the use of, or the right to use, industrial, commercial and scientific equipment. The 10% rate applies to other royalties.
- (l) The 5% rate applies to royalties paid for technical or economic studies or for technical assistance. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, films or tapes for radio or television broadcasting, patents, trademarks, designs or models, plans, or secret formulas or processes, or for the use of, or the right to use, industrial, commercial or scientific experience.
- (m) China is honoring the Czechoslovakia treaty with respect to the Slovak Republic until a new treaty is signed.
- (n) After the partition of the former Yugoslavia, China is honoring the double tax treaty with the former Yugoslavia with respect to Bosnia and Herzegovina.
- (o) China entered into a treaty with the Federal Republic of Yugoslavia. It has been indicated that China considers Serbia to have inherited the Yugoslavia treaty and that China is also honoring the treaty with respect to Montenegro. However, it is suggested that taxpayers check with the relevant tax authorities before relying on this treaty.
- (p) On 28 March 2014, China signed a new tax treaty and new protocol with Germany, both of which have not yet been ratified.
- (q) On 13 October 2014, China signed a new tax treaty with Russian Federation, which has not yet been ratified.
- (r) On 24 August 2011, China signed a new protocol with Latvia, which took effect on 1 January 2013. The protocol reduced the treaty rate on royalties from 10% to 7%.
- (s) On 1 August 2014, the SAT released SAT Announcement [2014] No. 46, announcing the new tax treaty with the Netherlands and its protocol, which were signed on 31 May 2013 and entered into force on 31 August 2014. The new Netherlands treaty and its protocol apply to income derived on or after 1 January 2015. The withholding tax rates under the new treaty are reflected in the table.
- (t) On 16 September 2013, China signed a new protocol with Bahrain, which has not yet been ratified.
- (u) On 6 January 2015, the SAT released SAT Announcement [2015] No. 1, announcing the new tax treaty with Switzerland and its protocol, which were signed on 25 September 2013, and entered into force on 15 November 2014. The new China–Switzerland double tax treaty and its protocol applies to income derived on or after 1 January 2015.
- (v) On 10 March 2014, the SAT released SAT Announcement [2014] No. 16, which announced the new tax treaty with Ecuador and its protocol, which were signed on 21 January 2013 and entered into force on 6 March 2014. The Ecuador treaty and its protocol apply to income derived on or after 1 January 2015. The withholding tax rates under the new treaty are reflected in the table. In addition, the protocol states that the term “interest” also includes other income treated as income from money lent by the tax law of the contracting state in which the income arises, provided that the income is from some type of debt-claim. In case of divergence of interpretation, the contracting states must resort to the mutual-agreement procedure.
- (w) On 26 November 2013, China signed a new tax treaty and new protocol with France, both of which entered into force on 28 December 2014 and applies to income derived on or after 1 January 2015.

China signed tax treaties with Uganda and Botswana on 11 January 2012 and 11 April 2012, respectively, but these two treaties have not yet been ratified.

Carryback	0
Carryforward	Unlimited

- (a) Reduced and gradually increasing income tax rates exist (for details, see Section B). Also, a wealth tax applies to companies for 2015 through 2017 (for details, see Section D).
- (b) This tax applies to local corporate taxpayers required to file an income tax return, which include branch offices and permanent establishments (PEs) of foreign entities. For details, see Sections B and C.
- (c) The surtax applies to income tax for equality taxpayers on their taxable income that exceeds COP800 million. The surtax applies for 2015 through 2018. The rates of the surtax are 5% for 2015, 6% for 2016, 8% for 2017 and 9% for 2018. The surtax is subject to an advance payment that is calculated applying the corresponding tax rate for the relevant year to the taxable income of the prior year.
- (d) Corporate income tax rates applicable to nonresidents receiving Colombian-source income not attributable to a branch or PE are temporarily increased from 2015 through 2018 (2015: 39%; 2016: 40%; 2017: 42%; and 2018: 43%). However, the tax reform enacted in December 2014 is not clear on whether these increases also modified the withholding tax rates for payments abroad, which are normally subject to the general 33% rate (for example, interest, royalties and general services). Guidance from the government is expected in the first quarter of 2015; however, it is expected that Colombian withholding agents will apply the highest rate (39% for 2015).
- (e) Dividends paid to nonresidents are not subject to tax if the dividends are paid out of profits that were taxed at the corporate level. If the profits were not taxed at the corporate level, dividends paid to nonresidents that are not attributable to a branch or PE are subject to withholding tax at the corporate income tax rate of 33%. Dividends paid between domestic corporations are not subject to tax if the company generating the profits out of which the dividends are paid is taxed on these profits in Colombia. Otherwise, the dividends are included in the income tax return of the recipient of the dividends. A 20% withholding tax is imposed on dividends paid to residents if the taxpayer is required to file an income tax return.
- (f) Interest paid or accrued by Colombian residents to foreign entities on loans with a term equaling or exceeding one year are subject to 14% withholding tax; otherwise, the applicable rate is 33%. Interest paid on loans that have a term equal or greater than eight years and that are related to certain infrastructure projects are subject to a 5% withholding tax. Interest paid by Colombian financial institutions and interest paid by Colombian residents to foreign entities with respect to international trade operations are deemed to be foreign-source income and are accordingly exempt from withholding tax. Certain qualified loans executed before 31 December 2010 do not generate Colombian-source income. As a result, interest on such loans is exempt from withholding tax.

- (g) This withholding tax applies to consulting services, technical services and technical assistance services rendered in Colombia or from abroad by non-residents that are not domiciled in Colombia.

## **B. Taxes on corporate income and gains**

**Corporate income tax.** National corporations are taxed on worldwide income and capital gains. National corporations are corporations that have their principal domicile in Colombia or are organized under Colombian law or that during the respective tax year or period have their effective place of management in Colombia (holding board meetings in Colombia is not enough to qualify as a national company).

Foreign companies that obtain more than 80% of their income (other than passive income) in the jurisdiction of incorporation are not considered to have their effective place of management in Colombia. These companies are known as “80% Foreign Income Companies.” Foreign companies that have issued stock or bonds in the Colombian stock exchange or in a recognized foreign stock exchange are not considered to have their effective place of management in Colombia. The subsidiaries of such companies are also not considered to have their effective place of management in Colombia to the extent they are consolidated in the financial statements of its parent; however, such subsidiaries can elect to be treated as a national corporation unless they are 80% Foreign Income Companies.

Branches of foreign corporations and PEs are taxed on Colombian-source income and capital gains only. Attribution is based on domestic tax accounting records, which should be supported by an analysis of functions, assets, risks and personnel.

**Corporate income tax rates.** The standard corporate income tax rate is 25%. However, foreign companies receiving Colombian-source income that is not attributable to a branch office or PE and that is not fully taxable through withholding tax are subject to an income tax rate of 39%. This rate will increase to 40% for 2016, 42% for 2017 and 43% for 2018. A special reduced corporate income tax rate of 15% applies to legal entities qualified as Industrial Users of Goods and/or Services in a free-trade zone. Commercial Users in a free-trade zone are subject to the general corporate income tax rate.

Reduced and gradually increasing income tax rates are available for small businesses (as defined by Law 1429, December 2010) beginning their activities on or after 1 January 2011. Zero percent of the regular corporate income tax rate applies for the first two years. The rate increases by 25% of the regular corporate income tax rate for the third through the fifth years, and the regular corporate income tax rate of 25% applies from the sixth year.

Certain tax credits are available (see *Foreign tax relief*).

The income tax for equality (CREE) rate is 9%. CREE taxpayers are exonerated from the National Learning Service (SENA) and the Colombian Family Welfare Institute (ICBF) payroll contributions (up to 13.5% of the payroll tax base) assessed on salaries and days of rest, only for employees earning up to 10 minimum monthly wages. Nonprofit organizations and free-trade zone users qualified on 31 December 2012, free-trade zone users in special

free-trade zones with a request filed on 31 December 2012 and new free-trade zone users in an existing permanent free-trade zone at 31 December 2012 are not subject to CREE. For further details regarding CREE, see Section C.

**Capital gains.** The following gains are considered capital gains, which are subject to tax at a rate of 10%:

- Gains on the transfer of fixed assets owned for more than two years
- Gains resulting from the receipt of liquidation proceeds of corporations in excess of capital contributed if the corporation existed for at least two years

**Administration.** The tax year is the calendar year.

Each December, the Colombian government sets the due dates for the filing of income tax returns and payment of taxes due. Tax payments are made in three installments between February and October for Larger Taxpayers (large corporations, according to conditions set by the tax authorities) and in two installments between April and June for other legal entities. Advance payments for the current tax year, which generally represent 20% of the income tax payable for the prior tax year after withholdings, must be made with these installments.

Interest on the late payment of taxes is accrued at the daily effective rate of usury certified by the Superintendency of Finance for the consumption credits. A penalty for late filing is levied on the amount of tax assessed in the corresponding tax return at a rate of 5% or 10% for each month or a fraction thereof. The penalty for late filing cannot exceed 100% or 200% of the difference of the tax to be paid or the balance in favor, depending on the timing of the filing. The penalty for amending a return may be 10% or 20% of the difference between the amount shown on the original tax return and the correct amount, depending on the timing of the amendment.

**Dividends.** Dividends paid to nonresidents are not subject to tax if the dividends are paid out of profits that were taxed at the corporate level (temporal differences can affect this calculation). If the dividends were not taxed at the corporate level, dividends paid to nonresidents are subject to withholding tax at the regular corporate income tax rate of 33%. Dividends paid between domestic corporations are not subject to tax if the company generating the profits out of which the dividends are paid is taxed on these profits in Colombia. Otherwise, the dividends are included in the income tax return of the recipient of the dividends. A 20% withholding tax is imposed on dividends paid to residents out of profits not taxed at the corporate level if the taxpayer is required to file an income tax return.

If the non-taxable dividends in a given year are higher than the commercial profits of that year, the difference can be carried back for two years or carried forward for five years to offset the profits of such periods.

**Foreign tax relief.** For national corporations and resident individuals, a credit for foreign taxes paid on foreign-source income is granted, up to the amount of Colombian corporate income tax and CREE (including the CREE surtax) payable on the foreign-source income.

An indirect tax credit is also granted for foreign taxes paid on income at the level of the foreign company that is distributing corresponding dividends to Colombian shareholders or quota holders. This tax credit equals the amount resulting from the application of the income tax rate of the foreign company to the amount of distributed dividends. If the foreign company distributing the dividends has received dividends from other companies domiciled in the same or other jurisdictions, the tax credit equals the amount resulting from the application of the income tax rate of the foreign company to the amount of the dividends received by the Colombian taxpayer. The sum of the direct tax credit and indirect tax credit may not exceed the corporate income tax and CREE (including the CREE surtax) payable in Colombia on such dividends.

A portion of the of foreign tax credit (direct and indirect) is applied against the income tax liability, and another portion is applied against the CREE (including CREE surtax) liability, depending on the portion that each tax rate represents in the combined income and CREE tax rate (this portion is expected to change every year as a result of the scheduled increase in the CREE surtax for each year).

To be entitled to the direct and indirect tax credit, the domestic taxpayer must prove that the corresponding tax was effectively paid in each relevant jurisdiction. In addition, for the indirect tax credit, the investments must be qualified as fixed assets for the taxpayer and possessed for a minimum of two years.

The tax credit may be claimed in the tax year in which the foreign tax is paid or in any of the following four years.

### **C. Determination of taxable income**

**General.** Taxable income is determined in accordance with the following calculation: gross income, minus non-taxable income, returns, rebates and discounts, equals net income, minus costs and expenses, equals taxable income.

In general, to be deductible, expenses must be related to the activity that generates taxable income and must be proportional and necessary with respect to the productive activity of the taxpayer. Some limitations and prohibitions may apply to the deductibility of certain expenses.

Payments to entities resident outside Colombia are deductible if they meet the general rules above and, for expenses related to Colombian-source income, if the applicable withholding tax is paid. In general, if no withholding tax applies, the expenses are allowed as deductions, up to a maximum of 15% of the taxpayer's net income before taking into account all costs and expenses abroad not subject to Colombian withholding tax. Costs or expenses incurred abroad that are related to foreign-source income subject to income tax in Colombia are deductible if the general requirements are met, even if withholding tax is not imposed, and the 15% limitation mentioned above does not apply.

Branches of foreign companies may deduct the following types of payments made to their foreign related party if the applicable withholding tax is paid:

- Royalties
- Commissions that are related to the acquisition of raw materials or goods
- Administration fees
- Payments for the use or acquisition of intangible property

Interest and other financial expenses resulting from liabilities owed to foreign-related companies are generally not deductible. Payments made to foreign-related parties that comply with the transfer-pricing rules (see Section E) may be deductible even if no income tax withholding is required. However, the 15% limitation described above applies to such payments.

Overhead expenses are deductible for Colombian tax purposes if they are related to services rendered and if they are supported by transfer-pricing studies. It is usually difficult to satisfy these conditions and, as a result, overhead expenses are generally not deductible. Transactions subject to transfer-pricing rules (see Section E) are not subject to the limitations provided in the Tax Code for costs and expenses in transactions involving related parties. Consequently, transactions with foreign related parties that are subject to the transfer-pricing rules are deductible for a Colombian company, even if such payments are not subject to withholding tax. Nevertheless, the limitation provided in Article 122 of the Tax Code (up to 15% of the net income computed before taking into account such expenses) applies.

Income generated from the following activities is exempt from income tax:

- Hotel services (new and remodeled hotels)
- Software and medical patents developed in Colombia
- Fluvial transportation services
- Energy generated from wind and biomass sources, and agriculture disposal

The assets used in the above activities are not included in the base for determining presumptive income (see *Presumptive income*).

Taxable income for CREE is net revenues less costs and certain deductions. Certain exempt income is subject to CREE. The tax base for CREE may not be lower than 3% of the tax equity of the preceding year, which is the base for the calculation of the presumptive income tax (see *Presumptive income*).

**Presumptive income.** Under the Colombian tax law, the tax base for corporate income tax purposes is the higher of actual taxable income (see *General*) or minimum presumptive income, which is equal to 3% of the net equity as of 31 December of the preceding tax year. Certain assets may be excluded from this calculation, and certain taxpayers are not required to calculate presumptive income.

The amount of income tax payable after tax credits may not be less than 75% of the income determined under the presumptive income rules, before taking into account tax credits.

For corporate income tax and CREE calculation purposes, the excess of the presumptive income tax over ordinary net income may be amortized over the following five years.

**Inventories.** Inventories are generally valued using the permanent inventory method.

**Provisions.** Provisions are not allowed as deductions in determining taxable income, except for provisions for accounts receivables, which are subject to special tax rules.

**Depreciation.** Depreciation may be calculated using the straight-line method, declining-balance method or other recognized method authorized in advance by the tax authorities.

Individual assets purchased for up to 50 tax units (for 2015, a tax unit equals COP28,279, or approximately USD12) may be fully depreciated in the year of acquisition.

The following are the general categories of useful lives established by the tax law:

- Buildings, including pipelines: 20 years
- Machinery and equipment: 10 years
- Vehicles and computers: 5 years

If machinery and equipment are used daily in shifts in excess of a regular eight-hour schedule, a taxpayer may request an additional 25% on the depreciation rate for each additional eight-hour shift and a corresponding proportion for a fraction of such shift. Land is not depreciable.

In Colombia, the same depreciation method may be used for both tax and accounting purposes. Differences in the methods may generate future taxable dividends for shareholders if the expense for tax purposes is greater than the expense for accounting purposes.

**Amortization.** In general, amortization of ordinary and necessary investments used for the purposes of the business, including intangibles (for example, know-how) is allowed. Amortization must be claimed over a minimum period of five years, except for certain intangibles, such as software, for which a shorter period may be allowed, if properly justified.

Amortizable costs and expenses for the oil industry may be amortized using the straight-line method over five years, unless a shorter period can be justified. Alternatively, they can be amortized using the units-of-production method. If investments in exploration are unsuccessful, the costs and expenses may be claimed as deductions in the year in which this is determined or in the following two years.

**Relief for tax losses.** Tax losses may be carried forward with no time limitation.

Restrictions apply to the transfer of losses in mergers or spin-offs (tax-free events for the participating companies for Colombian tax purposes if certain requirements are observed). The surviving entity can offset losses originated in the merged entities, but only up to the percentage of its equity participation in the merged entity's equity. Similar rules apply to spin-offs of companies. Tax losses generated do not affect the entity's presumptive income for the respective tax year.

The special treatment of tax losses in mergers and spin-offs applies only if the economic activity of the companies involved remains the same after the merger or spin-off occurs.

**Inflation adjustment.** An optional tax readjustment of fixed assets may be applied. This readjustment is calculated by applying the

percentage certified by the government for the adjustment of the tax unit (see *Depreciation*). The readjustment affects the tax basis for the transfer of fixed assets, presumptive income and the determination of taxable net equity. Although the inflation adjustments were eliminated, the accumulated inflation adjustments can be depreciated.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; imposed, unless expressly excluded by law, on sales of movable tangible assets, on imports of movable tangible assets and on most services	
General rate	16%
Basic products, such as coffee and wheat	5%
National consumption tax, imposed on, among others items, food services in restaurants, mobile phone services and certain cars; the tax paid is deductible for income tax purposes	4% to 16%
Wealth tax; applicable between 2015 and 2017 for companies; and between 2015 and 2018 for individuals; the tax is due if the net equity for tax purposes (gross equity less debts measured in tax terms) as of 1 January 2015 is equal or greater than COP1,000,000,000 (approximately USD428,000); the tax is also payable by foreign companies and individuals who have equity in Colombia, regardless of whether they file tax returns and pay other taxes in Colombia; the tax base is the net equity for tax purposes as of 1 January of each year; however, for 2016, 2017 and 2018, the tax base is the 2015 tax base increased or decreased by a percentage equal to 25% of the inflation of the preceding year; shares or quotas in Colombian companies are excluded from the tax base; other exclusions apply; the tax is neither deductible nor creditable; 2015 rates for companies, which vary according to the amount of net equity	
COP0 to COP2,000,000,000 (rates for 2016 and 2017 are 0.15% and 0.05%, respectively)	0.20%
COP2,000,000,000 to COP3,000,000,000 (rates for 2016 and 2017 are 0.25% and 0.10%, respectively)	0.35%
COP3,000,000,000 to COP5,000,000,000 (rates for 2016 and 2017 are 0.50% and 0.20%, respectively)	0.75%
COP5,000,000,000 or more (rates for 2016 and 2017 are 1.00% and 0.40%, respectively)	1.15%
Industry and commerce tax, on annual or bimonthly net revenue; rates vary depending on the company's activity and municipality; tax effectively paid during the year is 100% deductible for income tax purposes	

Nature of tax	Rate
[approximately USD1,100]); subject to same maximum limitation and integral salary rules as pension contributions; rates vary according to the amount of monthly salary earned by employee	
Employees earning up to 16 minimum wages (COP10,309,600 [USD4,408])	1%
Employees earning monthly between 16 and 17 minimum wages (COP10,309,600 to COP10,953,950 [USD4,408 to USD4,683])	1.2%
Employees earning between 17 and 18 minimum wages (COP10,953,950 to COP11,598,300 [USD4,683 to USD4,959])	1.4%
Employees earning between 18 and 19 minimum wages (COP11,598,300 to COP12,242,650 [USD4,959 to USD5,234])	1.6%
Employees earning between 19 and 20 minimum wages (COP12,242,650 to COP12,887,000 [USD5,234 to USD5,510])	1.8%
Employees earning between 20 and 25 minimum wages (COP12,887,000 to COP16,108,750 [USD5,510 to USD6,887])	2%
Labor risk; payable by employer on monthly ordinary salary; rate depends on a legally established scale based on the degree of risk represented by the economic activity of the company; the Social Security office makes the classification at the time of enrollment; subject to same maximum limitation and integral salary rules as pension contributions	0.348% to 8.7%
Payroll taxes to National Learning Service (SENA), Colombian Family Welfare Institute (ICBF) and Family Compensation Fund; payable by employer on the monthly ordinary salary earned by the employee; no ceiling applies; subject to same integral salary rules as pension contributions; reduced and progressive rates apply to small businesses (see discussion in Section B regarding CREE taxpayers and the SENA and ICBF payroll taxes)	9%
Custom duty, on Cost, Insurance, Freight (CIF) value; general rates	0% to 15%
Real estate tax; municipal tax imposed on the ownership of land or immovable property; tax rate is applied to the commercial value of the property; rate set by the municipality and varies according to the location and use of the property; the tax effectively paid during the tax year is 100% deductible for income tax purposes; general range of rates	0.4% to 3.5%

## E. Miscellaneous matters

**Foreign-exchange controls.** A controlled exchange market and a free market exist. The controlled exchange market primarily covers foreign-trade operations (imports and exports of goods), external indebtedness, foreign investment in Colombia and Colombian investment abroad. Commercial banks and financial institutions administer the controlled exchange market.

Exchange operations that are not covered by the controlled market are conducted through the free market. These operations include the purchase of foreign currency that is used to open free-market bank accounts abroad.

Foreign investors may receive abroad, without limitation, annual profits derived from an investment that is registered with the Colombian Central Bank (Banco de la República de Colombia).

Effective from October 2011, Colombian residents may receive foreign loans from non-Colombian residents without any restriction. However, nonresident individuals are authorized to do so only under certain circumstances (for work capital and pre-financing of exports). Before October 2011, only financial institutions recognized as such by the Colombian Central Bank could lend money to Colombian residents.

**Controlled foreign companies.** Colombia does not have special measures for controlled foreign companies.

**Debt-to-equity rules.** Interest paid on loans (with third parties or related parties) that in average exceeds a 3:1 debt-to-equity ratio is not deductible. For this purpose, the equity taken into account is the taxpayer's net equity for the preceding year, and the debt taken into account is debt that accrues interest.

**Transfer pricing.** The transfer-pricing regime includes several of the methods contained in the Organisation for Economic Co-operation and Development (OECD) rules. However, as a result of rulings of the Constitutional Court, the OECD guidelines may not be directly referred to for purposes of interpretation of the Colombian transfer-pricing rules and are considered auxiliary criteria for interpretation. Significant aspects of the transfer-pricing system in Colombia include the following:

- All events that create economic linkage are specifically mentioned in the tax code.
- The rules do not cover local operations between related companies established in Colombia, except for transactions between local entities and free-trade zone users.
- Parties that have gross equity exceeding 100,000 tax units as of the last day of the tax year or gross revenues for the year in excess of 61,000 tax units must prepare contemporaneous documentation and file transfer-pricing information returns. In addition, information regarding comparables must be sent to the tax authorities in electronic form.
- Penalties are imposed for not meeting filing requirements, submitting erroneous or incomplete reports or failing to meet other requirements.

The tax haven jurisdiction list was first issued in October 2013 and is updated yearly. The last update was issued on 21 October 2014.

**Anti-abuse rules.** Under anti-abuse rules, tax abuse is defined as the use or implementation of a transaction or several transactions for purposes of the following:

- Changing or modifying artificially tax effects that would otherwise have arisen for the taxpayer, or its related parties, shareholders, or effective beneficiaries
- Obtaining a tax benefit

Typically, transactions subject to the anti-abuse rules are those that do not have a valid and reasonable business purpose that serves as the main cause for the transactions.

If at least three of the specified criteria apply (for example, the use of a tax haven or a related-party transaction), the taxpayer must disprove the abuse. For such purpose, the taxpayer must demonstrate business purpose or the market value of the transaction under transfer-pricing methodologies. The Dirección de Impuestos y Aduanas Nacionales (DIAN), which is the tax authority, may recharacterize the transaction, pierce the corporate veil, and assess the tax due together with fines and penalties

The decision that a tax abuse has occurred is made by a body composed of representatives of several governmental institutions, including the director of the DIAN.

## F. Tax treaties

Colombia has entered into a multilateral tax treaty with Bolivia, Ecuador and Peru, which follows the source criteria. In addition, Colombia has double tax treaties in effect with Canada, Chile, India, Korea (South), Mexico, Spain and Switzerland, which are based on the OECD model convention.

Colombia has entered into tax treaties covering certain international air transportation services with several countries, including Argentina, Chile, France, Germany, Italy, Panama, the United States and Venezuela.

On 30 August 2010, Colombia signed a double tax treaty with Portugal. On 22 March 2012, Colombia signed a double tax treaty with Czech Republic. These treaties are based on the OECD model convention. They are not yet in effect.

The following table presents the withholding tax rates for dividends, interest and royalties under the Canada, Chile, India, Korea (South), Mexico, Spain and Switzerland treaties.

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Canada	0/5/15	5/10	10
Chile	0/7/33 (a)	5/15	10
India	0/15	0/5/10	10
Korea (South)	0/15	0/5/10	10
Mexico	0/33	5/10	10
Spain	0/33 (a)	0/5/10	10
Switzerland	0/15	0/5/10	10
Non-treaty countries (b)	0/33	0/5/14/33	26.4/33 (c)

(a) Dividends that are not taxed at a corporate level are subject to the tax rate of 33% at the shareholder level. However, the 33% rate may be reduced if the dividends are exempt from income tax at the corporate level and are reinvested for a three-year term.

(b) For details regarding these rates, see Section A.

(c) The 26.4% rate applies to software.

## A. At a glance

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	35
Branch Tax Rate (%)	35
Withholding Tax (%) (b)	
Dividends	20 (b)
Interest	20 (c)
Royalties	20 (d)
Services	14 (e)
Net Operating Losses (Years)	
Carryback	None
Carryforward	5 (f)

- (a) The corporate income tax rate is 30% for mining companies.  
 (b) The rate of dividend withholding tax for mining companies is 10%.  
 (c) Interest on loans abroad to mining companies is not subject to withholding tax.  
 (d) The net amount of royalties is subject to tax. For this purpose, net royalties equal gross royalties minus professional expenses, or 30% of gross royalties.  
 (e) This withholding tax applies to payments for services provided to Congolese companies by foreign companies and individuals without a permanent establishment in the Democratic Republic of Congo. The tax base is the gross amount of the applicable invoice.  
 (f) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Congolese companies are taxed on the territoriality principle. As a result, companies carrying on a trade or business outside the Democratic Republic of Congo (DRC) are not taxed in the DRC on the related profits. Congolese companies are those registered in the DRC, regardless of the nationality of the shareholders or where the company is managed and controlled. Foreign companies engaged in activities in the DRC are subject to Congolese corporate tax on Congolese-source profits only.

A company is considered to have a business in DRC if it satisfies either of the following conditions:

- It possesses a material facility (for example, head office, branch office, factory, plant, workshop, or buying and selling counter)

or any other fixed or permanent business of a productive nature in the DRC.

- In the absence of a material facility, it carries out a professional activity under its corporate name for at least six months, provided that this activity cannot be considered the providing of technical assistance to a DRC company.

**Rates of corporate tax.** The regular corporate income tax rate is 35%.

The minimum tax payable is 1% of the annual turnover for larger corporations.

For small corporations with annual revenues of less than CDF10 million, the corporate income tax is set at CDF50,000. For average-sized corporations with annual revenues between CDF10 million and CDF80 million, the corporate income tax rate is 1% of the annual revenue for sales of goods and 2% for the provision of services.

The corporate income tax rate is 30% for companies holding mining or quarry titles.

**Capital gains.** Increases resulting from capital gains and depreciation that are realized and either realized or expressed in the accounts or inventories are included in profits and are subject to tax at a rate of 35%.

Increases resulting from unrealized capital gains that are expressed in the accounts or inventories and that are not treated as profits are immunized. This immunization applies only if the taxpayer holds a regular accounting and if it fulfills its declarative obligations.

The capital gain remains incorporated in the property until the property is alienated. If the property is alienated, the capital gain is treated in accordance with Article 35 of Law No. 69-009 of 10 February 1969.

Unrealized capital gains are not taken into account, except in companies limited by shares, to determine the incoming or outgoing partners' shares.

Capital gains are not subject to depreciation or mandatory distribution or withdrawal. They are not used in determining the distribution of the profits or the calculation of the annual allocation of the legal reserve, remunerations or assignments.

A social credit (income paid in case of the retirement of a partner or the restructuring of a company) is not distributed even if a partner retires or if a merger of companies (through the creation of a new company or by the absorption of another company) takes place.

Capital gains remain in a special account distinct from the accounts of reserves or capital. If any of the conditions mentioned above is not satisfied, capital gains are considered to be profits derived during the fiscal year in which the conditions are not satisfied.

Increases resulting from realized capital gains on buildings, tools, materials and movable assets (whether or not resulting from rent

payments), as well as on participations and portfolios, are taxable to the extent that the sales price exceeds the acquisition price or cost. A deduction is made from the amount of the depreciation that has already been claimed for tax purposes.

**Administration.** The fiscal year extends from 1 January to 31 December. Tax returns must be filed by 30 April.

Corporate tax must be paid in two installments before 1 August and 1 December. Each installment must be equal to 40% of the previous year's tax. The balance of tax due must be paid by the following 30 April.

A penalty of 4% per month is assessed for late payment of tax. Tax is fixed automatically if a tax return is not filed.

**Dividends.** Dividends paid are subject to a 20% withholding tax.

**Foreign tax relief.** In general, foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared in accordance with principles set by the Organization for the Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) Accounting Act. The net amount of income is taxed. This amount equals gross income minus business expenses incurred during the tax year to acquire and retain the income. Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office, remuneration or management fees for services paid to nonresidents that are not justified
- Head office overhead or remuneration for certain services (studies and technical assistance) paid to nonresidents
- Expenditure of a personal nature, such as maintenance of household, appraisal fees, holidays and other expenses not necessary for the profession
- Corporate income tax, as well as real tax (tax on movable assets, tax on vehicles or tax on mining concessions), to the extent that the real tax does not constitute an operating expense
- All judicial or administrative fines, and fees and charges relating to breaches by income beneficiaries
- Certain specific charges, gifts, subsidies and penalties
- Directors' fees allocated under the Corporations Act to members of the General Council
- Expenditures on leased property, including depreciation of the property
- Provisions for losses, expenses or depreciation of assets, excluding provisions for the recovery of mineral deposits and provisions for the recovery of bank capital
- Commissions and brokerage fees if it cannot be proven that the tax on turnover (see Section D) has been paid for these items
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)

**Inventories.** Inventories are normally valued at their historical cost or acquisition cost.

**Provisions.** In determining accounting profit, companies must implement certain provisions, such as a provision for risk of loss or for certain expenses. These provisions are not deductible for tax purposes. However, provisions for recovery of bank capital and provisions for the recovery of the mineral deposit are deductible for tax purposes.

**Tax depreciation.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	2 to 5
Office equipment	10
Motor vehicles	20 to 25
Plant and machinery	10

Companies can also opt for a regressive method for tax depreciation with an annual rate of two to three times the straight-line rate.

**Relief for tax losses.** On the specific request of a taxpayer, tax losses incurred in a tax year may be deducted from profits in the following five tax years. Losses attributable to depreciation may be carried forward indefinitely. The deduction of the available tax losses is capped to 70% of the annual tax profit.

**Groups of companies.** The DRC does not have a fiscal integration system equivalent to a consolidated filing position.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax	16
Payroll taxes	
Annual income not exceeding CDF22,956,000; progressive rates	0 to 40
Annual income exceeding CDF22,956,000; flat rate	30
Exceptional income tax (IERE)	
Mining companies	10
Other companies	25
Social Security National Institute (Institut national de sécurité sociale, or INSS) contributions; payable monthly	
Employers	9
Employees	3.5
National Institute for Professional Preparation (Institut national de préparation professionnelle, or INPP); payable monthly by employers	1 to 3
National Agency for Labor (Office National de l'Emploi or ONEM); payable monthly by employers	0.2

#### **E. Miscellaneous matters**

**Foreign-exchange controls.** The currency in the DRC is the Congolese franc (CDF). The exchange rate is variable.

In the DRC, the Central Bank of Congo regulates foreign-exchange controls. It also supervises the regulation on the transfer of currency. Money held in cash on entering into and exiting from the DRC is not subject to restrictions if it does not exceed the equivalent of USD10,000. An exchange royalty of 0.2% is levied on payments to or from abroad.

**Transfer pricing.** The Congolese tax law contains the transfer-pricing measures described below.

Amounts paid by a DRC company to a person or a foreign entity with which it is linked (through direct participation in its capital or through the holdings by one or more other companies in the same group) for compensation for services rendered may be deducted only if the following conditions are satisfied:

- The reality of the service is clearly demonstrated.
- The service in question cannot be performed in the DRC.
- The amount of compensation corresponds to the actual value of the service (not artificially increased).

All advantages and subsidies granted to companies belonging to the same group are considered as “normal act of management” if the granting company can provide a justification (other than the companies being members of the group) for such grants. If not, the advantage and subsidy is recharacterized as an “abnormal act of management” and reintegrated into the corporate income tax base.

Royalties and interest paid by a DRC company to another company located in a tax haven are reintegrated into the corporate income tax base for the DRC company if the DRC company cannot prove that the operation is real and that the amount paid corresponds to the actual value of the operation (not artificially increased).

Interest paid by a DRC company to foreign partners or any other persons who are directly or indirectly in any form of interdependence with this company is deductible only if the principal repayment occurs within five years from the granting of the loan and if the interest rate does not exceed the average interbank rate internationally recognized in the month of payment of the principal.

Transfer-pricing documentation that describes and justifies inter-company transactions and the group structure must be maintained and available at the request of the tax administration.

Any payment considered to be transfer of income is adjusted by the tax administration.

## **F. Tax treaty**

The DRC has entered into double tax treaties with Belgium and South Africa.

## A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (b)
Branch Tax Rate (%)	20 (c)
Withholding Tax (%)	
Dividends	20 (d)
Interest	20
Royalties from Patents, Know-how, etc.	20
Payments for Non-commercial Services and Activities	5
Revenues Earned by Certain Foreign Companies	7.7/20 (e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The minimum tax is 1% of turnover. The corporate income tax rate is 25% for agricultural companies.
- (b) In certain circumstances, the tax is deferred or reduced (see Section B).
- (c) The branch tax is calculated on the basis of the net profit decreased by the amount of the corporate income tax, to which a tax rebate of 30% is applied.
- (d) This tax also applies to directors' fees, nondeductible expenses and adjustments of profits following a tax examination. For directors' fees, the rate is 22%.
- (e) For details, see Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Congolese companies are taxed on the territoriality principle. As a result, Congolese companies carrying on a trade or business outside Congo are not taxed in Congo on the related profits. Congolese companies are those registered in Congo, regardless of the nationality of the shareholders or where the company is managed and controlled. Foreign companies engaged in activities in Congo are subject to Congolese corporate tax on Congolese-source profits only.

**Tax rates.** The regular corporate income tax rate is 30%.

The minimum tax payable is 1% of the annual turnover and cannot be less than XAF1 million (or XAF500,000 if turnover is less than XAF10 million a year). A 2% minimum tax is payable by companies that incur tax losses in two consecutive years. It appears that the 2% rate is applied to the sum of gross turnovers and products and benefits realized by the company in the most recent year in which it earned a profit. In general, the 2% tax is not deductible for corporate income tax purposes. However, in the company's first profit-making year after incurring the losses, one-half of the 2% tax is deductible.

The corporate income tax rate is 25% for agricultural companies, micro-finance companies and private educational institutions registered as companies.

The corporate income tax rate is 30% for mining companies and real estate companies.

The branch tax is imposed at a rate of 20%. It is calculated on the basis of the net profit decreased by the amount of the corporate income tax, to which a tax rebate of 30% is applied.

A withholding tax at a rate of 7.7% is imposed on the turnover of foreign companies without a registered branch in Congo that are engaged in legally authorized activities there. A 20% withholding tax is imposed on income sourced in Congo that is derived by foreign companies not engaged in activities in Congo.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies depending on the nature of the project and the level of investments.

The Charter of Investments may grant a tax exemption for a three-year period for new activities in industry, agriculture, forestry and mining. In addition, under the General Tax Code, a tax exemption for a two-year period may be granted for such new activities.

**Capital gains.** Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if the proceeds are used to acquire new fixed assets in Congo within three years or in the event of a merger.

If the business is totally or partially transferred (directly or indirectly) or discontinued, only one-half of the net capital gains is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased. The total gain is taxed, however, if the business is not carried on in any form by any person.

Capital gains derived by natural or legal entities domiciled abroad on the sale of all or part of their shares in the capital of companies registered under Congolese law are subject to a special tax at a rate of 20%. This withholding tax is payable at the time of registration of the deed of assignment.

**Administration.** The fiscal year extends from 1 January to 31 December. Tax returns must be filed by 20 May.

Companies must pay the minimum tax between 10 March and 20 March, and corporate tax must be paid in four installments between the 10th and 20th days of February, May, August and November. Each installment must be equal to 20% of the preceding year's tax. The balance of tax due must be paid by the following 20 May.

A 50% penalty is assessed for late payment of tax.

**Dividends.** Dividends paid are subject to a 20% withholding tax. Resident corporations are taxed on the gross dividend; a corresponding 20% tax credit is available for double tax relief.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are accordingly subject to the 20% withholding tax on dividends.

A parent corporation may exclude the net dividends received from a Congolese or foreign subsidiary if the following conditions are satisfied:

- The parent company is a Congolese joint stock company or limited liability company that holds 30% or more of the capital of the subsidiary, which is also a joint stock company or limited liability company.
- The subsidiary carries on only industrial, agricultural, mining, forestry, large-scale fishing or stock-breeding activities.

No withholding credit is allowed if the net dividends are excluded.

A Congolese joint stock company or limited liability company may exclude 90% of the net dividends received from a joint stock company or limited liability company located in Congo or another Central African Economic and Monetary Community (CEMAC) country if the parent company holds 25% or more of the capital of the payer of the dividends.

**Foreign tax relief.** In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable net of the foreign tax. A tax treaty with France, however, provides a tax credit on dividends.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the standard statements of the Organization for Harmonization of Business Law in Africa (OHADA) treaty. The members of OHADA are Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of), Congo (Republic of), Côte d'Ivoire, Equatorial Guinea, Gabon, Guinea, Guinea-Bissau, Mali, Niger, Senegal and Togo.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office overhead or remuneration for services paid to non-residents that exceeds 20% of taxable income before the deduction of such items
- Head office fees or remuneration for certain services (studies and technical assistance) paid to nonresidents by companies engaged in building and public works, by engineering firms and by accounting firms, to the extent that the expenses exceed 2% of turnover
- Royalties from patents, brands, models or designs paid to a non-resident corporation participating in the management of, or owning shares in, the Congolese corporation
- Interest paid to a shareholder in excess of a 5.25% annual rate and, if the shareholder is in charge of management, interest on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, gifts, subsidies and penalties
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)
- Corporate income tax

**Inventories.** Inventory is normally valued at the lower of cost or market value.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are likely to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Tax depreciation.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

<b>Asset</b>	<b>Rate (%)</b>
Commercial and industrial buildings	5
Office equipment	15
Motor vehicles	20 to 33.33
Plant and machinery	10 to 33.33

Heavy new assets acquired for manufacturing, transformation, transport and handling qualify for a special depreciation allowance at a rate of 40% in the year of acquisition if all of the following conditions are satisfied:

- The assets are used only in industrial, forestry or agricultural activities.
- The assets can be used for a period exceeding three years.
- The total value of the assets exceeds XAF40 million.
- The assets will be intensively used.

**Relief for tax losses.** Losses may be carried forward for three years. Losses attributable to depreciation may be carried forward indefinitely, but they must be reported on the depreciation table. Losses may not be carried back.

**Groups of companies.** The Congolese tax law provides for a fiscal integration system and a fiscal regime for holding companies with tax exemptions, particularly with respect to capital gains, dividends and interest on loans.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	18.9
Business activity tax ( <i>patente</i> ); calculated based on annual turnover according to sliding scale	1 to 0.055
Registration duties, on transfers of real property or businesses	4 to 15
Tax on salaries (TUS)	7.5
Social security contributions, on annual salaries; paid by Employer	
Family allowance contribution	10.035
Work accident insurance	2.25
Old-age pension	8
Employee	
Old-age pension	4

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Congolese currency is the CFA franc BEAC (XAF). The fixed exchange rate for the CFA franc BEAC is XAF655,957 = EUR1.

Exchange-control regulations exist in Congo for financial transfers outside the franc CFA zone (XAF zone), which is the monetary zone including France and its former overseas colonies.

**Transfer pricing.** The Congolese tax law contains the transfer-pricing measures described below.

Amounts paid by a Congolese company to a company or a group of companies located outside Congo are considered indirect transfers or profits if the payer is dependent *de jure* or *de facto* on the recipient of the payments and if the tax authorities establish that the payments are excessive or unjustified. This measure applies to certain transactions, including the following:

- Overcharges for purchases
- Payments of excessive royalties
- Loans that are interest-free or have unjustifiable rates
- Discounts of debts
- Advantages granted out of proportion with the benefit provided by a service provider

Payments for the use of patents, marks, drawings and models, interest payments and payments for services made by a Congolese company to a nonresident company located in a country with low or no taxation, are considered indirect transfers of benefits unless the Congolese company proves that the payments correspond to real operations and that they are not excessive.

**F. Treaty withholding tax rates**

The withholding rates under a treaty with France are listed in the following table.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
France	15/20 (a)	0 (b)	15
Non-treaty countries	20	20	20

- (a) The 15% rate applies if the recipient of the dividends is a French joint stock company that holds directly 10% or more of the capital of the Congolese company. The 20% rate applies to other dividends.
- (b) Interest is subject to tax in the recipient's country. Withholding tax is not imposed in the country of source.

- (a) The 30% rate is reduced to 10% or 20% for companies whose annual gross income does not exceed specified amounts (see Section B).
- (b) See Section B.
- (c) This withholding tax applies to dividends paid to non-domiciled business entities and to domiciled and non-domiciled individuals (see Section B). The withholding tax is considered a final tax.
- (d) This is a final withholding tax that is imposed on non-domiciled companies and non-domiciled individuals.
- (e) For detail regarding interest withholding tax, see Section B.
- (f) Non-domiciled companies engaged in these types of activities through a permanent establishment in Costa Rica that do not comply with requirements to report income or to file an income tax return may be subject to an imputed amount of taxable income equivalent to 15% of their total gross income derived in Costa Rica. Imputed taxable income is subject to the ordinary corporate income tax rate. For further details, see Section C.
- (g) Resolution DGT-R-036-2014 established a 2% withholding requirement for debit or credit card payments processed by financial institutions in Costa Rica, effective from 1 December 2014. The amounts withheld by the financial institutions are treated as advance payments of the recipient's final income tax liability. The 2% withholding requirement applies only to 88% of the amount of the transaction made with a debit or credit card. The following persons are exempted from this withholding requirement:

- Entities not subject to income tax
  - Companies under the simplified tax regime
  - Transporters of persons or goods
  - Gas stations
  - Taxpayers engaged in agricultural activities that do not have an obligation to make partial income tax payments
  - Taxpayers that generally do not have an obligation to make partial income tax payments
- (h) Resolution DGT-R-35-2014 established that financial entities must withhold 2% on payments made for “professional services” used during the formalization process for financial products, effective from 1 December 2014.
- (i) Industrial companies may carry forward net operating losses incurred in the first five years of operations for five years. They may carry forward net operating losses incurred in subsequent years for three years. Agricultural companies may carry forward net operating losses for five years.

## B. Taxes on corporate income and gains

**Corporate income tax.** The Costa Rican tax system is a territorial regime; consequently, income derived from Costa Rican sources is subject to tax.

**Corporate income tax rates.** The corporate tax rate for the 2015 fiscal year is 30% for resident and nonresident companies. However, companies with annual gross income of up to CRC52,710,000 (approximately USD97,250) are subject to an income tax rate of 10%. Companies with annual gross income between CRC52,710,001 and CRC106,026,000 (approximately USD195,620) are subject to an income tax rate of 20%. These tax brackets are adjusted annually.

Companies operating under the Free Trade Zone Regime that are located in the Great Extended Metropolitan Area (GEMA) benefit from an income tax exemption of 100% for the first eight years and of 50% for the next four years. Companies located outside the GEMA benefit from an income tax exemption of 100% for the first 12 years and of 50% for the next 6 years. The Ministry of National Planning and Economic Policy specifies which areas are considered part of the GEMA.

On 13 July 2007, the World Trade Organization Committee on Subsidies and Countervailing Measures agreed to adopt the text of a draft decision of the General Council to continue procedures for the extension until 2015 of the transition period for the elimination of the export subsidy programs of 19 developing countries, including Costa Rica. Based on the above action and to comply with Costa Rica’s commitments as a member of the World Trade Organization, on 22 January 2010, the executive branch of the Costa Rican government published Law 8794 which amends and adds certain sections to the Free Trade Zone Regime Law No. 7210. The new law creates a new category of companies that can apply for the Free Trade Zone Regime. This category is for companies that produce or process goods, regardless of whether the goods are for exportation. Companies in this new category are subject to income tax at reduced rates (0%, 5%, 6% or 15%) for a specified number of years depending on whether the company is located inside or outside the GEMA or depending on the amount of the investment. For companies in any of the other categories listed in the law, the benefits remain the same until 31 December 2015.

**Capital gains.** Capital gains are taxable and capital losses are deductible if they result from the transfer of depreciable assets or

from the transfer of non-depreciable assets in the ordinary course of a trade or business. Taxable capital gains are treated as ordinary income and are subject to tax at the normal corporate income tax rate.

**Administration.** The statutory tax year runs from 1 October through 30 September. Companies must file annual corporate income tax returns and pay any tax due within 2 months and 15 days after the end of the tax year. Subsidiaries of foreign companies may request permission to use the parent company's fiscal year in filing their returns. In addition, certain agricultural companies may use the calendar year or other fiscal year.

The current-year tax liability must be paid in quarterly installment payments, which are based on the preceding year's income tax paid or the average of the last three years' tax liability, whichever is higher. If a company did not file a return for the last three years, the installment payments are calculated based on the tax liability from the last year a return was filed. New companies must make quarterly payments based on their first-year projected income, which must be reported to the tax authorities on or before the last day of January. If no projected income is reported, the tax authorities determine the quarterly tax payments based on an imputed income amount.

Companies defined by tax authorities as National Large Taxpayers or Large Territorial Companies must file audited financial statements within six months following the end of the company's fiscal year.

In addition, Resolution No. DGT-R-30-2014, effective from 5 August 2014, requires National Large Taxpayers to update their relevant tax information using a new web-based platform called AMPO within 15 business days of the date the platform becomes available or 10 business days after already submitted information changes. Taxpayers that become classified as National Large Taxpayers after the obligation becomes effective must submit the tax information within 15 days after being notified of their National Large Taxpayer status by the tax authorities. The relevant tax information to be provided includes, among other items, the following:

- Agencies
- Branches or commercial premises
- Mergers
- Royalty payments for the use of intangible assets
- Equity participation in other entities
- Participations in economic groups

The platform is not yet available.

**Dividends.** Dividends paid between resident corporations, limited liability companies and partnerships with stock are not taxable. A 15% withholding tax is imposed on dividends paid to domiciled and non-domiciled individuals or to non-domiciled business entities. If the shares on which dividends are paid were purchased through a local stock exchange, the withholding tax rate is reduced to 5%. Distributions by companies of their own shares are not taxable. Under the Income Tax Law, domiciled companies include companies incorporated in Costa Rica and companies that have a permanent establishment in Costa Rica.

**Interest.** On 9 October 2014, the Costa Rican Congress approved a tax reform (Law No. 7294), which modified in its entirety the rates applicable to interest payments made abroad and repealed the special exemption for non-domiciled banks and financial entities recognized by the Costa Rican Central Bank. At the time of writing, the law was expected to be enacted in a few days on publication in the *Official Gazette*. The new law applies immediately to loans signed on or after the entry into force of the law. Under the new law, interest, commissions, financial expenses and lease payments of capital assets paid to non-domiciled individuals or legal entities are subject to a 15% withholding tax rate. Interest, commissions, financial expenses and lease payments for capital assets paid to foreign banks that are part of a Costa Rican financial group or conglomerate regulated by the Costa Rican Financial System (Consejo Nacional de Supervisión del Sistema Financiero, or CONASIFF) are subject to a withholding tax rate of 5.5% during the first year of application of the new law, 9% during the second year, 13% during the third year and 15% beginning with the fourth year. Interest, commissions and financial expenses paid by entities regulated by the Superintendence of Financial Entities (Superintendencia General de Entidades Financieras, or SUGEF) to foreign entities that are also regulated and supervised in their jurisdictions are subject to a 5.5% withholding tax rate. An exemption applies to interest, commissions and financial expenses paid to multilateral development banks and other institutions of multilateral or bilateral development, as well to other nonprofit entities that are not subject to tax. Loans existing on the date of entry into force of the reform remain subject to the old withholding tax treatment (with the exemption available for interest payments to non-domiciled banks and financial entities recognized by the Costa Rican Central Bank) during a six-month transitional period.

**Foreign tax relief.** Costa Rican taxpayers may deduct foreign taxes paid abroad when calculating their taxable income if the taxes are levied on assets, services or activities that constitute that taxpayer's usual trade or business and if those assets, services or activities produce income that can be taxed by the Costa Rican tax authorities.

### C. Determination of trading income

**General.** Income tax is determined in accordance with International Accounting Standards (IAS), subject to adjustments required under the Costa Rican Income Tax Law and general resolutions issued by the tax authorities. Taxable income includes all income derived from Costa Rican sources, such as income from industrial, agricultural and trade activities in Costa Rica, income from services rendered in Costa Rica and income derived from real estate transactions, assets, capital, goods and rights invested or used in Costa Rica.

**Imputed income.** The tax authorities may assess imputed income in the cases described below.

*Non-domiciled companies that do not file tax returns.* Non-domiciled companies engaged in certain types of activities in Costa Rica through a permanent establishment that do not comply with requirements to report income or file income tax returns are

subject to an imputed income assessment equal to a specified percentage of their Costa Rican gross income, unless they provide evidence of a lower amount of actual income. For example, documentation supporting an allocation of income between Costa Rica and other countries would prove that all income is not Costa Rican source. The amount of the imputed income assessment is subject to tax at the normal income tax rate. An income tax percentage of 15% for determining imputed income applies to the following activities:

- Transport and telecommunications
- Reinsurance
- Media, cinema and international news

*Airlines, maritime shipping and transportation companies.* Airlines, maritime shipping and transportation companies may enter into an agreement with the tax authorities to compute Costa Rican taxable income using a special formula based on the company's worldwide and local revenues.

*Loan and financing transactions.* Unless the taxpayer provides evidence to the contrary, loan and financing transactions are deemed to derive a minimum amount of interest based on the highest active interest rate fixed by the Banco Central de Costa Rica (central bank) for lending and financial transactions or, if this rate is not available, on the average market rate being charged in the Costa Rican banking system. The tax authorities do not allow any exceptions to this rule unless the parties entered into a formal written loan or financing agreement.

**Inventories.** The Costa Rican Income Tax Regulations provide that acquisition cost must be used to record assets. The acquisition cost may be computed using several valuation methods, such as the first-in, first-out (FIFO), last-in, first-out (LIFO) and weighted average cost.

**Provisions.** In general, provisions, including provisions for contingent liabilities such as doubtful accounts and severance pay, are not deductible expenses. However, actual payments of such liabilities are considered to be deductible expenses.

**Tax depreciation.** Depreciation may be computed using the straight-line or the sum-of-years' digits method. The tax authorities may allow a special accelerated depreciation method in certain cases. The tax authorities may authorize other methods based on the type of asset or business activity. The method chosen must be applied consistently. Depreciation is computed based on the useful life of the asset as specified in the Income Tax Regulations. The following are some of the straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	2/4/6
Plant and machinery	7/10/15
Vehicles	10/15/34
Furniture and office equipment	10
Tools	10

**Relief for losses.** Industrial companies may carry forward net operating losses incurred in their first five years of operation for five years and they may carry forward net operating losses incurred in subsequent years for three years. Agricultural companies

may carry forward net operating losses for five years. Net operating losses may not be carried back.

**Groups of companies.** Costa Rican law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Sales tax	13%
Real estate transfer tax; the definition of "transfer" includes indirect transfers in addition to direct transfers of immovable property; indirect transfers are the transfer of control over the legal owner of immovable property	1.5%
Vehicle transfer tax	2.5%
Customs duties	
Agricultural products; average rate	12.72%
Industrial products; average rate	4.69%
Certain raw materials and machinery and equipment (Certain specified goods and merchandise are subject to higher rates of customs duty.)	0
Real estate tax (assessed and collected by the municipalities)	0.25%
Payroll taxes; withheld by employers; paid by employee; rate depends on compensation level	0%/10%/15%
Social security contributions	
Employer	26.17%
Employee	9.17%
Municipal taxes (varies by municipality)	Various
Solidarity Tax for the Strengthening of Housing Programs; (Solidarity Tax) contained in Law No. 8683; effective from 1 October 2009 through 1 October 2019; purpose of the tax is to finance public housing programs; tax applicable to residential property that is used habitually or occasionally or for recreational purposes, that the taxpayer owns or has the right to use and that is located in Costa Rica; taxpayers are subject to the tax if the value of the infrastructure (permanent structures, such as houses, swimming pools and parking lots) exceeds CRC121 million (approximately USD221,790); the value of the infrastructure must be updated every 3 years during the first 15 calendar days of the corresponding tax year in accordance with the parameters established by the tax authorities; if the taxpayer is subject to the tax (that is, meets value threshold for the infrastructure) the tax base is computed as the total value of the infrastructure (not just the excess of CRC121 million) plus the value of the land as of 1 January, based on a specific zoning model determined by tax authorities;	

<b>Nature of tax</b>	<b>Rate</b>
hotel businesses may be subject to the tax depending on their operating model and the type of infrastructure; the tax is paid annually and is due on 15 January of the current tax year (for example, for a fiscal year-end of 31 December 2014, the tax is due by 15 January 2014); Solidarity Tax is independent from the other real estate taxes and is not deductible for income tax purposes; the tax rates are progressive	0.25% to 0.55%
Companies Tax; imposed on all commercial entities (including, among others, corporations, limited liability companies and branches) that are registered or will register with the National Registry	
Active entities registered with the tax authorities; tax equals 50% of base salary	CRC199,700 (approximately USD366)
Inactive entities; tax equals 25% of base salary	CRC99,850 (approximately USD183)

### **E. Foreign-exchange controls**

The currency in Costa Rica is the colón (CRC). As of 24 October 2014, the exchange rate of the colón against the US dollar was CRC545.44 = USD1.

No restrictions are imposed on foreign-trade operations or foreign-currency transactions.

### **F. Tax treaties**

Costa Rica has entered into an income tax treaty with Spain. Costa Rica has not entered into an income tax treaty with any other country.

The following are the withholding tax rates under Costa Rica's tax treaty with Spain.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	%	%	%
Spain	5/12 (a)	5/10 (b)	10
Non-treaty countries (c)	15	15	25

- (a) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 20% of the capital of the entity paying the dividends.
- (b) The 5% rate applies if the term of the loan agreement under which the interest is derived is five years or longer.
- (c) For further details, see Section A.

### A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (b)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%)	
Dividends	2/10/15 (c)
Directors' Fees and Nondeductible Expenses	12
Interest	18 (d)
Royalties from Patents, Know-how, etc.	20
Payments for Services	20 (e)
Branch Remittance Tax	7.5 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) For details concerning the minimum tax, see Section B.

(b) See Section B.

(c) For details concerning these rates, see Section B.

(d) The withholding tax rate is 6.75%, 8.25%, 13.5% or 16.5% in certain cases if the income is received through a bank or if the income is deposited by a holding company. The withholding rate on "lots" (exceptionally high bond discounts given only for certain specified bonds selected at random) is 25%. The withholding tax is imposed on the amount of the discount.

- (e) This withholding tax applies to payments by resident companies for services rendered by nonresidents who do not maintain a professional office in Côte d'Ivoire. For premiums paid to nonresident reinsurance companies, the rate is 12.5%.
- (f) On one-half of the before-tax profit (18% if the profit is exempt from corporate tax). See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are taxed on the territoriality principle. As a result, companies carrying on a trade or business outside Côte d'Ivoire are not taxed in Côte d'Ivoire on the related profits. Resident companies are those registered in Côte d'Ivoire, regardless of the nationality of the shareholders or where they are managed and controlled. Foreign companies with activities in Côte d'Ivoire are subject to corporate tax on local-source profits if they have a permanent establishment in Côte d'Ivoire.

**Tax rates.** The regular corporate income tax rate is 25%.

The minimum tax is 0.5% of turnover. For oil-producing, electricity and water-producing companies, the rate is reduced to 0.1%. The rate is reduced to 0.15% for banks and financial companies and for insurance companies. The minimum tax may not be less than XOF3 million or more than XOF35 million. New corporations are exempt from the minimum tax for their first fiscal year, and mining companies are exempt from the minimum tax during the exploration phase.

Profits realized in Côte d'Ivoire by branches of foreign companies are deemed to be distributed and therefore are subject to a branch withholding tax on one-half of the before-tax profit at a rate of 15% (effective rate of 7.5%).

Corporations may apply for various categories of priority status and corresponding tax exemptions. Priority status varies depending on the nature of the project and the level of investments. Corporate tax reductions and temporary tax exemptions are granted to new industrial businesses for investments in industrial buildings and building sites, land for development, and industrial and agricultural establishments.

**Capital gains.** Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if the proceeds are used to acquire new fixed assets in Côte d'Ivoire within three years or in the event of a merger (or other acquisition).

If the business is totally or partially transferred or discontinued, only one-half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gain is taxed if the event occurs five years or more after the business is begun or purchased.

The total gain is taxed, however, if the business is not carried on in any form by any person.

Capital gains derived by holding companies are exempt or are taxed at a rate of 12% if certain conditions are satisfied.

**Administration.** The financial year is from 1 January to 31 December. Corporate financial statements and corporate results must be filed by 30 April of the year following the financial year.

Companies must pay corporate income tax in three equal installments, which are due on 20 April, 20 June and 20 September of the year following the financial year.

Late payments are subject to a penalty of 5% for the first month, plus 0.5% for each additional month or part of a month.

Late submissions of financial statements are subject to a penalty of XOF1 million plus XOF100,000 for each month or part of a month of the delay.

If the lateness of a submission exceeds three months, the penalty is XOF2 million plus XOF200,000 for each month or part of a month of the delay.

**Dividends.** Dividends paid by listed companies out of profits taxed at the 25% corporate tax rate are subject to a 10% withholding tax. A 15% withholding tax is imposed on dividends paid by other companies out of profits taxed at the 25% corporate tax rate. A special withholding tax rate of 2% applies to certain types of bonds issued in Côte d'Ivoire.

A parent company may exclude up to 95% of dividends received from a 10%-owned subsidiary (regime of holding companies and subsidiaries). If less than a 10% interest is held, a listed company may exclude 90% of the dividends received while an unlisted company may exclude 50%.

**Foreign tax relief.** In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from tax in Côte d'Ivoire under the territoriality principle is taxable, net of the foreign tax. However, a tax treaty may provide for a tax credit.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to the Accounting System of the Organization for African Business Law Harmonization. Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Gifts (except those granted to certain associations engaged in social, sporting, scientific or cultural development)
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)
- Subsidies
- Corporate tax
- Penalties

Services fees and royalties paid by Ivorian companies to resident and nonresident parent companies are deductible if the following conditions are satisfied:

- The payer proves that the payments are related to real operations and that the amount of the payments is normal.
- The amount of the payments does not exceed 5% of the turnover and 20% of the overhead of the payer.

Payments to resident companies are also subject to the same two conditions mentioned above.

Under certain tax treaties of Côte d'Ivoire, amounts paid to nonresident companies are deductible for tax purposes based on the same conditions as those applicable to payments to resident

companies. Even if such treaties apply, the payer must satisfy the two conditions mentioned above in order to deduct the payments.

The deduction of services fees and royalties paid by resident companies to other resident companies is subject to the second condition mentioned above (5% of the turnover and 20% of the overhead). As a result, the non-discrimination clause provided for by certain tax treaties does not apply, and services fees and royalties paid by resident companies to nonresident companies are deductible under the conditions mentioned above.

**Inventories.** Inventory is normally valued at the lower of cost or market value. Cost must be determined on a weighted average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at the following rates.

Asset	Rate (%)
Buildings	5
Light construction	10
Loud machinery	10
Stationary machinery	20
Fixtures	10
Office and home chattels	10
Office equipment	20 to 25
Motor vehicles	33.33
Other specified vehicles and engines	20 to 25
Computers and software	20 to 50

**Relief for tax losses.** Losses may be carried forward five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** The law does not contain any provision for the fiscal integration of related companies equivalent to a consolidated filing position. However, a parent-subsidiary tax regime exempts dividends and capital gains from tax under certain conditions.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods and services sold in Côte d'Ivoire	18
Turnover tax (tax on banking operations), on interest paid to and services rendered by banks and financial companies	10
Special tax on equipment; based on turnover; applicable to all companies	0.1

Nature of tax	Rate (%)
Business activity tax ( <i>patente</i> ), based on the turnover and the rental value of tangible assets	Various
Withholding tax, on amounts invoiced by importers, producers and sellers to persons subject to commercial or agriculture tax (entitles the buyer to a credit against withholding tax or VAT payable on its sales)	Various
Registration duties, on transfers of real property or businesses	1 to 10
Special tax on subcontractors of petroleum companies; a global tax including income tax, payroll taxes, a tax on shares, a national solidarity tax and an insurance tax; on taxable turnover	5.786
Payroll tax, paid by employers on salaries of	
Employees from Côte d'Ivoire	2.8
Expatriates	12
Social security contributions	
Retirement, on monthly salaries up to XOF1,647,315; paid by	
Employer	7.7
Employee	6.3
Family allowances, on monthly salaries up to XOF70,000; paid by employer	5.75
Industrial injuries, on monthly salaries up to XOF70,000; paid by employer	2 to 5

## E. Miscellaneous matters

**Foreign-exchange controls.** Exchange control regulations apply to financial transfers outside the franc zone, which is a monetary zone including France and its former overseas colonies.

**Transfer pricing.** Côte d'Ivoire does not have transfer-pricing regulations, but it has provisions addressing tax avoidance.

## F. Treaty withholding tax rates

Côte d'Ivoire has signed a multilateral tax treaty with the other members of the West African Economic Community (Communauté Economique de l'Afrique de l'Ouest, or CEAO), which are Burkina Faso, Mali, Mauritania, Niger and Senegal.

The country also signed a multilateral tax treaty in the framework of the Common African and Mauritian Organization (Organisation Commune Africaine et Mauricienne, or OCAM). This treaty was also signed by Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Congo, Congo (Democratic Republic of the), Gabon, Madagascar, Mauritius, Niger, Rwanda, Senegal and Togo.

The two international organizations mentioned above have been dissolved. However, the Ivorian tax administration considers the above multilateral tax treaties to be still applicable, provided that reciprocity exists.

Côte d'Ivoire has signed a new treaty with the countries of the West African Economic and Monetary Union (WAEMU). This tax treaty has applied for some tax items since 2009. It is wholly applicable, effective from 1 January 2010. The members of WAEMU are Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	%	%	%
Belgium	15	16	10
Benin	10	15	15
Burkina Faso	10	15	15

Carryforward	5

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide income. A company is resident in Croatia if its legal seat or its place of management and supervision is located in Croatia. Branches of foreign companies are subject to tax only on their profits derived from Croatia.

**Tax rate.** The rate of corporate income tax is 20%.

**Tax incentives.** Tax exemptions and other tax reliefs are available in accordance with the Croatian Corporate Income Tax Act and special legislation regulating incentives. For example, the Investment Promotion and Development of Investment Climate Act provides incentives for investments in new business activities and new workplaces.

**Capital gains and losses.** Capital gains and losses from the sale of assets are considered regular taxable income and tax-deductible expenses, respectively. No separate capital gains tax applies; capital gains are subject to the regular corporate income tax rate of 20%. Specific rules apply to unrealized gains and losses on certain types of assets. Depending on the type of asset, such gains or losses may be not taxable or not tax deductible, and may be recognized for tax purposes in the period of the realization of the asset.

**Administration.** The regular tax year is the calendar year, but a company may apply for a different tax year.

Annual tax returns must be filed by the end of the fourth month following the tax year.

Companies must make monthly advance payments of tax. In principle, each monthly advance payment is equal to  $\frac{1}{12}$  of the tax due for the preceding year before the decrease of the tax base for tax incentives (excluding multiyear tax incentives). The balance of tax due must be paid by the end of the fourth month following the tax year. If the total of the advance payments exceeds the tax due for the year, the company may claim a refund.

**Dividends.** Dividends are taxable at a rate of 12%.

**Foreign tax relief.** A foreign tax credit is available to resident companies for foreign tax paid on income earned directly or through permanent establishments abroad. The amount of the credit is the lower of the Croatian corporate tax payable on the foreign income and the foreign tax paid.

## C. Determination of trading income

**General.** The corporate income tax base is determined in accordance with the accounting regulations (Croatian Financial Reporting Standards [CFRS]/International Financial Reporting Standards [IFRS]), adjusted for certain items that increase or decrease the tax base.

The following items decrease the tax base:

- Revenues from dividends and profit shares
- Unrealized profits from value adjustments of shares if they were previously taxed
- Revenues from collected written-off receivables that were taxed in previous periods

- Depreciation expenses carried forward from previous periods
- Tax incentives in accordance with special laws
- Reinvested profits other than those realized in the banking or nonbanking financial sector

The following items increase the tax base:

- Depreciation expenses exceeding the maximum allowable amounts (excess may be carried forward).
- Penalty interest paid between related parties.
- Privileges and other benefits granted to individuals and legal persons to execute certain actions in favor of the company.
- Nondeductible interest on loans between related parties.
- The costs of forced collection of tax and other levies.
- Unrealized losses from value adjustments of shares, if these were included in the expenses.
- Unrealized losses from value adjustments of depreciable assets except in the case of extraordinary damages.
- Seventy percent of entertainment expenses resulting from a business relationship with a business partner, including related value-added tax (VAT). These expenses include the following:
  - Gifts, regardless of whether they include the mark of the company or product.
  - The cost of holidays, sports, recreation and leisure.
  - Rental of airplanes, automobiles, vacation homes and vessels.
- Fines imposed by competent bodies.
- Thirty percent of expenses, including related VAT but not including insurance and interest costs, incurred with respect to owned or rented motor vehicles or other means of personal transportation (for example, personal car, vessel, helicopter and airplane) used by managerial, supervisory and other employees, if the personal use of the means of personal transportation is not taxed as a benefit in kind.
- Inventory shortages above the amount prescribed by the Croatian Chamber of Economy, if the shortages are not subject to personal income tax.
- Donations in cash or in kind exceeding 2% of the preceding year's revenue. The limitation does not apply to donations made in accordance with the competent ministry's decisions on special programs and actions undertaken outside the regular business activities of the beneficiary. The donations also include financing of health care expenses (surgery, and purchases of medicines or orthopedic devices) for individuals who are not covered by primary, additional or private health insurance.
- Expenses identified in the course of a tax audit, including VAT personal income tax, city tax and obligatory contributions incurred with respect to hidden profit payments, including payments of private costs of shareholders, company members and individuals and persons related to these individuals.
- Other expenses not incurred for the purpose of earning profit.

The expenses mentioned above, except privileges and other benefits granted to individuals and legal persons to execute certain actions in favor of the company and expenses identified in a tax audit, do not increase the tax base if they are subject to personal income tax.

**Inventories.** Inventories are valued in accordance with Croatian Financial Reporting Standards (CFRS) or International Accounting

Standards (IAS)/International Financial Reporting Standards (IFRS). In general, inventories are valued at the lower of cost or net realizable value. Costs include all acquisition costs, conversion costs and other costs incurred in bringing inventories to their current location and condition. In general, the cost of inventories must be determined using the first-in, first-out (FIFO) or weighted average method.

Losses from value adjustments of inventories are recognized as tax-deductible expenses at the time of disposal of the inventories.

Specific rules deal with allowable limits of inventory shortages.

**Provisions.** The following provisions are deductible for tax purposes:

- Provisions for severance payments to be paid in the following year according to the prepared plan
- Provisions for costs of renewing natural resources
- Provisions for costs incurred during guarantee periods
- Provisions for costs related to court disputes that have already been initiated against the taxpayer (excluding interest)
- Provisions for the risk of potential loss in banks, up to the amount prescribed by the Croatian National Bank
- Provisions in insurance companies, up to the obligatory amount prescribed by the law governing the insurance
- Accruals for the unused vacation in accordance with accounting principles

Value adjustments of trade receivables are deductible if the receivables are overdue for more than 60 days as of the end of the tax year and if they are not collected by the 15th day before the filing of the tax return. However, if a taxpayer does not take measures for debt collection (for example, sue the debtor) before the receivables are barred by the statute of limitations, the receivables treated as deductible for tax purposes in prior years must be included in taxable income. In addition, value adjustments are deductible for tax purposes in the following circumstances:

- The receivables do not exceed HRK5,000 (approximately EUR600) per debtor, other than an individual or related party, or HRK2,000 (approximately EUR260) per unrelated individual if the total receivables per individual do not exceed this amount on the last day of the tax period and if the receivable is written off by 31 December 2013.
- The company is suing the debtor or a foreclosure is being conducted.
- The receivables are reported in a bankruptcy proceeding of the debtor.
- The debt has been settled in the pre-bankruptcy or bankruptcy proceedings of the debtor.

Credit institutions may treat as tax deductible the write-off of receivables from unrelated individuals and legal entities that are related to housing provisions and entrepreneurial loans, respectively. This is possible if it can be determined that the write-off is done with the goal of protecting the basic life needs of the individual (for example, prevention of foreclosure on the only real estate in which the loan recipient lives) or not jeopardizing investment developments and entrepreneurial activities of legal entities.

**Tax depreciation.** Depreciation is calculated by using the straight-line method. The following are the maximum annual depreciation rates prescribed by the Corporate Income Tax Act.

Asset	Rate (%)
Buildings and ships over 1,000 gross registered tons	10
Primary herd and personal cars	40
Intangible assets, equipment, vehicles (except personal cars), and machinery	50
Computers, computer hardware and software, mobile telephones and computer network accessories	100
Other assets	20

The deduction for tax depreciation cannot exceed the expense for accounting depreciation. If maximum allowable tax depreciation exceeds accounting depreciation, the accounting depreciation prevails for tax purposes. If accounting depreciation exceeds maximum allowable tax depreciation, the excess may be deducted in future periods.

Depreciation expenses for personal cars and other vehicles used for personal transportation are deductible up to the amount calculated on the purchase cost of HRK400,000 (approximately EUR53,000) per vehicle. The limitation does not apply to vehicles used exclusively for rental or transportation activities.

Depreciation of assets that are not used in the performance of ordinary business activities is not deductible for tax purposes.

If the accounting records of a taxpayer include vessels, airplanes, apartments or resort houses and if the taxpayer uses these items in its regular business activities, the depreciation of such assets may be claimed as deductible expenses for tax purposes if the following conditions are met:

- The taxpayer is registered for the activity of renting such assets.
- The revenue realized from the use of the vessels and airplanes is at least 7% of the purchased value of the vessels or airplanes.
- The revenue from the use of apartments and resort houses is at least 5% of the purchase value of the apartments or resort houses.

**Relief for losses.** Tax losses may be carried forward for five years, but they may not be carried back.

The legal successor may lose the right to a loss carryforward after a legal change (business combination) and/or change in ownership of the company of more than 50% if one of the following circumstances exists:

- The taxpayer did not perform its business activity for the two tax periods before the occurrence of the legal change and/or change in ownership.
- Within two tax periods after the occurrence of the legal change and/or change in ownership, the business activity of the taxpayer substantially changes.

**Groups of companies.** Croatia does not allow consolidated returns or provide any other tax relief for groups of companies. Each company within a group is taxed separately.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	5/13/25
Real estate tax, on the value determined by the tax authorities	5
Social security contributions; paid by Employer	17.2
Employee	20
Personal income tax; the withholding liability lies with the employer	
Up to HRK2,200 per month	12
From HRK2,200 to HRK13,200 per month	25
In excess of HRK13,200 per month	40
Municipal surcharge; varies among cities; the rate for Zagreb (the capital city) is 18%	0 to 18

## E. Miscellaneous matters

**Foreign-exchange controls.** The Croatian currency is the kuna (HRK).

The Croatian National Bank is responsible for foreign-exchange regulations.

The Foreign Exchange Act generally imposes restrictions on payments abroad that do not have a legal basis. No restrictions are imposed on transfers of paid-in share capital, dividends, profits, interest, royalties, fees for know-how and similar payments.

Under the Foreign Exchange Act, Croatian resident companies may acquire foreign securities, provide long-term and short-term loans to nonresident companies, acquire real estate abroad and engage in certain other specified transactions. Such transactions are allowed if they are reported to the Croatian National Bank.

Natural persons may make direct investments abroad, acquire foreign securities, provide long-term loans to nonresidents, acquire real estate abroad and provide short-term loans to nonresidents who are related parties (family members).

**Transfer pricing.** Croatia has transfer-pricing rules that apply to transactions between Croatian residents and nonresidents. Under these rules, the tax authorities may adjust the taxable income of Croatian taxpayers derived from transactions with foreign related companies if they deem the prices and agreed conditions to be different than arm's-length prices and conditions. In such circumstances, taxable income is increased (or expenses decreased) by the difference between prices stated in the financial statements and arm's-length prices. These rules also apply to transactions between two Croatian residents if one of the related parties has special tax status (pays corporate income tax at reduced rates) or has a tax-loss carryforward.

A company may apply one of the following methods for establishing an arm's-length price:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method

- Profit-split method
- Transactional net margin method

Before the beginning of each tax year, the Ministry of Finance sets the market interest rate for related-party loans. If the rate is not published, the relevant rate is the Croatian National Bank discount rate.

**Debt-to-equity ratios.** Under thin-capitalization rules, interest on loans received from foreign shareholders owning 25% or more of the shares, capital or voting rights of the borrower, on loans guaranteed by such shareholders or on loans received from related parties, is not deductible if the loan balance exceeds four times the shareholders' share in the equity of the borrower.

**Prepayments of dividends.** If the dividends or profit shares are prepaid to an individual during a tax year and if the realized profit at the end of a tax year is insufficient to cover such prepayment, the prepayment is considered to be income subject to personal income tax. The taxpayer must maintain documentary evidence of dividend prepayments and submit it with the tax return.

## F. Tax treaties

Croatia has entered into double tax treaties on avoidance of double taxation with many countries (see the withholding rate table below).

Croatia has signed tax treaties with Egypt, India, Luxemburg and Portugal, but these treaties have not yet become effective.

Croatia has adopted the double tax treaties entered into by the former Yugoslavia with Finland, Norway, Sweden and the United Kingdom.

The withholding tax rates for payments by Croatian companies under Croatia's double tax treaties and under the former Yugoslavia's double tax treaties adopted by Croatia are listed in the table below.

Croatia became a member of the European Union (EU) on 1 July 2013. As of that date, provisions of the Interest and Royalty Directive and Parent-Subsidiary Directive adopted by Croatian corporate income tax legislation became applicable to payments to recipients within the EU.

	Dividends	Interest	Royalties
	%	%	%

- (a) The 0% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 25% of the payer. The 10% rate applies to other dividends.
- (b) The 0% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 10% of the payer. The 15% rate applies to other dividends.
- (c) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 15% rate applies to other dividends.
- (d) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.
- (e) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.

- (f) The 5% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly controls at least 10% of the voting power of the payer, or holds directly at least 25% of the payer. The 15% rate applies to dividends paid by investment corporations that are resident in Canada but are owned by non-residents and in all other cases.
- (g) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 20% of the payer. The 15% rate applies to other dividends.
- (h) The 5% rate applies if the recipient is an entity that directly holds at least 25% of the voting power of the payer. The 10% rate applies to other dividends.
- (i) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (j) The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 10% of the payer. The 15% rate applies to other dividends.
- (k) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (l) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.
- (m) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 10% rate applies to other dividends.
- (n) The 5% rate applies if the recipient (beneficial owner) is an entity that directly controls at least 10% of the voting power of the payer. The 10% rate applies to other dividends.
- (o) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer and if the entity is a resident of Israel. The 15% rate applies to other dividends.
- (p) The 5% rate applies if the recipient (beneficial owner) is an entity that holds at least 25% of the payer and if this ownership is not achieved for the purposes of exploiting these provisions. The 10% rate applies to other dividends.
- (q) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (r) The 5% rate applies if the recipient is an entity that holds directly at least 10% of the payer. The 10% rate applies to other dividends.
- (s) The 5% rate applies if the dividends are paid by a Croatian resident to a Maltese resident (beneficial owner). If dividends are paid by a Maltese resident to a Croatian resident (beneficial owner), the applicable rate is the rate used to tax the profits out of which the dividends are paid.
- (t) The 0% rate applies if the recipient is an entity that holds directly at least 25% of the payer. The 15% rate applies to other dividends.
- (u) The 5% rate applies if the recipient is an entity that directly holds at least 25% of the voting power of the payer. The 15% rate applies to other dividends.
- (v) This treaty applies to Montenegro and Serbia.
- (w) The 8% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.
- (x) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer and its respective share in capital amounts to at least EUR150,000. The 10% rate applies to other dividends.
- (y) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer and its respective share in capital amounts to at least USD100,000. The 10% rate applies to other dividends.

---

*On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Curaçao, with the understanding that references in the laws to “the Netherlands Antilles” should now read “Curaçao.” The following chapter provides information on taxation in Curaçao only. Chapters on BES-Islands and Sint Maarten appear in this guide.*

**A. At a glance**

Corporate Income Tax Rate (%)	27.5 (a)
Capital Gains Tax Rate (%)	27.5 (a)
Branch Tax Rate (%)	27.5 (a)
Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 (b)

- (a) The corporate income tax rate of Curaçao is expected to be further reduced in upcoming years.
- (b) Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Curaçao offshore tax regime may carry forward tax losses for five years.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Corporate income tax is levied on resident and nonresident entities. Resident entities are those incorporated under former Netherlands Antilles or current Curaçao laws, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Curaçao. For resident entities, corporate income tax is, in principle, levied on the aggregate amount of net profits earned from all sources during the entity's accounting period. Nonresident entities are subject to tax on specific Curaçao income items, such as profits earned through a permanent establishment and income related to real estate property in Curaçao, including interest derived from a mortgage on such real estate property.

**Tax rates.** Resident and nonresident entities, including branches of foreign companies, are taxed at a standard rate of 27.5%. However, different rates may apply to companies qualifying for tax holidays, E-zone companies, offshore companies, tax-exempt companies and companies applying the export facility.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

**Tax incentives.** Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism and land development.

*E-zone companies.* Incentives are available under E-zone legislation. These incentives replaced the incentives that were previously available under the free-zone legislation. The E-zone legislation offers tax incentives to e-commerce companies and trading companies with an e-strategy that are located in an E-zone. In principle, the activities of these companies must be focused on trading with, or providing services to, companies or persons located outside Curaçao. Profits derived by E-zone companies from sales of goods or services to companies or individuals located in Curaçao may not exceed 25% of the total annual turnover. In general, E-zone companies are taxed at a rate of 2%. However, for profits derived from sales of goods or services to companies or individuals located in Curaçao (up to a maximum of 25% of the total turnover), the standard corporate income tax rate of 27.5% applies. In principle, tax losses may be carried forward to offset taxable profits in the following 10 years. No turnover tax or import duties are imposed on the following:

- Goods entering the E-zone
- Services rendered by Curaçao companies to E-zone companies
- Products delivered by E-zone companies, or services rendered to individuals or companies that are not resident in Curaçao or to companies that are located in the E-zone
- The export of goods by companies applying the export facility

*Offshore companies.* The offshore regime was abolished in 2001. However, under grandfathering rules, special incentives are available for qualifying offshore companies in existence before 1 January 2002. Offshore companies are resident companies owned by nonresidents that perform their business activities abroad; that is, they mostly earn foreign-source income. Income derived by offshore companies (for example, from royalty, financing, holding, portfolio investment, mutual fund, real estate and service activities) is taxed at corporate income tax rates of 2.4% to 3%. For trading and service companies, offshore status may result in the application of reduced rates. Capital gains on securities, loans, intellectual property and immovable property are exempt from corporate income tax. In addition, advance tax rulings can be obtained for determining the offshore tax status and method of calculating the tax base of offshore companies. Profits derived from real estate located outside Curaçao are exempt from corporate income tax. The offshore tax rates are guaranteed through 2019.

*Tax-exempt companies.* Tax-exempt companies (TECs) are exempt from Curaçao corporate income tax. Only private limited liability companies incorporated under former Netherlands Antilles or current Curaçao laws may qualify as TECs. TECs are allowed to solely or practically solely (more than 90%) engage in extending of loans, investing in securities and deposits and licensing of intellectual and industrial property rights and similar property rights. To qualify as a TEC, a company must submit a written request to the Tax Inspector and certain conditions must be satisfied. TECs are not eligible for benefits under the Tax Regulation for the Kingdom of the Netherlands or for benefits under any other double tax treaty of the former Netherlands Antilles or Curaçao. However, exchange-of-information provisions in the tax regulation, tax treaties and tax information exchange agreements apply to TECs. If a TEC loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income, and it receives a tax-free step-up.

*Export facility.* The Curaçao export facility provides an effective profit tax rate of approximately 3.9%. One of the requirements for the application of the export facility is that at least 90% of the profits be derived from activities oriented abroad. In addition, the company must have real presence in Curaçao that is suitable for the nature and extent of the company's activities.

*Taxed private foundations and trusts.* The 2011 tax reform of the Curaçao corporate income tax legislation introduced the option for private foundations and trusts to be subject to a reduced effective corporate income tax rate of 10%. In principle, Curaçao private foundations and trusts are fully exempt from corporate income tax if they do not conduct an enterprise. After the option is exercised, the reduced effective rate of 10% applies for a period of at least three full fiscal years. After this three-year period, the

private foundation can request to discontinue being subject to the reduced effective rate of 10%.

*Transparent companies.* Curaçao public limited liability companies or private limited liability companies can opt for fiscal transparency for Curaçao corporate income tax and individual income tax purposes. To qualify as a transparent company, a written request must be filed and certain conditions must be satisfied. If fiscal transparency is elected, the limited liability company is treated for tax purposes as a partnership; that is, only the partners can be taxed in Curaçao on Curaçao sources of income. If a transparent company loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income.

*Ruling policy.* Curaçao has an extensive advance tax ruling practice. These rulings include the following:

- Cost-plus rulings for intercompany support activities
- Minimum gross margin rulings for finance activities
- Participation exemption rulings for holding activities
- Informal capital (or cost-plus) rulings for intercompany trading activities

These rulings are usually valid for a three-year period, with the option for extension every three years.

*Other incentives.* Curaçao also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Curaçao.

**Capital gains.** Under the current corporate income tax rules, in general, except for offshore companies, no distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the applicable corporate tax rate (27.5%). Taxation of capital gains on qualifying share interests (participation exemption) is discussed in Section C.

**Administration.** The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Companies must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An extension of time to file the return and pay the tax is not granted. On request of the company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return. An extension for filing the final tax return on a later date can be obtained.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is

levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally 25% or 50%.

In general, offshore companies must file their tax returns within six months following the end of the financial year. In practice, the tax authorities do not strictly enforce this deadline for offshore companies.

**Dividends.** Curaçao does not levy dividend withholding tax on dividend distributions.

**Foreign tax relief.** A 100% exemption from Curaçao corporate income tax is available for foreign business profits. For this purpose, foreign profits are profits earned in another country through a permanent establishment or a permanent representative in the other country, or profits earned from immovable property located in a foreign country, including the rights related to the property that is part of the business activities of the taxpayer but is deemed to be part of the foreign business. If foreign profits are derived from a business that can be considered a low-taxed portfolio investment, a reduced exemption of 63% applies.

### C. Determination of taxable income

**General.** Taxable profit must be calculated in accordance with “sound business practices.”

All expenses incurred with respect to conducting a business are, in principle, deductible. However, if expenses exceed normal arm’s-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. Only 80% of representation expenses, as well as expenses incurred on meals, beverages, gifts, courses and seminars, is deductible.

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s-length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted.

**Participation exemption.** In principle, a 100% participation exemption applies for all qualifying share interests held by Curaçao corporate taxpayers.

In general, a shareholding qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least USD500,000. In addition, any member of a cooperative association can apply for the participation exemption.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The qualifying participation is subject to a (nominal) profit tax rate of 10% (subject-to-tax clause).
- Dividends, interest or royalties received from sources other than the business of the participation do not account for 50% or more of the gross income of the participation (non-portfolio-investment clause).

These conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower participation exemption of 63% applies to dividends. The subject-to-tax clause and the non-portfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are not deductible if the income is 100% tax-exempt.

**Tax depreciation.** In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

Asset	Rate (%)	Residual value (%)
Buildings	2 to 2.5	10
Office equipment	10 to 50	Nil
Motor vehicles	10 to 33	15
Plant and machinery	10	10

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company.

Fixed company assets acquired by companies operating in Curaçao may qualify for accelerated depreciation at a one-time maximum annual rate of 33 $\frac{1}{3}$ % of the acquisition costs of the assets. Fixed company assets are assets used for a business process for at least one business cycle, unless these assets are intended to be processed or sold.

An investment allowance deduction of 8% (12% for new buildings or restorations of buildings) is granted for acquisitions of fixed assets exceeding approximately USD2,800. The allowance is deducted from taxable income in the year of the investment and in the following year. The investment allowance deduction is recaptured in the year of sale and the subsequent year if the asset is sold within 6 years (15 years for buildings) of the date of the investment.

**Groups of companies.** On written request, Curaçao resident companies may form a fiscal unity (tax-consolidated group) for corporate income tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated under Dutch law that has its place of effective management in Curaçao. The whole group is taxed for corporate income tax purposes as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to corporate income tax.

Advantages for corporate income tax purposes of fiscal unity treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for corporate income tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for turnover tax purposes.

**Relief for losses.** Losses in a financial year may be carried forward for 10 years. No carryback is available.

Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Curaçao off-shore tax regime may carry forward tax losses for five years.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Turnover tax in Curaçao; a general consumption tax on goods delivered, imports, and services rendered by entrepreneurs (legal entities or individuals) in Curaçao and services rendered in Curaçao by foreign entrepreneurs; primary life goods and certain imports are exempt	
Standard rate	6
Insurance	7
Hotel accommodation (not yet enacted)	7
Specific goods and services listed as luxurious or unhealthy	9
Real estate transfer tax	4
Import duties	0 to 62

#### E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Curaçao is the Antillean guilder (ANG).

For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange regulations imposed by the Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

**Transfer pricing.** In general, intercompany charges should be determined on an arm's-length basis.

## **F. Tax treaties**

Provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Regulation for the Kingdom of the Netherlands (consisting of Aruba, Curaçao, the Netherlands and Sint Maarten). Under a measure in the Tax Regulation for the Kingdom of the Netherlands, dividend distributions by a qualifying Dutch subsidiary to its Curaçao parent company are effectively subject to an 8.3% Dutch dividend withholding tax. In June 2014, Curaçao and the Netherlands concluded a new bilateral regulation. This regulation is expected to take effect shortly and will include, among other measures, a 0% Dutch dividend withholding tax rate, which will be applicable under certain conditions, and a temporary provision (until 31 December 2019) for a 5% Dutch dividend withholding tax rate on distributions to companies in Curaçao. Curaçao does not impose withholding tax on payments from Curaçao to residents of other countries.

The former Netherlands Antilles has entered into tax information exchange agreements with Antigua and Barbuda, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles.

Curaçao has negotiated tax treaties with Jamaica and Malta, which have not yet been ratified by the Curaçao government. Curaçao is also negotiating several double tax treaties and additional tax information exchange agreements.

Under the latest published Organisation for Economic Co-operation and Development (OECD) list, Curaçao qualifies as a white-listed jurisdiction.

The government of the former Netherlands Antilles entered into bilateral agreements with the European Union (EU) member states with respect to the application of the EU Council Directive on taxation of savings income. The Curaçao (former Netherlands Antilles) law determining the implementation of the directive took effect in July 2006.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Curaçao.

Curaçao also signed the OECD Convention on Mutual Administrative Assistance in Tax Matters.

## A. At a glance

Corporate Income Tax Rate (%)	12.5
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	12.5
Withholding Tax (%)	
Dividends	0 (a)
Interest	0

Royalties from Patents, Know-how, etc.	0 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

- (a) A Defence Fund tax at a rate of 17% is withheld from dividends paid to resident individuals.
- (b) A 5% rate applies to royalties paid with respect to films and television. A 10% rate applies to other royalties if the asset for which the royalties are paid is used in Cyprus.
- (c) Effective from 1 January 2012, losses can be carried forward to the following five years (previously indefinitely).

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in Cyprus are subject to income tax on their worldwide income. A company is resident in Cyprus if its control and management are located in Cyprus. Nonresident companies are taxed only on income derived from a permanent establishment in Cyprus and on rental income from property located in Cyprus.

**Rate of corporate tax.** The standard rate of company tax is 12.5%.

**Capital gains.** A capital gains tax of 20% is levied on gains derived from the disposal of immovable property located in Cyprus and from the disposal of shares in companies whose assets include immovable property located in Cyprus (except for shares of companies listed on a recognized stock exchange). A gain is the difference between the sales proceeds and the original cost, adjusted to take into account increases in the cost-of-living index.

**Administration.** The income year in Cyprus is the calendar year. Tax is payable on 1 August following the income year. However, an estimate of tax due is made by 31 July of the income tax year, and provisional tax is payable in two equal installments on 31 July and 31 December.

Overdue tax is subject to interest at an annual rate of 4.5%, beginning on the due date. In addition, a flat 5% penalty is imposed on the tax due in the event of a delay in payment.

**Dividends.** Dividends paid are not subject to withholding tax.

A 17% Defence Fund tax is withheld from dividends paid to resident individuals. This tax is a final tax.

If a company does not distribute as dividends at least 70% of its after-tax accounting profits within two years after the end of the relevant income year, a 17% Defence Fund tax is imposed on a deemed distribution of 70% of the profits. For the purposes for determining the amount of profit subject to deemed distribution, any capital expenditure incurred in the acquisition of plant and machinery (excluding private saloon cars) and buildings during the period of 2012 through 2014 is deducted from the after-tax profits. If a company distributes more than 0% but less than 70% of its profits, the amount of the deemed distribution subject to tax is reduced by the amount of the actual distribution. The tax on a deemed distribution is reduced proportionally by the percentage of shares held directly or indirectly by nonresidents.

Deemed distribution does not apply to profits that are directly or indirectly attributable to shareholders that are nonresidents of Cyprus.

**Foreign tax relief.** Foreign tax on profits and gains of a Cyprus resident company is credited against Cyprus tax payable. Such foreign tax relief cannot exceed Cyprus tax payable on the same profits or gains.

### C. Determination of trading income

**General.** An assessment is based on accounts prepared in accordance with generally accepted accounting principles, subject to certain adjustments and provisions. Expenses must be incurred wholly and exclusively for the production of income.

**Inventories.** Inventory is generally valued at the lower of cost or net realizable value. Cost must be determined under the first-in, first-out method. The last-in, first-out method is not acceptable.

#### Depreciation and amortization allowances

*Plant and machinery.* A straight-line allowance of 10% a year is given on capital expenditures for plant and machinery. For machinery and plant acquired during 2012, 2013 and 2014, a deduction for wear and tear at 20% per year is allowed.

*Industrial buildings.* A straight-line allowance of 4% a year is available for industrial buildings. For industrial and hotel buildings acquired during 2012, 2013 and 2014, a deduction for wear and tear at 7% is allowed.

*Commercial buildings.* A straight-line allowance of 3% a year is allowed for commercial buildings.

*Office equipment.* A straight-line allowance of 20% a year is allowed for computers. Other office equipment is depreciated under the straight-line method at an annual rate of 10%. For other office equipment acquired in 2012, 2013 and 2014, a deduction for wear and tear at a rate of 20% per year is allowed.

*Motor vehicles.* In general, a straight-line allowance of 20% a year is allowed for motor vehicles (except for private saloon cars).

*Sales of depreciable assets.* On disposal of an asset, if sale proceeds are less than the remaining depreciable base, a further allowance is granted, up to the difference. If sale proceeds exceed the depreciable base, the excess (up to the amount of allowances received) is included in taxable income.

**Taxation of intangible assets.** The cost of the acquisition or development of intangible assets of a capital nature is amortized equally over a five-year period.

Eighty percent of the profits arising from the use of intangible assets (including compensation for improper use of such assets), as well as profits from sales of the assets, is deemed to be an expense in determining taxable income.

The 80% deduction applies to profits after deducting all direct expenses, including but not limited to amortization of the assets and interest expenses to finance the acquisition or development of the assets.

**Relief for losses.** Effective from 1 January 2012, losses can be carried forward to the following five years. Loss carrybacks are not allowed.

**Groups of companies.** Group loss relief for a loss incurred in an income year is allowed between resident group companies that meet certain conditions.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods or services, other than an exempt supply, made in Cyprus by a taxable person (taxable if annual supplies exceed EUR15,600) in the course of business	0/5/9/19
Payroll taxes	
Social insurance contribution, levied on each employee's gross salary, up to EUR4,533 a month; payable by both employer and employee	7.8
Special Cohesion Fund, levied on gross salary; payable by employer	2
Human Resource Development Authority and Redundancy Fund, levied on gross salary, up to EUR4,533 a month; paid by employer	1.7
Leave Fund, levied on gross salary, up to EUR4,533 a month; paid by employer in lieu of holiday pay (employer may obtain exemption from contribution to this fund)	8
Special contribution; levied on emoluments for amounts exceeding EUR1,500; maximum rate	3.5
Special contribution for defense	
On rents received	3
On interest received (except for interest earned in the ordinary course of business)	30

## E. Miscellaneous matters

**Foreign-exchange controls.** Cyprus does not impose foreign-exchange controls.

**Mergers and demergers.** No taxes arise in mergers and demergers with respect to transfers of businesses, assets or shares.

- (a) The rate is 10% for dividends paid to a company holding directly at least 25% of the capital of the payer. The rate is 5% if the recipient of the dividends has invested at least EUR200,000 in the share capital of the payer.
- (b) The rate is 0% for interest paid to the government of the other contracting state.
- (c) The rate is 0% for royalties paid for literary, artistic or scientific works, as well as for film and television royalties.
- (d) The lower rate applies to dividends paid to a company holding directly at least 25% of the capital of the payer.
- (e) The rate is 0% for interest paid to the government of the other contracting state and for interest paid on bank loans or with respect to credit sales of industrial, commercial or scientific equipment or merchandise.
- (f) The rate is 10% for dividends paid to a company holding directly at least 10% of the share capital of the payer.
- (g) The rate is 5% for film and television royalties.

- (h) The rate is 5% for dividends paid to a company holding directly at least 25% of the share capital of the payer.
- (i) The rate is 0% for interest paid to a government, bank or financial institution.
- (j) The 0% rate applies if the beneficial owner is a company (other than a partnership) holding at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases.
- (k) The rate is reduced to 5% if the recipient has invested at least EUR100,000 in the share capital of the payer.
- (l) The 5% rate applies if the beneficial owner is a company (other than a partnership) holding at least 10% of the voting power of the capital of the company paying the dividends. The 15% rate applies in all other cases
- (m) The 5% rate applies if the recipient of the dividends is a direct beneficial owner of at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
- (n) The rate is 10% for royalties paid for literary, artistic or scientific works, or for films or television. The rate is 15% for payments for the use of industrial, commercial or scientific equipment.
- (o) The rate is 7% for interest paid to banks and financial institutions.
- (p) The 0% rate applies to interest paid to the government. The 10% rate applies to interest paid to banks. The 15% rate applies in other cases.
- (q) The rate is 5% for royalties paid for literary, artistic or scientific works, or for film or television. The rate is 10% for payments for the use of industrial, commercial or scientific equipment.
- (r) The rate is 0% for royalties paid for literary, dramatic, musical or artistic works.
- (s) The 0% rate applies if any of the following circumstances exists:
- The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends if such holding has been maintained for an uninterrupted period of at least 12 months.
  - The beneficial owner of the dividends is the other contracting state, the central bank of the other contracting state or a national agency or other agency (including a financial institution) owned or controlled by the government of the other contracting state.
  - The beneficial owner of the dividends is a pension fund or similar institution providing pension schemes in which individuals may participate to secure retirement benefits if such pension fund or similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state. The 15% rate applies to other dividends.
- (t) A 5% rate applies to royalties paid with respect to films and television. A 10% rate applies to other royalties if the asset for which the royalties are paid is used in Cyprus.
- (u) A 5% rate applies if the beneficial owner of the dividends has invested in the capital of the payer company less than the equivalent of EUR150,000 at the time of the investment.
- (v) A 0% rate applies if the interest is paid to the government, a local authority or a central bank.
- (w) The 5% rate applies if the dividend recipient holds at least 20% of the capital of the dividend paying company or has invested at least EUR100,000 in such company. The 15% rate applies in all other cases.
- (x) The 5% rate applies to royalties paid with respect to copyrights of scientific works, patents, trademarks, secret formulas or processes, or information concerning industrial or commercial experience. The 10% rate applies to other royalties, particularly for literary works, music works, films and software.
- (y) The 0% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends and if such holding is maintained for an uninterrupted period of at least one year. The 5% rate applies in all other cases.
- (z) The treaty between Cyprus and the USSR still applies.
- (aa) The treaty between Cyprus and the Socialist Republic of Yugoslavia still applies.
- (bb) The treaty between Cyprus and Czechoslovakia still applies.
- (cc) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the company paying the dividends for a continuous period of at least 24 months.

Cyprus has signed tax treaties with Guernsey and Switzerland, but these treaties have not yet been enacted.

## Net Operating Losses (Years)

Carryback	0
Carryforward	5

- (a) Basic investment funds (see Section B) are subject to tax at a rate of 5%. The preferential treatment will be available for Liechtenstein residents as of the date of legal effectiveness of the Czech Republic-Liechtenstein tax treaty. A 0% rate applies to pension funds.
- (b) Capital gains derived by Czech or European Union (EU)/European Economic Area (EEA) parent companies on transfers of shares in their subsidiaries are exempt from tax if certain conditions are satisfied (see Section B). The preferential treatment will be available for Liechtenstein residents as of the date of legal effectiveness of the Czech Republic-Liechtenstein tax treaty.
- (c) The rates may be reduced by applicable tax treaties.
- (d) Dividends are subject to a final withholding tax at a rate of 15%. Under the principles of the EU Parent-Subsidiary Directive (No. 90/435/EEC), dividends paid by Czech companies to parent companies (as defined in the directive) located in EU/European Free Trade Association (EFTA) countries are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year. The preferential treatment will be available for Liechtenstein residents as of the date of legal effectiveness of the Czech Republic-Liechtenstein tax treaty. Dividend distributions between two Czech companies are exempt from tax under similar conditions. Effective from 1 January 2014, the tax exemption does not apply if any of the following circumstances exists:
- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
  - The parent or subsidiary may opt for an exemption from corporate income tax or similar tax applicable in its jurisdiction.
  - The parent or subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.
- (e) The 35% withholding tax generally applies to Czech-source income arising to Czech tax nonresidents from countries outside the EU/EEA that have not entered into a double tax treaty with the Czech Republic or a bilateral or multilateral tax information exchange agreement that is binding on both the Czech Republic and the respective foreign country. The 35% withholding tax rate also applies if the Czech income payer is unable to prove the tax residency status of the respective beneficial income owner. If applicable, the 35% rate affects all types of income subject to withholding tax (for example, dividends, interest, royalties or rental income). It does not affect rental income from financial leases if the 5% withholding tax rate applies (see footnote [i]).
- (f) Interest payments are subject to withholding tax at a rate of 15%. Under the principles of the EU Directive 2003/49/EC, interest paid by Czech companies to related companies (as defined in the directive) located in EU/EFTA countries is exempt from withholding tax if certain additional conditions are met. The preferential treatment will be available for Liechtenstein residents as of the date of legal effectiveness of the Czech Republic-Liechtenstein tax treaty.
- (g) For each type of income, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return) or they may choose to treat the withholding tax as a final tax on the income.
- (h) This withholding tax applies to nonresidents. Under the principles of EU Directive 2003/49/EC, royalties paid by Czech companies to companies located in EU/EFTA countries are exempt from tax if certain additional conditions are met. The preferential treatment will be available for Liechtenstein residents as of the date of legal effectiveness of the Czech Republic-Liechtenstein tax treaty.
- (i) A 5% withholding tax is imposed on gross rent if the lease contract stipulates that the lessee takes over the ownership of the leased asset (tangible asset only) for a purchase price or for free at the end of the lease term or if the lease contract stipulates such a right or option for the lessee. Other rental payments are subject to a 15% withholding tax. Some rental payments may be considered royalties for Czech tax purposes.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident enterprises are subject to tax on their worldwide income. An enterprise is considered to be a resident enterprise if it is incorporated in the Czech Republic or if its

management is located there. Nonresident enterprises are subject to income tax on their Czech-source income only.

**Rates of corporate tax.** The standard corporate income tax rate for Czech enterprises and branches of foreign enterprises is 19%. Basic investment funds are subject to a preferential tax rate of 5%. Under the Czech Income Taxes Act, the following are considered basic investment funds, effective from 2015:

- An investment fund whose shares are accepted for trading on a European regulated market
- Open-end mutual fund
- Investment fund and subfund of a joint stock company with variable registered capital if it invests (in line with its prospectus) more than 90% of its assets in prescribed instruments (for example, certain securities, money market instruments, financial derivatives, receivables and loans)
- A foreign investment fund comparable to funds as described in the above three bullets if it satisfies all of the following conditions:
  - Its home country is an EU/EEA member state.
  - It can prove that it is administered or managed based on an authorization comparable to the authorization issued by the Czech National Bank and its administrator or manager is subject to supervision comparable to the Czech National Bank's supervision.
  - It has statutes or a document comparable to a prospectus based on which it can be determined whether the fund is comparable to a fund described in the above three bullets.
  - It can prove that according to the laws of its home country none of its income is attributable to other persons (meaning it is not tax transparent).

Effective from 2015, a preferential corporate income tax rate of 0% applies to pension funds.

No differences exist between the taxation of 100% Czech-owned enterprises and those with foreign investment.

**Investment incentives.** Investment incentives are available to investors launching or expanding the following:

- Manufacturing production
- Technology centers
- Business support services centers, which are shared-services centers, software-development centers and high-technology repair centers

Effective from May 2015, investment incentives will be available for data centers and call centers.

Investment incentives can be obtained in the following forms:

- Corporate income tax relief for 10 years
- Transfer of land at a discount
- Job-creation grants
- Grants for training and retraining of employees
- Cash grants on capital expenditures for strategic investments
- Real estate tax exemption (as of May 2015)

The total value of the incentives can be as much as 25% of total eligible costs. No incentives are provided in Prague. The cap is increased by 10% for midsized enterprises and 20% for small

enterprises. The cap applies to the total of tax relief, job-creation grants, cash grants on capital expenditures, transfer of land and real estate tax exemption. Training and retraining grants are provided on top of this cap.

For investments in manufacturing industry, eligible costs equal the value of long-term tangible and intangible assets. For investments in technology centers and business support services centers, eligible costs can be either the value of long-term tangible and intangible assets or the value of employment costs for two years.

Corporate income tax relief and cash grants on capital expenditures are offered throughout the entire Czech Republic with the exception of Prague. Job-creation grants, training and retraining grants are offered only in regions with high unemployment. Job-creation grants are also available in special industrial zones. Real estate tax exemption is offered only in special industrial zones. Special industrial zones will be introduced as of May 2015. Land at discounted prices is available only in specified locations.

Further details regarding the incentives are provided below.

*Manufacturing industry.* The following are general qualification conditions for the incentives for manufacturing industry:

- The investor must invest at least CZK100 million in long-term tangible and intangible assets, with at least CZK50 million of the investment covered by the equity of the investor. The CZK100 million requirement may be reduced to CZK50 million in selected regions. If the reduced requirement applies, at least CZK25 million must be covered by the equity of the investor. As of May 2015, the condition of coverage of part of the investment by equity will no longer be required.
- The investment must be in a manufacturing sector, and at least 50% of the total investment must be invested in qualifying production machinery. Machinery must be acquired for an arm's-length price. It must have been produced no more than two years before the acquisition and must not have been previously subject to tax depreciation.
- Intangible assets must be acquired from unrelated third parties for arm's-length prices.
- The proposed production must meet Czech environmental standards.
- At least 20 new jobs must be created. This condition will apply as of May 2015.
- All requirements must be met within three years after the date of granting the incentives.
- The investment project may not begin until the filing of an application with CzechInvest (the Czech governmental agency collecting, reviewing and processing investment incentives applications).
- Acquired assets and created jobs must be maintained for the duration of the incentives-utilization period (10 years) and for at least 5 years from the completion of the investment project or creation of the first job.

*Technology centers.* The following are general qualification conditions for the incentives for technology centers:

- The investor must invest at least CZK10 million in long-term tangible and intangible assets, with at least CZK5 million of the investment covered by the equity of the investor. As of May

2015, the condition of coverage of the part of the investment by the equity will no longer be required.

- At least 50% of the total investment must be invested in qualifying machinery. Machinery must be acquired for an arm's-length price, must be produced no more than two years before the acquisition and must not have been previously subject to tax depreciation.
- At least 40 new jobs must be created. As of May 2015, the minimum number of new jobs will be decreased to 20.
- The proposed investment must meet Czech environmental standards.
- All requirements must be met within three years after the date of granting the incentives.
- The investment project may not begin until the filing of an application with CzechInvest.
- Acquired assets and created jobs must be maintained for the duration of the incentives-utilization period (10 years) and for at least 5 years from the completion of the investment project or creation of the first job.

*Business support services centers.* The following are general qualification conditions for the incentives for business support services centers:

- The minimum number of newly created jobs is 40 (20 as of May 2015) for software-development centers, 100 (70 as of May 2015) for shared-services centers and high-technology repair centers, 20 for data centers and 500 for call centers.
- The proposed investment must meet Czech environmental standards.
- All requirements must be met within three years after the date of granting the incentives.
- The investment project may not begin until the filing of an application with CzechInvest.
- Acquired assets and created jobs must be maintained for the duration of the incentives-utilization period (10 years) and for at least 5 years from the completion of the investment project or creation of the first job.

*Strategic investment.* Cash grants on capital expenditures for strategic investments can be provided for up to 5% (10% as of May 2015) of eligible costs. Strategic investment can be either investment in manufacturing industry or technology centers meeting specific conditions.

For investments in manufacturing industry and technology centers that are carried out simultaneously, cash grants on capital expenditures can be provided for up to 7% (12.5% as of May 2015) of the eligible costs.

Strategic investment in manufacturing industry must meet the following conditions:

- The investor must invest at least CZK500 million in long-term tangible and intangible assets.
- At least CZK250 million of the total investment must be invested in qualifying production machinery.
- At least 500 new jobs must be created.

Strategic investment in the area of technology centers must meet the following conditions:

- The investor must invest at least CZK200 million in long-term tangible and intangible assets.
- At least CZK100 million of the total investment must be invested in qualifying machinery.
- At least 120 (100 as of May 2015) new jobs must be created.

*Special conditions.* In addition to the general conditions listed above, investors claiming the income tax relief must satisfy certain special conditions, including, among others, the following:

- They must reduce their tax base by claiming maximum tax depreciation, deducting all available tax-effective bad debt provisions and using all available tax losses carried forward, in accordance with the tax law.
- They must be the first user of tangible assets (excluding real estate) that are acquired for the purposes of the investment in the Czech Republic.
- They may not terminate their activities, merge or declare bankruptcy. As of May 2015, mergers will be enabled to some extent.
- They may not increase their tax base through related-party transactions that are not at arm's length.

Specific conditions apply to job-creation, retraining and training grants.

The incentives are provided based on the Investment Incentives Act. In practice, the government grants the incentives if the conditions are satisfied.

**Capital gains.** In the Czech Republic, realized and unrealized capital gains are recognized.

Capital gains realized by a Czech or another EU/EEA parent company on the transfer of shares in a subsidiary established in the Czech Republic or another EU/EEA country are exempt from tax if the parent company maintains a holding of at least 10% of the subsidiary for an uninterrupted period of at least one year. This condition may be fulfilled subsequent to the date of the transfer.

Capital gains realized by a Czech or EU/EEA parent company (except for a Liechtenstein company) on the transfer of shares in a subsidiary in a contracting country (that is, a third country that has entered into a tax treaty with the Czech Republic) are also exempt from tax if the following conditions are satisfied:

- The subsidiary has a legal form comparable to a Czech joint-stock company (*akciová společnost*, or a.s.), a limited liability company (*společnost s ručením omezením*, or s.r.o.) or a cooperative (*družstvo*).
- The parent company has held an ownership interest of at least 10% in the subsidiary for at least one year (this condition may be fulfilled subsequent to the date of the transfer).
- The subsidiary is liable to a tax similar to corporate income tax at a rate of at least 12% in the tax period in which the parent company accounts for the respective capital gain and in the preceding tax period.

The exemption for capital gains does not apply if any of the following circumstances exists:

- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.

- The parent company or the subsidiary may opt for an exemption from corporate income tax or similar tax applicable in its jurisdiction.
- The parent company or the subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.

Other realized capital gains are included with other taxable income and taxed at the regular corporate income tax rate. Capital losses on certain assets may be deducted from ordinary income, while capital losses on other assets (including capital losses on assets that qualify for exemption) are not deductible, even from other capital gains.

Unrealized capital gains and losses, which result from revaluation to fair value, are taxable or deductible only with respect to certain assets. Unrealized gains on shares that qualify for exemption are not taxable and unrealized losses on such assets are nondeductible for tax purposes.

Capital gains realized by nonresidents on the following are considered Czech-source income and are consequently generally taxable:

- Sales of shares (securities) in foreign companies to Czech taxpayers or Czech permanent establishments
- Sales of shares (securities or share interests) in Czech companies, regardless of the tax residence of the purchaser

However, capital gains realized by EU/EEA parent companies may be exempt from tax (see above).

**Administration.** Companies may select a calendar year or a fiscal year as its tax year. If a company uses a tax year other than the calendar year, it must file a notification with the tax authorities.

Tax returns must be filed within three months after the end of the tax year. On application of the company, an extension of three months to file a tax return may be granted at the discretion of the tax authorities. Companies that are subject to a statutory audit are automatically granted the three-month extension.

A company with tax liability of more than CZK150,000 for the preceding year must make quarterly advance payments of tax, each equal to 25% of the preceding year's tax liability. The payments must be made by the 15th day of the third, sixth, ninth and twelfth month of their tax year. Any balance of tax due must be paid by the due date for filing the tax return.

If a company's liability for the preceding year exceeded CZK30,000, but did not exceed CZK150,000, installments that are each equal to 40% of the tax liability for the preceding year must be paid by the 15th day of the sixth and twelfth months of their tax year. If the preceding year's tax liability was CZK30,000 or less, only a single payment is required on filing the annual return.

Late payments and late filings incur penalty charges at a rate established by law. Overpayments are refunded within 30 days of the taxpayer's application.

**Dividends.** Dividends are subject to a final withholding tax at a rate of 15%. The tax rate is increased to 35%, effective from 2013, for dividends paid to Czech tax nonresidents from countries

outside the EU/EEA that have not entered into a double tax treaty with the Czech Republic or a bilateral or multilateral tax information exchange agreement that is binding on both the Czech Republic and the respective foreign country.

Under the principles of the EU Parent-Subsidiary Directive (No. 90/435/EEC), dividends paid by Czech companies to parent companies (as defined in the directive) that are located in EU/EFTA countries are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year. This condition may be fulfilled subsequent to the date of distribution of the dividend. Dividend distributions between two Czech companies are exempt from tax under similar conditions.

In addition, dividends distributed by subsidiaries in a contracting country are also exempt from taxation under rules similar to those applicable to capital gains (see *Capital gains*).

The tax exemption for dividends does not apply if any of the following circumstances exists:

- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary may opt for an exemption from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.

**Foreign tax relief.** Foreign tax relief (through credit or exemption) is available only under tax treaties. If foreign tax relief is not available under a treaty, the income tax paid abroad may be deducted as an expense in the following year if it is imposed on income included in taxable income in the Czech Republic.

### C. Determination of trading income

**General.** Taxable income is calculated according to Czech accounting regulations, with adjustments for tax purposes.

In general, all expenses incurred to generate, assure and maintain taxable income are deductible, subject to the limits specified in the corporate income tax law and in special legislation, if documented by the taxpayer. The following are some of the expenses that may be deducted:

- Depreciation of tangible and intangible assets (see *Depreciation*).
- Cost of insurance if related to taxable income (except for insurance paid on behalf of an executive or member of the board of directors for damage caused by the performance of his or her functions).
- Membership contributions paid to legal entities under certain conditions.
- Damages resulting from natural disasters. The amount of the damage must be established by evidence submitted by an expert from an insurance company. Damages caused by unknown perpetrators can be tax deductible if confirmed by the police.
- Real estate tax, road tax, and fees paid in accordance with Czech legislation, if related to activities that generate taxable income.
- Specified expenses related to the provision of proper working, social and health-care conditions.

- Payments on leases, including financial leases, under certain conditions.
- Travel expenses related to work in the Czech Republic and abroad.
- Donations valued at CZK2,000 or more for various social and charitable purposes. In general, the maximum amount of this deduction is 10% of taxable income.

In general, taxpayers must increase their tax base by the amount of any overdue liability accounted for in their books that represented a tax-deductible expense and that remains unsettled for 30 months.

**Inventory.** Inventory is valued at acquisition or production cost. Costs include all costs necessary to convert the inventory to its current condition and to transport it to its current location. No deduction is allowed for inventory provisions or for other decreases in inventory value. Under certain circumstances, the liquidation of inventory may be deductible for tax purposes.

**Provisions.** Provisions are not deductible unless special legislation permits their creation for tax purposes.

Tax relief is provided with respect to overdue trading debts (as defined in the law). A special regime applies to unpaid receivables that were due before 31 December 1994.

*Rules applicable as of 1 January 2014.* Taxpayers may generally create the following tax-deductible provisions for overdue debts (with certain limitations):

- 50% of the unpaid book value of the debt if more than 18 months have elapsed since the agreed due date
- 100% of the unpaid book value of the debt if more than 36 months (30 months as of 1 January 2015; grandfathering rules apply) have elapsed since the agreed due date

For overdue debts not exceeding CZK200,000 that were purchased from the previous creditor, deduction of the above provisions is allowed only if a court or arbitration proceeding was initiated and the taxpayer (creditor) participates in the proceeding.

*Rules applicable until 31 December 2013.* For overdue debts not exceeding CZK200,000 that were due after 31 December 1994, if between 6 and 12 months had elapsed since the agreed due date for the debt, 20% of the book value of the debt was deductible (grandfathering rules apply). This deduction was allowed regardless of whether court or arbitration proceedings had commenced against the debtor. If the debt was more than 12 months overdue, a court or arbitration proceedings needed to be commenced by the creditor against the debtor to claim a further tax deduction for the debt. The deduction was calculated by applying the following specified percentages to the book value of the debt.

Months elapsed since agreed due date		Deductible percentage of book value
Exceeding	Not exceeding	%
12	18	33
18	24	50
24	30	66
30	36	80
36	—	100

For debts exceeding CZK200,000 that were overdue more than six months, the rules described above applied if the creditor had commenced court or arbitration proceedings against the debtor.

The above deductions (under the rules applicable until 31 December 2014 and the rules applicable after that date) must be recorded in the accounting books. The deductions may not be claimed for debts from related parties and other specified debts.

A 100% provision can be established for receivables up to CZK30,000, subject to certain conditions. A 100% provision for overdue receivables may also be established if insolvency proceedings have been initiated with respect to the debtor's property and if the creditor makes a claim for such receivables against the debtor in the respective court. This deduction may not be claimed for debts from related parties.

*Reserves.* Taxpayers may create tax-deductible reserves for the repair of tangible assets included in Categories 2 through 6 for tax depreciation purposes (see *Depreciation*). The reserves must be created for a minimum of two tax periods and for the maximum number of tax periods specified for each asset category.

Reserves for repairs of tangible assets may be created tax-effectively only if cash equal to the amount of the reserve created is deposited in a specific bank account. This measure applies to reserves that are created after 2008.

**Depreciation.** The corporate income tax law includes specific provisions concerning the depreciation of tangible and intangible assets. Depreciable tangible assets are divided into six categories, each of which specifies a period (a specified number of years) over which all assets in the category are depreciated.

The following are the six categories of depreciation, the time periods for depreciation of assets in each category and representative assets included in each category.

Category	Asset	Years
1	Office machines and some light machinery	3
2	Passenger cars, buses, airplanes, tractors, lorries, furniture and specified production machinery	5
3	Heavy machinery	10
4	Wooden buildings, pipelines, buildings for the production of energy, and buildings and halls built near mines	20
5	Buildings	30
6	Specified buildings	50*

\* This category includes hotels, stores and office buildings.

Assets other than buildings that cannot be classified in any of the above categories are considered to be in Category 2. Category 5 covers buildings that are not covered by Categories 4 or 6.

Taxpayers may elect to depreciate assets using the straight-line or the accelerated method. The method chosen, however, does not affect the period of depreciation. Under the accelerated method,

depreciation for the first year is calculated by dividing the cost of the asset by the applicable coefficient (see table below). For subsequent years, accelerated depreciation is calculated by multiplying the residual tax value of the asset by two and then dividing by the applicable coefficient, which is reduced by the number of years for which the asset has already been depreciated.

The following are the depreciation rates and coefficients for the six categories under the straight-line and accelerated methods.

<b>Category</b>	<b>Straight-line rate</b>	<b>Accelerated-depreciation coefficient</b>
1	20% for first year and 40% for subsequent years	3 for first year and 4 for subsequent years
2	11% for first year and 22.25% for subsequent years	5 for first year and 6 for subsequent years
3	5.5% for first year and 10.5% for subsequent years	10 for first year and 11 for subsequent years
4	2.15% for first year and 5.15% for subsequent years	20 for first year and 21 for subsequent years
5	1.4% for first year and 3.4% for subsequent years	30 for first year and 31 for subsequent years
6	1.02% for first year and 2.02% for subsequent years	50 for first year and 51 for subsequent years

Taxpayers may elect to use lower than the maximum straight-line depreciation rates. Additional rules apply to assets that were technically improved.

An initial depreciation acceleration (additional 10% to 20% of input price; in general, the input price is the acquisition cost, including related costs) is granted in the year of acquisition for certain tangible assets if other conditions are met.

Effective from 2010, the component depreciation of assets method may be used for accounting purposes. For tax purposes, the accounting result is adjusted as if this method was not used.

Specified tangible assets used in solar energy production are depreciated proportionally for a period of 240 months.

Depreciable intangible assets are divided into two categories — intangible assets that may be used for a definite time period and those that may be used for an indefinite time period. Intangible assets that may be used for a definite period are depreciated proportionally during such period. If the period for use is indefinite, the intangible asset is depreciated proportionally over the following periods.

<b>Category</b>	<b>Period (months)</b>
Audiovisual works	18
Software	36
Foundation expenses	60
Other intangible assets	72

**Relief for losses.** Losses may be carried forward for five years. The carryforward may be lost if a “substantive change” in persons participating in the equity or control of the taxpayer occurs. “Substantive change” is defined as the following: a change in more than 25% equity ownership; or a change resulting in a shareholder receiving decisive influence. Special rules apply to public limited companies that issue bearer shares. Tax losses are transferable on mergers if specific conditions are met. No carryback is permitted.

**Groups of companies.** Czech tax law does not provide for consolidated tax returns or other types of group relief.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), levied on all taxable supplies (goods and services), acquisitions of goods from other EU member states and imports of goods; certain supplies are exempt	
Standard rate; applicable to most goods and services	21%
Reduced rate applicable to specified goods and services (for example, food products and public transport)	15%
Reduced rate applicable to books, pharmaceuticals and baby food	10%
Social security and health insurance contributions; the social security contributions are paid only up to the maximum assessment base	
Health insurance	
Employer	9%
Employee	4.5%
(No maximum assessment base applies.)	
Old-age pension	
Employer	21.5%
Employee	6.5%
(The maximum assessment base is CZK1,277,328 in 2015.)	
Sickness	
Employer	2.3%
Employee	0%
(The maximum assessment base is CZK1,277,328 in 2015.)	
Unemployment	
Employer	1.2%
Employee	0%
(The maximum assessment base is CZK1,277,328 in 2015.)	
Real estate transfer tax; levied on the acquisition of real estate	4%
Excise tax, imposed on entities that produce or import certain goods, including hydrocarbon fuels and	

Nature of tax	Rate
lubricants, alcohol and spirits, beer, wine and tobacco products; tax based on the quantity of goods expressed in specific units; tax may be levied only once on a particular good	Various
Road tax, imposed on entities that use vehicles; based on engine capacity and number of axles	Various
Environmental tax; imposed on electricity, natural gas and solid fuel when delivered to final consumers; tax is based on the quantity of goods expressed in specific units; tax is administered and paid by the distributor which charges it to the final customer as a price increase	Various
Tax stamps for the use of highways	
Small vehicles (up to 3.5 tons; annual stamp)	CZK1,500
Large vehicles	Electronic road tolls

## E. Miscellaneous matters

**Foreign-exchange controls.** The only legal tender valid in the Czech Republic is the Czech crown (CZK). Other currencies may be used for domestic transactions, but the use of the Czech crown is prevalent.

The Czech crown is fully convertible. Several financial transactions, such as direct investments or acceptance of credit from abroad, are subject to a reporting requirement.

**Anti-avoidance legislation.** In applying the tax law, the tax authorities may consider the substance of a transaction if the form of the transaction conceals the actual facts. In addition, the Czech courts have developed the abuse-of-law concept. The concept is similar to the one developed by the European Court of Justice (for example, *Halifax* [No. C-255/02]).

**Transfer pricing.** If prices in a transaction involving related parties vary from the current market prices and if the difference cannot be justified, the market prices are used for tax purposes. Related parties include companies related through capital (that is, the same legal or natural persons directly or indirectly manage, control or own more than 25%) and companies related in a different manner. In addition, related parties are persons who establish a business relationship for the principal purpose of decreasing taxable income or increasing a tax loss.

Taxpayers may apply to the tax authorities for advance pricing agreements and for binding opinions on transfer prices, technical improvements, the allocation of expenses to taxable and non-taxable income, expenses incurred on research and development projects, expenses incurred on buildings that are also used for private purposes and the application of VAT rates.

**Financing expenses.** The tax deductibility of financing expenses (interest and associated expenses) with respect to related-party loans (including back-to-back loans) is limited by a debt-equity

ratio of 4:1 (6:1 for banks and insurance companies). In addition, financing expenses with respect to profit-participating loans are nondeductible for tax purposes.

**Foreign investment.** Similar rules apply to both Czech investors and foreign investors.

## F. Treaty withholding tax rates

The Czech Republic honors bilateral tax treaties of Czechoslovakia. It has also entered into tax treaties with many other countries. The following table lists the withholding rates under the bilateral treaties currently honored by the Czech Republic.

	Dividends %	Interest %	Royalties %
Albania	5/15 (b)	0/5 (g)	10
Armenia	10	0/5/10 (g)	5/10 (a)
Australia	5/15 (e)	10	10
Austria	0/10 (c)(s)	0 (t)	0/5 (a)(q)
Azerbaijan	8	0/5/10 (g)	10
Bahrain	5	0	10
Barbados	5/15 (b)	0/5 (g)	5/10 (a)
Belarus	5/10 (b)	0/5 (g)	5
Belgium	5/15 (b)(s)	0/10 (g)(t)	0/5/10 (q)(aa)
Bosnia and Herzegovina	5	0	0/10 (a)
Brazil	15	0/10/15 (g)(i)	15/25 (v)
Bulgaria	10 (s)	0/10 (g)(t)	10 (q)
Canada	5/15 (c)	0/10 (g)	10
China	5/10 (b)	0/7.5 (g)	10
Croatia	5	0	10
Cyprus	0/5 (c)(s)	0 (t)	0/10 (a)(q)
Denmark	0/15 (c)(s)	0 (t)	0/10 (a)(q)
Egypt	5/15 (b)	0/15 (g)	15
Estonia	5/15 (b)(s)	0/10 (g)(t)	10 (q)
Ethiopia	10	0/10 (g)	10
Finland	5/15 (b)(s)	0 (t)	0/1/5/10 (m)(q)
France	0/10 (b)(s)	0 (t)	0/5/10 (q)(u)

Venezuela	5/10 (f)	0/10 (g)	12
Vietnam	10	0/10 (g)	10
Non-treaty countries	15/35 (x)	0/15/35 (d)(x)	15/35 (x)

(a) The lower rate applies to royalties paid for copyrights. The higher rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information.

(b) The lower rate applies if the receiving company (other than a partnership) owns at least 25% of the capital of the payer. Under the Belgium treaty, dividends paid to partnerships may also qualify for the lower rate. Under the United Kingdom treaty, the lower rate applies if the receiving company controls at least 25% of shares with voting rights of the payer. Under the Japan treaty the lower rate applies if the receiving company holds at least 25% of shares with voting rights of the payer for at least six months preceding the payment of dividend.

- (c) The lower rate applies if the receiving company (other than a partnership) owns at least 10% of the capital of the payer. Under the Canada and Nigeria treaties, the lower rate applies if the receiving company controls at least 10% of the voting rights of the payer (except for dividends paid by a Canadian investment corporation). Under the United States treaty, the lower rate applies if the receiving company owns at least 10% of the shares with voting rights of the payer (exceptions applies to dividends paid by investments companies and real estate investment trusts located in the United States). Under the Norway treaty, the 0% rate also applies to dividends paid to the government or specified institutions. Under the Cyprus, Luxembourg and Switzerland treaties, the 0% rate applies if at least 10% of share capital of the payer is held by an entity (other than a partnership) for at least one year. Under the Denmark treaty, the 0% rate applies if the recipient of the dividends is a pension fund. Under the Switzerland treaty, the 0% rate also applies if the recipient of the dividends is a central bank or a pension fund.
- (d) Interest on mutual deposits with banks in the interbank market is exempt from tax for recipients from non-treaty countries (subject to reciprocal treatment). For all Czech tax nonresidents (that is, recipients from treaty and non-treaty countries), interest on bonds issued by Czech taxpayers or the Czech Republic outside the Czech Republic is exempt from tax. The 15% rate applies to other interest but see also footnote (x).
- (e) The lower rate applies if the receiving company (other than a partnership) owns at least 20% of the capital of the payer. Under the Australia treaty, the lower rate applies to dividends paid from the Czech Republic to Australia if the receiving company owns at least 20% of the capital of the payer and to dividends paid from Australia to the Czech Republic if special requirements are met.
- (f) The 5% rate applies if the receiving company (other than a partnership) owns more than 15% of the capital of the payer.
- (g) The 0% rate applies to interest paid to (or by) the government (or specified institutions), subject to further conditions. Under the Albania treaty, the 0% rate also applies to interest paid to an agency, including banks and financial institutions, wholly owned by the contracting state. Under the Georgia treaty, the 0% rate also applies to interest on loans and credits guaranteed by governments or related to sales of industrial equipment that are financed by loans. Under the Armenia and Azerbaijan treaties, the 5% rate applies to interest on bank loans. Under the Ethiopia treaty, the 0% rate also applies to, among other items, interest paid to institutions owned or controlled by the government whose sole purpose is the promotion of export or foreign investment. Under the Thailand treaty, the 10% rate applies to interest paid to financial institutions or insurance companies; otherwise, the rate of the source country applies. Under the Syria treaty, the 0% rate also applies to interest paid to the central bank or any financial institution wholly owned by the government and to interest on loans and credits guaranteed by the government. Under the China treaty, the 0% rate also applies if the interest paid to selected government agencies or the central bank or if the receivable is financed, guaranteed or pledged by the government, the central bank or a selected government agency. Under the Barbados, Tajikistan and Uzbekistan treaties, the 0% rate also applies to interest from the sale on credit of merchandise or equipment or from a loan or credit granted by a bank or guaranteed by the government (or specified institutions). Under the Belarus treaty, the 0% rate also applies to interest on bank loans. Under the Poland treaty, the 0% rate also applies to interest from a loan or credit granted by a bank or guaranteed by the government (or specified institutions). Under the Belgium treaty, the 0% rate applies to interest from suspended payments for goods and services, loans guaranteed by public institutions aimed to support the export and bank loans and deposits (except in the form of securities). Under the Brazil treaty, interest from securities, bonds and promissory notes issued by the government (or specified institutions) is subject to tax in the state of residence of the issuer. Under the Bulgaria treaty, the 0% rate applies to interest from suspended payments for equipment or goods or from loans guaranteed by public institutions. Under the Canada treaty, the 0% rate also applies to, among other items, interest paid to institutions established to manage and pay out benefits from pension, retirement or employee schemes (other limitations apply). Under the Korea (South) treaty, the 0% rate also applies to interest paid in connection with sales on credit of industrial, commercial or scientific equipment or in connection with sales on credit of goods between commercial entities. Under the Malaysia treaty, the 0% rate also applies to interest from approved loans if the beneficial owner of the interest is a Czech tax resident.
- (h) The 5% rate applies to royalties for copyrights. The 10% rate applies to royalties for patents, trademarks, designs or models, plans, secret formulas and processes. The 15% rate applies to other royalties.

- (i) The 10% rate applies to loans and credits granted by a bank for a period of at least 10 years in connection with the following:
  - Sales of industrial equipment or studies
  - Installation or furnishing of industrial or scientific units
  - Public works
- (j) The 10% rate applies if the receiving company owns at least 25% of the payer for at least two years preceding the payment of the dividend.
- (k) The 0% rate applies to a dividend paid to the government of a contracting state (or a government institution) or to a company that is at least 25% owned by the government of the contracting state.
- (l) The 0% rate applies to a dividend paid by a tax resident of Malaysia to a Czech tax resident who is the beneficial owner of the dividends.
- (m) The 0% rate applies to royalties paid for copyrights. The 1% rate applies to royalties paid for finance leases of equipment. The 5% rate applies to royalties paid for operating leases of equipment and for the use of, or right to use, software. The 10% rate applies to other royalties.
- (n) The lower rate applies to royalties for copyrights, with the exception of royalties for cinematographic films and films or tapes for television broadcasting. The higher rate applies to other royalties.
- (o) The lower rate applies to dividends paid by a tax resident of Sri Lanka to a Czech tax resident (except with respect to investments made after the effective date of the treaty).
- (p) The treaty provides for a rate of 10%, but a protocol to the treaty provides for a rate of 5% until Swiss domestic law imposes a withholding tax on royalties.
- (q) In addition to treaty protection, royalties paid by Czech companies or permanent establishments of companies from EU member states to related-party companies located in other EU/EEA member states or Switzerland is exempt from tax if the conditions stated in provisions implementing EU Directive 2003/49/EC, as amended, are satisfied and if an advance ruling is issued by the Czech tax authority. If a Czech withholding tax applies to outbound royalties, EU/EEA tax residents may choose for each item of income to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return), or to treat the withholding tax as a final tax on the income.
- (r) The 10% rate applies to royalties paid for patents, trademarks and industrial, commercial, or scientific equipment or information. The 15% rate applies to royalties paid for films.
- (s) In addition to treaty protection, dividends paid by Czech companies to parent companies (as defined in the EU Parent-Subsidiary Directive 90/435/EEC) that are located in other EU member states, or in Iceland, Norway or Switzerland, are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (this condition may be met subsequently).
- (t) In addition to treaty protection, interest from qualified instruments paid by Czech companies or permanent establishments of companies from EU member states to related-party companies (as defined in EU Directive 2003/49/EC) located in other EU/EEA member states is exempt from withholding tax if the conditions stated in the provisions implementing EU Directive 2003/49/EC, as amended, in the Czech tax law are satisfied and if an advance ruling is issued by the Czech tax authority. In addition, if Czech withholding tax applies to outbound interest, EU/EEA tax residents may choose for each item of income to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return), or to treat the withholding tax as a final tax on the income.
- (u) The 0% rate applies to royalties paid for copyrights. The 5% rate applies to payments for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret patterns or production procedures and software, as well as for information relating to experience acquired in the areas of industry, commerce or science.
- (v) The 25% rate applies to royalties paid for trademarks. The 15% rate applies to other royalties.
- (w) The 5% rate applies to royalties paid for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for copyrights, software, patents, trademarks, designs or models, plans, secret formulas or processes, or information concerning industrial, commercial or scientific experience.
- (x) A 35% tax rate applies to payments to tax residents in countries with which the Czech Republic has not entered into a double tax treaty or a treaty on exchange of information in tax matters. For further details, see footnote (e) in Section A.

- (y) The 5% rate applies to business profits after taxation transferred by a permanent establishment in one contracting state to its head office in the other contracting state.
- (z) The 5% rate applies to interest paid to banks.
- (aa) The 0% rate applies to copyright royalties paid from the Czech Republic to Belgium. The 5% rate applies to royalties paid for use of industrial, commercial or scientific equipment.

New tax treaties or protocols to existing tax treaties that affect withholding rates with Belgium, Colombia, Liechtenstein, Kazakhstan, Kosovo and Ukraine are in the ratification process.

**A. At a glance**

Corporate Income Tax Rate (%)	23.5 (a)
Capital Gains Tax Rate (%)	23.5
Branch Tax Rate (%)	23.5
Withholding Tax (%)	
Dividends	27 (b)
Interest	22 (c)
Royalties from Patents, Know-how, etc.	22 (d)
Branch Remittance Tax	0 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) The corporate income tax rate will be lowered from 23.5% in the 2015 income year to 22% in the 2016 income year.

- (b) See Section B.
- (c) The 22% rate applies to payments on or after 1 March 2015. For payments before 1 March 2015, the rate is 25%. See Section B.
- (d) The 22% rate applies to payments on or after 1 March 2015. For payments before 1 March 2015, the rate is 25%. The rate is 0% for royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, and for the use of, or the right to use, industrial, commercial or scientific equipment. In addition, the rate may be reduced or eliminated if certain conditions are met under the European Union (EU) Interest-Royalty Directive or a double tax treaty entered into by Denmark.
- (e) A Danish branch office or a tax-transparent entity may be recharacterized as a Danish tax-resident company if the entity is controlled by owners resident in one or more foreign countries, the Faroe Islands, or Greenland and if either of the following circumstances exists:
  - The entity is treated as a separate legal entity for tax purposes in the country or countries of the controlling owner(s).
  - The country or countries of the controlling owner(s) are located outside the EU and have not entered into a double tax treaty with Denmark under which withholding tax on dividends paid to companies is reduced or renounced.

## B. Taxes on corporate income and gains

**Corporate income tax.** A resident company is a company incorporated in Denmark. In addition, a company incorporated in a foreign country is considered a resident of Denmark if it is managed and controlled in Denmark.

All tax-resident companies that are part of the same group must be included in a Danish mandatory joint taxation arrangement, regardless of whether these companies are subject to full or limited tax liability in Denmark. This mandatory joint taxation comprises all Danish affiliated companies as well as permanent establishments and real estate located in Denmark (for details, see Section C).

The income of resident companies that is generated in a foreign permanent establishment or real estate located outside Denmark is not included in the statement of the taxable income in Denmark, unless Denmark is granted the right to tax such income under an applicable double tax treaty or other international agreement, or the income is subject to controlled financial company (CFC) taxation (see Section E).

Branches of foreign companies located in Denmark are taxed only on trading income and on chargeable capital gains derived from the disposal of trading assets that are located in Denmark and related to a Danish permanent establishment.

**Rate of corporate tax.** For the 2015 income year, resident and non-resident companies are taxed at a rate of 23.5%.

**Capital gains.** Capital gains are taxed as other income at a rate of 23.5%.

Capital gains derived from a disposal of shares in a group company (group shares), shares in a subsidiary (subsidiary shares) and own shares (shares issued by the company) are exempt from tax regardless of the ownership period, while losses incurred on such shares are not deductible.

The following are considered group shares:

- Shares in a company that is subject to mandatory joint taxation under Danish rules together with the shareholder of the company

- Shares in a company that is eligible for inclusion in an international joint taxation arrangement under Danish rules (see Section C)

Subsidiary shares are shares in a company in which the shareholder directly owns at least 10% of the share capital. Capital gains on subsidiary shares in companies resident in Denmark are exempt from tax. In addition, capital gains on subsidiary shares in companies resident in foreign countries can be exempt from tax if withholding tax on dividends distributed from the company may be reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty.

Certain anti-avoidance rules apply if shareholders that do not each meet the requirements of holding group shares or subsidiary shares set up an intermediate holding company that by itself is able to meet the requirements.

In certain cases, capital gains may be reclassified as dividends. The reclassification of capital gains to dividends applies under specific circumstances only.

In general, capital gains derived from a disposal of shares that are not own shares, group shares or subsidiary shares (known as portfolio shares) are taxable at the statutory corporate income tax rate of 23.5%, while losses are deductible, regardless of the ownership period. However, capital gains derived from the disposal of portfolio shares do not trigger taxation if all of the following conditions are satisfied:

- The shares relate to a Danish limited liability company or a similar foreign company.
- The shares are not publicly listed.
- A maximum of 85% of the book value of the portfolio company is placed in publicly listed shares.
- The company disposing of the portfolio shares does not buy new portfolio shares in the same company within six months after the disposal.

The current rules regarding taxation of portfolio shares are based on the mark-to-market method, under which gains and losses are computed on the basis of the market value of the shares at the beginning and end of the income year. It is possible to opt for taxation based on the realization method with respect to unlisted portfolio shares only. Listed portfolio shares must be taxed according to the mark-to-market method. Special rules apply to the carryforward of unused losses on portfolio shares.

Gains on the sale of goodwill and intellectual property rights are subject to tax.

Recaptured depreciation (see Section C) is taxed as ordinary income at a rate of 23.5%.

**Administration.** In general, the income year for companies is the calendar year. Companies may select a staggered income year, which is an income year other than the calendar year. They may change their income year if justified by special circumstances.

In general, tax returns for companies must be filed within six months after the end of the companies' income year. For companies with income years ending from 1 February to 31 March, tax returns must be filed by 1 August. Companies pay corporate tax

on a current-year basis at a rate of 23.5%, with half payable on 20 March and the remainder on 20 November.

**Dividends paid.** In general, dividends paid are subject to withholding tax at a rate of 27%. However, withholding tax is not imposed on dividends paid to companies if the Danish shares qualify as subsidiary shares (see *Capital gains*) and if the withholding tax must be reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty. For a company owning Danish shares that are group shares rather than subsidiary shares, it is required that the withholding tax would have been reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty if the shares had been subsidiary shares. In both cases, the recipient of the dividends must be the beneficial owner of the dividends and, accordingly, is entitled to benefits under the EU Parent-Subsidiary Directive or a double tax treaty.

**Interest paid.** In general, interest paid to foreign group companies is subject to withholding tax at a rate of 22% for payments on or after 1 March 2015. For payments before 1 March 2015, the rate is 25%. The withholding tax is eliminated if any of the following requirements are satisfied:

- The interest is not subject to tax or taxed at a reduced rate under the provisions of a double tax treaty. For example, if withholding tax on interest is reduced to 10% under a double tax treaty, the withholding tax is eliminated completely.
- The interest is not subject to tax in accordance with the EU Interest/Royalty Directive. Under the directive, interest is not subject to tax if both of the following conditions are satisfied:
  - The debtor company and the creditor company fall within the definition of a company under Article 3 in the EU Interest/Royalty Directive (2003/49/EEC).
  - The companies have been associated (as stated in the directive) for at least a 12-month period.
- The interest accrues to a foreign company's permanent establishment in Denmark.
- The interest accrues to a foreign company, and a Danish parent company, indirectly or directly, is able to exercise control over such foreign company (for example, by holding more than 50% of the voting rights). Control must be fulfilled for a period of 12 months during which the interest is paid.
- The interest is paid to a recipient that is controlled by a foreign parent company resident in a country that has entered into a double tax treaty with Denmark and has CFC rules and if, under these foreign CFC rules, the recipient may be subject to CFC taxation.
- The recipient company can prove that the foreign taxation of the interest income amounts to at least  $\frac{3}{4}$  of the Danish corporate income tax and that it will not in turn pay the interest to another foreign company that is subject to corporate income tax amounting to less than  $\frac{3}{4}$  of the Danish corporate income tax.

In addition to the above requirements, the recipient of the interest must be the beneficial owner of the interest and, accordingly, is entitled to benefits under the EU Interest-Royalty Directive or a double tax treaty.

The above measures and exceptions also apply to non-interest-bearing loans that must be repaid with a premium by the Danish debtor company.

### C. Determination of trading income

**General.** Taxable income is based on profits reported in the annual accounts, which are prepared in accordance with generally accepted accounting principles. For tax purposes, several adjustments are made, primarily concerning depreciation and write-offs of inventory.

Expenses incurred to acquire, ensure and maintain income are deductible on an accrual basis. Certain expenses, such as certain gifts, income taxes and formation expenses, are not deductible. Only 25% of business entertainment expenses is deductible for tax purposes. Expenses incurred on advisor fees are not deductible if they are incurred with respect to investments in shares that have the purposes of a full or partial acquisition of one or more companies and of the exercise of control over or participation in the management of these companies.

**Inventories.** Inventory may be valued at historical cost or at the cost on the balance sheet at the end of the income year. Inventory may also be valued at the production price if the goods are produced in-house. Indirect costs, such as freight, duties and certain other items, may be included.

**Dividends received.** Dividends from group shares or subsidiary shares are exempt from tax if the dividend withholding tax must be reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty (see *Capital gains* in Section B for the definitions of group shares and subsidiary shares). Dividends for which the dividend paying company has claimed a tax deduction from its taxable income is not exempt from tax for the Danish dividend receiving company, unless taxation in the source country is reduced or eliminated under the EU Parent-Subsidiary Directive.

Dividends received by a Danish permanent establishment may be exempt from tax if the permanent establishment is owned by a foreign company that is tax resident in the EU, European Economic Area (EEA) or in a country that has entered into a double tax treaty with Denmark.

Dividends received on a company's own shares are exempt from tax.

Dividends that are not covered by the above tax exemption, such as dividends from portfolio shares, must be included in the taxable income of the dividend receiving company and taxed at the normal corporate income tax rate of 23.5%. A tax credit is normally available to the dividend receiving company for foreign withholding taxes withheld by the dividend distributing company.

Withholding tax on dividends from a Danish subsidiary to a foreign company applies in the case of a redistribution of dividends if the Danish company itself has received dividends from a more-than-10%-owned company in another foreign country and if the Danish company cannot be regarded as the beneficial owner of the dividends received. Correspondingly, it will apply if the Danish company has received dividends from abroad through one or more other Danish companies. Such dividends will generally be subject to withholding tax at a rate of 27%, unless the rate is

reduced under a double tax treaty with Denmark or the recipient is covered by the EU Parent-Subsidiary Directive.

### Depreciation

*Immediate deductions.* For the 2015 income year, new acquisitions not exceeding DKK12,800 (2015 amount) or with useful lives not exceeding three years are 100% deductible in the year of purchase. Computer software, operating equipment and ships for research and development, except operating equipment and ships used for exploration of raw materials, are also 100% deductible in the year of purchase.

*Asset classes.* Certain depreciable assets must be allocated among four asset classes:

- Operating equipment (including production facilities, machinery, office equipment, hardware and certain software that may not be written off immediately) may be depreciated at an annual rate of up to 25%, using the declining-balance method.
- Certain ships (weighing more than 20 tons and leased out without a crew) may be depreciated at an annual rate up to 12%, using the declining-balance method.
- Certain operating equipment with a long economic life (certain ships transporting goods or passengers, aircraft, rolling railway material, drilling rigs and facilities for producing heat and electricity) may be depreciated at an annual rate of up to 17%, using the declining-balance method. This rate will be decreased by two percentage points every other year until the rate is reduced to 15% in 2016. Facilities for producing heat and electricity with a capacity of less than 1 MW and wind-turbine generators (regardless of the capacity) may be depreciated at an annual rate of up to 25%, using the declining-balance method.
- Infrastructural facilities (facilities used for purposes, such as transporting, storing and distributing electricity, water, heat, oil, gas and waste water and facilities with respect to radio, telecommunications and data transmissions) may be depreciated at an annual rate of up to 7%, using the declining-balance method.

It is important to distinguish between building installations and infrastructural facilities.

*Buildings.* Buildings used for commercial and industrial purposes may be depreciated at an annual rate of up to 4%, using the straight-line method based on the purchase price, excluding the value of the land. Office buildings, financial institutions, hotels, hospitals and certain other buildings may not be depreciated. However, office blocks or office premises adjacent to buildings used for commercial purposes may be depreciated if the office blocks are used together with the depreciable buildings.

*Others.* Acquired goodwill, patent rights and trademarks may be amortized over seven years. Costs incurred in connection with the improvement of rented premises and properties (not used for habitation or other commercial or non-industrial purposes) on leased land may be depreciated at an annual rate of up to 20%. If the tenancy is entered into for a fixed number of years, the annual depreciation rate cannot exceed a rate that results in equal amounts of depreciation over the fixed number of years.

*Recapture.* The amount of depreciation claimed on an asset may be recaptured on the disposal of the asset. Recaptured depreciation is subject to tax at a rate of 23.5%. For assets depreciated under the declining-balance method, however, the consideration received is deducted from the collective declining-balance account, and, consequently, the recapture is indirect.

**Advance depreciation.** Advance depreciation is available on ships. A total of 30% (with a maximum of 15% in any single year) of the expenditure exceeding DKK1,453,200 (2015 amount) may be written off in the years preceding the year of delivery or completion. The relief is given if a binding contract has been concluded for construction or purchase of a ship. If a partnership enters into the contract, each partner must meet the DKK1,453,200 (2015 amount) requirement. If a ship is intended for lease, advance depreciation is not allowed in the year of acquisition, unless permission is obtained from the local tax authorities. This rule does not apply to the ships included in the new asset classes (see *Depreciation*).

**Relief for trading losses.** Trading losses and interest expenses may be set off against other income and chargeable gains for income years beginning on or after 1 July 2012. Losses incurred may be set off in full against the portion of the year's taxable income not exceeding an amount of DKK7,500,000. Losses exceeding DKK7,500,000 may be set off against 60% of the taxable income for the year. As a result, a company may not reduce its taxable income to less than 40% of the taxable income exceeding DKK7,500,000.

Losses, including prior-year losses, that cannot be set off against the taxable income for the year may be carried forward infinitely.

Losses may not be offset against interest and other capital income, net of interest paid, if more than 50% of the shares in the company changed ownership since the beginning of the year in which the loss was incurred. In addition, tax losses are forfeited by companies that are not engaged in an activity at the date of change of ownership.

**Groups of companies.** Joint taxation of Danish affiliated companies, Danish permanent establishments of foreign affiliated companies and real properties of foreign affiliated companies that are located in Denmark is compulsory. The jointly taxed income equals the sum of the net income of the jointly taxed companies, permanent establishments and real properties. An affiliation generally exists if the shareholder is able to control the company (for example, by holding more than 50% of the voting rights).

Joint taxation with foreign companies is voluntary. If a Danish company elects to be jointly taxed with a foreign company, all foreign affiliated companies are included in the Danish joint taxation arrangement. These include all subsidiaries, permanent establishments and real estate owned by the Danish company. If the Danish company is owned by a foreign group, the ultimate foreign parent company and all foreign companies affiliated with the ultimate foreign parent company are also included.

A company is considered to be an affiliated company if a controlling interest exists.

A 10-year period of commitment applies if a Danish company elects to be jointly taxed with its foreign affiliated companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT)	25%
Labor market supplementary pension scheme (ATP); approximate annual employer contribution for each full-time employee	DKK2,160
Payroll tax (Loensumsafgift)	
Banks, insurance companies and other financial businesses; levied on total payroll	12.2%
Other VAT-exempt businesses, including some public bodies; levied on total payroll plus taxable profits, adjusted to exclude financial income and expenses	4.12%
Lotteries and information activities performed by tourist offices, other organizations and some public bodies; levied on total payroll	6.37%
Publishers or importers of newspapers; levied on the value of newspapers sold	3.5%

#### E. Miscellaneous matters

**Foreign-exchange controls.** Denmark does not impose foreign-exchange controls.

**Debt-to-equity rules.** Under thin-capitalization rules, interest paid by a Danish company or branch to a foreign group company is not deductible to the extent that the Danish company's debt-to-equity ratio exceeds 4:1 at the end of the debtor's income year and that the amount of controlled debt exceeds DKK10 million (2015 amount). Limited deductibility applies only to interest expenses relating to the part of the controlled debt that needs to be converted to equity to satisfy the debt-to-equity ratio of 4:1 (that is, a minimum of 20% equity). The thin-capitalization rules also apply to third-party debt if the third party has received guarantees and similar assistance from a group company of the borrower.

The Danish thin-capitalization rules are supplemented through an "interest ceiling rule" and an Earnings Before Interest and Tax (EBIT) rule. These rules apply to both controlled and non-controlled debt. Only companies with net financial expenses exceeding DKK21,300,000 (2015 amount) are subject to these supplementary rules. For jointly taxed companies, the DKK21,300,000 threshold applies to all of these companies together.

Under the "interest ceiling rule," a company may only deduct net financial expenses corresponding to 4.1% (2015 rate) of the taxable value of certain qualified assets. Deductions for any excess net financial expenses are lost, except for capital losses, which may be carried forward for three years.

Under the EBIT rule, a company may reduce its taxable income through the deduction of financial expenses by no more than 80%. Net financial expenses exceeding this limit are nondeductible but,

in contrast to the interest ceiling rule, the excess expenses can be carried forward to be used in future years (if not restricted again by the EBIT rule). The calculation must be made after taking into account a possible restriction under the interest ceiling rule.

If a company establishes that it could obtain third-party financing on similar terms, it may be allowed to deduct the interest that would normally be disallowed under the ordinary thin-capitalization rules described above. No arm's-length principle can be applied to help the company escape the interest ceiling rule or the EBIT rule.

Danish tax law does not recharacterize the disallowed interest or impose withholding tax on it.

**Anti-avoidance legislation.** Danish tax law does not include a general anti-avoidance provision, but the courts tend to apply a substance-over-form principle.

However, certain recharacterization rules exist, such as a rule that recharacterizes debt as equity if the debt is treated as an equity instrument according to the tax rules in the country of the creditor.

Although a Danish company or taxable legal entity may change its domicile to another country, this would normally be considered a liquidation with the same tax effect as a taxable sale. The company can transfer its activities abroad, but, to prevent tax avoidance, such a transfer is considered a taxable disposal of the activities.

**Controlled financial companies.** Under the CFC legislation, a Danish company, together with other group member companies, holding more than 50% of the voting power of a foreign company must include in taxable income 100% of the taxable income of the subsidiary if the subsidiary is primarily engaged in financial activities. For this purpose, a subsidiary is considered to be primarily engaged in financial activities if more than 50% of the subsidiary's taxable income consists of net financial income and if more than 10% of the subsidiary's assets are "financial assets" (calculated according to modified Danish tax rules). The CFC rules apply to branches only if the branch is directly held by the Danish company. The income of indirectly held branches is included in the income of its head office.

**Transparency rule.** Under the transparency rule (Danish anti-Check-the-Box rule), if a Danish company is considered to be transparent under foreign tax rules (for example, the company is taxed as a branch in a foreign country), in principle, the company is also considered to be transparent under Danish tax rules. The rule may imply that a Danish company owned by a US parent company that has "checked the box" on the Danish company cannot deduct interest expenses, royalty expenses or other internal expenses paid to the US parent company. Certain exceptions exist, and case-by-case evaluation is recommended.

**Transfer pricing.** Transactions between affiliated entities must be determined on an arm's-length basis. In addition, Danish companies and Danish permanent establishments must report summary information about transactions with affiliated companies.

Danish tax law requires entities to prepare and maintain written transfer-pricing documentation for transactions that are not considered insignificant. Enterprises can be fined if they have not

prepared any transfer-pricing documentation or if the documentation prepared is considered to be insufficient as a result of gross negligence or deliberate omission. The documentation can be prepared in Danish, English, Norwegian or Swedish, and must be submitted to the tax authorities within 60 days on request. For a particular income year, such request may be made after the company has filed its tax return for the income year.

The fine for failure to prepare satisfactory transfer-pricing documentation consists of a basic amount of DKK250,000 per year per entity for up to five years plus 10% of the income increase required by the tax authorities. The basic amount may be reduced to DKK125,000 if adequate transfer-pricing documentation is filed subsequently.

Fines may be imposed for every single income year for which satisfactory transfer-pricing documentation is not filed.

In addition, companies may be fined if they disclose incorrect or misleading information for purposes of the tax authorities' assessment of whether the company is subject to the documentation duty.

The documentation requirements for small and medium-sized enterprises apply only to transactions with affiliated entities in non-treaty countries that are not members of the EU/EEA. To qualify as small and medium-sized enterprises, enterprises must satisfy the following conditions:

- They must have less than 250 employees.
- They must have an annual balance sheet total of less than DKK125 million or annual revenues of less than DKK250 million.

The above amounts are calculated on a consolidated basis (that is, all group companies must be taken into account).

- (a) Under Danish domestic law, no withholding tax is imposed on dividends paid to companies if both of the following requirements are satisfied:
- The shares are group shares or subsidiary shares (see Section B).
  - A tax treaty between Denmark and the country of residence of the recipient of the dividend provides that Denmark must eliminate or reduce the withholding tax on dividends, or the recipient is resident in an EU member state and falls within the definition of a company under Article 2 of the EU Parent-Subsidiary Directive (90/435/EEC) and the directive provides that Denmark must eliminate or reduce the withholding tax on dividends.
- (b) In general, all interest payments to foreign group companies are subject to a final withholding tax of 22% for payments on or after 1 March 2015. For payments before 1 March 2015, the rate is 25%. Several exceptions exist (see Section B). As a result of these exceptions, in general, withholding tax is imposed only on interest payments made to group companies that would qualify as CFCs for Danish tax purposes or if the recipient is not considered to be the beneficial owner, according to the domestic interpretation. Effective from the 2006 income year, withholding tax on interest paid to individuals was abolished.
- (c) The rate is 15% (Croatia, 10%; Portugal and Singapore, 10%; Egypt, Indonesia, Trinidad and Tobago, and Turkey, 20%; India and Morocco, 25%; Kenya, 30%) if the recipient is not a company owning at least 25% of the capital (Cyprus, 10% of the capital; Japan and Trinidad and Tobago, 25% of the voting shares).
- (d) The withholding tax rate is 0% if all of the following conditions are satisfied:
- The recipient directly owns at least 25% of the share capital of the payer for a period of 12 consecutive months that includes the date of the distribution of the dividend.
  - The dividend is not taxed in Greenland.
  - The recipient does not deduct the portion of a dividend distributed by it that is attributable to the Danish subsidiary.
- If the above conditions are not met, the withholding tax rate is 27%.
- (e) Under Danish domestic law, the rate is 0% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and for the use of, or the right to use, industrial, commercial or scientific equipment. Under a tax treaty, the general withholding tax rate for royalties of 22% (applicable to payments on or after 1 March 2015; for payments before 1 March 2015, the rate is 25%) can be reduced to 0%. Royalties paid to a company resident in another EU country are not subject to withholding tax if the provisions of the EU Interest/Royalty Directive are met and if the recipient is considered to be the beneficial owner according to the domestic interpretation.
- (f) The withholding tax rate is 0% if the recipient owns at least 50% of the share capital in the dividend distributing company and has invested more than EUR2 million in the dividend paying company. The withholding tax rate is 5% if the recipient owns at least 10% of the share capital in the dividend paying company and has invested more than EUR100,000 in the dividend paying company. The withholding tax rate is 10% in all other cases.
- (g) The rate is 22% (applicable to payments on or after 1 March 2015; for payments before 1 March 2015, the rate is 25%) for payments for the use of, or the right to use, trademarks.
- (h) Denmark honors the USSR treaty with respect to the former USSR republics. Azerbaijan, Moldova, Tajikistan and Uzbekistan have declared that they do not consider themselves obligated by the USSR treaty. Armenia and Kyrgyzstan have not yet declared whether they consider themselves obligated by the USSR treaty. Denmark has entered into tax treaties with Belarus, Estonia, Georgia, Latvia, Lithuania and Ukraine.
- (i) Denmark honors the Czechoslovakia treaty with respect to the Slovak Republic.
- (j) Denmark honors the Yugoslavia treaty with respect to Montenegro and Serbia. Denmark has entered into tax treaties with Croatia, Macedonia, Serbia and Slovenia. The withholding rates under these treaties are listed in the table.
- (k) The rate is 5% if the recipient is a company that owns at least 70% of the capital of the payer or has invested at least USD12 million in the capital of the payer. The rate is 10% if the recipient is a company owning at least 25%, but less than 70%, of the capital of the payer. For other dividends, the rate is 15%.
- (l) The rate is 15% if the recipient is not a company owning at least 10% of the shares of the payer.
- (m) The treaty does not cover the Hong Kong SAR.
- (n) The withholding tax rate for dividends is 0% if the parent company (beneficial owner) owns at least 10% of the share capital of the payer of the dividends (under the Hungary treaty, the share capital must also be owned for a continuous period of at least one year and/or the parent company [beneficial owner] must be a pension fund). If this condition is not met, the dividend withholding tax rate is 15%.

- (o) Under a new tax treaty between Denmark and Austria, the dividend withholding tax rate is 0% if the recipient is a company owning at least 10% of the payer. For other dividends, the rate is 15%. These rates will apply for income years beginning on or after 1 January 2011.
- (p) The double tax treaty between Denmark and France was terminated, effective from 1 January 2009. The countries will enter into a new treaty. However, at the time of writing, the countries had not yet entered into such treaty. Until a new tax treaty enters into force, Danish withholding taxes on dividends, interest and royalties are imposed according to Danish domestic law. Certain exemptions may apply (see Section B).
- (q) The double tax treaty between Denmark and Spain was terminated, effective from 1 January 2009. The countries will enter into a new treaty. However, at the time of writing, the countries had not yet entered into such treaty. Until a new tax treaty enters into force, Danish withholding taxes on dividends, interest and royalties are imposed according to Danish domestic law. Certain exemptions may apply (see Section B).
- (r) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the dividend withholding tax rate is 10%.
- (s) This rate applies to payments on or after 1 March 2015. For payments before 1 March 2015, the rate is 25%.

In addition to the double tax treaties listed in the table above, Denmark has entered into double tax treaties on savings, double tax treaties on international air and sea traffic, agreements on exchange of information in tax cases and agreements on promoting the economic relationship. The following are the countries with which Denmark has entered into such agreements:

- Double tax treaties on savings: Anguilla, Aruba, British Virgin Islands, Cayman Islands, Curaçao, Sint Maarten, Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles), Guernsey, Isle of Man, Jersey, Montserrat, and Turks and Caicos Islands
- Double tax treaties on international air and sea traffic: Bermuda, British Virgin Islands, Cayman Islands, Guernsey, Hong Kong SAR, Isle of Man, Jersey, Jordan, Kuwait and Lebanon
- Agreements on exchange of information: Andorra, Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Belize, Brunei Darussalam, Cayman Islands, Dominica, Gibraltar, Grenada, Guatemala, Guernsey, Isle of Man, Jersey, Liechtenstein, Macau SAR, Monaco, Montserrat, St. Kitts and Nevis, St. Vincent and the Grenadines, San Marino, Turks and Caicos Islands, Uruguay, and Curaçao, Sint Maarten, Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles)
- Agreements on promoting the economic relationship: Aruba, and Curaçao, Sint Maarten, Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles)

Agreements on exchange of information with respect to taxes have been proposed with Belgium, Botswana, Costa Rica, Greenland (appendix), Guatemala, Jamaica, Kuwait, Liberia, Marshall Islands, Niue, Panama, Qatar, Seychelles, Uruguay and Vanuatu.

**A. At a glance**

Corporate Income Tax Rate (%)	27
Capital Gains Tax Rate (%)	27
Branch Tax Rate (%)	27
Withholding Tax (%)	
Dividends	10 (a)
Interest	10 (b)
Royalties	27
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

(a) This is a final tax applicable to payments to both residents and nonresidents.

(b) This is a final tax applicable to payments to resident individuals and to non-resident individuals, companies and unincorporated business entities.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Resident corporations are subject to tax on their Dominican-source income and on their foreign-source income derived from investments and financial gains, such as dividends and interest from bonds acquired abroad.

A company is resident in the Dominican Republic if it is incorporated in the Dominican Republic.

A foreign company is considered domiciled in the Dominican Republic if it has its principal business or its effective management located in the Dominican Republic. Permanent establishments are considered legal entities separate from their overseas parent companies and are subject to income tax as companies incorporated in the Dominican Republic even though they are not considered by the Dominican law to be residents.

**Corporate income tax rates.** For the 2015 fiscal year, the corporate income tax rate is 27%.

Full exemptions or certain income tax credits usually apply to companies established in designated Free-Trade Zones (FTZs) or benefiting from other special incentive laws, such as the Frontier

Development Law (Law 28-01), the Tourism Development Law (Law 158-01), the Renewable Energies Law (Law 57-07) or the Film Law (Law 108-10).

**Asset tax.** The annual asset tax, which is assessed on the assets registered in the taxpayer's accounting books would be reduced from 1% to 0.5% for the 2015 fiscal year if the Dominican Republic's government is able to reach and maintain its tax collection goals for the 2015 fiscal year. Effective from the 2016 fiscal year, the asset tax would be eliminated and a tax on immovable property would replace the asset tax. The new tax would apply to assets registered by entities or individuals.

The tax base is the net carrying value of the taxpayer's assets at the end of the fiscal year. Investments in shares of another company and real estate used for agricultural exploitation are excluded from the tax base. Corporate income tax is creditable against the asset tax. The asset tax is calculated in the annual income tax return.

For financial institutions, electricity companies, stockbrokers, pension fund administrators, investment fund administrators and securitization companies, the tax base for the asset tax is the total value of fixed assets (net of depreciation) according to the balance sheet at the end of the tax period.

Entities that benefit from corporate income tax exemptions based on special laws or public contracts approved by Congress are exempt from the asset tax.

**Capital gains.** Gains derived from direct and indirect transfers of assets or rights located or economically exploited in the Dominican Republic are taxable and subject to the capital gains tax rate of 27%. Under the Dominican Republic Tax Code, capital gains may arise from the transfer of shares, land or other capital assets possessed by taxpayers, regardless of whether the gains are connected to the taxpayers' businesses. The following assets are not considered capital assets:

- Commercial inventories or assets possessed principally for sale to clients in the ordinary course of business
- Depreciable assets
- Accounts or promissory notes acquired in the ordinary course of business for services rendered or derived from the sale of inventory assets or assets sold in the ordinary course of business

The capital gain equals the difference between the transfer price of the assets and the cost of acquisition or production (adjusted for inflation).

**Administration.** In general, the tax year is the calendar year. However, companies may adopt a fiscal year ending on 31 March, 30 June or 30 September. The income tax return must be filed within 120 days after the end of the fiscal year.

All companies must make monthly income tax prepayments. For taxpayers that had an effective tax rate (ETR) in the preceding tax year that was lower or equal to 1.5%, each prepayment equals the amount resulting from applying the 1.5% rate to the gross income reported in the preceding fiscal year. Taxpayers with an ETR higher than 1.5% must make monthly prepayments corresponding

to 1/12 of the income tax paid in the preceding fiscal year. The ETR is determined by dividing the income tax paid in the preceding fiscal year by the gross income of the same period.

Taxpayers can request a two-month income tax return filing extension.

Indemnity interest at a rate of 1.73% is charged on outstanding balances of taxes due. In addition, a penalty of a 10% surcharge applies for the first month, and a 4% surcharge applies for each month or fraction of a month thereafter.

Non-compliance by the taxpayer with tax obligations may be subject to a penalty of 5 to 30 minimum wages (DOP43,225 to DOP259,350 [approximately USD991 to USD5,948]). In addition, a penalty equal to 0.25% of the income declared in the preceding fiscal year may be applied.

**Dividends.** Dividends (and all other types of distributions of earnings) are subject to a final withholding tax of 10%. Under the Dominican Tax Code and its regulations, a dividend is defined as any distributions of profits or reserves made by any type of corporation or entity to a shareholder, partner or participant. The following are included in the concept of profit distributions:

- Accounts receivable or similar arrangements that a corporation or entity has with its shareholders, members or participants, if they were not generated by a commercial transaction and if no principal or interest payments have been made in a period of more than 90 calendar days
- Share capital reductions, if capitalized reserves and/or retained earnings exist, until these reserves and earnings are exhausted

**Foreign tax relief.** Foreign income tax paid on income derived from investments and financial gains abroad may be claimed as a credit against the income tax payable in the Dominican Republic. However, such credit is limited to the portion of Dominican Republic tax allocable to the foreign-source income subject to tax abroad (that is, limited to a 27% rate).

### C. Determination of trading income

**General.** Tax is imposed on taxable profits, which correspond to the accounting profits adjusted in accordance with the income tax law.

Expenses incurred to generate taxable income and preserve the source of such income are deductible on an accrual basis if properly documented. However, certain expenses are not deductible, including the following:

- Expenses not properly documented
- Unauthorized bad debt provisions
- Prior-period tax adjustments

In addition, the Dominican Tax Code contains interest deduction rules, which are described below.

Under the first limitation rule, the proportion of interest deductible by a domiciled or resident debtor for loans granted by resident individuals or foreign individuals, companies or entities is calculated by dividing the withholding rate applicable to interest payments to such lenders (10%) by the corporate income tax rate

(27%). Nevertheless, if the interest paid by a resident or domiciled Dominican debtor constitutes taxable income for a nonresident or non-domiciled lender in its jurisdiction of domicile or residency and if the foreign lender's tax rate for such income is equal or greater than the 27% corporate income tax rate applicable in the Dominican Republic, the local resident or domiciled debtor may claim a deduction for 100% of the interest expense. Conversely, if the foreign lender's income tax rate for the interest income is lower than 27%, the local domiciled or resident debtor can only deduct a proportion of the interest equal to the foreign lender's income tax rate divided by local corporate income tax rate.

In addition, thin-capitalization rules are also applied. Under these rules, interest on loans granted by resident individuals or nonresident or non-domiciled individuals, corporations or entities are not deductible if the local debtor's debt-to-equity ratio exceeds 3:1. Interest not deductible in one fiscal year may be deducted in the following two fiscal years.

**Special industries.** Rules applicable to special industries are outlined below.

*Nonresident insurance companies.* Nonresident insurance companies are taxed on a deemed income equal to 10% of their gross income derived from insurance services rendered to resident or domiciled companies or individuals.

*Transportation.* Income derived from transportation services rendered from the Dominican Republic to other countries is deemed to equal 10% of the gross income derived from such services.

*Others.* Film distribution companies are taxed in the Dominican Republic based on a deemed income equal to 15% of their gross income derived from sales. In addition, communications companies are taxed on a deemed income equal to 15% of their gross income.

**Inventories.** In general, last-in, first-out (LIFO) is the approved method for valuing inventory. However, taxpayers may use other methods if previously approved by the tax authorities.

**Provisions.** In general, provisions are not deductible for income tax purposes. However, the Tax Code and Income Tax Regulations provide for limited exceptions to this rule, including a provision for uncollectable accounts receivable. This provision is allowable as a deductible expense if it is calculated based on 4% of the accounts receivable balance at the close of the fiscal year and if the amount is authorized by the Tax Administration.

Provisions for gratifications, bonuses and other similar compensation items are deductible for income tax purposes if the amounts in the provisions are paid by the filing date of the income tax return.

**Tax depreciation and amortization allowances.** Depreciation is calculated using a variation of the declining-balance method. Intangibles, such as patents, models, drawings and copyrights, may be amortized using the straight-line method if they have a definite useful life.

Salvage value is not taken into account in calculating depreciation. The following are the generally applicable depreciation rates provided by law.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	5
Light vehicles and office equipment, including computers	25
Other assets	15

**Relief for losses.** Losses generated by companies in the ordinary course of a trade or business may be carried forward for a five-year period. In each fiscal year, 20% of the total loss can be used to offset taxable income. However, in the fourth and fifth years, only 80% and 70%, respectively, of the total taxable income may be offset by the 20% loss carry forward. Losses derived from reorganizations are not deductible for income tax purposes. Net operating losses may not be carried back.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax; standard rate	16
Social security contributions	
Health contributions; imposed on salary up to a maximum amount of 10 legal minimum wages (DOP86,450 or approximately USD2,000; the legal minimum wage for social security contributions is DOP8,654 or approximately USD200)	
Employer	7.09
Employee	3.04
Pension contributions; imposed on salary up to a maximum amount of 20 legal minimum wages (DOP172,900 or approximately USD3,958)	
Employer	7.10
Employee	2.87
Labor risk contributions; payable by employer on salary up to a maximum amount of 4 legal minimum wages (DOP34,580 or approximately USD791); rate varies according to the risk level of the company's activity	1.1 to 1.3
Workers' compensation insurance	Various
Telecom Tax; imposed on the consumption of telecom services by legal entities and individuals in the Dominican Republic; tax rate applied to gross payment	10
Tax on financial transactions; imposed on the value of checks and wire transfer transactions and on payments made to third parties (the tax applies even if the wire transfer is made to an account in the same bank)	0.0015

### E. Foreign-exchange controls

The Central Bank of the Dominican Republic (Banco Central de la República Dominicana) has liberalized foreign-exchange controls. Only individuals and companies generating foreign currency from exports, services rendered and other specified activities are required to exchange foreign currency with the Central Bank through commercial banks. The Central Bank is not required to furnish foreign currency to satisfy demands for foreign payments. Individuals and companies may buy foreign currency from, or sell it to, commercial banks.

### F. Treaty withholding tax rates

The following are the maximum withholding tax rates under the Dominican Republic's double tax treaties.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Canada	18*	18	18
Spain	10	10	10
Non-treaty countries	10	10	27

\* Under the tax treaty with Canada, if the Dominican Republic enters into a treaty with another country in which the applicable income tax withholding rate for dividends is lower than the rate provided in the treaty with Canada (for example, maximum tax rate of 10% under the tax treaty with Spain), that same tax treatment automatically applies to the treaty with Canada.

- (a) Companies that reinvest their profits in Ecuador and use them to acquire assets for productive activities in Ecuador are entitled to a reduction of 10 percentage points in the corporate income tax rate on the reinvested amount (that is, the reinvested profits are taxed at 12%) if the company increases its capital stock and such increase is registered with the Commercial Register by 31 December of the fiscal year.

- (b) Capital gains tax on sales of tangible assets is not imposed in Ecuador. Sales of shares are exempt from tax if the sales are “occasional” sales, which are sales that are not made in the ordinary course of business of the company.
- (c) These withholding taxes are imposed on remittances abroad to non-domiciled companies and nonresident individuals. The withholding tax rates may be reduced under tax treaties. For further details concerning withholding taxes, see Section B.
- (d) A 13% withholding tax is imposed on dividends paid to recipients located in tax havens or other jurisdictions with a lower rate of income tax or in the case of anticipated dividend distributions (before the annual income tax determination).
- (e) A 22% withholding tax is imposed on payments of interest to non-domiciled companies and nonresident individuals unless the interest is paid on loans granted by financial institutions or multilateral institutions (Andean Corporation for Promotion, International Monetary Fund or World Bank). Thin-capitalization rules apply to the deductibility of interest paid to related parties (see Section E).
- (f) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax is levied on companies domiciled in Ecuador and on foreign companies. Companies domiciled in Ecuador include those incorporated in Ecuador and companies incorporated in foreign countries that have been approved as branches by the Superintendence of Companies after a legal proceeding. Companies incorporated in Ecuador are subject to tax on their worldwide income. Foreign companies are subject to tax on income derived from activities within Ecuador and from goods and assets located within Ecuador.

**Rate of corporate tax.** The standard rate of corporate income tax is 22%. Companies that reinvest their profits in Ecuador and use them to acquire assets for productive activities in Ecuador are entitled to a reduction of 10 percentage points in the corporate income tax rate on the reinvested amount (that is, the reinvested profits are taxed at 12%) if they retain the reinvested profits until 31 December of the tax year following the tax year in which the profits are earned.

**Capital gains.** Capital gains tax on sales of tangible assets is not imposed in Ecuador. Sales of shares are exempt from tax if the sales are “occasional” sales, which are sales that are not made in the ordinary course of business of the company. Losses on sales between related parties are not deductible.

**Administration.** The fiscal year runs from 1 January to 31 December. No other closing dates are permitted, regardless of the date a business begins operations. Returns must be filed between 10 April and 28 April.

Companies must make an advance payment of income tax equal to the sum of 0.2% of the equity of the company, 0.2% of the total costs and expenses deducted in the calculation of income tax, 0.4% of the total assets of the company and 0.4% of the total income subject to income tax. The equity and total assets are determined as of the end of the preceding fiscal year. The other amount is the total for the preceding fiscal year.

The amount of the advance payment is calculated in the annual tax return. The advance payment is payable in two installments, which are due in July and September. To calculate the amount of

the advance payment, the withholdings made with respect to the taxpayer in the preceding year are subtracted.

The advance payment is considered a minimum tax. As a result, if no tax is payable for a fiscal year, the advance tax is considered a final tax payment that may not be refunded or offset against tax in future years.

The penalty for late filing is 3% of the income tax due for each month or fraction of a month of the delay, up to a maximum of 100% of the tax due. Interest at the maximum legal rate, which floats, is levied on all increases in tax assessments from the date the tax was originally due to the date of payment.

**Withholding taxes.** A 22% withholding tax is generally imposed on the following payments abroad:

- Interest, royalties and payments for technical assistance to non-domiciled companies and nonresident individuals
- Payments to nonresident individuals for services rendered
- Payments to non-domiciled companies for professional services rendered abroad or occasional services rendered in Ecuador

Income tax withholding at a rate of 22% is applied to all reimbursements of expenses abroad.

Penalties are imposed for failures to comply with the withholding requirements. Withholding agents who deliberately fail to provide taxpayers, totally or partially, with tax withholding receipts are subject to imprisonment and fines.

**Dividends.** Dividends distributed after the payment of income tax are not subject to income tax or withholding tax. However, a 13% withholding tax is imposed on dividends paid to recipients located in tax havens or other jurisdictions with a lower income tax rate. For anticipated dividend distributions (before the annual income tax determination), withholding tax at a rate equal to the corporate income tax rate is applied.

**Foreign tax relief.** Ecuador does not grant relief for foreign taxes paid to companies domiciled in Ecuador.

### C. Determination of trading income

**General.** Taxable income is based on accounting profits after the corresponding tax reconciliation adjustments.

In computing taxable income, a company can deduct expenses incurred in producing income, including production and distribution costs, interest charges, royalty payments and depreciation. Also, employee profit-sharing distributions (15% of gross profit) can be deducted before computing taxes. Special provisions govern the computation of taxable profits from the export of petroleum, maritime transportation and video films.

Expenses incurred abroad are generally deductible if corresponding taxes are withheld and if the payment constitutes taxable income for the recipient. The following cross-border payments are deductible subject to specified limitations:

- Payments for imports, including interest and financing fees, as provided in import licenses
- Export fees of up to 2% of the export value

- Interest paid to related parties that are subject to the thin-capitalization rules (see Section E)
- Payments under financial leases
- Indirect costs allocation (up to 5% of taxable basis)

Nondeductible expenses include the following:

- Interest paid on foreign loans, to the extent the interest rate exceeds the limit established by the Central Bank Board (the maximum rate is the Prime Rate), and interest on foreign loans not registered at the Ecuadorian Central Bank
- Losses on sales of assets between related parties
- Leasing payments with respect to leasebacks or trade with related parties

**Inventories.** Inventory is generally stated at cost (calculated using the average, last-in, first-out [LIFO], first-in, first-out [FIFO] or actual methods). Inventory write-offs must be documented through a sworn statement that the inventory was destroyed or donated.

**Tax depreciation and amortization.** Depreciation and amortization expenses are deductible for income tax purposes. The tax law provides the following maximum straight-line depreciation rates applicable for tax purposes.

Asset	Rate (%)
Commercial and industrial buildings, aircraft and ships	5
Office equipment	10
Motor vehicles and trucks	20
Plant and machinery	10
Computers	33

For tax purposes, as a general rule, expenditures to acquire property and other assets that produce revenue must be amortized over 5 years, using a straight-line depreciation rate of 20%. Intangibles must be amortized over either the term of the relevant contract or a 20-year period.

The tax authorities may approve other methods and annual rates for depreciation and amortization.

Organizational costs may be amortized over a 10-year period. Research and development expenses are generally written off over five years.

Depreciation of fixed assets in excess of their original cost is permitted if business assets are revalued as a result of inflation or increased replacement costs.

**Relief for losses.** Net operating losses may be carried forward and offset against profits in the following five years, provided that the amount offset does not exceed 25% of the year's profits. Loss carrybacks are not permitted.

**Groups of companies.** For tax purposes, no measures exist for filing consolidated returns and relieving losses within a group.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on sales and commercial transactions, imports, rendering of services and intellectual property rights; principal products that are exempt are food products in their natural state, drugs and veterinary products	12
Currency exportation tax (CET); imposed on all cross-border payments or money transactions abroad, with or without the intervention of financial institutions, and monies deposited abroad through bank transfers, checks or wire transfers; tax is withheld at source; foreign banks operating in Ecuador must pay the tax monthly; the tax law provides that CET applies to payments made from foreign bank accounts of Ecuadorian entities if CET was not levied on the cash when it was initially transferred to the foreign bank account and to exports of goods and services if the cash does not enter Ecuador within 180 days after the goods arrive at their destination or the services begin to be rendered; CET paid on imports of raw materials, supplies and capital goods may be used as a tax credit for income tax purposes for the following five years if such goods are used in production processes and listed in a resolution issued by the Internal Revenue Service	5

## E. Miscellaneous matters

**Foreign-exchange controls.** All transactions in Ecuador must be conducted in US dollars.

**Debt-to-equity rules.** A thin-capitalization rule applies in Ecuador. Any interest paid on loans from related parties in excess of a 3:1 debt-to-equity ratio is not deductible.

**Free-trade zone.** The signatories of the Andean Community or the former Andean Pact (Bolivia, Colombia, Ecuador and Peru) have entered into a free-trade agreement. However, Peru signed the agreement with some restrictions. Under the agreement, merchandise and goods manufactured in one of the signatory countries may enter the other signatory countries free of customs duties. All items imported from other countries are subject to a common external customs duty.

**Transfer pricing.** Transfer-pricing regulations in Ecuador are based on the Organisation for Economic Co-operation Development rules, requiring that all transactions among related parties must be conducted in accordance with arm's-length principles. Since 2008, the tax administration has considered companies to be related if any of the following circumstances exist:

- Companies are carrying out transactions with companies domiciled in countries with a lower fiscal imposition than Ecuador. A lower fiscal imposition is deemed to occur if any of the following conditions are satisfied:

- The foreign country is on a list of countries established by the Internal Revenue Service of Ecuador.
- The fiscal imposition paid by the foreign party in its country of establishment is lower than 60% of the Ecuadorian income tax rate (22%).
- The foreign party is a limited liability company established under US laws with owners not resident in the United States, and either the company or its owners are not subject to the US federal income tax or are located in Delaware, Florida, Nevada or Wyoming (these states do not have state income tax).
- More than 50% of a company's purchases or sales are executed with the same supplier or client (presumption of commercial relationship).

The following are the rules regarding the filing of transfer-pricing information:

- Income tax payers that have carried out transactions with related parties (foreign or local) during a fiscal year in an amount exceeding USD3 million must submit to the Transfer Pricing Annex to the tax administration.
- Income tax payers that have carried out transactions with related parties (foreign and local) during a fiscal year in an amount that exceeds USD6 million must submit the Transfer Pricing Annex and the Transfer Pricing Comprehensive Report.
- Income taxpayers that do not meet the minimum amounts mentioned above must submit the Transfer Pricing Annex or the Transfer Pricing Comprehensive Report if the tax administration requires it.

The deadline to file the Transfer Pricing Annex and the Transfer Pricing Comprehensive Report is two months after the company files an income tax return that includes a transfer-pricing analysis.

Taxpayers involved in transactions with related parties are exempt from the application of the transfer-pricing regime if they satisfy the following conditions:

- Their corporate income tax is higher than 3% of taxable income.
- They do not conduct business with residents in tax havens or lower-tax jurisdictions.
- They do not have contracts with government institutions for the exploration or exploitation of non-renewable resources.

## F. Treaty withholding tax rates

Under an agreement with Bolivia, Colombia and Peru (the Andean Pact), income earned in those countries is generally not taxed in Ecuador to avoid double taxation. The withholding tax rates under Ecuador's bilateral treaties are shown in the following table.

	Dividends (a) %	Interest %	Royalties %
Belgium	15	10	10
Brazil	0	15	15 (c)
Canada	5/15	15	10/15
Chile	5/15	4/15	10/15
China	0/5	0/10	0/10
France	15	10/15	15
Germany	15	15	15

	<b>Dividends (a)</b> %	<b>Interest</b> %	<b>Royalties</b> %
Italy	15	0/10	5
Korea (South)	5/10	0/12	5/12
Mexico	5	10/15	10
Romania	15	10	10
Spain	15	10/15	15
Switzerland	15	10	10
Uruguay	10/15	15	10/15
Non-treaty countries	0	22 (b)	22

- (a) Dividends are exempt from withholding tax under Ecuadorian domestic law if corporate income tax was paid on the profits out of which the dividends were distributed.
- (b) A 22% withholding tax is imposed on the payment of interest abroad unless the interest is paid on loans granted by financial institutions or multilateral institutions.
- (c) Trademark royalties are taxed at a rate of 22%.

Ecuador has signed a tax treaty with Singapore, which is awaiting ratification by the Ecuadorian Assembly.

Certain Services Provided by	
Nonresident Entities	20 (c)
Branch Remittance Tax	– (d)
Net Operating Losses (Years)	
Carryback	Unlimited (e)
Carryforward	5

- (a) The standard corporate income tax rate is 25%. The 30% rate results from a surtax of 5%, which is imposed on the taxable amount exceeding EGP1 million for a three-year period beginning with 2014.
- (b) For details regarding the 10% rate, see Section B.
- (c) This is the standard rate. The rate may be reduced to 5% under domestic law for dividends only. It also may be reduced under a tax treaty. Exemptions may apply in certain circumstances. The tax is a final tax imposed on gross payments.
- (d) The dividend tax rate that will be imposed on the profits of branches of foreign companies is not specified in the law. The executive regulations will specify the rate.
- (e) Losses incurred in long-term projects may be carried back to offset profits from the same project for an unlimited number of years.

**B. Taxes on corporate income**

**Corporate income tax.** Egyptian corporations are subject to corporate profits tax on their profits derived from Egypt, as well as on profits derived from abroad, unless the foreign activities are performed through a permanent establishment located abroad. Foreign companies performing activities through a permanent establishment in Egypt are subject to tax only on their profits derived from Egypt.

**Rates of corporate income tax.** The standard rate of corporate income tax is 25%. In addition, a 5% surtax is imposed on the taxable amount exceeding EGP1 million for three years beginning with the 2014 financial year.

Exceptions to the 25% rate exist. Oil prospecting and production companies are subject to tax on their profits at a rate of 40.55%. The Suez Canal Company, the Egyptian General Petroleum Company and the Central Bank of Egypt are subject to tax on their profits at a rate of 40%.

**Capital gains**

*From the sale of securities.* Capital gains derived from the sales of securities realized by nonresident juridical persons are subject to tax at a rate of 10%.

The following rates apply to capital gains derived from the sale of securities by resident juridical persons:

- A 10% rate applies to capital gains on securities registered at the Egyptian Stock Exchange that are sourced in Egypt.

- The standard corporate tax rate applies to capital gains on securities not registered with the Egyptian Stock Exchange that are sourced in Egypt, capital gains on securities realized abroad and capital gains on shares.

*From the sale of other assets.* Tax on capital gains on other assets is calculated at the ordinary corporate profits tax rates in the same manner as ordinary business profits and is not calculated separately. Trading and capital losses derived from sales of other assets are deductible against taxable capital gains.

**Administration.** Companies must file their annual tax returns, together with all supporting schedules and the original financial statements, before 1 May of each year, or four months after the end of the financial year. The tax return must be signed by the taxpayer. Taxpayers can file a request for an extension of the due date for filing the tax return if the estimated amount of tax is paid at the time of the request. A request for an extension must be filed at least 15 days before the due date. An extension of up to 60 days may be granted. An amended tax return can be filed within 30 days after the original due date.

Any tax due must be paid when the tax return is filed.

A late penalty is imposed at a rate of 2% plus the credit and discount rate set by the Central Bank of Egypt in January of each year.

The law has set up appeals committees at two levels — the Internal Committee and the Appeal Committee. The Appeal Committee's decision is final and binding on the taxpayer and the tax department, unless a case is appealed to the court within 30 days of receiving the decision, which is usually in the form of an assessment.

**Dividends.** Dividends paid by corporations or partnerships, including companies established under the special economic zone system, to resident juridical persons, nonresident persons, or nonresident juridical persons that have a permanent establishment in Egypt are subject to tax on dividends.

Tax on dividends is imposed at a standard rate of 10% without any deductions or exemptions. However, this rate can be reduced to 5% if both of the following conditions are fulfilled:

- The recipient holds more than 25% of the distributing company's capital or voting rights.
- The recipient holds the shares or commits to hold the shares for a period of not less than two years.

Under the law, foreign branches' profits in Egypt are considered distributed profits within 60 days after the financial year-end. As a result, a branch must pay the dividend tax on its annual profits within 60 days after the financial year-end.

The tax law grants exemptions for investment funds, parent companies and holding companies under some conditions.

Dividends in the form of free stocks are not subject to tax on dividends.

**Withholding tax.** In general, payments for all services performed by nonresident companies for Egyptian companies in or outside Egypt are subject to withholding tax at a rate of 20%. However,

this withholding tax does not apply to payments related to the following activities:

- Transportation
- Shipping
- Insurance
- Training
- Participation in conferences and exhibitions
- Registration in foreign stock markets
- Direct advertising campaigns

**Foreign tax relief.** Foreign tax paid by resident entities outside Egypt can be deducted if supporting documents are available.

Treaties entered into between Egypt and other countries provide a credit for taxes paid abroad on income subject to corporate income tax in Egypt.

### C. Determination of taxable income

**General.** Corporate income tax is based on taxable profits computed in accordance with generally accepted accounting principles, modified for tax purposes by certain statutory provisions primarily concerning depreciation, provisions, inventory valuation, intercompany transactions and expenses. Interest on bonds listed on the Egyptian stock exchange is exempt from tax if certain conditions are satisfied.

Start-up and formation expenses may be deducted in the first year.

The deductibility of a branch's share of head office overhead expenses is limited to 10% of the taxable net profit. Head-office expenses are fully deductible if they are directly incurred by the branch and are necessary for the performance of the branch's activity in Egypt. Such expenses must be supported by original documents and approved by the head office auditors.

Interest paid on loans and overdrafts with respect to a company's activities is deductible after offsetting interest income. Interest paid to individuals who are not subject to tax or exempt from tax is not deductible. Deductible interest is limited to the interest computed at a rate equal to twice the discount rate determined by the Central Bank of Egypt.

**Inventories.** Inventory is normally valued for tax purposes at the lower of cost or market value. Cost is defined as purchase price plus direct and indirect production costs. Inventory reserves are not permissible deductions for tax purposes. For accounting purposes, companies may elect to use any acceptable method of inventory valuation, such as first-in, first-out (FIFO) or average cost. The method should be applied consistently, and if the method is changed, the reasons for such change should be stated.

**Provisions.** Provisions are not deductible except for the following:

- Provision for up to 80% of loans made by banks, which is required by the Central Bank of Egypt
- Insurance companies' provision determined under Law No. 10 of 1981

Bad debts are deductible if the company provides a report from an external auditor certifying the following:

- The company is maintaining regular accounting records.
- The debt is related to the company's activity.

- The debt appears in the company's records.
- The company has taken the necessary action to collect the debt.

**Depreciation and amortization allowances.** Depreciation is deductible for tax purposes and may be calculated using either the straight-line or declining-balance method. The following are the depreciation rates.

Type of asset	Method of depreciation	Rate (%)
Buildings, ships and aircraft	Straight-line	5
Intangible assets	Straight-line	10
Computers	Declining-balance	50
Heavy machinery and equipment	Declining-balance	25
Small machinery and equipment	Declining-balance	25
Vehicles	Declining-balance	25
Furniture	Declining-balance	25
Other tangible assets	Declining-balance	25

Accelerated depreciation is allowable only once at a rate of 30% on new machines and equipment in the year in which they are placed into service.

Normal depreciation is calculated after taking into account the accelerated 30% depreciation on the net value of new assets, provided that proper books of account are maintained.

**Relief for losses.** Tax losses may be carried forward for five years. Losses incurred in long-term projects may be carried back for an unlimited number of years to offset profits from the same project.

Losses incurred outside Egypt cannot be offset against taxable profits in Egypt.

If capital losses exceed capital gains realized from disposals of securities and shares in a tax year, the excess can be carried forward for three years.

**Groups of companies.** Associated or related companies in a group are taxed separately for corporate income tax purposes. Egyptian law does not contain a concept of group assessment under which group losses may be offset against profits within a group of companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax	Various
Customs duties	
General, ad valorem	Various
On value of machinery needed for investments by companies	5
Stamp duties on bills, promissory notes and letters of guarantee as well as most types of documents, contracts, checks and receipts (shares and bonds listed on the Egyptian Stock Exchange are exempt)	Various

Nature of tax	Rate (%)
Social insurance	
On monthly base salary, up to EGP1,012.50; paid by	
Employer	26
Employee	14
On amount of variable salary (any amount other than base salary) of EGP1,830 a month; paid by	
Employer	24
Employee	11
On contract labor force	18

## E. Miscellaneous matters

**Foreign-exchange controls.** Egypt has a free-market exchange system. Exchange rates are determined by supply and demand, without interference from the central bank or the Ministry of the Economy.

**Debt-to-equity rules.** Under the new tax law, the maximum debt-to-equity ratio is 4:1. If the debt exceeds such ratio, the excess interest may not be claimed as a deductible expense.

**Transfer pricing.** The Egyptian tax law contains measures regarding transfer pricing, which are based on the arm's-length principle. Under these measures, the tax authorities may adjust the income of an enterprise if its taxable income in Egypt is reduced as a result of contractual provisions that differ from those that would be agreed to by unrelated parties. However, under the new tax law, it is possible to enter into arrangements in advance with the tax department regarding a transfer-pricing policy (Advance Pricing Arrangement). An Advance Pricing Arrangement ensures that transfer prices will not be challenged after the tax return is submitted and, accordingly, eliminates exposure to penalties and interest on the late payment of taxes resulting from adjustments of transfer prices.

The Egyptian Tax Department, in association with the Organisation for Economic Co-operation and Development, has issued transfer-pricing guidelines. The guidelines provide taxpayers with guidance on the application of the arm's-length principle to the pricing of their intra-group transactions, as well as outlining the documentation taxpayers must maintain to demonstrate their compliance with this principle.

## F. Treaty withholding tax rates

Dividends paid to nonresidents are subject to withholding tax under Egyptian domestic law. However, some tax treaties may provide reduced rates, exemptions or other tax benefits.

The table below sets forth maximum withholding rates provided in Egypt's double tax treaties for interest and royalties only.

To benefit from the tax rates provided by double tax treaties with respect to interest and royalties, within six months after the date of receipt of the payment, a nonresident entity or its legal representative must submit to the tax authorities an application to apply the tax rate stated in the treaty and request a refund of the difference between the domestic rate and the treaty rate. The application

must be submitted on the form designed for this purpose together with required documents.

The following is the treaty withholding tax rate table.

	<b>Interest (%)</b>	<b>Royalties (%)</b>
Albania	10	10
Algeria	5	10
Austria	15	0
Bahrain	According to domestic law in each country	According to domestic law in each country

Non-treaty countries	20	20

- (a) A final draft of a new tax treaty with Finland was initiated on 17 September 1997, but the new treaty has not yet been ratified.
- (b) This treaty is being renegotiated.
- (c) The treaty with Yugoslavia applies to the republics that formerly comprised Yugoslavia.

Egypt has signed double tax treaties with Armenia, Bangladesh, Ireland, Kazakhstan, Mongolia, Oman, Senegal, Seychelles, the Slovak Republic, Sri Lanka, Tanzania, Thailand, Uganda and Vietnam, but these treaties have not yet been ratified. Tax treaty negotiations are under way with Congo (Democratic Republic of), Macedonia and Korea (North).

Net Operating Losses (Years)	
Carryback	0
Carryforward	0 (i)

- (a) An alternate minimum tax is imposed. See Section B.
- (b) The withholding tax applies to interest received by individuals and companies on bank deposits. Interest paid between domiciled companies is not subject to withholding tax.
- (c) Amounts paid or credited to non-domiciled legal entities or individuals who are resident, domiciled or incorporated in tax-haven jurisdictions (or paid through legal entities resident, domiciled or incorporated in such jurisdictions) are subject to a 25% withholding tax. Exceptions apply to the following types of payments:
- Payments for acquisitions or transfers of tangible assets
  - Payments to taxpayers in tax-haven jurisdictions located in Central America that have signed cooperation agreements with Salvadoran tax and customs authorities
  - Payments to taxpayers in tax-haven jurisdictions that have signed with El Salvador information exchange agreements or double tax treaties
  - Payments under circumstances in which reduced withholding tax rates apply

If an interest payment is made to a non-domiciled entity that is not registered with the Central Reserve Bank of El Salvador and not domiciled in a tax-haven jurisdiction, a 20% withholding tax applies. If an interest payment is made to a non-domiciled entity that is not registered with the Central Reserve

Bank of El Salvador and domiciled in a tax-haven jurisdiction, a 25% withholding tax applies. Withholding tax at a reduced 10% rate applies if the recipient of the interest is a financial institution supervised in its country of origin and registered with the Central Reserve Bank of El Salvador. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a payment in full of the income tax on the interest income.

- (d) The withholding tax is imposed on payments to foreign companies and individuals for services rendered or used in El Salvador, as well as on payments for the transfer of intangible assets. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax. Amounts paid or credited to non-domiciled legal entities or individuals who are resident, domiciled or incorporated in tax-haven jurisdictions (or paid through legal entities resident, domiciled or incorporated in such jurisdictions) are subject to a 25% withholding tax. Exceptions apply to the following types of payments:
- Payments for acquisitions or transfers of tangible assets
  - Payments to taxpayers in tax-haven jurisdictions located in Central America that have signed cooperation agreements with Salvadoran tax and customs authorities
  - Payments to taxpayers in tax-haven jurisdictions that have signed with El Salvador information exchange agreements or double tax treaties
  - Payments under circumstances in which reduced withholding tax rates apply

The 20% rate applies to royalties from know-how and technical services paid to non-domiciled entities that are not domiciled in tax-haven jurisdictions.

- (e) The withholding tax is imposed on payments to non-domiciled persons or entities for transfers of intangible assets or for the use, or grant of use, of rights over tangible and intangible assets related to cinematographic movies, video tapes, phonographic discs, radio serials, television serials, serials and strips reproduced by any means, video and track records, and television programs transmitted by cable, satellite or other similar media. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.
- (f) The withholding tax is imposed on payments to foreign companies and individuals for international transportation services. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.
- (g) The withholding tax is imposed on payments to non-domiciled insurance and reinsurance companies and reinsurance brokers, authorized by the Superintendent of the Financial System. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.
- (h) A withholding tax rate of 5% applies to amounts paid or credited in capital or equity reductions, in the portion corresponding to capitalization or reinvestment of profits. For this purpose, the amounts paid or credited by the decrease of equity or capital corresponds to previously capitalized amounts.
- (i) Capital losses can be carried forward to offset capital gains for a period of five years, provided that the losses have been reported in previously filed tax returns.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident corporations are subject to tax on Salvadoran-source income and on certain types of foreign investment income. Nonresident corporations are subject to tax on Salvadoran-source income only. As a result, resident and nonresident taxpayers are subject to income tax on income derived from the following:

- Movable and immovable property in El Salvador
- Activities carried out in El Salvador
- Services rendered by domiciled and non-domiciled entities that are used in El Salvador

Taxable foreign investment income derived by resident corporations includes income, capital gains, profits, or interest derived from securities, financial instruments, and derivative contracts if any of the following conditions are met:

- The issuing entity is a national entity or domiciled in El Salvador.
- The capital is invested or employed in El Salvador.
- The risk assumed is placed or located in El Salvador.

Foreign investment income earned by a legal entity that is domiciled in El Salvador or that is considered a domiciled establishment or branch for Salvadoran tax purposes is taxable.

Income derived from interest, premiums and other earnings from deposits abroad paid by non-domiciled financial institutions to domiciled legal entities must always be declared to the Salvadoran tax authorities even if they have been subject to income tax or other similar taxes abroad. Taxes paid abroad can be credited according to the rules provided by Salvadoran law.

**Corporate income tax rate.** The standard rate of income tax is 30% for Salvadoran companies, foreign companies with a permanent establishment in El Salvador and non-domiciled companies. However, companies that have sales equal to or less than USD150,000 are subject to a 25% income tax rate.

**Alternate minimum tax.** The alternate minimum tax (AMT) is a minimum income tax computed by applying a rate of 1% to a taxpayer's net assets. The net asset value is determined by subtracting the following from the total value of the assets:

- Accumulated depreciation and amortization amounts
- Non-operating fixed assets
- Assets owned abroad
- Shares owned in other Salvadoran entities
- Financial liabilities related to fixed operating assets

Taxpayers should perform the following calculations:

- The ordinary income tax calculation by applying a rate of 25% or 30% to net income
- The AMT calculation by applying a rate of 1% to net assets

The income tax payable is the higher amount resulting from these two calculations.

The amount of the AMT paid that exceeds the income tax calculated using the ordinary income tax calculation can be credited in the next three tax periods.

Several types of taxpayers are exempt from the AMT, such as the following:

- Free-trade zone users
- Shared services companies
- Entities and trusts financed by the government of El Salvador
- International organizations or foreign governments
- Taxpayers that are within their first three years of business, provided that the business is carried out with new investments (purchases of pre-existing assets or rights are expressly excluded).

The Constitutional Chamber of the Supreme Court of Justice of El Salvador (SCJ) recently admitted a claim of unconstitutionality against the AMT on the grounds of a possible violation of constitutional principles. The AMT would be repealed if the SCJ were to render a ruling declaring the AMT unconstitutional. Until the SCJ issues a ruling declaring the AMT unconstitutional, the AMT is in force and binding on entities.

**Capital gains.** Capital gains derived from the sale of movable and immovable property are subject to income tax at a rate of 10%. However, if the asset is sold within 12 months after acquisition,

the capital gain is subject to tax at a rate of 25% or 30% of net income.

Companies may carry forward capital losses for a five-year period to offset future capital gains only.

The capital gain or loss on a transaction is computed by deducting from the sales price the following:

- Cost of the asset, which equals the purchase price less allowable depreciation claimed under the income tax law
- Improvements made to the asset
- All selling expenses necessary to complete the transaction

**Administration.** The statutory tax year runs from 1 January through 31 December. Companies must file annual income tax returns and pay any tax due within four months after the end of the tax year.

Companies with total assets of SVC10 million (approximately USD1,142,857) or more, or with gross income of SVC5 million (approximately USD571,428) or more, must file an annual tax certification of their tax obligations. This certificate is issued by an external certified public accountant (CPA) who is authorized by the CPA Surveillance Council.

**Dividends.** Domiciled entities in El Salvador that pay to, or register profits for, domiciled or non-domiciled entities or individuals must withhold income tax at a 5% rate. This serves as a definite income tax payment. Payment or registration of profits can be made in various forms, including, among others, payments in cash or securities and in-kind payments, regardless of whether they are considered dividends, quotas, excess payments, legal reserves, profits or earnings.

The above obligation also applies to representatives of parent companies, affiliates, branches, agencies and other permanent establishments that pay or credit profits to domiciled entities or individuals abroad.

Notwithstanding the above, if payments are made to an entity or individual domiciled or resident in a jurisdiction that has preferential tax regimes or low or nil taxes or that is a tax haven, a 25% withholding tax rate applies.

**Withholding tax on loans.** Legal entities or entities without legal capacity domiciled in El Salvador that remit cash or in-kind assets as loans or advance remittances or engage in other types of loan operations must withhold tax at a rate of 5% of such amounts if the amounts are remitted to any of the following:

- Partners, shareholders, associates, beneficiaries, and other related parties according to Section 25 of the Income Tax Law (for example, spouses and relatives in the fourth degree of consanguinity or second degree of kinship)
- Entities or individuals domiciled or resident in a jurisdiction that has preferential tax regimes or low or nil taxes or that is a tax haven
- Parent companies or branches domiciled abroad

Certain exceptions apply, such as to loans with a market value interest rate or a one-year term and to supervised financial institutions.

**Foreign tax relief.** In general, relief is granted in El Salvador for foreign taxes paid with respect to certain types of investment income earned abroad. Also, see Section F.

### C. Determination of trading income

**General.** Taxable income is computed in accordance with Adopted Financial Information Standards in El Salvador (International Financial Reporting Standards, effective from January 2011), subject to adjustments required by the Salvadoran income tax law. The Salvadoran income tax law requires the use of the accrual method of accounting.

Taxable income includes all income derived from the following:

- Assets located in El Salvador
- Activities or transactions carried out in El Salvador
- Capital invested in El Salvador
- Services rendered in El Salvador and services rendered outside El Salvador that are used in El Salvador
- Certain types of investment income (see Section B)

In general, all costs and expenses necessary to produce and preserve taxable income are deductible for income tax purposes, provided all legal deductibility requirements are met.

**Imputed income.** The Salvadoran income tax law does not contain rates and formulas for calculating imputed income. However, the tax authorities may determine taxable income based on certain information, including the following:

- Investments made during the tax year
- Equity fluctuations
- Transactions and profits recorded in previous tax years
- Purchases and sales
- Value of imported goods
- Value of inventories
- Purchases not recorded
- Performance of similar businesses
- General expenses

**Inventories.** Salvadoran income tax regulations provide that inventories may be valued at acquisition cost. The cost may be calculated using certain methods, such as first-in, first-out (FIFO), last purchase cost and average cost, as well as special methods established for agricultural products and cattle. The income tax law provides that inventories can be valued by other methods if authorization from the tax authorities is obtained before the method is implemented.

**Provisions.** Provisions for contingent liabilities, such as severance payments and labor costs, are not deductible expenses. However, payments of such liabilities are deductible expenses. Provisions for doubtful accounts may be deducted if certain legal requirements are satisfied.

### Tax depreciation and amortization

*Depreciation.* The acquisition cost of products with a useful life of 12 months or less may be fully deducted from taxable income in the year of acquisition. Property with a useful life of more than 12 months may be depreciated using the following straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	5
Machinery	20
Vehicles	25
Other movable property	50

Only a portion of the acquisition cost of used machinery and movable property may be deducted for tax purposes. The deductible percentages, which are based on the asset's life, are shown in the following table.

<b>Asset's useful life Years</b>	<b>Deductible percentage (%)</b>
1 but less than 2	80
2 but less than 3	60
3 but less than 4	40
4 or more	20

The useful life of a used asset is determined when the asset is purchased. The depreciable portion of the acquisition cost is calculated according to the normal depreciation rules.

*Tax amortization.* The acquisition cost or development cost of software programs used to produce and preserve taxable income may be amortized at an annual rate of up to 25% of the cost of development or acquisition. The deductible percentages applicable to used machinery (see above) also apply to used software programs.

**Relief for losses.** Net operating losses may not be carried forward or back to offset taxable income.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax; transfers of fixed assets that have been used for four years or more are not subject to transfer taxes	13
Real property transfer tax; tax imposed on value of real property with respect to the amount that exceeds SVC250,000 (approximately USD28,571)	3
Customs duties	Various
Tax on certain financial transactions; imposed on payments of goods and services by check and debit card for which the transaction value exceeds USD1,000, payments through wire transfers for which the transaction value exceeds USD1,000, transfers in favor of third parties in any form or by any technological means, for which the transaction value exceeds USD1,000 loan or financing disbursements of any kind and transactions between entities of the financial system (banks) for their own purposes or in accordance with a customer's instructions; exemptions apply	0.25
Withholding tax on cash deposits, payments and withdrawals over USD5,000	0.25

Nature of tax	Rate (%)
Social contributions; paid by employer	
Prevention system (this system provides pensions and certain other benefits); on salaries up to SVC51,666.74 (USD5,904.77)	6.75
Social security; on salaries up to SVC6,000 (USD685.71)	
Maternity, sickness and professional risks	7.5
Professional training	1

## E. Foreign-exchange controls

The currencies in El Salvador are the colon (SVC) and the US dollar. Since 2001, all transactions and operations in El Salvador can be carried out and denominated in colons or US dollars. The permanent exchange rate in El Salvador is SVC8.75 = USD1.

No restrictions are imposed on foreign-trade operations or foreign-currency transactions.

## F. Tax treaties

El Salvador's only tax treaty in force is with Spain. The treaty is based on the Organisation for Economic Co-operation and Development model, with some minor differences.

In Spain, the treaty applies to income tax on individuals, income tax on corporations, income tax for nonresidents, net worth tax, and local income tax and net worth tax. In El Salvador, the treaty applies to income tax.

For dividends, interest and royalties paid by companies domiciled in one signatory country to residents of the other signatory country, the treaty provides for maximum tax rates in the source country of 12% for dividends and 10% for interest and royalties. If certain conditions are met, the tax rate for dividends may be reduced to 0%. The treaty also provides for a maximum rate of 10% in the source country for services, unless the individual or company that accounts for the income has a permanent establishment in the country in which the services are rendered.

## A. At a glance

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	35 (b)
Branch Tax Rate (%)	35
Withholding Tax (%)	
Dividends	25 (c)
Interest	25 (c)
Royalties from Patents, Know-how, etc.	10
Payments for Oil and Gas Services	6.25/10 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (e)

- (a) The minimum corporate tax is 1% of turnover. See Section B for details.  
 (b) In certain circumstances, the tax is deferred or reduced (see Section B).  
 (c) This tax is imposed on payments to nonresidents. For residents, the rate is 35%.  
 (d) This tax applies to payments for services performed by subcontractors of oil and gas companies. The 6.25% rate applies to residents. The 10% rate applies to nonresidents.  
 (e) In general, companies may carry forward net operating losses for three years. However, companies operating in the hydrocarbon sector may carry forward net operating losses for five years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Equatorial Guinea (EG) companies are taxed on the territorial principle. As a result, EG companies carrying on business outside EG are not subject to corporate income tax in EG on the related profits. EG companies are those registered in EG, regardless of the nationality of the shareholders or where the companies are managed and controlled. Foreign companies engaged in business in EG are subject to corporate income tax on EG-source profits.

**Tax rate.** The corporate income tax rate is 35%.

The minimum corporate tax is 1% of annual turnover for the preceding year. The amount of this tax cannot be less than XAF800,000 (for further details regarding this tax, see *Administration*).

**Capital gains.** Capital gains are taxed at the regular corporate income tax rate. However, the tax can be deferred if all of the proceeds are used to acquire new fixed assets in EG within three years or in the event of a merger. If the business is totally or partially transferred or discontinued, only one-half of the net capital gains is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased.

**Administration.** The tax year is the calendar year. Tax returns must be filed by 30 April. The minimum corporate tax must be declared and paid by 31 March of each year. The minimum corporate tax may be set off against the regular income tax payable for the same tax year.

Late payments and late filings of tax returns are subject to penalties. For the minimum corporate tax, the penalty equals 50% of the amount of the tax. For corporate income tax, the following are the penalties:

- XAF200,000 per month of delay for the filing of the return.
- 50% of the amount not declared if the return has a shortfall that exceeds 1/10 of the declared profit. The penalty is increased to 100% in case of bad faith.

**Dividends.** Dividends paid to nonresidents are subject to a 25% withholding tax.

Resident companies normally include dividends received in taxable income. However, a parent company may exclude up to 90% of the dividends received from a 25%-owned subsidiary.

**Foreign tax relief.** EG does not provide relief for foreign taxes paid.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the general accounting chart of the Organization for Harmonization of Business Law in Africa (*Organisation pour l'Harmonisation en Afrique du Droit des Affaires*, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are deductible only if they are normal and substantiated:

- Head office overhead and remuneration for certain services (studies and technical, financial or administrative assistance) paid to nonresidents
- Royalties from patents, brands, models or designs paid to a non-Economic and Monetary Community of Central Africa (*Communauté Économique et Monétaire de l'Afrique Centrale*, or CEMAC) corporation participating in the management of, or owning shares in, the EG corporation

The following expenses are not deductible:

- Rent expense for movable equipment paid to a shareholder holding, directly or indirectly, more than 10% of the capital
- A portion of interest paid to a shareholder in excess of the central bank annual rate and, if the shareholder is in charge of management, on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, penalties, corporate income tax and individual income tax
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director), gifts and subsidies

**Inventories.** Inventories are normally valued at cost. Cost must be determined under a weighted average cost price method.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. The following are the straight-line depreciation rates for major categories of assets.

Asset	Rate (%)
Buildings	5 to 20
Plant and machinery, and transportation equipment	5 to 100
Office equipment	10 to 15

**Relief for losses.** In general, companies may carry forward net operating losses for three years. However, companies operating in the hydrocarbon sector may carry forward net operating losses for five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** EG law does not allow the filing of consolidated tax returns or provide any other form of tax relief for groups of companies. However, the OHADA Uniform Act on Accounting Law contains the principle of consolidated financial statements.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on transactions performed in EG that are not subject to the oil and gas sector withholding tax (see Section A)	
General rate	15
Reduced rate	6
Specified products	0

<b>Nature of tax</b>	<b>Rate (%)</b>
Social security contributions; imposed on salaries; paid by	
Employer	21.5
Employee	4.5
Worker Protection Fund and Professional Training Fund; imposed on salaries; paid by	
Employer (on gross salary)	1
Employee (on net salary)	0.5

### **E. Foreign-exchange controls**

The EG currency is the CFA franc BEAC (XAF).

Exchange-control regulations exist in EG for financial transfers in the franc zone which is the monetary zone including France and its former overseas colonies. In the franc zone, transactions from XAF1 million to XAF10 million require a preliminary declaration to the Ministry of Finance. Outside the franc zone, a preliminary authorization from the Ministry of the Economy, Finance and Industry is required for any transaction exceeding XAF10 million.

### **F. Tax treaties**

Equatorial Guinea has entered into the tax treaty of the former Central African Economic and Customs Union (Union Douanière et Économique de l'Afrique Centrale, or UDEAC).

*The tax law in Estonia has been frequently amended, and further changes are likely to be introduced. Because of these frequent changes, readers should obtain updated information before engaging in transactions.*

## A. At a glance

Corporate Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	0/20 (b)
Branch Tax Rate (%)	20 (a)
Withholding Tax (%) (d)	
Dividends	0 (c)
Interest	0/20 (d)
Royalties	0/10/20 (e)

Rental Payments	20 (f)
Services	0/10/20 (g)
Salaries and Wages	20

- (a) Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax at a rate of 20% on distributed profits and certain payments made. The tax rate is applied to the gross taxable amount divided by a specified percentage (for further details, see Section B).
- (b) Resident companies and permanent establishments of nonresident companies are not subject to tax on their capital gains received. They are subject only to tax at a rate of 20% on distributed profits. Nonresident companies without a permanent establishment in Estonia are subject to tax at a rate of 20% on their capital gains derived from Estonian sources. For further details, see Section B.
- (c) Withholding tax is not imposed on dividends. Dividends are subject to 20% corporate income tax at the level of the resident distributing companies only (for further details, see Section B).
- (d) Interest payments are generally exempt from withholding tax. Withholding tax at a rate of 20% is imposed on interest paid to resident individuals (including payments made by contractual investment funds on the account of the funds), except for interest received from European Economic Area (EEA) credit institutions from deposits. Interest paid to nonresidents as a result of ownership of contractual investment funds is subject to a 20% withholding tax if more than 50% of the assets owned (directly or indirectly) by the fund during a two-year period preceding the date of the interest payment is real estate located in Estonia and if the interest recipient has at least 10% ownership in the contractual investment fund at the moment of receiving the interest. Withholding tax is not imposed on interest paid from the profits of contractual investment funds if the profits have already been taxed.
- (e) Withholding tax at a rate of 10% is imposed on payments to nonresident individuals and companies. Royalties paid to companies resident in other EU countries or Switzerland are not subject to withholding tax if the provisions of the EU Interest-Royalty Directive are satisfied. A 20% withholding tax is imposed on payments to resident individuals.
- (f) Withholding tax at a rate of 20% is imposed on payments to resident individuals and nonresidents.
- (g) The 20% rate applies to payments to nonresidents from low-tax jurisdictions (a low-tax jurisdiction is a jurisdiction that does not impose a tax on profits or distributions or a jurisdiction in which such tax would be less than  $\frac{1}{3}$  of the Estonian tax payable by resident individuals on a similar amount of business income). The 10% rate applies to payments to other nonresidents for services rendered in Estonia. A 0% rate may apply under double tax treaties.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax on the following payments made to resident legal entities, nonresident companies, resident individuals and nonresident individuals:

- Dividends
- Fringe benefits
- Gifts
- Donations
- Business entertainment expenses
- Distributions of profits
- Payments not related to the business of the payer

Resident companies are companies registered (effectively the same as incorporated) in Estonia. European public limited liability companies and European Cooperative Societies that have their registered office in Estonia are deemed to be Estonian tax residents. Nonresident companies without a permanent establishment in Estonia are subject to tax on their business income derived from Estonia.

**Tax rates.** Resident companies are subject to tax on the payments described in *Corporate income tax* at a rate of 20%. To calculate the corporate income tax for 2015, the tax rate is applied to the taxable amount divided by 0.8.

A 20% rate applies to income derived by nonresident companies without a permanent establishment in Estonia.

**Capital gains.** Capital gains derived by resident companies and permanent establishments of nonresident companies are exempt from tax until they are distributed.

Nonresident companies without a permanent establishment in Estonia are taxed at a rate of 20% on their capital gains derived from Estonian sources.

Capital gains derived from sales of shares and securities by non-residents are exempt from tax. However, if the shares of a company, contractual investment fund or other pool of assets are sold by a nonresident with at least a 10% holding and if at the time of the sale or at any other time during the two preceding years, real estate and buildings directly or indirectly accounted for 50% or more of the assets of the company, capital gains derived from the sale of the shares are taxable.

If a resident company is deleted from the Estonian commercial register without liquidation and its economic activities are ended, the holding of a nonresident in the company is taxed as a capital gain, which is equal to the market value of the holding less the acquisition cost. The taxation is postponed if economic activities are continued through another resident company or a permanent establishment remains in Estonia.

**Administration.** The tax period is a calendar month. Tax returns must be filed and income tax must be paid by the 10th day of the following month.

*Advance rulings.* Taxable persons may apply for advance rulings from the tax authorities. Advance rulings may relate only to actual transactions, as opposed to theoretical events. The advance ruling is binding on the tax authorities and recommended for the taxable person. The taxable person must inform the tax authorities of the execution of the transaction described in the advance ruling. A time limit for the binding nature of the ruling is set based on the taxpayer's evaluation of the time needed for the execution of the transaction.

The processing of the advance ruling may be suspended if a similar transaction is simultaneously being reviewed in challenge proceedings (proceedings involving a dispute between the taxpayer and the tax authorities) or court proceedings and if the expected decision in such proceedings is crucial for the determination of the tax consequences. Advance rulings may not be issued with respect to the determination of transfer prices (determination of value of transactions between related parties).

For the advance ruling to be binding, the taxpayer must present detailed and accurate information before the beginning of the relevant transactions. If the tax laws are amended after the advance ruling has been issued but before the transaction is carried

out, the advance ruling is no longer binding. The deadline for issuing an advance ruling is 60 calendar days beginning with the date of acceptance of the application. By a motivated decision (a decision that includes arguments supporting the decision) in writing, the deadline may be extended for an additional 30 calendar days. A state fee is payable for the processing of the advance-ruling application.

A summary of the ruling, except for information protected by the tax secrecy clause (the tax authorities are bound to maintain the confidentiality of information concerning a taxpayer that was acquired in the course of their activities; certain exceptions apply), is published on the tax authorities' web page. The taxable person may prohibit the disclosure of specific information.

**Dividends.** Withholding tax is not imposed on dividends paid. Payers of dividends must pay corporate income tax at a rate of 20% on the gross amount of dividends paid. This income tax is treated as a payment of income tax by the distributing company and not as tax withheld from the recipient of the dividends.

Dividends received are not included in taxable income (see *Foreign tax relief*).

The following payments are also taxable as dividends at the level of the company:

- Decrease of share capital (if the decrease exceeds paid-in equity capital)
- Redemption of shares and the payment of liquidation proceeds in an amount that exceeds the monetary and non-monetary payments made into the equity capital

**Interest.** Interest payments are generally exempt from withholding tax. Withholding tax at a rate of 20% is imposed on interest paid to resident individuals (including payments made by contractual investment funds on the account of the funds), except for interest received from European Economic Area (EEA) credit institutions from deposits. Interest paid to nonresidents as a result of ownership of contractual investment funds is subject to a 20% withholding tax if more than 50% of the assets owned (directly or indirectly) by the fund during a two-year period preceding the date of the interest payment is real estate located in Estonia and if the interest recipient has at least 10% ownership in the contractual investment fund at the moment of receiving the interest. Withholding tax is not imposed on interest paid from the profits of contractual investment funds if the profits have already been taxed.

**Foreign tax relief.** Dividends distributed by an Estonian company and a permanent establishment of a foreign company that had received dividends from a foreign company (except from a company located in a low-tax jurisdiction) are exempt from income tax if the following conditions are satisfied:

- The dividends are received from a taxable company resident in the EEA or Switzerland, or foreign tax has been paid on or withheld from the profits out of which the dividends were paid.
- The Estonian company receiving the dividends owns at least 10% of the shares or votes of the foreign company when the dividends were received.

The following profits are also exempt from tax:

- Profits allocated to a permanent establishment of an Estonian company in an EEA country or Switzerland
- Profits allocated to a permanent establishment of an Estonian company in another foreign country if foreign tax has been paid on the profits

Any foreign tax paid or withheld can be credited by an Estonian company against income tax payable on dividend distribution.

### C. Determination of trading income

Because resident companies and permanent establishments of nonresident companies registered with the Estonian authorities are not subject to tax on their income, they need not determine their trading income for tax purposes.

Profits of Estonian contractual investment funds from immovable property are taxed immediately when profits are earned.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods and services, excluding exports	9/20
Social security tax	33
Mandatory funded pension contributions	2/3
Land tax	0.1 to 2.5
Unemployment insurance contributions (2015 rates); paid by	
Employer	0.8
Employee	1.6

Other significant taxes include excise duty, stamp duties, heavy vehicles tax, charges on the use of Estonian natural resources and pollution charges.

### E. Miscellaneous matters

**Foreign-exchange controls.** The official currency in Estonia is the euro (EUR).

Enterprises registered in Estonia may maintain bank accounts abroad without any restrictions.

**Debt-to-equity rules.** No debt-to-equity or thin-capitalization rules exist in Estonia.

**Anti-avoidance legislation.** Under the Taxation Act, if it is evident from the content of a transaction or act that the transaction or act is performed for the purposes of tax evasion, the actual economic substance of the transaction applies for tax purposes. If a fictitious transaction is entered into in order to conceal another transaction, the provisions of the concealed transaction apply for tax purposes.

**Transfer pricing.** Under a transfer-pricing measure in the income tax law, pricing between resident and nonresident associated companies should be at arm's length. The tax authorities may adjust to an arm's-length amount the profit of a company engaging in

transactions with nonresident associated persons. Persons are considered associated if they have a common economic interest or if one person has a prevalent influence over another person. The transfer-pricing measure also covers transactions between nonresident legal entities and their permanent establishments in Estonia. Transfer-pricing documentation is required for the following entities:

- Entities with more than 250 employees (together with related parties)
- Entities operating in certain industries
- Entities that had turnover, including the turnover of related parties, of at least EUR50 million in the preceding financial year
- Entities that had consolidated net assets of at least EUR43 million in the preceding financial year
- Parties to a transaction if one of the parties is a resident of a low-tax jurisdiction

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Estonian domestic law.

	Dividends (a)	Interest (b)	Royalties (c)
	%	%	%

United States	0	0	5/10 (d)
Uzbekistan	0	0	10
Non-treaty countries	0	0	10/20 (f)

- (a) Dividends are not subject to withholding tax under Estonian domestic law.
- (b) Interest is not subject to withholding tax under Estonian domestic law except for interest paid in certain circumstances to nonresidents as a result of ownership in foreign contractual investment funds (see Section B).
- (c) Royalties paid to a company resident in another EU country or Switzerland are not subject to withholding tax if the provisions of the EU Interest-Royalty Directive are satisfied.
- (d) The lower rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
- (e) The lower rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, but excluding software payments.
- (f) The 20% rate applies to rental payments to nonresidents. The 10% rate applies to royalties, including royalties paid for the use of industrial, commercial or scientific equipment.

## A. At a glance

Business Income Tax Rate (%)	25/30/35 (a)
Capital Gains Tax Rate (%)	15/30 (b)
Branch Tax Rate (%)	25/30/35 (a)
Withholding Tax (%)	
Dividends	10 (c)
Interest	
On Deposits	5 (c)
On Foreign Loans	10
Royalties for the Right to Use Artistic Works	5 (c)
Royalties Paid by Holders of Large-Scale Mining Licenses	
Precious Minerals	8
Semiprecious Minerals	6
Metallic Minerals	5
Industrial Minerals	4
Construction Minerals	3
Salt	4
Geothermal	2
Technical Services Rendered Outside Ethiopia	10
Income from Casual Rental of Property (on Annual Gross Income)	15 (c)
Purchases of Goods for More than ETB10,000	2 (d)
Purchases of Services for More than ETB500	2 (d)
Branch Remittance Tax	10 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/10 (f)

- (a) The standard business income tax rate is 30%. Income from large-scale mining operations, excluding petroleum, natural gas and oil shale, is taxed at a rate of 25%. A 35% rate applies to income from small-scale mining operations, with the same exclusions. Income from petroleum, natural gas and oil shale operations is taxed at the standard rate of 30%.

- (b) The 15% rate applies to gains derived from transfers of buildings located in municipal areas that are used for a business. The 30% rate applies to gains derived from transfers of shares of companies.
- (c) This is a final income tax that is withheld at source for both residents and nonresidents.
- (d) This rate applies if the supplier provides a tax identification number. Otherwise, the rate is 30%. For further details, see Section B.
- (e) Remittances by branches to their foreign headquarters are considered to be distributions of dividends and are accordingly subject to income tax at a rate of 10%.
- (f) Companies in the mining sector may carry forward losses 10 years. Also, see Section C.

## B. Taxes on corporate income and gains

**Business income tax.** Resident companies are subject to business income tax on their worldwide income. Nonresident companies are subject to tax on their Ethiopian-source income only. A company is resident in Ethiopia if it satisfies any of the following conditions:

- It has its principal office in Ethiopia.
- Its place of effective management is located in Ethiopia.
- It is registered in the trade register of the Ministry of Trade and Industry or of the trade bureaus of the regional governments of Ethiopia. Registered companies include permanent establishments of nonresident companies in Ethiopia.

**Tax rates.** The standard business income tax rate is 30%. Income from large-scale mining operations, excluding petroleum, natural gas and oil shale, is taxed at a rate of 25%. A 35% rate applies to income from small-scale mining operations, with the same exclusions. Income from petroleum, natural gas and oil shale operations is taxed at the standard rate of 30%.

Certain investment activities approved by the Ethiopian Investment Authority qualify for income tax exemptions and other incentives. For example, new export-oriented investments in manufacturing, agro-industrial activities or the production of agricultural products may qualify for income tax exemptions ranging from two to seven years, while two-year tax exemptions are available for investments in the expansion and upgrading of existing businesses engaged in such activities. The availability and length of tax exemptions depend on the distance of the place of investment from Addis Ababa, the capital city. The exemptions are designed to encourage investors to invest in remote areas that are less developed but endowed with resources. Enterprises that incur losses during the period of income tax exemption may carry forward their losses to years following the expiration of the tax-exemption period for a period equaling half the tax-exemption period. The normal loss carryforward period is three years (see Section C).

Tax on “windfall profit” obtained by a person as a result of change that occurred in local or international economic situations that was not caused by the person’s own efforts will be applied as soon as the Ministry of Finance and Economic Development prescribes the following:

- Businesses subject to the “windfall profit” tax
- The amount of income to be considered “windfall profit”
- The effective date for application of the tax

Shortly after parliament approved an amendment of the income tax proclamation providing for the introduction of a tax on “wind-fall profit” during its 18 November 2010 session, the Ministry of Finance and Economic Development (MoFED) instructed commercial banks to pay 75% of the profit that the MoFED determined that the banks made because of the devaluation of the birr. The amendment to the proclamation stated that businesses in the finance sector and oil exploration and mining sector were likely to be subject to such tax.

**Capital gains.** Capital gains derived from transfers of buildings located in municipal areas that are used for a business, factory or office are subject to tax at a rate of 15%. Capital gains derived from transfers of shares of companies are subject to tax at a rate of 30%.

Subject to certain limitations, losses incurred on transfers of the properties described above may be used to offset gains. Unused capital losses may be carried forward indefinitely.

Subject to limitations, gains or losses are recognized on transfers of assets used in a business (other than buildings) and are subject to business income tax.

**Administration.** The Ethiopian Revenues and Customs Authority (ERCA) administers and collects certain taxes, including the business income tax and capital gains tax of companies. The Ministry of Mines and Energy collects mining taxes.

The tax year (year of assessment) is the Ethiopian budgetary year, which runs from 8 July to 7 July of the following calendar year. If a company’s accounting year differs from the Ethiopian budgetary year, its base period for the tax year is the accounting year ending within the tax year.

Advance income tax of 2% is withheld from payments for goods or services if the payments exceed certain thresholds. The tax is withheld from payments for goods if the amount payable in a single transaction or supply contract is more than ETB10,000. For payments for services, tax is withheld if the amount payable in a single transaction or contract is more than ETB500.

Companies must file annual tax returns, together with their annual accounts, within four months after the end of their accounting year. Companies must pay the tax shown in the tax return reduced by the amount of the advance payments withheld and any foreign tax credits. The tax office audits the company’s return and annual accounts to determine the final assessment.

Companies that fail to pay tax by the due date must pay interest at a rate that is 25% above the highest commercial lending interest rate that prevailed during the preceding quarter, together with administrative penalties.

**Dividends.** A 10% final income tax that is withheld at source is imposed on dividends paid by share companies and withdrawals of profits from private limited companies. The tax applies to both residents and nonresidents. If shareholders decide to reinvest their dividends to expand the activities of the company, the dividends are exempt from tax, with the exception of certain sectors.

Remittances by branches to their foreign headquarters are considered to be distributions of dividends and are accordingly subject to income tax at a rate of 10%.

Income withholding taxes are imposed on interest, royalties and certain other types of income. For a listing of these taxes, see Section A.

**Dividend tax on retained earnings.** Under a recently issued directive, business entities that are operating in Ethiopia are required to pay a dividend tax of 10% of their retained earnings. Companies must pay the dividend tax on annual basis within 12 months after the end of the tax year without regard to the distribution of the retained earnings to the shareholders. However, undistributed retained earnings may be exempted from the tax if the retained earnings are converted to capital within the 12 months after the end of the company's tax year.

**Withholding tax on imports.** Withholding tax is collected from business income taxpayers at a rate of 3% at the time of importation of goods for commercial use. The amount of this tax may be credited against the taxpayer's income tax liability for the year.

**Foreign tax relief.** Foreign tax paid may be used as a credit against tax payable with respect to the foreign-source income, limited to the amount of tax in Ethiopia that would otherwise be payable on such income.

### C. Determination of trading income

**General.** Taxable income is the amount of income subject to tax after the deduction of all expenses and other deductible items allowed under the tax law.

Expenses are deductible to the extent they are incurred for the purpose of earning, securing, and maintaining business income, if it can be proved that the expenses are genuine.

Subject to restrictions, reinvestments by resident companies of their profit to increase the capital of another company may be deducted for tax purposes.

**Foreign-exchange gains and losses.** All net gains or losses arising from transactions in foreign exchange are considered to be taxable income or deductible losses in the year in which they arise.

**Provisions.** Specifically identifiable provisions for bad debts are allowed if the company has taken all reasonably necessary steps to recover the debts. General provisions and provisions for stock obsolescence are not allowed.

Financial institutions may deduct special (technical) reserves in accordance with the National Bank of Ethiopia directives. However, the taxable income of banks is increased by amounts withdrawn from such reserves.

**Tax depreciation.** Buildings and other structures are depreciated using the straight-line method at an annual rate of 5%. A straight-line depreciation rate of 10% applies to intangible assets.

The following assets are depreciated using a pooling system.

<b>Assets</b>	<b>Rate (%)</b>
Computers, information systems, software products and data storage equipment	25
Fixed assets of companies engaged in mining activities	25
Other business assets	20

Under the pooling system, the depreciation rate is applied to the depreciation base, which is the book value of the category as recorded in the opening balance sheet of the tax year, increased by certain costs incurred during the tax year, and decreased by certain amounts received during the tax year. The tax base is increased by the following costs: the cost of assets acquired or created; the cost of improvements that are capitalized; and the costs of renewal and reconstruction of assets. The tax base is decreased by the sales price of assets disposed of and compensation received for the loss of assets.

A negative depreciation base is added to taxable income. If the depreciation base is ETB1,000 or less, the entire depreciation base is deductible.

No depreciation is allowed on the revaluation of business assets.

Maintenance and improvement expenses exceeding 20% of the depreciation base of a category of business assets increase the depreciation base of that category.

Fine arts, antiques, jewelry, trading stock and other business assets not subject to wear and tear and obsolescence may not be depreciated.

**Relief for losses.** Companies may carry forward net operating losses for three years. However, if a company incurs losses in any of the three years following the year of the loss, the loss carry-forward period may be extended a year for each loss year in the three-year period, up to a maximum loss carryforward period of six years. Earlier losses must be set off first. Losses may not be carried back.

Companies in the mining sector may carry forward losses 10 years.

If, during a tax period, the direct or indirect ownership of the share capital or the voting rights of a body change more than 25%, by value or by number, the right to a loss carryforward no longer applies to losses incurred by that body in that tax period and previous tax periods.

**Group of companies.** The Ethiopian tax law does not allow the filing of consolidated returns.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Value-added tax (VAT); levied on all supplies of goods and services made in Ethiopia and on imports, except for exempt items	
Standard rate	15%
Certain items, including exports	0%

<b>Nature of tax</b>	<b>Rate</b>
Equalization turnover tax; imposed on persons not registered for VAT	
Goods sold locally	2%
Services rendered locally by contractors and grain mills, and on rentals of tractors and combine-harvesters	2%
Other services	10%
Excise tax; levied on specified goods manufactured in Ethiopia and on imports; for locally produced goods, tax is imposed when production is completed and is based on production cost; for imports, tax is imposed on Cost, Insurance and Freight (CIF) value; rates vary among products; low rate applies to textile and garment products, and high rate applies to various items, including vehicles with engines exceeding 1,800 cc	
Rates	10% to 100%
Surtax on all imported items mentioned above	Additional 20% of CIF value
Revenue stamp duties; levied on transfers of certain property, including vehicles	2%

### **E. Tax treaties**

Ethiopia has entered into double tax treaties with various countries, including the Czech Republic, France, Israel, Italy, Kuwait, Romania, the Russian Federation, South Africa, Tunisia and Turkey. Ethiopia has signed double tax treaties that have not yet been ratified with Algeria, Iran and Oman. Ethiopia also recently entered into double tax treaties with India and the United Kingdom.

## A. At a glance

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	10
Branch Tax Rate (%)	20
Withholding Tax (%)	
Dividends	15 (a)
Interest	10
Royalties from Patents, Know-how, etc.	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	4 (b)

- (a) The dividend withholding tax applies only to dividends that are paid out of profits that are not subject to tax.  
(b) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to income tax on worldwide assessable income. Nonresident companies carrying on business through a branch pay tax only on Fiji-source income. A resident company is a company incorporated in Fiji. A company not incorporated in Fiji is considered a resident company if it carries on business in Fiji and has either its central management and control in Fiji or its voting power controlled by shareholders who are residents of Fiji.

**Tax rates.** In general, resident companies and branches of non-resident companies are subject to tax at a rate of 20%. Effective from 1 January 2014, companies that are listed on the South Pacific Stock Exchange and have a resident shareholding of at least 40% are subject to tax at a rate of 10%. Foreign companies that establish their headquarters in Fiji or relocate their headquarters to Fiji are subject to tax at a rate of 17%.

Tax holidays are available to various enterprises and for various activities, including qualifying hotel projects, companies granted

a tax-free regions license, qualifying information communications technology operators, approved activities in commercial agricultural farming and agro-processing, approved activities with respect to processing agricultural commodities into biofuels and approved activities in renewable energy projects and power cogeneration.

**Capital gains.** The rate of the capital gains tax is 10%.

**Administration.** The Fiji tax year is the calendar year. However, for most companies, an alternative fiscal year is normally allowed. Tax for any fiscal year is payable in three installments according to the following schedule:

- 33.3% of the preceding year's tax liability by the end of the sixth month
- Another 33.3% of the preceding year's liability by the end of the ninth month
- Another 33.4% of the preceding year's liability on or before the balance date

Companies are required to file tax returns within three months after the fiscal year-end, but extensions of an additional two, four or six months are granted to tax agents, depending on the level of taxable income.

**Dividends.** Dividends received by a resident company from another resident company are not taxable.

**Foreign tax relief.** Income derived by Fiji residents from treaty countries is subject to Fiji income tax, but credit is given for taxes paid, up to the amount of Fiji tax applicable on the same income.

Income derived from non-treaty countries is exempt to the extent that it was subject to income tax in such countries.

### C. Determination of trading income

**General.** Income is defined as the aggregate of all sources of income, including annual net profit from a trade, commercial, financial or other business.

Expenses are deductible to the extent incurred in producing taxable income. Expenditures of a personal or capital nature are generally not deductible. Deductions are allowable for certain expenditures incurred in the agricultural and mining industries. Experimentation and research and development expenses incurred in projects connected with the taxpayer's business are deductible.

**Inventories.** Fiji does not have any specific measures for stock valuation for the purposes of year-end income determination. Valuations are generally made at cost or market value on a first-in, first-out (FIFO) or actual basis. The tax authorities have discretion to make adjustments if inventories are sold or otherwise disposed of at below market value.

**Provisions.** Provisions are not deductible until payments are made or, in the case of doubtful trading debts, until the debts are considered totally irrecoverable and have been written off.

**Tax depreciation.** Depreciation of fixed assets acquired before 31 December 1997 that are used in the production of taxable income is calculated using the straight-line method. The following are some of the annual rates of depreciation prescribed by law.

<b>Asset</b>	<b>Rate (%)</b>
Commercial and industrial buildings	1.25 to 5
Office equipment	7
Heavy commercial motor vehicles	15
Passenger motor vehicles	10
Plant and machinery	7

An initial allowance of 30% is granted for plant, furniture, equipment and heavy commercial motor vehicles, and a 10% initial allowance is granted for buildings in the year the expenditure is incurred. The 30% initial allowance (but not the 10% initial allowance) reduces the base for computing normal depreciation in future years.

The annual allowance is granted beginning in the year the fixed asset is first used to generate income, but it is reduced by 50% for such year if the asset is first used in the second half of that year. The initial allowance, however, is available in the year the expenditure is incurred, regardless of whether the asset is used to generate income.

For assets, other than buildings, acquired on or after 1 January 1998, the initial allowance is eliminated, and the annual allowance is calculated by reference to an asset's effective life as determined by the authorities. The following are some of the minimum and maximum allowable annual depreciation rates and the corresponding effective lives to which they relate.

<b>Effective life Years</b>	<b>Minimum depreciation rate (%)</b>	<b>Maximum depreciation rate (%)</b>	<b>Assets in category</b>
Less than 2	100	100	Computer software
2 to less than 3	50	60	Dies
3 to less than 5	33½	40	Computers
5 to less than 6½	20	24	Gaming machines
6½ to less than 10	15	18	Office machines
10 to less than 20	10	12	Furniture and fittings
20 to less than 40	5	6	Storage tanks
40 and above	2½	3	Artworks

A company may adopt a depreciation rate lower than the maximum rate, but the rate may not be changed for the duration of the asset's life.

For buildings erected on or after 1 January 1998 and before 1 January 2001, the depreciation rates are the same as those mentioned in the first table in this section. The depreciation rates for buildings erected on or after 1 January 2001 range from 2.5% to 15%. However, the initial allowance of 10% is not available for such buildings.

Tax depreciation is subject to recapture on the sale of an asset, to the extent the sales proceeds exceed the tax value after depreciation. The amount recaptured may be set off against the cost of a replacement asset; otherwise, it is taxed as ordinary income in the year of sale. In addition, a capital gain on the sale of a capital asset is subject to capital gains tax.

**Relief for losses.** Losses may be carried forward for four years. Losses incurred as a result of claiming the standard allowance are

available for carryforward for a period of eight years. The standard allowance is one of the hotel incentives. It allows a hotel owner a 55% deduction with respect to capital expenditure on construction, renovation or refurbishment of a hotel. Losses are not available for carryforward if the taxpayer's business in the year in which relief is claimed is substantially different from its business in the year in which the loss was incurred.

**Groups of companies.** No group relief measures exist.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on virtually all goods and services; financial services (except insurance services) and gambling are exempt	15
Service turnover tax	5
Fringe benefit tax	20
Social security contributions to the national provident fund, paid by	
Employer	8
Employee (maximum rate)	8

#### E. Miscellaneous matters

**Foreign-exchange controls.** Most remittances abroad require approval from the Reserve Bank of Fiji. Depending on the level of the country's foreign-exchange reserve, further restrictions may be imposed on the nature, timing and amount of remittances that can be made.

**Debt-to-equity ratios.** An entity may have offshore borrowings up to FJD5 million per year without the prior approval of the Reserve Bank of Fiji. Foreign-owned companies may borrow locally any amount if a total debt-to-equity ratio of 3:1 is maintained. The total debt consists of local and offshore borrowings. Equity includes paid-up capital, shareholders' non-interest-bearing loans, retained earnings and subordinated interest-bearing loans.

**Anti-avoidance legislation.** Contracts, agreements or arrangements entered into that have the effect of altering the incidence of any tax may be rendered void by the tax authorities. However, the act does not allow for restructuring.

#### F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Australia	20	10	15
India	5	10	10
Japan	15	10	15
Korea (South)	10/15 *	10	10
Malaysia	15	15	15
New Zealand	15	10	15
Papua New Guinea	17	10	15
United Arab Emirates	0	0	10
United Kingdom	15	10	15
Non-treaty countries	15	10	15

\* The 10% rate applies if the recipient of the dividends is a company holding at least 25% of the capital of the payer. The 15% rate applies to other dividends.

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20 (a)
Branch Tax Rate (%)	20
Withholding Tax (%) (b)	
Dividends	0/15/20 (c)
Interest	20 (d)
Royalties	20 (e)
Branch Remittance Tax	0

## Net Operating Losses (Years)

Carryback	0
Carryforward	10 (f)

- (a) See Section B.
- (b) The withholding taxes apply only to payments to nonresidents. The rates may be reduced by tax treaties.
- (c) No withholding tax is imposed on dividends paid to a parent company resident in another European Union (EU) country if the recipient of the dividends satisfies the following conditions:
- It holds directly at least 10% of the capital of the payer.
  - The recipient of the dividend is a company in a form mentioned in the EU Parent-Subsidiary Directive.
- Companies resident in EU or European Economic Area (EEA) states are generally eligible for the tax exemption for dividends under the same conditions as comparable Finnish companies if the Finnish withholding taxes cannot be credited in the company's state of residence. Dividends paid to a company resident in an EU/EEA member state are subject to withholding tax at a rate of 15% if the shares constitute investment assets of the recipient company and the recipient owns less than 10% of the Finnish company.
- (d) In general, interest paid to resident individuals is subject to a final withholding tax of 30% if it is paid on bonds, debentures and bank deposits. Interest paid to nonresidents is generally exempt from tax.
- (e) No withholding tax is imposed on royalties paid to nonresidents if all of the following conditions are satisfied:
- The beneficial owner of the royalties is a company resident in another EU country or a permanent establishment located in another EU country of a company resident in an EU country.
  - The recipient is subject to income tax in its home country.
  - The company paying the royalties, or the company whose permanent establishment is deemed to be the payer, is an associated company of the company receiving the royalties, or of the company whose permanent establishment is deemed to be the recipient.
- A company is an associated company of another company if any of the following apply:
- The first company has a direct minimum holding of 25% in the capital of the second company.
  - The second company has a direct minimum holding of 25% in the capital of the first company.
  - A third company has a direct minimum holding of 25% in both the capital of the first company and the capital of the second company.
- Royalties paid to resident individuals are normally subject to salary withholding.
- (f) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in Finland are taxed on their worldwide income. Nonresident companies are taxed only on their Finnish-source income. Resident companies are generally those incorporated in Finland.

**Rate of corporate income tax.** The corporate income tax rate is 20%.

**Capital gains.** Gains derived by companies from the disposal of business assets are treated as ordinary business income. Gains derived from the disposal of machinery and equipment are deducted from the remaining book value of similar assets, reducing the depreciable basis of the remaining assets. Gains derived from the disposal of buildings are calculated separately for each building by deducting the remaining acquisition cost from the sales price.

Gains derived by corporate entities, other than companies engaged in private equity investment activities, from the sale of shares are exempt from tax if all of the following conditions are satisfied:

- The shares are part of the seller's fixed assets.
- The seller has owned at least 10% of the shares in the company, including the shares sold, for an uninterrupted period of at least one year.
- The shares sold are shares in either a Finnish company, a company as defined in Article 2 of the EU Parent-Subsidiary Directive or a company resident in a country with which Finland has entered into a tax treaty that applies to dividends distributed by the company whose shares are sold.
- The shares are not shares in a real estate company.

Even if the above conditions are satisfied, a sale of shares under certain circumstances may result in the generation of taxable income. If the acquisition cost of the shares has at any time been depreciated on the grounds that the fair market value of the shares has declined or if a reserve has been deducted, this part of the consideration received (that is, the deducted depreciation or reserve) is taxable income. The same principle applies if the shares have at any time been the subject of a transaction between related companies and if this transaction resulted in a tax-deductible loss. Under these circumstances, the consideration received for the shares is taxable up to the amount of the earlier tax-deductible loss.

A loss incurred on the sale of shares is not tax-deductible if a gain on the sale of such shares would have been exempt from tax. If the above-mentioned requirements of tax exemption are not fulfilled, a loss from sale of shares that are part of seller's fixed assets is deductible from profit resulting from sale of such shares during the five years following the loss-making year.

The participation exemption rules concerning capital gains, which are described above, do not apply to shares owned by capital investors. For capital investors, capital gains derived from the sale of shares are taxable income and capital losses incurred on shares are tax-deductible.

**Administration.** Companies must file the corporate income tax return within four months after the end of their accounting period.

Corporate income tax is prepaid in 12 monthly installments during the accounting period. After the tax return is filed and processed by the tax authorities, a final settlement or refund is made. The taxation is finalized within 10 months after the end of the accounting period. If the final assessment exceeds the total of the prepaid installments, interest at a rate of 2.5% (for 2015) is added to the final assessment. If the prepaid taxes exceed the final assessment, a refund with interest at a rate of 0.5% (for 2015) is paid. Supplementary tax prepayments may also be made before the final assessment.

The tax authorities have the right to carry out tax audits within five years from the end of the assessment year. Consequently, a company's 2014 fiscal year is open for adjustment until end of December 2020.

All major corporations can expect a tax audit, usually every fifth year to seventh year.

As a result of an audit, a penalty of up to 30% of the adjusted amount of taxable income may be imposed on a corporation. A penalty charge can be added even though the adjustment does not result in additional income taxes (a change in the taxable income amount is sufficient). Also, interest is charged on the additional tax (but not on the penalties) at a specified rate (7.5% for 2014 and 2015). Neither the penalty nor the interest is deductible when calculating taxable income.

**Dividends.** Finland applied an imputation system for the taxation of dividends, which was abolished in 2004.

Under the current rules, a dividend distribution by a Finnish company cannot result in liability for the distributing company to pay additional income taxes on the basis of the distribution alone. This applies to dividends distributed to both Finnish residents and nonresidents.

A dividend received by a Finnish corporate entity from a company resident in Finland or from a “company,” as defined in Article 2 of the EU Parent-Subsidiary Directive, is usually exempt from tax. The exemption also applies to dividends received from any other company resident in another EU/EEA country if the company paying the dividends is liable to pay income tax of at least 10%. If a Finnish corporate entity receives a dividend from a company resident in a non-EU/EEA country, the dividend is usually fully (100%) taxable.

By exception, a dividend received by an unlisted Finnish corporate entity from a listed company resident in Finland or in an EU/EEA country is fully (100%) taxable if the unlisted company owns less than 10% of the shares in the distributing company. If a dividend is received by an unlisted Finnish corporate entity from a listed company that is resident in Finland or an EU/EEA country and if the recipient owns at least 10% of the shares in the distributing company, the dividend is exempt from tax.

**Distribution of funds from invested unrestricted equity capital.** The return of invested unrestricted equity to shareholders in listed companies is taxed as dividend income, effective from 1 January 2014. The return of the invested unrestricted equity from an unlisted company continues to be treated as a repayment of capital if the recipient can show that the recipient has made an investment to the company and that the invested capital is returned within 10 years from the time the investment was made. The new provisions apply to unlisted companies, effective from 1 January 2016, if the investment was made before 1 January 2014.

**Foreign tax relief.** If no tax treaty is in force, domestic law provides relief for foreign tax paid. The credit is granted if the recipient Finnish corporation pays corporate income tax in the same year. If the Finnish company does not have any corporate income tax liability that year, no credit is granted. Effective from 1 January 2010, foreign tax credits may be carried forward five years under certain conditions. Foreign tax credits may not be carried back.

Under tax treaties, foreign tax is most frequently relieved by exemption or a tax credit. With developing countries, tax sparing may also be granted.

## C. Determination of trading income

**General.** Taxable income is very closely tied to the income in the statutory accounts. Most of the deductions must be booked in the statutory accounts to be valid for tax purposes. As stated in the tax law, the definitions of both income and expenses are general and broad and include all expenses that are incurred to maintain or create new income.

In general, expenses are deductible if they are incurred for the purpose of acquiring or maintaining taxable income. For the 2014 financial year, entertainment expenses are fully nondeductible for corporate income tax purposes. However, effective from 1 January 2015, 50% of entertainment expenses is deductible for tax purposes. Expenses incurred to obtain tax-free income, as well as income taxes and penalties, are not deductible.

**Inventories.** Inventories are valued at the lowest of cost, replacement cost or market value on a first-in, first-out (FIFO) basis. Companies may allocate fixed manufacturing overhead to the cost of inventory for accounting and tax purposes if certain conditions are met. Obsolete inventories should be provided for or discarded.

**Provisions.** In general, the possibility of establishing provisions or reserves for tax purposes is relatively limited. Deductions of warranty reserves and provisions for doubtful debts are limited to the amount of actual expected costs. These provisions are available for certain types of taxpayers under certain conditions.

A corporation may create a replacement reserve if it derives a capital gain on the disposal of its business premises or if it receives insurance compensation for a fixed asset because of a fire or other accident. The replacement reserve must be used to buy new depreciable assets during the next two years. This time limit can be extended on application.

If created from the profit on the sale of a previous office, a replacement reserve can only be used to buy a building or shares that entitle the holder to the use of office space and to the maintenance of that space.

Inventory and operating reserves are no longer allowed.

**Tax depreciation.** The Business Tax Act provides detailed rules for the depreciation of different types of assets. The depreciable base is the acquisition cost, which includes related levies, taxes and installation costs. The depreciation expense for tax purposes is not permitted to exceed the cumulative depreciation expense reported in the annual financial statements in the current year or in previous years. Plant machinery, equipment and buildings are generally depreciated by using the declining-balance method.

Machinery and equipment are combined into a pool for depreciation purposes. Companies may vary the annual depreciation in this pool from 0% to 25%. All machinery and equipment with a life of more than three years are classified as depreciable assets. The depreciable basis is decreased by proceeds from sales of assets in the pool. If the sales price exceeds the depreciable basis, the excess is added to taxable income. If it can be proven that the remaining balance of all machinery and equipment is higher than

the fair market value as a result of injury, damage or a similar circumstance, additional depreciation may be claimed for the balance of the machinery.

Equipment with a short life (up to three years), such as tools, is usually expensed. Equipment with an acquisition price of less than EUR850 may also be expensed, with a maximum deduction of EUR2,500 per year.

The maximum depreciation rates for buildings vary from 4% to 20%. The depreciation percentage depends on the use of the building. The depreciation rate for factories, warehouses, shops and similar buildings is 7%.

Intangible assets, such as patents and goodwill, are depreciated using the straight-line method over 10 years, unless the taxpayer demonstrates that the asset's useful life is less than 10 years.

The Finnish government has decided to temporarily double the depreciation rights relating to certain investments used in productive activities for the 2013 through 2016 tax years. This measure allows accelerated depreciation for buildings, machines and devices that are brought into use during the period of 2013 through 2016.

**Research and development.** The Finnish government has decided to adopt a temporary research and development (R&D) incentive for the 2013 and 2014 tax years. This incentive, which is designed to support product development aiming at growth, allows an additional deduction for corporate income tax purposes. The additional tax deduction is determined based on the amount of the salary costs for the R&D personnel. The amount of the deduction is double the qualifying salary costs. The maximum annual amount of the additional deduction is EUR400,000 and the minimum amount is EUR15,000 per company. Several additional conditions apply. The additional deduction must be claimed before the taxation is finalized (the taxation is finalized within 10 months after the end of the accounting period; that is, for the tax year ending 31 December 2014, it is finalized by 31 October 2015).

**Relief for losses.** Losses may be carried forward for 10 years. However, a direct or indirect change in the ownership of the company involving more than 50% of the shares results in the forfeiture of the right to set off losses against profits in future years. An indirect change occurs if more than 50% of the shares in the parent company owning at least 20% of the shares of the loss-making company are transferred and accordingly all of the shares owned by the parent company in the loss-making company are deemed to have changed ownership. An application may be made to the tax office for a special permit for reinstating the right to use the tax losses. The tax office has extensive discretion as to whether to grant the permit.

Losses may not be carried back.

**Groups of companies.** Corporations are taxed individually in Finland. No consolidated tax returns are applicable. A kind of group taxation is, however, introduced by allowing group contributions for limited liability companies. Group contributions are tax-

deductible for the payer and included in the income of the recipient. By transfers of these contributions, income can be effectively allocated among group companies in Finland. To qualify, both companies must be resident in Finland, and at least 90% ownership, direct or indirect, must exist from the beginning of the tax year. Both companies must carry out business activities and be taxed under the Business Tax Act. Also, they must have the same accounting period. The taxpayer cannot create a tax loss by making group contributions.

If the local tax authorities allow tax losses to be deducted regardless of a change in ownership, these losses may generally not be covered by group contributions. However, on application, the local tax authorities may allow such tax losses to be covered by group contributions only in special circumstances.

If a corporate entity or a group of corporate entities owns at least 10% of the share capital of another company, the losses of any receivables from the other company (other than sales receivables) are not tax-deductible. With the exception of the group contributions described above, the same rule applies to all other financial assistance granted to the other company without compensation that is intended to improve the other company's financial situation.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on the sale, rental, importation or repair of goods, and on services unless specifically exempt; exempt services include financial services and insurance services	24
Transfer tax on the purchase of real estate located in Finland; calculated as a percentage of the purchase price	4
Transfer tax on the purchase of shares relating to real estate; calculated as a percentage of the purchase price or other consideration	2
Transfer tax on the purchase of shares in Finnish companies; calculated as percentage of the purchase price or other consideration	1.6
Social security taxes, paid by the employer as a percentage of salaries	
Health insurance premium (2015 rate)	2.08
Employment pension premium; average rate (2015)	18
Group life, accident and unemployment insurance premium, on total salaries paid by the employer (average rates for 2015)	
Up to EUR2,025,000	0.80
Amount in excess of EUR2,025,000	3.15

#### E. Miscellaneous matters

**Foreign-exchange controls.** No restrictions are imposed on the repatriation of earnings, interest and royalties abroad. The commercial bank involved in the transfer must notify only the Bank of Finland for statistical purposes.

**Transfer pricing.** Related-party transactions are accepted if they are carried out at arm's length. Corporate income can be adjusted if the transactions are not as they would have been between independent parties.

Under Finnish transfer-pricing rules, group companies must prepare transfer-pricing documentation if specific circumstances exist. The aim of the documentation is to prove the arm's-length nature of the prices used in cross-border intercompany transactions. On request of the tax authorities, the transfer-pricing documentation for a specified fiscal year must be submitted within 60 days, but not earlier than 6 months after the end of the financial year. Additional clarifications concerning the documentation must be submitted within 90 days of a request by the tax authorities.

A tax penalty of up to EUR25,000 can be imposed for a failure to comply with the transfer-pricing documentation requirements, even if the pricing of the transactions was at arm's length. The adjustment of taxable income may also result in a separate tax penalty of up to 30% of the adjusted amount of income as well as penalty interest.

**Debt-to-equity rules.** Direct investments are generally made with a combination of equity and foreign or domestic loans. Finland does not have any specific thin-capitalization legislation. The law does not provide a specific debt-to-equity ratio, and a very limited amount of case law exists. Interest determined on an arm's-length basis is normally fully deductible. If interest is paid to non-tax treaty countries or if a tax treaty does not contain a specific non-discrimination clause concerning interest, the deductibility of the interest might be challenged on grounds related to thin capitalization. To ensure deductibility, an advance ruling procedure is available.

Restrictions on the tax deductibility of interest expenses entered into force on January 2013, but they apply for the first time with respect to taxation for the 2014 tax year. They do not apply to financial, insurance and pension institutions or to mutual real estate and housing companies. In addition, the restrictions do not apply if the taxpayer establishes that the ratio of its book equity to total assets in the financial statements is equal to or higher than the corresponding ratio in the consolidated financial statements of its ultimate parent company.

Under the new provisions, interest expenses are fully deductible against interest income. Any interest expenses exceeding interest income (that is, net interest expenses) may be fully deducted if the total amount of net interest expenses does not exceed EUR500,000 during the fiscal year.

If the EUR500,000 threshold is exceeded, net interest expenses may be deducted only to the extent that they do not exceed 25% of the taxable business profit (calculated under Section 3 of the Finnish Business Income Tax Act) after adding back the following:

- Interest expenses
- Tax depreciation
- Group contributions received (group contributions paid are subtracted)

The maximum amount of nondeductible net interest expenses corresponds to the amount of net interest expenses incurred between related parties.

The nondeductible amount of interest expenses may be deducted during subsequent years within the respective limitations for each tax year.

**Controlled foreign companies.** Under Finland's controlled foreign company (CFC) legislation, Finnish shareholders are subject to tax on their respective shares of the CFC's income if they and certain related parties own at least 25% of the CFC's share capital or are entitled to at least 25% of the return on capital of the company.

A company is considered to be "controlled" if one or more Finnish tax residents directly or indirectly own at least 50% of the share capital or voting power of the company or if one or more Finnish tax residents is entitled to at least 50% of the return on capital of the company.

A foreign permanent establishment (PE) of a foreign corporation is categorized as a CFC under the same conditions as subsidiaries if the foreign PE is located in a different state than the foreign corporation and if the income of the foreign PE is not taxed in the residence state of the foreign corporation. A transitional period applied until 1 January 2015 to PEs that already existed before 31 December 2007.

To determine whether a company is a CFC, the steps described below must be followed.

It first must be determined whether the company is controlled by Finnish residents. If not, the CFC rules do not apply. Under the act, a company is controlled by Finnish residents if residents of Finland for tax purposes own more than 50% of the share capital or the voting shares of the company, or if certain other circumstances exist.

If the company is controlled by Finnish residents, the income of the company must be analyzed. The CFC rules do not apply to income derived from the following:

- Industrial production or similar production activity
- Shipping
- Sales or marketing activity regarding the first two categories of activities
- Group companies carrying on any of the activities mentioned above that are resident in the same country as the CFC

If the company is not excluded from the CFC rules based on the nature of its income, it must be determined if the company is resident for tax purposes in a tax treaty country.

For a company not resident for tax purposes in a tax treaty country, it must be determined if the effective tax rate (the effective tax rate is computed by determining the tax on taxable income calculated according to Finnish tax rules) of the company is at least 3/5 of the Finnish corporate tax rate (effective from 1 January 2014, 20%), or 12%. If it is determined that the effective tax rate is below 12%, the CFC rules apply to the company.

For a company resident in a tax treaty country for tax purposes, if the effective tax rate is below 12%, the theoretical tax rate in the treaty country (corporate income tax rate according to the tax law of the country) must be determined. If the theoretical tax rate is at least 75% of the corporate tax rate in Finland (20%), or 15%, it must be determined whether the company has taken advantage of any special tax reliefs.

Special tax reliefs are reliefs that are not available to all companies in the company's country of residence. These reliefs include reliefs for foreign companies and reliefs for all companies based on location. If the company in a tax treaty country has not taken advantage of special tax reliefs and if the overall tax rate in its home country is at least 15%, the CFC rules do not apply. Such company is not subject to the CFC rules even if the effective tax rate for the company is less than 12%.

If the company has taken advantage of special tax reliefs, it must be determined whether the effective tax rate for the company is at least 12%. If yes, the CFC rules do not apply. However, the CFC rules do not apply to a company that has taken advantage of special tax reliefs if it is established in the following states:

- An EU or EEA member state, provided that the company is genuinely established in its state of residence and is carrying on genuine economic activities in this state (substance requirement).
- A tax treaty state with sufficient information exchange, excluding countries mentioned in the black list, provided that the company satisfies the substance requirement mentioned above. The black list is a tentative list of tax treaty countries that are considered to have substantially lower corporate income tax rates than Finland. The list includes Barbados, Bosnia and Herzegovina, Georgia, Kazakhstan, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, Tajikistan, the United Arab Emirates, Uruguay and Uzbekistan.

**Anti-avoidance legislation.** Under a general anti-avoidance provision in the law, the tax authorities may look through certain transactions.

## F. Treaty withholding tax rates

The rates in the table below reflect the current double tax treaty rates. As a result of domestic legislation, lower rates may apply. Certain other exceptions may also apply. Please consult your local tax specialist for more information.

- (a) The lower rate applies if the recipient is a corporation owning at least 20% of the payer.
- (b) The lower rate applies if the recipient is a corporation owning at least 25% of the payer.
- (c) The rate is 0% for royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting.
- (d) The lower rate applies if the recipient is a corporation owning at least 15% of the payer.
- (e) Copyright royalties for the production or reproduction of any literary, dramatic, musical or artistic work (other than motion picture films) are exempt from tax.
- (f) The lower rate applies if the recipient is a company owning at least 10% of the voting power of the payer.
- (g) The rate is 10% for royalties for copyrights of literary, artistic or scientific works, including films and tapes; otherwise, the rate is 15%.
- (h) The 5% rate applies if the recipient is a corporation owning at least 25% and more than EUR200,000 of the capital of the payer.
- (i) Interest on certain loans is exempt from withholding.
- (j) The rate is 0% for royalties received for the use of or the right to use any copyright of literary, artistic or scientific work, excluding cinematographic films or films and tapes for television or radio broadcasting.
- (k) The 10% rate applies if the recipient has owned at least 25% of the voting rights of the payer for at least six months before the end of the payer's fiscal year. The 15% rate applies to other dividends.
- (l) The lower rate applies to royalties paid for the use of computer software and for equipment leasing.
- (m) The rate is 15% for royalties paid by an enterprise registered with and engaged in preferred areas of activities, for royalties for cinematographic films or tapes for television or broadcasting, and for royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work.
- (n) The 0% rate applies if the recipient is a corporation owning at least 5% of the payer.
- (o) The 20% rate applies if the recipient of the dividends is a corporation that owns at least 25% of the payer. The 15% rate applies to dividends paid by industrial enterprises to recipients described in the preceding sentence. Otherwise the domestic rates of 20% or 30% apply.
- (p) The lower rate applies if the recipient is a financial institution.
- (q) A lower tax rate applies in certain cases. Please consult the tax treaty.
- (r) The 0% rate applies if the receiving company owns at least 80% of the voting power of the paying company for at least 12 months and qualifies under certain provisions of the limitation-on-benefits article of the treaty.
- (s) The 5% rate applies if, at the time the dividend is payable, the recipient of the dividends owns at least 30% of the share capital of the payer and has invested in the payer foreign capital in excess of USD100,000. The 12% rate applies to other dividends.
- (t) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works. The 5% rate applies to royalties paid for the use of cinematographic films and tapes and films for television or radio broadcasting. The

15% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

- (u) The 0% rate applies if the recipient of the dividends owns at least 10% of the voting rights of the payer. The 15% rate applies to other dividends.
- (v) Finland is honoring the Yugoslavia treaty with respect to Bosnia and Herzegovina, Croatia, Kosovo, Montenegro and Serbia.
- (w) Under Finnish domestic law, interest paid to nonresidents is generally exempt from tax.
- (x) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (y) The 0% rate applies if, at the time the dividend is payable, the recipient of the dividends owns at least 50% of the share capital of the payer and has invested in the payer foreign capital of EUR2 million or more. The 5% rate applies if the recipient of the dividends owns at least 10% of the share capital of the payer and has invested in the payer foreign capital in excess of EUR100,000. The 10% rate applies to other dividends.
- (z) The rate is 10% for royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting. For other royalties, the rate is 5%.
- (aa) No withholding tax is imposed on dividends paid to a parent company resident in another EU country if the recipient of the dividends satisfies the following conditions:
  - It holds directly at least 10% of the capital of the payer.
  - The recipient of the dividend is a company in a form mentioned in the EU Parent-Subsidiary Directive.

Companies resident in EU or EEA states are generally eligible for the tax exemption for dividends under the same conditions as comparable Finnish companies if the Finnish withholding taxes cannot be credited in the company's state of residence.
- (bb) The 5% rate applies if the recipient is a corporation owning at least 70% of the share capital of the payer. The 10% rate applies if the recipient is a corporation owning at least 25%, but less than 70%, of the share capital of the payer. The 15% rate applies to other dividends.
- (cc) No withholding tax is imposed on royalties paid to nonresidents if all of the following conditions are satisfied:
  - The beneficial owner of the royalties is a company resident in another EU country or a permanent establishment located in another EU country of a company resident in an EU country.
  - The recipient is subject to income tax in its home country.
  - The company paying the royalties, or the company whose permanent establishment is deemed to be the payer, is an associated company of the company receiving the royalties, or of the company whose permanent establishment is deemed to be the recipient.

A company is an associated company of another company if any of the following apply:

  - The first company has a direct minimum holding of 25% in the capital of the second company.
  - The second company has a direct minimum holding of 25% in the capital of the first company.
  - A third company has a direct minimum holding of 25% in both the capital of the first company and the capital of the second company.
- (dd) The 0% rate applies to royalties for software programs, patents, models or drawings. The 5% rate applies to other industrial royalties. The 10% rate applies to royalties for literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting.
- (ee) The lower rate applies if the recipient is a corporation owning at least 10% of the payer.
- (ff) A lower rate applies in certain circumstances. Please consult the tax treaty.
- (gg) The 3% rate applies to royalties paid to a news agency. The 5% rate applies to artistic royalties. The 10% rate applies to industrial royalties. The 15% rate applies to other royalties.
- (hh) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting. The 1% rate applies to amounts paid under financial leases of equipment. The 5% rate applies to amounts paid under operating leases of equipment and computer software. The 10% rate applies to other royalties.

- (ii) The 12% rate applies if the recipient of the dividends is a corporation owning at least 25% of the payer. The 15% rate applies if the recipient of the dividends is a corporation owning less than 25% of the payer. The 20% rate applies to other dividends.
- (jj) The 0% rate applies in certain circumstances. Please consult the tax treaty.
- (kk) The 0% rate applies to royalties paid for the use of, or right to use, computer software, patents, designs, models or plans. The 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties for the use of, or right to use, trademarks and copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.
- (ll) The 5% rate applies if the recipient is a corporation owning at least 10% of the payer's voting rights. The 0% rate applies if the Australian company has held at least 80% of the Finnish company's voting power for at least 12 months and meets certain other conditions.
- (mm) The lower rate applies to, among other interest payments, interest paid by public bodies.
- (nn) The lower rate applies to, among other interest payments, interest on current accounts and on advance payments between banks.
- (oo) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment, or software. The 10% rate applies to royalties paid for the following:
- The use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting
  - The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
  - Information concerning industrial, commercial or scientific experience
- (pp) Copyright royalties are exempt from withholding tax. The 1% rate applies to royalties paid for finance leases of equipment. The 5% rate applies to royalties paid for operating leases of equipment, or for the use of, or the right to use, cinematographic films, films and tapes for television or radio broadcasting, or computer software. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs, plans, formulas or processes, or for information concerning industrial, commercial or scientific experience.
- (qq) A tax treaty is in force between Finland and Brazil. However, the tax-sparing articles of the treaty applied only for the first 10 years since the signing of the treaty. This period ended on 25 December 2007.
- (rr) The lower rate applies if the Italian company holds directly more than 50% of the capital in the Finnish company.
- (ss) The beneficial owner of royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment may elect to be taxed, in the contracting state in which such royalties arise, as if the equipment were effectively connected with a permanent establishment in that state. In such case the provisions of Article 7 (Business income) of the treaty apply to the income and deductions attributable to such equipment.
- (tt) The 0% rate applies if the interest is paid to the state or a local authority thereof, to the national bank, or to an institution of which the capital is wholly owned by the government.
- (uu) The lower rate applies to loans granted by banks.
- (vv) The 0% rate applies if the interest is paid to the state or national bank. The 5% rate applies to interest on loans to certain public entities promoting export. The 10% rate applies to loans granted by banks.
- (ww) The 15% rate applies if the recipient is a company owning at least 10% of the voting power of the payer. Otherwise the domestic rates of 20% or 30% apply.
- (xx) The 5% rate applies to interest paid with respect to sales on credit. The 0% rate applies in certain circumstances. Please consult the tax treaty.

**A. At a glance**

Corporate Income Tax Rate (%)	33½ (a)
Capital Gains Tax Rate (%)	0/15/33½ (a)(b)
Branch Tax Rate (%)	
Branches of European Union/ European Economic Area Companies	0
Branches of Other Companies	33½
Withholding Tax (%)	
Dividends	30/55 (c)(d)(e)
Interest	0/50 (c)(f)(g)
Royalties from Patents, Know-how, etc.	33½/50 (c)(f)(g)
Branch Remittance Tax	30 (h)
Net Operating Losses (Years)	
Carryback	1 (i)
Carryforward	Unlimited (j)

- (a) For resident companies, surtaxes are imposed on the corporate income tax and capital gains tax. For details, see Section B.
- (b) For details concerning these rates, see Section B.
- (c) These are the withholding tax rates under French domestic law. Tax treaties may reduce or eliminate the withholding taxes.
- (d) Under the European Union (EU) Parent-Subsidiary Directive, dividends distributed by a French subsidiary to an EU parent company are exempt from withholding tax, if, among other conditions, the recipient holds or commits to hold at least 10% of the subsidiary's shares for at least two years.
- (e) The withholding tax rate is 55% for distributed profits paid into uncooperative states.
- (f) No withholding tax is imposed on interest and royalties paid between associated companies of different EU member states if certain conditions are met. For details, see Section B.
- (g) The withholding tax rate is 50% for interest on qualifying borrowings and royalties paid into uncooperative states.
- (h) Branch remittance tax may be reduced or eliminated by double tax treaties. It is not imposed on French branches of companies that are resident in EU member states and are subject to tax in their home countries.
- (i) Losses carried back may not exceed EUR1 million.
- (j) The amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit exceeding this limit for such year.

## B. Taxes on corporate income and gains

**Corporate tax.** The taxation of French companies is based on a territorial principle. As a result, French companies carrying on a trade or business outside France are generally not taxed in France on the related profits and cannot take into account the related losses. However, under the French controlled foreign company (CFC) rules contained in Article 209 B of the French Tax Code, income earned by a French enterprise through a foreign enterprise may be taxed in France if such income is subject to an effective tax rate that is 50% lower than the French effective tax rate on similar income (for further details, see Section E). French companies are companies registered in France, regardless of the nationality of the shareholders and companies that have their place of effective management in France. Foreign companies carrying on an activity in France are subject to French corporate tax on their French-source profits.

Profits derived in France by branches of nonresident companies are deemed to be distributed, normally resulting in the imposition of a branch withholding tax of 30% on after-tax income. This tax is not imposed on the profits of French branches of companies that are resident in EU member states and that are subject to corporate income tax in their home countries. It may be reduced or eliminated by tax treaties. Although branch withholding tax normally applies to undistributed profits, such profits may be exempted from the tax if an application is filed with the tax authorities and if certain requirements are met.

**Rates of corporate tax.** The standard corporate tax rate is 33⅓%.

A social security surtax of 3.3% is assessed on the corporate income tax amount. This surtax is imposed on the portion of corporate tax due exceeding EUR763,000 before offsetting the tax credits granted under tax treaties (see *Foreign tax relief*). The 3.3% surtax does not apply to companies whose annual turnover is lower than EUR7,630,000 if at least 75% of the company is owned by individuals or by companies that themselves satisfy these conditions.

Members of consolidated groups must take into account the global turnover of the group to determine whether they reach the EUR7,630,000 threshold mentioned above.

In addition, a temporary additional surtax is assessed on the corporate income tax amount due from companies with turnover exceeding EUR250 million. Under the 2014 Finance Bill, this temporary additional surtax is increased to 10.7% for fiscal years ending between 31 December 2013 and 30 December 2016. For fiscal years ending on or after 31 December 2011 until 31 December 2013, the surcharge was 5%.

Taking into account the social security surtax, the marginal effective rate of French corporate income tax is 34.43% (33.33% + 1.1%). If the temporary contribution also applies, this rate is increased to 38% (34.43% + 3.56%).

A reduced corporate tax rate of 15% applies to the first EUR38,120 of the profits of small and medium-sized enterprises if certain conditions are met, including the following:

- The turnover of the company is less than EUR7,630,000.
- At least 75% of the company is owned by individuals or by companies that themselves satisfy this condition and the above condition.

The minimum tax was eliminated, effective from 1 January 2014.

**Capital gains.** Capital gains derived from the sale of fixed assets by French companies are subject to corporate income tax at the standard rate of 33.33% (34.43% including the 3.3% social security surtax).

Capital gains derived from the sale of qualifying participations are exempt from tax. Qualifying participations must satisfy both of the following conditions:

- They must be considered to be *titres de participation* (specific class of shares for accounting purposes that enables the shareholder to have a controlling interest) or be eligible for the dividend participation exemption regime.
- They must have been held for at least two years before their sale.

However, for tax years closed on or after 31 December 2012 the corporate income tax applies to 12% of the gross capital gains realized on qualifying participations. As a result, the effective tax rate on such gains is 4%.

Capital losses incurred with respect to such qualifying participations may no longer be offset against capital gains. Long-term capital losses existing as of the closing date of the tax year preceding the first tax year beginning on or after 1 January 2007 are forfeited.

A reduced 15% tax rate applies to the following:

- Capital gains derived from sales of shares in venture mutual funds (FCPRs) and venture capital investment companies (SCRs), if these shares have been held for a period of at least five years
- Income derived from the licensing of patents or patentable rights
- Capital gains realized on patents or patentable rights held for at least two years, unless the disposal takes place between related companies

Long-term capital losses relating to interests qualifying for the 15% category may only be offset against long-term capital gains corresponding to the same category.

The reduced rates also apply to various distributions made by venture mutual funds (FCPRs) and venture capital investment companies (SCRs).

Capital gains derived from sales of participating interests in companies that are predominantly real estate companies are subject to tax at the standard rate of 33.33%. For listed real estate companies, the rate is reduced to 19%.

**Administration.** In general, companies must file a tax return within three months following the end of their financial year.

Corporate income tax is prepaid in four installments. Companies that have their financial year ending on 31 December must pay the installments on 15 March, 15 June, 15 September and 15 December. The balance of corporate tax is due by 15 April of the following year. Other companies must pay the balance of corporate tax due within four months following the end of their financial year. The rules governing the payment of corporate income tax also apply to the payment of the 3.3% surtax.

Companies that generated a turnover exceeding EUR15 million (excluding value-added tax [VAT]) during the preceding year must file their corporate income tax and VAT returns electronically. If a company does not comply with this requirement, a 0.2% penalty is imposed. Other companies may elect to file such returns electronically.

In general, late payment and late filing are subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.4% per month (4.8% per year). Many exceptions and specific rules apply to interest and penalties.

**Dividends.** Dividends paid by French companies no longer carry a tax credit (*avoir fiscal*). However, under the parent-subsidiary regime, dividends received by French companies or French branches of nonresident companies are exempt from corporate income tax, except for a 5% service charge computed on the gross dividend income (net dividend income and foreign tax credits) and added back to the recipient's taxable income. Effective for financial years beginning on or after 1 January 2011, dividends received from a subsidiary established in an uncooperative country (as defined in Article 238-0 A of the French Tax Code; see Section E) are excluded from the parent-subsidiary regime.

The parent-subsidiary regime applies if the recipient holds at least 5% of the share capital of the distributing company.

In general, a 30% withholding tax is imposed on dividends paid to nonresidents. This tax may be reduced or eliminated by tax treaties. In addition, under the EU Parent-Subsidiary Directive, dividends distributed by French subsidiaries to EU parent companies are exempt from withholding tax, if, among other conditions, the recipient holds 10% or more of the shares of the subsidiary for at least two years.

The withholding tax rate is increased to 55% for distributed profits paid into uncooperative states (see Section E).

In addition, a 3% tax applies to distributions paid by dividend or deemed dividend distributing entities (including French branches of foreign companies that are deemed to distribute their yearly profits) to all French or foreign companies that are liable for corporate income tax in France, excluding collective-investment vehicles (CIVs). Exemptions to this tax concern distributions made within French tax consolidated groups, distributions paid in stock and other distributions from specific entities.

This tax must be paid together with the first advance payment of corporate income tax following the distribution payment.

In addition, withholding tax no longer applies to profits derived from stock, interests or assimilated shares distributed to CIVs created under foreign law and located in an EU member state or in a state that has signed a treaty with France that includes an administrative assistance provision aimed at combating tax fraud. However, to benefit from the withholding tax exemption, foreign CIVs must meet the same definition as French CIVs, and the content and actual implementation of the administrative assistance provisions must effectively allow the French tax authorities to obtain from the foreign tax authorities the information needed to verify this condition. A 15% withholding tax applies to distributions of income exempt from corporate income tax that are made by French real estate investment trusts (so-called SIICs and SPPICAVs) to French or foreign CIVs.

**Withholding taxes on interest and royalties.** Under French domestic law, withholding tax is no longer imposed on interest paid to nonresidents. However, a 50% domestic withholding tax is imposed on interest on qualifying borrowings paid into uncooperative states (see Section E).

A 33½% withholding tax is imposed on royalties and certain fees paid to nonresidents.

However, as a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and qualifying royalties paid between “associated companies” subject to corporate income tax of different EU member states was abolished. A company is an “associated company” of a second company if any of the following conditions is satisfied:

- The first company has maintained a direct minimum holding of 25% in the capital of the second company for at least two years at the time of the payment or commits itself to maintain such holding for a two-year period.
- The second company has maintained a direct minimum holding of 25% in the capital of the first company for at least two years or commits itself to maintain the holding for the two-year period.
- A third company has maintained a direct minimum holding of 25% in the capital of both the first and second companies for at least two years or commits itself to maintain such holding for a two-year period.

In these three situations, if the company chooses to undertake to keep the shares for at least two years, it must appoint a tax representative in France who would retrospectively pay the withholding tax if the shares are sold before the end of the two-year period.

Domestic withholding tax on royalties may be reduced or eliminated by tax treaties.

**Foreign tax relief.** In general, French domestic law does not allow a foreign tax credit; income subject to foreign tax and not exempt from French tax under the territoriality principle is taxable net of the foreign tax paid. However, most tax treaties provide for a tax credit that generally corresponds to withholding taxes on passive income.

### C. Determination of trading income

**General.** The assessment is based on financial statements prepared according to French generally accepted accounting principles, subject to certain adjustments.

**Deductibility of interest.** In general, interest payments are fully deductible. However, certain restrictions are imposed.

Interest accrued by a French entity with respect to loans from its direct shareholders may be deducted from the borrower's taxable income only if the following two conditions are satisfied:

- The share capital of the borrower is fully paid-up.
- The interest rate does not exceed the average interest rate on loans with an initial duration of more than two years granted by banks to French companies.

The above restriction also applies to interest paid outside France by international treasury pools established in France.

Under thin-capitalization rules, related-party interest is tax-deductible only if it meets both an arm's-length test and a thin-capitalization test. These tests are applied on a stand-alone basis by each borrowing company. Effective from 1 January 2011, the thin-capitalization rules are extended to interest paid to third parties on the portion of the debt that is guaranteed by a related party, or by a party whose commitment is guaranteed by a related party of the French borrowing entity.

Under the arm's-length test, the interest rate is capped to the higher of the following two rates:

- The average annual interest rate on loans granted by financial institutions that carry a floating rate and have a minimum term of two years
- The interest rate at which the company could have borrowed from any unrelated financial institution, such as a bank, in similar circumstances (that is, the market rate)

The portion of interest that exceeds the higher of the above two thresholds is not tax-deductible and must be added back to the company's taxable income for the relevant financial year.

The thin-capitalization test may limit the deductibility of interest payments even if the amount of the interest expense complies with the arm's-length test described above. Under the thin-capitalization test, the interest paid in excess of the three following thresholds is not tax-deductible:

- The debt-to-equity ratio threshold, which is calculated in accordance with a formula. For the purposes of this formula, A is the amount of interest that meets the arm's-length test, B equals 150% of the net equity of the borrower at either the beginning

or the end of the financial year, and C equals the total indebtedness of the French borrowing company resulting from borrowing from related companies. The following is the formula:

$$\frac{A \times B}{C}$$

- The earnings threshold, which equals 25% of the adjusted current income. The adjusted current income is the operating profit before the deduction of tax, related-party interest, depreciation and amortization, and certain specified lease rents.
- The interest income threshold, which equals the amount of interest received by the French company from related companies.

If the interest that is considered to be tax-deductible under the arm's-length test exceeds each of the three above thresholds, the portion of the interest that exceeds the highest of the above thresholds is not tax-deductible unless the excess amount is lower than EUR150,000.

The nondeductible portion of interest is added back to the taxable income of the borrowing entity. However, it can be carried forward for deduction in subsequent financial years. A 5% annual reduction of the interest balance that is carried forward applies beginning with the second subsequent financial year.

The thresholds that limit the deductibility of interest do not apply if the French borrowing company can demonstrate that the consolidated debt-to-equity ratio of its group is higher than the debt-to-equity ratio of the French borrowing company on a stand-alone basis (based on its statutory accounts). In determining the consolidated debt-to-equity ratio of the group, French and non-French affiliated companies and consolidated net equity and consolidated group indebtedness (excluding intercompany debt) must be taken into account.

In the context of a tax-consolidated group, excess interest that is not tax-deductible under the thin-capitalization test cannot be carried forward by the company that has incurred the excess interest. Only the head of the tax group may carry forward the excess interest.

The deduction of interest related to the acquisition of qualifying participations is limited for companies that have qualifying participations worth more than EUR1 million if the company does not demonstrate that it effectively makes the decisions concerning these investments and that it has effective control or influence over the acquired company. The nondeductible portion is computed by applying the ratio of the acquisition price to the debts of the acquiring company. The limitation applies to fiscal years beginning on or after 1 January 2012, and to the eight years following the acquisition. Consequently, it may apply to existing loans. This limitation does not apply if the debt is not connected to the acquisition or if the group debt-to-equity ratio is higher than the ratio of the French borrowing company.

In addition, the 2013 Finance Bill introduced a general interest deduction cap based on the amount of the net financial expenses incurred during a fiscal year (that is, the financial expenses reduced by financial income). As of 1 January 2014, only 75%

(previously 85% for the 2012 and 2013 fiscal years) of the net financial expenses incurred in the 2014 fiscal year and future years is deductible. For purposes of this rule, financial expenses (or income) are any amounts that are accrued in remuneration for monies put at the disposal of the company (or by the company to another party). For a tax-consolidated group, the interest cap applies to the net financial expenses of the tax group (excluding intercompany transactions). This provision applies to all entities subject to corporate income tax in France, including permanent establishments of foreign companies. However, it does not apply if the net financial expenses incurred by the company or by the tax group during a fiscal year are below EUR3 million.

The 2014 Finance Bill introduced a new anti-hybrid financing measure limiting the deductibility of interest accrued to related-party lenders. Under this measure, the tax deduction is disallowed if the French taxpayer cannot prove, at the request of the French tax authorities, that the related lender is liable to corporate income tax on such interest that is at least 25% of the corporate income tax that would have been due had the lender been established in France. Consequently, interest received by the related entity must be subject to tax at a rate of at least 8.33% (higher if the borrower is subject to additional and/or exceptional taxes with respect to corporate income tax). In case the lender is domiciled or established outside France, the French corporate income tax is determined as if the lender were established or domiciled in France. If the lender is a transparent entity, such as a partnership or an investment fund, the limitation of interest deduction only applies to the extent that such entity and its relevant members are affiliated, and the minimum corporate income tax rate of 25% is considered at the level of the entity's members or shareholders. These new rules apply retroactively to fiscal years ending on or after 25 September 2013.

**Inventories.** Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable, but a last-in, first-out (LIFO) basis is not permitted.

**Reserves.** In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes. In addition, the law provides for the deduction of special reserves, including reserves for foreign investments and price increases.

For fiscal years closed on or after 31 December 2012, a new tax of 7% applies to sums placed in the capitalization reserve for insurance companies. The tax is deductible for corporate income tax purposes.

**Capital allowances.** In general, assets are depreciated using the straight-line method. However, new qualifying industrial assets are generally depreciated using the declining-balance method.

Depreciable assets composed of various parts with different characteristics must be depreciated on a separate basis (these assets must be split into a principal component or structure on the one hand and into additional components on the other hand). The

depreciable amount of each asset must be spread out over its likely useful life for the company, which corresponds to the time period during which the company may expect to derive a profit from it. The depreciation method applied to each asset (straight-line method or accelerated method) must also be consistent with the pace at which the company expects to derive a profit from the asset.

Periodic assessment of the residual value of each component must be conducted to establish a (non-tax deductible) provision for impairment if needed.

For tax purposes, the depreciation of assets that have not been split into components and the depreciation of the asset's principal that has been split into components can be spread out over the useful life commonly accepted in business practices. This rule does not apply to buildings acquired by real estate investment companies. The following are some of the acceptable straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Commercial buildings	2 to 5
Industrial buildings	5
Office equipment	10 to 20
Motor vehicles	20 to 25
Plant and machinery	5 to 10*

\* These are the general rates. Alternatively, new plant and machinery may be depreciated using the declining-balance method at rates generally ranging from 12.5% to 50%.

Certain specified assets may be depreciated using accelerated depreciation methods. For example, pollution-control buildings completed before 1 January 2006, as well as qualifying software, may be fully depreciated over a 12-month period. Land and works of art are not depreciable. Intangible assets are depreciable if the company can anticipate that the profits derived from the assets will end at a fixed date. In general, goodwill is not depreciable.

**Relief for tax losses.** Losses incurred for financial years ending after 31 December 2003 may be carried forward indefinitely. However, for fiscal years closed on or after 31 December 2012, the amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit above that amount for such fiscal year.

In addition, enterprises subject to corporate tax may carry back losses against undistributed profits from the prior fiscal year. The carryback results in a credit equal to the loss multiplied by the current corporate tax rate, but losses carried back may not exceed EUR1 million. The credit may be used to reduce corporate income tax payable during the following five years with the balance being refunded at the end of the fifth year. A significant change in the company's activity, particularly an addition or a termination of a business that infers a decrease of 50% or more of either the revenue or the average headcount and fixed assets, may jeopardize the loss carryover and carryback.

**Groups of companies.** Related companies subject to corporate tax may elect to form a tax-consolidated group. Under the tax-consolidation regime, the parent company files a consolidated

return, thereby allowing the offset of losses of one group entity against the profits of related companies. The parent company then pays tax based on the net taxable income of companies included in the consolidated group, after certain adjustments for intra-group provisions are made. The group includes the French subsidiaries in which the parent has a direct or indirect shareholding of at least 95% and for which the parent company has elected tax consolidation.

The Second Amended Finance Bill for 2014 implemented “horizontal tax consolidation” into French law, allowing a French company or permanent establishment to form a French tax consolidated group with other French companies or permanent establishments if all are owned at 95% or more by a foreign parent company or permanent establishment that is subject to a tax equivalent to French corporate income tax in another EU country or European Economic Area (EEA) country. The 95% ownership test can be met directly, or indirectly, through intermediate companies or permanent establishments that are all subject to tax in an EU/EEA country or through other French consolidated companies. This new regime applies to fiscal years closed on or after 31 December 2014.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	2.1/5.5/10/20
Territorial Economic Contribution; replaced the Business Activity Tax (Taxe professionnelle); capped to a certain amount of the value added by the company; maximum rate	3
Social security contributions, on gross salary (approximate percentages); paid by	
Employer	35 to 45
Employee	18 to 23
General social security tax ( <i>contribution sociale généralisée</i> , or CSG) on active income	7.5
General social security tax on patrimonial and financial income (for example, income from real estate and securities)	8.2
Social debt repayment tax ( <i>contribution remboursement de la dette sociale</i> , or CRDS), on all income	0.5
Social levy on patrimonial and financial income (including 1.1% contribution and 0.3% surtax)	3.6
Exceptional solidarity surtax; on remuneration granted to an employee or director exceeding EUR1 million for 2013 and 2014; imposed on all legal entities, firms, sole proprietorships and unincorporated companies having a business in France that pays such remuneration	50
Registration duty	
On sales of shares in stock companies (including <i>sociétés anonymes</i> , <i>sociétés par actions simplifiées</i> and <i>sociétés en commandites par actions</i> ), shares of private limited liability companies ( <i>sociétés à responsabilité limitée</i> ,	

Nature of tax	Rate (%)
or SARLs) and interests in general partnerships ( <i>sociétés en nom collectif</i> , or SNCs); for sales of shares in stock companies, the tax rate is reduced to 0.1%; intragroup transfers are exempt	3
On sales of goodwill	3 to 5
On sales of professional premises, housing, businesses and shares of companies whose assets primarily consist of real estate	5

## E. Miscellaneous matters

**Foreign-exchange controls.** French exchange-control regulations have been eased. French direct investments into foreign countries are now almost completely unrestricted. In general, foreign direct investments in France, except in certain sensitive sectors, are only subject to an administrative declaration. For current operations, such as loans between residents and nonresidents and the opening of foreign bank accounts by French companies, the regulations have been almost totally eliminated.

**Payments to residents of tax havens or to uncooperative states or territories.** Under Article 238 A of the French Tax Code, interest, royalties and other remuneration paid to a recipient established in a tax haven or on a bank account located in a tax haven are deemed to be fictitious and not at arm's length. As a result, to deduct the amount paid, the French entity must prove that the operation is effective (that it effectively compensates executed services) and is at arm's length. For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in France in similar situations.

If these payments are made to a recipient established in an uncooperative country or on a bank account located in an uncooperative country, the French entity must also prove that the operation's principal aim is not to locate the payment in that country. In 2013, countries and territories considered to be uncooperative were Botswana, Brunei Darussalam, Guatemala, the Marshall Islands, Montserrat, Nauru and Niue. Effective from 2014, the British Virgin Islands was added to the list.

**Transfer pricing.** French entities controlled by, or controlling, entities established outside France are taxable in France on any profits transferred directly or indirectly to the entity located abroad through an increase or decrease in purchase or sale prices or by any other means. A general obligation to provide annual documentation to the tax administration with respect to transfer pricing is imposed on companies.

Under the 2014 Finance Bill, companies are also required to provide as part of the transfer-pricing documentation the tax rulings from foreign tax authorities obtained by associated companies.

**Controlled foreign companies.** Under Section 209 B of the French Tax Code, if French companies subject to corporate income tax in France have a foreign branch or if they hold, directly or indirectly, an interest (shareholding, voting rights or share in the profits) of at least 50% in any type of structure benefiting from a privileged tax regime in its home country (the shareholding threshold

is reduced to 5% if more than 50% of the foreign entity is held by French companies acting in concert or by entities controlled by the French company), the profits of this foreign entity or enterprise are subject to corporate income tax in France. If the foreign profits have been realized by a legal entity, they are taxed as a deemed distribution in the hands of the French company. If the profits have been realized by an enterprise (an establishment or a branch), these profits are taxed as profits of the French company if the tax treaty between France and the relevant foreign state allows the application of Section 209 B of the French Tax Code.

For the purpose of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in France in similar situations (such a foreign company is known as a controlled foreign company [CFC]). Tax paid by a CFC in its home country may be credited against French corporate income tax.

CFC rules do not apply to profits derived from entities established in an EU member state unless the French tax authorities establish that the use of the foreign entity is an artificial scheme that is driven solely by French tax avoidance purposes.

Similarly, the CFC rules do not apply if the profits of the foreign entity are derived from an activity effectively performed in the country of establishment. The concerned company must demonstrate that the establishment of the subsidiary in a tax-favorable jurisdiction has mainly a non-tax purpose and effect by proving that the subsidiary mainly carries out an actual industrial or commercial activity.

**Debt-to-equity rules.** For a discussion on the restrictions imposed on the deductibility of interest payments, including the thin-capitalization rules, see Section C.

**Headquarters and logistics centers.** The French tax authorities issue rulings that grant special tax treatment to headquarters companies and logistics centers companies. These companies are subject to corporate income tax at the normal rate on a tax base corresponding generally to 6% to 10% of annual operating expenses, depending on the company's size, functions assumed and risks borne. In addition, certain employee allowances are exempt from income tax.

**Reorganizations.** On election by the companies involved, mergers, spin-offs, split-offs and dissolutions without liquidation may qualify for a special rollover regime.

**Tax credit for research and development.** To encourage investments in research and development (R&D), the tax credit for R&D expenditure equals 30% of qualifying expenses related to operations of R&D (qualifying expenses equal the sum of 75% of the depreciation of fixed assets used in the research activity and 50% of staff expenses related to research) up to EUR100 million, and 5% for such expenses above EUR100 million. The rate is increased to 40% for the first year and to 35% for the following year for companies that benefit from the tax credit for the first time or that did not benefit from the regime for the five years preceding their request for the credit.

A ruling issued in April 2008 confirmed the eligibility of recharged R&D expenses.

**Special tax credit.** A special tax credit called the Tax Credit for Competitiveness and Employment (Crédit d'impôt pour la compétitivité et l'emploi, or CICE) has been introduced for fiscal years closed on or after 31 December 2013. It is computed on the basis of salaries that are below 2.5 times the minimum wage. The rate is 6% for 2014 and future years (it was 4% for 2013). Higher wages do not give rise to the CICE, even for the amount under the threshold.

**Tax audits.** Effective from 1 January 2014, all companies must maintain their accounting records in an electronic form when French tax authorities carry out a tax audit.

## F. Treaty withholding tax rates

Zimbabwe	10/15	10	10
Non-treaty countries	30/55 (i)	0/50 (i)	33½

- (a) Dividends paid by French companies to parent companies located in other EU member states are exempt from withholding tax if the parent company makes a commitment to hold at least 10% of the distributing company for an uninterrupted period of at least two years. However, the Finland treaty provides that all dividends are exempt from withholding tax.
- (b) Withholding tax rates of 5%/15% (dividends), 0%/10% (interest) and 0%/10% (royalties) apply with respect to Quebec.
- (c) France has agreed with Turkmenistan to apply the France-USSR tax treaty. France applies the France-USSR tax treaty to Belarus, Kyrgyzstan, Moldova and Tajikistan.
- (d) The tax treaty between France and China does not apply to the Hong Kong SAR.
- (e) As a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and royalties paid between associated companies of different EU states is abolished if certain conditions are met (see Section B).
- (f) France is honoring the France-Yugoslavia treaty with respect to Bosnia and Herzegovina, Montenegro and Serbia.
- (g) The French domestic law applies. As a result, the rate is 0% under normal circumstances. The rates listed for interest in the table are the treaty rates.
- (h) The general rates under the treaty are 15% on dividends and interest and 20% on royalties. However, these rates are reduced in practice according to a "most-favored-nation" clause.
- (i) The 50% and 55% rates apply only to payments made into uncooperative countries (see Section E).

## A. At a glance

Corporate Income Tax Rate (%)	25/30/35 (a)(b)
Capital Gains Tax Rate (%)	25/30/35 (c)
Withholding Tax (%)	
Dividends	10/20 (d)
Interest	10 (e)
Royalties from Patents, Know-how, etc.	10 (f)
Payments for Services	10 (g)
Branch Remittance Tax	10/15 (h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The minimum tax is 1% of turnover (unless exempt). See Section B for details.
- (b) Oil companies' subcontractors with a permanent establishment in Gabon are subject to tax on taxable turnover. The tax rate for these subcontractors is currently 8.75% (see Section D).
- (c) In certain circumstances, the tax is deferred (see Section B).
- (d) The rate is 10% if the parent-subsidiary regime applies. The 20% rate applies to payments made to resident and nonresident individuals and legal entities.
- (e) This 10% rate applies to interest paid to resident and nonresident individuals and nonresident legal entities, excluding interest on bonds.
- (f) This withholding tax applies to payments to nonresidents.
- (g) This withholding tax applies to payments made by resident companies to nonresidents for services, including professional services, rendered or used in Gabon.
- (h) This tax applies if the profits are remitted to the head office. The 10% rate applies to payments to head offices located in tax treaty countries. The rate of 15% applies to payments to head offices located in non-treaty countries.

## B. Taxes on corporate income and gains

**Corporate income tax.** Gabonese companies are taxed on the territoriality principle. As a result, Gabonese companies carrying on a trade or business outside Gabon are not taxed in Gabon on the related profits. Gabonese companies are those registered in Gabon, regardless of the nationality of the shareholders or where the companies are managed and controlled. Foreign companies with activities in Gabon are subject to Gabonese corporate tax on Gabonese-source profits.

**Tax rates.** Under the 2013 Financial Act, the standard corporate income tax rate is reduced to 30%. However, oil and mining companies are still subject to tax at a rate of 35%. The reduced corporate tax rate of 25% applies to a limited number of companies. The minimum corporate tax payable is 1% of annual turnover, but not less than XAF1 million. The base for the calculation of the minimum corporate tax is the global turnover realized during the tax year. An exemption from the minimum corporate tax applies to the following companies:

- Companies exempt from corporate income tax, as provided in the general tax code
- New businesses
- Newly incorporated companies or legal entities, for their first two years, regardless of their activities

**Capital gains.** Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if all of the proceeds are used to acquire new fixed assets in Gabon within three years or in the event of a merger.

**Administration.** The tax year is the calendar year. Tax returns must be filed by 30 April.

Companies must pay the corporate tax (or the minimum tax) in two installments, which are due on 30 November and 30 January. The first installment equals 25% of the preceding year's corporate tax. The second installment equals 33.33% of such tax. Companies must pay any balance of tax due by the due date for the tax return, which is 30 April.

Late payments are subject to a penalty of 10% for the first month and 3% for subsequent months.

**Dividends.** Dividends paid to resident and nonresident individuals and legal entities are subject to a 20% withholding tax.

If the parent-subsidiary regime applies, dividends received by parent companies are subject to a 10% tax. The parent-subsidiary regime applies if the following conditions are satisfied:

- The shares owned by the parent company represent at least 25% of the capital of the subsidiary.
- Both the parent and subsidiary have their seat in a Central African Economic and Monetary Community (CEMAC) member country (Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea and Gabon).
- The holding company retains the shares registered in its own name for at least two years from the date of issuance of the shares.

**Foreign tax relief.** In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Gabonese tax under the territoriality principle is taxable net of the foreign tax. However, Gabon's tax treaties with Belgium, Canada and France provide a tax credit that corresponds to the withholding tax on dividends.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the general accounting chart of the Organization for the Harmonization of Business Law in Africa.

Business expenses are generally deductible unless specifically excluded by law. To be deductible, an expense must satisfy the following general conditions:

- It must be made in the direct interest of the company or linked to the normal management of the company.
- It must be real and justified.
- It must result in the diminution of the net assets of the company.
- It must be registered in the company books as an expense of the related fiscal year.
- It must not be expressly excluded from deductible expenses by law.
- It must not be considered as an abnormal transaction.

The following expenses are deductible, subject to the conditions mentioned above:

- Head office overhead and remuneration for certain services (studies and technical, financial or administrative assistance) paid to nonresidents. The deduction is limited to 10% of chargeable income before taking into account such expenses.
- Royalties from patents, brands, models or designs paid to a non-CEMAC corporation participating in the management of, or owning shares in, the Gabonese corporation.

The following expenses are not deductible:

- Rent expense for movable equipment paid to a shareholder holding, directly or indirectly, more than 10% of the capital
- A portion of interest paid to a shareholder in excess of the central bank annual rate plus two points and, if the shareholder is in charge of management, on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, penalties and corporate tax
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director), gifts and subsidies

**Inventories.** Inventories are normally valued at cost or market value. Cost must be determined on a weighted-average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. The following are some of the applicable straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	8 to 20
Plant and machinery and transport equipment	8 to 33.3
Office equipment	15 to 20

An accelerated depreciation method may be used for certain fixed assets, subject to the approval of the tax authorities.

**Relief for tax losses.** Losses may be carried forward three years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** Gabonese law does not allow the filing of consolidated tax returns. Tax rules applicable to groups of companies are discussed below.

*Corporate income tax.* Costs incurred within a group are deductible for tax purposes. These costs include assistance fees, interest on partner current accounts and rentals of goods within the group.

Capital gains derived from intragroup operations are taxable at a reduced rate of 20% instead of a rate of 30%, unless they are subject to other favorable exemption regimes.

*Tax on investment income.* Tax on Gabonese-source investment income (for example, dividends) paid to companies of the same group are exempt from the Tax on Income from Movable Capital (Impôt sur le Revenu des Capitaux Mobiliers, or IRCM). This income is normally taxable at a rate of 15% (or 10% if the company is located in the CEMAC area).

A reduced rate of 10% applies if the income is paid to a partner who is an individual or legal entity.

Subject to conditions, a tax credit in Gabon may be granted even for tax paid to countries that have not entered into a tax treaty with Gabon.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Business activity tax ( <i>license</i> ); calculated based on the nature of the business, the value of equipment and the number of employees	Various
Special tax on subcontractors of petroleum companies; a global tax including a contractual payment amount, income tax and payroll tax; on taxable turnover	8.75
Registration duties, on transfers of real property or businesses	4 to 8
Social security contributions, on an employee's gross salary limited to XAF1,500,000 a month	
Employer	16
Employee	2.5
Medical health contributions, on an employee's gross salary limited to XAF6 million a month	
Employer	4.1
Employee	2.5
Value-added tax (VAT); imposed on corporations realizing annual turnover in excess of XAF60 million from	

Nature of tax	Rate (%)
general business activities and on corporations realizing annual turnover in excess of XAF500 million from forestry development activities	
Standard rate	18
Reduced rate, on certain items such as sugar	10
Reduced rate on sales of cement and the rendering of services related to cement	5
Exports and international transport	0
Withholding tax on local service providers that are not subject to VAT; tax based on the total amount of the invoice	9.5

### E. Foreign-exchange controls

The CEMAC Act, dated 29 April 2000, provides exchange-control regulations, which apply to financial transfers outside the franc zone, which is a monetary zone including France and its former overseas colonies.

### F. Treaty withholding tax rates

Gabon has signed a multilateral tax treaty with the CEMAC members, which were formerly members of the Central African Economic and Customs Union (UDEAC). Gabon has also entered into the African and Mauritian Common Organization (OCAM) multilateral tax treaty, as well as tax treaties with Belgium, Canada and France. The withholding rates under these multilateral treaties and the treaties with Belgium, Canada and France are listed in the following table.

	Dividends %	Interest %	Royalties %
Belgium	15	15	10
Benin	15	15	– (a)
Cameroon	15	15	– (a)
Canada	15	10	10 (a)
Central African Republic	15	15	– (a)
Chad	15	15	– (a)
Congo (b)	15	15	– (a)
Côte d'Ivoire	15	15	– (a)
Equatorial Guinea	15	15	– (a)
France	15	10	10
Senegal	15	15	– (a)
Togo	15	15	– (a)
Non-treaty countries	20	10 (c)	10

- (a) Withholding tax is not imposed, but the income is subject to tax in the state of the recipient.
- (b) Congo and Gabon have signed both the CEMAC (UDEAC) and OCAM treaties. The withholding rates are the same under each treaty.
- (c) See footnote (e) to Section A.

\* These withholding taxes apply to payments to foreign companies.

## B. Taxes on corporate income and gains

**Corporate income tax.** Enterprises carrying on activities in Georgia, including enterprises with foreign investment, are subject to tax. Enterprises with foreign investment include 100% foreign-owned subsidiaries, joint ventures and foreign legal entities operating through a permanent representation (establishment).

Georgian legal entities (companies) are subject to tax on their worldwide income. For tax purposes, Georgian legal entities are entities incorporated in Georgia, including 100%-owned subsidiaries of foreign companies, and legal entities incorporated in a foreign country, but managed in Georgia.

Foreign legal entities are subject to tax on Georgian-source income only. Income earned through a permanent establishment in Georgia, net of tax-deductible expenses, is taxed at the regular corporate income tax rate of 15%. A permanent establishment is defined as

any permanent location for business activities in Georgia and generally includes any organization or natural person who represents a foreign legal entity conducting commercial activities in Georgia. Domestic tax law and double tax treaties list activities that do not result in a taxable permanent establishment. Foreign legal entities without a permanent establishment in Georgia are subject to withholding tax on their Georgian-source income at a rate of 4%, 5% or 10% (see Section A).

Georgian law allows foreign investment in various forms, including investment through wholly or partially foreign-owned subsidiaries, share participations in joint stock companies and in joint ventures with Georgian legal entities and citizens, permanent establishments and other types of participations.

**Tax rate.** The regular corporate income tax rate is 15%.

**Special types of enterprises.** The Georgian tax law provides for beneficial tax treatment for enterprises operating in Georgia with the following statuses:

- International Financial Company
- Special Trade Company
- Free Industrial Zone Company
- Virtual Zone Person
- Tourist Enterprise
- Agricultural Cooperative

The Georgian Tax Authorities (GTA) grant the above statuses according to the rules defined by the Minister of Finance of Georgia. The statuses are described below.

*International Financial Company.* A financial institution may obtain the status of International Financial Company for the purpose of tax benefits if its Georgian-source income derived from financial operations or financial services does not exceed 10% of its worldwide gross income. Income received from financial operations and financial services between International Financial Companies is not considered to be income received from Georgian sources. An International Financial Company must be established outside a Free Industrial Zone. International Financial Companies are exempt from corporate income tax on income derived from financial operations, financial services and the sale of securities issued by nonresident persons.

*Special Trade Company.* An entity conducting its activities in an authorized warehouse may be granted Special Trade Company status for corporate income tax exemption purposes. A Special Trade Company may supply and re-export foreign goods, as well as purchase foreign goods from an entity without such status for further supply or re-export. A Special Trade Company may also derive income (including Georgian-source income) from other allowable activities if such income does not exceed the sum of GEL1 million and 5% of the customs value of foreign goods brought into Georgia. In addition, a Special Trade Company may derive income exempted from corporate income tax and from the sale of fixed assets used in economic activities for more than two years. A Special Trade Company is prohibited from importing or purchasing Georgian goods for further supply, rendering of services in Georgia and operating an authorized warehouse. The status of Special Trade Company is cancelled for a calendar year if an authorized representative of such company submits an

application to the GTA at least five business days before the beginning of the relevant calendar year. A Special Trade Company is exempt from corporate income tax on income received from allowable activities except for income received from the sale of fixed assets.

*Free Industrial Zone Company.* Free Industrial Zone Company status for tax purposes may be granted to a company operating in a Free Industrial Zone. Free Industrial Zone Companies primarily engage in the manufacturing and export of goods outside Georgia from a Free Industrial Zone. The status of Free Industrial Zone Company is subject to cancellation if the company engages in activities prohibited by the law. Free Industrial Zone Companies are exempt from corporate income tax on income from activities allowed within a Free Industrial Zone.

*Virtual Zone Person.* Virtual Zone Person status for tax purposes may be granted to a company engaged in information technology activities. Virtual Zone Persons are exempt from corporate income tax on income derived from the supply of self-produced information technology outside Georgia.

*Tourist Enterprise.* Tourist Enterprise status for tax purposes may be granted to a company that builds a hotel for the purpose of the sale and leaseback of the assets, or part of the assets, of the hotel and uses the building in hotel operations. Tourist Enterprises are exempt from corporate income tax on income derived from rendering of hotel services until 1 January 2026.

*Agricultural Cooperative.* Agricultural Cooperative status for tax purposes may be granted to a company in accordance with the Law of Georgia on “Agricultural Cooperative.” Agricultural Cooperatives are exempt from corporate income tax on income derived from the supply of agricultural products produced in Georgia before their processing (that is, a change of commodity code occurs) until 1 January 2017.

**Capital gains.** No separate capital gains tax is imposed in Georgia. Realized capital gains are included in taxable income and are subject to tax at the regular corporate income tax rate. Realized capital losses can be carried forward together with other losses and be offset against profit in future tax years (see Section C).

**Administration.** The tax year is the calendar year.

Both Georgian legal entities and foreign legal entities conducting business activities in Georgia through a permanent establishment must make advance payments of corporate income tax. Each payment is equal to 25% of the corporate income tax liability for the preceding year. The due dates for the payments are 15 May, 15 July, 15 September and 15 December. Advance payments of tax are applied against the corporate income tax liability for the current tax year.

A taxpayer that had no taxable income during the preceding tax year does not have to make advance corporate income tax payments during the current tax year.

If the total advance payments exceed the tax due for the tax year, the excess is applied against any outstanding liabilities for other taxes. If no outstanding tax liabilities exist, taxpayers may apply overpayments against future tax liabilities or ask for a refund.

The annual corporate income tax return must be filed and the balancing payment of corporate income tax must be made before 1 April of the year following the tax year.

Interest is charged on late tax payments at a rate of 0.06% of the tax due for each day of delay. If the tax return is not filed by the due date, a penalty is imposed. This penalty equals 5% of the amount of tax payable stated in the tax return for each complete or incomplete month of delay. However, the total amount of the penalty may not be less than GEL50 or more than 30% of the amount of tax liability. A penalty for an understatement of tax liability or overstatement of a tax credit that results from a change of the taxable point by the GTA is imposed at a rate of 10% of the relevant amount. The percentage is 50% in all other cases. No penalty is imposed if a taxpayer voluntarily files an adjusted tax return.

**Dividends.** A dividend withholding tax is imposed on dividends paid by Georgian enterprises to individuals, not-for-profit companies and foreign legal entities. However, dividends paid to Georgian legal entities are not subject to withholding tax and are not included in taxable income. The current dividend withholding tax rate is 5%.

The following types of dividends are not subject to withholding tax and are not included in taxable income:

- Dividends paid by International Financial Companies
- Dividends paid by Free Industrial Zone Companies in Free Industrial Zones
- Dividends paid on free-floating securities (debt or equity securities listed on the stock exchange with a free-float rate in excess of 25% as of 31 December of the current and preceding reporting year, according to information provided by the issuer of the securities to the stock exchange)
- Dividends paid by Agricultural Cooperatives to their members until 1 January 2017

**Interest.** An interest withholding tax is imposed on interest payments made by a permanent establishment of a nonresident or a resident or on their behalf. However, interest paid to resident banks is not subject to withholding tax. The current interest withholding tax rate is 5%.

The following types of interest payments are not subject to withholding tax and are not included in taxable income:

- Interest paid by financial institutions licensed according to the Georgian law. However, interest is included in gross income if the recipient is also a licensed financial institution.
- Interest paid by Free Industrial Zone Companies in Free Industrial Zones.
- Interest paid on free-floating securities.
- Interest paid on debt securities issued by Georgian entities listed on recognized foreign stock exchanges.
- Interest paid on debt securities issued by International Financial Institutions (a list of International Financial Institutions is contained in a resolution of the government of Georgia).

The following rules apply to interest due to individuals (except for value-added tax [VAT] payers) and nonresident companies (except for their permanent establishments in Georgia):

- Outstanding interest liability that was deducted as an expense from gross income of the 2006 tax year and was not yet paid as of 31 December 2012 was deemed paid on 31 December 2012.
- Outstanding interest liability that was deducted as an expense from gross income of the 2007 tax year and was not yet paid as of 31 December 2012 was deemed paid on 1 July 2013.
- Outstanding interest liability that was deducted as an expense from gross income of the 2008 tax year and was not yet paid as of 31 December 2013 was deemed paid on 31 December 2013.
- Outstanding interest liability that was deducted as an expense from gross income of the 2009 tax year and is not yet paid as of 31 December 2014 is deemed paid on 31 December 2014.
- Outstanding interest liability that was deducted as an expense from gross income of the 2010 tax year and is not yet paid as of 31 December 2015 is deemed paid on 31 December 2015.

**Foreign tax relief.** Foreign income tax paid on income generated from foreign sources may be credited against Georgian tax imposed on the same income, limited to the amount of such Georgian tax (that is, up to the amount of corporate income tax that would have been payable on such income in Georgia).

### C. Determination of taxable income

**General.** Taxable income is computed on the basis of International Financial Reporting Standards (IFRS), modified by certain tax adjustments. It includes the following:

- Trading income
- Capital gains
- Income from financial activities
- Gratuitously received assets
- Works and services
- Other items of income

Income received in foreign currency is converted into Georgian lari (GEL) at the daily exchange rate determined by the National Bank of Georgia (NBG) for the date of receipt of the income.

In general, to calculate taxable income, taxpayers may deduct from gross income all documented expenses contributing to the generation of such income. However, certain expenses are nondeductible or partially deductible for tax purposes.

Nondeductible expenses include the following:

- Expenses related to noneconomic activities (except charitable contributions up to 10% of taxable income before taking into account the charitable expenses).
- Entertainment expenses, unless a taxpayer conducts economic activities of an entertaining nature and the entertainment expenses are incurred in the course of these activities.
- Expenses related to the generation of income exempt from corporate income tax.
- Expenses incurred on goods and services that are outside the scope of corporate income taxation, except for a gratuitous supply to the state or a local government.
- Corporate income tax paid or payable in Georgia or abroad.
- Penalties and fines paid or payable to the Georgian state budget.
- Interest expenses above the percentage established annually by the Minister of Finance of Georgia (24% since January 2011) and subject to thin-capitalization rules in certain cases (see Section E).

- Representation expenses in excess of 1% of the gross income earned during the tax year.
- Provisions for doubtful receivables (see *Provisions*).
- Capital repair expenses with respect to fixed assets in excess of 5% of the balance value of the corresponding tax depreciation group of fixed assets at the end of the preceding tax year. However, such expenses are fully deductible if a person applies the full depreciation method (see *Tax depreciation*). Repair expenses with respect to rented fixed assets are deductible according to the rules discussed in *Tax depreciation*.
- Expenses incurred on goods and services purchased from a Micro Business, unless the income derived by the Micro Business from the provision of such goods and services is taxed under a general rule (that is, at a rate of 20%). An individual may obtain the special status of a Micro Business for tax purposes if it conducts economic activities independently without hiring employees, receives annual gross income up to GEL30,000, maintains an inventory balance of no more than GEL45,000 and undertakes activities that are not banned for a Micro Business as provided by the government of Georgia.

Virtual Zone Persons may deduct expenses from their gross income in proportion to the part of their income received from the supply of information technology in Georgia.

To calculate taxable income, an enterprise must use the same method of accounting (cash method or accrual method) that is used in its financial accounting.

Notwithstanding the above, for payments made to individuals and payments to nonresident enterprises for the rendering of services, the moment of payment is considered to be the moment of incurring the expenditure. This cash-basis rule does not apply to licensed financial institutions.

Fines defined by agreements and other penalties are also accounted for on a cash basis.

**Inventories.** Inventories produced or purchased are valued at the production cost or purchase price. Costs for storage and transportation must be included in the value of inventories. If inventories cannot be sold at a price above cost, they must be valued at the possible realization price less any selling expenses. The actual cost (of identifiable items), weighted average cost or first-in, first-out (FIFO) methods may be used to value inventories.

**Provisions.** Banks, credit unions and insurance companies may deduct certain provisions from their gross income of the reporting year in accordance with the rules established by the NBG. Banks and credit unions may deduct allocations to reserves for bad debts if doubtful receivables have been written off in their financial accounting books.

Insurance companies may deduct from their gross income of a reporting year net insurance losses incurred in the same reporting period, excluding income from regression and survived property.

Leasing companies may deduct from their gross income allowances for bad debts related to leasing activities according to the rules set by the Minister of Finance of Georgia. For this purpose,

a leasing company is an entity that derives at least 70% of its total gross income for a tax year from the leasing of property. No other provisions are deductible.

**Tax depreciation.** Depreciation charges for fixed assets used in economic activities are deductible for tax purposes in accordance with the rates and conditions set forth in the Tax Code of Georgia (TCG).

Depreciation is not assessed with respect to land, works of art, museum items, historical objects (except for buildings) and other non-amortized fixed assets. Expenditures on fixed assets with a value below GEL1,000 and biological assets (animal or plant) can be fully deducted from gross income in the year in which the exploitation of the fixed assets begins or in the year in which the expenses on biological assets are incurred.

Fixed assets are allocated to groups, which are depreciated as whole units. If at the end of a tax year, all fixed assets in a group are realized or liquidated or the balance of the group is less than GEL1,000, the entire balance of the group may be claimed as a tax deduction.

If the realization price of fixed assets of a group (for a gratuitous supply, the market value of a group) during the tax year exceeds the book value of the group at the end of this tax year, the surplus amount is included in the gross income and the book value of the group equals zero.

The amount of depreciation for each group is calculated by applying the depreciation rates for the group to the tax value of the group at the end of the tax year. The following are the principal assets and depreciation rates for each group.

Group	Assets	Depreciation rate (%)
1	Passenger cars; automobile equipment for use on roads; office furniture; automotive transport rolling stock; trucks, buses, special automobiles and trailers; machinery and equipment for all sectors of industry and the foundry industry; forging and pressing equipment; construction equipment; and agricultural vehicles and equipment	20
2	Special instruments, inventory and equipment; computers, peripheral devices and data processing equipment; and electronic devices	20
3	Railway, naval and river transport vehicles; power vehicles and equipment; thermal technical equipment and turbine equipment; electric engines and diesel generators; electricity transmission and communication facilities; and pipelines	8
4	Buildings and construction structures	5
5	Assets subject to depreciation that are not included in the other groups	15

Taxpayers may apply accelerated depreciation rates for Groups 2 and 3, but these rates may not be higher than double the rates provided in the above table.

Intangible assets are amortized over their useful life or at an annual rate of 15% if it is impossible to determine the useful life of a particular intangible asset. The annual amortization is apportioned on a pro rata basis if the intangible asset is used for a certain time period during a year. Amortization expenses with respect to intangible assets are deductible for tax purposes. Intangible assets with a value below GEL1,000 can be fully deducted from gross income in the year when the respective expense is incurred. Expenses incurred to purchase or produce amortized intangible fixed assets are not capitalized if they had been deducted previously from gross income.

Taxpayers may use an alternative method to compute the deduction of expenditure on fixed assets, other than non-amortized fixed assets and fixed assets contributed into the capital of a company. Under this alternative method, a company may fully deduct the cost of such assets in the year in which it begins to exploit the assets, including their capital repair expenses. These fixed assets are not included in the asset groups for depreciation. If such assets are sold subsequently, the sale price (for a gratuitous supply, market value) is included in gross income. If a company uses the alternative method, it must use this method for all fixed assets purchased or produced thereafter and must use this method at least for five years.

*Leasing.* Each fixed asset supplied under leases is recorded as a separate group by the lessor. Fixed assets supplied under leases are amortized according to the discounted value of lease payments.

On the expiration or termination of a lease agreement, if the leased asset is returned to the lessor, this asset remains in the same group without further depreciation until it is leased again.

The corporate income tax provisions effective before 1 January 2010 apply to assets leased before this date.

*Repair expenses for rented fixed assets.* Repair expenses that do not reduce rent payments for rented fixed assets constitute a separate group of assets that are depreciated at the rate set for Group 5. On the expiration or termination of a rent agreement, the remaining balance value for this group is annulled and may not be deducted from gross income.

**Relief for losses.** Enterprises may carry forward a loss incurred in a tax year to the following five tax years for offset against future profits. On request of a taxpayer, the loss carryforward period may be extended to 10 years. The statute of limitations changes from 6 years to 11 years if a 10-year carryforward period is selected by a taxpayer. A 10-year carryforward period can be changed to a 5-year carryforward period when the losses carried forward are used up.

International Financial Companies, Special Trade Companies and Free Industrial Zone Companies (see Section B) cannot carry forward losses.

Losses cannot be carried back.

**Groups of companies.** Consolidated returns of companies are not allowed. All companies must file separate tax returns. In addition, Georgian law does not contain any measures allowing members of a group to offset profits and losses.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on goods and services supplied in Georgia and on imported goods; reverse-charge VAT is imposed on works and services carried out in Georgia by nonresident entities	18
Property tax; on the average annual net book value of fixed assets	1
Property tax for leasing companies on leased assets	0.6

Georgia also imposes several other minor taxes.

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Georgian currency is the lari (GEL). The lari is a non-convertible currency outside Georgia. Enterprises may buy or sell foreign currencies through authorized banks or foreign-exchange offices in Georgia.

Georgia does not impose restrictive currency-control regulations. Enterprises may open bank accounts abroad without any restriction if they declare such accounts (other than deposit accounts) with the GTA within five working days after opening such accounts. In general, all transactions performed in Georgia must be conducted in lari. Transactions with nonresident entities can be conducted in other currencies.

**Transfer pricing.** Under the transfer-pricing (TP) rules set by the TCG, the arm's-length principle applies to transactions carried out by taxpayers with related parties. The TP rules generally apply to cross-border transactions between related parties. These rules may also apply to transactions between a Georgian resident entity and an unrelated foreign entity that is a resident of a low-tax jurisdiction or offshore country and transactions between a Georgian company and its permanent establishment.

The generally accepted transfer-pricing methods include the following:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Net profit margin method
- Profit split method

The Minister of Finance of Georgia is authorized to provide detailed descriptions of TP methods, their application rules and other procedural rules.

In 2013, the Minister of Finance of Georgia enforced the Instruction "On Pricing International Controlled Transactions," which is in accordance with the TCG provisions. The Instruction covers the following items:

- Scope of transactions subject to Georgian transfer-pricing rules
- Acceptable transfer-pricing methods
- Comparability criteria
- Information sources
- Arm's-length range
- Procedure for advance pricing agreements
- Transfer-pricing documentation requirements
- Other procedural issues

It also outlines required actions for companies doing business in Georgia.

**Thin capitalization.** Thin capitalization occurs when the debt-to-equity ratio exceeds 3:1 (5:1 for a leasing company). In the event of thin capitalization, a company may not deduct paid or payable interest expenses from its gross income. However, the thin-capitalization rules do not restrict the deduction of interest expenses on debt below the established ratio. Thin-capitalization rules do not apply to financial institutions, entities with annual gross income of GEL200,000 or less or cases in which interest expenses do not exceed 20% of the taxable income before deduction of interest expenses.

Thin capitalization is determined according to the average annual ratio, in accordance with the rules set by the Minister of Finance of Georgia. These rules apply to transactions occurring on or after 1 January 2013.

## F. Treaty withholding tax rates

Georgia has entered into tax treaties with 40 countries. The table below lists the withholding tax rates under these treaties. In general, if the withholding tax rate provided in a treaty exceeds the rate provided by the TCG, the latter rate applies.

	Dividends %	Interest %	Royalties %
Armenia	5/10 (a)	10	5
Austria	0/5/10 (b)	0	0
Azerbaijan	10	10	10
Bahrain	0	0	0

- (a) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least a 25% share in the capital of the payer of the dividends. The 10% rate applies in all other cases.
- (b) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (c) The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases.
- (d) The 0% rate applies if the recipient is the beneficial owner of interest on a commercial debt-claim, including a debt-claim represented by commercial paper, resulting from deferred payments for goods, merchandise or services supplied by an enterprise or if the recipient is the beneficial owner of interest on a loan that is represented by a bearer instrument and that is granted by a banking enterprise. The 10% rate applies in all other cases.
- (e) The 5% rate applies if the beneficial owner of the royalties is a company. The 10% rate applies in all other cases.
- (f) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies in all other cases.
- (g) The 0% rate applies if the recipient is the beneficial owner of interest on credit sales of industrial, commercial or scientific equipment. The 8% rate applies in all other cases.
- (h) The 0% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, except for computer software and including cinematographic films, and films or tapes for television or radio broadcasting. The 5% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, patents, trademarks, designs or models, planes, secret formulas or processes, computer software or information concerning industrial, commercial or scientific experience.

- (i) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Danish krone or Georgian lari). The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Danish krone or Georgian lari). The 10% rate applies in all other cases.
- (j) The 0% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (k) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR3 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (l) The 0% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR3 million (or the equivalent amount in any currency). The 5% rate applies if the actual recipient is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in any currency). The 10% rate applies in all other cases.
- (m) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the voting rights in the payer of the dividends and that has invested in the payer at least EUR3 million (or the equivalent amount in Georgian lari). The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 10% of the voting rights in the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (n) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies in all other cases.
- (o) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends and that has invested in the payer at least EUR75,000. The 15% rate applies in all other cases.
- (p) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (q) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than USD2 million (or the equivalent amount in euros or Georgian lari). The 5% rate applies if the recipient is a company that holds at least 10% of the capital of the payer of the dividends. The 15% rate applies in all other cases.
- (r) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (s) The 15% rate applies if the dividends are paid out of income derived directly or indirectly from immovable property within the meaning of Article 6 by an investment vehicle that distributes most of this income annually and if the income from such immovable property is exempt from tax. The 0% rate applies in all other cases.
- (t) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases.

- 
- (u) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership that is not liable to tax) that has held directly at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months before the decision to distribute the dividends. The 5% rate applies in all other cases.
  - (v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
  - (w) The 0% rate applies if the beneficial owner of the dividends is either of the following:
    - A company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends
    - A pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement benefits if such pension fund or other similar institution is established and recognized for tax purposes in accordance with the laws of the other state. The 5% rate applies in all other cases.
  - (x) The 0% rate applies if the beneficial owner of the dividends is a company that has invested in the payer more than USD3 million (or the equivalent amount in Georgian lari). The 5% rate applies in all other cases.
  - (y) The 0% rate applies to pension funds and recipients of interest on corporate bonds traded on a stock exchange in the other state and issued by a company that is a resident of that state. The 5% rate applies in all other cases.
  - (z) The 0% rate applies to recipients of interest on loans or credits granted by banks. The 5% rate applies in all other cases.
  - (aa) The 0% rate applies if the beneficial owner of the dividends is a company (or partnership) that holds at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

Georgia has signed and ratified a tax treaty with Portugal, but this treaty is not yet in force.

Tax treaties have been initialed with Cyprus, Iceland, Lebanon, Liechtenstein and Oman.

## A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Trade Tax Rate (Average Rate) (%)	14
Capital Gains Tax Rate (%)	15 (a)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	25 (a)(b)(c)(d)
Interest	0 (e)(f)
Royalties from Patents, Know-how, etc.	15 (a)(b)(f)(g)(h)
Remuneration to Members of a Supervisory Board	30 (h)
Payments for Construction Work	15 (a)(b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1 (i)
Carryforward	Unlimited (j)

- (a) A 5.5% solidarity surcharge is imposed (see Section B).
- (b) On application, these rates may be reduced by tax treaties.
- (c) This withholding tax applies to dividends paid to residents and nonresidents. Under the 2009 Annual Tax Act, for dividends paid to nonresident corporate entities, this rate may be reduced to 15% if the nonresident dividend recipient qualifies as an eligible recipient under the German anti-treaty shopping rules.
- (d) These rates may be reduced under the European Union (EU) Parent-Subsidiary Directive. Under the EU Parent-Subsidiary Directive, on application, a withholding tax rate of 0% applies to dividends distributed by a German subsidiary to an EU parent company if the recipient has owned 10% or more of the share capital of the subsidiary for a continuous period of 12 months at the time the dividend distribution takes place and if the German anti-treaty shopping rules do not apply.
- (e) A 25% interest withholding tax is imposed on the following types of interest:
- Interest paid by financial institutions. The rate is 15% if the loan is not recorded in a public debt register.
  - Interest from over-the-counter business. Over-the-counter business refers to bank transactions carried out over the bank counter, without the securities being on deposit at the bank.
  - Interest from certain types of profit-participating and convertible debt instruments.

The interest withholding tax is not imposed on intercompany loans. Non-residents may apply for a refund of the withholding tax if a treaty exemption applies. If a nonresident is required to file an income tax return in Germany, the withholding tax is credited against the assessed corporate income tax or refunded.

- (f) These rates may be reduced by tax treaties or under the EU Interest-Royalty Directive. Under the EU Interest-Royalty Directive, on application, German withholding tax is not imposed on interest and royalties paid by a German resident company to an associated company located in another EU member state. To qualify as associated companies, a minimum 25% shareholding or a common parent is required, among other requirements.
- (g) The withholding tax rate on royalties from patents, know-how and similar items is 15% for payments to nonresident corporations if such items are registered in Germany or used in a German permanent establishment.
- (h) This withholding tax applies to payments to nonresidents only.
- (i) The loss carryback, which is optional, is available for corporate income tax purposes, but not for trade income tax purposes. The maximum carryback is EUR1 million.
- (j) The carryforward applies for both corporate income tax and trade tax purposes. Effective for tax years ending after 31 December 2003, the maximum loss carryforward that may be used for corporate and trade tax purposes is restricted to EUR1 million for each tax year plus 60% of annual taxable income exceeding EUR1 million (so-called minimum taxation). The carryforward is subject to the change-of-ownership rule (see Section C).

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporations, such as stock corporations (Aktiengesellschaft, or AG) and limited liability companies (Gesellschaft mit beschränkter Haftung, or GmbH), that have their corporate seat or place of management in Germany (resident corporations) are subject to corporate income tax (Körperschaftsteuer) on worldwide income, unless otherwise provided in tax treaties.

A nonresident corporation, whose corporate seat and place of management are located outside Germany, is subject to corporate income tax only on income derived from German sources. Income from German sources includes, among other items, business income from operations in the country through a branch, office or other permanent establishment, including a permanent representative, and income derived from the leasing and disposal of real estate located in Germany.

**Rates of corporate income tax.** Corporate income tax is imposed at a rate of 15% on taxable income, regardless of whether the income is distributed or retained.

A 5.5% solidarity surcharge is imposed on corporate income tax, resulting in an effective tax rate of 15.825%. Prepayments of corporate income tax and withholding tax payments are also subject to this surcharge.

Companies that continue to have a corporate income tax credit balance resulting from retained earnings taxed in the years for which the imputation tax credit system applied (generally, 2000 and earlier years) receive a refund of this remaining balance in 10 equal amounts during the period of 2008 through 2017.

Companies that continue to have untaxed equity (known as “EK 02”) made up of various amounts of tax-free income generated in the years for which the imputation tax credit system applied (generally, 2000 and earlier years) must pay tax on this untaxed equity at a rate of 3%. Companies must pay this amount of additional tax in 10 equal installments from 2008 to 2017 or as a one-time payment on a discounted basis.

**Trade tax.** Municipalities impose a trade tax on income. However, for purposes of this tax, taxable income is subject to certain adjustments. The major adjustments include a 25% add-back of

interest expenses with respect to debt, a 6.25% add-back of license payments, a 5% add-back of lease payments for movable assets and a 12.5% add-back of lease payments for immovable assets. The effective average trade tax rate amounts to approximately 14%. Taking into account the various municipality multipliers, the combined average tax rate for corporations (including corporate income tax, solidarity surcharge and trade tax) ranges from approximately 23% to 33%.

If a company operates in several municipalities, the tax base is allocated according to the payroll paid at each site. Certain enterprises, such as specified banks and real estate companies, receive privileged treatment under the trade tax law.

**Withholding tax on construction work.** Taxpayers and entities that are corporate bodies under public law (for example, cities and municipalities) must withhold a tax of 15% from payments made for construction work provided in Germany. The tax must be withheld even if the work provider does not have a tax presence in the form of a permanent establishment or permanent representative in Germany unless the work provider obtains a "certificate of non-taxation" from the competent tax office. Construction work providers may obtain a refund of the withholding tax if they can prove that no German tax liability against which the withholding tax could be applied exists.

**Capital gains and losses.** Capital gains of corporations, except those derived from sales of shares, are treated as ordinary income. However, rollover relief is granted if gains derived from disposals of real estate are reinvested in real estate within the following four years and if certain other conditions are met.

Capital gains derived by corporations from sales of shares in corporations are generally exempt from corporate income tax and trade tax. Because 5% of the capital gain is deemed a nondeductible expense the exemption is effectively limited to 95% of the capital gain. This also applies to nonresident corporate sellers if they have owned at least 1% of the capital stock of a German company at any time during the five years preceding the sale and if the nonresident seller cannot claim treaty protection.

The 95% tax exemption for capital gains received by a corporate shareholder is not granted to banks, financial services institutions and financial enterprises (including holding companies) that purchase shares with the intention of realizing short-term profits for their own account.

However, to the extent that write-downs of the shares have previously been deducted, capital gains from sales of shares are not exempt.

Capital gains derived from the disposal of tainted shares are, in principle, 95% exempt from tax. Tainted shares may result from corporate reorganizations (for example, contributions of qualifying businesses or partnership interests into corporations in return for shares or share swaps) that are carried out at tax book values or below fair market values. The subsequent disposal of the tainted shares results in a (full or partial) retroactive taxation of the original reorganization that gave rise to the share taint. In general, after a seven-year holding period, the shares lose their taint.

In general, capital losses are deductible. However, capital losses are not deductible if a gain resulting from the underlying transaction would have been exempt from tax. Consequently, capital losses from sales of shares or write-downs on shares are not deductible. In addition, capital losses and write-downs on loans to related parties may not be deductible under certain circumstances.

**Administration.** The tax year is the calendar year. If a company adopts an accounting period that deviates from the calendar year, tax is assessed for the taxable income in the accounting period ending within the calendar year. The adoption of a tax year other than the calendar year requires the consent of the tax office.

Annual tax returns must be filed by 31 May of the year following the tax year. However, an extension to 31 December of the year following the tax year is usually granted if a licensed tax consultant prepares the return.

Payments made with respect to the estimated corporate income tax liability, usually determined at one-quarter of the liability for the previous year, are due on 10 March, 10 June, 10 September and 10 December. Prepayments of trade tax are due on 15 February, 15 May, 15 August and 15 November. Final payments are due one month after the tax assessment notice issued by the tax authorities is received by the taxpayer.

Late tax payments and tax refunds are generally subject to interest of 0.5% per month. Interest begins to accrue 15 months after the end of the calendar year for which the tax is assessed. The interest is not deductible for corporate income and trade tax purposes if the tax itself is not deductible. Late payment penalties are also charged at 1% a month if the unpaid balance is not settled within one month from the date of the assessment notice issued by the tax office. A penalty of up to 10% of the tax liability, but not more than EUR25,000, can be assessed if the tax return is not filed by the due date, including extensions granted.

**Dividends.** Dividends received by German corporations and branches of nonresident corporations from their German and foreign corporate subsidiaries are exempt from tax. However, effective from 1 March 2013, a minimum shareholding requirement of 10% applies for this participation exemption for corporate income tax purposes. In addition to this domestic rule, an applicable tax treaty may provide for an exemption for foreign dividends. Beginning from the 2014 tax year, the tax exemption for dividends is granted only if the dividend payment is not tax-deductible as a business expense at the level of the distributing entity (linking rule).

Five percent of the tax-exempt dividend income is treated as a nondeductible expense, while the expenses actually accrued are deductible. Consequently, only 95% of the dividends received by a corporation is effectively exempt from tax. The 95% tax exemption for dividends received by a corporate shareholder is not granted for portfolio dividends (less than 10% shareholding) or to banks, financial services institutions and financial enterprises (including holding companies) that purchase shares with the intention of realizing short-term profits for their own account.

The participation exemption applies for trade tax purposes if the dividends are received from corporations in which the parent

holds at least 15% as of 1 January of the calendar year in which the dividend distribution takes place. For dividends from EU corporations, the required minimum shareholding is 10%. For dividends of third-country corporations, the shares (minimum shareholding of 15%) must be held continuously since 1 January of the calendar year in which the dividend distribution takes place and the subsidiary's gross income must be realized exclusively or almost exclusively from active business. A tax exemption on the basis of a double tax treaty may apply for trade tax purposes.

**Foreign tax relief.** Under German domestic tax law, income from foreign sources, except for foreign dividends received by a qualifying corporate shareholder (see *Dividends*), is usually taxable, with a credit for the foreign income taxes paid, up to the amount of German tax payable on the foreign-source income, subject to per-country limitations. Excess foreign tax credit cannot be carried back or carried forward. Instead of a foreign tax credit, a deduction may be claimed for foreign income tax. This may be beneficial in loss years and in certain other instances. In general, German tax treaties provide for an exemption from German taxation of income from foreign real estate and foreign permanent establishments.

### C. Determination of trading income

**General.** Taxable income of corporations is based on the annual financial statements prepared under German generally accepted accounting principles (GAAP), subject to numerous adjustments for tax purposes. After the annual financial statements have been filed with the tax authorities, they may be changed only to the extent necessary to comply with GAAP and the tax laws.

Acquired goodwill must be capitalized for tax purposes and may be amortized over 15 years. Intangibles acquired individually must also be capitalized for tax purposes and may be amortized over their useful lives (normally between 5 and 10 years). A company's own research and development and start-up and formation expenses may not be capitalized for tax purposes. They must be currently expensed.

**Inventories.** Inventory is basically valued at acquisition cost or production cost, unless a lower value, in terms of the lower of reproduction or repurchase cost and market value, is indicated. Under certain conditions, the last-in, first-out (LIFO) method can be used to value inventory assets if the assets are of a similar type.

**Provisions.** In general, provisions established under German GAAP are accepted for tax purposes. However, in past years, the scope of tax-deductible provisions has been severely limited by certain rules, including, among others, the following:

- Liabilities or accruals of obligations whose fulfillment is contingent on future revenue or profit may be recorded only when the condition occurs.
- Provisions for foreseeable losses from open contracts may not be capitalized.
- Future benefits arising in connection with the fulfillment of an obligation must be offset against costs resulting from the obligation.
- Non-monetary obligations may be accrued using the direct cost and the necessary indirect cost.

- Provisions for obligations resulting from the operation of a business must be built up in equal increments over the period of operation.
- Provisions for pension obligations must be calculated on an actuarial basis using an interest rate of 6% and built up over the period of employment.

If built-in losses contained in the above provisions or liabilities materialize on their transfer at fair market value, the resulting losses may generally only be deducted for tax purposes over a period of 15 years.

Non-interest-bearing debt must be discounted at an annual rate of 5.5% if the remaining term exceeds 12 months.

**Depreciation.** For movable assets purchased or produced after 31 December 2007, tax depreciation must be calculated using the straight-line method (as an exception, the declining-balance method could have been applied for movable assets purchased or manufactured between 1 January 2009 and 31 December 2010). Useful lives of movable assets are published by the Federal Ministry of Finance, based primarily on tax audit experience; deviation from published useful life is possible, but requires justification by the taxpayer. Tax depreciation rates for buildings are provided by law. The Federal Ministry of Finance has published tax depreciation rates for movable fixed assets generally usable in trade and industry. Schedules for assets specific to certain industries are also available. The following are some of the straight-line rates under the general list.

Asset	Rate (%)
Office equipment	6 to 14
Motor vehicles	16.6
Plant and machinery	6 to 12.5
Airplanes	5
Personal computers or notebooks and related equipment	33.3
Nonresidential buildings (offices and factories)	
Constructed before 1 January 1925	2.5
Constructed after 31 December 1924 and application for the construction permit filed before 1 April 1985	2
Application for the construction permit filed after 31 March 1985	3*

\* The rate is 4% if the application for the construction permit was filed or the purchase agreement was dated before 1 January 2001.

**Mark-to-market rule.** Under a mark-to-market rule, a tax deduction for the write-down of an asset because of a permanent impairment in value is allowed only if the value is permanently lower. This rule is particularly relevant for assets that are not subject to ordinary depreciation, such as land or shares (however, write-downs of shares are not tax effective; see Section B). For assets that have been written down to their going-concern value, the write down must be reversed as soon as and to the extent that the asset has increased in value.

**Disallowed items.** After income for tax purposes has been determined, certain adjustments need to be made to calculate taxable

income. Major adjustments include the following nondeductible expenses:

- Income taxes (corporate income tax, solidarity surcharge and trade tax) and any interest expense paid with respect to these taxes
- Interest expenses (see *General interest expense limitation*)
- Penalties
- Fifty percent of supervisory board fees
- Thirty percent of business meal expenses
- Gifts to non-employees exceeding EUR35 per person per year and input value-added tax (VAT) regarding such expenses
- Expenses incurred in direct connection with tax-exempt income items (see the discussion of dividends in Section B)

In addition, as a result of the exemption for capital gains derived from sales of shares (see Section B), losses from sales of shares, write-downs of shares or, under certain circumstances, write-downs on loans to related parties are no longer deductible for tax purposes and must be added back to the tax base.

**General interest expense limitation.** The interest expense limitation rule applies to all loans (that is, group and third-party loans, regardless of recourse) and to businesses resident in Germany, companies residing abroad but maintaining a permanent establishment in Germany, and partnerships with a German branch.

Under the interest expense limitation rule, the deduction of interest expense exceeding interest income (net interest expense) is limited to 30% of taxable earnings before (net) interest, tax, depreciation and amortization (EBITDA). Tax-exempt income and partnership income are not considered in the calculation of the taxable EBITDA.

The limitation rule does not apply if one of the following exemption rules applies:

- Exemption threshold. The annual net interest expense is less than EUR3 million.
- Group clause. The company is not a member of a consolidated group (a group of companies that can be consolidated under International Financial Reporting Standards [IFRS]). The group clause does not apply if both of the following circumstances exist:
  - A shareholder who, directly or indirectly, holds more than 25% in the corporation or a related party of such shareholder grants a loan to the company.
  - The interest exceeds 10% of the company's net interest expense.
- Escape clause. The equity ratio of the German subgroup is at least as high as the equity ratio of the worldwide group (within a 2% margin). A "group" is defined as a group of entities that could be consolidated under IFRS, regardless of whether a consolidation has been actually carried out. The equity ratio is calculated on the basis of the IFRS/US GAAP/EU local country GAAP consolidated balance sheet of the ultimate parent. The same accounting standard is applied to a German group but subject to several complex technical adjustments, such as a deduction for unconsolidated subsidiaries. The access to the escape clause is limited in the case of certain loans from non-consolidated shareholders (related party debt exception).

Unused EBITDA can be carried forward over a five-year period. However, the carryforward does not apply if one of the above-mentioned exemptions from the interest expense limitation rule applies. The EBITDA carryforward is forfeited in the course of reorganizations but not under the loss-trafficking rules (see *Tax losses*).

Nondeductible interest expense can be carried forward indefinitely but is subject to the loss-trafficking rules (see *Tax losses*). A deduction is possible in the following years in accordance with the interest expense limitation rules. The nondeductibility is final in the case of a transfer, merger, termination or liquidation of the business or in the case of a permanent excess of limitation amounts (that is, net interest expense is permanently higher than 30% of the taxable EBITDA and the exemption clauses are not fulfilled; as a result, the deduction of all of the interest expense is permanently not achievable).

The interest expense limitation rules may be incompatible with German constitutional law according to the German Federal Tax Court, which has recently referred the case to the German Constitutional Court.

**Constructive distributions of income.** Adjustments to taxable income as a result of a violation of arm's-length principles are deemed to be constructive distributions of income (see the discussion of transfer pricing in Section E).

**Tax losses.** Tax losses may be carried forward without time limitation. Under the restrictions of the so-called minimum taxation, only 60% of annual taxable profits in excess of EUR1 million can be offset by loss carryforwards. As a result, 40% of the portion of profit exceeding EUR1 million is subject to tax.

This tax loss carryforward rule applies for both corporate income tax purposes and trade tax purposes. For corporate income tax (not trade tax) purposes, an optional loss carryback is permitted for one year up to the maximum amount of EUR1 million.

Under the German loss-trafficking rule, tax loss carryforwards are forfeited proportionally if, within a five-year period, more than 25% of the shares of a loss-making entity are directly or indirectly transferred to a single new shareholder or a group of shareholders. If, within a five-year period, more than 50% of the shares are transferred, the entire loss carryforward is forfeited. To prevent abuse of the rule, the rule includes a measure under which investors with common interests and acting together are deemed to be one acquirer for the purposes of the rule.

The following exceptions apply to the loss-trafficking rule:

- Insolvency restructuring exception (under suspension). For share transfers after 31 December 2007, the loss-trafficking rule does not apply if the intention for the transfer of the shares is the removal or prevention of the insolvency or overindebtedness of the loss-making company and if the structural integrity of the company remains unchanged. The application of the exception is currently suspended because the European Commission considers the exception to be unlawful state aid.

- **Group restructuring exception.** A transfer of shares is not considered to be harmful if, after a direct or indirect transfer, “the same person” owns directly or indirectly 100% of the transferor and transferee. A draft bill currently under discussion may provide for an even broader scope of the group restructuring exception (possibly with retroactive effect) if accepted by the lawmakers.
- **Built-in gain exception.** For harmful share transfers, a loss carry-forward is not forfeited up to the amount of built-in gains to the extent that these built-in gains are taxable in Germany. Consequently, built-in gains allocable to subsidiaries are not taken into account; see the discussion of capital gains and losses in Section B.

Loss carryforwards are also forfeited in the course of a merger, change of legal form and liquidation of the loss-making company.

**Groups of companies.** German tax law provides a tax consolidation for a German group of companies (*Organschaft*), which allows losses of group companies to be offset against profits of other group companies. Only German resident companies in which the parent company has held directly or indirectly the majority of the voting rights since the beginning of the fiscal year of the subsidiary may be included (this requirement is known as financial integration). A tax consolidation may cover corporate income tax, trade tax and VAT. To make the *Organschaft* effective for corporate income tax and trade tax purposes, the parent company and the German subsidiaries must enter into a profit-and-loss absorption agreement (*Gewinnabführungsvertrag*) for a minimum period of five years. Partnerships do not qualify as subsidiaries in an *Organschaft*.

An *Organschaft* subsidiary must have its place of management in Germany and its legal seat in Germany or an EU/European Economic Area member state.

A domestic or foreign corporation, individual or partnership may become the head of an *Organschaft* if, in addition to the above requirements, the following requirements are met:

- The company has an active trade or business (generally assumed for corporations).
- The investments in the subsidiaries are assets of a German branch.
- The branch profits (including the income of the subsidiaries) are subject to German taxation for both domestic direct tax and tax treaty purposes.

The *Organschaft* for VAT requires the following:

- Financial integration (see above).
- Economic integration of the lower-tier entities. Economic integration exists if the business activities of the members of the group complement each other.
- Integration in organizational matters. Organizational integration exists if the group parent is able to impose its will on the group members and does so in the day-to-day business.

In contrast to the other *Organschaft* forms, *Organschaft* for VAT can begin and end during the course of the fiscal year.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Real property tax, on assessed standard value of real property; rate varies by municipality	0.65 to 2.83
Real estate transfer tax (RETT), on sales and transfers of real property, including buildings, and on certain transactions that are deemed to be equivalent to transfers of real property, such as the assignment of at least 95% of the shares of a German or foreign company that holds the title to domestic real property (however, a group exception may apply); levied on the purchase price of the real property or, in certain situations (such as when at least 95% of the shares of a real estate-owning company are transferred), on the assessed standard value of the real property	
Rate for real estate located in Bavaria and Saxony	3.5
Rate for real estate located in Hamburg	4.5
Rate for real estate located in Baden-Württemberg, Brandenburg, Bremen, Lower Saxony, Mecklenburg-West Pomerania, Rhineland-Palatinate, Saxony-Anhalt and Thuringia	5
Rate for real estate located in Berlin and Hesse	6
Rate for real estate located in North Rhine-Westphalia, Saarland and Schleswig-Holstein	6.5
Value-added tax (VAT or Umsatzsteuer); on application, foreign enterprises may receive refunds of German VAT paid if they are neither established nor registered for VAT purposes in Germany; this application must be filed by non-EU enterprises by 30 June and by EU enterprises by 30 September, in the year following the year in which the invoice was received by the claimant)	
Standard rate	19
Reduced rate	7

## E. Miscellaneous matters

**Foreign losses.** In principle, losses incurred by foreign permanent establishments are not deductible if a German tax treaty provides that a permanent establishment's income is taxable only in the country where it is located. However, these losses may be taken into account if they are incurred in non-treaty countries or if a tax treaty provides for the credit method, subject to the condition that the foreign branch is engaged in a specified active trade.

Based on German Federal Court decisions, an EU branch's losses are, in principle, deductible in Germany if the losses cannot be utilized for actual reasons in the respective EU country. These so-called final losses should be allowed, for example, if the branch is sold or transferred to another company, closed down or converted into a corporation. However, losses do not qualify as final if they cannot be utilized in the EU country because they are forfeited or have expired under the EU country's loss carryforward regulations.

**Foreign-exchange controls.** No controls are imposed on the transfer of money in and out of Germany. However, specific reporting requirements for certain transactions must be met.

**Debt-to-equity rules.** The interest expense limitation rule (see Section C) replaced the former thin-capitalization rules. Consequently, no statutory debt-to-equity ratio currently applies.

**Anti-avoidance legislation.** Several tax laws contain anti-avoidance legislation. The Corporate Income Tax Act deals with constructive dividends by corporations, both in Germany and abroad. The Foreign Transactions Tax Act deals with all kinds of related or affiliated taxpayers, such as individuals, partnerships and corporations, and is restricted to cross-border transactions. It contains extensive provisions on controlled foreign company (CFC) and passive foreign investment company income. The General Tax Code contains a general anti-abuse rule stating that a tax liability cannot be effectively avoided by an abuse of legal forms and methods if obtaining a tax advantage is the only reason for such an arrangement.

The Income Tax Act provides anti-abuse rules that are aimed at preventing the unjustified reduction of German withholding taxes under a tax treaty, under the EU Parent-Subsidiary Directive or under the EU Interest-Royalty Directive (treaty or directive shopping). The 2007 Annual Tax Act tightened the so-called “anti-treaty shopping” rule and imposed an increased substance requirement for foreign receiving entities. Effective from 1 January 2012, the German anti-treaty-shopping rule was changed to conform with EU law. However, the increased substance requirement must still be fulfilled (see Section F).

Germany’s newer tax treaties include “switch-over” clauses as well as “subject-to-tax” clauses. Domestic treaty-overriding rules, which are aimed at preventing double non-taxation, also exist.

**Transfer pricing.** German tax law contains a set of rules that allow the adjustment of transfer prices. These rules include general measures on constructive dividend payments and constructive contributions and a specific adjustment provision in the CFC legislation. All of the measures mentioned in the preceding sentence are based on the arm’s-length principle. Germany has implemented the Authorized Organisation for Economic Co-operation and Development (OECD) Approach (AOA). As a result, permanent establishments and partnerships are now treated as separate entities, as corporations are treated.

The Foreign Transactions Tax Act now expressly provides that the preferential basis for determining the transfer price is the standard-price methods (comparable uncontrolled price method, resale-minus method and cost-plus method) if comparable transactions can be determined. In addition, the code contains express language with respect to the determination of the arm’s-length character of a transfer price if no comparables can be found. Effective from 1 January 2008, a special set of rules directed at securing the German tax revenue have been incorporated into the code. These rules deal with the determination of transfer prices in the event of a transfer of business functions abroad.

Specific documentation rules apply for transfer-pricing purposes. On request of a tax auditor, the taxpayer is required to submit the transfer-pricing documentation within 60 days (in the case of extraordinary business transactions, within 30 days). Non-compliance with these rules may result in a penalty of EUR100 per day of delay up to a maximum of EUR1 million. If no documentation is provided or if the documentation is unusable or insufficient, a surcharge of 5% to 10% of the income adjustment is applied with a minimum surcharge of EUR5,000.

**Real estate investment trusts.** Effective from 1 January 2007, Germany introduced the real estate investment trust (REIT), which is a tax-exempt entity. In general, an REIT is a listed German stock corporation (AG) that satisfies certain conditions, including, but not limited to, the following:

- It has a free float (volume of shares traded on the stock exchange) at the time of listing of at least 25%.
- Its real estate assets account for at least 75% of its gross assets.
- Rental income from real estate accounts for at least 75% of its total income.
- Ninety percent of its income is distributed to its shareholders.

**Mutual assistance.** Germany exchanges tax-relevant information with various countries based on tax treaties, other bilateral agreements (for example, the Foreign Account Tax Compliance Act [FATCA] agreement between Germany and the United States) and the EU Mutual Assistance Directive. The directive has been incorporated into German law and will allow exchange of information within the EU from 1 January 2015 for the 2014 tax year and subsequent tax years.

## F. Treaty withholding tax rates

The rates listed below reflect the lower of the treaty rate, the rate under domestic tax law or the rate under the EU Parent-Subsidiary Directive, which has been incorporated into the German Income Tax Act (Section 43b ITA).

Under the amended German anti-treaty shopping rules, effective from 1 January 2012, tax relief is denied if and to the extent that the foreign company does not earn its gross income from its own economic activities and if at least one of the following two conditions is met:

- For income not resulting from the foreign company's own economic activity, no economic or other relevant reason exists to interpose the foreign company.
- The foreign company does not participate in the general marketplace with appropriately equipped business premises.

In addition, a foreign company not earning its gross income from its own economic activities has the burden of proof that the above-mentioned conditions are not met and, as a result, the withholding tax relief should be granted; that is, the foreign company has the burden of proof with respect to the existence of economic or other relevant reasons for its interposition and the burden of proof with respect to its business substance. If a foreign company earns its gross income from genuine economic activities, no business purpose test or substance test as mentioned above is required for the application of the tax relief under a treaty or an EU directive. If a

foreign company earns income from both genuine economic activities and non-genuine economic activities and if, with respect to the non-genuine business activities, the business purpose and substance tests are met, the foreign company can obtain tax relief under EU law and/or the applicable tax treaty, regardless of the fulfillment of any percentage threshold for the income from genuine economic activities. If either of the conditions is not met, then the relief is denied for the income from non-genuine economic activities.

- (1) These rates also apply to silent partnership income. Under German tax law, income from a silent partnership is regarded as a dividend if the silent partnership is characterized as a typical silent partnership. Profits from an atypical silent partnership are considered business profits. Income from participation rights (Genussrechte) is treated as a dividend if the holder participates in profits and liquidation results. Otherwise, the income from participation rights is considered to be interest for treaty purposes.
- (2) German interest withholding tax is imposed only on interest paid by financial institutions, on interest from over-the-counter business and on interest payments on convertible and profit-sharing bonds and participating loans (for details, see footnote (g) to Section A). In addition, interest on loans secured

by fixed property located in Germany is subject to a limited German tax liability; tax on such interest is not imposed by withholding tax but by the issuance of an assessment notice on the filing of a tax return. If not otherwise noted, the treaty withholding tax rate also reduces the German statutory tax rate for interest on loans secured by fixed property located in Germany.

- (a) The rate applies if the income is subject to tax in the other state.
- (b) The rate is 2% (0% under the Latvia and Lithuania treaties) for interest on loans granted by banks or for interest on loans granted in connection with sales on credit of industrial, commercial or scientific equipment or sales of merchandise or services between enterprises.
- (c) Silent partnership income is taxed at the domestic rate of 25% (reduced on application for refund to 15% if the recipient is a corporation and if the German anti-treaty shopping rules do not apply).
- (d) Interest on participating loans and profit-sharing bonds is taxed at 25% (reduced on application for refund to 15% if the recipient is a corporation and if the German anti-treaty shopping rules do not apply).
- (e) Under the Bolivia and Kazakhstan treaties, interest is exempt from withholding tax if it is paid to a contracting state. Under the other treaties, interest paid to the contracting states or subdivisions or paid to certain banks may be exempt from withholding tax.
- (f) A 10% rate (0% under the Belarus treaty) may apply to certain types of interest, such as interest paid on bank loans, or interest paid in connection with the sale of industrial, commercial or scientific equipment or with financing activities in the public sector.
- (g) Interest on convertible bonds and profit-sharing bonds is taxed at 15%.
- (h) Interest paid to an enterprise is exempt from withholding tax if either of the following applies:
  - The recipient is a company owning more than 25% of the paying company.
  - The interest is derived from bonds other than commercial bills of exchange.
- (i) Interest on securities issued by a contracting state or subdivision thereof or paid to certain state banks or to a contracting state or subdivision thereof is exempt from withholding tax.
- (j) Interest on loans secured by immovable property located in Germany may be subject to the 15% (25% until 2007) corporate income tax rate.
- (k) Interest payments to banks or on loans granted by banks may be subject to a 10% withholding tax rate.
- (l) A 0% rate applies to royalties for the use of, or right to use, scientific rights, patents, marks, samples, models, plans, formulas or procedures, as well as to royalties for the disclosure of industrial, commercial or scientific know-how.
- (m) Interest payments to a company that is genuinely carrying on a banking enterprise or is controlled by one or more companies genuinely carrying on such an enterprise are exempt from tax.
- (n) Royalties for motion picture films are treated as business profits.
- (o) Interest is exempt from withholding tax in Germany if the recipient is the government, the Central Bank of Azerbaijan or the national petroleum funds. Interest is exempt from withholding tax in Azerbaijan if it is paid on a loan guaranteed by the German government or if the recipient is the government, the German Central Bank, the Reconstruction Loan Corporation or the German Investment and Development Company (DEG).
- (p) Trademark royalties are taxed at a rate of 25%.
- (q) Copyright royalties for literary, dramatic, musical or artistic works (except motion picture films or television videotapes for Canada and Israel) are exempt from withholding tax.
- (r) For royalties with respect to the use of technical, commercial or scientific equipment, the rate is reduced to 0% under the Canada treaty, to 7% under the China treaty, to 5% under the Estonia, Latvia and Lithuania treaties, to 2% under the Korea treaty and to 3% under the Uzbekistan treaty.
- (s) Agreement has been reached on a new tax treaty, but the content has not yet been published.
- (t) A 0% rate applies to royalties for the use of, or the right to use, copyrights, including those for films and television. For Tunisia, the rate is 10% and does not apply to film and television copyrights. For Finland and Tunisia, copyrights specifically include those for literary, scientific and artistic works. For Trinidad and Tobago, they specifically exclude film and television copyrights. Under the Belarus treaty, the rate is 5% for royalties paid for the use of, or the right to use, copyrights of literary and artistic works, including films, television and broadcasts.
- (u) This treaty does not apply to the Hong Kong and Macau Special Administrative Regions (SARs). A new double tax treaty with China was signed in March 2014 but, at the time of writing, it had not yet entered into force. Withholding tax rates under the new double tax treaty will be 5% and 10% for dividends and 10% for interest and royalties.

- (v) A 20% rate applies to payments made for trademarks or for copyrights, excluding motion picture films or tapes for television or broadcasting.
- (w) Royalties for copyrights of literary or artistic works, motion picture films, or television or broadcasting are taxed at 20% (Philippines, 15%).
- (x) Royalties for copyrights of literary, artistic or scientific works are taxed at 5%.
- (y) The treaty withholding tax rate increases to 15% (Albania, Estonia, Mongolia, Switzerland, Syria, Ukraine and United Arab Emirates, 10%; Georgia, 5%/10%; United States, 5%/15%; Vietnam, 10%/15%; Iran, Thailand, Trinidad and Tobago and Zimbabwe, 20%) if the recipient is not a corporation owning at least 25% (Algeria, Austria, Bulgaria, Canada, Croatia, Cyprus, Denmark, France, Ghana, Hungary, Ireland, Kuwait, Macedonia, Malaysia, Malta, Mauritius, Mexico, Mongolia, Namibia, Poland, Romania, Russian Federation, Singapore, Spain, Syria, Tajikistan, United Arab Emirates, United Kingdom and Uruguay, 10%; Georgia, 10%/50%; United States, 10%/80%; Venezuela, 15%; Belarus, Pakistan, Switzerland and Ukraine, 20%; Vietnam, 70%/25%) of the distributing corporation or if the participation does not have a specific value (Azerbaijan EUR150,000; Belarus EUR81,806.70; Georgia EUR3 million/EUR100,000). Under the treaty with the United Arab Emirates, a tax rate of 15% applies to real estate investment corporations that are not or only partially subject to tax.
- (z) A 0% rate may apply under the EU-Switzerland treaty.
- (aa) The United States treaty provides for a 0% rate if the participation is at least 80% for a period of 12 months and if the conditions of the Limitation of Benefit test under Article 28 are fulfilled.
- (bb) The rate is reduced to 0% for interest paid on a loan guaranteed by Hermes-Deckung (this relates to security given by the German government for loans in connection with deliveries by German suppliers to foreign customers, particularly customers in developing countries).
- (cc) The rate is reduced to 10% for royalties for the use of commercial or scientific equipment.
- (dd) The 7.5% rate applies to dividends paid to companies owning at least 25% of the voting shares of the payer. A 15% rate applies if a recipient company owns less than 25% of the voting shares and if it is subject to tax on such dividend income. Otherwise the full domestic German rate applies.
- (ee) The withholding tax rate applicable to fees for technical services is 7.5%.
- (ff) Germany has agreed with the Czech Republic and the Slovak Republic to apply the treaty with the former Czechoslovakia.
- (gg) Germany honors the USSR treaty with respect to all former Soviet republics except for Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, the Russian Federation and Ukraine. This has been acknowledged by Armenia, Moldova and Turkmenistan. Germany has entered into tax treaties with Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, the Russian Federation, Tajikistan, Ukraine and Uzbekistan. Withholding tax rates under these treaties are listed in the above table. Germany is engaged in tax treaty negotiations with Armenia and Turkmenistan.
- (hh) The treaty with the former Yugoslavia applies to Bosnia and Herzegovina, Kosovo, Montenegro and Serbia. Germany has entered into tax treaties with Croatia, Macedonia and Slovenia. The tax rates under these treaties are listed in the table above.
- (ii) Dividends distributed by a German subsidiary to an EU parent company are exempt from withholding tax if the recipient owns 10% or more of the subsidiary. This exemption also applies if the participation is 10% or more and if the EU country where the parent company is located provides the exemption reciprocally. If the EU directive does not apply, the following rules apply:
- The withholding tax rate increases to 5% (Finland and Netherlands, 10%) if the recipient owns at least 10% (Czechoslovakia, Estonia, Finland, Italy, Latvia, Lithuania, Netherlands and Slovenia, 25%) of the distributing company.
  - For Belgium, Czechoslovakia, Greece, Italy, Portugal and Sweden, the withholding tax rate increases to 15% (Ireland, 10%; Greece, 25%) for all shareholdings (under the Sweden treaty, only for shareholdings of less than 10%). Under the United Kingdom treaty, a rate of 10% applies for dividend payments to pension schemes.
- (jj) The rate is 5% for interest on loans granted by banks.
- (kk) The rate is reduced to 5% as long as German domestic law does not impose withholding tax on interest payments to nonresidents.
- (ll) The rate is 0% in connection with sales of merchandise.
- (mm) The rate is reduced to 7.5% for royalties in connection with the use of technical equipment.

- (nn) Under the Tajikistan treaty, the 5% rate applies to the following:
- Royalties for the use of, or the right to use, copyrights of literary or artistic works, including motion picture films, or for the use of, or the right to use, names, pictures or similar personal rights
  - Royalties for the recording of artistic or athletic shows for television or radio broadcasting
  - Royalties for the use of, or the right to use, scientific rights, patents, trademarks, samples, models, plans, formulas or procedures for commercial and industrial or scientific know-how
- Under the Azerbaijan treaty, a 10% rate applies to the royalties described in the first two bullets above, while a 5% rate applies to the royalties described in the third bullet.
- (oo) Under the 2009 Annual Tax Act, the rate may be reduced to 15% if the nonresident dividend recipient qualifies under the German anti-treaty shopping rules.
- (pp) A 5.5% solidarity surcharge applies.
- (qq) The 0% rate applies to corporations if, at the time the dividend distribution takes place, the recipient has held a direct and continuous shareholding of at least 10% of the voting rights for the last 12 months. The withholding tax rate is increased to 5% if the corporation does not fulfill the requirement of 10% of the voting rights for the last 12 months before the dividend distribution. However, on application, the 5% tax can be refunded if the requirement of 10% of the voting rights for a continuous 12 months is fulfilled after the dividend distribution has taken place. A 15% withholding tax rate applies in all other cases.

Germany has initialed and/or signed new tax treaties with Armenia, Belgium, China, Costa Rica, Croatia, Ecuador, Egypt, Finland, France, Greece, Iceland, Ireland, Israel, Jersey, Macedonia, the Netherlands, Norway, Oman, the Philippines, Poland, Singapore, South Africa, Sri Lanka, Tunisia, Turkmenistan and the United Kingdom. At the time of writing, the domestic legal procedures for the entry into force of those treaties had not yet been concluded.

Germany is negotiating or renegotiating tax treaties with Argentina, Australia, Canada, Colombia, Denmark, Ghana, the Hong Kong SAR, India, Indonesia, Japan, Jordan, Korea (South), Kuwait, Kyrgyzstan, Liberia, Mexico, Morocco, Namibia, Portugal, Qatar, Rwanda, Serbia, South Africa, Sweden, Switzerland, Tajikistan, Thailand, Trinidad and Tobago, Ukraine, Uzbekistan and Vietnam.

## A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	25
Withholding Tax (%) (a)	
Dividends	8 (b)
Interest	8 (b)
Royalties	15 (c)
Management and Technology Transfer Fees	20 (c)
Directors' Fees	10
Technical Service Fees	20 (c)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0 (d)
Carryforward	5 (e)

(a) Applicable to payments to residents and nonresidents.

(b) This is a final tax for both residents and nonresidents without a permanent establishment in Ghana.

- (c) This is a final tax for nonresidents without a permanent establishment in Ghana only.
- (d) Losses incurred on completion of long-term contracts may be carried back to prior tax years.
- (e) This applies to enterprises engaged in agro-processing, tourism, information and communication technology, mining, farming or manufacturing for export. For this purpose, a tourism enterprise is the operator of a tourism business registered with the Ghana Tourist Board, an information and communication technology business is a business that is engaged in software development, and a manufacturing-for-export business is a business that manufactures primarily for export. In addition, losses incurred by venture capital financing companies on the disposal of shares invested in venture capital subsidiary companies under Act 684 and losses incurred by qualifying venture capital financing companies on shares in any venture may be carried forward for five years after the disposal of the shares.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their income accruing in or derived from Ghana and on their income brought into or received in Ghana. A company is resident in Ghana if it is incorporated under the laws of Ghana or if its management and control are exercised in Ghana. Nonresident companies are subject to tax only on their income accruing in or derived from Ghana.

**Rates of corporate tax.** The standard corporate income tax rate is 25%. However, various other tax rates apply to income derived from specified business activities.

Income derived from non-traditional exports is taxed at a rate of 8%. Income derived by banks from loans granted to farming enterprises is subject to tax at a rate of 20%. The rate of tax applicable to income derived by financial institutions from loans to leasing companies is 20%.

Rural or community banks are subject to tax at a rate of 8% after a 10-year period of exemption.

The corporate income tax rate applicable to companies principally engaged in the hotel industry is 20%.

For petroleum extracting companies, the tax rate is 50%. However, petroleum agreements signed with the government of Ghana provide for a 35% tax rate. After a company has recovered all outlays from an oil field plus a specified rate of return after deduction of tax, royalties and an inflation adjustment, the government may negotiate for an additional share of the crude oil profits.

Mining companies are subject to corporate income tax at a rate of 35%. A holder of a mining lease, restricted mining lease or small-scale mining license must pay a royalty with respect to minerals obtained from its mining operations in Ghana. The royalty is calculated at a rate of 5% of the monthly revenue earned from minerals obtained by the holder.

*Tax incentives.* Ghana offers tax exemptions and tax reductions to companies engaged in specified industrial activities.

Income derived by companies from the business of constructing affordable low-cost residential premises for lease or sale is exempt from tax for a period of five tax years (years of assessment). The tax-exemption period begins with the tax year in which the

company begins its operations. If the company's accounting year differs from the calendar year, the beginning of the tax-exemption period is the tax year in which the accounting period of the first year of operations begins.

Rural banks are exempt from tax for their first 10 years of operation.

The income of a venture capital financing company is exempt for five years if the company satisfies the eligibility requirements for funding under the Venture Capital Trust Fund Act. The tax-exemption period begins with the tax year in which the company's operations begin.

Cocoa farmers are exempt from tax on income derived from cocoa. Cattle ranchers are exempt from tax for the first 10 tax years. Income derived from tree crops, such as coffee, oil palm, shea nut, rubber and coconut, is exempt from tax for 10 years following the first harvest. For a company's first five years of operation, income derived from livestock (other than cattle), fishing and cash crops, such as maize, rice, pineapple, cassava and yam, is exempt from tax.

Income of a company from an agro-processing business established in Ghana in or after the tax year beginning 1 January 2004 is exempt from tax for a period of five tax years. The tax-exemption period begins with the tax year in which the company begins commercial production. If the company's accounting year differs from the calendar year, the beginning of the tax-exemption period is the tax year in which the accounting period of the first year of production begins.

Income of a company that commercially produces cocoa by-products derived from substandard cocoa beans, cocoa husks and other cocoa waste as the principal raw materials is exempt from tax for a period of five tax years. The tax-exemption period begins with the tax year in which the company begins commercial production. If the company's accounting year differs from the calendar year, the beginning of the tax-exemption period is the tax year in which the accounting period of the first year of production begins.

The companies described in the preceding two paragraphs are also subject to a reduced tax rate after the end of the five-year tax holiday. The reduced rate varies according to the location of the business, as described in the following table.

<b>Location</b>	<b>Rate (%)</b>
Accra and Tema	20
Other regional capitals except in Northern, Upper East and Upper West regions	10
Northern, Upper East and Upper West regions, and outside capitals of other regions	0

The income of a company whose principal activity is the processing of waste, including recycling of plastic and polythene material for agricultural or commercial purposes, is exempt from tax for a period of seven tax years. The tax-exemption period begins with the tax year in which the company begins its operations. If the company's accounting year differs from the calendar year, the

beginning of the tax-exemption period is the tax year in which the accounting period of the first year of operations begins.

Nonresident companies engaged in air and sea transportation are exempt from tax if the Commissioner-General of the Ghana Revenue Authority (GRA) is satisfied that the same types of companies resident in Ghana are granted an equivalent exemption by the nonresident company's country of residence.

Manufacturing enterprises other than those engaged in agro-processing and the production of cocoa by-products, as described above, located in regional capitals other than Accra and Tema are entitled to a 25% income tax rebate, while manufacturing enterprises located outside regional capitals are entitled to a 50% tax rebate.

**Capital gains.** Capital gains on chargeable assets are subject to tax at a rate of 15%. Capital losses do not offset capital gain and may not be carried forward.

Capital gains tax is imposed on gains derived from the disposal of the following assets:

- Buildings.
- Businesses and business assets, including goodwill. However, the following assets are excluded:
  - Assets acquired in mergers, amalgamations and reorganizations of companies if continuity of underlying ownership in the assets of at least 25% exists.
  - Trading stock.
  - Classes 1, 2 and 4 depreciable assets (see Section C).
- Land other than agricultural land.
- Shares other than those publicly traded on the Ghana Stock Exchange. Shares that are traded on the Ghana Stock Exchange are exempt from capital gains tax for the first 25 years of establishment of the Ghana Stock Exchange.

To calculate capital gains, the cost basis of the asset is deducted from the proceeds received on the disposal of the asset. The cost basis of a chargeable asset is the sum of the following:

- Cost of the asset including incidental costs
- Expenditure incurred to alter or improve the asset
- Expenditure relating or incidental to the disposal of the asset

Capital gains are exempt from tax if the amount received on the disposal of an asset is wholly used to acquire a similar asset within a year of the disposal or if the gain is less than GHS50.

**Administration.** The Ghana Revenue Authority (GRA) is responsible for the administration and collection of all taxes, including corporate income tax, capital gains tax and gift tax.

The tax year (year of assessment) is the calendar year. If a company's accounting year differs from the calendar year, its basis period for a year of assessment is the accounting year ending within the tax year.

Companies must file their tax returns within four months after the end of their accounting year.

Assessed tax must be paid within 30 days of receipt of notice of assessment from the Commissioner-General of the GRA. The Commissioner-General may compute a provisional assessment,

which is payable in quarterly installments by 31 March, 30 June, 30 September and 31 December of the tax year if the company's accounting year is the calendar year. In general, companies whose accounting year differs from the tax year must make quarterly payments at the end of the third, sixth, ninth and twelfth months of their accounting year.

Companies that fail to pay tax by the due date may be charged a penalty in addition to the tax payable. Failure to pay tax for a period of not more than three months results in a penalty of 10% of the tax payable. Failure to pay tax for a period exceeding three months results in a penalty of 20% of the tax payable.

Companies that fail to pay by the due date any tax that they are required to withhold and pay to the Commissioner-General may be liable for a penalty in addition to the tax payable. Companies that fail to pay the withheld tax for a period of not more than three months are liable to a penalty equal to 20% of the tax payable. Failure to pay the withheld tax for periods exceeding three months may result in a penalty equal to 30% of the tax payable.

To make tax collection more efficient, taxpayers are segmented into the following three categories:

- Large taxpayers: taxpayers with turnover of GHS5 million and above
- Medium taxpayers: taxpayers with turnover falling between GHS90,000 and GHS5 million
- Small taxpayers: taxpayers with turnover lower than the value-added tax (VAT) threshold of GHS90,000

**Dividends.** An 8% withholding tax is imposed on dividends paid to residents and nonresidents without a permanent establishment in Ghana. This is a final tax.

**Foreign tax relief.** Foreign tax paid on foreign income is allowed as a credit against tax payable with respect to the foreign income received in Ghana. The amount of tax chargeable with respect to the income is reduced by the amount of the credit.

### C. Determination of trading income

**General.** Chargeable income is based on the income reported in entities' financial statements, subject to certain adjustments.

To be deductible, expenses must be wholly, exclusively and necessarily incurred in the production of income by the company during the financial year. Expenses that may be deducted include the following:

- Interest
- Rent
- Repair of plant, premises, machinery and fixtures
- Bad debts (see *Provisions*)
- Research and development expenditure
- Foreign-exchange losses (see *Foreign-exchange gains and losses*)

If the Commissioner-General of the GRA believes that profits reported by a local subsidiary of a nonresident company are unrealistic, the Commissioner-General may compute the entity's profits by applying to the consolidated profits of its group a ratio of the local entity's turnover to the group's worldwide turnover (this is an anti-avoidance rule in the income tax law; see Section E).

**Foreign-exchange gains and losses.** Foreign-exchange gains and losses are not taken into account in the tax computation until they are realized. Foreign-exchange gain or loss is realized when the liability under a contract in foreign currency is discharged or when the right to receive foreign currency under a contract is satisfied by actual receipt. No foreign-exchange gains or losses are recognized with respect to transactions engaged in by residents that could reasonably be expected to be conducted in local currency. Foreign-exchange losses of a capital nature may be capitalized and depreciated at a rate of 10% using the straight-line method. A company may claim a deduction for foreign-exchange losses only if it notifies the Commissioner-General of the GRA in writing of the existence of the debt claim, debt obligation or foreign-exchange holding on which the loss was incurred. Such notification must be made by the due date for filing the income tax return for the accounting year in which the debt arose or the foreign currency was acquired (for companies whose accounting year differs from the calendar year, the tax year is the year in which their accounting year begins).

If a person enters into separate transactions that result in a foreign-exchange gain and a foreign-exchange loss and if the transaction resulting in the foreign-exchange loss would not have been entered into had the transaction resulting in the foreign-exchange loss not occurred or vice versa, the foreign-exchange loss is deductible only to the extent of the amount of the foreign-exchange gain.

**Inventories.** Inventories may be accounted for using the first-in, first-out (FIFO) method or the average-cost method. After a company selects one of these methods, it must use the same method consistently from period to period. A company can change the method only with the written permission of the Commissioner-General of the GRA.

**Provisions.** Bad debts incurred in business are deductible if the company proves to the satisfaction of the Commissioner-General of the GRA that the debts have become bad. Under the Tax Act, provisions for bad and doubtful debts are not allowed for tax purposes.

All amounts recovered with respect to bad debts that were deducted must be included in income for the accounting year of the recovery.

**Capital allowances (tax depreciation).** Capital allowances are granted on depreciable assets. Depreciable assets are classified into six different classes. Assets in Classes 1, 2, and 4 are placed in separate pools, and capital allowances granted with respect to the pool. Capital allowances for Classes 3, 5 and 6 assets are granted on individual assets of the same class. To claim capital allowances, a company must satisfy the following conditions:

- It used the asset in the production of the income.
- It incurred cost in purchasing the asset.
- It notified the Commissioner-General of the GRA within one month after putting the asset to use.

The following table presents the various classes of assets and details for calculating their capital allowances.

<b>Class</b>	<b>Assets</b>	<b>Rate %</b>	<b>Formula for calculating capital allowances</b>
1	Computers and data handling equipment	40	$(A \times B \times C) \div 365$ (a)
2	Automobiles; buses and minibuses; goods vehicles; construction and earth-moving equipment, heavy general purpose or specialized trucks; trailers and trailer-mounted containers; plant and machinery used in manufacturing; and costs of a capital nature with respect to long-term crop planting costs	30	$(A \times B \times C) \div 365$ (a)
3	Mineral and petroleum exploration and production rights; mineral and petroleum prospecting, exploration and development costs; buildings, structures and works of a permanent nature used with respect to the assets in this category described above that are likely to be of little or no value when the rights are exhausted or the prospecting, exploration or development ends; and plant and machinery used in mining or petroleum operations	20	$(A \times B \times C) \div 365$ (b)(c)
4	Railroad cars, locomotives and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft; specialized public utility plant, equipment, and machinery; office furniture, fixtures and equipment; and any depreciable asset not included in another class	20	$(A \times B \times C) \div 365$ (a)

Class	Assets	Rate %	Formula for calculating capital allowances
5	Buildings, structures and works of a permanent nature other than those included in Class 3	10	$(A \times B \times C) \div 365$ (b)(c)
6	Intangible assets other than those included in Class 3	– (d)	$[(A \div D) \times C] \div 365$ (c)(e)

- (a) A is the written-down value of the pool at the end of a basis period, B is the depreciation rate applicable to the pool, and C is the number of days in the period.
- (b) A is the cost base of the asset, B is the depreciation rate, and C is the number of days in the basis period.
- (c) The total amount of capital allowances granted for a Class 3, 5 or 6 asset may not exceed the cost basis of the asset.
- (d) The rate is determined by formula.
- (e) A is the cost base of the asset, C is the number of days in the basis period, and D is the useful life of the asset in whole years calculated at the time the asset is acquired.

**Relief for losses.** Enterprises engaged in mining, farming, agro-processing, tourism, information and communication technology or manufacturing for export may carry forward their losses for five years. For this purpose, a tourism enterprise is defined as the operator of a tourism business registered with the Ghana Tourist Board, an information technology business is an ICT business that is engaged in software development, and a manufacturing-for-export business is defined as a business that manufactures primarily for export. In addition, losses incurred by venture capital financing companies on the disposal of shares invested in venture capital subsidiary companies under Act 684 and losses incurred by qualifying venture capital financing companies on shares in any venture may be carried forward for five years after the disposal of the shares.

**Groups of companies.** Each company within a group must file a separate tax return. No measures exist for the offsetting of losses against profits among members of the group.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, imposed on all supplies of goods and services made in, or imported into, Ghana, except for exempt items	15
National Health Insurance levy; imposed on all goods and services, except those that are specifically exempt	2.5

#### E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Ghana is the Ghana cedi (GHS).

The Foreign Exchange Act, 2006 (Act 723) governs foreign-exchange controls in Ghana. However, the Bank of Ghana exercises much discretion in administering the act.

**Anti-avoidance legislation.** A company must obtain a tax-clearance certificate to engage in certain transactions, including the purchase of goods in commercial quantities from producers, distributors, manufacturers or importers. The income tax law contains the following three specific anti-avoidance measures:

- Income splitting (see Section C)
- Transfer pricing (see *Transfer pricing*)
- Thin capitalization (exempt-debt to exempt-equity ratio; see *Debt-to-equity ratio*)

**Transfer pricing.** Ghana introduced transfer pricing regulations in September 2012. The Regulations follow the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. The regulations allow the use of the transfer-pricing methods outlined in the OECD guidelines and the use of an alternative method if the methods stated are not appropriate for determining the arm's-length nature of the transaction. On the filing of a return, the Commissioner-General can use an alternative transfer-pricing method if the Commissioner-General takes the view that the method used does not properly represent the arm's-length nature of a transaction.

The regulations also require entities that enter into related-party transactions to prepare documentation to support their returns. Entities also must submit transfer-pricing returns as part of their annual income tax returns within four months after the end of the accounting year.

**Debt-to-equity ratio.** If an "exempt-controlled resident entity," other than a financial institution, has an "exempt debt" to "exempt equity" ratio in excess of 2:1, no deduction is allowed for interest paid or a foreign-exchange loss incurred on the portion of the debt that exceeds the 2:1 ratio. Broadly, an "exempt-controlled resident entity" is a resident entity of which at least 50% of its underlying ownership or control is held by an "exempt person," which is a nonresident person or a resident person meeting certain criteria. The law also provides detailed definitions of "exempt debt" and "exempt equity."

## F. Treaty withholding tax rates

The following are the maximum withholding rates under Ghana's double tax treaties for dividends, interest, royalties, and management and technology transfer fees.

	Dividends	Interest	Royalties and management and technology transfer fees
	%	%	%
Belgium	5	10	15
Denmark (a)	8	10	15
France	8	10	15
Gambia (a)	8	10	15
Germany	8	10	15
Italy	5	10	10
Netherlands	8	10	15
Nigeria (a)	8	10	15
Sierra Leone (a)	8	10	15

---

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties and management and technology transfer fees</b>
	<b>%</b>	<b>%</b>	<b>%</b>
South Africa	8	10	15
Sweden (a)	8	10	15
United Kingdom	8	10	15
Non-treaty countries	8	8	15/20 (b)

(a) These treaties were signed prior to the country's independence in March 1957, but Ghana considers them still to be in force.

(b) The 15% rate applies to royalties. The 20% rate applies to management and technology transfer fees.

## A. At a glance

Corporate Income Tax Rate (%)	10 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	10 (a)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (b)

- (a) A tax rate of 20% applies to utility, energy and fuel supply companies and companies abusing a dominant market position.
- (b) In general, the carryforward is unlimited. However, if both a change in ownership and a major change in the nature or conduct of a trade carried on by the company occurs within a three-year period, losses incurred before the change in ownership cannot be offset against losses incurred subsequent to the change in ownership.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies are taxed on profits “accrued in or derived from” Gibraltar. “Accrued in or derived from” is defined by reference to the activities that generate the profits. If a company’s income results from an underlying activity that requires a license and regulation under any law of Gibraltar, the income is deemed to accrue in and derive from Gibraltar, except for income from activities carried on outside Gibraltar by a branch or permanent establishment.

The above rule applies regardless of whether a company is registered in Gibraltar or whether it is ordinarily resident in Gibraltar. A company is ordinarily resident in Gibraltar if central management and control is exercised there.

**Rates of corporation tax.** All companies are chargeable on taxable profits at a rate of 10%, except for utility, energy and fuel supply companies and companies deemed to be abusing a dominant market position, which are subject to tax at a rate of 20%.

**Capital gains.** Capital gains are not taxed in Gibraltar. Capital losses are not deductible.

**Administration.** Under the existing tax legislation at the time of writing, returns, accounts and computations must be filed within six months after the end of the financial period. If a company is required to file audited accounts, an additional three months is given to file the audited accounts, but unaudited accounts must be filed within six months after the end of the period. It is planned to amend the legislation to apply an across-the-board nine-month filing deadline for returns, accounts and computations. In the meantime, a nine-month deadline is being applied in practice.

Companies must make payments on account of their corporation tax by 28 February and 30 September each year. Each payment is made toward the tax liability for the financial period in which the payment on account is due. The amount of payment on account due is based on the tax payable for the last relevant accounting period. An application can be made for a reduced or zero payment if basing the payment on a prior year would result in an excessive payment. Under the existing legislation at the time of writing, the final payment with respect to a financial period is due within six months after year-end. It is planned to amend the legislation to extend this deadline to nine months. In the meantime, a nine-month deadline is being applied in practice.

Companies not complying with filing and payment deadlines are subject to penalties and surcharges.

A self-assessment system requires companies to assess correctly their tax liabilities or face significant penalties.

Companies may request advance tax rulings.

**Dividends.** Dividends paid by Gibraltar companies are not subject to withholding tax. Tax credits are attached to dividends paid by companies ordinarily resident in Gibraltar. This tax credit equals the tax paid by the company on the profits out of which the dividend is paid. Restrictions may apply to how such tax credits may be utilized.

Dividends received by a company from another company are not taxable.

**Interest.** Withholding tax is not imposed on the payment of interest. Interest income is not taxable, except for the following:

- Interest on loans or advances by one company to another company if the interest from an individual company is GIP100,000 or more per year. Under an anti-avoidance measure, interest received or receivable from different companies is considered to be from the same company for the purposes of the GIP100,000 threshold if those companies are “connected persons.” For this purpose, interest is deemed to be accrued and derived in Gibraltar if the company in receipt of the interest is a Gibraltar-registered company.
- Interest income of a company that lends to, or takes deposits from, the general public or engages in similar activities.

**Royalties.** Royalty income received or receivable by a company is taxable. Such income is deemed to be accrued and derived in Gibraltar if the company receiving the royalties is a Gibraltar-registered company.

**Foreign tax relief.** Unilateral tax relief is granted with respect to tax paid or payable in another jurisdiction on income from that jurisdiction. This is restricted to the tax that would otherwise have been payable in Gibraltar on that income.

### C. Determination of trading income

**General.** Taxable profits are determined based on financial statements prepared in accordance with Gibraltar generally accepted accounting practice (GAAP), or UK GAAP or International Financial Reporting Standards, subject to certain adjustments and provisions.

In general, expenses must be incurred wholly and exclusively for the purposes of the trade, business, profession or vocation. However, specific reliefs and prohibitions exist for certain expenses.

Certain expenses are either not deductible or are subject to restrictions, including the following:

- Interest paid or payable to a person not resident in Gibraltar is not deductible to the extent that the interest is charged at a rate greater than a reasonable commercial rate.
- Depreciation and amortization of assets are not deductible (instead capital allowances are given; see *Tax depreciation [capital allowances]*).
- Contributions to a provident, pension or other fund for the benefit of employees are not deductible if the fund has not been approved by the Commissioner of Income Tax.
- The cost of entertaining existing and potential clients and persons introducing business, are deductible, but detailed rules restrict deductibility.
- For a branch or a company with a branch, the deduction for certain head office expenses or certain expenses incurred by a branch for the common purpose of the company is restricted to 5% of gross income.
- “General” expenses are apportioned between chargeable and non-chargeable income on a pro-rata basis. The part of such expenses attributable to non-chargeable income is not deductible.

**Tax depreciation (capital allowances).** The first GIP30,000 of plant and machinery (including, among other items, fixtures, fitting and equipment, but not motor vehicles) acquired in a financial period is fully deductible in that period. In addition, the first GIP50,000 of qualifying capital expenditure on information technology investment in a financial period is also fully deductible.

All such assets, as well as motor vehicles, are pooled for tax purposes. The pool is increased with respect to any additions in excess of initial allowances given, and reduced by the proceeds of any disposals in the period. The allowance for the year is then calculated at 15% of the value of the pool. The pool value is then reduced by that allowance and the remaining balance carried forward to the next period. For companies taxed at 20% (see *Rates of corporate tax*), the annual allowance is given at 20% instead of 15%.

**Groups of companies.** Gibraltar law does not provide for tax consolidation. It does not have any provision for group relief (that is, the use of tax losses of one group company by another group company).

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Stamp duty	
On the issuance or increase of authorized share capital, or on the issuance of loan capital; fixed amount per transaction	GIP10
On the purchase of real estate in Gibraltar	
First- and second-time buyers	
First GIP250,000 of purchase price	0%
Balance above GIP250,000 to GIP350,000	5.5%
Balance above GIP350,000	3.5%
Other buyers	
Purchase price not exceeding GIP200,000	0%
Purchase price between GIP200,001 and GIP350,000	2% on first GIP250,000, and 5.5% on balance
Purchase price of over GIP350,000	3% on first GIP350,000, and 3.5% on balance
Social insurance contributions, on employees' wages and salaries; payable on weekly wages by	
Employer	20% (subject to minimum of GIP15 per employee per week and maximum of GIP32.97 per employee per week)
Employee (under 60)	10% (subject to minimum of GIP5 per week and maximum of GIP25.16 per week)

## E. Miscellaneous matters

**Foreign-exchange controls.** Restrictions are not imposed on foreign exchange or on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited, subject to company law.

**Anti-avoidance legislation.** Gibraltar tax law contains several anti-avoidance provisions.

The Commissioner of Income Tax may disregard part or all of arrangements that are deemed to be artificial and/or fictitious and whose purpose is to reduce or eliminate tax payable.

Any "notifiable arrangement" or "notifiable proposal" must be disclosed to the Commissioner of Income Tax. Detailed procedures exist for seeking clearance in advance of proposals. A timetable is provided for the Commissioner to request further information, to notify the applicant that anti-avoidance provisions will or will not apply, or to notify the applicant that the Commissioner requires a further 21 days to make a decision.

In certain circumstances, the deduction for expenses incurred in favor of a connected party or parties may be restricted to the lower of 5% of turnover or 75% of profit before taking into account the expenses in question.

**Debt-to-equity ratios.** Thin-capitalization rules apply to interest payable by a company to individuals or trusts who are connected parties with respect to the company and to interest payable by a company if the loan is secured by assets belonging to individuals or trusts who are connected parties. In such circumstances, interest paid by the company may be treated as a dividend instead of a deductible expense if the loan capital to equity ratio is greater than 5 to 1.

Interest paid to a connected party in excess of the amount that would have been charged on an arm's-length basis may be deemed to be a dividend instead of a deductible expense.

Interest may be disallowed as a deductible expense if both of the following circumstances exist:

- The loan is secured by a cash deposit made with the lender (or party connected to the lender) or secured by certain investments.
- The income from the cash deposit or investment is not assessable to tax.

## **F. Tax treaties**

Gibraltar has no tax treaties in force. Gibraltar has implemented the European Union (EU) Parent Subsidiary Directive and the EU Directive on Interest and Royalties. Notwithstanding the legislation arising from these EU directives, Gibraltar does not impose withholding tax on dividends, interest or royalties.

*Extensive amendments to the Greek corporate income tax law are effective from 1 January 2014. At the time of writing, it was expected that the tax administration would issue a series of administrative circulars and relevant guidelines on the application of the new measures. Because of these expected actions, readers should obtain updated information before engaging in transactions.*

## A. At a glance

Carryforward	5

- (a) For details regarding the taxation of capital gains derived by legal persons or legal entities, see Section B.
- (b) The 10% withholding tax rate applies to dividends and interim dividends distributed by a Greek corporation (*anonymos eteria*, or AE; (in certain countries, a corporation is referred to as a *société anonyme*, or SA) and profits distributed by a Greek limited liability company (*eteria periorismenis efihinis*, or EPE). This 10% withholding tax is subject to rates applicable under double tax treaties or under the European Union (EU) Parent-Subsidiary Directive (amended by Directive 2011/96/EC).
- (c) This 15% withholding tax is subject to rates applicable under double tax treaties or under the EU Interest-Royalties Directive.
- (d) This is a final tax if the beneficiary is a legal person (for example, a company) or legal entity that satisfies both of the following conditions:
- It does not have its tax residency in Greece.
  - It does not maintain a permanent establishment for corporate income tax purposes in Greece.
- (e) This 20% withholding tax is subject to rates applicable under double tax treaties or under the EU Interest-Royalties Directive. No tax is withheld on payments of royalties made to legal persons or legal entities that have their tax residence in Greece or that have a Greek permanent establishment in Greece.
- (f) If the 20% withholding tax does not exhaust the final Greek corporate income tax liability of the beneficiary, it is credited against the beneficiary's final Greek corporate income tax liability.

## B. Taxes on corporate income and gains

**Corporate income tax.** Greek companies are taxed on their worldwide income. Foreign business enterprises are taxed only on income derived from a permanent establishment in Greece or on

profits generated in Greece. An AE, SA or EPE is Greek if its corporate seat or place of effective management is located in Greece.

A legal person or entity is considered to be a Greek tax resident in the following cases:

- It is incorporated or established under Greek law.
- It has its registered office in Greece.
- Its place of effective management is in Greece at any time during the tax year.

The “place of effective management” concept should be reviewed on an ad hoc basis in the context of the factual background of each case. For this purpose, indicative criteria are listed, such as the following:

- The place where the day-to-day management of the company takes place
- The place where strategic business decisions are made
- The place where the annual general meeting of shareholders or partners or the board of directors takes place
- The place where the accounting books of the company are held
- The residence of the members of the board of directors

In addition, the Greek tax administration may examine additional factors, such as the residence of the majority of the shareholders or partners.

**Rate of corporate income tax.** The standard corporate income tax rate is 26%.

**Capital gains.** Effective from 1 January 2014, capital gains earned by legal entities are treated as business income and are subject to corporate income tax at the standard rate of 26% if they derive from the following:

- Disposals of fixed assets
- Transfers of businesses as going concerns
- Disposals of real estate property that do not constitute a business activity per se
- Transfers of securities (such as listed shares, unlisted shares, interests in partnerships, treasury bills, Greek state bonds, corporate bonds, derivatives)

Sales of listed shares are also subject to a 0.2% transaction duty.

**Administration.** The fiscal year coincides with the calendar year. Legal persons or entities keeping double-entry books may set their tax year to end on 30 June or on any other date coinciding with the tax year-end of their foreign shareholder. An option for a tax year exceeding 12 months is not available. Greek SAs or AEs, Greek EPEs and branches of foreign companies must file an annual corporate income tax return by the end of the sixth month following the end of their fiscal year.

In general, on filing their annual corporate income tax return, legal entities must make an advance payment against the next year’s income tax liability. Such advance payment equals the amount calculated by applying a rate of 80% (100% for banks and for branches of foreign banks operating in Greece) to the income tax due for the year for which the return is filed. The final payment of tax is calculated by subtracting the advance payment

made in the preceding year and other prepayments of tax (including taxes withheld at source) and foreign taxes paid on foreign-source income from the amount of tax due. The foreign tax credit cannot exceed the amount of Greek tax otherwise payable on the foreign-source income.

The penalties described below are effective from 1 January 2014; if more than one penalty applies to the same tax offense, only the provision providing for the largest penalty applies.

A failure to file a corporate income tax return or to file in time a corporate income tax return results in the imposition of an administrative penalty ranging from EUR100 (if no tax is due) to EUR500 (if tax is due).

A failure to pay corporate income tax as a result of filing an inaccurate corporate income tax return results in the imposition of the following penalties:

- If the filing of an inaccurate corporate income tax return results in a difference of corporate income tax of 5% to 20%, the penalty equals 10% of the amount of the difference between the tax assessed on the basis of the tax return and the corrective tax assessment.
- If the filing of inaccurate corporate income tax return results in a difference of corporate income tax of 21% to 50%, the penalty equals 30% of the amount of the difference.
- If the filing of inaccurate corporate income tax return results in a difference of corporate income tax exceeding 51%, the penalty equals 100% of the amount of the difference.

A failure to file a corporate income tax return when corporate income tax would be due results in the imposition of a penalty equal to the amount of corporate income tax avoided (however, for some kinds of tax audits, the rate of the penalty is 20%).

In addition to the above, interest in arrears for the late payment of corporate tax is assessed; the current rate is 0.73% per month.

A failure to file a withholding tax return and pay withholding taxes in time results in the imposition of a penalty equal to the amount of the unpaid tax.

At the time of writing, it was expected that new legislation would revise the above penalty rates.

**Dividends.** A 10% withholding tax is imposed on dividends and interim dividends distributed to Greek or foreign beneficiaries by Greek SAs and profits distributed by Greek EPEs, unless an applicable double tax treaty provides otherwise (see Section F) or unless tax relief is available under the EU Parent-Subsidiary Directive (90/435/EEC), as amended by Directive 2011/96/EC). For details regarding the rules in this directive, please see below. This tax represents the final tax liability of the recipient with respect to the dividends received if the recipient is a legal entity that does not have tax residency in Greece and does not maintain a permanent establishment in Greece.

A Greek subsidiary is not required to withhold the 10% withholding tax from dividends and interim dividends distributed to their EU parent companies if all of the following conditions are satisfied:

- The EU parent company holds a minimum 10% participation in the Greek subsidiary.
- The EU parent company holds the above participation in the Greek subsidiary for at least two consecutive years.
- The recipient EU parent company satisfies all of the following additional conditions:
  - It has one of the legal types listed in Annex I of EU Directive 2011/96/EC.
  - It is tax resident in one of the EU member states (and is not considered tax resident in any non-EU country).
  - It is subject to one of the taxes listed in Annex I of Section B of EU Directive 2011/96/EC, with no option for a tax exemption.

Effective from 1 January 2014, if a Greek tax resident legal person distributes dividends to its parent company and if the parent company has not completed the two-year holding period for a 10% participation but meets the rest of the exemption requirements (see above), the distribution can be exempt from withholding tax, provided that the local Greek tax resident legal person deposits a bank guarantee in an amount based on a specific calculation. This amount is almost equal to the amount of the dividend withholding tax due.

**Foreign tax credit.** Foreign-source income is usually taxable with a credit for foreign income taxes paid, up to the amount of Greek tax corresponding to the foreign-source income. The credit cannot exceed the amount of Greek tax payable on the same amount.

### C. Determination of trading income

**General.** Taxable income for all legal entities consists of annual gross income, less allowable deductions. In principle, expenses may be deducted only from gross income for the fiscal year in which they are incurred.

In general, effective from 1 January 2014, all ordinary business expenses and specific items mentioned in the tax law may be deducted for tax purposes (with the exception of certain expenses that the law explicitly indicates are not deductible for tax purposes) only if the following conditions are satisfied:

- They are made in the interest of the business or in the ordinary course of its business transactions.
- They reflect an actual transaction that has a value not considered lower or higher than the actual value, based on indirect audit methods (cross-checks).
- They are recorded in the accounting books for the period in which they are incurred and are supported by proper documentation.

Special reference is made to the deductibility of expenses made for scientific and technological research.

The new Income Tax Code also includes a list of nondeductible expenses.

It is expected that detailed administrative guidelines will elaborate on the general rules described above.

Under Law 4321/21.3.2015, a taxpayer must withhold and pay to the state a tax equal to the income tax corresponding to such

amount (26%) in order to deduct expenses from transactions with the following:

- Entities located in noncooperative jurisdictions in tax matters
- Entities located in countries with a privileged tax regime
- Entities effectively associated with the taxpayer that have not complied with the local transfer-pricing documentation requirements
- Entities that do not have in their premises or in the premises of associated enterprises the required resources and infrastructure for carrying out similar transactions on a recurring basis

Such tax is refunded to the taxpayer if it proves within three months from the occurrence of the transaction that the expense relates to a customary transaction for which current market prices are applied. However, for transactions with entities that are not located in noncooperative jurisdictions in tax matters or in countries with a privileged tax regime, the taxpayer may provide, before the commencement of a tax audit, evidence that the other party in the transaction is not a qualifying entity, as described in the third and fourth bullets above, thereby defending the tax deduction of the amount without the taxation of it. This new rule enters into force on 21 March 2015, and administrative guidelines are expected to regulate the above process for the refund of the above tax as well as the verification process of the supplier's substance and to address any concerns about the compatibility of the new rules with EU and tax treaty law.

**Inventories.** Effective from 1 January 2014, inventory and semi-finished products must be evaluated according to current accounting principles. The tax law does not determine any official method for stock valuation. However, beginning with the tax year in which a valuation method is first used by a company for valuation of its inventory and semifinished products, the company must use the method for a minimum of four years.

**Provisions.** Bad debt provisions and write-offs are deductible for corporate income tax purposes at a rate defined on a case-by-case-basis, based the amount of the uncollected debt and the time period during which the debt remains uncollected.

For uncollected debts that do not exceed EUR1,000 and that are overdue for a period of more than 12 months, the taxpayer may establish a provision equal to 100% of the debt.

For uncollected debts that exceed EUR1,000 and that are overdue, the taxpayer may establish a provision equal to the following:

- 50% of the debt if it is overdue from 12 to 18 months
- 75% of the debt if it is overdue from 18 to 24 months
- 100% of the debt if this is overdue for more than 24 months

Restrictions are imposed on the formation of bad debt provisions for a shareholder or partner holding at least a 10% participation in a business and for business' subsidiaries with a minimum 10% participation. Special rules are also provided for the deduction of bad debt provisions by banks, leasing and factoring companies.

**Depreciation.** Depreciation is performed by applying a specific depreciation rate to the acquisition or construction cost for a business asset. The depreciation of each fixed asset begins the

month following the month in which the asset is first used or put into service by the taxpayer. The following table provides the annual depreciation rates, effective from 1 January 2014.

Categories of assets	Depreciation rate (%)
Buildings, installations, facilities industrial installations, non-building facilities, warehouses and special loading and unloading vehicles	4
Plots of land used for mining purposes and quarries, except those used for ancillary mining activities	5
Public means of transportation (including airplanes, trains and ships)	5
Machinery and equipment (except for personal computers [PCs] and software)	10
Means of transportation of individuals	16
Means of transportation of goods	12
Intangible assets and royalties and expenses of multiannual depreciation	10
PCs and software	20
Other fixed assets	10

An option exists for one-off depreciation of fixed assets valued up to EUR1,500 in the year in which the assets are acquired and placed in service. Newly established companies are eligible to claim depreciation for all of their fixed assets at a 0% rate for their first three years.

**Relief for losses.** Tax losses may be carried forward to offset business profits in the following five consecutive tax years from the tax year in which they are incurred. The right to carry forward tax losses ceases to apply if changes in ownership or voting rights exceed 33% in value or number, unless it is proven that the transfer was not made for the purpose of tax avoidance or tax evasion. Offsetting of losses incurred abroad against business profits derived domestically is not allowed, with the exception of income arising in other EU or European Economic Area (EEA) member states that is not exempted based on an applicable double tax treaty. Losses may not be carried back.

**Groups of companies.** Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	23
Reduced rate	13
	(special reduced rate of 6.5%)
Special rates	5/9/16
Stamp duty on private loan agreements	2.4/3.6
Capital duty	1.1

Nature of tax	Rate (%)
Annual real estate tax; imposed on the value of real estate owned by legal entities; the rate depends on the zone of the real estate, its surface, year built, whether the property faces a national road and other factors	Various
Special property tax; imposed on the “objective” value of real estate property; the tax does not apply if the company has listed shares or if it discloses its corporate structure and the ultimate individual shareholders or partners are revealed	15
Real estate transfer tax; imposed on taxable value	3

## E. Miscellaneous matters

**Foreign-exchange controls.** No controls are imposed on the transfer of money in and out of Greece. However, specific reporting requirements for certain transactions must be met.

**Transfer pricing.** The Greek tax law includes a transfer-pricing clause (Articles 21 and 22 of the Code of Fiscal Procedure) that is aligned with international standards. In addition, the transfer-pricing legislation requires that an enterprise maintain documentation files.

Effective from of 1 January 2014, a new definition of “associated/affiliate enterprises” is introduced. The new law defines the term “associated person,” which extends to legal entities, individuals and any other body of persons. The term encompasses two persons if any of the following circumstances exists:

- One of them holds directly or indirectly shares, parts or quotas in the other of at least 33%, estimated on the basis of total value or number, or equivalent profit participation rights or voting rights.
- Another third person participates directly or indirectly in the other two in any of the aforementioned ways.
- Between them, direct or indirect management dependence or control exists or the possibility exists for one person to exercise decisive influence over the other or for a third person to do so in both of them.

Effective from 1 January 2014, the concept of advance pricing arrangements (APAs) is introduced in Greek transfer-pricing legislation.

**Debt-to-equity rules.** No deduction is allowed for interest expenses (with the exception of interest on banking loans and corporate bond loans) incurred on loans granted by third parties to the extent that the interest rate exceeds the interest that would be payable if the applicable interest rate were equal to the interest rate for loans connected with revolving accounts to non-credit or non-financial enterprises, as published by the Bank of Greece.

Under the rules applicable for 2015, interest expense in excess of interest income (net interest expense) that exceeds 50% of Earnings Before Interest, Tax, Depreciation, and Amortization (EBITDA) plus nondeductible expenses is not deductible for tax purposes. However, notwithstanding the above rule, interest

expense in excess of interest income is fully deductible as a business expense if the cumulative amount of interest expenses recorded in the accounting books does not exceed EUR5 million per year. The above thresholds (50% of EBITDA and interest expenses up to EUR5 million) are subject to further amendments for 2016 and 2017.

The amount of interest expense that is not deductible for corporate income tax purposes in accordance with the above debt-to-equity rules may be carried forward as a deductible expense with no restriction (indefinitely).

The above debt-to-equity rules do not apply to credit institutions.

**Controlled foreign corporations.** Controlled foreign corporation (CFC) rules are introduced in Greece, effective from 1 January 2014. These rules are designed to deal with tax avoidance of Greek companies through the shifting of revenues to subsidiaries in low-tax jurisdictions. Basically, these rules provide for the inclusion in the taxable income of the Greek companies of undistributed passive income (for example, interest, dividends and royalties) of foreign subsidiaries under the conditions stipulated in the law.

**Mergers and acquisitions.** Company law regulates mergers and acquisitions in Greece. However, significant tax exemptions and relief for company restructurings may be available.

**Transfers of operations.** The tax law regulates the tax treatment of a group business restructuring that results in a transfer of operations (exit taxation). In the case of a local or cross-border intra-group restructuring qualifying as a transfer of functions, assets, risks and business opportunities (profit potential), the transfer of these items are considered a “transfer package” for the purposes of the law. If, within the context of such restructuring, a transfer of an intangible asset takes place (among other transfers), such transfer must be made for consideration according to the arm’s-length principle, taking into account the total value of the underlying assets and the transfer package (relevant functions and risks transferred). If the taxpayer can prove that no significant intangible assets have been transferred and that arm’s-length consideration has been paid with respect to the specific transfer that took place, the transfer-package provisions do not apply.

**General anti-avoidance rule.** Fiscal Procedure Code Law 4174/2013 introduced a general anti-avoidance rule. Under this rule, the tax administration may disregard any artificial arrangement or series of arrangements that aim at the evasion of taxation and lead to a tax advantage. An arrangement is considered artificial if it lacks commercial substance and aims for the evasion of taxation or a tax benefit. To determine if an arrangement is artificial, various characteristics are examined. For purposes of this measure, the goal of an arrangement is to avoid taxation if, regardless of the subjective intention of the taxpayer, it is contrary to the object, spirit and purpose of the tax provisions that would apply in other cases. To determine the tax advantage, the amount of tax due after taking into consideration such arrangements is compared to the tax that would be payable by the taxpayer under the same conditions in the absence of such an arrangement.

**Law 89/1967 regime.** Enterprises licensed to operate under the Law 89/1967 regime may enter into a favorable APA with the tax authorities. A license may be granted to enterprises under this regime if certain conditions are met. The principal condition is that the company must be exclusively engaged in the provision of specific services to foreign associated companies, the foreign head office or foreign branches. The Ministry of Economy and Finance grants the license after reviewing and approving the applicant's transfer-pricing study (based on the cost-plus method).

## F. Treaty withholding tax rates

Under most double tax treaties, the rates in the table below apply to the extent that the amount of interest or royalties is at arm's length. The domestic withholding tax rates apply to any excess amounts. In addition, certain recent double tax treaties include an anti-abuse clause.

Greece has implemented EU Directive 2003/49/EC. Under this directive, withholding tax on interest and royalties paid between associated companies of different EU member states was abolished, effective from 1 July 2013.

The following table provides treaty withholding tax rates for dividends, interest and royalties.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Albania	5	5	5
Armenia	10	10	5
Austria	0/5/10 (m)(n)	0/8 (o)	0/7 (o)
Azerbaijan	8	8	8
Belgium	0/5/10 (m)(n)	0/10 (l)(o)	0/5 (o)

India	10	15	20
Ireland	0/5/10 (m)(n)	5	0/5 (o)
Israel	10	10	10
Italy	0/10 (n)	0/10 (j)(o)	5 (a)(g)(o)
Korea (South)	5/10 (m)	8	10
Kuwait	0/5 (p)	0/5 (p)	15
Latvia	0/5/10 (m)(n)	0/10 (o)	0/10 (a)(o)
Lithuania	0/5/10 (m)(n)	0/10 (o)	0/10 (a)(o)

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Luxembourg	0/10 (n)	0/8 (o)	0/7 (h)(o)
Malta	0/5/10 (m)(n)	0/8 (o)	0/8 (o)
Mexico	10	0/10 (l)	10
Moldova	5/10 (m)	10	8
Morocco	5/10 (m)	10	10
Netherlands	0/10 (n)	0/8/10 (f)(o)	0/7 (h)(o)
Norway	10	10	10
Poland	0/10 (n)	0/10 (o)	0/10 (o)
Portugal	0/10 (n)	0/15 (o)	0/10 (o)
Qatar	5	0/5 (q)	5
Romania	0/10 (n)	0/10 (o)	0/5/7 (a)(h)(o)
Russian Federation	5/10 (m)	7	7
San Marino	5/10 (m)	10	5
Saudi Arabia	5	5	10
Serbia	5/10 (m)	10	10
Slovenia	0/10 (n)	0/10 (o)	0/10 (o)
South Africa	5/10 (m)	8 (j)	5/7 (a)(h)
Spain	0/5/10 (m)(n)	0/8 (o)	0/6 (o)
Sweden	0	0/10 (o)	0/5 (o)
Switzerland	0/10 (n)	0/10 (o)	0/5 (o)
Tunisia	10	15	12
Turkey	10	0/12 (l)	10
Ukraine	5/10 (m)	10	10
United Arab Emirates	0/5 (r)	0/10 (r)	5
United Kingdom	0/10 (n)	0	0
United States	10	0 (b)	0 (d)
Uzbekistan	8	10	8
Non-treaty countries (c)	10	15	20

- (a) The rate is 5% for royalties paid for the use of industrial, commercial or scientific equipment (7% under the Romania and South Africa treaties).
- (b) The 0% rate applies if the recipient does not control directly or indirectly more than 50% of the voting power in the payer. However, the 0% rate does not apply to interest paid to US recipients to the extent that the interest is paid at an annual rate exceeding 9%.
- (c) For details, see Section A.
- (d) The 0% rate does not apply to cinematographic film royalties paid to US residents.
- (e) The rate is 5% for film royalties.
- (f) The rate is 8% if the recipient is a bank or similar entity.
- (g) The rate is 0% for copyright royalties for literary, artistic or scientific works, including films.
- (h) The rate is 5% for royalties for literary, artistic or scientific works, including films.
- (i) Greece honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
- (j) Under the South Africa treaty, the rate is 0% for interest paid to the South Africa Reserve Bank. Under the Italy treaty, the rate is 0% for interest payments made by the Greek government, interest payments made to the Italian government and interest payments relating to government loans.
- (k) The 10% rate applies to copyright royalties for literary, artistic or scientific works.
- (l) The rate is 5% if the recipient is a bank. Under the China, Mexico and Turkey treaties, the rate is 0% if the recipient is a government bank.
- (m) The 5% rate applies if the recipient of the dividends is a company that owns more than 25% of the payer corporation.

- (n) The 0% rate applies if the conditions of the EU Parent-Subsidiary Directive are met (for Switzerland, the 0% rate applies if the conditions of the European Community (EC)-Switzerland agreement providing for measures equivalent to those in Directive 2003/48/EC are met).
- (o) The 0% rate applies if the terms of the EU Interest-Royalties Directive are met; for Switzerland, the 0% rate applies if the conditions of the EU-Switzerland agreement providing for measures equivalent to those in Directive 2003/48/EC are met.
- (p) The 0% rate for dividends and interest payments applies if the recipient is the government of Kuwait or a state division or subdivision, the Central Bank of Kuwait or other government organizations or government funds.
- (q) The 0% rate on interest payments applies if the recipient is the government of Qatar.
- (r) The 0% withholding tax rate for dividends and interest payments applies if the recipient is the government of the United Arab Emirates (UAE) or its political subdivisions, the Central Bank of the UAE or certain UAE investment authorities.

## A. At a glance

Corporate Income Tax Rate (%)	35
Capital Gains Tax Rate (%)	35
Branch Tax Rate (%)	35
Withholding Tax (%) (a)	
Dividends	30 (b)
Interest	30 (b)(c)
Royalties from Patents, Know-how, etc.	30 (b)
Branch Profits Tax	30 (d)
Net Operating Losses (Years)	
Carryback	2
Carryforward	20

- (a) The withholding tax rates may be reduced under tax treaties (see Section E).  
 (b) Imposed on payments to nonresidents.  
 (c) Interest on certain portfolio debt obligations issued after 18 July 1984 and bank deposit interest not effectively connected to a trade or business in Guam are exempt from withholding.  
 (d) The branch profits tax is imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by withdrawals of previously reinvested earnings.

## B. Taxes on corporate income and gains

The system of corporate income taxation in force in Guam, a territory of the United States, is a mirror image of the US income tax system. The applicable law is the US Internal Revenue Code, with “Guam” substituted for all references to the “United States.” Therefore, for a description of the income taxation of corporations resident or doing business in Guam, refer to the sections on the United States and substitute “Guam” for each reference to the “United States.”

Income taxes are paid to the government of Guam, which administers its tax system.

Under an agreement between the United States and Guam, Guam had the authority to separate its system of taxation from the US Internal Revenue Code, effective 1 January 1991. Because a comprehensive Guam Tax Code has not yet been developed, this date has been extended, and the mirror system of taxation continues to apply to Guam until a new code goes into effect. A Guam Tax Code Commission has been formed and has begun work on the new law.

The government of Guam, through the Guam Economic Development Authority, is authorized by law to allow tax rebates to qualified investors. Qualifying Certificates (QCs) for tax incentives are granted based on the investment commitment as well as on the potential for creating new employment and expanding the base of the island's industry. These incentives are aimed primarily at manufacturers, insurance companies, trusts, commercial fishing companies, corporate headquarters, specialized medical facilities, high-technology companies, agricultural enterprises and tourism-development companies. In general, the tax rebates can amount to up to 75% of income tax paid for up to 20 years. Certain insurance companies may qualify for a 100% income tax rebate.

### C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Gross receipts tax, on sales of tangible personal property and services, excluding wholesale activities	4%
Use tax, on goods imported into and consumed in Guam (businesses are subject to either gross receipts tax or use tax, not both)	4%
Hotel occupancy tax	11%
Real property tax, on appraised value of Land	0.0875%
Improvements	0.35%
Liquid fuel taxes, imposed per gallon	
Aviation	4 cents
Diesel	14 cents
Other	15 cents
Alcoholic beverage excise tax	
Malted fermented beverages	7 cents per 12 fluid ounces
Distilled beverages	USD18 per gallon
Vinous beverages	USD4.95 per gallon
Tobacco excise tax	
Cigarettes	USD5 per 100 cigarettes
Cigars	20 to 25 cents per cigar
Other tobacco products	USD3.50 per pound
Documents tax, on conveyances and on mortgages of real property	0.1%
Social security contributions (US system), imposed on

#### D. Miscellaneous matters

**Foreign-exchange controls.** Guam does not impose foreign-exchange controls.

**Debt-to-equity rules.** The US thin-capitalization rules apply in Guam.

**Transfer pricing.** The US transfer-pricing rules apply in Guam.

#### E. Tax treaties

The Guam Foreign Investment Equity Act was signed into law on 24 August 2002 and amends the Organic Act of Guam with respect to the application of the Guam territorial income tax laws. The Guam Foreign Investment Equity Act provides that the tax rate under Sections 871, 881, 884, 1441, 1442, 1443, 1445 and 1446 of the US Internal Revenue Code of 1986, on any item of income from sources in Guam is the same as the rate that would apply with respect to such item were Guam treated as part of the United States for purposes of the treaty obligations of the United States. However, this provision does not apply to determine the tax rate on any item of income received from a Guam payer, if for any tax year, the tax on the Guam payer was rebated under Guam law (see Section B for a discussion of the QC rebates).

- (a) For details regarding the Regime on Profits from Business Activities and the Optional Simplified Regime on Revenue from Business Activities, see Section B.
- (b) Subsidiaries and branches are subject to the same tax treatment (that is, as independent taxpayers separate from their parents and headquarters).
- (c) See Section B for further information.
- (d) The withholding taxes, other than the dividend withholding tax, apply to nonresidents without a permanent establishment in Guatemala. For information regarding dividends, see *Dividends* in Section B.
- (e) For details regarding the withholding tax on interest, see Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** The new Income Tax Law (ITL) provides that income derived from activities rendered or services used in Guatemala is considered Guatemalan-source income and must be classified and taxed under one of the following categories:

- Income from business activities
- Income from employment
- Income from capital

**Corporate income tax rates.** Income from business activities is income derived from ordinary or occasional trade or business. Companies that generate income from business activities may choose to be taxed under one of the following tax regimes:

- Regime on Profits from Business Activities, which applies on a net income basis (authorized expenses are deductible)
- Optional Simplified Regime on Revenue from Business Activities, which applies on a gross receipts basis (no deductions are allowed)

Under the Regime on Profits from Business Activities, companies may deduct expenses incurred to generate taxable income or to preserve the source of such income, except in specific circumstances in which the law imposes limits on deductibility. The taxable income is subject to tax at a rate of 25% for 2015 and future years. In addition, a 1% Solidarity Tax applies (see Section D).

Alternatively, companies may elect to be taxed under the Optional Simplified Regime on Revenue from Business Activities. Under this regime, companies are subject to income tax on their “taxable income,” which is understood to be the difference between gross income and exempt income. The first GTQ30,000 (approximately USD3,931) of taxable income is subject to tax at a rate of 5%, and the exceeding amount is subject to tax at a rate of 7%. No deductions are allowed. Taxpayers that choose to operate through this scheme are subject to final withholding tax.

Companies operating under the Drawback Regime, the Free Trade Zone Regime or the Santo Tomas de Castilla Free-Trade and Industrial Zone (La Zona Libre de Industria y Comercio de Santo Tomás de Castilla, or ZOLIC) Regime benefit from a 100% income tax exemption for income earned from export activities. Based on World Trade Organization (WTO) agreements, this exemption is expected to expire on 31 December 2015. However, to comply with WTO requirements, the Guatemalan Congress is working on a new bill that would replace the existing benefits.

**Income from capital and capital gains.** Income from capital (other from dividends; see *Dividends*) and capital gains generated in Guatemala are taxed at a rate of 10%, regardless of the regime elected by the taxpayer. The following types of income are classified as income from capital and are subject to tax in Guatemala:

- Royalties
- Income from leasing and subleasing (if not part of the taxpayer’s ordinary trade or business)
- Interest and other types of returns derived from investments that are received by residents or nonresidents with permanent establishment in Guatemala

Under the ITL, the following gains are subject to capital gains tax in Guatemala:

- Gains derived from the transfer of shares issued by resident entities
- Gains derived from the transfer of shares issued by foreign entities that own immovable or movable property located in Guatemala
- Gains derived from the transfer of movable or immovable assets, lottery tickets, raffle tickets or similar items or from the incorporation of assets located in Guatemala into the taxpayer's property

**Administration.** The statutory tax year runs from 1 January through 31 December.

Companies operating under the Regime on Profits from Business Activities must file an annual income tax return and make any payment due within three months after the end of the tax year. Companies operating under the Optional Simplified Regime on Revenue from Business Activities must file an annual information tax return within three months after the end of the tax year. Interest and penalty charges are imposed for late payments of taxes.

Under the Regime on Profits from Business Activities, companies must make quarterly advance income tax payments, which are credited against the final income tax liability. In addition, taxpayers that are qualified as Special Taxpayers must file the annual income tax return together with financial statements audited by a certified public accountant or an independent audit firm.

Companies operating under the Optional Simplified Regime on Revenue from Business Activities settle their tax through withholding payments made by the payer. They must file a monthly tax return in which they separately determine the total amounts of gross income, exempt income, income subject to withholding tax and income subject to direct payment (companies may be required to make direct payments of tax if they are transacting with persons not required by law to make withholdings). The tax return must be filed within the first 10 business days of the month following the month in which the tax was generated.

**Dividends.** Dividends are taxed under the category of "Income from Capital." A 5% withholding tax is imposed on all dividend distributions made, regardless of the beneficiary's country of residence.

**Interest.** In general, a 10% final withholding tax is imposed on interest paid to nonresidents. However, withholding tax is not imposed on the following types of interest payments:

- Interest payments made by local banks to banks and financial institutions domiciled abroad (that is, entities licensed and regulated in their country of origin)
- Interest payments made by local taxpayers to multilateral institutions abroad
- Interest payments made by local taxpayers to banks and financial institutions domiciled abroad that are authorized to operate in the country by the Guatemalan Law on Banks and Financial Groups

**Foreign tax relief.** Guatemala does not grant relief for foreign taxes paid.

### C. Determination of trading income

**General.** Under the Regime on Profits from Business Activities, expenses incurred to generate taxable income, including local

taxes, other than income tax and value-added tax (VAT), are deductible. The tax authorities are empowered to deny deductions if they determine that any of the following circumstances exist:

- The expenses are not considered necessary to produce taxable income.
- The expenses correspond to a different fiscal year.
- The expenses are not supported by the appropriate documentation.

The expenses must be registered in the taxpayer's accounting records.

Documents issued abroad that support the deduction of expenses may be subject to a 3% stamp tax.

The deductibility of expenses is also conditioned on the reporting and payment of withholding taxes and on the satisfaction of specific documentation requirements, which apply in certain circumstances. This documentation includes, among others, the following items:

- Valid invoices authorized for local operations
- Invoices or receipts issued abroad
- Notary Public deeds
- Payrolls reported to the social security authorities
- Customs returns for the importation of goods including the tax receipts

In general, payments on transactions valued over GTQ30,000 (approximately USD3,931) must be made through a banking or financial institution, and the corresponding balance statement is required as part of the supporting documentation needed to consider the payment deductible. Operations not made through the banking system must be documented through a Notary Public deed.

For these purposes, the law provides that a single transaction may be considered to include the following:

- All payments made to a single source or provider during a calendar month
- An operation of GTQ30,000 (approximately USD3,931) or above that involves partial or split payments to the same provider or person

In both of the above cases, taxpayers should use the payment or documentation methods listed above. Otherwise, the expense may not be deductible for income tax purposes and may not be considered a tax credit for VAT purposes. This requirement is known in Spanish as "Bancarización."

The deduction for royalties, payments for financial or technical advice and professional service fees for services rendered from abroad to local taxpayers is limited to 5% of the taxpayer's gross income.

Interest is deductible for income tax purposes if all of the following conditions are satisfied:

- The loan proceeds that give rise to such interest must be used to generate taxable income.
- Payments must be documented and correspond to the same fiscal year.

- The taxpayer must comply with the obligation to withhold the corresponding tax, if applicable.
- The deductible amount may not exceed the value calculated by multiplying the interest rate set by the Guatemalan Monetary Board by a total of three times the “average net asset” amount reported by the taxpayer in the annual tax return. “Average net asset” is defined as the sum of the total net worth of the previous year and the total net worth of the current year (values declared in the annual income tax returns), divided by two.
- Loans issued abroad must be obtained from banks or financial institutions that are registered and monitored by the state entity in charge of bank supervision in the country of origin. They must also be authorized for financial intermediation in the country in which the loan is granted.
- The interest rate on foreign-currency loans may not exceed the maximum simple annual rate set by the Monetary Board, minus the value of the quetzal exchange rate variation in relation to the currency in which the loan is expressed, during the period corresponding to the annual income tax return.

**Inventories.** Inventories are valued at cost. The acquisition cost may be computed using various valuation methods provided in the income tax law. No deviation from these methods is allowed unless previously authorized by the tax authorities.

Cattle may be priced at cost or sales price.

No provisions for deterioration or obsolescence are allowed. The destruction of inventory is considered a deductible expense if it is certified by an inspector from the tax authorities or by a Notary Public.

**Provisions.** Provisions for bad debts of up to 3% of credit-sales balances are deductible (excluding bad debts guaranteed by pledge or mortgage). Reserves for severance compensation of up to 8.33% of payroll costs are also deductible.

**Tax depreciation.** Straight-line depreciation is allowed, subject to the following annual maximum rates.

Asset	Rate (%)
Buildings and leasehold improvements	5
Plantations	15
Furniture, fixtures, ships and railroads	20
Machinery and equipment, vehicles and containers	20
Computer equipment and software	33.33
Tools, porcelain, glassware and certain animals	25
Other items that are not specified	10

Goodwill can be amortized over a minimum period of 10 years. Other intangible assets may be amortized over a minimum period of five years.

Oil and other natural resources are subject to depletion in accordance with the level of production and the remaining reserves.

**Relief for losses.** Under the Regime on Profits from Business Activities and the Optional Simplified Regime on Revenue from Business Activities, net operating losses cannot offset taxable income in prior or future years.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax	12%
Levies on petroleum production and consumption; rate varies by type of fuel	USD0.16 to USD0.61 per gallon
Land tax; imposed annually on value of land; maximum rate, applicable to value in excess of GTQ70,000 (approximately USD8,860)	0.9%
Revaluation tax; imposed on the increase in value resulting from a revaluation of immovable property and other fixed assets by an authorized third-party adjuster; for immovable property, the increase in value must be registered with the tax authorities; otherwise the increase in value is subject to income tax	10%
Import duties	0% to 20%
Social security tax; imposed on wages; paid by Employer	12.67%
Employee	4.83%
Solidarity Tax (ISO); imposed on legal entities subject to the Regime on Profits from Business Activities; tax rate applied to the higher of 1/4 of net assets or 1/4 of gross income; newly organized entities are not subject to ISO during their first four quarters of operations; entities that have a gross margin of lower than 4% of its gross income or incur losses for two consecutive years are not subject to the tax	1%

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Guatemala is the quetzal (GTQ). As of 15 October 2014, the average exchange rate was GTQ7.63869 = USD1. Guatemala does not impose foreign-exchange controls. The exchange system is regulated through the banks.

**Debt-to-equity rules.** Guatemala does not impose any debt-to-equity requirements.

**Anti-avoidance legislation.** The tax law contains general measures to prevent tax fraud and similar conduct.

**Transfer pricing.** Effective from 1 January 2013, official transfer-pricing rules apply to transactions with related parties resident abroad. However, Decree 19-2013 of the Guatemalan Congress suspended the application of the transfer-pricing rules as of 23 December 2013. These rules are re-entering into force as of 1 January 2015. Even during the suspension period, the tax authorities may require taxpayers to provide information regarding transactions with their related parties abroad for the elaboration of their databases and reports.

## F. Tax treaties

Guatemala has not entered into income tax treaties with any other countries.

- (a) This is the general corporate income tax rate. For details regarding other rates, see Section B.
- (b) Dividend withholding tax is not imposed on dividends paid to foreign shareholders. See Section B. Guernsey resident individual shareholders are subject to withholding tax on dividends received.
- (c) A carryback for up to two years is available for terminal losses if trade is permanently discontinued.

## B. Taxes on corporate income and gains

**Corporate income tax.** A Guernsey resident company is subject to income tax on its worldwide income. A company not resident in Guernsey is subject to Guernsey income tax on its Guernsey-source income (other than bank interest), unless a double tax treaty is applicable. A company is resident in Guernsey if its shareholder control is in Guernsey or if it is incorporated in Guernsey.

**Rates of corporate income tax.** The general rate of corporate income tax is 0%. A 10% rate applies to profits derived by banks from regulated deposit taking activities, insurance managers,

insurance intermediaries, domestic insurance business and regulated fiduciary services. Regulated utility companies and companies receiving Guernsey property income are subject to tax at a rate of 20%. It is expected that the 10% rate will be extended to include licensed fund administration activities, effective from 1 January 2015.

**Exempt companies.** The exempt company regime is only available for collective-investment schemes. An exempt company is not regarded as resident in Guernsey and is taxable in Guernsey only on Guernsey-source income, excluding bank interest. Collective-investment schemes (typically unit trusts, investment trusts or bodies involving other forms of public participation) form a substantial sector of the finance industry in Guernsey. Peripheral companies associated with such schemes may also qualify for exemption.

Exempt companies pay a fixed annual fee of GBP600 (proposed to be increased to GBP1,200, effective from 1 January 2015), regardless of their income.

**Banking insurance and fiduciary companies.** The general corporate income tax rate of 0% applies to banks, with the exception of profits derived by banks from regulated deposit-taking activities. Insurance companies that have regulated intermediary and insurance manager activities, insurance companies that write regulated domestic business and companies carrying out regulated fiduciary activities are taxed at a rate of 10% on such activities. Effective from 1 January 2015, it is expected that the 10% rate will be extended to include licensed fund administration activities.

**Protected cell companies.** Protected cell companies (PCCs) consist of several cells and core capital. Each cell is liable only to its own creditors. A creditor of a particular cell has recourse to the assets of that cell and the core capital only. PCCs may be used for captive insurance companies, collective investment schemes or other approved enterprises.

**Incorporated cell companies.** Incorporated cell companies (ICCs) are similar to PCCs in terms of their cellular nature. However, each cell is regarded as an incorporated entity in its own right and, consequently, is subject to tax as a separate entity.

**Capital gains.** Capital gains are not taxable in Guernsey.

**Administration.** The Guernsey tax year corresponds to the calendar year. Tax payments on account are normally due in two equal installments on 30 June and 31 December of the tax year, with a balancing payment or repayment due after filing and assessment.

An annual tax return is required for all Guernsey companies and some foreign companies with Guernsey-source income. Foreign-owned trading companies taxable at the 0% rate need only file a simple annual return without computations, unless otherwise requested by the Administrator of Income Tax. The annual tax return must be filed electronically before 30 November of the following year. Automatic late filing penalties apply if the return remains outstanding on 15 January after the deadline date.

If taxable distributions or loans to Guernsey resident individuals are made during the year, a Distribution Reporter tax return is required to be filed by 15 January following the tax year. Taxes on such events must be withheld at source and paid quarterly by the 15th of the month following the relevant quarter.

Companies must file annual validation forms with the Guernsey Registry, and pay the relevant filing fee. Fees are based on the type and activity of the company and range from GBP100 to GBP1,000.

**Dividends.** No tax is withheld from dividends paid to foreign shareholders of Guernsey companies.

If dividends are paid to Guernsey resident individual shareholders, the company may be required to withhold tax of up to 20% of the distribution. The amount of tax withheld may be reduced if the company has already suffered tax on the profits distributed. Companies maintain tax pools to track undistributed income and tax already suffered. In the past, tax was also payable on deemed distributions, but the deemed distribution regime was abolished, effective from 1 January 2013. Changes to the rules used to determine the order of allocation of profits from the tax pools took effect on 1 January 2013.

Companies may also be required to withhold tax at a rate of 20% if a loan is advanced to a Guernsey resident beneficial member, but some exemptions apply.

**Foreign tax relief.** Guernsey grants specific double taxation relief for income from its treaty countries and grants unilateral relief for income from non-treaty countries up to an effective maximum rate of 15%.

### C. Determination of trading income

**General.** The assessment is based on accounting profits, subject to certain adjustments. To be deductible, expenses must be incurred wholly and exclusively for the purposes of the trade.

Nonresident companies are exempt from tax on Guernsey-source bank interest.

**Tax depreciation.** Depreciation is not an allowable deduction, but capital allowances are available on the cost of plant and machinery. The rate is generally 20% a year on the reducing balance (subject to some specific variations). Buildings are generally depreciated under the reducing-balance method at an annual rate of 1.25%.

**Groups of companies.** Under Guernsey law, a trading loss incurred by a member of a 90%-owned group of companies may be offset against profits earned in the same tax year by another member of the group. All members of the group must be incorporated and resident in Guernsey or have a fixed place of business in Guernsey. Restrictions apply if members of the group are taxed at different rates.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate %
Social security contributions; payable on the salaries and wages of employees resident in Guernsey; paid by (2014 rates)	
Employer (maximum contribution of GBP8,608)	6.5
Employee (maximum contribution of GBP7,947)	6
(Small increases in the maximum contributions are likely to apply for 2015.)	
Tax on real property; based on the unit value of the property located in Guernsey; rates vary according to the type of property	Various
Document duty on sales of Guernsey property; based on the value of the transaction	
Residential property	
Value of transaction up to GBP250,000	2
Value of transaction between GBP250,001 and GBP400,000	2.5
Value of transaction over GBP400,000	3
Nonresidential property	3
(Legislation extending the duty to include the sale of shares in corporate vehicles holding Guernsey real property is expected to be introduced in 2015.)	

## E. Miscellaneous matters

**Anti-avoidance legislation.** Guernsey's tax law includes a general anti-avoidance rule. The Administrator of Income Tax has broad powers to adjust a taxpayer's tax liability and assess income tax that, in the administrator's opinion, has been deliberately avoided by a transaction entered into by the taxpayer.

**Exchange controls.** Guernsey does not impose any foreign-exchange controls.

**Debt-to-equity ratios.** Guernsey does not prescribe any debt-to-equity ratios, but the general anti-avoidance rule can be applied in some situations.

**Types of companies.** The Guernsey company law allows the incorporation of companies limited by shares, guarantee or shares and guarantee. A company limited by shares and guarantee may have both shareholders and guarantee members. See Section B for information on PCCs and ICCs.

**Migration of companies.** Guernsey law allows an overseas company to migrate into Guernsey and be registered as a Guernsey company. In addition, a Guernsey company may be removed from the Companies Register with the intention of becoming incorporated in another jurisdiction. In both cases, the law of the other jurisdiction must provide for the migration, the company must be solvent and certain other conditions must be met.

## F. Tax treaties

Guernsey has entered into comprehensive tax treaties with the following jurisdictions.

Bahrain	Liechtenstein	Qatar
Cyprus	Luxembourg	Seychelles
Hong Kong SAR	Malta	Singapore
Isle of Man	Mauritius	United Kingdom
Jersey	Monaco	

Several of these treaties are newly negotiated. Please check for the dates on which they enter in force.

Guernsey is engaged in tax treaty negotiations with the United Arab Emirates and is in early discussions with Saudi Arabia and Thailand.

It also has partial (limited) treaties with the following countries.

Australia	Greenland	New Zealand
Denmark	Iceland	Norway
Faroe Islands	Ireland	Poland
Finland	Japan	Sweden

In addition, Guernsey has signed tax information exchange agreements with 57 jurisdictions.

### **G. Potential changes to the Guernsey tax regime**

A review of the personal tax, pensions and benefits regime is currently in progress. Several changes to Guernsey's tax system are likely to be introduced, which may include new taxes, including a potential Goods and Services Tax. No decision has yet been reached.

- (a) The minimum tax is 3% of turnover unless exempt (see Section B).  
 (b) The tax may be deferred if proceeds are reinvested (see Section B).  
 (c) This tax applies to payments to nonresidents.  
 (d) This tax applies to payments by residents to nonresidents for services, including professional services, performed in Guinea.  
 (e) This tax applies only to rent paid to individuals.  
 (f) This tax applies to banks only.  
 (g) This tax applies to insurance companies only.  
 (h) This tax applies to lottery tickets sold by gambling companies.  
 (i) See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Guinean companies are taxed on the territoriality principle. As a result, Guinean companies carrying on a trade or business outside Guinea are not taxed in Guinea on the related profits. Foreign companies with activities in Guinea are subject to Guinean corporate tax on Guinean-source profits only.

**Tax rates.** The regular corporate income tax rate is 35%. Since the issuance of the amended Mining Code in April 2013, the rate for the mining sector is 30% (applicable to mining companies only; not applicable to subcontractors). The annual minimum tax payable is 3% of annual turnover. However, under the 2012 Financial Law, it cannot be less than GNF15 million or more than GNF60 million.

Profits realized in Guinea by branches of foreign companies are deemed to be distributed and therefore are subject to a branch withholding tax of 10% on after-tax income.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies, depending on the nature of the project and the level of investment.

**Capital gains.** Capital gains are taxed at the regular corporate rate. The tax, however, may be deferred if the proceeds are used to acquire new fixed assets in Guinea in the following three financial years.

Capital gains on transfers of shares are taxed at a rate of 10%.

**Administration.** The fiscal year is from 1 January to 31 December. Tax returns must be filed by 30 April of the year following the fiscal year.

Companies must pay the relevant annual minimum tax before 15 January of the year following the fiscal year. Two advance payments of corporate tax, each equal to 33 $\frac{1}{3}$ % of the corporate tax for the previous year, are due on 15 June and 30 September of the fiscal year. Any balance due must be paid by 30 April of the following year.

**Dividends.** Dividends are subject to a 10% withholding tax, which may be credited by the recipient against corporate income tax.

**Foreign tax relief.** Foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Guinean tax under the territoriality principle is taxable net of the foreign tax.

## C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the Organization for the Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) Uniform Act on Accounting Law (SYSCOHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office overhead in excess of 10% of turnover derived by a Guinean branch

- Interest paid on loans from shareholders to the extent the rate exceeds the current rate of the Central Bank and all of the interest on shareholder loans if the capital of the company is not fully paid
- Corporate income tax and withholding tax on real estate
- Certain specific charges

**Inventories.** Inventory is normally valued at the lower of cost or market value.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at maximum rates specified by the tax law.

**Relief for tax losses.** Losses may be carried forward for three years. Losses may not be carried back.

**Groups of companies.** Fiscal integration of Guinean companies equivalent to a consolidated filing position is not available.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on sales of goods and services and on imports	
Standard rate	18
Business activity tax ( <i>patente</i> ), calculated based on the nature of the business activity and the rental value of the place of business	Various
Registration duties, on transfers of real property or businesses	2 to 14
Payroll taxes; paid by employers on salaries	6
Training tax; paid by employers on salaries	1.5/3
Social security contributions, on an employee's annual gross salary, up to GNF1,500,000	
Employer	18
Employee	5

#### E. Foreign-exchange controls

Exchange-control regulations exist in Guinea for foreign financial transactions.

#### F. Tax treaty

Guinea has entered into a double tax treaty with France. It has ratified a double tax treaty with the United Arab Emirates. However, this treaty has not yet been published and accordingly has not yet been enforced.

- (a) An alternate minimum income tax and asset tax are also imposed (see Section B). A Temporary Social Contribution Tax is imposed at a rate of 5% on companies with net income exceeding HNL1 million (approximately USD46,608). Domiciled entities that have reported operating losses in two consecutive or alternate tax periods that are still open for examination are also subject to advance income tax payments (AIT) that are computed at a rate of 1% of gross income equal to or greater than HNL100 million (approximately USD4,660,766). The AIT may be credited against the annual corporate income tax, asset tax or the Temporary Social Contribution Tax.
- (b) Withholding taxes are imposed on payments to nonresident companies and individuals.

- (c) This withholding tax applies to payments for films and video tapes for movies, television, video clubs and cable television.
- (d) Only companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses.

## B. Taxes on corporate income and gains

**Corporate income tax.** Honduran resident companies are taxed on their worldwide income. Resident companies are those incorporated in Honduras. Nonresident companies are subject to income tax only on income derived from Honduran sources.

**Corporate income tax rates.** Companies are subject to corporate income tax at a rate of 25% on their net income.

A temporary Social Contribution Tax applies to companies with net income exceeding HNL 1 million (approximately USD46,608).

A 1% income tax installment applies to taxpayers that meet the following conditions:

- During open tax periods, they have reported operating losses in two consecutive or alternate tax periods.
- In the prior tax period, they derived gross income equal to or greater than HNL100 million (approximately USD4,660,766).

The installment equals 1% of the gross income reported.

The income tax installment is a tax credit that may be applied against income tax, asset tax or the temporary Social Contribution Tax on the filing of the year-end tax return.

The following taxpayers are not subject to the income tax installment:

- Individuals or entities in the preoperative phase, up to a maximum of five years.
- Companies and individuals that incur losses resulting from an act of God or force majeure. This loss needs to be certified by an audit firm registered with the respective accounting association, notwithstanding a subsequent examination by the tax authorities.
- Companies and individuals authorized by the tax authorities to carry forward losses in accordance to Section 20 of the Honduran Income Tax Law (HN ITL).
- Companies and individuals that calculated and paid tax in the prior tax period and are subject to income tax installments in accordance to Section 34 of the HN ITL.
- Companies and individuals that prove through a tax audit report, carried out by an audit firm registered with the respective accounting association, that the tax loss is real, subject to verification from the tax authorities.
- Companies and individuals established under Section 7 of the HN ITL and tax-exempt by law or Special Legislative Decrees.

Companies operating under the following special regimes are exempt from income tax, sales tax, customs duties and certain municipal taxes:

- Free Trade Zone
- Industrial Processing Zone (Zona Industrial de Procesamiento, or ZIP)
- Temporary Import Regime (Régimen de Importación Temporal, or RIT)

- Agroindustrial Export Zone (Zona Agro-Industrial de Exportación, or ZADE)
- Free Tourist Zone (Zona Libre Turística, or ZOLT)

**Alternative minimum income tax.** An alternative minimum income tax applies to resident individuals or corporations with annual gross income in a fiscal year equal to or greater than HNL10 million (approximately USD466,077). The alternative minimum income tax is calculated by applying a rate of 1.5% to gross income. Legal entities must apply the ordinary rate of 25% to net income and apply the alternative minimum tax rate of 1.5% to gross income. The income tax payable is the higher amount resulting from these two calculations.

The minimum income tax rate is reduced to 0.75% of gross income for individuals or legal entities producing or selling the following products or services:

- Cement production and distribution
- Public utility services provided by state-owned companies
- Products and medicines for human use (at the importation and production levels)
- Bakery-related products

**Asset tax.** An asset tax is assessed based on net assets (as defined in the law) reported in the company's balance sheet. The asset tax rate is 1%. Income tax may be credited against asset tax. If the income tax equals or exceeds the asset tax for the tax year, no asset tax is due. If the income tax is less than the asset tax, the difference is payable as asset tax. In such circumstances, the asset tax represents a minimum tax for the year.

**Financial transaction tax.** A financial transaction tax applies to local and foreign currency operations carried in either national or foreign currency within the institutions of the national banking system, including the following:

- National Bank for Agricultural Development (Banco Nacional de Desarrollo Agrícola, or BANADESA)
- Financial entities
- Representation offices that are supervised by the National Commission on Banking and Insurance (Comisión Nacional de Bancos y Seguros, or CNBS)

The financial transaction tax applies to the following transactions:

- Debits (withdrawals) from at-sight deposits and checking accounts, carried out by the institutions referred to in the preceding paragraph (the financial institutions).
- Debits (withdrawals) of deposits from saving accounts, carried out by the financial institutions.
- Loan operations granted by the financial institutions that need to be absorbed by the lender. The contribution under the financial transaction tax applies only to disbursements and not to payments received by the financial institution. The CNBS must ensure that this special contribution is not transferred to the borrower.
- Issuance of cashier's checks, certified checks, traveler's checks and other similar existing financial instruments by financial institutions, or financial instruments to be created in the future, if they are issued without using the accounts mentioned in the first two bullets above.

- Payments or transfers in favor of third parties of money recovered or collected in the name of such parties that are carried out by the financial institutions without using the accounts mentioned in the first two bullets above.
- Transfers or money remittances abroad or locally, carried out through the financial institutions, without using the accounts mentioned in the first two bullets above.
- Credit card annual membership renewals, for the principal card holder only.

The following are the amounts of the contributions required under the financial transaction tax for the first, second, fourth, fifth and sixth categories of transactions listed above:

- First, second, fifth and sixth categories listed above: HNL2 (approximately USD0.09) per thousand or fraction of thousand
- Fourth category: HNL1.50 (approximately USD0.07) per thousand or fraction of thousand

The contributions for the transactions in the seventh (last) category above are provided in the following table.

Credit line		Contribution HNL
Exceeding HNL	Not exceeding HNL	
40,000	50,000	500
50,000	100,000	600
100,000	200,000	700
200,000	500,000	800
500,000	1,000,000	900
1,000,000	—	1,000

The law does not establish the contribution for the third category.

**Capital gains.** Capital gains are subject to tax at a rate of 10%.

Occasional (non-habitual) sales of non-depreciable assets are not subject to tax.

Capital losses are deductible only if derived from the sale of depreciable assets or from the sale of non-depreciable assets sold in the ordinary course of a trade or business.

The capital gain tax payment must be made for each transaction within 10 working days following the date on which the payment is received by the seller.

For the transfer of immovable property or rights and values carried out with a nonresident, the buyer must withhold 4% of the transfer value. The capital gain tax withheld constitutes a credit to such tax for the seller. The tax withheld must be reported in a filing and paid by the buyer within 10 calendar days following the date of the transaction.

**Administration.** The regular statutory tax year runs from 1 January through 31 December. However, taxpayers may elect a different tax year by giving notice to the tax authorities. Companies with a regular statutory tax year must file an annual income tax return and pay any corresponding tax due within 120 days after the end of the tax year. For companies with a different tax year, the filing and payment deadline is 90 days after the end of their tax year. Mandatory advance tax payments are payable each quarter based on the income tax liability for the preceding tax year.

**Dividends.** A 10% withholding tax is imposed on dividends.

**Foreign tax relief.** Honduras does not grant any relief for foreign taxes paid.

### C. Determination of taxable income

**General.** Net taxable income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the Honduran income tax law.

**Inventories.** Inventories are valued using the first-in, first-out (FIFO), last-in, first-out (LIFO) or weighted-average cost methods.

**Provisions.** Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes. However, payments of such liabilities are deductible expenses.

**Tax depreciation.** Depreciation may be computed using the straight-line method. Companies may obtain authorization from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, the method must be applied consistently thereafter. The following are the applicable straight-line method rates for some common assets.

Asset	Rate (%)
Buildings	2.5 to 10
Plant and machinery	10
Vehicles	10 to 33
Furniture and office equipment	10
Tools	25

**Relief for losses.** Companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses for three years. However, certain restrictions apply. Net operating losses may not be carried back.

**Groups of companies.** Honduran law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax	15
Customs duties	1 to 20
Payroll taxes; paid by employers; average rate	8.5
Municipal taxes	
Property tax; imposed on companies owning real estate	Various
Industry trade and service municipal tax; imposed monthly on income derived from the operations of companies; rates vary according to the annual production volume, income or sales	
Up to HNL500,000	0.030
From HNL500,000 to HNL10,000,000	0.040
From HNL10,000,000 to HNL20,000,000	0.030
From HNL20,000,000 to HNL30,000,000	0.020
Over HNL30,000,000	0.015

**E. Foreign-exchange controls**

The Honduran currency is the lempira (HNL). As of 15 October 2014, the exchange rate for the lempira was HNL21.4557 = USD1.

No restrictions are imposed on foreign-trade operations or foreign currency transactions.

**F. Tax treaties**

Honduras has not entered into any income tax treaties with other countries.

Carryback	0
Carryforward	Unlimited

\* This is a final tax applicable to persons not carrying on business in Hong Kong. The general withholding tax rate is 4.95% for payments to corporations. For payments to individuals (including unincorporated businesses), the general withholding tax rate is 4.5%. However, if a recipient of payments is an associate of the payer and if the intellectual property rights were previously owned by a Hong Kong taxpayer, a withholding tax rate of 16.5% applies to payments to corporations and, for payments to individuals (including unincorporated businesses), a 15% rate applies.

## B. Taxes on corporate income and gains

**Profits tax.** Companies carrying on a trade, profession or business in Hong Kong are subject to profits tax on profits arising in or derived from Hong Kong. However, certain royalties received from a Hong Kong payer by a foreign entity that does not otherwise carry on a trade, profession or business in Hong Kong are liable to a withholding tax in Hong Kong (see Section A).

The basis of taxation in Hong Kong is territorial. The determination of the source of profits or income can be extremely complicated and often involves uncertainty. It requires case-by-case consideration. To obtain certainty concerning this and other tax issues, taxpayers may apply to the Inland Revenue for advance rulings on the tax implications of a transaction, subject to payment of certain fees and compliance with other procedures.

**Rates of profits tax.** The corporate rate of profits tax is 16.5%.

Interest income and trading profits derived by corporations from qualifying debt instruments with a maturity period of less than seven years are taxed at a rate of 8.25%, while those derived from instruments with a longer maturity period are exempt from tax. Professional reinsurance companies authorized in Hong Kong may irrevocably elect to be taxed at 50% of the normal profits tax rate (that is, at a rate of 8.25%) on income derived from the business of reinsurance of offshore risks. Effective from the 2013–14 year of assessment, authorized captive insurers in Hong Kong may irrevocably elect to be taxed at a rate of 8.25% on their business of insurance of offshore risks. Authorized and certain bona fide widely held mutual funds, collective-investment schemes and unit trusts are exempt from tax.

**Tax exemption for nonresident funds.** Nonresident persons, including corporations, partnerships and trustees of trust estates, are exempt from tax in Hong Kong if their activities in Hong Kong are restricted to certain specified transactions and to transactions incidental to such transactions. An entity is regarded as a nonresident if its place of central management and control is located outside Hong Kong. Specified transactions are broadly defined to cover most types of transactions typically carried out by investment funds, such as transactions involving securities, future and currency contracts, commodities and the making of deposits other than by money-lending businesses.

Anti-avoidance measures provide that under certain circumstances, a resident investor in an exempt nonresident fund is deemed to derive a portion of the exempt income of the fund and is subject to tax in Hong Kong on such income, regardless of whether the fund makes an actual distribution.

**Capital gains.** Capital gains are not taxed, and capital losses are not deductible for profits tax purposes.

**Administration.** A fiscal year runs from 1 April to 31 March. If an accounting period does not coincide with a fiscal year, the profit for the accounting period is deemed to be the profit for the fiscal year in which the period ends. Special rules govern commencements and cessations of businesses and deal with accounting periods of shorter or longer duration than 12 months.

Companies generally make two payments of profits tax during a fiscal year. The first payment consists of 75% of the provisional tax for the current year plus 100% of the final payment for the preceding year. The second payment equals 25% of the provisional tax for the current year. The timing of payments is determined by assessment notices rather than by set dates, generally during November to April of the fiscal year.

**Dividends.** Hong Kong does not impose withholding tax on dividends paid to domestic or foreign shareholders. In addition, dividends received from foreign companies are not taxable in Hong Kong.

**Foreign tax relief.** In certain circumstances, a deduction is allowed for foreign taxes paid. A foreign tax credit is available under the full comprehensive double tax treaties entered into between Hong Kong and other jurisdictions. However, the amount of the credit may not exceed the amount of tax payable under the Hong Kong tax laws with respect to the relevant item of income. For details concerning Hong Kong's double tax treaties, see Section E.

### **C. Determination of assessable profits**

**General.** The assessment is based on accounts prepared on generally accepted accounting principles, subject to certain statutory tax adjustments.

In general, interest income earned on deposits with financial institutions is exempt from profits tax. However, this exemption does not apply if the recipient of the interest is a financial institution or if the deposits are used as security for borrowings and the interest expense with respect to the borrowings is claimed as a tax deduction.

Expenses must be incurred in the production of chargeable profits. Certain specified expenses are not allowed, including domestic and private expenses, capital expenditures, the cost of improvements, sums recoverable under insurance and tax payments. The deductibility of interest is subject to restrictions (see Section D).

**Inventories.** Stock is normally valued at the lower of cost and net realizable value. Cost must be determined using the first-in, first-out (FIFO) method or an average cost, standard cost or adjusted selling price basis. The last-in, first-out (LIFO) method is not acceptable. However, this may not apply to shares and securities held for trading purposes.

#### **Capital allowances**

*Industrial buildings.* An initial allowance of 20% is granted on new industrial buildings in the year in which the expenditure is incurred, and annual depreciation allowances are 4% of qualifying capital expenditure beginning in the year the building is first put into use. No initial allowance is granted on the purchase of used buildings, but annual depreciation allowances may be available. Subject to certain exceptions, buildings used for the purposes of a qualifying trade are industrial buildings.

*Commercial buildings.* An annual allowance (4% of qualifying capital expenditure each year) is available on commercial buildings. Buildings that do not qualify as industrial buildings are

commercial buildings. Refurbishment costs for premises, other than those used as domestic dwellings, may be deducted in equal amounts over a five-year period.

*Prescribed plant and machinery.* Subject to satisfying certain conditions, companies may immediately write off 100% of expenditure on manufacturing plant and machinery and on computer software and hardware.

*Environmental protection facilities.* Subject to satisfying certain conditions, capital expenditure incurred on eligible environmental protection machinery and environmentally friendly vehicles qualifies for a 100% write-off in the year in which the expenditure is incurred. Expenditure incurred on the construction of an eligible environmental protection installation forming part of a building or structure is deductible in equal amounts over a period of five years.

*Other plant and machinery, and office equipment.* An initial allowance of 60% is granted for non-manufacturing plant and machinery, and office equipment in the year of purchase. An annual allowance of 10%, 20% or 30% under the declining-balance method is available on the balance of the expenditure beginning in the year the asset is first used in the business. Consequently, the total allowances (initial and annual) in the first year can be 64%, 68% or 72%.

*Motor vehicles.* An initial allowance of 60% is granted for motor vehicles in the year of purchase. An annual allowance of 30% under the pooling system (declining-balance method) is allowed on the balance of the expenditure beginning in the year the asset is first used in the business.

*Intellectual property rights.* Subject to certain anti-avoidance provisions, capital expenditure incurred on the purchase of patents, industrial know-how, registered trademarks, copyrights and registered designs qualifies for tax amortization over a time period ranging from one to five years.

*Recapture.* Depreciation allowances are generally subject to recapture if the proceeds from the sale of a depreciable asset exceed its tax-depreciated value. The recapture rule also applies to prescribed plant and machinery (manufacturing plant and machinery and computer hardware and software) and environmental protection machinery and installations that were previously written off in full. Consequently, in the year of disposal, the sales proceeds from prescribed assets generally are included in chargeable profits, up to the original costs of the assets. Allowances for commercial and industrial buildings may be recaptured, up to their original costs. Assets depreciable under the pooling system (declining-balance method) are allocated to one of three pools according to their depreciation rates, which are 10%, 20% or 30%. Proceeds from the sale of an asset in a pool (up to the cost of the asset) are deducted from the pool balance. If a negative balance results within the pool, a balancing charge is added to taxable profits.

**Relief for business losses.** Losses incurred in a year can be carried forward indefinitely and set off against the profits of the company in subsequent years. No carryback is possible. Certain rules

prevent trafficking in loss companies. In addition, specific rules govern the offset of normal business losses against concessionary trading receipts (that is, those taxed at concessionary rates instead of the full normal rates) and vice versa.

**Groups of companies.** Consolidated filing is not permitted. Hong Kong does not provide group relief for tax losses.

#### **D. Miscellaneous matters**

**Mergers and reorganizations.** When considering an acquisition in Hong Kong, a company must first decide whether to acquire the shares or the assets of the target company. Unlike some other jurisdictions, Hong Kong tax law does not allow a step-up in tax basis of the underlying assets if shares are acquired. The target company retains the same tax basis for its assets, regardless of the price paid for the shares.

Effective from 3 March 2014, the new Companies Ordinance (Cap 622) introduces measures to facilitate an amalgamation of two or more wholly owned companies within a group without the need to seek approval from the court. The current Inland Revenue Ordinance does not contain specific measures providing for a court-free amalgamation, and assessing practice in this regard is expected to be issued in due course.

**Anti-avoidance legislation.** Transactions that are artificial, fictitious or predominantly tax-driven may be disregarded under general anti-avoidance tax measures. In addition, specific measures deny the carryforward of tax losses if the dominant reason for a change in shareholding of a corporation is the intention to use the tax losses. Other specific anti-avoidance measures include those designed to counteract certain leverage and cross-border leasing, non-arm's-length transactions between a Hong Kong resident company and its foreign affiliates and the use of personal service companies to disguise employer-employee relationships.

**Foreign-exchange controls.** Hong Kong does not impose foreign-exchange controls.

**Islamic bonds.** A special legislative framework provides comparable tax treatment in terms of stamp duty, profits tax and property tax for some common types of Islamic bonds (sukuk), vis-à-vis conventional bonds. However, no special tax incentives are conferred on Islamic bonds.

**Interest expense.** In an attempt to combat avoidance, restrictions are placed on the deductibility of interest expense. In general, subject to certain specific anti-avoidance rules, interest on monies borrowed is deductible for tax purposes if it is incurred in the production of chargeable profits in Hong Kong and if one of the following additional conditions is satisfied:

- The recipient is taxable in Hong Kong on the interest.
- The interest is paid to a recognized financial institution in Hong Kong or overseas.
- The interest is paid with respect to debt instruments that are listed or marketed in Hong Kong or in a recognized overseas market.

- The interest is paid with respect to money that is borrowed from an unrelated person and that is wholly used to finance capital expenditures on plant and machinery qualifying for capital allowances or the purchase of trading stock.

**Reversion of sovereignty to China.** Since 1 July 1997, Hong Kong has been a Special Administrative Region (SAR) of China under Article 31 of the constitution of China. However, as an SAR, Hong Kong has a tax system that is based on common law and distinct from the system used in Mainland China.

In addition, on its own, Hong Kong, using the name “Hong Kong, China,” may maintain and develop relations, and may conclude and implement agreements, with foreign states and regions and relevant international organizations in such fields as economics, trade, finance, shipping, communications, tourism, culture and sports.

### **E. Tax treaties**

Both the Hong Kong and Mainland China tax authorities take the view that Mainland China’s tax treaties with other countries do not cover Hong Kong.

For the avoidance of double taxation on shipping income, Hong Kong has entered into agreements with Denmark, Germany, Norway, Singapore, Sri Lanka and the United States. These agreements generally provide for tax exemption in one territory for profits and capital gains derived by an enterprise of the other territory in the first-mentioned territory with respect to the operation of ships in international traffic. However, under the agreement between Hong Kong and Sri Lanka, 50% of the profits derived from the operation of ships in international traffic may be taxed in the source jurisdiction. Apart from these agreements, reciprocal exemption provisions with the tax authorities of Chile, Korea (South) and New Zealand have also been confirmed.

Hong Kong has signed double tax agreements relating to airline profits with several jurisdictions, including Bangladesh, Croatia, Denmark, Estonia, Ethiopia, Fiji, Finland, Germany, Iceland, Israel, Jordan, Kenya, Korea (South), Laos, the Macau SAR, Maldives, Mauritius, Norway, the Russian Federation, Seychelles, Singapore, Sri Lanka and Sweden. Under these agreements, international transport income of Hong Kong airlines is exempt from tax in these signatory countries. However, international transport income of Hong Kong airlines that is exempt from tax overseas under these agreements or under relevant full comprehensive double tax treaties is taxed in Hong Kong.

Hong Kong has also entered into full comprehensive double tax treaties modeled on the conventional tax treaty adopted by the Organisation for Economic Co-operation and Development (OECD), with the jurisdictions listed in the table below. The table shows the withholding tax rates for dividends, interest and royalties paid from Hong Kong to residents of the treaty jurisdictions. The rates shown in the table are the lower of the treaty rates and the applicable rates under Hong Kong domestic law.

Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) The 19% rate is the standard rate of corporate income tax. The 10% rate applies to the first HUF500 million (approximately USD1,850,000) of taxable income. All taxpayers must pay tax on the alternative minimum tax base if this base exceeds taxable income calculated under the general rules (for further details, see Section B).
- (b) Permanent establishments of foreign companies are subject to special rules for the computation of the tax base (see Section B).
- (c) See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies incorporated in Hungary are subject to corporate tax on their worldwide profits. A company not incorporated in Hungary that has its place of effective management in Hungary is regarded as a Hungarian resident for corporate tax purposes and, accordingly, is subject to corporate tax on

its worldwide profits. If a double tax treaty applies, the provisions of the treaty may affect residence. Foreign companies carrying out taxable activities in Hungary through a permanent establishment are subject to corporate tax on their net profits derived from Hungarian sources.

**Rates of corporate income tax.** For the first HUF500 million (approximately USD1,850,000) of taxable income, the tax rate is 10%. The excess is taxed at 19%.

The same rates apply to the taxable income of permanent establishments of nonresident companies. In general, the various permanent establishments of a nonresident company are taxed as a single entity. However, the taxable income of permanent establishments that are registered as distinct branches with the Court of Registration must be calculated separately, and losses incurred by one branch may not offset the profits of another. Such registrations are an option for foreign taxpayers in some cases and mandatory in other cases, depending on the country of incorporation of the foreign entity, its planned activities and other circumstances.

**Alternative minimum tax.** The alternative minimum tax (AMT) was originally a tax on a certain minimum tax base. However, in response to a decision of the Constitutional Court invalidating the legislation, the AMT was effectively converted to an optional tax. Taxpayers either pay the AMT or fill out a form and, in principle, are more likely to be selected for a tax audit.

The AMT is calculated by applying the general rates of 10% and 19% to the AMT tax base. In general, the AMT tax base is 2% of total revenues, excluding any revenue attributable to foreign permanent establishments. The AMT tax base must be increased by an amount equal to 50% of additional loans contracted by the company from its shareholders or members during the tax year.

If a company's AMT is higher than the corporate income tax otherwise calculated or the pretax profit, the taxpayer may choose to pay either of the following:

- AMT.
- Corporate income tax otherwise payable. In this case, the company must fill out a one-page form that provides information regarding certain types of expenses and, in principle, is more likely to be selected for a tax audit.

### **Tax incentives**

*Reduced rates on certain types of income.* Companies may reduce their corporate tax base by 50% of royalty income, which includes, in certain cases, income from the disposal of intangible property. In effect, only half of the royalty income is taxable.

The total reduction mentioned above may not exceed 50% of the pretax profit of the company. The deduction may be claimed on the tax return. Unlike the development tax allowance (see *Development tax allowance*), no special reporting or preapproval obligations are imposed.

*Research and development double deduction.* In addition to being recognized expenses for corporate income tax purposes, the direct costs of basic research, applied research and research and development (R&D) incurred within the scope of a company's

activities reduces the corporate income tax base. As a result, a double deduction is allowed for these expenses for corporate income tax purposes. It is not required that the research itself take place in Hungary, and the double deduction may include R&D purchased from related or unrelated foreign enterprises and, in some cases, from Hungarian enterprises.

*R&D triple deduction.* Certain R&D activities conducted in cooperation with the Hungarian Academy of Arts and Sciences and its research institutions, public research centers or private research centers directly or indirectly owned by the state can result in a deduction of three times the R&D cost. However, this deduction is capped at HUF50 million (approximately USD185,000).

*Development tax allowance.* Companies may benefit from a development tax allowance (tax credit), conforming with European Community (EC) law, for up to 10 tax years if they satisfy all of the following conditions:

- They make an investment of at least HUF3 billion (approximately USD11 million) or an investment of HUF1 billion (approximately USD3,700,000) in an underdeveloped region.
- They meet either of the following conditions:
  - The average number of employees increases by at least 150 (or 75 in underdeveloped regions).
  - Compared to the tax year preceding the commencement of the investment, the increase in the annual wage cost is at least 600 times (300 times in underdeveloped regions) the minimum wage (for 2015, the minimum monthly wage is approximately HUF100,000 [approximately USD370]).
- The investment comprises one of the following:
  - The acquisition of a new asset
  - The enlargement of existing assets
  - The fundamental modification of the final product or the previous production method as a result of the investment

Beginning in 2013, taxpayers may claim a development tax allowance with respect to investments of at least HUF100 million (approximately USD370,000) in free entrepreneurial zones.

Small and medium-sized enterprises may become eligible for development tax allowances with respect to investments implemented in any region.

A development tax allowance can also be claimed for investments of at least HUF100 million (approximately USD370,000) in the fields of food product hygiene, environmental protection, basic or applied research or film production, if certain other requirements are met. Investments of any amount in any field that result in a certain level of job creation may also qualify for a tax allowance.

In general, companies must submit a notification regarding the allowance to the Ministry of National Economy before the start date of the investment and self-assess the tax allowance. However, companies must obtain permission from the Ministry of National Economy if their investment-related costs and expenses exceed EUR100 million (approximately USD111 million). Taxpayers must report the completion date of their investments within 90 days after the date on which the investment becomes operational.

The tax allowance may reduce the company's corporate income tax liability by up to 80%, resulting in an effective tax rate of 2% (instead of 10%) to 3.8% (instead of 19%). Depending on the location of the project, the allowance may cover between 20% and 50% of the eligible investment costs. In general, the allowance may be used within a 10-year period after the investment is put into operation, but it must be used by the 14th year after the declaration for the allowance was filed. In general, the 10-year period begins in the year following the year in which the investment is put into operation. However, the investor may request that the 10-year period begin in the year in which the investment is put into operation.

*Film tax credit.* Tax relief is provided to Hungarian companies sponsoring film production carried out in Hungary. The contributions are effectively refunded by the state because the sponsors can deduct the contributions from the corporate income tax payable, but the amount deducted may not exceed 20% of eligible expenses of the film production. In addition, these contributions, up to the above limit, are also deductible for corporate income tax purposes. The tax relief may be carried forward for a period of three years. It is available only if the sponsor does not receive any rights with respect to the sponsored film.

To qualify for tax incentives, films are subject to a comprehensive cultural test, which grants points for various aspects of the production, including the members of the crew, the actors and the theme of the film being European. In general, only films receiving more than a certain number of points qualify.

To use the film tax credit, the taxpayer must pay supplementary support to the beneficiary in the tax year in which the basic support is provided. The amount of supplementary support must be at least 75% of the basic support multiplied by the corporate income tax rate. This means that the taxpayer must pay at least 7.5% (considering a 10% tax rate) or 14.25% (considering a 19% tax rate) of the basic support as a supplementary support to the beneficiary. The supplementary support is not deductible for corporate income tax purposes.

*Sports tax credit.* Tax relief is provided to Hungarian companies supporting sports organizations in the following popular team sports:

- Football (that is, soccer)
- Handball
- Basketball
- Water polo
- Ice hockey

Under the sports tax credit scheme, national sports associations, professional sports organizations, amateur sports organizations, nonprofit foundations and civil sports organizations may be supported. Donations granted to these sports organizations are fully creditable against the corporate tax liability of the donor, capped at 70% of the donor's total corporate tax liability, if the taxpayer does not have government liabilities in arrears. Unused tax credits may be carried forward for a period of six years. In addition, amounts donated are also deductible for corporate income tax purposes. Supplementary sport development aid must be paid by the donors within the framework of sponsorship or aid contracts

equal to at least 75% of the amount indicated in the support certificate, multiplied by the 10% or 19% tax rate (that is, this supplementary development aid equals 75% of the tax saving). This expense is not deductible for corporate income tax purposes. The supplementary development aid must be transferred to the respective national sport associations or the respective sports organizations or foundations.

*Culture tax credit.* Tax relief is provided to Hungarian corporate taxpayers supporting cultural organizations (for example, theaters). The support can be for an amount of up to 80% of the organization's revenues from ticket sales. The mechanism of the tax relief is the same as for the sports tax credit (see *Sports tax credit*).

*New film, culture and sports tax credit.* Effective from 2015, film productions, sports organizations and cultural organizations may be supported by Hungarian corporate taxpayers in a new manner, as an alternative to the "old" model that will also remain in existence. Under the new rules, the taxpayer may designate a portion of its tax liability as support for a selected, qualifying organization. On receiving the tax payment from the taxpayer, the tax authority remits the designated amount to the beneficiary. Taxpayers can designate up to 50% of their monthly or quarterly tax advance payments and up to 80% of their "top-up payments" or year-end tax payments. As a benefit, the tax authority credits 7.5% of the amounts designated from advance tax payments and "top-up payments" and 2.5% of the amounts designated from the year-end tax payment to the taxpayer's tax account.

**Capital gains.** With the exception of capital gains on "reported shares" (see below), capital gains derived by Hungarian companies are included in taxable income and taxed at the standard corporate income tax rates.

Capital gains derived by nonresident companies from disposals of Hungarian shares (except for shares in Hungarian real estate companies, see below) are not subject to tax, unless the shares are held through a permanent establishment of the seller in Hungary.

*Reported shares.* If a taxpayer has held at least 10% of the registered shares of an entity for at least one year and reported the acquisition of the shares within 75 days after the date of the acquisition to the Hungarian tax authorities, the shares are "reported shares." If a shareholding has already been reported to the tax authorities, further reporting is necessary only if the proportion of the shareholding increases.

Capital gains (including foreign-exchange gains) derived from the sale of the reported shares or from the contribution of the reported shares in kind to the capital of another company are exempt from corporate income tax. Capital losses (including foreign-exchange losses) incurred on such investments are not deductible for tax purposes.

*Reported intangibles.* Similar to the rules of reported shares, the acquisition and creation of royalty-generating intangible assets (intellectual property and pecuniary rights) by Hungarian taxpayers can be reported to the Hungarian tax authorities within 60 days after the date of acquisition or creation. If the reported intangible asset is sold or disposed of after a holding period of at least one

year, the gain on the sale is non-taxable. However, any losses related to such reported intangible asset (that is, impairment) are not deductible for corporate income tax purposes.

If an unreported intangible asset is sold, the gain on the sale is exempt from tax if this gain is used to purchase further royalty-generating intangibles within four years. A taxpayer may not enjoy the benefits arising from the reporting of a repurchased intangible if this asset was previously sold as an unreported intangible that benefited from this capital gains tax exemption.

*Hungarian real estate holding companies.* Gains derived by a nonresident from the alienation of shares in a Hungarian real estate holding company are taxed at a rate of 19% unless a tax treaty exempts such gains from taxation. A Hungarian company is deemed to be a Hungarian real estate holding company if either of the following circumstances exists:

- More than 75% of its book value is derived from real property located in Hungary.
- More than 75% of the total book value of the group, comprised of the company and its related companies that are engaged in business in Hungary (whether as resident entities or through permanent establishments), is derived from real property located in Hungary.

The capital gains are not taxable if the Hungarian company is listed on a recognized stock exchange.

**Administration.** In general, the calendar year is the tax year. However, companies may choose a different tax year if such year best fits their business cycle or is required to meet the management information needs of the parent company. Companies selecting a tax year other than the calendar year must notify the tax authorities within 15 days after making the decision on the selection.

Companies must file their corporate income tax returns by the last day of the fifth month following the end of the tax year. If their annual tax liability is greater than the total advance tax payments paid during the year, they are required to pay the balance on filing the return.

Extensions to file tax returns may not be obtained in advance of the due date. However, a company may obtain an extension after the due date if it files, with the completed late return, a letter requesting an extension to the date the return is filed. At their discretion, the tax authorities may accept the late return as being filed on time if the letter explains the reasons for the delay and establishes that the tax return is being filed within 15 days after the reason for the delay expires, and if the company pays any balance of tax due shown on the return.

If an extension for filing is granted, no late filing or payment penalties are imposed, and no interest is charged on the late payment. If an extension for filing is not granted, a penalty of up to HUF500,000 (approximately USD1,850) can be imposed. In addition, interest is charged on the late payment of tax at a rate equal to twice the National Bank of Hungary prime interest rate (on 31 December 2014, the prime interest rate was 2.1%). Interest is charged beginning on the date the payment is due, and it may be charged for up to three years.

In their corporate income tax returns, taxpayers also declare the tax advances that they will pay for the 12-month period beginning in the second month after the filing deadline. The total of these advances equals the amount of tax payable for the year covered in the corporate income tax return. For calendar-year taxpayers, which have a filing deadline of 31 May, advances are payable over a 12-month period beginning in July of the year following the year covered in the corporate income tax return and ending in June of the subsequent year. For companies with a corporate income tax liability exceeding HUF5 million (approximately USD18,500) in the preceding year, advance payments are divided into 12 equal monthly installments. Other companies make quarterly advance payments. In addition, by the 20th day of the last month of their tax year, companies must make a “top-up payment” if their net sales revenues exceeded HUF100 million (approximately USD370,000) in the preceding tax year. The amount of the payment is the difference between the installments paid during the tax year and the anticipated tax liability for the tax year.

### **Dividends**

*Dividends paid by Hungarian companies.* Withholding tax is not imposed on dividends paid to foreign companies.

Withholding tax at a rate of 16% is imposed on dividends paid directly to resident and nonresident individuals. Tax treaties may override Hungarian domestic law with respect to the withholding tax on dividends.

*Dividends received by Hungarian companies.* In general, dividends received by Hungarian companies are exempt from corporate income tax. The only exception applies to dividends paid by controlled foreign corporations (CFCs; see Section E).

### **Interest, royalties and service fees**

*Interest, royalties and service fees paid by Hungarian companies.* Withholding tax is not imposed on interest, royalties and service fees or any other payments made to local or foreign companies.

Hungary imposes a withholding tax at a rate of 16% on interest paid directly to individuals (this rule does not apply to interest paid to individuals resident in certain countries if the payment falls under a reporting obligation under the European Union [EU] Savings Directive).

*Interest and royalties received by Hungarian companies.* A tax incentive may apply to royalties received by Hungarian companies (see *Tax incentives*). Interest received by a Hungarian company is taxable according to the general rules.

**Foreign tax credit.** Foreign taxes paid on foreign-source income may be credited against Hungarian tax. Foreign dividend withholding tax may be credited for Hungarian tax purposes if the dividend or the undistributed profit is subject to tax in Hungary.

## **C. Determination of trading income**

**General.** Taxable income is based on financial statements prepared in accordance with Hungarian accounting standards. These standards are set forth in the law on accounting, which is largely

modeled on EU directives. Taxable income is determined by adjusting the profits shown in the annual financial statements by items described in the Act on Corporate Income Tax. Some items are not subject to tax as income, such as dividends received (but see the controlled foreign corporation rules in Section E).

Some items, such as transfers without consideration, are not deductible for tax purposes.

**Tax depreciation.** In general, depreciation is deductible in accordance with the Annexes to the Act on Corporate Income Tax. Lower rates may be used if they are at least equal to the amount of the depreciation used for accounting purposes. The annexes specify, among others, the following straight-line tax depreciation rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings used in hotel or catering businesses	3
Commercial and industrial buildings	2 to 6
Leased buildings	5
Motor vehicles	20
Plant and machinery	
General rate	14.5
Automation equipment, equipment for environmental protection, medical equipment and other specified items	33
Computers	50
Intellectual property and film production equipment	50

**Relief for losses.** Pre-2015 losses can be applied in any tax year until 2020. Losses incurred in 2015 and subsequent years may be carried forward for five years only. The losses can be applied against only 50% of the tax base for a particular year. Certain special rules apply to losses incurred before 2009.

Change-of-control restrictions have been introduced with respect to the availability of previously incurred tax losses after corporate transformations, mergers and acquisitions.

**Groups of companies.** The Hungarian tax law does not allow the filing of consolidated tax returns by groups of companies.

#### **D. Other significant taxes**

The following table summarizes other significant taxes and provides the 2014 rates for these taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added (sales) tax, on goods, services and imports	
Standard rate	27
Preferential rates	5/18
Bank tax; imposed on various entities in the financial market; the tax base and tax rate varies by financial activity	Various
Levy on energy suppliers (“Robin Hood tax”)	31
Social security contributions, on gross salaries; in general, expatriates do not participate; paid by	
Employer	27

Nature of tax	Rate (%)
Employee (the contribution represents the sum of the 8.5% health-care contribution and the 10% pension fund contribution)	18.5
Excise duty, on various goods, including gasoline, alcohol, tobacco, beer, wine and champagne	Various
Local business tax; imposed on turnover or gross margin (A decision of the European Court of Justice held that this tax was compatible with EU law.)	2

## E. Miscellaneous matters

**Foreign-exchange controls.** The Hungarian currency is the forint (HUF). Hungary does not impose any foreign-exchange controls; the forint is freely convertible.

Companies doing business in Hungary must open a bank account at a Hungarian bank to make payments to and from the Hungarian authorities. They may also open accounts elsewhere to engage in other transactions.

Payments in Hungarian or foreign currency may be freely made to parties outside Hungary.

**Transfer pricing.** For contracts between related companies, the tax base of the companies must be adjusted by the difference between the market price and the contract price if the application of the market price would have resulted in higher income for the companies.

Taxpayers may also reduce the tax base in certain circumstances if, as a result of not applying market prices, their income is higher than it would have been if market prices had been applied. This does not apply if the transaction involves companies deemed to be controlled foreign corporations (CFCs; see *Controlled foreign corporations*).

The market price must be determined by one of the following methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Transactional net margin method
- Profit split method
- Any other appropriate method

These methods reflect the July 2010 update of the Organisation for Economic Co-operation and Development (OECD) guidelines. A decree issued by the Ministry of National Economy describes the requirements for the documentation of related-party transactions. Transfer-pricing documentation must be prepared for all related-party agreements that are in effect, regardless of the date on which the agreement was concluded.

The transfer-pricing rules also apply to in-kind capital contributions (including on foundation) and the withdrawal of assets in kind (in the case of capital reduction and possibly in the case of winding-up) by the majority shareholder. The transfer-pricing

rules also apply to in-kind dividend payments. Advance pricing agreements (APAs) are available.

Hungary has ratified and is applying the Arbitration Convention.

**Controlled foreign corporations.** A controlled foreign corporation (CFC) is defined as a nonresident company that meets one of the following two conditions, provided that one of the additional conditions mentioned in the next paragraph is also satisfied:

- It has a Hungarian resident individual shareholder who directly or indirectly owns at least 10% of the shares or the voting rights, or has a dominant influence in the company.
- The majority of the revenues of the company in the tax year derives from a Hungarian source.

In addition to the satisfaction of one of the conditions mentioned above, for a company to be a CFC, one of the following additional conditions must be satisfied:

- The effective corporate tax rate for the company is lower than 10%.
- Even though the company's pretax profit is positive, it does not pay tax because it has a zero or negative tax base.
- The company has a negative or zero pre-tax profit, and the foreign state applies a tax rate that is less than 10%. If the foreign state imposes multiple tax rates, the lowest rate applies in the application of this condition.

A nonresident company is not a CFC if its registered seat or residency is in an OECD or EU member state, or in a state with which Hungary has a double tax treaty (provided that the foreign company has real economic presence in that state; this condition applies in all three cases). Also, the foreign company does not qualify as a CFC if an entity that has been listed on a recognized stock exchange for at least five years or a related party holds at least 25% of the shares of the foreign company on every day of the tax year.

If a Hungarian company holds at least 25% of the shares of a CFC, the company must increase its tax base by an amount equal to its proportionate share in the undistributed after-tax profit of the CFC. This adjustment does not apply if an individual deemed to be a Hungarian tax resident holds shares in the Hungarian company.

Dividends received from CFCs do not qualify for the participation exemption regime and, accordingly, are treated as taxable income to the Hungarian shareholders (except for dividends that were already taxed as undistributed after-tax profits in previous years). Capital losses on investments in CFCs are not deductible for tax purposes.

**Debt-to-equity rules.** A Hungarian company's taxable income is increased by the interest payable on the amount of net debt in excess of three times the amount of the company's average net equity during the tax year.

Liabilities can be calculated on a net basis; that is, only the proportion of liabilities that exceeds the amount of certain receivables needs to be taken into consideration in the thin-capitalization calculation.

The thin-capitalization rules are extended to non-interest-bearing liabilities if a transfer-pricing adjustment has been applied to them. Consequently, when calculating thin capitalization, both interest accounted for in the books and deemed interest imputed as a result of transfer-pricing adjustments must be taken into account.

**Foreign investment.** No restrictions are imposed on the percentage of ownership that foreigners may acquire in Hungarian companies. Some restrictions exist with respect to the ownership of farmland.

## F. Treaty withholding tax rates

Hungary does not impose withholding taxes on payments to foreign entities. However, it does impose withholding tax on the payment of dividends and interest to foreign individuals (for details, see Section B).

Hungary has tax treaties in effect with the following jurisdictions.

Albania	India	Portugal
Armenia	Indonesia	Qatar
Australia	Ireland	Romania
Austria	Israel	Russian Federation
Azerbaijan	Italy	San Marino
Belarus	Japan	Serbia (b)
Belgium	Kazakhstan	Singapore
Bosnia and Herzegovina (a)	Korea (South)	Slovak Republic
Brazil	Kosovo	Slovenia
Bulgaria	Kuwait	South Africa
Canada	Latvia	Spain
China	Lithuania	Sweden
Croatia	Luxembourg	Switzerland
Cyprus	Macedonia	Taiwan
Czech Republic	Malaysia	Thailand
Denmark	Malta	Tunisia
Egypt	Mexico	Turkey
Estonia	Moldova	Ukraine
Finland	Mongolia	United Arab Emirates
France	Montenegro (b)	United Kingdom
Georgia	Morocco	United States (c)
Germany	Netherlands	Uruguay
Greece	Norway	Uzbekistan
Hong Kong SAR	Pakistan	Vietnam
Iceland	Philippines	
	Poland	

(a) The 1985 treaty between Hungary and the former Socialist Federal Republic of Yugoslavia is applied with respect to Bosnia and Herzegovina.

(b) The 2001 treaty between Hungary and the former Federal Republic of Yugoslavia is applied with respect to Serbia. In practice, Hungary and Montenegro also apply this treaty, but no formal announcement has been made to confirm this practice.

(c) This treaty was renegotiated in 2010, but the new treaty is not yet in force.

Hungary has signed double tax treaties with Bahrain and Saudi Arabia, but these treaties are not yet in force.

Hungary is negotiating double tax treaties with Algeria, Cuba, Iraq, Jordan, Kyrgyzstan, Lebanon, Liechtenstein, Oman, Panama, Sri Lanka and Turkmenistan.

## A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	20 (b)
Branch Tax Rate (%)	20 (a)
Withholding Tax (%)	
Dividends	
Residents	20 (c)
Nonresidents	18 (d)
Interest	
Residents	20
Nonresidents	10 (e)
Royalties from Patents, Know-how, etc.	20 (f)
Payments under Leases and Rent	20 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10

- (a) A 36% rate applies to partnerships.  
 (b) Capital gains are taxed as ordinary income. Capital gains may be offset by extraordinary depreciation (for details, see Section B).  
 (c) Dividends received by domestic companies are considered ordinary income. However, dividends received from domestic companies and from foreign companies that are taxed in a similar manner to Icelandic companies are fully deductible.  
 (d) An 18% withholding tax is imposed on dividends paid to nonresident entities. A 20% withholding tax is imposed on dividends paid to nonresident individuals. Nonresidents can obtain a refund of the withholding tax or apply for an exemption from the withholding tax based on an applicable double tax treaty. If no double tax treaty applies, nonresidents must suffer the withholding. However, residents of European Union (EU), European Economic Area (EEA) or European Free Trade Association (EFTA) states or the Faroe Islands are eligible for a full deduction for dividends received from domestic companies in

the same manner as domestic entities. Companies may claim this deduction by filing a tax return. They are accordingly reimbursed for withheld taxes in the general assessment in the following year.

- (e) A 10% withholding tax is imposed on interest paid to nonresident entities and nonresident individuals unless, on application, the Director of Internal Revenue grants an exemption from withholding tax based on an applicable double tax treaty. Alternatively, the withholding tax may either be refunded or not withheld. Interest on bonds issued in the name of financial undertakings or energy companies is not subject to withholding tax. The bonds must be registered at a central securities depository established in an Organisation for Economic Co-operation and Development (OECD), EEA or EFTA state or the Faroe Islands. Interest paid by Seðlabanki Íslands (the Icelandic central bank) in its own name or on behalf of the Icelandic treasury is also not subject to withholding tax.
- (f) Royalties, payments under leases and rent payments that are paid to nonresident companies, partnerships and individuals are subject to withholding tax at a rate of 20%. A 20% rate applies to resident companies. A 36% rate applies to resident partnerships. These payments are not subject to withholding when paid to residents.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are taxed on their worldwide income. Resident corporations are those incorporated, registered, domiciled or effectively managed in Iceland. Nonresident companies are taxed only on their income earned in Iceland.

**Rate of corporate tax.** The rate of corporate income tax is 20%. The rate for taxable partnerships is 36%.

**Capital gains.** Capital gains result from profits derived from sales of assets. These gains are included in ordinary income and taxed at the normal income tax rates.

Capital gains may be offset by extraordinary depreciation on other fixed assets or on fixed assets acquired within two years of the sale. If the fixed assets are not acquired within two years of the sale, the gain is included in income, and a 10% penalty is imposed.

**Profits from stock sales.** Profits derived by domestic companies from stock sales are considered ordinary income. However, profits derived from stock sales in domestic companies and in foreign companies that are taxed in a similar manner to Icelandic companies are fully deductible.

**Administration.** The tax year is generally the calendar year.

Due dates for filing income tax returns vary, depending on the type of entity. The filing date for limited companies and partnerships, which is 31 May, is usually extended. Monthly advance tax payments are due on the first day of each month except for January and October. Each advance payment equals 8.5% of the previous year's tax. The tax due is determined when the annual assessment is issued. Companies generally must pay the unpaid balance in two equal monthly payments in November and December.

*Advance rulings.* Both resident and nonresident companies may request advance rulings on most corporate income tax consequences of future transactions. Rulings are issued only on matters of substantial importance.

**Dividends.** Dividends earned by domestic companies are considered ordinary income. Dividends are subject to withholding tax except for dividends paid to companies of the same tax-consolidated

group. However, dividends received from domestic companies and from foreign companies that are taxed in a similar manner to Icelandic companies are fully deductible.

Withholding tax is imposed on dividends paid to nonresidents. The rate is 18% for companies and 20% for individuals. Tax treaties may reduce or eliminate the dividend withholding tax. Nonresidents from EU, EEA or EFTA states or the Faroe Islands are eligible for a full deduction from dividends received from domestic companies in the same manner as domestic entities. Companies may claim this deduction by filing a tax return. They are accordingly reimbursed for withheld taxes in the general assessment in the following year.

No withholding tax is imposed on distributions by taxable partnerships.

**Foreign tax relief.** Relief for double taxation may be obtained unilaterally under Icelandic domestic law or under a tax treaty. Unilateral relief may be granted through a tax credit against Icelandic income tax at the discretion of the Director of Internal Revenue.

### C. Determination of trading income

**General.** The computation of taxable income is based on net income in the financial statements prepared according to generally accepted accounting principles. For tax purposes, several adjustments are made, primarily concerning depreciation and write-offs of inventory.

In general, expenses incurred to generate and maintain business income are deductible.

**Inventories.** Inventories are valued at the lower of cost or market value. Cost must be determined using the first-in, first-out (FIFO) method. Five percent of the value of inventory at the end of the year is deductible.

**Tax depreciation.** Depreciation must be calculated using either the declining-balance method or the straight-line method. The straight-line method applies to buildings, expendable natural resources and the right of ownership of valuable intellectual properties, including copyright, publishing rights, patent rights and brand rights. The declining-balance method applies to ships, aircraft, vehicles and machinery. Fixed assets cannot be depreciated below 10% of cost. The following are some of the applicable depreciation rates.

Assets	Rate (%)
Buildings	
Office and retail	1 to 3
Industrial plants	3 to 6
Drilling holes and transmission lines	7.5 to 10
Ships, aircraft, cars carrying fewer than nine persons (except taxis)	10 to 20
Automobiles and other transport vehicles	20 to 35
Industrial machinery and equipment	10 to 30
Office equipment	20 to 35
Machinery and equipment for building and construction	20 to 35
Other movable property	20 to 35

The amortization period for goodwill ranges from 5 to 10 years. The amortization period for copyrights, patents, trademarks, designs, models, know-how or similar rights ranges from five to seven years.

**Relief for losses.** Losses may be carried forward for 10 years. Losses may not be carried back.

**Groups of companies.** Resident companies may use group consolidation if one company owns at least 90% of the shares in another company or if at least 90% of the shares in a company are owned by companies that are members of the same tax-consolidated group.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on most goods sold in Iceland and most services rendered in Iceland	
Higher rate	25.5
Lower rate for hotels, books and publications, food products, heating of houses and road tolls	7
Social security contributions, paid by the employer on gross payroll	7.59
Commodity tax; on certain goods, including vehicles and fuel	Various

## E. Foreign-exchange controls

Comprehensive temporary capital controls were introduced in November 2008. The ability to shift between the Icelandic krona and foreign currency is restricted. Bonds and similar instruments denominated in Icelandic krona may not be converted to foreign currency on maturity. The restrictions apply both to residents and nonresidents. Transactions that facilitate imports and exports of goods and services and payments of dividends and interest are allowed.

Nonresidents may directly invest in most industries in Iceland, but they must notify Seðlabanki Íslands (the central bank) of such investments. The fishing industry is the principal industry in which investments by nonresidents are limited. Nonresidents may not own a majority in such companies.

## F. Treaty withholding tax rates

	Dividends		Interest %	Royalties %
	A (a) %	B %

Non-treaty countries	18	20	10 (f)	20 (g)

A Qualifying companies.

B Individuals and other companies.

(a) Unless indicated otherwise, the rate applies to corporate shareholders with ownership of at least 10%.

(b) The lower rate applies to copyrights (except for films and similar items), computer software, patents and know-how. The higher rate applies to other royalties.

(c) The rate applies to corporate shareholders with ownership of at least 25%.

(d) These are the rates under the Nordic Convention.

(e) The lower rate applies to equipment leasing.

(f) A 10% withholding tax is imposed on interest paid to nonresident entities unless, on application, the Director of Internal Revenue grants an exemption from withholding tax. A 10% withholding tax is imposed on interest paid to nonresident individuals. Alternatively, the withholding tax may be refunded.

(g) Royalties paid to nonresidents are subject to withholding tax at a rate of 20%. The net royalties (gross royalties less expenses) are normally included in ordinary income and taxed at the general corporate income tax rate unless a tax treaty provides a reduced rate.

(h) The lower rate applies to royalties paid for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experiences if they are paid to a resident of the other contracting state that is the beneficial owner of the royalties.

Tax information and exchange agreements are in force with Andorra, Aruba, Bermuda, the British Virgin Islands, the Cayman Islands, Guernsey, the Isle of Man, Jersey, Monaco and the Netherlands Antilles.

**A. At a glance**

Domestic Company Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	20 (a)(b)
Branch Tax Rate (%)	40 (a)(c)
Withholding Tax (%)	
Dividends	0
Interest	
Paid to Domestic Companies	10 (d)(e)
Paid to Foreign Companies	20 (a)(d)(e)(f)(g)
Royalties from Patents, Know-how, etc.	25 (a)(d)(g)(h)
Technical Services Fees	25 (a)(d)(g)(h)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	8 (i)

- (a) The rates are subject to an additional levy consisting of a surcharge and a cess. They are increased by the following surcharges on such taxes:
- Domestic companies with net income exceeding INR100 million: 10%
  - Foreign companies with net income exceeding INR100 million: 5%
  - Domestic companies with net income exceeding INR10 million: 5%
  - Foreign companies with net income exceeding INR10 million: 2%

No surcharge is payable if the net income does not exceed INR10 million. The tax payable (inclusive of the surcharge, as applicable) is further increased by a cess levied at 3% of the tax payable. The withholding tax rates are increased by a surcharge for payments exceeding INR10 million made to foreign companies and a cess (see above).

- (b) See Section B.
- (c) For exceptions to this basic rate, see Section B.
- (d) A Permanent Account Number (PAN) is a unique identity number assigned to a taxpayer in India on registration with the India tax authorities. Effective from the 2010–11 fiscal year, if an income recipient fails to furnish its PAN, tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 20%.
- (e) Interest paid by business trusts is subject to a withholding tax at a rate of 10% for payments to residents and 5% for payments to nonresidents (including foreign companies) plus applicable surcharge and cess, effective from 1 October 2014 (See Section E).
- (f) This rate applies to interest on monies borrowed, or debts incurred, in foreign currency. Withholding tax at a rate of 5% (plus a surcharge of 2% or 5%, as applicable, and a 3% cess) is imposed on interest payments to nonresidents (including foreign companies) with respect to the following:
  - Infrastructure debt funds
  - Borrowings made by an Indian company in foreign currency by way of loans between 1 July 2012 and 1 July 2017, infrastructure bonds issued between 1 July 2012 and 1 July 2017 or long-term bonds issued between 1 October 2014 and 1 July 2017, subject to prescribed conditions (for long-term bonds, the lower withholding rate would not be affected if the recipient does not furnish a PAN; see footnote [d] above).
  - Rupee-denominated bonds of an Indian company or a government security issued to a foreign institutional investor or a qualified foreign investor, with respect to interest payable between 1 June 2013 and 1 June 2015
 Other interest is taxed at a rate of 40% (plus the surcharge of 2% or 5%, as applicable, and the 3% cess).
- (g) If a recipient of income is located in a Notified Jurisdictional Area (NJA), tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 30%. Cyprus has been notified as an NJA, effective from 1 November 2013 (for further details, see Section E).
- (h) The 25% rate (plus the 2% or 5% surcharge, as applicable, and the 3% cess) applies to royalties and technical services fees paid to foreign companies by Indian enterprises. However, if the royalties or technical services fees paid under the agreement are effectively connected to a permanent establishment or fixed place of the nonresident recipient in India, the payments are taxed on a net income basis at a rate of 40% (plus the 2% or 5% surcharge, as applicable, and the 3% cess).
- (i) Unabsorbed depreciation relating to the income year ending 31 March 2002 and future years may be carried forward indefinitely to offset taxable profits in subsequent years.

## B. Taxes on corporate income and gains

**Corporate income tax.** A domestic company is defined for tax purposes as a company incorporated in India. The definition also includes a company incorporated outside India (foreign company) if the company has made certain arrangements for declaration and payment of a dividend in India. The tax rates in India are specified with reference to a domestic company. As a result, it is possible for a foreign company to be taxed at rates applicable to a domestic company if it has made the necessary arrangements for the declaration and payment of a dividend in India.

A company resident in India is subject to tax on its worldwide income, unless the income is specifically exempt. A company not resident in India is subject to Indian tax on Indian-source income and on income received in India. Depending on the circumstances, certain income may be deemed to be Indian-source income. Companies incorporated in India are resident in India for tax purposes, as are companies incorporated outside India, if the control and management of their affairs is located wholly in India. As a result, if the control and management of a foreign company is located

wholly in India, it is subject to tax in India on its worldwide income. If such a foreign company also qualifies as a domestic company (see above), the tax rates applicable to a domestic company apply.

**Rates of corporate tax.** For the income year ending 31 March 2015, domestic companies are subject to tax at a basic rate of 30%. In addition, a 5% or 10% surcharge (for details regarding the surcharge, see footnote [a] in Section A) and a 3% cess are imposed on the income tax of such companies. Long-term capital gains are taxed at special rates (see *Capital gains*).

For foreign companies, the net income is taxed at 40% plus the 2% or 5% surcharge, as applicable, and the 3% cess. A rate of 25% plus the 2% or 5% surcharge and the 3% cess applies to royalties and technical services fees paid to foreign companies if the royalty or technical services fees agreement is approved by the central government or if it is in accordance with the Industrial Policy. A rate of 20% (plus the 2% or 5% surcharge and the 3% cess) applies to gross interest from foreign-currency loans or from units of a mutual fund. A lower rate of 5% (plus the 5%/2% surcharge and the 3% cess) applies to gross interest from foreign-currency borrowings raised by Indian companies or business trusts by way of loans between 1 July 2012 and 1 July 2017, long-term infrastructure bonds issued between 1 July 2012 and 1 July 2017 or long-term bonds issued between 1 October 2014 and 1 July 2017, subject to prescribed conditions. A lower rate of 5% (plus the 5%/2% surcharge and the 3% cess) also applies to interest payable between 1 June 2013 and 1 June 2015 on rupee-denominated bonds issued by Indian companies and government securities, subject to prescribed conditions. A lower rate of 5% (plus the 5%/2% surcharge and the 3% cess) applies to interest received from units of business trusts in India, effective from 1 October 2014 (see Section E).

If a nonresident with a permanent establishment or fixed place of business in India enters into a royalty or technical services fees agreement after 31 March 2003 and if the royalties or fees paid under the agreement are effectively connected to such permanent establishment or fixed place, the payments are taxed on a net income basis at a rate of 40% plus the 2% or 5% surcharge and the 3% cess.

**Tax incentives.** Subject to prescribed conditions, the following tax exemptions and deductions are available to companies with respect to business carried on in India:

- A 10-year tax holiday equal to 100% of the taxable profits is available to undertakings or enterprises engaged in the following:
  - Developing or operating and maintaining or developing, operating and maintaining infrastructure facilities (roads, toll roads, bridges, rail systems, highway projects including housing or other activities that are integral parts of the highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems, solid waste management systems, ports, airports, inland waterways, inland ports or navigational channels in the sea) if the undertaking begins to maintain and operate the infrastructure facility on or after 1 April 1995

- Generation or generation and distribution of power if the company begins to generate power at any time during the period of 1 April 1993 through 31 March 2017
- Starting transmission or distribution by laying a network of new transmission or distribution lines at any time during the period of 1 April 1999 through 31 March 2017
- Undertaking substantial renovation and modernization (at least 50% increase in book value of plant and machinery) of an existing network of transmission or distribution lines during the period of 1 April 2004 through 31 March 2017

The company may choose any 10 consecutive years within the first 15 years (10 out of 20 years in certain circumstances) for the period of the tax holiday. Effective from 1 April 2007, such tax holiday is not available to an undertaking or enterprise that is transferred in an amalgamation or demerger after 31 March 2007.

- A 7-year tax holiday equal to 100% of taxable profits for an undertaking that begins commercial production of mineral oil and natural gas in blocks licensed under certain specified circumstances or that begins refining mineral oil during the period of 1 October 1998 through 31 March 2012. The deduction for commercial production of mineral oil is not available for blocks licensed under a contract awarded after 31 March 2011.
- A 10-year tax holiday equal to 100% of profits and gains derived by an undertaking or enterprise from the business of developing a Special Economic Zone (SEZ) notified (through an official publication by the government of India) after 1 April 2005, subject to certain conditions.
- A 5-year tax holiday equal to 100% of taxable profits derived from operating and maintaining a hospital in the following locations:
  - A rural area if such hospital is constructed during the period of 1 October 2004 through 31 March 2008
  - Anywhere in India, other than in locations that are specifically excluded, if such hospital is constructed during the period of 1 April 2008 through 31 March 2013, subject to the fulfillment of other conditions
- A 10-year tax holiday equal to 100% of taxable profits for the first 5 years and 30% of taxable profits for the next 5 years from the business of processing, preserving and packaging of fruits or vegetables or from the integrated business of handling, storing and transporting food grains for undertakings that begin to operate on or after 1 April 2001. A similar tax holiday is available with respect to profits from the business of processing, preserving and packaging of meat and meat products, poultry or marine or dairy products, if such business begins to operate after 1 April 2009.
- A 15-year tax holiday with respect to profits derived from export activities by units that begin to manufacture or produce articles or things or provide services in SEZs, effective from the fiscal year beginning 1 April 2005. For the first 5 years of the tax holiday, a tax deduction equal to 100% of the profits derived from the export of articles, things or services provided is available. For the following 5 years, a tax deduction equal to 50% of the profits is available. For the next 5 years, the availability of the deduction is contingent on the allocation of the profits to a specified reserve and the use of such amounts in the prescribed manner. The deduction is capped at 50% of the profits allocated to the reserve.

- A 10-year tax deduction equal to 100% of profits derived from an undertaking that begins the manufacturing or production of specified goods in Sikkim and Northeastern states before 1 April 2007. This deduction is also available if an undertaking manufacturing the specified goods undertakes a substantial expansion that involves an increase in investment in plant and machinery by at least 50% of the book value of plant and machinery (computed before depreciation).
- A 10-year tax holiday equal to 100% of taxable profits for the first 5 years and 30% of taxable profits for the following 5 years for an undertaking that begins the manufacturing or production of specified goods in the states of Himachal Pradesh and Uttaranchal before 1 April 2012. This deduction is also available if an undertaking manufacturing the specified goods undertakes a substantial expansion that involves an increase in investment in plant and machinery by at least 50% of the book value of plant and machinery (computed before depreciation).
- A 5-year tax holiday equal to 100% of the profits from the business of collecting and processing or treating of biodegradable waste for either of the following purposes:
  - Generating power or producing biofertilizers, biopesticides or other biological agents
  - Producing biogas or making pellets or briquettes for fuel or organic manure
- Accelerated deduction of capital expenditure (other than expenditure on the acquisition of land, goodwill or financial instruments) incurred, wholly and exclusively for certain specified businesses in the year of the incurrence of such expense. Expense incurred before the commencement of business is allowed as a deduction on the commencement of the specified business. The following are the specified businesses:
  - Setting up and operating a cold chain facility or setting up and operating a warehousing facility for storage of agricultural produce, if operations begin on or after 1 April 2009
  - Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution including storage facilities that are an integral part of such network, if operations begin on or after 1 April 2007
  - Building and operating in India a new hotel with a two-star or above category, as classified by the central government, if operations begin on or after 1 April 2010
  - Building and operating in India a new hospital with at least 100 beds for patients, if operations begin on or after 1 April 2010
  - Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government, if operations begin on or after 1 April 2010
  - Developing and building a housing project under a scheme for affordable housing framed by the central or state government in accordance with the prescribed guidelines, if operations begin on or after 1 April 2011
  - Producing fertilizers in a new plant or newly installed capacity in an existing plant, on or after 1 April 2011
  - Setting up and operating an inland container depot or a container freight station notified or approved under the Customs Act on or after 1 April 2012
  - Setting up and operating a warehousing facility for storage of sugar on or after 1 April 2012

- Beekeeping and production of honey and beeswax on or after 1 April 2012
- Laying and operating a slurry pipeline for the transportation of iron ore on or after 1 April 2014
- Setting up and operating a semiconductor wafer fabrication manufacturing unit notified by the Central Board of Direct Taxes in accordance with prescribed guidelines, if operations begin on or after 1 April 2014

The deduction mentioned above is increased to 1.5 times the amount of capital expenditure (other than expenditure on the acquisition of land, goodwill or financial instruments) incurred by the following businesses beginning operations on or after 1 April 2012:

- Setting up and operating a cold chain facility
  - Setting up and operating a warehousing facility for the storage of agricultural produce
  - Building and operating a hospital with a least 100 beds for patients
  - Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government
  - Production of fertilizer in India
- Weighted deduction at a rate of 150% on expenditure on agriculture extension projects and on specified sums expended on skill development projects.

**Minimum alternative tax.** The minimum alternative tax (MAT) applies to a company if the tax payable by the company on its total income, as computed under the Income Tax Act, is less than 18.5% of its book profit. It is levied at a rate of 18.5% of book profit, plus applicable surcharge and cess (the surcharge, as applicable, is imposed at a rate of 5% or 10% for domestic companies and 2% or 5% for foreign companies, and the cess is imposed at a rate of 3%). MAT is levied on companies only and does not apply to firms or other persons, which are separately subject to an alternative minimum tax of 18.5% (plus applicable surcharge and cess). In computing book profit for MAT purposes, certain positive and negative adjustments must be made to the net profit shown in the books of account.

The net profit as per the profit-and-loss account is increased by the following key items:

- Amount of income tax (including dividend distribution tax, any interest charged under the Income Tax Act, surcharge and cess) paid or payable and the provision for such tax
- Amount carried to any reserves
- Amount allocated to provisions for liabilities other than ascertained liabilities
- Amount allocated to provision for losses of subsidiary companies
- Amount of dividend paid or proposed
- Amount of expenditure related to exempt income
- Amount of depreciation
- Amount of deferred tax and the provision for such tax, if debited to the profit-and-loss account
- Amounts set aside as a provision for diminution in the value of any asset
- Amount in revaluation reserve relating to a revalued asset on retirement of the asset

The net profit is decreased by the following key items:

- Amount withdrawn from any reserves or provisions if such amount is credited in the profit-and-loss account
- Amount of losses carried forward (excluding depreciation) or unabsorbed depreciation, whichever is less, according to the books of account
- Profits of “sick” industrial companies, which are companies that have accumulated losses equal to or exceeding their net worth at the end of a financial year and are declared to be sick by the Board for Industrial and Financial Reconstruction
- Income that is exempt from tax
- Amount of depreciation debited to the profit-and-loss account excluding depreciation on account of revaluation of assets
- Amount of deferred tax, if any such amount is credited to the profit-and-loss account
- Amount withdrawn from revaluation reserve and credited to the profit-and-loss account, to the extent that it does not exceed depreciation of the revalued assets

MAT paid by companies can be carried forward and set off against income tax payable in subsequent years under the normal provisions of the Income Tax Act for a period of 10 years. The maximum amount that can be set off against regular income tax is equal to the difference between the tax payable on the total income as computed under the Income Tax Act and the tax that would have been payable under the MAT provisions for that year.

Effective from 1 April 2012, MAT provisions apply to income that is earned on or after 1 April 2005 from a business carried on or services rendered by an entrepreneur in a unit of a SEZ or by a developer in a SEZ. MAT does not apply to income from life insurance businesses.

A report in a prescribed form that certifies the amount of book profits must be obtained from a chartered accountant.

### **Capital gains**

*General.* The Income Tax Act prescribes special tax rates for the taxation of capital gains. Gains derived from “transfers” of “capital assets” are subject to tax as capital gains and are deemed to be income in the year of the transfer.

“Transfer” and “capital asset” are broadly defined in the Income Tax Act. In addition, shares or interests in foreign entities are deemed to be capital assets located in India if they derive, directly or indirectly, their value substantially from assets located in India. Gains derived from the transfer of such deemed capital assets are deemed to be income in the year of transfer.

The tax rate at which capital gains are taxable in India depends on whether the capital asset transferred is a short-term capital asset or a long-term capital asset. A short-term capital asset is defined as a capital asset that is held for less than 36 months immediately before the date of its transfer. However, if the capital asset is a security (other than a unit) listed on a recognized stock exchange in India, a unit of an equity-oriented mutual fund or a specified zero-coupon bond, a 12-month period replaces the 36-month period. A capital asset that is not a short-term capital asset is a long-term capital asset.

*Capital gains on specified transactions on which Securities Transaction Tax has been paid.* Long-term capital gains derived from the transfer of equity shares, units of an equity-oriented fund or units of a business trust on a recognized stock exchange in India are exempt from tax if Securities Transaction Tax (STT) has been paid on the transaction. For further details regarding STT, see Section D.

Short-term capital gains derived from the transfer of equity shares in a company, units of an equity-oriented fund or units of a business trust on a recognized stock exchange in India are taxable at a reduced rate of 15% plus the surcharge, as applicable, and the cess, if STT has been paid on the transaction.

The tax regime described above applies to all types of taxpayers, including Foreign Institutional Investors (FIIs).

Sales of unlisted equity shares that are included in an initial public offer are also subject to STT, effective from 1 July 2012, and are eligible for the aforementioned reduced rates with respect to long-term or short-term capital gains.

*Capital gains on transactions on which STT has not been paid.* For sales of shares and units of mutual funds that have not been subject to STT and for capital gains derived from the transfer of a capital asset that is not a specified security, the following are the capital gains tax rates (excluding the applicable surcharge and cess).

Type of taxpayer	Short-term capital gains rate (%) (a)	Long-term capital gains rate (%) (a)
Domestic companies	30	20 (b)
FIIs	30	10
Nonresidents other than FIIs	40	20 (b)(c)

- (a) The above rates are subject to a surcharge and cess. The surcharge is levied at a rate of 5% for domestic companies and at a rate of 2% for foreign companies if the net income of the company exceeds INR10 million. The surcharge rate is increased to 10% for domestic companies and 5% for foreign companies if net income exceeds INR100 million. The rate of the cess is 3%.
- (b) A concessional rate of 10% (plus surcharge and cess) applies in certain cases, such as the transfer of listed securities, listed units of mutual funds or zero-coupon bonds, subject to certain conditions.
- (c) Effective from 2012-13 fiscal year, gains derived from the transfer of unlisted securities are taxable at a rate of 10%, without the benefit of protection from foreign currency fluctuation and indexation for inflation on the computation of such gains (see discussion below).

*Computational provisions.* For assets that were acquired on or before 1 April 1981, the market value on that date may be substituted for actual cost in calculating gains. The acquisition cost is indexed for inflation. However, no inflation adjustment is allowed for bonds and debentures. For the purpose of calculating capital gains, the acquisition cost of bonus shares is deemed to be zero. Nonresident companies compute capital gains on shares and debentures in the currency used to purchase such assets, and consequently they are protected from taxation on fluctuations in the value of the Indian rupee. As a result, the benefit of indexation is not available to nonresident companies with respect to the computation of capital gains on shares. Effective from the 2012-13 fiscal year, if the consideration is not ascertainable or determinable for a transfer, the fair market value of the asset transferred is deemed to be the full value of consideration.

*Slump sales, demergers and amalgamations.* Special rules apply to “slump sales,” “demergers” and “amalgamations” (for a description of amalgamations, see Section C).

A “slump sale” is the transfer of an undertaking for a lump-sum consideration without assigning values to the individual assets and liabilities. The profits derived from such sales are taxed as long-term capital gains if the transferred undertaking has been held for more than 36 months.

Capital gains on a slump sale equal the difference between lump-sum consideration and the net worth of the undertaking. For purposes of computing capital gains, the net worth of the undertaking equals the difference between the value of the total assets (the sum of the tax-depreciated value of assets that are depreciable for income tax purposes and the book value of other assets) of the undertaking or division and the book value of liabilities of such undertaking or division.

With respect to companies, a “demerger” is the transfer of an undertaking by one company (demerged company) to another company (resulting company) pursuant to a scheme of arrangement under Sections 391 to 394 of the Companies Act, 1956, provided that certain conditions are satisfied. Subject to certain conditions, the transfer of capital assets in a demerger is not considered to be a transfer subject to capital gains tax if the resulting company is an Indian company.

In a demerger, the shareholders of the demerged company are issued shares in the resulting company in proportion to their existing shareholdings in the demerged company based on a predetermined share-issue ratio. This issuance of shares by the resulting company to the shareholders of the demerged company is exempt from capital gains tax.

Like demergers, if certain conditions are satisfied, transfers of capital assets in amalgamations are not considered to be transfers subject to capital gains tax, provided the amalgamated company is an Indian company.

In an amalgamation, shareholders of the amalgamating company are usually issued shares in the amalgamated company in exchange for their existing shareholding in the amalgamating company based on a predetermined share-exchange ratio. Such exchange of shares is exempt from capital gains tax if the following conditions are satisfied:

- The transfer is made in consideration of the allotment of shares in the amalgamated company (unless the shareholder itself is the amalgamated company).
- The amalgamated company is an Indian company.

A transfer of shares in an Indian company in an amalgamation of two foreign companies is exempt from capital gains tax if the following conditions are satisfied:

- At least 25% of the shareholders of the amalgamating foreign company continue to remain shareholders of the amalgamated foreign company.
- Such transfer does not attract capital gains tax in the country of incorporation of the amalgamating foreign companies.

*Depreciable assets.* To compute capital gains on sales of assets on which depreciation has been allowed, the sales proceeds of the assets are deducted from the declining-balance value of the classes of assets (including additions during the year) of which the assets form a part. If the sales proceeds exceed the declining-balance value, the excess is treated as short-term capital gain. Otherwise, no capital gain results from sales of such assets even if the sales proceeds for a particular asset are greater than the cost of the asset.

*Non-depreciable assets.* For non-depreciable assets, such as land, gains are computed in accordance with the rules described below.

If the asset is held for 36 months or more, the capital gain is considered a long-term capital gain, which equals the net sale consideration less the indexed cost of acquisition. The gain on an asset held for less than 36 months is considered a short-term capital gain, which equals the sale consideration less the acquisition cost. For listed shares, listed securities, equity-oriented units of mutual funds and zero-coupon bonds, a 12-month period replaces the 36-month period.

The transfer of a capital asset by a parent company to its wholly owned Indian subsidiary or the transfer of a capital asset by a wholly owned subsidiary to its Indian parent company is exempt from capital gains tax, subject to the fulfillment of certain conditions.

**Administration.** The Indian fiscal year runs from 1 April to 31 March. All companies must file tax returns by 30 September or 30 November (for companies undertaking international transactions; see the discussion of transfer pricing in Section E). Tax is payable in advance on 15 June, 15 September, 15 December and 15 March. Any balance of tax due must be paid on or before the date of filing the return. The carryforward of losses for a fiscal year is not allowed if a return is filed late.

A nonresident with a liaison office in India is required to submit a statement in the prescribed form within 60 days after the end of the fiscal year.

**Withholding taxes.** Domestic companies are subject to the following withholding taxes.

Type of payment	Rate (%) (a)
Dividends	0
Interest	10 (b)
Commissions from sales of lottery tickets	10
Other specified commissions	10
Payments to contractors	2
Rent	2/10 (c)
Income from lotteries and horse races	30
Professional and technical service fees	10
Royalties	10
Payments of compensation to residents for the compulsory acquisition of certain immovable property	10
Payment of consideration for transfer of immovable property	1

(a) If an income recipient fails to furnish its Permanent Account Number (PAN), tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 20%.

(b) See footnote (e) in Section A.

- (c) The withholding tax rate for rental payments is 10%. For equipment rental, the rate is 2%.

Non-domestic companies are subject to the following withholding taxes.

Type of payment	Rate (%) (a)(b)(c)
Dividends	0
Interest on foreign-currency loans	20 (d)
Royalties and technical services fees	25 (e)
Rent	40
Income from lotteries and horse races	30
Long-term capital gains other than exempt gains	20
Other income	40

- (a) The 2% or 5% surcharge (applicable to payments made to foreign companies exceeding INR10 million or INR100 million, respectively) and the 3% cess are imposed on the above withholding taxes.
- (b) If the income recipient fails to furnish a PAN to the payer, tax must be withheld at the higher of the following rates:
- Rate specified in the relevant provision of the Income Tax Act
  - Tax treaty rate
  - 20%
- (c) If the recipient of income is located in a Notified Jurisdictional Area (NJA), tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 30%. Cyprus has been notified as an NJA, effective from 1 November 2013 (see Section E).
- (d) See footnotes (e) and (f) in Section A.
- (e) See footnote (h) in Section A.

**Dividends.** Dividends paid by domestic companies are exempt from tax in the hands of the recipients. However, domestic companies must pay a dividend distribution tax (DDT) at a rate of 19.995% (basic rate of 15% on the gross amount of dividend payable plus the 10% surcharge and the 3% cess) on dividends declared, distributed or paid by them on or after 1 April 2003. The DDT paid is a nondeductible expense.

The amount of dividends (on which DDT is leviable) that are paid by a domestic company can be reduced by the amount of dividends received from its subsidiary on which the subsidiary has paid DDT, subject to the satisfaction of prescribed conditions.

Gross dividends received by a domestic company from a specified foreign company (in which it has shareholding 26% or more) are taxable at a concessional rate of 15% (plus applicable surcharge and cess).

Dividends received by an Indian company from a foreign company in which the Indian company has a shareholding of more than 50% can be set off against subsequent dividends paid by the Indian company to its shareholders on which DDT is payable, subject to conditions.

DDT is also payable for dividends declared, distributed or paid on or after 1 June 2011, by a unit of SEZ or by a developer of SEZ.

**Buyback tax.** The buyback of unlisted shares by an Indian company is subject to buyback tax at a rate of 20% plus surcharge of 10% and cess of 3%, resulting in effective tax rate of 22.66%. The tax is computed on the difference between the price at which shares are bought back and the consideration received by the company for issuance of shares. The amounts received are exempt in the hands of the shareholders.

**Foreign tax relief.** Foreign tax relief for the avoidance of double taxation is governed by tax treaties with several countries. If no such agreements exist, resident companies may claim a foreign tax credit for the foreign tax paid. The amount of the credit is the lower of the Indian tax payable on the income that is taxed twice and the foreign tax paid. Treaty benefits and relief are available only if a nonresident taxpayer obtains a tax-residency certificate indicating that he or she is resident in a country outside India. This certificate must be issued by the government of that country. In addition to obtaining the certificate, taxpayers must maintain certain prescribed documents and information.

### C. Determination of trading income

**General.** Business-related expenses are deductible; capital expenditures (other than on scientific research in certain cases) and personal expenses may not be deducted. Certain expenses on which taxes are required to be withheld are allowable as deductions only if the required taxes have been withheld and paid to the government. The deductibility of head-office expenses for non-resident companies is limited.

Income derived from operations with respect to mineral oil, and certain other income derived by nonresidents are taxed on a deemed-profit basis. Under an optional tonnage tax scheme, shipping profits derived by Indian shipping companies are taxed on a deemed basis.

**Inventories.** In determining trading income, inventories may, at the taxpayer's option, be valued either at cost or the lower of cost or replacement value. The last-in, first-out (LIFO) method is not accepted.

**Provisions.** Provisions for taxes (other than income tax, dividend distribution tax and wealth tax, which are not deductible expenses) and duties, bonuses, leave salary and interest on loans from financial institutions and scheduled banks are not deductible on an accrual basis unless payments are made before the due date of filing of the income tax return. If such payments are not made before the due date of filing of the income tax return, a deduction is allowed only in the year of actual payment. General provisions for doubtful trading debts are not deductible until the bad debt is written off in the accounts, but some relief is available for banks and financial institutions with respect to nonperforming assets. Interest payable on loans, borrowings or advances that is converted into loans, borrowings or advances may not be claimed as a deduction for tax purposes.

**Depreciation allowances.** Depreciation is calculated using the declining-balance method and is allowed on classes of assets. Depreciation rates vary according to the class of assets. The following are the general rates.

Asset	Rate (%)
Plant and machinery	15*
Motor buses, motor lorries and motor taxis used in a rental business	30
Motor cars other than those used in the business of running them on hire	15
Buildings	10
Furniture and fittings	10

\* Subject to the fulfillment of prescribed conditions, accelerated depreciation equal to 20% of the actual cost is allowed in the first year with respect to plant and machinery (other than ships or aircraft) acquired or installed after 31 March 2005.

Depreciation is also allowed on intangibles, such as know-how, patents, copyrights, trademarks, licenses, franchises or other similar commercial rights. These items are depreciated using the declining-balance method at a rate of 25%.

Special rates apply to certain assets, such as 60% for computers and computer software, 80% for energy-saving devices and 100% for air or water pollution-control equipment. Additions to assets that are used for less than 180 days in the year in which they are acquired and placed in service qualify for depreciation in that year at one-half of the normal rates. On the sale or scrapping of an asset within a class of assets, the declining-balance value of the class of assets is reduced by the sales proceeds (for details concerning the capital gains taxation of such a sale, see Section B).

Companies engaged in power generation or in power generation and distribution may elect to use the straight-line method of depreciation at specified rates.

Companies engaged in the business of manufacturing or production of articles or things are allowed an additional deduction of 15% of the cost of new plant and machinery acquired and installed between 1 April 2013 and 31 March 2015 if the aggregate expenditure on such new plant and machinery exceeds INR1 billion during the 2013–14 and 2014–15 fiscal years. In addition, for the acquisition and installation of new plant and machinery (other than ships, aircraft, computers, computer software and vehicles) for an amount exceeding INR250 million, a deduction of 15% of actual cost is available to manufacturing companies for the 2014–15 and 2016–17 fiscal years.

**Relief for losses.** Business losses, excluding losses resulting from unabsorbed depreciation of business assets (see below), may be carried forward to be set off against taxable income derived from business in the following eight years, provided the income tax return for the year of loss is filed on time. For closely held corporations, a 51% continuity of ownership test must also be satisfied.

Unabsorbed depreciation may be carried forward indefinitely to be set off against taxable income of subsequent years.

Losses under the heading “Capital Gains” (that is, resulting from transfers of capital assets) may not be set off against other income, but may be carried forward for eight years to be set off against capital gains. Long-term capital losses may be set off against long-term capital gains only.

*Amalgamations and demergers.* Special rules apply to “amalgamations” and “demergers” (for a description of a “demerger,” see Section B). With respect to companies, an “amalgamation” is the merger of one or more companies with another company or the merger of two or more companies to form one company (the company or companies that merge are referred to as the “amalgamating company or companies” and the company with which they merge, or which is formed as a result of the merger, is known as the “amalgamated company”) that meet certain specified conditions.

An amalgamated company may claim the benefit of the carryforward of business losses and unabsorbed depreciation of the amalgamating companies if the following conditions are satisfied:

- Shareholders holding at least 75% of the shares of the amalgamating company become shareholders of the amalgamated company.
- The amalgamating company owns an industrial undertaking, a ship or a hotel.
- The amalgamating company has been engaged in business for at least three years and incurred the accumulated business loss or unabsorbed depreciation during such period.
- As of the date of amalgamation, the amalgamating company has continuously held at least 75% of the book value of the fixed assets that it held two years before the date of the amalgamation.
- At least 75% of the book value of fixed assets acquired from the amalgamating company is held continuously by the amalgamated company for a period of five years.
- The amalgamated company continues the business of the amalgamating company for at least five years from the date of amalgamation.
- An amalgamated company that acquires an industrial undertaking of the amalgamating company through an amalgamation must achieve a level of production that is at least 50% of the “installed capacity” of the undertaking before the end of four years from the date of amalgamation and continue to maintain this minimum level of production until the end of the fifth year from the date of amalgamation. For this purpose, “installed capacity” is the capacity of production existing on the date of amalgamation.
- Additional specified conditions apply to ensure that the amalgamation is for genuine business purposes.

In the event of non-compliance with any of the above conditions, any business losses carried forward and unabsorbed depreciation that has been set off by the amalgamated company against its taxable income is treated as income for the year in which the failure to fulfill any of the above conditions occurs.

**Groups of companies.** The income tax law does not provide for the consolidation of income or common assessment of groups of companies. Each company, including a wholly owned subsidiary, is assessed separately.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Securities Transaction Tax (STT); payable on transactions in equity shares, derivatives, units of an equity-oriented mutual funds and units of business trusts on a recognized stock exchange; the tax is imposed on the value of the transaction and varies according to the type of transaction	
Delivery-based transactions in equity shares or in units of equity-oriented funds	
Buyer	
Shares	0.1

Nature of tax	Rate (%)
Units	Nil
Seller	
Shares	0.1
Units	0.001
Sale of units of an equity-oriented mutual funds; tax paid by seller	0.001
Non-delivery-based transactions in equity shares or in units of an equity-oriented fund; tax paid by seller	0.025
Sale of derivatives	
Sale of option (seller); rate applied to option premium	0.017
Sale of option when option is exercised (buyer); rate applied to settlement price	0.125
Sale of futures (seller)	0.01
Sale of unlisted equity shares under offer for sale to public	0.2
Sale of units of a business trust (delivery-based)	
Tax paid by buyer	0.1
Tax paid by seller	0.1
Sale of units of a business trust (non-delivery-based); tax paid by seller	0.025
Commodities transaction tax; tax paid by seller on taxable value on sales of commodities derivatives	0.01
Central value-added tax (CENVAT), on goods manufactured in India; levied by the central government	Various
Customs duty, on goods imported into India; levied by the central government	Various
Sales tax; generally imposed on sales of goods; levied either by the central government (central sales tax) on interstate sales or the state government (state sales tax; generally referred to as "value-added tax") on intrastate sales	Various
Luxury tax; levied by certain states on notified items (items officially prescribed by the relevant authority)	Various
Works contract tax; on goods for which title is transferred during execution of work contracts (for example, contracts for the construction, fabrication or installation of plant and machinery)	Various
Lease tax on contracts involving transfer of rights to use goods	Various
Octroi/entry tax; levied by certain municipalities and states on the entry of goods into municipal jurisdiction or state for use, consumption or sale	Various
Research and development cess; imposed on payments made for the import of technology	5
Net assets tax, on specified assets (such as precious metals, urban land and buildings not used in the business and motor cars), net of debt secured by the assets; tax is imposed on the taxable value in excess of INR3 million	1

Nature of tax	Rate (%)
Stamp duties; levied by each state on specified documents and transactions, including property transfers	Various
Social security contributions; paid by the employer for medical insurance plans for certain categories of employees and for minimum retirement benefit plans	Various
Service tax, on provision of services including imports of services into India; imposed on all services except those specified in "negative list," and certain exempt services; rate includes the 3% cess	12.36

## E. Miscellaneous matters

**Foreign-exchange controls.** All cross-border transactions with non-residents are subject to foreign-exchange controls contained in the Foreign Exchange Management Act. The rupee is fully convertible for trade and current account purposes. Except for certain specified restrictions, foreign currency may be freely purchased for trade and current account purposes. In general, such purchases must be made at the market rate. Capital account transactions are not permitted unless they are specifically allowed and the prescribed conditions are satisfied. Cross-border transactions that are specifically allowed include the following:

- All remittances abroad that require prior approval arrangements, such as joint venture and technical collaboration agreements.
- The remittance of interest, dividends, service fees and royalties.
- Repatriation of capital is also freely permitted for investment approved on a repatriable basis. However, for sales of Indian assets, the terms of sale require the approval of the exchange-control authorities, and certain other conditions must be satisfied.

**Transfer pricing.** The Income Tax Act includes detailed transfer-pricing regulations. Although the guidelines are broadly in line with the principles set out by the Organisation for Economic Co-operation and Development (OECD), key differences exist.

Under these regulations, income and expenses, including interest payments, with respect to international transactions between two or more associated enterprises (including permanent establishments) must be determined using arm's-length prices. The transfer-pricing regulations also apply to, among other transactions, cost-sharing arrangements, certain capital-financing transactions, business restructurings or reorganizations and dealings in intangibles.

The transfer-pricing regulations contain definitions of various terms, including "associated enterprise," "arm's-length price," "enterprise," "international transaction" and "permanent establishment." It specifies methods for determining the arm's-length price. The following are the specified methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit split method
- Transactional net margin method

- Any other method that takes into account the price that has been charged or paid or would have been charged or paid, in the same or a similar uncontrolled transaction, with or between non-associated enterprises, under similar circumstances, considering all the relevant facts

The CBDT has issued regulations for applying these methods to determine arm's-length prices. In addition, the CBDT has issued safe-harbor rules indicating the circumstances in which tax officers accept transfer prices declared by taxpayers. The safe harbor rules for determining transfer prices apply for five years beginning with the 2012-13 fiscal year.

The transfer-pricing regulations require each person entering into an international transaction to maintain prescribed documents and information regarding a transaction. Each person entering into an international transaction must arrange for an accountant to prepare a report and furnish it to the Tax Officer by the due date for filing the corporate tax return, which is 30 November in such circumstances.

A tax officer may make an adjustment with respect to an international transaction, if the officer determines that certain conditions exist, including any of the following:

- The price is not at arm's length.
- The prescribed documents and information have not been maintained.
- The information or data on the basis of which the price was determined is not reliable.
- Information or documents requested by the Tax Officer have not been furnished.

Stringent penalties (up to 2% of the transaction value) are imposed for non-compliance with the procedural requirements and for understatement of profits.

Measures allowing Advance Pricing Agreements (APAs) are effective from July 2012. Under these measures, the tax administration may enter into an APA with any person undertaking an international transaction. APAs are binding on the taxpayer and the tax authorities (provided no change in law and facts) and are valid for a maximum period of five consecutive years. On 31 August 2012, the Central Board of Direct Taxes issued a notification introducing the rules for implementing APAs. The APA scheme provides for a "rollback" mechanism, which is subject to prescribed conditions and procedures. Under the "rollback" mechanism, an APA covering a future period may also be applied to international transactions entered into by a taxpayer during the periods (not exceeding four years) preceding the first year for which the APA is applicable.

Transfer-pricing measures have been applied to certain domestic transactions between related parties and transactions involving tax-holiday units.

**Debt-to-equity rules.** India does not currently impose mandatory capitalization rules. However, banks and financial corporations must comply with capital adequacy norms. In addition, foreign-exchange regulations prescribe that the debt-to-equity ratio should not exceed 4:1 in the case of borrowings beyond a certain limit from certain nonresident lenders.

**General Anti-avoidance Rules.** The Income Tax Act includes General Anti-avoidance Rules (GAAR), which will be effective from 1 April 2015. The GAAR are broad rules that are designed to deal with aggressive tax planning. Wide discretion is provided to the tax authorities to invalidate an arrangement, including the disregarding of the application of tax treaties, if an arrangement is treated as an “impermissible avoidance arrangement.” The GAAR provisions will be applied in accordance with rules and guidelines, which have been notified by the government. The GAAR rules do not apply to arrangements with an aggregate tax benefit of below INR30 million. FIIs that have not claimed benefits under tax treaties and nonresident investors in FIIs are exempt from the GAAR provisions. The rules also provide for grandfathering of investments made before 30 August 2010 from GAAR applicability.

**Notified Jurisdictional Area.** The Income Tax Act contains a “tool box” to deal with transactions with entities located in noncooperative countries or jurisdictions that do not exchange information with India. The government of India is empowered to notify such jurisdiction as a Notified Jurisdiction Area (NJA). The government discourages transactions by taxpayers in India with persons located in an NJA by providing onerous tax consequences with respect to such transactions. The consequences include applicability of transfer-pricing regulations, additional disclosure and compliance requirements, disallowance of deductions in some circumstances and higher withholding tax rates on transactions with a person located in an NJA. Cyprus was notified as an NJA, effective from 1 November 2013.

**Business trusts.** The Income Tax Act contains a specific taxation regime for the taxability of income from business trusts (real estate investment trusts and infrastructure investment trusts). This is a new category of investment vehicles for acquiring control or interests in Indian special-purpose vehicles for investments in the real estate or infrastructure sector. Units of business trusts can be listed on recognized stock exchange and can be subscribed by residents and nonresident investors (including foreign companies). Business trusts can also avail themselves of external commercial borrowings from nonresident investors (including foreign companies). Business trusts are granted pass-through status for purposes of taxation. Distributions of dividend income from business trusts are exempt in the hands of investors. For further details, see footnote (e) in Section A and *Rates of corporate tax* and *Capital gains* in Section B.

## F. Treaty withholding tax rates

Under the Income Tax Act, Indian companies are required to pay DDT (see Section B) at an effective tax rate of nearly 19.995% (base rate of 15% on gross amount plus a surcharge of 10% and an education cess of 3%) on dividends declared, distributed or paid by it. Such dividends are exempt from tax in the hands of the recipients. Accordingly, the relevant treaty rates for dividends are not captured in the table below.

The following table presents the lower of the treaty rate and the rate under the Income Tax Act on outbound payments of interest and royalties to jurisdictions that have entered into tax treaties with India.

	<b>Dividends</b>	<b>Interest (a)(b)</b>	<b>Approved royalties (c)(d)</b>

Uzbekistan	0	10	10
Vietnam	0	10	10
Zambia	0	10	10
Non-treaty countries	0	20 (a)	25 (c)

- (a) A 20% rate applies if the relevant tax treaty provides for unlimited taxation rights for the source country on interest income. Under the Income Tax Act, the 20% rate applies with respect to interest on monies borrowed or debts incurred in foreign currency by an Indian concern or the government. If the recipient is a foreign company, this rate is increased by a surcharge of 2% (when the aggregate income exceeds INR10 million) or 5% (when the aggregate income exceeds INR100 million) and is further increased by an education cess of 3% (on income tax and surcharge). A special reduced rate of 5% applies under certain specified circumstances (see footnote [e] in Section A). In other cases, depending on whether the recipient is a corporate entity, a tax rate of 30% or 40% applies. These tax rates are increased the applicable surcharge and cess.
- (b) A reduced rate of 0% to 10% generally applies under a tax treaty if interest payments are made to local authorities, political subdivisions, the government, banks, financial institutions or similar organizations. A reduced rate may also apply if the lender holds a certain threshold of capital in the borrower. The text of the relevant tax treaty needs to be examined.

- (c) Under the Income Tax Act, a 25% rate applies if the relevant tax treaty provides for unlimited rights for the source country to tax royalties (the rate is increased by the surcharge and cess) and if the payment is made by the government of India or an Indian concern. In other cases, as mentioned in footnote (a) above, a tax rate of 30% or 40% applies. These rates are increased by the applicable surcharge and cess.
- (d) The rate provided under the relevant tax treaty applies to royalties not effectively connected with a permanent establishment in India. Also, in some of India's tax treaties, such as with Australia, Canada, Spain, the United Kingdom and the United States, a separate rate of 10% is specified for equipment royalties. Similarly, under India's tax treaty with Bulgaria, a 15% rate applies to copyright royalties other than cinematographic films or films and tapes used for radio or television broadcasting. In addition, many of India's tax treaties also provide for withholding tax rates for technical services fees. In most cases, the rates applicable to royalties also apply to the technical services fees. The text of the relevant tax treaty needs to be examined to determine the relevant scope and rate.
- (e) A more restrictive scope of the definition of royalties or interest and/or a reduced rate may be available under the most-favored-nation clause in the relevant tax treaty.
- (f) A reduced rate of 10% applies in the event of notifications issued by the government of India that give effect to the most-favored-nation clauses in these tax treaties.
- (g) The tax treaty with Albania, which was signed on 8 July 2013, is effective in India from 1 April 2014.
- (h) The tax treaty with Bhutan, which was signed on 4 March 2013, will be effective in India from 1 April 2015.
- (i) A protocol was signed on 15 October 2013 to amend the tax treaty with Brazil. It will enter into force on completion of the internal procedures in both countries. The protocol will replace the article containing exchange of information in the existing tax treaty.
- (j) On 1 November 2013, the government of India notified Cyprus as an NJA (see Section E). Accordingly, the withholding tax rate for any payment made to a person located in Cyprus is the higher of 30% and the rate prescribed under the Income Tax Act.
- (k) The tax treaty with Colombia, which was signed on 13 May 2011, will be effective in India from 1 April 2015.
- (l) The tax treaty with Fiji, which was signed on 30 January 2014, will be effective in India from 1 April 2015.
- (m) A revised tax treaty with Indonesia was signed on 27 July 2012. The government of India has not yet issued the notification for making the treaty effective.
- (n) A revised tax treaty with Sri Lanka was signed on 22 January 2013 and is effective in India from 1 April 2014.
- (o) A protocol amending the tax treaty with Poland was signed on 29 January 2013 and will be effective in India from 1 April 2015.
- (p) A protocol was signed on 8 August 2013 to amend the tax treaty with Morocco. It will enter into force on completion of the internal procedures in both countries. The protocol will replace the article containing exchange of information in the existing tax treaty.
- (q) A revised tax treaty with Romania was signed on 8 March 2013, which is effective in India from 1 April 2014.
- (r) A protocol to the 1996 tax treaty with the South Africa was signed on 26 July 2013. The protocol is not yet effective in India.
- (s) The tax treaty with Uruguay, which was signed on 8 September 2011, is effective in India from 1 April 2014.
- (t) An increased rate of 25% applies to trademark royalties.
- (u) A revised tax treaty was signed with Malta on 8 April 2013, which will take effect in India from 1 April 2015. After it takes effect, it will replace the existing 1994 tax treaty.
- (v) This treaty applies to the Slovak Republic.

In addition to the treaties listed in the table above, India has signed tax treaties for which the text has not yet been issued. The following table lists the withholding tax rates under these treaties, according to official press releases of the government.

	Interest (%)	Royalties (%)

**A. At a glance**

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	– (b)
Withholding Tax (%)	
Dividends	10/15/20 (c)
Interest	15/20 (c)
Royalties from Patents, Know-how, etc.	15/20 (c)
Rent	
Land or Buildings	10 (d)
Other Payments for the Use of Assets	2 (e)
Fees for Services	
Payments to Residents	
Technical, Management and Consultant Services	2 (e)
Construction Contracting Services	2/3/4 (f)
Construction Planning and Supervision	4/6 (f)
Other Services	2 (e)
Payments to Nonresidents	20 (g)
Branch Profits Tax	20 (h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 to 10 (i)

- (a) This rate also applies to Indonesian permanent establishments of foreign companies. See Section B.
- (b) See Section B for details concerning the taxation of capital gains.
- (c) A final withholding tax at a rate of 20% is imposed on payments to nonresidents. Tax treaties may reduce the tax rate. Certain dividends paid to residents are exempt from tax if prescribed conditions are satisfied. If the exemption does not apply, a 15% withholding tax applies on dividends paid to tax resident companies and a 10% final withholding tax applies to dividends paid to tax resident individuals. A 15% withholding tax is imposed on interest paid by non-financial institutions to residents. Interest paid by banks on bank deposits to residents is subject to a final withholding tax of 20%.
- (d) This is a final withholding tax imposed on gross rent from land or buildings.
- (e) This tax is considered a prepayment of income tax. It is imposed on the gross amount paid to residents. An increase of 100% of the normal withholding tax rate is imposed on taxpayers subject to this withholding tax that do not possess a Tax Identification Number.

- (f) This tax is considered a final tax. The applicable tax rate depends on the type of service provided and the “qualification” of the construction companies. The “qualification” is issued by the authorities with respect to the business scale of a construction company (that is, small, medium or large).
- (g) This is a final tax imposed on the gross amount paid to nonresidents. The withholding tax rate on certain types of income may be reduced under double tax treaties.
- (h) This is a final tax imposed on the net after-tax profits of a permanent establishment. The rate may be reduced under double tax treaties. The tax applies regardless of whether the income is remitted. An exemption may apply if the profits are reinvested in Indonesia.
- (i) Losses incurred by taxpayers engaged in certain businesses or incurred in certain areas may be carried forward for up to 10 years (see Section B).

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies incorporated or domiciled in Indonesia are subject to income tax on worldwide income. Foreign tax may be claimed as a tax credit subject to a limitation rule (see *Foreign tax relief*). Branches of foreign companies are taxed only on those profits derived from activities carried on in Indonesia. However, income accruing from Indonesia to a foreign company having a permanent establishment in Indonesia is taxed as income of the permanent establishment if the business generating the income is of a similar nature to the business of the permanent establishment. This follows the “force of attraction” principle.

**Rates of corporate tax.** Corporate tax is imposed at a flat rate of 25%. This rate applies to Indonesian companies and foreign companies operating in Indonesia through a permanent establishment. The tax rate is reduced by five percentage points for listed companies that have at least 40% of their paid up capital traded on the stock exchange. Small and medium-scale domestic companies (that is, companies having gross turnover of up to IDR50 billion) are entitled to a 50% reduction of the tax rate. The reduced rate applies to taxable income corresponding to gross turnover of up to IDR4.8 billion.

**Branch profit tax.** The net after-tax profits of a permanent establishment are subject to branch profit tax at a rate of 20%. This rate may be reduced under a double tax treaty. Branch profit tax applies regardless of whether the income is remitted to the head office. An exemption may apply if the profits are reinvested in Indonesia.

**Tax incentives.** Tax incentives under the Tax Allowance Incentive are granted to certain qualifying resident companies investing in certain types of businesses or regions. The Tax Allowance Incentive consists of the following:

- Accelerated depreciation and amortization.
- Extended period of 10 years for the carryforward of a tax loss (normally 5 years), subject to certain conditions.
- Reduced tax rate of 10% (or lower rate under a double tax treaty) for dividends paid to nonresidents.
- Investment allowance in the form of reduction of net income by 30% of the amount invested in land and buildings, and plant and equipment. This allowance may be claimed at a rate of 5% each year over a six-year period.

To qualify for the above tax incentives, the investment must be a new investment or an investment for the purpose of expanding a current business. Under a government regulation, 52 categories of business sectors and 77 other categories of industries in certain areas may qualify for the tax incentives. The designated areas and provinces are generally outside Java. They are primarily the north-eastern provinces and provinces located in Sulawesi. During the six-year period beginning with the granting of the tax incentives, certain restrictions apply to the use and transfer of fixed assets to which the incentives had been applied. The incentives can be revoked if these rules are violated. Implementation of the government regulation is evaluated within two years from the date on which the approval is granted. A monitoring team will be established for this purpose.

Certain taxpayers engaged in a “pioneer industry” may seek a tax incentive commonly known as the Tax Holiday incentive, which was introduced in 2011. The Tax Holiday incentive offers a corporate income tax exemption for a period of 5 to 10 years, followed by a corporate income tax reduction of 50% for 2 years. The Minister of Finance may grant an additional period of concession to maintain the competitiveness of national industry and the strategic value of certain industries.

To qualify for the Tax Holiday incentive, taxpayers must fulfill all of the following criteria:

- They must be engaged in a “pioneer industry” (see below).
- They must have new investment plans approved by the relevant authority in the minimum amount of IDR1 trillion (approximately USD120 million).
- They must deposit at least 10% of their total investment plan in the Indonesian banking system without any withdrawal until realization of their investment.
- They must be in the form of an Indonesian legal entity established either within 12 months before the issuance of the regulation or after the enactment of the regulation.

The term “pioneer industries” is defined to be industries that meet the following conditions:

- They have extensive interconnection and provide high value-added and externality.
- They introduce new technology.
- They have strategic value for the nationwide economy.

The regulation pertaining to the Tax Holiday incentive requires that the country of domicile of the foreign investors have tax-sparing rules.

Currently, five sectors qualify as pioneer industries.

Taxpayers that have received tax incentives for investments in certain types of businesses or regions are not eligible for the Tax Holiday incentive and vice versa.

A recommendation from either the Minister of Industry or the head of the Coordinating Board for Capital Investment is required for obtaining the Tax Holiday incentive. The recommendation, which initially expired on 15 August 2014, is extended to 15 August 2015.

**Special tax rates.** Special tax rates granted to certain companies are described below.

*Petroleum.* Tax rates applicable to petroleum companies are those applicable when the petroleum companies' contracts were signed and approved. In addition, foreign petroleum companies are subject to branch profit tax of 20% on their taxable income, except otherwise provided in an applicable tax treaty.

*Mining.* Income tax applicable to general mining companies may depend on generation of the concessions granted (that is, when the concession is granted). Holders of earlier concessions are taxed at the rates ranging from 30% to 45% (the tax rates are the rates prevailing at the time the concession was granted). Holders of the more recent concessions are taxed in accordance with the prevailing tax laws (current rate is 25%). Although withholding tax on dividends paid overseas is generally imposed at a rate of 20%, some earlier concessions provide a reduced rate of 10%. These rates may be subject to reduction under certain tax treaties.

*Construction companies.* Construction companies are subject to corporate income tax with tax rates ranging from 2% to 6% of the contract value. The income tax applies to complete or partial construction activities. The applicable tax rate depends on the business qualification of the respective company and/or the type of services performed. The tax is considered a final tax. Consequently, no corporate income tax is due on the income at the end of a fiscal year. Foreign construction companies operating in Indonesia through a branch or a permanent establishment are subject to further branch profit tax of 20% on the taxable income (accounting profit adjusted for tax) after deduction of the final tax. The rate is subject to applicable tax treaties. Exemption from branch profit tax may apply in the circumstances described above (see *Branch profit tax*).

*Foreign drilling companies.* Foreign drilling companies are subject to corporate income tax at an effective rate of 3.75% of their gross drilling income, as well as to branch profit tax of 20% on their after-tax taxable income. The branch profit tax may be reduced under certain tax treaties. Branch profit tax may be avoided in the circumstances described above (see *Branch profit tax*).

*Nonresident international shipping companies and airlines.* Nonresident international shipping companies and airlines are subject to tax at a rate of 2.64% of gross turnover (inclusive of branch profit tax). As a result of the reduction of the corporate tax rate in 2010, the effective tax rate may change. However, this has not yet been confirmed through the issuance of a tax regulation.

*Small and medium-sized entities.* Effective from 1 July 2013, individual and corporate taxpayers (except permanent establishments) with annual gross turnover of less than IDR4.8 billion are subject to income tax at a rate of 1% of monthly gross turnover. This income tax is final.

The following taxpayers are excluded from this final tax:

- Individual taxpayers performing trading and/or service activities who use assembled infrastructure and a public facility that is not intended for commercial use

- Corporate taxpayers who have not yet started commercial operations
- Corporate taxpayers that have gross revenue over IDR4.8 billion from commercial operations in a year.

For purposes of the above measure, business income does not include income from independent professional services, such as, among others, services provided by lawyers, accountants, medical doctors and notaries.

Taxpayers qualifying for a different final tax regime, such as construction services companies, are not eligible for this 1% final tax.

**Capital gains.** A 0.1% final withholding tax is imposed on proceeds of sales of publicly listed shares through the Indonesian stock exchange. An additional tax at a rate of 0.5% of the share value is levied on sales of founder shares associated with a public offering. Founder shareholders must pay the 0.5% tax within one month after the shares are listed. Founder shareholders that do not pay the tax by the due date are subject to income tax on the gains at the ordinary income tax rate.

Capital gains derived by residents are included in taxable income and are subject to tax at the normal income tax rate. Capital gains derived by nonresidents are subject to tax at a rate of 20%. The law provides that the 20% tax is imposed on an amount of deemed income. The Minister of Finance established the deemed income for sales of unlisted shares. The deemed income equals 25% of the gross sale proceeds, resulting in an effective tax rate of 5% of the gross sale proceeds. This rule applies to residents of non-treaty countries and to residents of treaty countries if the applicable treaty allows Indonesia to tax the income.

In addition to sales or transfers of shares, Indonesian tax applies a 20% tax rate to an estimated net income of 25% on sales or transfers of certain assets owned by non-Indonesian tax residents that do not have a permanent establishment in Indonesia. The assets are luxurious jewelries, diamonds, gold, gemstones, luxurious watches, antiques, paintings, cars, motorcycles, yachts and/or light aircraft. This results in an effective tax rate of 5%. The purchaser must withhold the tax. A tax exemption applies to transactions with a value of less than IDR10 million. The provisions of tax treaties override the above regulation.

The sale or transfer by nonresidents of shares in conduit companies or special purpose companies established or resident in tax-haven jurisdictions that have a special relationship with an Indonesian entity or an Indonesian permanent establishment of a foreign entity is deemed to be a sale or transfer of shares of the Indonesian entity or the permanent establishment. The relevant regulation provides that the Indonesian income tax applicable to the transaction is 5% of the gross sale proceeds. The 5% rate is derived from the application of the 20% cross-border withholding tax under Article 26 of the Income Tax Law to a profit that is deemed to be 25% of the gross sale proceeds. A provision in an applicable tax treaty overrides the above rule if the seller of the shares is a tax resident in a country that has entered into a tax treaty with Indonesia.

Sellers or transferors of the right to use land or buildings are subject to tax at a rate of 5% of the higher of the transaction value and the government official value for the purpose of land and building tax. Purchasers or transferees must pay a transfer duty of 5%, which may be reduced to 2.5% for transfers in business mergers approved by the Director General of Taxation.

**Administration.** The annual corporate income tax return must be filed by the end of the fourth month following the end of the fiscal year. The deadline can be extended for two months. The balance of annual tax due must be settled before filing the annual tax return.

Corporate income tax must be paid in advance through monthly installments, which are due on the 15th day of the month following the relevant month. The tax installment equals 1/12 of tax payable for the preceding year (after exclusion of non-regular income) or tax payable based on the latest tax assessment received.

**Dividends.** In general, dividends are taxable.

Dividends paid domestically to Indonesian resident corporate taxpayers are subject to withholding tax at a rate of 15%. This tax is an advance payment of the dividend recipient's tax liability. Tax exemption may apply if the dividends are paid from retained earnings and if the recipient's share ownership in the payer of the dividends represents 25% or more of the paid-in capital. Dividends exempted from tax are not subject to the 15% withholding tax. Dividends received by Indonesian resident individuals are subject to a final tax of 10%.

Dividends remitted overseas are subject to a final 20% withholding tax, unless an applicable tax treaty provides a lower rate.

**Foreign tax relief.** A credit is allowed for tax paid or due overseas on income accruing to an Indonesian company, provided it does not exceed the allowable foreign tax credit. The allowable foreign tax credit is computed on a country-by-country basis.

### C. Determination of trading income

**General.** Income is broadly defined. It includes, but is not limited to, the following:

- Business profits
- Gains from sales or transfers of assets
- Interest, dividends, royalties and rental and other income with respect to the use of property
- Income resulting from reorganizations, regardless of the name or form
- Gains from sales or transfers of all or part of a mining concession, funding participation or capital contribution of a mining company
- Receipt of refund of tax that has been claimed as a tax deduction
- Income earned by *syariah*-based businesses (*syariah* refers to businesses conducted in accordance with the Islamic law)
- Interest compensation
- Surplus of the Bank Indonesia

Certain income is not taxable or is subject to a final tax regime. Interest earned by resident taxpayers on time deposits, certificates of deposit and savings accounts is subject to a 20% withholding

tax, representing a final tax on such income. A final 20% (or lower rate provided in a tax treaty) withholding tax is imposed on interest earned by nonresidents.

Taxpayers are generally able to deduct from gross income all expenses to the extent that they are directly or indirectly incurred in earning taxable income. Nondeductible expenses include the following:

- Income tax and penalties
- Expenses incurred for the private needs of shareholders, associates or members
- Gifts
- Donations (except for donations for national disasters, grants in the framework of research and development activities in Indonesia, grants for the development of social infrastructure, grants in the form of education facilities [for example, books, computers, chairs, tables and other educational resources] and grants for the development of sport)
- Benefits-in-kind, which include a subsidy, aid, gift or award given to an employee or a related party
- Reserves and provisions for certain industries

Business losses incurred overseas are not deductible.

Foreign-exchange gains and losses are treated as taxable income and deductible expenses, if this treatment is in accordance with the generally accepted accounting procedures in Indonesia and is consistently adopted.

**Inventories.** For tax purposes, inventories must be valued at cost using either the first-in, first-out (FIFO) or average-cost method. The last-in, first-out (LIFO) method is not allowed.

**Provisions.** Provisions are generally not deductible for tax purposes.

Certain taxpayers that may claim bad debt provisions as deductible expenses include banks and certain nonbank financial institutions, such as other corporate entities providing loan facilities, insurance companies, leasing companies that lease assets under finance leases, consumer financing companies, and factoring companies. The following companies may also claim tax deductions for reserves or provisions:

- Social insurance providers: reserves of social funds
- Forestry companies: reserves for reforestation
- Mining companies: reserves for reclamation of mining sites
- Industrial waste treatment companies: reserves for closure and maintenance of waste treatment plants

Taxpayers may claim tax deductions for bad debts if all of the following conditions are satisfied:

- The costs have been claimed as corporate losses in commercial financial reports.
- A list of the names of the debtors and totals of the bad debts is submitted to the Director General of Taxation.
- A legal suit for collection of the debt is filed with the public court or government institutions handling state receivables. Alternatively, taxpayers may publicize the bad debt in a general or special publication or obtain acknowledgment of the write-off of the bad debt from the relevant debtor.

The write-off of receivables from a related party is not deductible for tax purposes.

**Depreciation and amortization allowances.** Depreciation is calculated on the useful life of an asset by applying the straight-line method or declining-balance method. In general, depreciation is deducted beginning with the month the expenditure is incurred. However, for assets under construction, depreciation begins with the month in which the construction of the assets is completed. Buildings are depreciated using the straight-line method. The following table sets forth the useful lives and depreciation rates for depreciable assets.

Class of asset	Useful life Years	Depreciation method	
		Straight-line (%)	Declining-balance (%)
Buildings			
Permanent	20	5	–
Non-permanent	10	10	–
Other assets			
Class 1	4	25	50
Class 2	8	12.5	25
Class 3	16	6.25	12.5
Class 4	20	5	10

Intangible assets with more than one year of benefit, including leases of tangible property, are amortized according to their useful lives using the same percentages applicable to fixed assets. Special depreciation and amortization rules apply to assets used in certain businesses or in certain areas (see Section B).

**Relief for losses.** Tax losses may not be carried back. They may generally be carried forward for five years. Tax losses incurred by certain businesses or incurred in certain areas may be carried forward for up to 10 years (see Section B).

**Groups of companies.** The losses of one company may not be used to reduce the profits of an affiliate.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on delivery of taxable goods, on imports of goods and on services (including services furnished by foreign taxpayers outside Indonesia if the services have a benefit in Indonesia), unless specifically exempt	
Standard rate	10
Export of goods or certain services	0
Sales tax on luxury goods, imposed in addition to the VAT on the delivery of luxury goods manufactured in or imported into Indonesia; rate depends on the nature of the goods	10 to 200
Transfer duty on land and buildings	5

## E. Miscellaneous matters

**Foreign-exchange controls.** No exchange controls affect the repayment of loans and the remittance of dividends, interest and royalties. Remittance of funds of USD10,000 or more must be notified by the remitting bank to the Bank Indonesia. Foreign loans must be reported to the Bank Indonesia to enhance the monitoring of the country's foreign exchange reserves.

**Debt-to-equity rules.** Under the tax law, the Minister of Finance may determine an acceptable debt-to-equity ratio. Related-party loans may be treated as equity investments, with the interest expense disallowed for tax purposes. However, to date, the Minister has not yet prescribed the required debt-to-equity ratio. If a special relationship between two taxpayers that might provide tax advantages exists, the Director General of Taxation has the authority to determine income and deductions and to reclassify loans as equity.

**Transfer pricing.** The law provides that the following methods may be used to determine arm's-length pricing:

- Comparable uncontrolled price method
- Resale-price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

The Indonesian tax authority requires that related-party transactions or dealings with affiliated companies be carried out in a "commercially justifiable way" and on an arm's-length basis. Taxpayers must maintain documentation establishing that related-party transactions are conducted at arm's length. The transfer-pricing study must be maintained for 10 years from the relevant tax year.

The Indonesian tax authority uses advance pricing agreements (APAs) to regulate transactions between related parties and to mitigate future transfer-pricing disputes with the Director General of Taxation. Broadly, an APA represents an advance agreement between a company and the Director General of Taxation regarding the determination of the acceptable pricing for a transaction between related parties. An APA provides the sales price for manufactured goods, the amount of royalties and other information. An APA may be entered into with the Director General of Taxation (unilateral) or between the Director General of Taxation and the foreign tax authority (bilateral).

## F. Treaty withholding tax rates

Indonesia has introduced tough anti-treaty abuse rules. The Indonesian tax authority may ignore the provisions of a tax treaty if these rules are not satisfied.

The Indonesian tax authority may seek agreement with a tax treaty country for the exchange of information, mutual agreement procedure and assistance for tax collection.

The following table shows withholding tax rates under Indonesia's double tax treaties.

	Dividends (%)		Interest (b)	Royalties
	A	B	%	%
Algeria	15	15	0/15	15

A Rate applicable to portfolio investments.

B Rate applicable to substantial holdings.

(a) Technical services are subject to the following reduced rates of withholding tax:

- Germany, 7.5%
- Luxembourg, 10%
- Pakistan, 15%
- Papua New Guinea, 10%
- Switzerland, 5%
- Venezuela, 10%
- Zimbabwe, 10%

(b) If two rates are other than 0%, the higher rate applies to interest paid to companies in certain specified industries or to interest on certain bonds. The 0% rate applies if the beneficial owner of the interest is the government, except under the Singapore treaty, which provides that the 0% rate applies to interest on government bonds.

(c) The rates vary according to the rights or information licensed.

(d) The tax treaty allows each of the signatory countries to apply the domestic tax anti-avoidance rules.

In addition to the above treaties, Indonesia has entered into agreements for the reciprocal exemption of taxes and duties on air transport with Bangladesh, Croatia, Laos, Morocco, Saudi Arabia and South Africa.

- (a) The 15% rate is the general corporate income tax rate. The 35% rate applies to oil and gas production and extraction activities and related industries, including service contracts.  
 (b) This withholding tax is imposed on payments to nonresidents.  
 (c) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** In general, corporate income tax is imposed on taxable profit from all sources arising in, or deemed to arise in, Iraq. Income is deemed to arise in Iraq if any of the following is located there:

- The place of signing the contract
- The place of performance of work
- The place of delivery of work
- The place of payment for the work

Otherwise, companies are exempt from tax for Iraqi income tax purposes.

**Tax rates.** The general corporate income tax rate applicable to all companies (except oil and gas production and extraction activities and related industries, including service contracts) is a unified flat rate of 15% of taxable income. Activities relating to oil and gas production and extraction activities and related industries, including service contracts, are subject to income tax at a rate of 35% of taxable income.

**Capital gains.** Capital gains derived from the sale of fixed assets are taxable at the normal corporate income tax rate of 15% (35% for oil and gas production and extraction activities and related industries, including service contracts). Capital gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax; otherwise, they are taxed at the normal corporate income tax rate.

**Administration.** Tax returns for all corporate entities must be filed in Arabic within five months after the end of the fiscal year, together with audited financial statements prepared under the Iraqi Unified Accounting System.

A delay fine equal to 10% of the tax due is imposed, up to a maximum of IQD500,000, on a taxpayer that does not submit or refuses to submit an income tax filing within five months after the end of the fiscal year. Foreign branches that fail to submit financial statements by the due date for the income tax filing are subject to an additional penalty of IQD10,000.

After an income tax filing is made, the tax authority undertakes an audit of the filing and may request additional information. It eventually issues a tax assessment. Payment of the total amount of tax is due after the General Commission of Taxes (GCT) sends the taxpayer the tax assessment based on the GCT's audit of the filed tax return and audited financial statements.

If the tax due is not paid within 21 days after the date of assessment notification, a late payment penalty equal to 5% of the amount of tax due is imposed. This amount is doubled if the tax is not paid within 21 days after the lapse of the first period.

**Dividends.** In general, dividends paid from previously taxed income are not taxable to the recipient.

**Interest.** Interest is subject to income tax at the normally applicable corporate income tax rates.

**Foreign tax relief.** A foreign tax credit is available to Iraqi companies on income taxes paid abroad. In general, the foreign tax credit is limited to the amount of an Iraqi company's income tax on the foreign income. Excess foreign tax credits may be carried forward for five years.

### C. Determination of trading income

**General.** If income arises, or is deemed to arise, in Iraq (see *Corporate income tax* in Section B), it is subject to tax, except for income exempt under the income tax law, the industrial investment law or the investment law in the Kurdistan Region of Iraq.

All business expenses incurred to generate income are allowable, with limitations on certain items, such as entertainment and donations. However, provisions and reserves are not deductible for tax purposes.

**Tax depreciation.** The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets. These rates are set out in several tables for various industries. In general, the following are the acceptable depreciation methods:

- Straight line
- Declining balance
- Other methods (with the approval of the GCT)

If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed for tax purposes.

**Relief for losses.** A tax loss from one source of income may offset profits from other sources of income in the same tax year. Unused tax losses may be carried forward and deducted from the taxable income of the taxpayer during the following five consecutive years, subject to the following conditions:

- Losses may not offset more than half of the taxable income of each of the five years.
- The loss may offset only income from the same source from which the loss arose.

To claim losses, a taxpayer must obtain appropriate documentation including financial statements that support the loss and sufficient documentation to support the expenses that created such loss.

**Groups of companies.** Iraqi law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Stamp duties; imposed on the total contract value	0.2
Property tax; imposed on the annual rent	
From buildings	9
From land	2
Social security contributions; imposed on salaries and benefits of local and expatriate employees; a portion of employee allowances up to an	

Nature of tax	Rate (%)
amount equaling 30% of the base salary is not subject to social security contributions	
Employer (general)	12
Employer (oil and gas sector)	25
Employee	5

### E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Iraq is the Iraqi dinar (IQD). Iraq does not impose any foreign-exchange controls. However, according to the Central Bank of Iraq's instructions and regulations, transfers of funds must be in accordance with the Anti-Terrorism Law and the Anti-Money Laundering Law.

**Debt-to-equity rules.** The only restrictions on debt-to-equity ratios are those stated in the articles and memoranda of association. However, the GCT may disallow claims of interest expense if it deems the expense to be excessive.

### F. Tax treaties

Iraq has entered into a bilateral double tax treaty with Egypt and a multilateral double tax treaty with the states of the Arab Economic Union Council.

**A. At a glance**

Corporate Income Tax Rate (%)	12.5 (a)
Capital Gains Tax Rate (%)	33 (b)
Branch Tax Rate (%)	12.5 (a)
Withholding Tax (%)	
Dividends	20 (c)(d)
Interest	20 (d)(e)(f)
Royalties	20 (d)(f)(g)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1
Carryforward	Unlimited

- (a) This rate applies to trading income and to certain dividends received from nonresident companies. A 25% rate applies to certain income and to certain activities. For details concerning the tax rates, see Section B.
- (b) A 40% rate applies to disposals of certain life insurance policies.
- (c) This withholding tax is imposed on dividends distributed subject to exceptions (see Section B).
- (d) Applicable to both residents and nonresidents.
- (e) Interest paid by a company in the course of a trade or business to a company resident in another European Union (EU) member state or in a country with which Ireland has entered into a double tax treaty is exempt from withholding tax, subject to conditions. See footnote (p) in Section F for details regarding an extension of this exemption. Bank deposit interest is subject to a 41% deposit interest retention tax (DIRT). DIRT exemptions apply to bank interest paid to nonresidents and, subject to certain conditions, bank interest paid to Irish resident companies and pension funds.
- (f) Ireland implemented the EU Interest and Royalties Directive, effective from 1 January 2004.
- (g) Under Irish domestic law, withholding tax on royalties applies only to certain patent royalties and to other payments regarded as "annual payments" under Irish law. The Irish Revenue has confirmed that withholding tax need not be deducted from royalties paid to nonresidents with respect to foreign patents (subject to conditions).

**B. Taxes on corporate income and gains**

**Corporation tax.** A company resident in Ireland is subject to corporation tax on its worldwide profits (income plus capital gains). A company resides where its real business is carried on, that is, where the central management and control of the company is exercised. In addition, a company incorporated in Ireland is treated as resident for tax purposes in Ireland unless either of the following applies:

- The company or a related company (50% common ownership of ordinary share capital) carries on a trade in Ireland and either of the following conditions is satisfied:
  - The company is controlled by persons (companies or individuals) resident in a European Union (EU) member country or in a country with which Ireland has entered into a tax treaty (treaty country), provided these persons are not controlled by persons that are not resident in such countries.
  - The principal class of shares in the company or a related company is substantially and regularly traded on one or more recognized stock exchanges in an EU or treaty country.
- The company is regarded under a tax treaty as being resident in a treaty country and not resident in Ireland.

Finance (No. 2) Act 2013 provides that an Irish incorporated company is regarded as Irish resident if all of the following circumstances exist:

- The company is centrally managed and controlled in a territory with which a tax treaty is in force.
- It would have been tax resident in that relevant territory under its laws had it been incorporated there.
- The company would not otherwise be regarded by virtue of the law of any territory as resident in that territory.

This provision applies to all companies incorporated in Ireland on or after 24 October 2013 and to existing Irish incorporated companies, effective from 1 January 2015.

Finance Act 2014 provides that all Irish incorporated companies will be regarded as Irish resident subject to an override within a double tax treaty. This rule applies from 1 January 2015 for companies incorporated on or after 1 January 2015. For companies incorporated before 1 January 2015, the new rule applies from the earlier of 1 January 2021 or from a date on or after 1 January 2015 on which both of the following conditions are satisfied:

- A change in ownership of the company occurs.
- Within one year before or five years after the change in ownership, a major change in the nature or conduct of the business of the company occurs.

A company not resident in Ireland is subject to corporation tax if it carries on a trade in Ireland through a branch or agency. The liability applies to trading profits of the branch or agency, other income from property or rights used by the branch or agency, and chargeable gains on the disposal of Irish assets used or held for the purposes of the branch or agency.

A company resident in a country with which Ireland has entered into a tax treaty is subject to tax only on profits generated by a permanent establishment as described in the relevant treaty. This normally requires a fixed place of business or dependent agent in Ireland. Companies that are resident in non-treaty countries and do not trade in Ireland through a branch or agency are subject to income tax on income arising in Ireland and to capital gains tax (CGT) on the disposal of certain specified Irish assets (see *Chargeable capital gains*).

**Rates of corporation tax.** The standard rate of corporation tax on trading income is 12.5%.

On election, the 12.5% rate also applies to dividends received from the following companies:

- A company resident in an EU member state, a treaty country or a country that has ratified the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Assistance in Tax Matters
- A company that is 75%-owned by a publicly quoted company

The election applies only to dividends sourced from trading income unless the dividends are portfolio dividends (less than 5% interest). In this instance, the dividends are deemed to be from a “trading” source. Foreign dividends from portfolio investments that form part of the trading income of a company are exempt from corporation tax.

A 25% rate applies to the following:

- Certain non-trading income, such as Irish rental and investment income
- Foreign income unless the income is part of an Irish trade
- Income from “working minerals” (broadly defined), petroleum activities and dealing or developing land other than construction operations (for the taxation of construction operations, see *Land transactions*)

*Start-up companies.* A three-year exemption from tax on certain trading profits and capital gains (subject to conditions) applies to companies with a total corporation tax liability (as defined) of less than EUR40,000 per year. This exemption applies to new companies that begin trading on or before 31 December 2015. A cap referring to employer social insurance costs applies.

*Land transactions.* Different tax rates apply to land transactions. Profits or gains derived from dealing in residential or nonresidential development land are subject to the higher rate of corporation tax (25%). The National Asset Management Agency Act 2009 provided for an 80% tax on profits arising from land rezoning; this tax applied to such disposals up to 31 December 2014. Most construction operations are subject to corporation tax at the standard rate of 12.5%.

*Shipping companies.* Shipping companies that undertake qualifying shipping activities, including carriage of cargo and passengers, marine-related activities, leasing of qualifying ships and related activities, may elect to be subject to a special tonnage tax regime instead of the normal corporation tax regime.

Under the tonnage tax regime, profits are calculated on the basis of a specified profit per day according to the tonnage of the relevant ship. The following are the amounts of the daily profit attributed to each qualifying ship:

- For each 100 tons up to 1,000 tons: EUR1.00
- For each 100 tons between 1,000 and 10,000 tons: EUR0.75
- For each 100 tons between 10,000 and 25,000 tons: EUR0.50
- For each 100 tons above 25,000 tons: EUR0.25

The profits attributed to each qualifying ship for the accounting period will be determined by multiplying the daily profit as determined above by the number of days in the accounting period, or, if the ship was operated by the company as a qualifying ship for

only part of the period, by the number of days in that part of the accounting period.

The standard corporation tax rate for trading income (12.5%) applies to the amount of profits determined under the rules described above.

*Oil and gas exploration.* A profit resources rent tax (PRRT) applies to profits on oil and gas exploration licenses awarded after 1 January 2007. The PRRT is imposed in addition to the 25% corporate tax rate, and it operates on a graduated basis that is linked to the profitability of the oil or gas field. The tax rate varies according to the profit ratio (rate of cumulative profits less 25% corporation tax divided by accumulated capital investment). The following are the tax rates.

<b>Profit ratio</b>	<b>Tax rate (%)</b>
Less than 1.5	0
Between 1.5 and 3	5
Between 3 and 4.5	10
Exceeding 4.5	15

This regime is under review, and new rates are expected to be introduced in 2015 for new licenses.

*Close companies.* Investment and rental income of a “close company” is subject to an additional 20% surcharge if it is not distributed within 18 months after the end of the relevant accounting period. A closely held professional services company is subject to a 15% surcharge on 50% of its undistributed trading income. Broadly, a “close company” is a company that is under the control of five or fewer persons or under the control of its directors (as defined).

*Life insurance companies.* For life insurance business written before 1 January 2001, policyholders are subject to income tax at the standard rate (20%) on the investment income and gains less management expenses attributable to the policyholders. Life insurance companies withhold the income tax. Resident individuals do not pay any further tax. Companies are subject to Irish CGT arising on the disposal of a life insurance policy and receive a credit for income tax at the standard rate deemed to have been deducted by the life insurance company. For life insurance business written after 1 January 2001 and all other business of life companies, a tax-free buildup of investment return over the term of the policy (gross roll-up) is allowed. However, for Irish residents, an exit tax is imposed on gains resulting from certain “chargeable events” (as defined). The exit tax is withheld at a rate of 41% on the difference between proceeds on redemption, maturity or assignment, and the premiums or subscription amounts paid. A 60% exit tax applies to personal portfolio life insurance policies (PPLPs). This rate applies to domestic and foreign PPLPs that were not cashed in before 26 September 2001.

Deemed disposal rules apply to gross roll up life policies held by Irish residents. A deemed chargeable event occurs at the end of every eight-year period (relevant period) beginning with the inception of the life policy. Exit tax is imposed on the gain arising on this deemed chargeable event. These rules do not apply to policies held by nonresidents.

Shareholder profits of domestic life insurance companies are taxed at the standard rate of corporation tax (now 12.5%) regardless of whether they relate to business written before or after 1 January 2001.

Companies investing in Irish policies are generally subject to an exit tax, as described above. However, corporate holders of certain foreign policies are subject to self-assessment tax at a rate of 25% on profits from the investment in the policies. These foreign policies are policies issued by an insurance company or a branch of such a company carrying on business in a member state of the EU (other than Ireland), in a state in the European Economic Area (EEA) or in a country in the OECD with which Ireland has entered into a tax treaty. Payments with respect to such policies accruing to Irish residents that are not companies are subject to income tax at a rate of 41%. The 41% rate depends on the filing of a self-assessment return with the Irish authorities. The deemed disposal measures (see above) also apply to foreign life policies. Payments with respect to foreign policies, other than those mentioned above, are subject to tax at a rate of 40%. If a company investing in a life insurance policy is a close company, additional surcharges may apply.

*Investment undertakings (gross roll-up funds and net funds).* For investment undertakings (gross roll-up funds), distributions and other payments made are subject to an exit tax at a rate of 41%. This exit tax applies to the cancellation, redemption or assignment of shares and is imposed on the difference between the amount payable to the shareholder and the amount invested by the shareholder. A pro rata calculation applies for partial disposal, redemption, cancellation, repurchase or assignment of shares unless the company has elected to apply a first-in, first-out basis of identification for such disposals. Investments in IFSC funds are now covered by the investment undertakings rules described above. Nonresidents are exempt from the exit tax in investment undertakings described above if they provide the relevant declarations. Certain Irish residents are also exempt from the exit tax if the relevant declarations are provided.

A 60% exit tax applies to personal portfolio investment undertakings (PPIUs). A 60% rate also applies to foreign PPIUs that are equivalent to Irish investment undertakings.

Unit holders are deemed to dispose of units acquired by them every eight years from the date of acquisition. To the extent that a gain arises on this deemed disposal, exit tax must normally be deducted and paid by the investment undertaking to the Irish tax authorities. On the disposal of the relevant unit, a credit is available for the tax paid on the deemed disposal. Similarly, a refund is payable to the unit holder if the actual exit tax liability is less than the exit tax paid on the deemed disposals. This refund is generally paid by the investment undertaking which can set off the refund against future exit tax. The deemed disposal rules apply to units acquired on or after 1 January 2001.

Offshore funds that are equivalent to Irish investment undertakings are also subject to tax on a self-assessment basis similar to the rules applicable to foreign life policies (see *Life insurance companies*). Deemed disposal rules also apply to Irish residents after every eight years.

Offshore funds domiciled in another EU member state, EEA state or a member state of the OECD with which Ireland has entered into a double tax agreement, are no longer subject to the offshore fund rules, effective from 2 April 2007. They are subject to either marginal rate of income tax on distributions or CGT at 33%. Certain transitional rules apply. Other offshore funds are still subject to either marginal rate income tax or CGT at 40%, depending on certain circumstances.

Investments in undertakings for collective investment (net funds) that are companies are subject to corporation tax at a rate of 30%.

Ireland has formally agreed to the exchange-of-information regime under the EU Savings Directive and has enacted domestic legislation to implement this directive.

**Chargeable capital gains.** Chargeable capital gains are subject to corporation tax at a rate of 33% (except for development land gains which are subject to CGT at that rate). In computing a gain, relief is given for the effects of inflation by applying an index factor. However, indexation relief applies only for the period of ownership of an asset up to 31 December 2002.

In calculating the liability for CGT on the disposal of development land or unquoted shares deriving their value from such land, certain restrictions apply. The adjustment for inflation is applied only to that portion of the purchase price reflecting the current use value of the land at the date of purchase. The balance of the purchase price, without an adjustment for inflation, is still allowed as a deduction. Gains on development land may be reduced only by losses on development land. However, losses on development land may be set off against gains on disposals of other assets.

A nonresident company is subject to CGT or corporation tax on its chargeable capital gains from the following assets located in Ireland:

- Land and buildings
- Minerals and mineral rights
- Exploration or exploitation rights in the continental shelf
- Unquoted shares deriving the majority of their value from such assets
- Assets used in a business carried on in Ireland through a branch or agency

*Exit charge.* A company that ceases to be tax resident in Ireland is deemed to have disposed of all of its assets at that time and to have immediately reacquired the assets at market value. The company is subject to corporation tax on any gains resulting from such deemed disposal. The tax is calculated in accordance with the normal CGT rules.

The exit charge does not apply if 90% of the exiting company's share capital is held by foreign companies resident in a jurisdiction with which Ireland has concluded a double tax treaty, or persons who are directly or indirectly controlled by such foreign companies.

An exemption applies to a company that ceases to be tax resident in Ireland but continues to carry on a trade in Ireland through a branch or an agency. In such circumstances, the assets used for the purposes of the branch or agency are not subject to the exit charge.

A company may postpone the charge in certain circumstances. In addition, an unpaid exit charge may be recovered from other group companies or controlling directors.

*Substantial shareholding relief.* An exemption from corporation tax applies to the disposal by an Irish company of a shareholding in another company (the investee company) if the following conditions are satisfied:

- At the time of disposal, the investee company is resident for tax purposes in Ireland, in another EU member state or in a country with which Ireland has entered into a tax treaty.
- The Irish company has held (directly or indirectly), for a period of at least 12 months, a minimum holding of 5% of the shares in the investee company.
- The investee company is wholly or principally a trading company or, taken together, the holding company, its 5% group and the investee company are wholly or principally a trading group.

If the above conditions are satisfied, the relief applies automatically (no claim or election mechanism exists).

**Administration.** The corporation tax liability is determined by self-assessment. As a result, a company must estimate its own liability. Preliminary tax is payable in two installments if the company is not a “small company” (see below). The initial installment is due on the 21st day of the 6th month of the accounting period (assuming the accounting period ends after the 21st day of a month). This installment must equal the lower of 50% of the tax liability for the preceding year or 45% of the tax liability for the current year. The final installment of preliminary tax is due 31 days before the end of the accounting period and must bring the aggregate preliminary tax payments up to 90% of the tax liability for the year. If this date falls on or after the 21st day of a month, the 21st of that month becomes the due date.

“Small companies” alternatively may pay preliminary tax equal to 100% of their tax liability for the preceding year. A company qualifies as a “small company” if its corporation tax liability for the preceding year did not exceed EUR200,000.

A company that pays more than 45% of its corporation tax liability for a period as an initial installment of preliminary tax or more than 90% of its corporation tax liability for a period by the due date for its final installment of preliminary tax can elect jointly with another group company that has not met the 45% or 90% tests to treat the excess as having been paid by that latter company for interest calculation purposes only. Certain conditions apply.

Any balance of corporation tax due is payable by the due date for the filing of the corporation tax return (Form CT1). This is normally nine months after a company’s accounting year-end.

When the nine-month period ends on or after the 21st day of a month, the 21st of that month becomes the due date for filing the Form CT1 and the payment of any balance of corporation tax.

A start-up company with a corporation tax liability of less than EUR200,000 is relieved from having to make any corporation tax payment until its tax return filing date.

Corporation tax returns and payments must normally be filed electronically via Revenue Online Service. Electronic filers may avail of a two-day extension of return filing and payment deadlines. Accounts are required to be filed in iXBRL format, subject to limited iXBRL exemption criteria.

If a company does not comply with the above filing obligation, it is subject to one of the following surcharges:

- 5% of the tax, up to a maximum penalty of EUR12,695, if the filing is not more than two months late
- 10% of the tax, up to a maximum penalty of EUR63,485, in all other cases

In addition, the company suffers the reduction of certain tax reliefs, which consist of the set off of certain losses against current-year profits and the surrender of losses among a group of companies. The following are the applicable reductions:

- A 25% reduction, up to a maximum of EUR31,740, if the filing is not more than two months late
- A 50% reduction, up to a maximum of EUR158,715, in all other cases

The above surcharges and restrictions also apply if a company fails to comply with its local property tax (see Section D) obligations with respect to residential properties that it owns.

A limited number of cases are selected for later in-depth revenue examination, and the assessment can be increased if the return is inaccurate.

A company must file a CGT return reporting disposals of development land and related unquoted shares and pay CGT on such disposals. CGT may be due twice a year, depending on the date of realization of the chargeable gains. CGT on such chargeable gains arising in the period of 1 January to 30 November must be paid by 15 December of that same year. CGT on such gains arising in December of each year is due on or before 31 January of the following year.

## **Dividends**

*Dividend withholding tax.* Dividend withholding tax (DWT) is imposed on distributions made by Irish companies at a rate of 20%.

The law provides for many exemptions from DWT. Dividends paid to the following recipients are not subject to DWT:

- Companies resident in Ireland
- Approved pension schemes
- Qualifying employee share ownership trusts
- Collective-investment undertakings
- Charities
- Certain sports bodies promoting athletic or amateur games
- Trustees of Approved Minimum Retirement Funds (funds held by qualifying fund managers on behalf of the individuals entitled to the assets)

Additional exemptions are provided for nonresidents. Distributions are exempt from DWT if they are made to the following:

- Nonresident companies, which are under the direct or indirect control of persons (companies or individuals) who are resident in an EU member country or in a country with which Ireland

has entered into a tax treaty (treaty country), provided that these persons are not under the control of persons not resident in such countries

- Nonresident companies, or 75% parent companies of nonresident companies, the principal class of shares of which is substantially and regularly traded on a recognized stock exchange in an EU member country or a treaty country
- Companies not controlled by Irish residents that are resident in an EU member country or a treaty country
- Non-corporate persons who are resident in an EU member country or a treaty country and are neither resident nor ordinarily resident in Ireland
- Certain qualifying intermediaries and authorized withholding agents

Effective from 1 January 2009, the above “treaty country” references are extended to any country with which Ireland has signed a double tax treaty (see footnote [p] in Section F).

Detailed certification procedures apply to some of the exemptions from DWT described above.

DWT does not apply to dividends covered by the EU Parent-Subsidiary Directive. Anti-avoidance provisions prevent the use of EU holding companies to avoid DWT. If a majority of an EU parent company’s voting rights are controlled directly or indirectly by persons not resident in an EU or tax treaty country, DWT applies unless it can be established that the parent company exists for bona fide commercial reasons and does not form part of a tax avoidance scheme. DWT may also be recovered under a double tax treaty.

Distributions paid out of certain types of exempt income, such as exempt woodland income, are not subject to DWT.

Companies must file a return within 14 days after the end of the calendar month of the distribution. The return is required regardless of whether DWT applies to the distributions. Any DWT due must be paid over to the Collector General when the return is filed.

*Other.* A company resident in Ireland can exclude from its taxable income distributions received from Irish resident companies (franked investment income).

Irish resident shareholders, other than companies, are subject to income tax on distributions received. DWT may be claimed as a credit against the recipient’s income tax liability. Recipients not subject to income tax may obtain a refund of DWT.

**Foreign tax relief.** Under tax treaty provisions, direct foreign tax on income and gains of an Irish resident company may be credited against the Irish tax levied on the same profits. However, foreign tax relief cannot exceed the Irish corporation tax attributable to the same profits.

For purposes of calculating the credit under tax treaties, income derived from each source is generally treated as a separate stream. Consequently, foreign tax may generally be credited only against the Irish corporation tax on the income that suffered the foreign tax. However, a unilateral credit for otherwise unrelieved foreign

tax on interest income may be offset against the corporation tax payable on the “relevant interest.” “Relevant interest” is defined as interest income from group companies, which are greater than 25% related and are resident in treaty countries. The unilateral credit relief effectively introduces a pooling mechanism for the calculation of the relief available.

If no treaty exists, a deduction for foreign tax paid is allowed against such income and gains. A unilateral credit relief is available for foreign tax deducted from royalties received by trading companies. For royalties received after 1 January 2012, a limited corporate tax deduction is available for foreign tax suffered that would not otherwise qualify for double tax relief or unilateral credit relief.

An Irish tax credit is available for taxes equivalent to corporation tax and CGT paid by a branch if Ireland has not entered into a tax treaty with the country where the branch is located or if Ireland’s tax treaty with such country does not provide for relief (that is, unilateral relief for branch profits tax).

An Irish company that has branches in more than one country can pool its excess foreign tax credits between the different branches. This is beneficial if one branch suffers the foreign equivalent of corporation tax at a tax rate higher than 12.5% and another branch pays tax at a rate lower than 12.5%. Unused credits can be carried forward to offset corporation tax in future accounting periods.

Unilateral credit relief for foreign tax paid by a company on interest income that is included in the trading income of a company for Irish corporation tax purposes may also be available. The relief is available only if the company cannot claim relief under a double tax treaty for the foreign tax and if the tax has not been repaid to the company. The unilateral relief is equal to the lesser of the Irish corporation tax attributable to the relevant interest or the foreign tax attributable to the relevant interest.

Unilateral credit relief may be available for Irish resident companies, or Irish branches of companies resident in EEA countries (excluding Liechtenstein), that receive dividends from foreign subsidiaries. Companies are permitted to “mix” the credits for foreign tax on different dividends from 5% subsidiaries for purposes of calculating the overall tax credit in Ireland. Any unused excess can be carried forward indefinitely and offset in subsequent periods. The subsidiaries can be located in any country. However, credits arising on dividends taxed at 12.5% are ring-fenced to prevent these tax credits from reducing the tax on the dividends taxed at the 25% rate.

Effective from 1 January 2013, an additional foreign tax credit (AFC) is available with respect to certain dividends received from companies resident in EEA countries (excluding Liechtenstein) if the existing credit for actual foreign tax suffered on the relevant dividend is less than the amount that would be computed by reference to the nominal rate of tax in the country from which the dividend is paid. The total foreign tax credit, including the AFC, cannot exceed the Irish corporation tax attributable to the income. Certain dividends are excluded.

Ireland has implemented the EU Parent-Subsidiary Directive (as amended). These provisions, which overlap to a significant extent with the unilateral credit relief measures described above, have been extended to Switzerland.

A company that incurs a tax liability on a capital gain in one of nine specified countries may claim a credit for foreign tax against Irish CGT on the same gain. This unilateral credit is targeted at those countries with which Ireland has entered into double tax agreements before the introduction of CGT.

### C. Determination of trading income

**General.** The calculation of trading income is based on the company's accounts prepared in accordance with generally accepted accounting practice (GAAP), subject to adjustments required or authorized by law. For tax purposes, accounts can be prepared under Irish GAAP (applies to accounting periods commencing before 1 January 2015), International Financial Reporting Standards (IFRS) or Financial Reporting Standards (FRS) 101 or 102 (FRS applies for any accounting periods commencing on or after 1 January 2015). Detailed rules address any transition from Irish GAAP to IFRS and FRS 101 or 102.

If derived from Irish sources, income derived from commercial woodlands is exempt from tax.

Expenses must be incurred wholly and exclusively for the purposes of the trade and be of a revenue (as distinct from capital) nature. However, entertainment expenses are totally disallowed, unless they are incurred for employees only. The deductibility of motor leasing expenses is restricted by reference to the carbon dioxide emissions of the motor cars.

Revenue expenditure incurred in the three years before the beginning of trading is generally deductible.

A tax deduction is available for expenditure incurred on acquiring know-how, which includes industrial information and techniques likely to assist in the manufacture or processing of goods or materials, for the purpose of a trade. The deduction is available for expenditure incurred before 7 May 2011. See *Tax depreciation (capital allowances)* for relief available on expenditure on intangible assets incurred on or after this date.

Depreciation of assets is not deductible. Instead, the tax code provides for a system of capital allowances (see *Tax depreciation [capital allowances]*).

*Share-based payments.* Consideration consisting directly or indirectly of shares in the company or a connected company that is given for goods or services or that is given to an employee or director of a company is generally not deductible except for the following:

- Expenditure incurred by the company on acquiring the shares (or rights to receive the shares)
- Payments made to a connected company for the issuance or the transfer of shares (or rights to receive the shares)

In effect, a tax deduction is denied for IFRS 2 or Financial Reporting Standard (FRS) 20 accounting costs unless these costs

reflect actual payments. In addition, the timing of the tax deduction for such payments is dependent on the employees' income tax positions.

*Interest payments.* Interest on loans used for trading purposes is normally deductible on an accrual basis in accordance with its accounting treatment unless specifically prohibited.

Certain types of interest paid in an accounting period may be classified as a distribution and, consequently, are not treated as an allowable deduction. However, interest may not be reclassified if it is paid by an Irish resident company to an EU resident company or to a resident of a treaty country (on election). Such interest is allowed as a trading deduction and is not treated as a distribution, subject to certain conditions and exceptions. To facilitate cash pooling and group treasury operations, in the context of a lending trade, a tax deduction may be allowed for interest payments to a connected company in a non-treaty jurisdiction, to the extent that the recipient jurisdiction levies tax on such interest.

Before 2003, a borrower could accrue interest on a loan and claim a tax deduction, while the lender might not be subject to tax until the interest was actually paid. However, since 2003, a tax deduction for interest accrued on a liability between connected persons (including companies and individuals) may be deferred until such time as the interest is actually paid if all of the following circumstances exist:

- The interest is payable directly or indirectly to a connected person.
- Apart from the new measure, the interest would be allowable in computing the trading income of a trade carried on by the payer.
- The interest is not trading income in the hands of the recipient, as determined under Irish principles.

Detailed rules provide for the apportionment of interest between allowable and non-allowable elements.

The above restriction does not apply to interest payable by an Irish company to a connected nonresident corporate lender if the lender is not under the control, directly or indirectly, of Irish residents.

Banks may deduct interest payments made to nonresident group companies in calculating trading income (that is, the payments are not reclassified as distributions).

Charges on income, such as certain interest expenses and patent royalties, are not deductible in the computation of taxable trading income, but may be deducted when paid as a charge. A tax deduction may be claimed for interest as a charge (as a deduction from total profits, which consists of income and capital gains) if the funds borrowed are used for the following non-trading purposes:

- Acquisition of shares in a rental or trading company, or a company whose business principally consists of holding shares in trading or rental companies
- Lending to the companies mentioned in the first bullet, provided the funds are used wholly and exclusively for the purpose of the trade or business of the borrower or of a connected company

Deductions of interest as a charge have always been subject to certain conditions and anti-avoidance measures. These conditions

and measures have added complexities to the implementation and maintenance of structures designed to qualify for this interest relief. In particular, interest relief is restricted if the borrower receives or is deemed to have received, a “recovery of capital” (as defined).

Interest on loans made on or after 2 February 2006 is not allowed as a tax deduction if the loan to the Irish company is from a connected party and if the loan is used, directly or indirectly, to acquire shares from a connected company. The 2011 Finance Act introduced measures that restrict the deductibility of interest as a trading expense and interest as a charge to the extent that an acquisition of assets from a connected company is funded by monies borrowed from another connected company.

Certain additional anti-avoidance rules may apply in connected party situations.

*Foreign-exchange gains and losses.* Realized and unrealized foreign-exchange gains and losses relating to monies held or payable by a company for the purpose of its business, or to hedging contracts with respect to such items, are included in the taxable income of a company to the extent the gains and losses have been properly recorded in the company’s accounts. If a company acquires a shareholding in a 25% subsidiary in a foreign currency and that acquisition is funded by a liability (borrowings, share capital or a capital contribution) in the same foreign currency, the company can elect to match the foreign currency gain or loss on the asset (the shares in the 25% subsidiary) with the foreign currency gain or loss on the liability. As a result, the company is taxable only on the real economic gain or loss on the asset and not on currency movements against which it is economically hedged. A company must make the matching election within three weeks of the making of the investment.

An additional foreign-exchange matching measure permits trading companies to elect to match exchange-rate movements on trading assets denominated in foreign currency against movements on redeemable share capital denominated in foreign currency. The election for this treatment must be made within three weeks of acquiring the relevant trading asset.

**Inventories.** Stock is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis or some approximation of FIFO; the last-in, first-out (LIFO) basis is not acceptable.

**Provisions.** General provisions and reserves are not allowable deductions. Some specific provisions and reserves, including reserves for specific bad debts, may be allowed. In general, provisions created in accordance with Financial Reporting Standard 12 are deductible for tax purposes.

#### **Tax depreciation (capital allowances)**

*Plant and machinery.* Capital expenditure on plant and machinery and motor vehicles in use at the end of an accounting period is written off at an annual straight-line rate of 12.5%.

The maximum qualifying expenditure for capital allowances on motor vehicles is EUR24,000. Capital allowances and leasing

expense deductions for new motor cars are granted by reference to carbon dioxide emissions. As a result, some vehicles do not qualify for capital allowances or leasing expense tax deductions.

An immediate 100% write-off is allowed for capital expenditure on oil and gas exploration, development and abandonment, incurred under a license issued by the Minister for Energy. An immediate 100% write-off is also allowed for certain energy-efficient equipment.

On the disposal of plant and machinery, a balancing charge or allowance applies, depending on the amount received on disposal compared with the written-down value of the asset. Balancing charges are not imposed with respect to plant and machinery if the proceeds from the disposal are less than EUR2,000.

*Computer software.* If a company carrying on a trade incurs capital expenditure on the acquisition of software or a right to use software in that trade, the right and related software is regarded as plant or machinery and qualifies for capital allowances over eight years. Some computer software may qualify for tax depreciation under the intangible assets regime (see *Intangible assets*).

*Patent rights.* A company incurring capital expenditure on the purchase of patent rights for use in a trade may be entitled to writing-down allowances. Relief is given over 17 years or the life of the patent rights, whichever is the shorter. Ongoing patent royalties are typically deductible when paid (see information regarding charges in *Interest payments*). The allowances are available for expenditure incurred before 7 May 2011. See *Intangible assets* for relief available on expenditure incurred on or after this date.

*Immovable property.* The basic annual rate is 4% for industrial buildings. Capital expenditure incurred on hotels on or after 4 December 2002 is written off over 25 years (previously 7 years). Transitional measures applied to certain approved projects if the expenditure was incurred on or before 31 December 2006, and reduced rates applied in certain circumstances if the expenditure was incurred in the period 1 January 2007 through 31 July 2008.

*Urban renewal schemes.* Property-based tax incentives in urban renewal areas may be available for expenditure incurred before 31 July 2008. The reliefs include accelerated capital allowances for commercial and industrial buildings.

*Telecommunication infrastructure.* Capital allowances are available for capital expenditure incurred on the purchase of rights to use advanced telecommunication infrastructure. These intangible rights typically extend from 10 to 25 years. They are usually purchased with an upfront lump-sum payment. The expenditure incurred by a company on such rights may be written off over the life of the agreement relating to the use of the rights, with a minimum period of seven years.

*Other.* Capital allowances are also available on expenditure incurred for scientific research, dredging, mining development, ships, agricultural buildings, airport buildings, runways, and petroleum exploration, development and production. Capital allowances for expenditure incurred on private hospitals and private nursing homes are being phased out.

*Intangible assets.* Capital allowances are available on a broad range of specified intangible assets acquired on or after 8 May 2009. Capital allowances are available for expenditure incurred on many types of intangible assets including, but not limited to, customer lists, brands, trademarks, patents, copyrights, designs, know-how, some computer software, pharmaceutical authorizations and related rights, licenses and attributable goodwill.

Relief is generally granted in line with book depreciation and is claimed on the annual tax return.

However, the company can elect for a 15-year write-off period, which is useful if intangible assets are not depreciated for book purposes. This election is made on an asset-by-asset basis.

For accounting periods beginning before 1 January 2015, the aggregate amount of allowances and related interest expense that may be claimed for any accounting period is capped at 80% of the trading income of the relevant trade for that period (excluding such allowances and interest). The residual 20% profit is taxed at normal rates. For accounting periods beginning on or after 1 January 2015, the 80% cap is eliminated. Excess allowances can be carried forward indefinitely against income of the same trade.

Allowances granted are clawed back if the asset is sold within a five-year period.

*Patent rights and know-how.* For acquisitions before 6 May 2011, allowances for acquired patent rights were granted over the shorter of 17 years or the duration of acquired rights. Certain know-how was deductible in full in the year of acquisition. After that date, relief must be claimed under the new intangible asset regime (see *Intangible assets*).

**Research and development expenditures.** A corporation tax credit of 25% is available for qualifying research and development (R&D) expenditure incurred by companies for R&D activities carried on in EEA countries. For relevant periods commencing before 1 January 2015, an incremental basis of calculating the R&D credit applied. The base year used to calculate the incremental expenditure is 2003. This credit is granted in addition to any existing deduction or capital allowances for R&D expenditure. As a result of this credit, companies may enjoy an effective benefit of up to 37.5% of R&D expenditure.

R&D credits that cannot be used in an accounting period can be carried forward indefinitely to future accounting periods. Excess R&D credits can be carried back against corporation tax paid in the immediately preceding accounting period. Any remaining excess credits may be refunded over a three-year period. This enhancement of the R&D credit regime represents a significant cash-flow opportunity for loss-making companies. However, a 12-month time limit for R&D claims applies. All R&D claims must be made within 12 months after the end of the accounting period in which the R&D expenditure giving rise to the claim is incurred.

A reward scheme allows companies to use all or part of the R&D credit to reward key employees.

**Film credit.** Subject to a Ministerial Commencement Order, amendments to the provisions relating to relief for investment in qualifying films (Section 481 relief) will be introduced in 2015. The principle of relief for investors in films will give way to a new tax credit system for producer companies. The film corporation tax credit will have a percentage of 32% and will be applied against the corporation tax liability of the producer company. Any excess will be available for payment to the producer company. Detailed certification rules and conditions will apply.

**Relief for losses.** Trading losses and charges incurred by a company in an accounting period in a trading activity that is not subject to the 25% corporation tax rate (effectively most trades) can be offset only against profits of that accounting period or the preceding accounting period to the extent that the profits consist of trading income subject to the 12.5% rate. Any unused trading losses may be carried forward to offset future trading income derived from the same trade.

Relief may be available through a reduction of corporation tax on a value basis. For example, in 2015, when the standard corporation tax rate on trading income is 12.5%, 12.5% of the trading loss may be offset against the corporation tax liability of a company with respect to profits from all sources. The full amount of the trading loss that is so utilized is regarded as being used up for purposes of calculating losses that may be carried forward. In effect, a company needs trading losses equal to twice the amount of its passive income to eliminate its tax liability on such income.

Terminal loss relief may be available if a company incurs a loss in its last 12 months of trading. This relief allows such losses to be carried back against income of the same trade in the preceding three years.

**Groups of companies.** Certain tax reliefs are available to a group of companies that meet the following requirements:

- The group companies have a minimum share relationship of 75%.
- The parent company is entitled to 75% of distributable profits.
- The parent company is entitled to 75% of assets available for distribution on a winding up.

Such companies may transfer surplus losses and excess charges on income. Surplus losses of companies owned by a consortium may also be transferred.

Group and consortium relief are available if all of the companies in the group or consortium are resident in an EEA member country (except Liechtenstein). Loss relief was historically restricted to losses incurred in a business carried on by a company subject to Irish corporation tax. However, group relief is now available for certain “trapped” trading losses incurred by non-Irish 75% subsidiaries resident in an EEA country (except Liechtenstein). Losses that can be used elsewhere are ineligible for surrender.

For accounting periods ending on or after 1 January 2012, group relief provisions are extended so that losses can be transferred between two Irish resident companies if both companies are part of a 75% group involving companies that are tax resident in an EU or tax treaty country, or quoted on a recognized stock exchange.

Effective from 1 January 2013, in determining whether a company is a 75% subsidiary of another company for the purpose of group relief (losses), the parent is no longer regarded as owning any shares that it owns directly or indirectly in a company that is not resident for tax purposes in a relevant territory. This effectively means that losses may not be surrendered if a company resident in a state that has not entered into a double tax treaty with Ireland is between a claimant and a surrendering company in the group structure.

The National Asset Management Agency Act 2009 provides for a limited form of loss surrender between certain financial institutions in the same group with respect to excess losses carried forward from earlier periods for which the surrendering financial institution cannot obtain relief.

In a 75% group, assets may be transferred without generating a chargeable gain. An asset retains its tax value while it is held within the group. The tax value is generally based on original cost; for assets acquired before 6 April 1974, the tax value is computed with reference to the market value on that date. If an asset is transferred to a company that leaves the group within 10 years after the transaction, that company is deemed to have disposed of and immediately reacquired the asset at its market value at the time of its acquisition, effectively crystallizing the deferred gain.

A nonresident company that is resident in an EEA country (except Liechtenstein) may be taken into account in determining whether a group exists for chargeable gains purposes. An Irish branch of a company resident in an EEA country (except Liechtenstein) that is a member of a group may transfer assets to another member of a group on a tax-neutral basis. Any gain arising on the transfer is not taxable until the asset is sold outside the group. To qualify for such relief, the following conditions must be satisfied:

- Each of the companies in the group must be resident in Ireland or in an EEA country (except Liechtenstein).
- Any companies not resident in Ireland must be carrying on a trade in Ireland through a branch.
- The transferred asset must be a chargeable asset for corporation tax purposes in Ireland.

Dividends paid between Irish resident companies are not subject to DWT (see Section B) if the appropriate declarations are made. However, a 51% subsidiary resident in Ireland may pay dividends free of DWT without the parent company making a formal declaration to the subsidiary that it is an Irish resident company. Withholding tax is not imposed on interest and royalty payments between members of a 51% group.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax, on any supply of goods or services, other than an exempt supply made in or deemed to be made in Ireland, and on imports from other than EU member states at the point of entry	
Standard rate	23
Other rates	0/4.8/5.2/9/13.5

Nature of tax	Rate (%)
Stamp duty, on certain documents (maximum rate)	2
Local property tax (residential property); assessed on the midpoint value of valuation bands	
Market value less than EUR1 million	0.18
Market value greater than EUR1 million	
First EUR1 million	0.18
Balance	0.25
Pay-related social insurance (PRSI) (for the period ending 31 December 2015), on employees' salaries; paid by	
Employers	
For employees earning a weekly salary of more than EUR356; on each employee's salary without limit	10.75
For employees earning a weekly salary of EUR356 or less	8.5
Employees	
PRSI; on annual salary	4
Universal Social Charge (USC)	
Annual salary of up to EUR12,012 (exempt if income is less than EUR12,012)	1.5
Annual salary of EUR12,013 to EUR17,576	3.5
Annual salary of EUR17,577 to EUR70,044	7
Annual salary in excess of EUR70,044	8
(A 3.5% rate applies to individuals over 70 years old who hold a full medical card and whose aggregate income for the year is less than EUR60,000.)	

## E. Miscellaneous matters

**Foreign-exchange controls.** Foreign-exchange controls are not imposed, except in very limited circumstances at the discretion of the Minister for Finance. For example, the minister may impose foreign-exchange controls to comply with EU law or a United Nations resolution.

**Debt-to-equity ratios.** No thin-capitalization rules exist, but interest payments to 75%-nonresident affiliated companies may be treated as distributions of profit and consequently are not deductible (for details regarding this rule, see Section C).

**Controlled foreign companies.** No controlled foreign company (CFC) rules exist in Ireland.

**Anti-avoidance rule.** A general anti-avoidance rule (GAAR) empowers the Revenue Commissioners to reclassify a "tax avoidance" transaction in order to remove a tax advantage resulting from such transaction. An additional surcharge equal to 30% (20% for transactions begun on or before 23 October 2014) of the underpayment can be imposed if the Revenue Commissioners deny a tax advantage and if the taxpayer had not made a "protective notification" of the "tax avoidance" transaction to the Revenue within 90 days after the beginning of the transaction.

**Transfer pricing.** Transfer-pricing legislation in Ireland is effective from 1 January 2011. The rules apply to any arrangement between associated enterprises if the transaction meets the definition of an Irish trading transaction for one or both of the parties.

For the purposes of determining an arm's-length price, the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations are adopted. Sufficient records must be maintained to support an arm's-length price. OECD-style documentation is sufficient.

Grandfathering provisions apply to transactions for which the terms were agreed on before 1 July 2010. Exemptions from the rules are available for small and medium-sized enterprises, which are companies with fewer than 250 employees and turnover of less than EUR50 million or assets of less than EUR43 million.

**Construction operations.** Special withholding tax rules apply to payments made by principal contractors to subcontractors with respect to relevant contracts in the construction, forestry and meat-processing industries. Under these rules, principal contractors must withhold tax from certain payments. An electronic system was introduced in 2012. Under this system (within which all relevant contracts must be registered), withholding rates of 0%, 20% and 35% apply. If subcontractors are not registered with the Revenue or if serious compliance issues that need to be addressed exist, the rate is 35%. All other subcontractors should qualify for the 20% rate.

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

Non-treaty countries	0/20 (o)(p)	20 (b)(p)	0/20 (c)

(a) Withholding tax at a rate of 20% applies to dividends distributed on or after 6 April 2001. The table assumes that the recipient of the dividends is not a company controlled by Irish residents (that is, the domestic measure providing that DWT is not imposed on payments to residents of treaty countries applies). If domestic law allows the imposition of DWT, a refund of the DWT may be obtained under the terms of an applicable tax treaty.

(b) Interest is generally exempt from withholding tax if it is paid by a company or investment undertaking in the ordinary course of its business to a company resident in an EU member country or a country with which Ireland has entered into a tax treaty. However, this exemption may be unavailable if the recipient is resident in a country that does not generally impose a tax on interest received from foreign sources.

- (c) Under Irish domestic law, withholding tax on royalties applies only to patent royalties and to other payments regarded as “annual payments” under Irish law. The Irish Revenue has confirmed that withholding tax need not be deducted from royalties paid to nonresidents with respect to foreign patents (subject to conditions). Effective from 4 February 2010, withholding tax does not apply to patent royalties paid by a company in the course of a trade or business to a company resident in a treaty country that imposes a generally applicable tax on royalties received from foreign sources (subject to conditions).
- (d) The normal withholding tax rate for royalties is 10%. However, the following royalties are exempt unless the recipient has a permanent establishment in Ireland and the income is derived there:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works (but not including royalties paid for motion picture films or for works on film or videotape or other means of reproduction for use in connection with television broadcasting)
  - Royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including any such royalties in connection with rental or franchise agreements)
- (e) The 0% rate also applies in certain circumstances, such as if the interest is paid by, or received from, a central bank or local authority.
- (f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (g) The 0% rate also applies in certain circumstances, such as if the interest is paid by or received from a central bank or local authority. The 5% rate applies if the beneficial owner of the interest is a bank. The 10% rate applies to other interest.
- (h) A 0% rate also applies to royalties for the use of copyrights of literary, artistic or scientific works, including motion pictures, film recordings on tape, other media used for radio or television broadcasting or other means of reproduction or transmission.
- (i) The 0% rate also applies to interest paid to banks or financial institutions, interest paid on loans with a term of more than two years and interest paid in certain other circumstances.
- (j) The withholding tax rate for royalties is 10%, but only 60% of royalties for the use of, or the right to use, industrial, commercial or scientific equipment is taxable.
- (k) The 5% rate applies to royalties paid for the use of patents, designs or models, plans, secret formulas or processes or for information concerning industrial or scientific experience. The 10% rate applies to royalties paid for the use of trademarks or information concerning commercial experience. The 15% rate applies to other royalties.
- (l) The normal withholding tax rate for interest is 10%, but a 0% rate applies in certain circumstances.
- (m) Ireland has implemented Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between 25%-associated companies of different EU member states. The 2005 Finance Act extended these benefits to Switzerland. If the directive applies, the withholding tax rate is reduced to 0%.
- (n) The 10% rate applies to interest paid with respect to a loan or other debt claim for a period exceeding two years or interest paid to a financial institution.
- (o) Irish domestic law may provide for an exemption from DWT under certain circumstances (see Section B).
- (p) Ireland has signed full double tax treaties with Thailand and Ukraine, but these treaties are not yet in force. However, certain withholding tax exemptions that are available to treaty countries under Irish domestic law (see footnotes [a] and [b]) may be extended to residents of these countries and to residents of any other countries with which Ireland signs a double tax treaty (beginning on the date of signing of such agreement), subject to conditions.
- (q) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, computer software, industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.
- (r) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 8% rate applies to other royalties.

Ireland has entered into limited double tax agreements with Guernsey, the Isle of Man and Jersey, which do not provide for reductions in withholding taxes.

Ireland has completed the ratification procedures for new double tax treaties with Botswana, Thailand and Ukraine. A double tax treaty with Ethiopia has been signed.

According to the Irish Revenue, negotiations for a double tax treaty with Turkmenistan and new treaties to replace the existing treaties with Pakistan and Zambia have been concluded.

A protocol to the existing treaty with Malaysia has not yet entered into force. Ireland has ratified protocols to the existing treaties with Belgium, Denmark and Luxembourg. Negotiations on a protocol to the existing double tax treaty with Germany have been concluded and negotiations for a protocol to the existing double tax treaty with Mexico are ongoing. The existing treaty with the Netherlands is also in the process of renegotiation.

Ireland is negotiating double tax treaties with Azerbaijan and Jordan.

Branch Tax Rate (%)	0 (a)
Withholding Tax (%)	
Dividends	0
Interest	0 (b)
Royalties	0
Net Operating Losses	
Carryback	1 (c)
Carryforward	Unlimited (c)

- (a) The standard 0% rate of corporate income tax applies to all profits derived by companies except for profits arising from land and property in the Isle of Man, certain banking business in the Isle of Man and certain retail business in the Isle of Man. These profits are subject to tax at a rate of 10%.
- (b) Information is exchanged automatically in all cases.
- (c) Loss relief is available in certain circumstances (see Section C).

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in the Isle of Man are subject to income tax on their worldwide income, but relief from double taxation may be available. A nonresident company with a branch carrying on a trade in the Isle of Man is subject to tax on the income of the branch. A company is resident in the Isle of Man if it is incorporated in the Isle of Man or if the central management and control of the company is exercised there.

**Rates of corporation tax.** The standard rate of corporate income tax is 0%. This rate applies to all profits derived by trading and investment companies, except for profits arising from land and property in the Isle of Man, certain banking business in the Isle of Man, and certain retail business in the Isle of Man. These profits are subject to tax at a rate of 10%. Trading companies may also elect to be taxed at the 10% rate.

**Special types of companies.** Special types of companies in the Isle of Man are described briefly below.

*Funds industry.* The Isle of Man has a full suite of fund options, with the Specialist Funds being a popular vehicle for alternative investment. Management fees, including administration services' fees, to Specialist Funds, are exempt for value-added tax (VAT) purposes if the services are provided from the IOM. Specialist Funds can include close-ended investment trust companies. The exemption can also cover UK-listed investment entities, including investment trust companies, venture capital trusts, and certain overseas funds.

The Isle of Man also offers exempt schemes which are not subject to regulation. Exempt schemes may have up to 49 members (provided the scheme is not available to the public; that is, it is a private engagement). Virtually all types of assets can be held in these schemes.

Overseas funds may be administered in the Isle of Man without being subject to Isle of Man regulations if they are incorporated in a jurisdiction with an appropriate regulatory framework.

*Limited liability companies.* The Limited Liability Companies Act 1996 allows for the formation of limited liability companies (LLCs). The liability of the members of an LLC is limited to the members' contributions to capital.

For Manx tax purposes, an LLC is treated like a partnership. Consequently, an LLC's profits are allocated among its members for tax purposes.

*New Manx Vehicles.* The New Manx Vehicle (NMV) is a corporate vehicle that is subject to simplified filing requirements and that is designed to be flexible and inexpensive to administer. It is taxed in the same manner as normal Isle of Man companies.

*Manx foundations.* Under the Foundations Act 2011, foundations can be created in the Isle of Man. Manx foundations are regarded as corporate taxpayers for purposes of Manx corporate income tax and are taxed in the same manner as normal Isle of Man companies. Manx foundations are of particular interest to persons who are from civil law jurisdictions.

**Capital gains.** Capital gains tax is not levied in the Isle of Man.

**Administration.** Tax returns must be filed within 12 months and 1 day after the accounting year-end, and any tax payable is due at the same time. In certain circumstances, companies wholly subject to the 0% rate file shortened tax returns.

Filing penalties apply for the late submission of company returns. The first penalty is GBP250. A further penalty of GBP500 is imposed if the return is not filed within 18 months and 1 day after the end of the accounting period. If the return remains outstanding 24 months after the end of the accounting period, the company and its officers may be subject to criminal proceedings.

**Withholding taxes.** In general, no withholding tax is imposed on dividends, interest and royalties paid by Isle of Man resident companies. The Assessor of Income Tax may require a person who makes a payment or credit of taxable income to a person resident

outside the Isle of Man to deduct income tax from such payment or credit at a rate specified by the Assessor. For example, a 10% withholding tax is imposed on Isle of Man rent paid by Isle of Man resident companies to nonresident companies, and a 20% withholding tax is imposed on rent paid to nonresident individuals.

**Foreign tax relief.** Foreign tax on income of a resident company may be credited against Manx income tax on the same profits. Foreign tax relief cannot exceed the income tax assessed by the Isle of Man on those profits.

### C. Determination of trading income

**General.** The tax assessment is based on financial accounts prepared using generally accepted accounting principles, subject to certain adjustments and provisions.

Expenses must be incurred wholly and exclusively for the purpose of the trade and in acquiring income. Dividends are not deductible in calculating taxable profit.

**Inventories.** Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not acceptable.

#### Capital allowances (tax depreciation)

*Plant and machinery.* A first-year allowance of up to 100% may be claimed. Annual writing-down allowances of 25% may also be claimed.

*Motor vehicles.* Expenditures on motor vehicles qualify for an annual allowance of 25% of the declining balance. The maximum annual allowance is GBP3,000.

*Industrial buildings, agricultural buildings and tourist premises.* A 100% initial allowance may be claimed on capital investment to acquire, extend or alter a qualifying industrial building, agricultural building or tourist facility. This allowance is granted on expenditures in excess of any government grants received.

*Disposals.* On the ultimate disposal of assets on which capital allowances have been claimed, an adjustment is made by add-back or further allowance to reflect the net cost to the company of the asset.

**Relief for trading losses.** Trading losses may be used to offset other income of the year in which the loss was incurred or income of the preceding year if the same trade was carried on, or losses may be carried forward, without time limit, to offset future income from the same trade. Special rules apply to the carryback of losses on commencement or cessation of the trade.

Companies may also surrender losses to 75%-group companies. A recipient company can use surrendered losses only against profits earned in the same year of assessment.

Under the loss relief rules described above, relief is allowable only against profits chargeable at the same rate of tax. Losses arising from activities subject to tax at the rate of 0% may not be relieved against profits taxed at 10%.

## D. Other significant taxes

The Isle of Man and the United Kingdom are considered one area for VAT, customs and excise purposes. VAT, customs and excise rates are levied in the Isle of Man at the same rates as in the United Kingdom. The Customs and Excise Division in the Isle of Man operates independently from the United Kingdom, but under similar legislation.

Under Protocol 3 of the UK's Treaty of Accession to the European Union (EU), the Isle of Man enjoys the benefits of being within Europe for financial services, customs and VAT purposes, but outside the United Kingdom and the EU with respect to direct taxation and legal and regulatory matters. This makes it possible to operate businesses from the Isle of Man that are subject to a corporate income tax rate of 0%, but are VAT-registered. It allows UK inward investors to arrange for VAT registration in the Isle of Man without the risk of a taxable presence in the United Kingdom. The Isle of Man has its own Electronic Processing Unit (EPU), whereby international traders or their agents can electronically declare imports or exports into or out of the Isle of Man or the United Kingdom. This results in a system-generated customs clearance. On payment of duties and taxes due, goods can then enter into free circulation and be traded with any other EU member state. Businesses can land their goods in the Isle of Man or the United Kingdom and make customs declarations through the Isle of Man for both jurisdictions. Systems and procedures in both the Isle of Man and the United Kingdom are the same and rules, procedures and decisions from the Isle of Man apply throughout the EU.

The Isle of Man has the same system for National Insurance contributions as the United Kingdom, but the contributions are calculated at lower rates.

## E. Miscellaneous matters

**Anti-avoidance provisions.** The Assessor of Income Tax has the authority to make an assessment or an additional assessment in situations in which the Assessor considers Manx tax to have been avoided. Appeals are made to the Income Tax Commissioners. No assessment is made if the person involved provides evidence to the Assessor that the purpose of avoiding or reducing income tax liability was not the primary purpose or one of the primary purposes for which the transaction was carried out.

**Foreign-exchange controls.** The Isle of Man does not impose any foreign-exchange controls.

## F. Tax treaties

The Isle of Man has entered into double tax treaties with Bahrain, Estonia, Guernsey, Jersey, Luxembourg, Malta, Qatar, Seychelles, Singapore, and the United Kingdom. It has also signed a double tax treaty with Belgium, but this treaty is not yet in force.

In addition, the Isle of Man has entered into agreements with the following countries to eliminate the double taxation of profits with respect to enterprises operating ships or aircraft in international traffic.

Denmark	Germany	Norway
Faroe Islands	Greenland	Poland
Finland	Iceland	Sweden
France	Netherlands	United States

The Isle of Man has signed tax information exchange agreements (TIEAs) with the following countries.

Argentina	Greenland	Norway
Australia	Iceland	Poland
Botswana*	India	Portugal
Canada	Indonesia*	Slovenia
China	Ireland	Swaziland*
Czech Republic	Italy*	Sweden
Denmark	Japan	Switzerland*
Faroe Islands	Lesotho*	Turkey*
Finland	Mexico	United Kingdom
France	Netherlands	United States
Germany	New Zealand	

\* TIEAs with these countries are awaiting ratification.

**A. At a glance**

Corporate Income Tax Rate (%)	26.5 (a)
Capital Gains Tax Rate (%)	26.5 (a)(b)
Branch Tax Rate (%)	26.5 (a)
Withholding Tax (%)	
Dividends	0/15/20/25/30 (c)(d)
Interest	0/26.5 (a)(c)(e)(f)
Royalties from Patents, Know-how, etc.	26.5 (a)(c)(e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) This is the regular company tax rate for profits and real capital gains, effective from 1 January 2014. Reduced rates of company tax are available in accordance with the Capital Investment Encouragement Law (for details, see Section B).

(b) See Section B for details.

(c) The withholding tax may be reduced by applicable tax treaties.

(d) The 0% rate generally applies to distributions to Israeli parent companies. In addition, effective from 1 January 2014, reduced withholding tax rates of 15% and 20% may apply under the Capital Investment Encouragement Law (15% previously).

(e) In principle, the withholding taxes on interest and royalties are not final taxes.

(f) Interest paid to nonresidents on Israeli corporate bonds registered for trading on the Tel-Aviv Stock Exchange is exempt. In general, interest paid to nonresidents on Israeli governmental bonds is exempt. However, interest on short-term bonds (issued for 13 months or less) is taxable.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to Israeli tax on their worldwide income. Nonresident companies are subject to Israeli tax on income accrued or derived in Israel, unless otherwise provided for in an applicable tax treaty.

A company is considered resident in Israel for Israeli tax purposes if either of the following applies:

- It is incorporated in Israel.
- Its business is controlled and managed in Israel.

**Rates of corporate tax.** Effective from 1 January 2014, the regular rate of company tax is 26.5%. The following are the combined Israel taxes on profits, taking into account the 30% withholding tax on dividends paid to shareholders holding 10% or more of the company (material shareholders) and the 25% withholding tax imposed on shareholders holding less than 10% of the company:

- Material shareholders: 48.55% for 2014 and future years. Holders that are individuals who have taxable income that exceeds ILS810,720 for 2015 (linked to the Consumer Price Index each year) may be subject to an additional tax at a rate of 2% on their taxable income in excess of ILS810,720.
- Other shareholders: 44.875% for 2014 and future years. For individual holders, an additional tax of 2% may apply (see above).

The dividend withholding tax rates mentioned above may be reduced based on applicable tax treaties.

**Tax levy on oil and gas.** Under the Windfall Profits Tax Law, effective from 10 April 2011, a levy is imposed on oil and gas profits from an oil or gas project in the relevant tax year. The levy is designed to capitalize on the economic dividend arising from each individual reservoir. The levy is imposed only after the investments in exploration, development and construction are fully returned plus a yield that reflects, among other items, the developer's risks and required financial expenses. The levy is progressive and has a relatively lower rate when first collected, and increases as the project's profit margins grow.

**Tax reductions and exemptions.** The major tax reductions and exemptions offered by Israel are described below.

*Capital Investment Encouragement Law.* An amendment to the Capital Investment Encouragement Law is effective from 1 January 2011.

The law has the following objectives:

- Achieving of enhanced growth targets in the business sector
- Improving the competitiveness of Israeli industries in international markets
- Creating employment and development opportunities in outlying areas

Precedence is granted to innovation and development areas.

The country is divided into national priority areas, which benefit from several reduced tax rates and benefits based on the location of the enterprise.

A reduced uniform corporate tax rate for exporting industrial enterprises (generally over 25% of turnover from export activity) applies. The reduced tax rate does not depend on a program and applies to the industrial enterprise's industrial income.

For 2014 and future years, the reduced tax rates for industrial enterprises that meet the criteria of the law are 9% for Development Area A and 16% for the rest of the country. In addition, accelerated depreciation applies. The accelerated depreciation reaches 400% of the standard depreciation rate on buildings (not exceeding 20% per year and exclusive of land) and 200% of the standard depreciation rate on equipment.

Effective from 1 January 2014 a reduced tax on dividends of 15% or 20% (15% previously) is imposed without distinction between foreign and local investors. These tax rates may be reduced under applicable tax treaties. On the distribution of a dividend to an Israeli company, no withholding tax is imposed.

A unique tax benefit is granted to certain large industrial enterprises. This entitles such companies to a reduced tax rate of 5% in Development Area A and 8% in the rest of the country.

In addition to the above tax benefits, fixed asset grants of 20% to 32% of the investment cost of fixed assets may be granted to enterprises in Development Area A.

Grants may also be made under the Employment Grant Program. These grants are made to create incentives for employment in the outlying areas of Israel. The grants are up to 40% of the cost of salaries for a period of two and one-half to four years, depending on the location, number of employees and the employees' salaries. The average percentage of the grants is 40%.

Research and development (R&D) incentives programs are available to Israelis companies. The Office of the Chief Scientist at the Ministry of Economy primarily provides these incentives. The company can obtain an R&D grant equal to about 30% to 60% of its R&D expenses, depending on the grant program, the company's technology innovation and its business model. Binational agreements for joint R&D projects are also available. These agreements provide for grants equaling 30% to 60% of the R&D expenses incurred during the commercial phase.

Some of Israel's tax treaties include tax-sparing clauses under which regular Israeli taxes, rather than reduced Israeli taxes, may be credited against tax imposed on dividends received from an Israeli company in the investor's country of residence. As a result, the Israeli tax benefits may be partially or fully preserved for an investor in an Israeli company enjoying the benefits of the Capital Investment Encouragement Law.

*Eilat free trade zone.* A value-added tax (VAT) exemption and employment benefits are granted to enterprises in the Eilat free trade zone.

*Other incentives.* Approved residential rental properties qualify for reduced company tax rates on rental income (and on gains derived from sales of certain buildings that have a residential element; a building has a residential element if at least 50% of the

floor space is rented for residential purposes for a prescribed number of years, according to detailed rules). The reduced rates generally range from 11% (plus 15% withholding tax on dividends) for companies to 20% for individuals.

Preferential tax treatment may also be allowed with respect to the following:

- Real Estate Investment Trust (REIT) companies
- Agriculture
- Oil
- Movies
- International trading
- R&D financing
- Hotels and tourist ventures

Foreign resident investors may qualify for exemption from capital gains tax in certain circumstances (see *Capital gains and losses*).

### **Capital gains and losses**

*Residents.* Resident companies are taxable on worldwide capital gains. Capital gains are divided into real and inflationary components. The following are descriptions of the taxation of these components:

- Effective from 1 January 2014, the tax rate on real capital gains is the standard corporate tax rate of 26.5%.
- The inflationary component of capital gains is exempt from tax to the extent that it accrued on or after 1 January 1994, and is generally taxable at a rate of 10% to the extent that it accrued before that date.

Gains derived from sales of Israeli real estate or from sales of interests in real estate associations (entities whose primary assets relate to Israeli real estate) are subject to Land Appreciation Tax at rates similar to those applicable to other capital gains.

Capital losses may be used to offset capital gains derived in the same or future tax years without time limit. In each year, capital losses are first offset against real gains and then offset against taxable inflationary amounts in accordance with the following ratio: ILS3.5 of inflationary amounts per ILS1 of capital losses. Capital losses from assets located abroad must be offset against capital gains on other assets abroad, then against capital gains from assets in Israel.

Capital losses incurred on securities can also be offset against dividend and interest income in the same year, subject to certain conditions.

*Nonresidents.* Unless a tax treaty provides otherwise, in principle, nonresident companies and individuals are subject to Israeli tax on their capital gains relating to any of the following:

- An asset located in Israel.
- An asset located abroad that is primarily a direct or indirect right to an asset, inventory or real estate in Israel or to a real estate association (an entity whose primary assets relate to Israeli real estate). Tax is imposed on the portion of the consideration that relates to such property in Israel.
- Shares or rights to shares (for example, warrants and options) in an Israeli resident entity.

- A right to a nonresident entity that primarily represents a direct or indirect right to property in Israel. Tax is imposed on the portion of the consideration that relates to such property in Israel.

Foreign residents not engaged in business in Israel may qualify for exemption from capital gains tax on disposals of the following investments:

- Securities traded on the Tel-Aviv stock exchange (with certain exceptions)
- Securities of Israeli companies traded on a recognized foreign stock exchange

The above exemption does not apply to the following:

- Gains attributable to a permanent establishment (generally a fixed place of business) of the investor in Israel
- Shares of Real Estate Investment Trust (REIT) companies
- Capital gains derived from the sale of Israeli governmental short-term bonds (issued for 13 months or less)

Foreign residents may also qualify for an exemption from capital gains tax on disposals of all types of Israeli securities not listed to trade that were purchased on or after 1 January 2009 if the seller (the company or individual who sold the Israeli securities to the foreign resident) was not a related party.

The above exemption does not apply to the following:

- Gains attributable to a permanent establishment (generally a fixed place of business) of the investor in Israel
- Shares of a company whose assets are principally Israeli real estate
- Shares of a company that has the value of its assets derived principally from the usufruct of immovable property and right to payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources (for example, companies that hold licenses to exploit gas and minerals in Israel's territory, which includes Israel's economic water)

In other cases, unless a tax treaty provides otherwise, foreign resident companies pay capital gains tax in accordance with the rules and rates applicable to Israeli resident companies, as described above. However, nonresidents investing with foreign currency may elect to apply the relevant exchange rate rather than the inflation rate to compute the inflationary amount.

**Administration.** The Israeli tax year is normally the calendar year. However, subsidiaries of foreign publicly traded companies may sometimes be allowed to use a different fiscal year.

Companies are generally required to file audited annual tax returns and financial statements within five months after the end of their fiscal year, but extensions may be obtained.

Companies must normally file monthly or bimonthly reports and make payments with respect to the following taxes:

- Company tax advances, which are typically computed as a percentage of a company's sales revenues
- Supplementary company tax advances with respect to certain nondeductible expenses
- Tax and social security contributions withheld from salaries and remittances to certain suppliers
- VAT

Nonresidents are required to appoint an Israeli tax representative and VAT representative if any part of their activities is conducted in Israel. The VAT representative is deemed to be the tax representative if no other tax representative is appointed. The tax representative is empowered to pay tax out of the foreign resident's assets.

**Dividends.** A 30% withholding tax is generally imposed on dividends paid to individual shareholders holding 10% or more of the shares in an Israeli company (material shareholders). A 25% withholding tax is imposed on dividends paid to individual shareholders holding less than 10% of the shares in an Israeli company. However, resident companies are exempt from company tax on dividends paid out of regular income that was accrued or derived from sources within Israel. Companies are generally subject to tax at a rate of 25% on foreign dividend income that is paid from a foreign source or from income accrued or derived abroad (foreign-source income that is passed up a chain of companies).

A reduced withholding tax of 15% or 20% is imposed on dividends paid out of the income of a company entitled to the benefits of the Capital Investment Encouragement Law. The rate may be further reduced under an applicable tax treaty. However, if such dividend is paid to an Israeli company, it is generally exempt from withholding tax (with certain exceptions).

**Interest.** Israeli resident companies are taxable on worldwide interest, original discount and linkage differentials income. The tax rate for these types of income is the standard corporate tax rate of 26.5%. Interest, original discount and linkage differentials income are treated as derived from Israeli sources if the payer is located in Israel. In principle, the same taxation rules apply to non-Israeli resident companies on Israeli-source interest, original discount and linkage differentials income, unless a tax treaty provides otherwise.

Nevertheless, an exemption from Israeli tax is available to foreign investors that receive interest income on bonds issued by Israeli companies traded on the Israeli stock exchange.

In addition, interest paid to nonresidents on Israeli governmental bonds that are issued for 13 months or more is exempt.

**Israeli holding companies and participation exemption.** To qualify for the participation exemption, an Israeli holding company must satisfy various conditions, including the following:

- It must be incorporated in Israel.
- Its business is controlled and managed in Israel only.
- It may not be a public company or a financial institution.
- It must not have been formed in a tax-deferred reorganization.
- For 300 days or more in the year, beginning in the year after incorporation, the holding company must have an investment of at least ILS50 million in the equity of, or as loans to, the investee companies, and at least 75% of the holding company's assets must consist of such equity investments and loans.

In addition, the foreign investee company must satisfy the following conditions:

- It must be resident in a country that entered into a tax treaty with Israel, or it must be resident in a foreign country that had a tax rate for business activity of at least 15% on the date of the holding company's investment (however, it is not required that the

investee company pay the 15% tax [for example, it obtains a tax holiday]).

- At least 75% of its income in the relevant tax year is accrued or derived from a business or one-time venture abroad.
- The Israeli holding company must hold an “entitling shareholding” in the investee company for at least 12 consecutive months. An “entitling shareholding” is a shareholding that confers at least 10% of the investee’s profits. The entitling shareholding must span a period of at least 12 months that includes the date on which the income is received.

An Israeli holding company is exempt from tax on the following types of income:

- Capital gains derived from the sale of an entitling shareholding in an investee company
- Dividends distributed during the 12-month minimum shareholding period with respect to an entitling shareholding in an investee company
- Interest, dividends and capital gains derived from securities traded on the Tel-Aviv Stock Exchange
- Interest and indexation amounts received from Israeli financial institutions

In addition, dividends paid by Israeli holding companies to foreign resident shareholders are subject to a reduced rate of dividend withholding tax of 5%.

**Foreign tax relief.** A credit for foreign taxes is available for federal and state taxes but not municipal taxes. Any excess foreign tax credit may be offset against Israeli tax on non-Israeli-source income from the same type in the following five tax years.

With respect to foreign dividend income, an Israeli company may receive a direct and an underlying tax credit for foreign taxes. The foreign dividend income is grossed up for tax purposes by the amount of the creditable taxes. The following are the alternative forms of the credit:

- Direct foreign tax credit only: a 25% tax is imposed on foreign dividend income, and any dividend withholding tax incurred is creditable in Israel.
- Direct and underlying foreign tax credit: a 25% tax is imposed on foreign dividend income, and a credit is granted for dividend withholding tax and underlying corporate tax paid abroad by 25%-or-greater affiliates and their direct 50%-or-greater subsidiaries. If an underlying foreign tax credit is claimed, any excess foreign tax credit may not be used to offset company tax in future years.

Foreign residents that receive little or no relief for Israeli taxes in their home countries may be granted a reduced Israeli tax rate by the Minister of Finance.

### C. Determination of trading income

**General.** Taxable income is based on financial statements that are prepared in accordance with generally accepted accounting principles and are derived from acceptable accounting records. In principle, expenses are deductible if they are wholly and exclusively incurred in the production of taxable income. Various items

may require adjustment for tax purposes, including depreciation, R&D expenses, and vehicle and travel expenses.

**Inventories.** In general, inventory may be valued at the lower of cost or market value. Cost may be determined using one of the following methods:

- Actual
- Average
- First-in, first-out (FIFO)

The last-in, first-out (LIFO) method is not allowed.

**Provisions.** Bad debts are deductible in the year they become irrecoverable. Special rules apply to employee-related provisions, such as severance pay, vacation pay, recreation pay and sick pay.

**Depreciation.** Depreciation at prescribed rates, based on the type of asset and the number of shifts the asset is used, may be claimed with respect to fixed assets used in the production of taxable income.

Accelerated depreciation may be claimed in certain instances. For example, under the Inflationary Adjustments Regulations (Accelerated Depreciation), for assets first used in Israel between 1 June 1989 and 31 December 2013, industrial enterprises may depreciate equipment using the straight-line method at annual rates ranging from 20% to 40%. Alternatively, they may depreciate equipment using the declining-balance method at rates ranging from 30% to 50%.

The following are some of the standard straight-line rates that apply primarily to non-industrial companies.

<b>Asset</b>	<b>Rate (%)</b>
Mechanical equipment	7 to 10
Electronic equipment	15
Personal computers and peripheral equipment	33
Buildings (depending on quality)	1.5 to 4
Goodwill*	10
Solar energy-producing plant	25

\* Subject to the fulfillment of certain conditions.

**Groups of companies.** Subject to certain conditions, consolidated returns are permissible for an Israeli holding company and its Israeli industrial subsidiaries if the subsidiaries are all engaged in the same line of production. For this purpose, a holding company is a company that has invested at least 80% of its fixed assets in the industrial subsidiaries and controls at least 50% (or two-thirds in certain cases) of various rights in those subsidiaries. For a diversified operation, a holding company may file a consolidated return with the subsidiaries that share the common line of production in which the largest amount has been invested.

Group returns may also be filed by an Israeli industrial company and Israeli industrial subsidiary companies if the subsidiaries are at least two-thirds controlled (in terms of voting power and appointment of directors) by the industrial company and if the industrial company and the subsidiaries are in the same line of production.

Detailed rules concerning the deferral of capital gains tax apply to certain types of reorganizations, including corporate mergers, divisions and shares-for-assets exchanges. In many cases, an advance ruling is necessary.

**Relief for losses.** In general, business losses may be offset against income from any source in the same year. Unrelieved business losses may be carried forward for an unlimited number of years to offset business income, capital gains derived from business activities or business-related gains subject to the Land Appreciation Tax (see Section B). According to case law, the offset of losses may be disallowed after a change of ownership and activity of a company, except in certain bona fide circumstances.

Special rules govern the offset of foreign losses incurred by Israeli residents. Passive foreign losses may be offset against current or future foreign passive income (for example, income from dividends, interest, rent or royalties). Passive foreign rental losses arising from depreciation may also be offset against capital gains from the sale of the relevant foreign real property.

Active foreign losses (relating to a business or profession) may be offset against the following:

- Active foreign income and business-related capital gains in the current year.
- Passive foreign income in the current year.
- Active Israeli income in the current year if the taxpayer so elects and if the foreign business is controlled and managed in Israel. However, in the preceding two years and in the following five years, foreign-source income is taxable up to the amount of the foreign loss.
- Active foreign income and business-related capital gains in future years.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), standard rate	18
Wage and profit tax, imposed on financial institutions instead of VAT; this tax is imposed in addition to company tax	17
National insurance contributions on monthly employment income (subject to an upper income limit which fluctuates periodically)	
Employer payments; rates depend on residency of employee	Various
Employee payments; rates depend on residency of employee	Various
Payroll levy on salaries of foreign employees; levy does not apply if monthly salary exceeds twice the average monthly salary	10 to 20
Acquisition tax, imposed on purchasers of real estate rights; maximum rate	0 to 10
Annual municipal taxes on property	Various

## E. Miscellaneous matters

**Foreign-exchange controls.** The Israeli currency is the new Israel shekel (ILS).

No exchange-control restrictions exist.

**Debt-to-equity rules.** No thin-capitalization rules are imposed in Israel. However, approved enterprises and approved properties (see Section B) must be at least 30% equity-financed if they received their approval before 1 April 2005.

**Transfer pricing.** Transactions between related parties should be at arm's length. Detailed transfer-pricing regulations apply. An Israeli taxpayer must report on each international transaction undertaken with a related party and indicate the arm's-length amount for such transaction. Advance rulings may be requested regarding transfer pricing.

**Measures to counteract tax planning involving foreign companies.** Certain measures are designed to counteract tax planning involving foreign companies.

*Foreign professional companies.* Israeli residents are taxed on deemed dividends received from foreign professional companies (FPCs) at the standard corporate tax rate; a foreign corporate tax credit is available. In addition, on the actual distribution of dividends by FPCs, Israeli residents are subject to dividend tax. A company is considered to be an FPC if a company meets all of the following conditions:

- It has five or fewer ultimate individual shareholders.
- It is owned 75% or more by Israeli residents.
- Most of its 10%-or-more shareholders conduct a special profession for the company.
- Most of its income or profits are derived from a special profession.

The special professions include engineering, management, technical advice, financial advice, agency, law, medicine and many others.

*Controlled foreign corporations.* Israeli residents are taxed on deemed dividends received from a controlled foreign corporation (CFC) if they hold 10% or more of the CFC. An amendment to the CFC regime is effective from 1 January 2014. A foreign company (or any other body of persons) is considered to be a CFC if all of the following conditions exist:

- The foreign company primarily derives passive income or profits that are taxed at a rate of 15% or less abroad (20% previously).
- The foreign company's shares are not publicly traded, or less than 30% of its shares or other rights have been issued to the public or listed for trade.
- One of the following requirements is satisfied:
  - Israeli residents own either directly or indirectly more than 50% of the foreign company.
  - An Israeli resident owns over 40% of the foreign company, and together with a relative, owns more than 50% of the company.
  - An Israeli resident has veto rights with respect to material management decisions, including decisions regarding the distribution of dividends or liquidation.

The shareholdings of the CFC are calculated as the higher of the following:

- The shareholdings at the tax year-end
- The shareholdings any day in the tax year plus any day in the following tax year

The deemed dividend is the taxpayer's share of passive undistributed income on the last day of the tax year. Under the 2014 amendment, the possibility of claiming a deemed foreign tax credit is abolished.

*Reportable transactions.* Certain types of transactions with foreign companies must be reported to the tax authorities.

**Withholding taxes on overseas remittances.** Israeli banks must withhold tax, generally at a rate of 25%, from most overseas remittances unless the remittances relate to imported goods. An exemption or a reduced withholding rate may be obtained from the Israeli tax authorities in certain circumstances, such as when a treaty applies or when the payments are for services that are rendered entirely abroad. A 30% withholding tax rate applies to dividends paid to recipients holding 10% or more of the payer entity.

**Free-trade agreements.** Israel has entered into free-trade agreements with Bulgaria, Canada, the European Free Trade Association, the European Union, Mexico, Romania, Turkey and the United States.

## F. Treaty withholding tax rates

The following table provides Israeli withholding tax rates for payments of dividends, interest and royalties to residents of various jurisdictions. Exemptions or conditions may apply, depending on the terms of the particular treaty.

	Dividends %	Interest %	Royalties (a) %
Austria	25	15	10
Belarus	10	5/10 (c)	5/10 (aa)
Belgium	15	15	10

Thailand	10/15 (bb)	10/15 (cc)	5/15 (dd)
Turkey	10	10 (ee)	10
Ukraine	5/10/15 (h)	5/10 (c)	10
United Kingdom	15	15	0
United States	12.5/15/25 (ff)	10/17.5 (gg)	10/15 (hh)
Uzbekistan	10	10	5/10 (ii)
Vietnam	10	10 (q)	5/7.5/15 (u)
Non-treaty countries (nn)	25/30	26.5 (tt)	26.5 (tt)

- (a) Different rates may apply to cultural royalties.
- (b) The 10% rate applies to dividends that are paid out of profits taxed at a reduced company tax rate. For other dividends, the withholding tax rate may not exceed one-half the non-treaty withholding tax rate; because the non-treaty withholding tax rate for dividends is currently 25%, the treaty withholding tax rate is 12.5%.
- (c) Interest on certain government loans is exempt. The rate of 5% (Belarus, Bulgaria, Croatia, Ethiopia, Latvia, Luxembourg, Switzerland and Ukraine), 7% (Taiwan) or 7.5% (Korea) applies to interest on loans from banks or financial institutions. The 10% rate (Brazil, 15%; Estonia, 5%; and Singapore, 7%) applies to other interest payments.
- (d) The withholding tax rate may not exceed one-half the non-treaty withholding tax rate; because the non-treaty withholding tax rate is currently 26.5%, the treaty withholding tax rate is 13.25%.
- (e) The 7% rate applies to interest paid to banks or financial institutions.
- (f) Under a protocol to the treaty, the 7% rate is the effective withholding rate for amounts paid for the use of industrial, commercial or scientific equipment.
- (g) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer (Hungary, Singapore and Slovak Republic) or at least 15% of the capital of the payer (Poland), or if the recipient is a company that holds at least 15% of the capital of the payer (Czech Republic).
- (h) The 5% rate applies if the dividends are paid out of profits that were subject to the regular company tax rate (currently, 26.5%) and if they are paid to a corporation holding at least 10% (Ethiopia, Finland, France, Korea, Latvia, Lithuania, Luxembourg, Slovenia and Switzerland) or 25% (Croatia, Netherlands, Portugal and Ukraine) of the payer's capital. The 10% rate applies to dividends paid to such a corporation (under the Ukraine treaty, a corporation holding at least 10%) out of profits that were taxed at a reduced rate of company tax. The 15% rate applies to other dividends.

- (i) Alternatively, an interest recipient may elect to pay regular tax (currently, the company tax rate is 26.5%) on the lending profit margin.
- (j) The 5% rate applies to interest on a bank loan as well as to interest in connection with sales on credit of merchandise between enterprises or sales of industrial, commercial or scientific equipment.
- (k) Dividends are subject to tax at the rate provided under domestic law, which is currently 25% in Israel.
- (l) The 10% rate applies if the recipient holds at least 25% of the capital of the payer.
- (m) The 15% rate applies if the recipient is a company that holds directly at least 10% of the voting power of the payer.
- (n) The 5% rate applies to corporate recipients that beneficially own at least 25% of the voting shares of the payer during the six months before the end of the accounting period for which the distribution is made.
- (o) The 2% rate applies to royalties for use of industrial, commercial or scientific equipment.
- (p) The 5% rate applies if the recipient holds at least 10% of the payer and if the payer is not an Israeli resident company that paid the dividends out of profits that were taxed at a reduced tax rate. The 10% rate applies to other dividends.
- (q) Interest on certain government loans is exempt.
- (r) The 10% rate applies to a Dutch bank or financial institution.
- (s) The 10% rate applies if the recipient holds at least 10% of the capital of the payer.
- (t) The 15% rate applies unless a lesser rate may be imposed by the Philippines on royalties derived by a resident of a third country in similar circumstances. The Philippines-Germany treaty specifies a 10% withholding tax rate on industrial and commercial royalties. Consequently, a 10% rate might apply to these royalties under the Israel-Philippines treaty.
- (u) The 5% rate applies to royalties for the use of industrial, commercial or scientific equipment. The 7.5% rate (Vietnam) applies to technical fees.
- (v) The 5% rate applies to interest on bank loans as well as to interest in connection with sales on credit of merchandise between enterprises or sales of industrial, commercial or scientific equipment. Interest on certain government loans is exempt.
- (w) Under a disputed interpretation of the treaty, a 15% rate may apply to dividends paid out of the profits of an approved enterprise or property.
- (x) The tax rate on the royalties in the recipient's country is limited to 20%.
- (y) The 2% rate applies to interest paid on certain government loans. The 5% rate applies to interest received by financial institutions that grant loans in the course of its usual business activities. The 10% rate applies to other interest payments.
- (z) This rate applies to interest in connection with sales on credit of merchandise between enterprises and sales of industrial, commercial or scientific equipment, and to interest on loans granted by financial institutions.
- (aa) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment (and road transport vehicles under the Belarus treaty), or for copyrights of literary, dramatic, musical or artistic works. The rate for other royalties is 10% (Belarus) or 7% (Spain).
- (bb) The 10% rate applies if the recipient is an Israeli resident or if the recipient is a Thai resident holding at least 15% of the capital of the payer.
- (cc) The 10% rate applies to interest paid to banks or financial institutions, including insurance companies.
- (dd) The 5% rate applies to royalties paid for the use of literary, artistic or scientific works, excluding radio or television broadcasting works.
- (ee) Interest on certain government loans is exempt. The 10% rate applies to all other interest payments.
- (ff) The 12.5% rate applies to dividends paid by a company that does not have an approved enterprise or approved property in Israel to US corporations that own at least 10% of the voting shares of the payer, subject to certain conditions. The 15% rate applies to dividends paid out of the profits of an approved enterprise or property. The 25% rate applies to other dividends.
- (gg) The 10% rate applies to interest on a loan from a bank, savings institution, insurance company or similar company. The 17.5% rate applies to other interest. Alternatively, an interest recipient may elect to pay regular tax (the company tax rate is currently 26.5%) on the lending profit margin.
- (hh) The 10% rate applies to copyright and film royalties. The 15% rate applies to industrial and other royalties.
- (ii) The 5% rate applies to royalties paid for the use of literary, artistic or scientific works, excluding cinematographic films. The 10% rate applies to other royalties.
- (jj) The 15% rate applies to royalties for the use of, or the right to use, trademarks. The 10% rate applies to other royalties.

- 
- (kk) The 5% rate applies if the dividends are paid to a corporation holding at least 25% of the payer's capital. The 10% rate applies to other dividends.
  - (ll) The 0% rate applies to interest with respect to sales on credit of merchandise or industrial, commercial or scientific equipment. Under the Lithuania treaty, such credit must not exceed six months and related parties are excluded.
  - (mm) The 0% rate applies to interest with respect to a loan, debt-claim or credit guaranteed or insured by an institution for insurance or financing of international trade transactions that is wholly owned by the other contracting state (Denmark, Georgia and Moldova) or acts on behalf of the other contracting state (Slovenia), and with respect to interest paid on traded corporate bonds (Denmark and Georgia). The 5% rate applies to other interest.
  - (nn) See Sections A and B. A 25% withholding tax rate applies to dividends and other payments to recipients who hold under 10% of the payer entity.
  - (oo) The 0% rate applies if the recipient is a company that holds directly at least 10% of the capital of the payer for a consecutive period of at least 12 months.
  - (pp) This treaty is effective from 1 January 2015.
  - (qq) The 5% rate applies to dividends paid to pension schemes. The 20% rate applies to distributions from a real estate investment company if the beneficial owner holds less than 10% of the capital of the company. The 15% rate applies to other dividends.
  - (rr) The 0% rate applies to interest on certain government loans, interest paid to pension schemes and interest on certain corporate bonds traded on a stock exchange. The 15% rate applies to other interest.
  - (ss) The 0% rate applies to interest derived from corporate bonds listed for trading.
  - (tt) This is the regular company tax rate for profits and real capital gains effective from 1 January 2014.
  - (uu) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership or a real estate investment company) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to dividends in all other cases. Distributions made by a real estate investment company that is a resident of Israel to a resident of Malta may be taxed in Malta. Such distributions may also be taxed in Israel according to the laws of Israel. However, if the beneficial owner of these distributions is a resident of Malta holding directly less than 10% of the capital of the distributing company, the tax charged in Israel may not exceed a rate of 15% of the gross distribution.
  - (vv) A new treaty has been signed, but it has not yet been ratified. The table lists the rates under the existing treaty.

**A. At a glance**

Corporate Income Tax Rate (%)	27.5 (a)
Capital Gains Tax Rate (%)	1.375/27.5 (b)
Branch Tax Rate (%)	27.5 (a)
Withholding Tax (%)	
Dividends	0/1.375/26 (c)(d)
Interest	0/12.5/26 (e)(f)
Royalties from Patents, Know-how, etc.	0/22.5/30 (f)(g)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (h)

- (a) The corporate income tax (*imposta sul reddito delle società*, or IRES) rate is 27.5%. A 6.5% surcharge (increasing the total tax rate to 34%) is imposed on oil, gas and energy companies with revenues exceeding EUR3 million and taxable income exceeding EUR300,000, with reference to the preceding year (for 2011 to 2013, the surcharge was 10.5%, increasing the total tax rate to 38%). A local tax on productive activities (*imposta regionale sulle attività produttive*, or IRAP) is imposed on the net value of production. For further details regarding IRAP, see Section B.
- (b) For details concerning capital gains taxation, see Section B.
- (c) Withholding tax is not imposed on dividends paid to resident companies. The 26% rate applies to dividends paid to resident individuals with non-substantial participations (for information on substantial and non-substantial participations, see the discussion of capital gains taxation in Section B). The 26% rate applies to dividends paid to nonresidents. Nonresidents may be able to obtain a refund of the withholding tax equal to the amount of foreign tax paid on the dividends. However, the maximum refund is 11/26 of the withholding tax paid. Tax treaties may provide for a lower tax rate. Effective from 1 January 2008, a 1.375% rate applies under certain circumstances (see Section B). If either the treaty or the 1.375% rate applies, the 11/26 tax refund cannot be claimed.
- (d) Under the European Union (EU) Parent-Subsidiary Directive, dividends distributed by an Italian subsidiary to an EU parent company are exempt from withholding tax, if among other conditions, the recipient holds 10% or more of the shares of the subsidiary for at least one year. See Section B.
- (e) The 0% rate applies under certain circumstances to interest derived by nonresidents on the white list (see Section B) from treasury bonds, bonds issued by banks and “listed” companies, “listed” bonds issued by “non-listed” companies, nonbank current accounts and certain cash pooling arrangements and in other specific cases. The term “listed” refers to a listing on the Italian exchange or on an official exchange or a multilateral system for exchange of an EU or European Economic Area (EEA) country. Such exchanges are also included in the Italian white list. The 26% rate applies to interest derived by residents and nonresidents from corporate bonds and similar instruments and from loans, in general. The 26% rate also applies as a final tax to interest paid to residents on bank accounts and deposit certificates. The rate applicable to interest paid on treasury bonds issued by the Italian government and by white-list countries is reduced to 12.5%. For resident individuals carrying on

business activities in Italy and resident companies, interest withholding taxes are advance payments of tax. In all other cases, the withholding taxes are final taxes. Under the 2008 Budget Law, the blacklist (see Section B) and the above-mentioned white list will be replaced by a new white list (the primary criterion for inclusion on the new white list will be the effective exchange of information with the Italian tax authorities).

- (f) No withholding tax is imposed on interest and royalties paid between associated companies of different EU member states if certain conditions are met. For details, see Section B.
- (g) The withholding tax rate of 30% applies to royalties paid to nonresidents. However, in certain circumstances, the tax applies to 75% of the gross amount, resulting in an effective tax rate of 22.5%. These rates may be reduced under tax treaties.
- (h) Loss carryforwards are allowed for corporate income tax purposes only. Losses incurred in the first three tax years of an activity may be carried forward indefinitely. Losses incurred in the following years can also be carried forward indefinitely but can only be used against a maximum amount of 80% of taxable income. Anti-abuse rules may limit loss carryforwards.

## B. Taxes on corporate income and capital gains

**Corporate income tax.** Resident companies are subject to corporate income tax (*imposta sul reddito delle società*, or IRES) on their worldwide income. A resident company is a company that has any of the following located in Italy for the majority of the tax year:

- Its registered office
- Its administrative office (similar to a “place of effective management” concept)
- Its principal activity

Unless they are able to prove the contrary, foreign entities controlling an Italian company are deemed to be resident for tax purposes in Italy if either of the following conditions is satisfied:

- The foreign entity is directly or indirectly controlled by Italian resident entities or individuals.
- The majority of members of the board of directors managing the foreign entity are resident in Italy.

Nonresident companies are subject to IRES on their Italian-source income only.

**Rate of corporate tax.** The IRES rate is 27.5%. A 6.5% surcharge (increasing the total tax rate to 34%) is imposed on oil, gas and energy companies that, in the preceding fiscal year, had revenues exceeding EUR3 million and taxable income exceeding EUR300,000 (from 2011 to 2013, the surcharge was 10.5%, increasing the total tax rate to 38%).

**Local tax.** Resident and nonresident companies are subject to a regional tax on productive activities (*imposta regionale sulle attività produttive*, or IRAP) on their Italian-source income. For manufacturing companies, IRAP is imposed at a standard rate of 3.9% on the “net value of production” (see below). However, different rates apply to the following:

- Corporations and entities granted concession rights other than those running highways and tunnels: 4.2%
- Banks and other financial entities: 4.65%
- Insurance companies: 5.9%
- Public administration entities performing business activities: 8.5%

In addition, each of the 20 Italian regions may increase or decrease the rate of IRAP by a maximum of 0.9176 percentage point, and companies generating income in more than one region

are required to allocate their tax base for IRAP purposes among the various regions in the IRAP tax return.

The IRAP tax base is the “net value of production,” which is calculated by subtracting the cost of production from the value of production (that is, in general, revenue less operating costs). However, certain deductions are not allowed for IRAP purposes, such as the following:

- Certain extraordinary costs (but certain extraordinary income is not taxable).
- Bad debt losses.
- Labor costs (excluding certain compulsory social contributions and a fixed amount of the wages, in application of the so-called Cuneo Fiscale). However, under the 2015 Budget Law, labor costs incurred for employees hired on a permanent basis are fully deductible for IRAP purposes, beginning with the fiscal year including 31 December 2015.
- Interest expenses (but interest income is not taxable). However, banks, insurance companies and financial holding companies can deduct 96% of interest expenses and are taxed on 100% of interest income.

In addition, special rules for the calculation of the tax base for IRAP purposes apply to banking institutions, insurance companies, public entities and non-commercial entities.

### Capital gains

*Resident companies and nonresident companies with a permanent establishment in Italy.* In general, capital gains derived by resident companies or nonresident companies with a permanent establishment (PE) in Italy are subject to IRES and IRAP (gains derived from sales of participations and extraordinary capital gains derived from transfers of going concerns are excluded from the tax base for IRAP purposes). Capital gains on investments that have been recorded in the last three financial statements as fixed assets may be electively taxed over a maximum period of five years.

Italian corporate taxpayers (that is, companies and branches) may benefit from a 95% participation exemption regime (that is, only 5% is taxable) for capital gains derived from disposals of Italian or foreign shareholdings that satisfy all of the following conditions:

- The shareholding was classified as of the first financial statements closed during the holding period as a long-term financial investment.
- The Italian parent company holds the shareholding for an uninterrupted period of at least 12 months before the disposal.
- The subsidiary actually carries on a business activity (real estate companies are assumed not to be carrying on a business activity; therefore, they can satisfy this requirement only under certain limited circumstances).
- The subsidiary is not resident in a tax haven (a jurisdiction on the blacklist). The 2008 Budget Law contains a measure that replaces the existing blacklist system with a white list to be contained in a ministerial decree. The primary criterion for inclusion on the white list will be the effective exchange of information with the Italian tax authorities. At the time of writing, this decree had not yet been issued. Accordingly, the previous blacklist is still in force.

The last two conditions described above must be satisfied uninterruptedly through the three financial years before the year of the disposal.

If the conditions described above are not satisfied, capital gains on the sale of shares are fully included in the calculation of the tax base for IRES purposes.

In general, capital losses on shares are deductible. However, an exception is made for capital losses on participations that would benefit from the 95% participation exemption. These losses are 100% nondeductible. However, losses from sales of participations not qualifying for the participation exemption are nondeductible up to the amount equal to the exempt portion of the dividends received on such participations during the 36 months preceding the sale.

*Nonresident companies without a permanent establishment in Italy.* Most tax treaties prevent Italy from levying taxation on nonresidents deriving capital gains from the sale of Italian participations.

If no treaty protection is available, capital gains derived from sales of a substantial participation in Italian companies and partnerships are subject to tax in Italy, but 50.28% of such gains is exempt. As a result, 49.72% of the gain is taxable at the corporate income tax rate of 27.5%, and the effective tax rate is 13.67%. A “substantial participation” in a company listed on a stock exchange requires more than 2% of the voting rights at ordinary shareholders’ meetings or 5% of the company’s capital. For an unlisted company, these percentages are increased to 20% and 25%, respectively.

Capital gains on “non-substantial participations” are subject to a substitute tax of 26%. However, certain exemptions to the 26% rate may apply under domestic law, such as for the following:

- A nonresident (including a person from a tax haven) selling listed shares
- Nonresident shareholders resident in white-list jurisdictions under specified circumstances

**Administration.** Income tax returns must be filed by the end of the ninth month following the end of the company’s fiscal year. Companies must make advance payments of their corporate and local tax liability equal to a specified percentage of the tax paid for the preceding year. The following are the amounts of the advance payments for the fiscal year including 31 December 2014 and the fiscal year including 31 December 2015:

- For the fiscal year including 31 December 2014, the advance payment for corporate income tax (and local tax) purposes for all companies is 101.5% of the corporate income tax (and local tax) due for the preceding fiscal year.
- For the fiscal year including 31 December 2015, the advance payment for corporate income tax (and local tax) purposes for all companies is 100% of the corporate income tax (and local tax) due for the preceding fiscal year.

*Tax rulings.* Several tax ruling procedures are available in Italy.

Taxpayers may request in advance ordinary tax rulings to clarify the application of tax measures to transactions if objective uncertainty exists regarding the tax law. The request for an ordinary tax

ruling must include the identification data for the taxpayer, a description of the transaction and a list of applicable measures, circulars and court decisions.

Specific tax rulings are available with respect to a limited range of operations that could result in tax avoidance, including the following:

- Corporate reorganizations
- Transactions subject to fictitious interposition legislation (legislation under which the tax authorities may attribute income to the beneficial owner)
- Deduction of advertisement and entertainment expenses
- Transfers of tax credits and excess taxes
- Tax-haven transactions
- International group companies
- Tax restrictions on non-operating companies (see Section C)
- Controlled foreign companies (CFCs; see Section E)

In the event of litigation, the burden of proof is on the party that did not comply with the ruling. In practice, specific rulings are not binding on the tax authorities but they shift the burden of proof to them.

An international ruling scheme specifically deals with transfer pricing, cross-border payments (interest, dividends and royalties), PE issues (including the determination of the existence of a PE) and the patent box regime (see below). An international ruling is binding for the fiscal year in which the ruling is entered into and for the following four fiscal years, unless material changes in legal or economic circumstances arise.

**Dividends.** Dividends distributed by companies to Italian entities subject to corporate income tax (companies and branches) are 95% excluded from corporate taxation regardless of the source (domestic or foreign) of such dividends and are taxable on a cash basis.

Italian parent companies are taxed on 100% of the dividends received from a subsidiary resident in a blacklist (tax-haven) jurisdiction, unless it obtains a ruling to the contrary from the Italian tax authorities. In addition, Italian parent companies receiving dividends from an intermediate holding company resident in a jurisdiction not on the blacklist are fully taxable on the dividends to the extent that these dividends derive from indirect subsidiaries resident in blacklist jurisdictions.

A 26% withholding tax is imposed on dividends paid from Italian companies to nonresident companies without a PE in Italy (double tax treaties may provide for lower rates). Nonresidents may obtain a refund of dividend withholding tax equal to the amount of foreign tax paid on the dividends, but the maximum refund is 11/26 of the withholding tax paid. Dividends paid by Italian entities (out of profits accrued in the fiscal year following the one in progress on 31 December 2007 and in subsequent fiscal years) to entities established in an EU member state or in an EEA country included in the white list are subject to a reduced withholding tax rate of 1.375%. If the 1.375% rate applies, the 11/26 tax refund cannot be claimed.

Companies from EU member states that receive dividends from Italian companies may be exempted from the dividend withholding tax or obtain a refund of the tax paid if they hold at least 10% of the shares of the payer for at least one year. A similar provision is available for Swiss recipients under certain circumstances on the basis of Article 15 of the EC-Switzerland tax treaty of 2004.

For nonresident companies with a PE in Italy, dividends may be deemed to flow through the Italian PE for tax purposes (unless a treaty provides otherwise). In this case, the dividend is taxed at the level of the PE and no withholding tax applies.

**Withholding taxes on interest and royalties.** Under Italian domestic law, a 26% withholding tax is imposed on loan interest paid to nonresidents. Lower rates may apply under double tax treaties.

A 30% withholding tax applies to royalties and certain fees paid to nonresidents. In certain circumstances, the tax applies to 75% of the gross amount, resulting in an effective tax rate of 22.5%. Lower rates may apply under double tax treaties.

As a result of the implementation of EU Directive 2003/49/EC, interest payments and qualifying royalties paid between “associated companies” of different EU member states are exempt from withholding tax. A company is an “associated company” of a second company if any of the following circumstances exist:

- The first company has a direct minimum holding of 25% of the voting rights of the second company.
- The second company has a direct minimum holding of 25% of the voting rights of the first company.
- An EU company has a direct minimum holding of 25% of the voting rights of both the first company and the second company.

Under the EU directive, the shareholding must be held for an uninterrupted period of at least one year. If the one-year requirement is not satisfied as of the date of payment of the interest or royalties, the withholding agent must withhold taxes on interest or royalties. However, if the requirement is subsequently satisfied, the recipient of the payment may request a refund from the tax authorities.

To qualify for the withholding tax exemption, the following additional conditions must be satisfied:

- The recipient must be a company from another EU member state that is established as one of the legal forms listed in Annex B of the law.
- The company must be subject to corporate tax without being exempt or subject to a tax that is identical or similar.
- The recipient must be the beneficial owner of the payment.

An interest and royalty regime similar to the above-mentioned EU Directive 2003/49/EC applies under certain circumstances to recipients residing in Switzerland on the basis of Article 15 of the EC-Switzerland tax treaty of 2004.

Domestic withholding taxes on interest and royalties may be reduced or eliminated under tax treaties.

An exemption also applies to interest derived by nonresidents on the white list under certain circumstances (see footnote [e] in Section A).

**Tax on financial transactions.** A domestic tax on financial transactions (so-called “Tobin Tax,” which is also known as the “Italian Financial Transaction Tax”) is imposed on certain financial transactions regardless of where the transactions are executed and the nationalities of the parties. The tax is imposed on the following types of transfers:

- Transfers of shares and participating financial instruments issued by Italian resident entities (including the conversions of bonds into shares but excluding the conversion of bonds into newly issued shares in the case of the exercise of options of existing shareholders)
- Transfers of other instruments representing the above shares and participating financial instruments
- Derivatives transactions that have as a main underlying asset the above shares or participating financial instruments
- Transactions in “derivative financial instruments” in shares and participating financial instruments or in such instruments whose value depends mostly on the value of one or more of the above financial instruments
- Transactions in any other securities that allow the purchase or sale of the above shares and participating financial instruments or transactions that allow for cash regulations based on the shares

The tax on financial transactions also applies to high-frequency trading transactions executed on Italian financial markets if conditions listed in the Ministerial Decree issued on 21 February 2013 are met. Specific exemptions and exclusions are also provided by this decree (for example, the tax does not apply to new issues of shares or on intercompany transactions).

The tax is levied at the following rates, which depend on the type of transaction and relevant market:

- Transactions in shares and participating financial instruments are subject to a 0.1% tax if executed on a regulated market or a multilateral trading facility established in an EU member state or in an EEA member state allowing an adequate exchange of information with Italy. The rate is 0.2% in all other cases.
- Transactions in derivatives and other financial instruments relating to shares and participating financial instruments are subject to a fixed tax ranging from EUR0.01875 to EUR200, depending on the type of instrument and the value of the agreements. If derivative contracts are executed on a regulated market or multilateral trade facility, the tax is reduced to 20% of these fixed amounts.
- High-frequency trading transactions are subject to a 0.02% tax on the counter-value of orders automatically generated (including revocations or changes to original orders). The tax is applied in addition to the tax on financial transactions due on transfers of shares and participating financial instruments as well as on transactions in the relevant derivative instruments.

The tax on financial transactions on share transactions is due from the transferee only, while the tax applicable to transactions in derivatives is due from each party to the transaction.

The tax payment must be made in accordance with the following rules:

- By the 16th day of the month following the month in which the transfer of the ownership occurred (if effected through the Centralized Management Company [Società di Gestione Accentrata], by the 16th day of the second month following the transaction date) for the following:
  - Shares and participating financial instruments issued by Italian resident entities
  - Instruments representing such shares and participating financial instruments
- By the 16th day of the month following the month in which the contract is concluded (if effected through the Centralized Management Company, by the 16th day of the second month following the transactions date) for the following:
  - Derivatives that have as a main underlying asset the above shares or participating financial instruments
  - “Derivative financial instruments” in shares and participating financial instruments
  - Instruments whose value depends mostly on the value of one or more of the above financial instruments
  - Other securities that allow the purchase and sale of the above shares and participating financial instruments or that allow for cash regulations (settlements) based on such financial instruments
- By the 16th day of the month following the month in which the annulment or amending order is sent for the high-frequency trading transactions executed on Italian financial markets

**Exit tax.** The transfer of tax residence abroad qualifies as a taxable event in Italy. As a result, any unrealized capital gains must be computed on the basis of the fair market value principle and taxed immediately. The transfer of tax residence is not considered a taxable event only to the extent that the assets related to the Italian business are attributed to an Italian permanent establishment of the migrating company.

Under recently adopted rules, as an alternative to an immediate levy, Italian companies shifting their tax residence to other EU or EEA white-list countries may elect either to defer exit taxation to the moment of actual realization or to pay the tax due in six annual installments.

If taxation is deferred to the moment of actual realization, periodical information filings by the migrated company with the Italian tax authorities are required so that the tax authorities are in a position to monitor the events related to the migrated assets. The installment election exempts a taxpayer from any filing obligations. Both the deferral and the installment elections trigger interest payments and require the submission of proportioned guarantees if a serious and significant danger for the collection of taxes (specific guarantee exclusions are provided for by the law) exists. The following must also be considered:

- The moment of actual realization of the gains related to the migrated assets must be identified in accordance with ordinary Italian tax principles. Specific rules are applicable to identify the moment of actual realization of the following:
  - Assets and rights that can be subject to the amortization process (including intangible assets and goodwill)
  - Shares and financial instruments

In any case, the gains related to the migrated assets are deemed realized after 10 years from the end of the fiscal year in which the transfer of the tax residence occurs.

- Mergers and other reorganizations do not interrupt the tax deferral if the migrated company remains a resident of a country described above and if the migrated assets are not transferred to a resident of a country other than a country described above.

**Patent box regime.** The 2015 Budget Law introduced a favorable tax regime for income generated through the use of qualified intangible assets, such as patents, brands, know-how and other intellectual properties.

Taxpayers performing activities related to such intangible are eligible, under a specific election, for a reduction of the IRES and IRAP tax base equal to 30% (2015), 40% (2016) and 50% (2017 and future years) of the income derived from the use of the qualifying assets. The exemption applies to income earned both from the licensing of the intellectual property to a related or unrelated party and from the direct exploitation of the asset. An advance ruling is required under most circumstances as a prerequisite to access the regime.

Capital gains derived from the disposal of the qualifying assets can be exempted if at least the 90% of the cash received from the disposal is used to maintain or develop other qualifying intangible assets before the end of the second fiscal year following the year in which the disposal took place.

The beneficial regime is valid for five fiscal years after the year of the election. A Ministerial Decree will be issued to clarify the procedural aspects related to this regime.

**Foreign tax relief.** A foreign tax credit may be claimed for foreign-source income. The amount of the foreign tax credit cannot exceed that part of the corporate income tax, computed at the standard rate, that is attributable to the foreign-source income. Accordingly, the foreign tax credit may be claimed up to the amount that results from prorating the total tax due by the proportion of foreign-source income over total income.

If income is received from more than one foreign country, the above limitation on the foreign tax credit is applied for each country (per-country limitation). Excess foreign tax credits may be carried forward or back for eight years.

For corporate groups that elect the worldwide tax consolidation (see Section C), an Italian parent company may consolidate profits and losses of its foreign subsidiaries joining the tax group and compute a single group tax liability. Such group tax liability may be offset by a direct foreign tax credit granted to the resident parent company with respect to taxes paid abroad by foreign subsidiaries that are members of the tax group.

### C. Determination of business income

**General.** To determine taxable income, profits disclosed in the financial statements are adjusted for exempt profits, nondeductible expenses, special deductions and losses carried forward. Exempt profits include interest on government bonds issued on or before

30 September 1986 and income subject to Italian withholding tax at source as a final tax.

The following general principles govern the deduction of expenses:

- Expenses are deductible if and to the extent to which they relate to activities or assets that produce revenue or other receipts that are included in income.
- Expenses are deductible in the fiscal year to which they relate (accrual basis rule). Exceptions are provided for specific items, such as compensation due to directors, which is deductible in the fiscal year in which it is paid.

Companies may not deduct expenses incurred in transactions with enterprises and consultants resident in non-EU blacklist countries. However, this limitation does not apply if it is established that either of the following conditions is satisfied:

- The foreign enterprise is effectively involved in an actual business activity in the country or territory in which it is located.
- The relevant transactions had a real business purpose and actually took place.

The Ministry of Finance issued a decree dated 23 January 2002, which identifies the countries on the blacklist.

**Inventories.** Inventory is normally valued at the lower of cost or market value for both fiscal and accounting purposes. For determination of “cost,” companies may select one of the various methods of inventory valuation specifically provided in the law, such as first-in, first-out (FIFO); last-in, first-out (LIFO); or average cost.

Banks and other financial entities can deduct only 96% of interest expenses for both IRES and IRAP purposes.

**Depreciation and amortization allowances.** Depreciation at rates not exceeding those prescribed by the Ministry of Finance is calculated on the purchase price or cost of manufacturing. Incidental costs, such as customs duties and transport and installation expenses, are included in the depreciable base. Depreciation is computed on the straight-line method. Rates for plant and machinery vary between 3% and 15%.

In general, buildings may be depreciated using a 3% annual rate. Land may not be depreciated. If a building has not been purchased separately from the underlying land, for tax purposes, the gross value must be divided between the non-depreciable land component and the depreciable building component. The land component may not be less than 20% of the gross value (increased to 30% for industrial buildings). As a result, the effective depreciation rate for buildings is 2.4% (2.1% for industrial buildings).

Purchased goodwill may be amortized over a period of 18 years. Know-how, copyrights and patents may be amortized in accordance with financial statements, but over at least two fiscal years. The amortization period for trademarks is 18 years.

Research expenses and advertising expenses may be either entirely deducted in the year incurred or written off in equal installments in that year and in the four subsequent years, at the company’s option.

Amortization allowances of other rights may be claimed with reference to the utilization period provided by the agreement.

**Provisions.** The Italian tax law provides a limited number of provisions.

*Bad and doubtful debts.* A general provision of 0.5% of total trade receivables at the year-end may be made each year until the total doubtful debt provision reaches 5%. Bad debts actually incurred are deductible to the extent they are not covered by the accumulated reserve. In this regard, losses on bad debts are deductible for corporate income tax purposes only if they derive from “certain and precise” elements and if the debtor has been subject to bankruptcy procedure or has finalized a debt restructuring plan in accordance with Italian bankruptcy law. “Certain and precise elements” are deemed to exist if one of the following conditions is met:

- The bad debt is not more than EUR2,500 (or EUR5,000 in the case of companies having a turnover not less than EUR100 million) and has been unpaid for at least six months.
- The right to collect the credit has expired. Under Article 2946 of the Italian Civil Law, the ordinary right to collect a credit expires after 10 years.
- The credit has been deleted from the financial statements in application of the relevant accounting rules.

For banks and insurance companies, bad debts write-downs are deductible over a five-year period for both corporate income tax and local tax purposes, while bad debt losses arising from the transfer of receivables are immediately deductible for corporate income tax purposes. This rule is effective from the 2013 fiscal year and replaces the previous rule under which banks and insurance companies could deduct on a straight-line basis over 18 years the write-down of receivables exceeding 0.3% of total loan receivables.

*Redundancy and retirement payments.* Provisions for redundancy and retirement payments are deductible in amounts stated by civil law and relevant collective agreements.

**Limitations on interest deductions.** For companies other than banks and other financial entities, the deductibility of net interest expenses is determined in accordance with an Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) test. Under this test, net interest expenses (that is, interest expenses exceeding interest income) are deductible only up to 30% of EBITDA and the excess can be carried forward indefinitely and used in the fiscal years in which 30% of EBITDA is higher than the net interest expense for the year. In addition, spare EBITDA capacity, which arises if the net interest expenses are less than 30% of EBITDA, is available for carryforward. For tax consolidations, excess interest expenses of a group company may be offset with spare EBITDA capacity of another group company. For this purpose only, the EBITDA capacity of foreign subsidiaries can also be taken into account.

Banks and other financial entities can deduct only 96% of interest expenses for both IRES and IRAP purposes.

Specific rules apply to a domestic tax group if an excess of net interest expenses at the level of one entity may be deducted by the group and if other members have a corresponding amount of spare EBITDA.

**Foreign-exchange losses.** Gains and losses resulting from the mark-to-market of foreign currency-denominated debts, credits and securities are not relevant. An exception is provided for those hedged against exchange risk if the hedging is correspondingly marked-to-market at the exchange rate at the end of the fiscal year.

**Relief for losses.** For corporate income tax purposes only, losses may be carried forward with no time limit and deducted from income of the following periods for a total amount equal to 80% of taxable income (or a lower value if the tax-loss amount does not reach 80% of the amount of taxable income for the fiscal year).

Losses incurred in the first three years of an activity may also be carried forward for an unlimited number of tax periods, and the limit of 80% of taxable income does not apply. The three-year time limit is computed from the company's date of incorporation. In addition, to qualify for an unlimited loss carryforward, such losses must derive from a new activity; that is, companies within the same group may not have previously carried out the activity.

Restrictions on tax losses carried forward apply if ownership of the company is transferred and if the company changes its activity.

The company resulting from or surviving after a merger may carry forward unrelieved losses of the merged companies to offset its own profits. In general, tax losses carried forward may not exceed the lower of the net equity at the close of the last fiscal year or the net equity shown on the statement of net worth prepared for the merger of each company involved in the merger. This limitation is applied on a company-by-company basis. Contributions to capital made in the 24 months preceding the date of the net worth statement are disregarded. Special rules further limit the amount of the losses that can be carried forward. Additional measures combat abuses resulting from the use of losses with respect to mergers, demergers and the transparency regime (see *Consortium relief*).

**Notional interest deduction.** The Italian notional interest deduction (allowance for corporate equity, or ACE) grants Italian enterprises (including Italian branches of foreign businesses) a deduction from taxable income corresponding to an assumed "notional return" on qualifying equity increases contributed after the 2010 fiscal year. In particular, Italian resident companies are permitted to deduct from their net taxable income (that is, after applying any tax loss carryforward) an amount corresponding to a notional return on the increase in equity as compared to the equity as of the end of the 2010 fiscal year (New Equity). For Italian PEs of non-resident companies, the benefit is computed on the increase in the relevant endowment fund (for a PE, the endowment fund is equivalent to the share capital). The ACE deduction may offset the net tax base but it cannot generate a tax loss. Any excess ACE can be carried forward or converted into tax credits for IRAP purposes.

The New Equity is the result of an algebraic sum of positive and negative equity adjustments occurring after 2010. The following are positive adjustments:

- Contributions in cash
- Non-distribution of profits (the reserves that are not available are not qualified for equity increases)
- The waiver of credits by shareholders and the offset of credits by shareholders (credits are receivables that the shareholders have in favor of the company)

The following are negative adjustments:

- Assignments to shareholders.
- For adopters of International Financial Reporting Standards (IFRS), an equity reduction subsequent to a buy-back of own shares is considered up to the limit of any profits set aside as an available reserve.

Statutory losses do not qualify as negative equity adjustments for ACE purposes because they do not represent a voluntary act of assignment to the shareholders. However, the value of the New Equity on which the ACE deduction must be computed cannot be higher than the net equity of the entity at the end of each fiscal year (which is affected by the statutory losses).

For 2014, 2015 and 2016, the rate of the notional return is fixed at 4%, 4.5% and 4.75% respectively. For subsequent years, the Ministry of Finance will determine the percentage annually on the basis of the average return on Italian public debt securities. Newly listed companies benefit from a 40% increase in the basis on which the benefit is computed with reference to any equity increase occurring in the year of the listing and in the following two years.

The positive effect of an equity increase in a given year will permanently qualify as New Equity in subsequent years (in principle, securing a permanent ACE deduction). This also applies to any reduction resulting from a negative adjustment.

Specific rules apply to a domestic tax group if an excess of ACE at the level of one entity may be surrendered to the group and used to offset the income generated by other members.

*Anti-avoidance rule.* Certain events are deemed to generate an undue duplication of the benefit with respect to the same contribution of cash and consequently trigger a corresponding decrease of the equity basis on which the benefit is calculated. In principle, the events identified by the anti-avoidance provision include the following:

- Cash contributions to related companies
- Financings with respect to related companies
- Acquisitions of controlling participations in related companies
- Acquisitions of businesses from related parties

In addition, cash contributions from nonresident blacklisted entities do not qualify for the benefit.

**Non-operating companies.** Italian resident companies and PEs of nonresident companies are deemed to be “non-operating companies” if the total of their average non-extraordinary revenues (proceeds from the ordinary activities of a company as shown on its financial statements) and increases in inventory are less than

the sum of the average of the following during the preceding three years:

- 2% of the book value of the company's financial assets
- 6% of the book value of the company's real estate assets
- 15% of the book value of the company's other long-term assets

The following companies are also deemed to be non-operating companies:

- Companies that incurred tax losses for five consecutive fiscal years
- Companies that incurred tax losses for two consecutive fiscal years and in the third fiscal year generated income in an amount lower than the minimum resulting from the application of the percentages described in the next paragraph

If the company qualifies as a non-operating company, its taxable income cannot be lower than the sum of the following items (minimum income):

- 1.5% of the book value of the company's financial assets for the year
- 4.75% of the book value of the company's real estate assets for the year
- 12% of the book value of the company's other assets for the year

Non-operating companies may not generate tax losses. Previous tax losses (that is, those incurred when the company was operating) cannot be offset against the minimum income. In the (unlikely) event that the taxable income exceeds the minimum, only 80% of the amount exceeding the minimum can be offset.

The income of non-operating companies is subject to corporate income tax at a rate of 38% (rather than the ordinary 27.5% rate). IRAP (see Section B) also applies.

Non-operating companies that are in a value-added tax (VAT) credit position may no longer take the following actions:

- They may not claim such VAT for a refund.
- They may not use the VAT to offset other tax payments due.
- They may not surrender the VAT to other group companies.
- They may not carry forward the VAT.

Companies can be exempted from the above-mentioned regime, for both income tax and VAT purposes, if they prove to the tax authorities that they were not able to reach the minimum income requirements because of extraordinary circumstances (an advance ruling must be obtained for such a determination). Certain companies are specifically excluded from the non-operating companies' regime (for example, listed groups, companies with 50 or more shareholders, companies with an amount of business income greater than the total assets value and companies that become insolvent or enter into an insolvency procedure).

**Groups of companies.** Groups of companies may benefit from tax consolidation and consortium relief. These regimes allow the offsetting of profit and losses of members of a group of companies.

*Domestic tax consolidation.* Italian tax consolidation rules provide two separate consolidation systems, depending on the residence of the companies involved. A domestic consolidation regime is available for Italian resident companies only. A worldwide consolidation regime, with slightly different conditions, is available for multinationals.

To qualify for consolidation, more than 50% of the voting rights of each subsidiary must be owned, directly or indirectly, by the common Italian parent company.

For a domestic consolidation, the election is binding for three fiscal years. However, if the holding company loses control over a subsidiary, such subsidiary must be immediately excluded from the consolidation. The tax consolidation includes 100% of the subsidiaries' profits and losses, even if the subsidiary has other shareholders. The domestic consolidation may be limited to certain entities, leaving one or more otherwise eligible entities outside the group filing election. Tax losses realized before the election for tax consolidation can be used only by the company that incurred such losses. Tax consolidation also allows net interest expenses (exceeding 30% of a company's EBITDA) to be offset with spare EBITDA capacity of another group company. For this purpose only, spare EBITDA capacity of certain foreign subsidiaries can also be used.

Dividends paid within a domestic consolidation are subject to the ordinary 1.375% tax at the level of the recipient.

*Consortium relief.* Italian corporations can elect consortium relief if each shareholder holds more than 10% but less than 50% of the voting rights in the contemplated Italian transparent company. Under this election, the subsidiaries are treated as look-through entities for Italian tax purposes and their profits and losses flow through to the parent company in proportion to the stake owned. These profits or losses can offset the shareholders' losses or profits in the fiscal year in which the transparent company's fiscal year ends. Tax losses realized by the shareholders before the exercise of the election for the consortium relief cannot be used to offset profits of transparent companies.

Dividends distributed by an eligible transparent company are not taken into account for tax purposes in the hands of the recipient shareholders. As a result, Italian corporate shareholders of a transparent company are not subject to corporate income tax on 5% of the dividends received (in all other circumstances this would mean an effective tax rate of 1.375%).

The election does not change the tax treatment of dividends distributed out of reserves containing profits accrued before the exercise of the election.

The consortium relief election is binding for three fiscal years and requires the consent of all the shareholders.

The consortium relief election may be beneficial for joint ventures that are not eligible for tax consolidation because the control test is not met. In addition, the election is also available for non-resident companies that are not subject to Italian withholding tax on dividend payments (that is, EU corporate shareholders qualifying under the EU Parent-Subsidiary Directive). If both EU corporate shareholders qualifying under the EU Parent-Subsidiary Directive and Italian corporate shareholders hold an Italian subsidiary, the EU corporate shareholders would want to elect consortium relief to allow the Italian corporate shareholders to benefit from tax transparency.

*Group value-added tax.* For groups of companies linked by more than a 50% direct shareholding, net value-added tax (VAT; see Section D) refundable to one group company with respect to its own transactions may be offset against VAT payable by another, and only the balance is required to be paid by, or refunded to, the group.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax, on goods, services and imports	
Standard rate	22%
Other rates	4%/10%
Municipal tax (Imposta Unica Comunale, or IUC); includes real property tax (Imposta Municipale Unica, or IMU), tax on municipal services (Tassa per Servizi Indivisibili, or TASI) and tax on garbage disposal (Tassa per Rifiuti, or TARI)	
IMU; imposed on Italian property's re-evaluated cadastral value; rates may be modified by municipal authorities; not applicable to principal home; payable by the owner of the real property; ordinary rate	0.76%
TASI; imposed on both the real estate owner and real estate user; rates may be modified by municipal authorities; ordinary rate	0.1%
TARI; imposed on the user	Various
Social security contributions (2014 rates); includes mandatory social contribution, Pension Fund contribution and Health Assistance Fund contribution; rates depend on the employer's sector of economic activity	
Industrial sector	
Mandatory social contributions; payable by employers with more than 50 employees; includes pension (IVS) and other minor contributions; payable on gross remuneration	
Employers (overall rates)	
Workers	41.57%
Office staff	39.35%
Executives	36.45%
Employees' charge	
Executives	9.19%
Workers and office staff	9.49%
(For employees who have no social security record before 1 January 1996, the above pension contributions payable by employers and employees are calculated on gross remuneration capped at EUR100,123.)	
Additional contribution payable to the Pension Fund for Industrial Executives (PREVINDAI); based on gross remuneration capped at EUR150,000	
Employers	4%
Employees	4%

Nature of tax	Rate
Additional contribution payable for industrial executives to the Health Assistance Fund (FASI)	
Employers	quarterly EUR435 + 294/ annual EUR1,740 + 1,176
Employees	quarterly EUR220/ annual EUR880
Tertiary and commerce sector (trade, services and activities complementary and auxiliary to industrial production and the agricultural sector)	
Mandatory social contributions; includes pension and other minor contributions; payable on gross remuneration by employers with more than 200 employees	
Employers (overall rates)	
Workers	39.37%
Office staff	39.37%
Executives	36.03%
Employees' charge	
Executives	9.19%
Workers and office staff	9.49%
(For employees who have no social security record before 1 January 1996, the above pension contributions payable by employers and employees are calculated on gross remuneration capped at EUR100,123.)	
Additional pension and health assistance contributions; payable by employees	
Pension fund (FON. TE.); payable on remuneration base for the severance payment fund (TFR)	
Employers	0.55%
Employees	0.55% to 1.55%
Health fund	
Employers	EUR120 per year
Employees	EUR24 per year
Mandatory insurance premium for injuries or professional diseases; payable by employers; the rate depends on the professional risk related to the employment activity performed by the individual (income cap of approximately EUR29,682.90 applies to executives)	
	Various

## E. Miscellaneous matters

**Foreign-exchange controls.** The underlying principle of the foreign-exchange control system is that transactions with nonresidents are permitted unless expressly prohibited. However, payments by residents to foreign intermediaries must be channeled through authorized banks or professional intermediaries. In addition, transfers of money and securities exceeding EUR10,000 must be declared to the Italian Exchange Office. Inbound and outbound investments are virtually unrestricted.

**Transfer pricing.** Italy imposes transfer-pricing rules on transactions between related resident and nonresident companies. Under these rules, intragroup transactions must be carried out at arm's

length. In principle, Italian transfer-pricing rules do not apply to domestic transactions. However, under case law, grossly inadequate prices in these transactions can be adjusted on abuse-of-law grounds (for example, transactions between a taxpaying company and another company with net operating losses on the verge of expiring).

No penalty applies as a result of transfer-pricing adjustments if Italian companies complied with Italian transfer-pricing documentation requirements, allowing verification of the consistency of the transfer prices set by the multinational enterprises with the arm's-length principle. Such documentation consists of the documents called the following:

- Masterfile
- Country Specific Documentation

The Masterfile collects information regarding the multinational group and it must be organized in the following chapters.

<b>Chapter</b>	<b>Information in chapter</b>
1	A general description of the multinational group
2	Multinational group structure (organizational and operational)
3	Business strategies pursued by the multinational group
4	Transaction flows
5	Intragroup transactions
6	Functions performed, assets used and risks assumed
7	Intangible assets
8	Transfer-pricing policy of the multinational group
9	Relationships with the tax administrations of the EU member states regarding Advance Pricing Arrangements (APAs) and transfer-pricing rulings

The submission of more than one Masterfile is allowed if the multinational group carries out several industrial and commercial activities that are different from each other and regulated by specific transfer-pricing policies.

The Country Specific Documentation contains information regarding the enterprise and it must be organized in the following chapters and annexes.

<b>Chapter</b>	<b>Information in chapter or annex</b>
1	General description of the enterprise
2	Business sectors
3	Enterprise's organization chart
4	General business strategies pursued by the enterprise and potential changes compared to the previous tax years
5	Controlled transactions
6	Intragroup transactions
Annex 1	Flowchart describing the transaction flows, including those falling outside the scope of the ordinary management activities

Chapter	Information in chapter or annex
Annex 2	Copies of written contracts on the basis of which the transactions referred to in Chapters 5 and 6 are regulated

**Controlled foreign companies.** Italian law provides for the following two categories of controlled foreign companies (CFCs):

- Controlled companies (under Article 167 of the Income Tax Code)
- Associated companies (under Article 168 of the Income Tax Code)

*Controlled companies.* If an Italian individual or company controls directly or indirectly a company established in a blacklist (tax-haven) jurisdiction, the individual or company's share of the income of the CFC is attributed to the individual or company, regardless of distribution.

Under Article 167 (8-bis) of the Income Tax Code (introduced by Law Decree 78 of 1 July 2009), the CFC rules also apply to foreign companies that are not established in blacklist jurisdictions if both the following conditions are met:

- They are subject to an effective tax rate lower than half the rate that they would have been subject to in Italy.
- More than 50% of their income is passive income, which is dividend, interest, royalty and group services income.

The rules discussed in the preceding paragraph do not apply if the Italian resident company proves that the foreign company is not a wholly artificial arrangement for the purpose of obtaining a tax advantage; a mandatory Italian ruling must be requested for this purpose.

The income of the CFC must be assessed using the Italian corporate income tax rules and is taxed at the average rate of the Italian shareholder, but no lower than 27%.

*Associated companies.* If an Italian individual or company owns directly or indirectly 20% of a company established in a blacklist (tax-haven) jurisdiction (10% if the company is listed), the individual or company's share of the income of the CFC is attributed to the individual or company, regardless of distribution. The income of the CFC is assessed as the higher of the following amounts:

- Earnings before tax on the basis of the accounts
- A minimum income determined by applying certain ratios (1% for financial assets, 4% for real estate and 15% for other assets) to the assets of the CFC

**Anti-avoidance legislation.** Under Italian anti-avoidance rules (Article 37-bis of Presidential Decree No. 600/1973), the tax authorities may consider a transaction that involves single or connected steps to be abusive if it meets all of the following requirements at the same time:

- The transaction involves one or more of the following operations:
  - Transformations, mergers, divisions, liquidations and distributions of capital reserves
  - Contributions to companies or transfers or use of going concerns
  - Assignments of credits

- Assignments of excess tax credits
- Transactions provided for in EU Directive No. 90/434/CEE (the Merger Directive)
- Transactions, including appraisals, regarding participations, securities, certificates, currencies, precious metals, swaps, options, hedging instruments and other specified items
- Payments of interest and royalties that are exempt from withholding tax (see Section B) to EU companies that are directly or indirectly controlled by non-EU residents
- Penalty clauses, fines and advance payments in contracts with tax-haven entities
- The transaction was entered into without a valid business purpose.
- The transaction was entered into in order to circumvent the law.
- The transaction was entered into in order to achieve undue income tax savings or tax refunds.

*Case law.* As of 2008, the Italian Supreme Court had issued several decisions in which it held that an “abuse of law” principle is implicit to the Italian tax system and it is not limited to the transactions under Article 37-bis. The Supreme Court held that the “abuse of law” principle applies to all taxes and all transactions lacking a sound business purpose.

As part of a major Italian tax reform that is about to be implemented by the Italian government, the current anti-avoidance rules will be rewritten to provide more certainty to taxpayers.

**Debt-to-equity rules.** For information regarding restrictions on the deductibility of interest, see Section C.

**Mergers and acquisitions.** Mergers of two or more companies, demergers and asset contributions in exchange for shares are, in principle, tax-neutral transactions. Under the law, companies undertaking mergers, demergers and asset contributions in exchange for shares may step up the tax basis of the assets by paying a step-up tax at rates ranging from 12% to 16%. Different types of step-up elections are available for tax purposes.

## F. Treaty withholding tax rates

	Dividends (1)	Interest	Royalties
	%	%	%

- (1) Dividends paid by Italian companies to EU parent companies are exempt from withholding tax if the recipient company holds a participation of at least 10% in the distributing company for an uninterrupted period of at least one year. Otherwise, a 1.375% dividend withholding tax rate applies under domestic law to dividends paid to EU and EEA subject-to-tax companies.
- (a) The lower rate applies to corporate shareholders satisfying the following qualifying tests:
- Armenia: at least 10% of the capital (equal to at least USD100,000 or the equivalent value in other currency) for 12 months
  - Bangladesh, Canada, Estonia, India, Kazakhstan and Lithuania: at least 10% of the capital
  - Denmark, Qatar and Saudi Arabia: at least 25% of the capital for 12 months before the date the dividend is distributed
  - Finland: more than 50% of the capital
  - France: more than 10% of the capital for 12 months
  - Belarus, Georgia, Germany, Indonesia, Israel, Korea, Macedonia, Mauritius, Moldova, Morocco, Pakistan, Slovenia, Syria, Trinidad and Tobago, United Arab Emirates and Zambia: at least 25% of the capital
  - Ghana: at least 10% of the capital
  - Iceland: beneficial owner is a company (other than a partnership) owning at least 10% of the capital for at least 12 months
  - Japan: at least 25% of the shares with voting rights for six months
  - Kuwait: at least 25% of the capital
  - Latvia: beneficial owner is a company (other than a partnership) owning at least 10% of the capital
  - South Africa: at least 25% of the capital for 12 months ending on the date the dividend is declared
  - Sweden: at least 51% of the capital
  - Thailand: at least 25% of the shares with voting rights
  - Ukraine: at least 20% of the capital
  - United Kingdom: at least 10% of the shares with voting rights for 12 months
- (b) The 0% rate applies to interest paid to or by a government.
- (c) The 5% rate applies to corporations that beneficially own more than 50% of the voting rights of the shares for the 12-month period ending on the date of declaration of the dividend. The 10% rate applies to the gross amount of the dividends if the beneficial owner is a company that is not entitled to the application of the 5% rate and that has held at least 10% of the voting shares of the company paying the dividends for the 12-month period preceding the date of declaration of the dividends. The 15% rate applies in all other cases.

- (d) Interest paid to a "government" or central bank is exempt. The term "government" refers to the central government and any other local authority entirely owned by the state that receives interest on behalf of the central authority.
- (e) Interest paid by a contracting state is exempt. Under the Philippines treaty, the loan must involve the issuance of bonds or financial instruments similar to bonds.
- (f) The 5% rate applies to dividends paid to corporations that beneficially own at least 70% of the capital of the payer. The 10% rate applies to dividends paid to corporations that beneficially own at least 25% but less than 70% of the capital of the payer. The 15% rate applies to other dividends.
- (g) The 5% rate applies if the recipient of the dividend is a corporation that beneficially owns more than 10% of the capital of the payer and if the value of the participation of the recipient is at least USD100,000 or an equivalent amount in another currency. The 10% rate applies to other dividends.
- (h) The lower rate is for the use of or right to use literary, artistic and scientific copyrights. Under the Canada treaty, the lower rate applies only to literary and artistic copyrights.
- (i) The higher rate applies if the recipient has an investment exceeding 50% of the capital of the payer.
- (j) The 10% rate applies only if the payer is engaged in an industrial activity and the interest is paid to a financial institution (including an insurance company). The exemption also applies to bonds issued by a contracting state.
- (k) The 25% rate applies to trademark royalties only.
- (l) The lower rate applies to royalties for literature, plays, and musical or artistic works. Under the Germany treaty, royalties for films and recordings for television qualify for the lower rate. Under the Canada treaty, such royalties do not qualify for the lower rate. Under the Mexico treaty, royalties for films and recordings for television and radio do not qualify for the lower rate.
- (m) The lower rate applies to royalties paid for literary, artistic or scientific works and for films and recordings for radio or television.
- (n) The lower rate applies to patents, trademarks, trade names or other intellectual property.
- (o) The lower rate applies to royalties from the use of copyrights on literary, artistic or scientific works (excluding cinema and television films).
- (p) The lower rate applies to royalties paid for the use of, or the right to use, copyrights for literary, artistic or scientific works, including cinematographic films and recordings for radio and television broadcasts.
- (q) The lower rate applies to royalties paid for literary and artistic works, including films and recordings for radio and television.
- (r) In the case of royalties for the use of trademarks, films and industrial, commercial or scientific equipment, the withholding tax rate is 16%; for the use of copyrights for artistic, literary and scientific works, the rate is 5%. In all other cases, the rate is 12%.
- (s) The 0% rate applies to royalties for copyrights of literary, artistic or scientific works (excluding royalties for computer software, motion pictures, films, tapes or other means of reproduction used for radio or television broadcasting). The 5% rate applies to royalties for the use of, or the right to use, computer software or industrial, commercial, or scientific equipment. In all other cases, the 8% rate is imposed on the gross amount of the royalties.
- (t) The 18% rate applies if the dividends are paid by a company that is resident in Côte d'Ivoire and that is exempt from tax on its income or not subject to that tax at the normal rate. The 15% rate applies in all other cases.
- (u) In general, the USSR treaty is honored by the Commonwealth of Independent States (CIS), except for Kazakhstan, but CIS members have different positions on the treaty. Italy and Kazakhstan have entered into a tax treaty (see rates in table). Tajikistan and Turkmenistan continue to apply the USSR treaty.
- (v) The treaty with the former Yugoslavia applies to Bosnia and Herzegovina, Montenegro and Serbia. Italy has entered into new tax treaties with Croatia, Macedonia and Slovenia.
- (w) An exemption applies to the following:
  - Interest on loans that are not in the form of bearer securities if the interest is paid to the following: the other contracting state; its political or administrative subdivisions; or its local authorities
  - Interest paid to credit institutions of the other contracting state if the interest is paid on loans that are not in the form of bearer securities and if the loans are permitted under an agreement between the governments of the contracting states
- (x) The 10% rate applies to royalties and commissions paid for the use of or right to use the following: industrial, commercial or scientific equipment; or information concerning industrial, business or scientific know-how. The 15% rate applies to other royalties.

- (y) The 10% rate applies to interest paid by banks and other financial entities (that is, insurance companies). The 15% rate applies to other interest.
- (z) Interest paid on loans made in accordance with an agreement between the governments of the contracting states is exempt. Under the Mexico treaty, the loan must have a term of at least three years.
- (aa) Interest withholding tax is not imposed if any of the following circumstances exist:
- The interest is beneficially owned by a resident of the other contracting state that is a qualified governmental entity and that holds, directly or indirectly, less than 25% of the capital of the person paying the interest.
  - The interest is paid with respect to debt obligations guaranteed or insured by a qualified governmental entity of that contracting state or the other contracting state and is beneficially owned by a resident of the other contracting state.
  - The interest is paid or accrued with respect to a sale on credit of goods, merchandise, or services provided by one enterprise to another enterprise.
  - The interest is paid or accrued in connection with the sale on credit of industrial, commercial, or scientific equipment.
- (bb) The lower rate applies to royalties for literature, musical and artistic works.
- (cc) The 26% rate is the rate under Italian domestic law for dividends paid to nonresidents.
- (dd) These are the rates under Italian domestic law. Under the treaty, the rate is 0% if the interest is paid to a Mauritian public body or bank resident in Mauritius.
- (ee) Exemption is provided for interest paid in connection with the following:
- Credit sales of industrial, commercial or scientific equipment
  - Credit sales of goods delivered from one enterprise to another enterprise
- (ff) A 15% rate, which is contained in the dividend article, applies to payments on profit-sharing loans and to silent partners. The 10% rate applies in other circumstances.
- (gg) A refund may be available for the underlying tax credit with respect to business profits attached to the dividends.
- (hh) If a resident of a contracting state receives payments for the use of, or the right to use, industrial, commercial or scientific equipment from sources in the other contracting state, the resident may elect to be taxed in the contracting state in which the royalties arise as if the property or right for which the royalties are paid is effectively connected with a PE or fixed base in that contracting state. If such election is made, no withholding tax is imposed on the payments.
- (ii) The treaty exempts the following types of interest:
- Interest on bank credits and loans
  - Interest on current accounts and deposits with banks or other credit institutions
- The 26% rate is the withholding tax rate under Italian domestic law.
- (jj) The lower rate applies to fees paid for technical assistance services. The higher rate applies to royalties paid for the use of the intangibles.
- (kk) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
- (ll) The treaty provides the following exemptions:
- Interest paid by the government or its local authorities
  - Interest paid to the government of the other contracting state or its local authorities or other entities and organizations (including credit institutions) wholly owned by the other contracting state or its local authorities
  - Interest paid to other entities and organizations (including credit institutions) if the interest is paid on loans permitted under an agreement between the governments of the contracting states
- (mm) The treaty provides the following exemptions:
- Interest paid by the state of source, its political or administrative subdivisions or its local authorities
  - Interest paid on loans granted, guaranteed or secured by the government of the other contracting state, by its central bank or by other entities and organizations (including credit institutions) wholly owned by the other contracting state or under its control
- (nn) The lower rate applies to royalties paid for the use of, or the right to use, copyrights for literary, artistic or scientific works, excluding cinematographic films and other audio and visual recordings.
- (oo) The treaty provides the following exemptions:
- Interest paid by the government or a local authority thereof
  - Interest paid to the government, a local authority thereof or an agency or instrumentality (including a financial institution) wholly owned by the other contracting state or a local authority thereof

- Interest paid to any other agency or instrumentality (including a financial institution) with respect to loans made under agreement entered into between the governments of the contracting states
- (pp) The 5% rate applies to companies (other than partnerships) that hold directly at least 15% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (qq) The treaty provides the following exemptions:
- Interest paid to a contracting state, a local authority thereof, or a corporation having a public status, including the central bank of that state
  - Interest paid by a contracting state or local authority thereof, or any corporation having a public status
  - Interest paid to a resident of a contracting state with respect to debt obligations guaranteed or insured by that contracting state or by another person acting on behalf of the contracting state
  - Interest paid with respect to sales on credit of industrial, commercial or scientific equipment or of goods or services between enterprises
  - Interest paid on bank loans
- (rr) Effective from 1 July 2005 a 0% rate may apply under the agreement between Switzerland and the EU. The rates shown in the table are the withholding tax rates under the Italy-Switzerland double tax treaty. Subject to fulfillment of the respective requirements, the taxpayers may apply either the Switzerland-EU agreement or the Italy-Switzerland double tax treaty.
- (ss) See Section A.
- (tt) The exemption applies to interest paid to a resident of the other contracting state with respect to debt claims indirectly financed by the government of that other contracting state, a local authority, the central bank thereof or a financial institution wholly owned by the government of the other contracting state.
- (uu) The lower rate applies to interest related to loans that are guaranteed by the government or a local authority. Under the Korea treaty, the guarantee must be evidenced by an agreement contained in an exchange of letters between the competent authorities of the contracting states.
- (vv) The 15% rate applies to dividends paid by a company established in Italy to a Cyprus resident beneficiary. Dividends paid by a company established in Cyprus to an Italian resident beneficiary are exempt from withholding tax in Cyprus.
- (ww) The 10% rate applies to dividends paid by an Italian company to a Malaysian resident. Dividends paid by a Malaysian company to an effective beneficiary resident in Italy are exempt from tax in Malaysia if the beneficiary is subject to tax on the dividends in Italy.
- (xx) The 5% rate applies to royalties for the use of, or the right to use, computer software or industrial, commercial, or scientific equipment. In all other cases, the rate for royalties is 10%.
- (yy) The treaty provides an exemption from withholding tax for the following types of interest payments:
- Interest paid by the state of source, its political or administrative subdivisions or its local authorities
  - Interest paid on loans granted, guaranteed or secured by the government of the other contracting state, by its central bank or by other entities and organizations (including credit institutions) wholly owned by the other contracting state or under its control
  - Interest paid or accrued in connection with the sale on credit of industrial, commercial, or scientific equipment
- (zz) The 15% rate applies if the royalties are paid by an enterprise registered with the Philippine Board of Investments and engaged in preferred areas of activities and to royalties with respect to cinematographic films or tapes for television or broadcasting. The 25% rate applies in all other cases.
- (aaa) The 5% rate applies if the recipient company has owned at least 10% of the capital in the Italian company for at least 12 months.
- (bbb) The 5% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, and secret formulas or processes
  - The use of, or the right to use, industrial, commercial or scientific equipment that does not constitute immovable property, as defined in Article 6 of the treaty
  - Information concerning experience of an industrial, commercial or scientific nature

## A. At a glance

Corporate Income Tax Rate (%)	25/33.3 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	25/33.3 (a)
Withholding Tax (%)	
Dividends	15/33.3 (b)
Interest	33.3 (c)
Royalties	33.3 (d)
Management Fees	33.3 (d)
Branch Remittance Tax	33.3
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

- (a) Unregulated companies are taxed at a rate of 25%, and regulated companies are taxed at a rate of 33.3%. An unregulated company is a company that is not a regulated. A regulated company is a company that is regulated by any of the following:
- Financial Services Commission
  - Office of Utilities Regulation
  - Bank of Jamaica
  - The minister with responsibility for finance
- Building societies are taxed at a rate of 30%. Life insurance companies are taxed at a rate of 15% on their investment income and, if regionalized, at a rate of 3% on their premium income.
- (b) The dividend withholding tax is a tax imposed on payments to nonresidents (the rate may be reduced by double tax treaties). Tax is required to be deducted from dividend payments made by a Jamaican resident to a Jamaican resident shareholder at a rate of 15%, unless the Jamaican shareholder is a company that holds more than 25% of the voting rights of the distributing company. In such cases, the dividends may be paid without deduction of tax.
- (c) This rate applies to interest paid to nonresident companies. Special rules apply to interest paid by prescribed persons (as defined). The withholding tax rates may be reduced under tax treaties. The recipients of the payments include the payments in taxable income reported on their annual income tax returns, and they may credit the tax against their annual income tax.
- (d) This is a final tax imposed on payments to both residents and nonresidents. The withholding tax rate may be reduced under tax treaties.
- (e) See Section C regarding a restriction on the loss carryforward.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies are resident in Jamaica if the control and management of their affairs are exercised in Jamaica.

Nonresident companies operating a branch on the island are taxed on profits derived from their Jamaican operations.

**Rates of tax.** The standard rates of the tax on profits are 33.3% for regulated entities and 25% for unregulated entities. Building societies are taxed at a rate of 30%. Life insurance companies are taxed at a rate of 15% on their investment income and, if regionalized, at a rate of 3% on their premium income.

Under the Betting, Gaming and Lotteries Act, the following are the amounts of the lottery tax payable:

- 25% of the gross weekly revenue derived from sales of lottery tickets with respect to a declared lottery
- 20% of the gross weekly revenue derived from promotion of a daily numbers game or instant lottery

Remittances overseas by branches of foreign companies are subject to branch remittance tax at a rate of 33.3%.

Companies registered under the Jamaica Export Free Zones Act are relieved from tax on income derived from the manufacturing and international trading of products. This relief does not have a time limit.

Under the Urban Renewal Act, which was introduced to promote the improvement of depressed areas, approved entities may obtain various types of tax relief for development carried out in areas designated by the Jamaican government as special development areas. The tax relief relates to income tax, stamp duty and transfer tax.

**Minimum business tax.** Effective from 1 April 2014, all entities other than registered charitable organizations are subject to a minimum business tax of JMD60,000 (approximately USD545), for each tax year. The tax is payable in two equal instalments of JMD30,000 (approximately USD273) on or before 15 June and 15 September of each year.

**Capital gains.** No tax is imposed on capital gains. However, a transfer tax of 5% is imposed on transfers of certain Jamaican property, including land and securities (see Section D). Stamp duty may also apply.

Capital allowances are subject to recapture on the disposal of assets (see Section C).

**Administration.** The tax year is the calendar year. The Commissioner General may allow companies with an accounting year-end other than 31 December to pay tax based on income earned in that accounting year.

Income tax returns must be filed and payments made by 15 March of the year following the tax year to which the income tax return relates. Quarterly advance payments of tax must be made.

Interest of 20% per year is levied on late income (corporation) tax payments, and a penalty of 50% per year may also be imposed.

**Dividends.** In general, dividends paid to nonresidents are subject to a final withholding tax, and the tax withheld must be paid to the tax authorities in Jamaica. In general, withholding tax at a rate of 15% is imposed on dividends paid by Jamaican resident

companies to Jamaican resident shareholders. However, if the company paying the dividend holds more than 25% of the voting rights, the rate of income tax payable on such dividend is nil, but the recipient is required to pay the applicable tax. Preference dividends that are deductible for income tax purposes are fully taxable in the hands of the shareholder, regardless of whether the shareholder is resident or nonresident. Dividends paid out of capital are not subject to income tax, but they are generally subject to a transfer tax of 5%.

**Foreign tax relief.** For income derived from treaty countries, the tax rate is the treaty rate applicable to the direct corporate investor. The regular Jamaican corporate tax rate of 25% or 33.3% is applied to income derived from non-treaty countries.

### C. Determination of trading income

**General.** Taxable income is based on accounting income with appropriate adjustments. To be deductible, expenses must be incurred wholly and exclusively in earning income.

Nondeductible expenses include capital expenditures, incorporation expenses and interest accrued, but not paid. Charitable donations approved by the Minister of Finance are deductible, up to a maximum of 5% of taxable income.

**Inventories.** The first-in, first-out (FIFO) and last-in, first-out (LIFO) methods of inventory valuation are allowed.

**Provisions.** To be deductible, bad debts must be specific. General provisions are not allowed.

**Tax depreciation (capital allowances).** The capital allowances are described below.

*Initial allowance.* An initial allowance of 25% of the cost of an asset is granted for certain types of assets, including office equipment, computers, and plant and machinery, as defined in the Income Tax Act. However, some office equipment and plant and machinery are not entitled to the initial allowance. An initial allowance of 12.5% is granted for trade vehicles, which include motor vehicles used primarily for the transport of goods or members of the public. Initial allowances are granted in the year of purchase and are deducted from the depreciable value of the asset.

*Investment allowance.* A 20% investment allowance is granted instead of the initial allowance for buildings and plant and machinery used in the electricity and steam industries. Plant and machinery purchased in Jamaica must be new to qualify for the investment allowance. However, both new and used plant and machinery purchased overseas qualify for the allowance. The initial allowance is substituted for the investment allowance if the asset is disposed of within three years after its purchase. The investment allowance does not reduce the depreciable value of an asset.

*Annual allowance.* Plant and machinery qualify for an annual allowance of 12.5%, calculated using the straight-line method. A 20% annual allowance, calculated using the straight-line method, is granted to motor vehicles. However, the maximum depreciable cost for vehicles that are not trade vehicles is an amount in Jamaican dollars that is equivalent to USD35,000. Office equipment

qualifies for an annual allowance of 20%, calculated using the straight-line method. Nonresidential and industrial buildings generally qualify for annual allowances, calculated using the reducing-balance method, at rates that range from 4% to 12.5%, depending on the type of structure.

*Disposal of depreciable assets.* Initial and annual allowances are generally subject to recapture on the sale of an asset, to the extent the sales proceeds exceed the tax value after depreciation. The amount recaptured may not exceed the total of the initial and annual allowances granted. Any amounts recaptured are subject to tax at the regular corporate tax rate. If the proceeds are less than the tax-depreciated value, an additional allowance is granted.

**Relief for losses.** Losses may be carried forward indefinitely. However, each year, a loss carryforward may offset only 50% of the aggregate amount of income of the taxpayer from all sources after allowing the appropriate deductions and exemptions. However, the limitation does not apply in the following circumstances:

- For the first five years of trade
- If the taxpayer's gross revenue from all sources for the relevant tax year is less than JMD3 million

A carryback of losses is not permitted.

**Groups of companies.** The law does not contain any group loss relief or consolidated return provisions.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Customs Administrative Fee; rates vary depending on the product	Various
Environmental levy; imposed on the Cost, Insurance and Freight (CIF) value of all imported goods with a few exceptions	0.5%
General Consumption Tax, on the value added to goods and services; certain items are exempt	
Standard rate	16.5%
Telephone services, cards and instruments	25%
Tourism sector; hotels currently operating under the Hotel Incentives Act (HIA) have an option to continue under that act or to elect out by 1 January 2015; if they elect out, GCT is charged at 10%; if they remain under the HIA, GCT is charged at 16.5%	10%/16.5%
Electricity for residential premises	0%
Electricity for commercial and industrial premises	16.5%
Certain commercial imports	16.5%
	(advance rate of 5%)
Exports, government supplies and services of diplomats and international agents	0%
Assets tax; on taxable value of assets	
General	JMD5,000 to JMD100,000
Specified regulated entities	0.14%

Nature of tax	Rate
Property tax; on gross asset	
First JMD100,000 of asset	JMD1,000
Asset in excess of JMD100,000 up to JMD1 million; rate on excess	1.5%
Asset that exceeds JMD1 million; rate on excess	2%
Transfer tax, on transfers of certain Jamaican property, including land and securities	5%
Transfer tax on death for estates	1.5%
Stamp duty	Various
Social security contributions	
National insurance scheme (NIS); imposed on annual earnings (income for self-employed individuals) up to JMD1 million; paid by	
Employer	2.5%
Employee	2.5%
Self-employed individual	5%
National Housing Trust (NHT); paid by	
Employer, on payroll	3%
Employee, on salary	2%
Self-employed individual, on income	3%
Human Employment and Resource Training program (HEART), on total payroll if it exceeds JMD173,328 a year; paid by employer	3%
Education tax, on taxable salary; paid by	
Employer, on payroll	3.5%
Employee, on salary	2.25%
Self-employed individual, on net earnings	2.25%

## E. Miscellaneous matters

**Foreign-exchange controls.** Jamaica does not impose foreign-exchange controls.

**Debt-to-equity rules.** No debt-to-equity restrictions are imposed.

**Foreign-controlled companies.** Subsidiaries of nonresident corporations are subject to income tax on their profits at a rate of 25% for unregulated companies or 33.33% for regulated companies. Withholding tax at a rate of 33.3% is generally imposed on dividends remitted, unless a treaty provides a different rate.

**Anti-avoidance legislation.** Several anti-avoidance measures are in force. These measures generally apply to transactions between related parties that were not made at arm's length.

**Employment tax credit.** A person other than a regulated company may be eligible to claim a nonrefundable tax credit (referred to as an employment tax credit), up to a maximum amount of 30% of the income tax payable for each year. The amount of employment tax credit is the total of the education tax, NHT, NIS and HEART payments made by an eligible person that are declared and paid on a timely basis during the year. The application of this employment tax credit is subject to certain additional criteria. It may not be claimed against income tax chargeable on non-trading income, such as interest and dividend income.

**F. Treaty withholding tax rates**

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>	<b>Management fees</b>
	<b>%</b>	<b>%</b>	<b>%</b>	<b>%</b>

Non-treaty countries	33.3	33.3	33.3	33.3

- (a) Higher rate applies if payment is made to a company owning 10% or more of the voting stock of the payer.
- (b) Lower rate applies if payment is made to a company owning 25% or more of the capital or voting stock of the payer.
- (c) Lower rate applies if payment is made to a company owning 25% or more of the shares of the payer.
- (d) Lower rate applies to interest received by a bank recognized as a banking institution under the laws of the state from which the payment is made.
- (e) Lower rate applies if payment is made to a company owning 10% or more of the voting stock of the payer.
- (f) Lower rate applies if payment is made to a company owning 25% or more of the voting stock of the payer.
- (g) Management fees are not subject to withholding tax, but they are included in business profits. Consequently, net management fees are subject to tax in Jamaica only if the recipient has a permanent establishment there.
- (h) These are the rates under the Caribbean Community and Common Market (CARICOM) tax treaty, which the listed country has ratified.

**A. At a glance**

Corporate Income Tax Rate (%)	25.5 (a)
Capital Gains Tax Rate (%)	25.5 (a)
Branch Tax Rate (%)	25.5 (a)
Withholding Tax (%) (b)	
Dividends	20 (c)
Interest	15/20 (c)(d)

Royalties from Patents, Know-how, etc.	20 (c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1 (e)
Carryforward	9

- (a) Local income taxes (see Section D) are also imposed. The resulting effective corporate income tax rate is approximately 37%.
- (b) Except for the withholding taxes on royalties and certain interest (see footnote [d] below), these withholding taxes are imposed on both residents and nonresidents. For nonresidents, these are final taxes, unless the income is effectively connected with a permanent establishment in Japan. Royalties paid to residents are not subject to withholding tax.
- (c) Under the special law to secure funds for reconstruction related to the 11 March 2011 disasters, a special additional income tax (2.1% of the normal withholding tax due) is imposed for a 25-year period running from 1 January 2013 through 31 December 2037. However, this special additional income tax does not affect reduced withholding taxes under existing income tax treaties.
- (d) Interest paid to residents on bonds, debentures or bank deposits is subject to a 20% withholding tax, which consists of a national tax of 15% and a local tax of 5%. Other interest paid to residents is not subject to a withholding tax. Interest paid to nonresidents on bonds, debentures or bank deposits is subject to a 15% withholding tax. Interest paid to nonresidents on national and local government bonds under the Book-Entry Transfer System is exempt from withholding tax if certain requirements are met.
- (e) The loss carryback is temporarily suspended (see Section C).

## B. Taxes on corporate income and gains

**Corporate tax.** Japanese domestic companies are subject to tax on their worldwide income, but nonresident companies pay taxes only on Japanese-source income. A domestic corporation is a corporation that is incorporated or has its head office in Japan. Japan does not use the “central management and control” criteria for determining the residence of a company.

**Rates of corporate tax.** The basic rate of national corporation tax is 25.5% for tax years beginning on or after 1 April 2012. For corporations capitalized at JPY100 million or less, a tax rate of 19% applies to the first JPY8 million of taxable income. The tax rate of 19% is reduced to 15% for tax years beginning between 1 April 2012 and 31 March 2015.

Local income taxes, which are local inhabitant tax and enterprise tax, are also imposed on corporate income (see Section D). The resulting effective corporate income tax rate for companies subject to the 25.5% rate is approximately 37%. Under Business Scale Taxation (Gaikei Hyojun Kazei; see Section D), for certain corporations, the effective rate is reduced to approximately 36%.

**Capital gains.** In general, for Japanese corporate tax purposes, capital gains are not taxed separately. Such gains are treated as ordinary income to which normal tax rates apply. Transferor corporations in qualified reorganizations may defer the recognition of capital gains and losses arising in such transactions. Mergers, corporate spin-offs, share exchanges and contributions in kind are considered qualified reorganizations if they satisfy certain conditions.

A special surplus tax is imposed on capital gains from the sale of land located in Japan. However, this tax is suspended for sales conducted through 31 March 2017. The tax is calculated by applying the following rates, which vary depending on the length of time the property was held, to the capital gains.

Number of years held		Rate %
Exceeding	Not exceeding	
0	5	10
5	—	5

The 2009 tax reform introduced two temporary capital gains reliefs with respect to the holding of land investments. Under one of these measures, a special deduction of JPY10 million may be claimed with respect to capital gains arising from the sale of land acquired during the period from 1 January 2009 to 31 December 2010 and held for a period of five years or more, subject to certain conditions. The other measure is a capital gain deferral mechanism applicable to qualifying land acquired in the period from 1 January 2009 through 31 December 2010. This measure provides a deferral of 80% or 60% of the amount of capital gains arising from land disposed within a certain time period after the date on which the land is acquired, subject to certain conditions and filing obligations.

**Administration.** The tax year for a corporation is its fiscal year. A corporation must file a tax return within two months of the end of its fiscal year, paying the tax at that time. A one-month extension is normally available on application to the tax authorities. Except for newly established corporations, and corporations with a tax amount of JPY100,000 or less in the preceding year, if the fiscal year is longer than six months, the corporation must file an interim return within two months of the end of the first six months and make an advance payment at the time of filing the interim return equal to either 50% of its prior year's tax liability or 100% of its estimated tax liability for the first six months of the current year.

**Dividends received/paid.** Dividends received from another domestic corporation, net of any related interest expense incurred for acquisition of the shares, are generally excluded from gross income. However, if the recipient corporation owns less than 25% of the domestic corporation distributing the dividends, 50% of the net dividend income is includible in gross income. Dividends distributed by a domestic corporation are subject to a 20% withholding tax.

For fiscal years beginning on or after 1 April 2009, a foreign dividend exemption system is available for Japanese companies holding a minimum interest of 25% for a period of at least six months before the date on which the decision to distribute the dividend is made. Under certain tax treaties, the minimum holding interest can be lower than 25%, subject to certain conditions. Under the foreign dividend exemption, 95% of foreign dividends received is excluded from taxable income. No credit for withholding tax or underlying tax on the foreign dividends is available.

**Foreign tax credit.** A Japanese company may be entitled to claim a foreign tax credit against both Japanese corporation tax and local inhabitant tax (see Section D). Creditable foreign income taxes for a Japanese company include foreign income taxes paid directly by a Japanese company and its foreign branches (direct tax credit). In addition, under tax treaties, a tax-sparing credit may be available to domestic companies with a branch or subsidiary in a developing country.

### C. Determination of trading income

**General.** The tax law prescribes which adjustments to accounting income are required in computing taxable income. Expenditures incurred in the conduct of the business, except as otherwise provided by the law, are allowed as deductions from gross income.

Remuneration paid to directors cannot be deducted as an expense unless it is fixed compensation, remuneration determined and reported in advance or performance-based remuneration. The deductibility of entertainment expenses incurred by a corporation in tax years beginning during the period of 1 April 2006 through 31 March 2014 is restricted according to the size (capitalization) of the corporation. Deductions of donations, except for those to national or local governments or similar organizations, are limited.

**Entertainment expenses.** Entertainment expenses cannot be deducted from taxable income. However, all corporations may deduct 50% of entertainment expenses related to meal and drink from taxable income for tax (fiscal) years beginning on or after 1 April 2014. Small or medium-sized corporations can choose the 50% deduction or the current fixed deduction of up to JPY8 million.

**Inventories.** A corporation may value inventory at cost under methods such as the following:

- Actual cost
- First-in, first-out (FIFO)
- Weighted average
- Moving average
- Most recent purchase
- Retail

Alternatively, inventory may be valued at the lower of cost or market value. If a corporation fails to report the valuation method to the tax office, it is deemed to have adopted the most recent purchase price method.

**Depreciation.** The cost of tangible fixed assets, excluding land, may be recovered using statutory depreciation methods, such as straight-line or declining-balance. Depreciation rates are stipulated in the Japanese tax law, which provides a range of rates for each asset category based on the useful life. Depreciation for tax purposes may not exceed the amount of depreciation recorded for accounting purposes. Revised depreciation rates apply to assets acquired on or after 1 April 2007. In addition, statutory salvage value and limit of depreciation are abolished in conjunction with the introduction of the revised depreciation rates. The following are the ranges of the revised depreciation rates for the straight-line and declining-balance methods for selected asset categories.

Asset category	Straight-line		Declining-balance	
	From	To	From	To
Buildings	0.143	0.020	—	—
Building improvements	0.334	0.056	0.667	0.111
Other structures	0.334	0.013	0.667	0.025
Motor vehicles	0.500	0.050	1.000	0.100
Machinery and equipment	0.500	0.046	1.000	0.091

In the year of acquisition of specified machinery or equipment, a corporation may take additional depreciation. A corporation has the option of taking such additional depreciation or claiming the investment tax credit (see *Investment tax credit*).

Intangible assets, including goodwill, are amortized using the straight-line method over their useful lives. The useful life of goodwill is five years.

**Investment tax credit.** A specified medium-sized or small corporation that acquires or produces certain qualifying machinery or equipment (for use in its business within one year of acquisition) during the period of 1 June 1998 through 31 March 2017 may receive a credit against its corporate tax liability. The credit generally equals 7% of the cost or 20% of the corporate tax, whichever is less, and acts as a substitute for additional depreciation (see *Depreciation*).

For tax years beginning on or after 1 April 2009, a corporation may claim a credit equal to 8% to 12% of total current research and development (R&D) expenditure, up to a maximum amount equal to 20% (30% for tax years beginning on or after 1 April 2009 through 31 March 2012 and those beginning on or after 1 April 2013 through 31 March 2015) of the corporate tax due for the relevant fiscal year. Unused credits may be carried forward to subsequent tax years, subject to certain requirements.

For tax years beginning during the period of 1 April 2008 through 31 March 2017, corporations may also claim an additional credit up to 10% of the corporate tax due for certain incremental R&D expenditure or R&D expenditure in excess of specified recent average sales figures.

Tax credits for other investments in certain fields, such as job development and environmental operation, or specific facilities are also available for certain periods. Some of these credits apply to small or medium-sized corporations only.

**Net operating losses.** Net operating losses of certain corporations may be carried forward for nine years, and may be carried back one year. The deductible amount is limited to 80% of taxable income. The loss carryback is suspended for tax years ending from 1 April 1992 through 31 March 2016. However, this suspension does not apply to net operating losses generated in tax years ending on or after 1 February 2009 for specified small or medium-sized corporations.

**Groups of companies.** The Consolidated Tax Return System (CTRS) applies to a domestic parent corporation and its 100% domestic subsidiaries. A consolidated group must elect the application of the CTRS, subject to the approval of the National Tax Agency (NTA). If a consolidated group wants to terminate its CTRS election, it must obtain the approval of the NTA.

The 2010 tax reform introduced special taxation for intra-group transactions in 100% groups. This taxation is separate from the CTRS.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Consumption tax; on a broad range of goods and services	
Rate until 31 March 2017	8%
Rate beginning 1 April 2017	10%
Enterprise tax	
Companies that are subject to Business Scale Taxation; Business Scale Taxation (Gaikei Hyojun Kazei) applies to companies with capital of more than JPY100 million; under Business Scale Taxation, a company is subject to tax on the basis of its added value, its capital amount and its taxable income	
Rates on added value	0.48% to 0.504%
Rates on capital amount	0.20% to 0.21%
Rates on taxable income	
Fiscal years beginning before 1 October 2014	1.5% to 3.26%
Fiscal years beginning on or after 1 October 2014	2.2% to 4.66%
Companies that are not subject to Business Scale Taxation; rates applied to taxable income	
Fiscal years beginning before 1 October 2014	2.7% to 5.78%
Fiscal years beginning on or after 1 October 2014	3.4% to 7.18%
Special local corporate tax; a national tax, which is levied on companies that are subject to enterprise tax; imposed on local enterprise tax liability; with respect to taxable income	
Companies subject to business scale enterprise tax	
Fiscal years beginning before 1 October 2014	148%
Fiscal years beginning on or after 1 October 2014	67.4%
Companies not subject to business scale enterprise tax	
Fiscal years beginning before 1 October 2014	81%
Fiscal years beginning on or after 1 October 2014	43.2%
Local inhabitant tax, which consists of an income levy and a capital levy	
Income levy; computed as a percentage of national income tax; rate depends on the company's capitalization and amount of national income tax	
Fiscal years beginning before 1 October 2014	17.3% to 20.7%
Fiscal years beginning on or after 1 October 2014	12.9% to 16.3%

Nature of tax	Rate
Capital levy; based on the company's capitalization and number of employees; annual assessments vary depending on the cities and prefectures in which the company's offices are located	JPY70,000 to JPY4,400,000
Local corporate tax; a national tax, which is effective for fiscal years beginning on or after 1 October 2014; imposed on standard corporate tax liability	4.4%
Social insurance contributions, on monthly standard remuneration and bonuses	
Basic contribution, paid by	
Employer	15.024%
Employee	14.222%
Nursing insurance premium for employees who are age 40 or older, paid by	
Employer	0.86%
Employee	0.86%

## E. Miscellaneous matters

**Foreign-exchange controls.** The Bank of Japan controls inbound and outbound investments and transfers of money. Effective from 1 April 1998, the reporting requirements were simplified.

**Transfer pricing.** The transfer-pricing law stipulates that pricing between internationally affiliated entities should be determined at arm's length. Entities are considered to be internationally affiliated entities if a direct or indirect relationship involving 50% or more ownership or substantial control exists. The law provides that the burden of proof as to the reasonableness of the pricing is passed to the taxpayer, and if the taxpayer fails to provide proof or to disclose pertinent information to the tax authorities, taxable income is increased at the discretion of the tax authorities. The 2011 revision of the law eliminated the hierarchy-based selection of transfer-pricing methods and allows the selection of the most appropriate transfer-pricing method in each specific case.

It is possible to apply for advance-pricing arrangements with the tax authorities. In cases in which a taxpayer has received a transfer-pricing assessment as a result of an examination, a taxpayer applying for a Mutual Agreement Procedure between Japan and the relevant treaty partner country may be granted a grace period for the payment of taxes due by assessment, including penalty taxes. The length of the grace period depends on the specific circumstances of the assessment.

**Tax-haven legislation.** The Japanese tax law has tax-haven rules. If a Japanese domestic company (including individuals who have a special relationship with such Japanese domestic company) owns 10% or more of the issued shares of a tax-haven subsidiary of which more than 50% is owned directly or indirectly by Japanese domestic companies and Japanese resident individuals (including nonresident individuals who have a special relationship with such Japanese domestic companies or such Japanese resident individuals), the income of the subsidiary must be included in the Japanese parent company's taxable income in proportion to the equity held.

A foreign subsidiary is considered a tax-haven subsidiary if its head office is located in a country that does not impose income tax or if the company is subject to tax at an effective rate of 20% or less (the effective rate is calculated on a company-by-company basis). Losses of a foreign affiliate may not offset the taxable income of the Japanese parent company.

Dividends distributed by a tax-haven subsidiary cannot generally be excluded from tax-haven income added back to the parent company's taxable income. However, the following dividends received by a tax-haven subsidiary can be excluded from the apportionment to a parent company's income:

- Dividends from a foreign subsidiary in which the tax-haven subsidiary has held 25% or more of the total issued shares or the total voting shares for a period of at least six months
- Dividends that have already been added to the Japanese parent company's taxable income as another tax-haven company's income under the tax-haven rules

**Debt-to-equity rules.** Thin-capitalization rules limit the deduction for interest expense for companies with foreign related-party debt if the debt-to-equity ratio exceeds 3:1.

**Earnings-stripping rules.** Earnings-stripping rules, which limit the deductibility of interest paid by corporations to related persons, apply to tax years beginning on or after 1 April 2013. Net interest paid to related persons by a corporation in excess of 50% of its adjusted taxable income is disallowed as a tax deduction. Interest deductions disallowed under this new provision are carried forward for up to seven years. If earnings-stripping rules and thin-capitalization rules both apply, the rule that results in a larger disallowance is applied.

## F. Treaty withholding tax rates

For treaty countries, the rates reflect the lower of the treaty rate and the rate under domestic tax laws on outbound payments.

	Dividends %	Interest %	Royalties %

- (a) The treaty withholding rate is increased to 15% or 20% if the recipient is not a corporation owning at least 25% (Austria, more than 50%; Kazakhstan, 10%; Spain, directly 25%) of the distributing corporation for 6 months (Austria, Denmark, Germany and Indonesia, 12 months).
- (b) Dividends are exempt from withholding tax if the beneficial owner of the dividends owns directly, or indirectly through one or more residents of either contracting state, more than 50% of the voting shares of the company paying the dividends for a period of 12 months ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning directly or indirectly at least 10% of the voting shares of the payer. The 10% rate applies to other dividends.
- (c) Interest paid to a contracting state, subdivision or certain financial institutions is exempt.
- (d) Dividends are exempt from withholding tax if the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying the dividends during the 6-month period immediately before the end of the accounting period for which the distribution of profits takes place and if certain other conditions are met. The withholding tax rate of 5% applies to dividends paid to a company owning at least 25% of the voting shares of the payer during the 6-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 15% rate

applies to other dividends. However, the exemption and the 5% rate described above do not apply to dividends paid by Japanese special purpose companies or securities investment corporations or by Swedish companies similar to such companies that may be introduced in the future. The withholding tax rate of 15% applies to such dividends.

- (e) Interest paid to a Swiss resident pursuant to debt claims guaranteed or insured by Switzerland is exempt.
- (f) The withholding rate for trademark royalties is 20%; for motion picture films and videotapes, the rate is 15%. The 12.5% rate applies to other royalties.
- (g) The withholding rate for motion picture films is 15%.
- (h) The withholding rate for motion picture films is 0% and for patent royalties is 10%.
- (i) The withholding tax on cultural royalties is exempt (Romania, 10%) and on industrial royalties is 10% (Romania, 15%).
- (j) The rate is generally 15% (Thailand, or 20%), except it is reduced to 10% for interest paid to banks.
- (k) The USSR treaty applies to Armenia, Belarus, Georgia, Kyrgyzstan, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan.
- (l) The withholding rate is increased to 10% (Philippines, 15%) if the recipient is not a corporation owning at least 10% of the voting shares (Philippines and Saudi Arabia, or the total shares) of the distributing corporation during the six-month (Saudi Arabia, 183-day, Portugal, 12-month) period ending on the date on which entitlement to the dividends is determined (Philippines, the day immediately preceding the date of payment of the dividends).
- (m) Dividends are exempt from withholding tax if the beneficial owner of the dividends owns directly at least 80% of the voting shares of the company paying the dividends for a period of 12 months ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning directly at least 10% of the voting shares of the payer. The 10% rate applies to other dividends.
- (n) The Czechoslovakia treaty applies to the Czech and Slovak Republics.
- (o) The 5% rate applies if the recipient of the dividends is a corporation owning at least 25% of the payer during the 6-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 0% rate applies if the recipient of the dividends is a "specified parent company," as defined in the treaty. The 15% rate applies to other dividends.
- (p) The general rate is 15%. The 10% rate applies to certain types of interest payments such as interest paid to or by banks.
- (q) Loan interest paid to nonresidents is subject to a 20% withholding tax. Interest paid to nonresidents on bonds, debentures or bank deposits is subject to a 15% withholding tax.
- (r) The withholding rate for the use of, or the right to use, industrial, commercial or scientific equipment is 5%.
- (s) The 15% rate applies if the dividends are paid by a company engaged in an industrial undertaking to a company owning at least 25% of the payer of the dividends. The 20% rate applies to other dividends.
- (t) A double tax treaty with the United Arab Emirates took effect on 24 December 2014. Under the treaty, a 5% rate applies to dividends paid to a company owning at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. A 10% rate applies to other dividends. Interest paid to a contracting state, subdivision or certain financial institutions is exempt. A 10% rate applies to other interest payments. A 10% rate applies to royalties.
- (u) The 0% rate applies if the beneficial owner of the dividends owns directly at least 15%, or owns at least 25% (regardless of whether ownership is direct or indirect), of the voting shares of the payer of the dividends for the six-month period ending on the date on which the entitlement to dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning directly or indirectly at least 10% of the voting shares of the payer for the six-month period ending on the date on which the entitlement to dividends is determined. The 10% rate applies to other dividends.
- (v) The 5% rate applies if the beneficial owner of dividends owns directly or indirectly at least 50% of the voting shares of the payer of the dividends for the 6-month period ending on the date on which the entitlement to dividends is determined. The 7.5% rate applies to dividends paid to a company owning directly or indirectly at least 25% of the voting shares of the payer for the 6-month period ending on the date on which the entitlement to dividends is determined. The 10% rate applies to other dividends.
- (w) The withholding tax rate on royalties is 10% under the treaty. However, the reduced rate of 5% provided in the protocol dated 19 December 2008 applies.

- (x) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met.
- (y) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 50% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. The 10% rate applies to other dividends.
- (z) Interest paid to a contracting state, subdivision or certain financial institutions are exempt. The 10% rate applies to other interest payments.
- (aa) Royalties are exempt from withholding tax if certain conditions are met.
- (bb) In January 2013, Japan signed a protocol to revise its double tax treaty with the United States. The protocol has not yet entered into force. Under the protocol, dividends will be exempt from withholding tax if the company receiving the dividends owns at least 50% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The same rates under the current treaty will apply to other dividends. Interest will be exempt from withholding tax if certain conditions are met.
- (cc) Interest paid to a contracting state or subdivision is exempt. A 5% rate applies to interest paid to banks. The 10% rate applies to other interest payments.
- (dd) A protocol to revise Japan's double tax treaty with the United Kingdom took effect on 12 December 2014. Under the protocol, dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. Under the protocol, interest is exempt from withholding tax if certain conditions are met.
- (ee) In December 2013, Japan signed a protocol to revise its double tax treaty with Sweden. This protocol is effective from 12 October 2014. The reduced withholding tax rates under the protocol apply to payments made on or after 1 January 2015. Under the protocol, dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. Interest and royalties are exempt from withholding tax if certain conditions are met.
- (ff) A double tax treaty with Oman took effect on 1 September 2014. The reduced withholding tax rates under the treaty apply to payments made on or after 1 January 2015. The 5% rate for dividends applies if the beneficial owner is a company that has owned directly or indirectly for the period of six months ending on the date on which entitlement to the dividends is determined at least 10% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.

In February 2015, Japan signed a double tax treaty with Qatar. The agreement has not yet entered into force. Under the agreement, a 5% rate will apply to dividends paid to a company owning at least 10% of the shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. A 10% rate will apply to other dividends. Interest paid to a contracting state, subdivision or certain financial institutions will be exempt. A 10% rate will apply to other interest payments. A 5% rate will apply to royalties.

Carryback	– (g)
Carryforward	Unlimited

(a) The general rate is 0%. The 10% rate applies to certain regulated financial services companies. The 20% rate applies to utility companies, companies in the business of importation of oil to Jersey, and rental income, development profits and certain income derived from Jersey land.

(b) See Section B.

(c) Jersey legislation, which took effect on 1 July 2005 and is amended, effective from 1 January 2015, implements withholding tax and exchange-of-information measures similar to the measures included in the European Council Directive 2003/48/EC on the Taxation of Savings Income. For details, see Section B.

(d) Debt is considered short-term if it cannot exceed 364 days.

(e) A 20% rate applies to certain interest on long-term debt if the loan agreement was entered into before 1 January 2004 by a Jersey individual and if no election is made to pay the interest gross. This rate is unlikely to be applied except in rare cases.

(f) The 20% rate applies to patent royalties paid to individuals resident in Jersey.

(g) See Section C.

#### B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide profits excluding capital gains.

In general, all companies incorporated in Jersey are considered resident. However, a company incorporated in Jersey is considered nonresident if the company's business is centrally managed and controlled outside Jersey in a country or territory where the highest rate at which any company may be subject to tax on any part of its income is 20% or higher and if the company is tax resident in that country. A company incorporated outside Jersey is regarded as Jersey resident if its business is managed and controlled in Jersey.

**Rates of corporate income tax.** Jersey has a general corporate income tax rate of 0% and a rate for certain regulated entities of 10%. Utility companies, companies in the business of importation of oil to Jersey, and rental income, development profits and certain profits derived from Jersey land are subject to income tax at a rate of 20%.

Regulated entities subject to the 10% tax rate are financial services companies that are registered or hold a permit in accordance with various laws administered by the Jersey Financial Services Commission and operate through a permanent establishment in Jersey. These companies include the following:

- Entities carrying out banking business, trust business or investment business
- Fund administrators or custodians

The 10% rate applies to business conducted through a Jersey company or a branch.

Unless certain conditions are met, an agent or tenant must deduct tax at a rate of 20% before paying rent to a nonresident landlord.

In 2009, the European Union (EU) found that specific measures within the 0-10 tax regime did not conform to the spirit of the EU Code of Conduct. The specific measures, which relate to provisions to levy tax on Jersey resident individual shareholders of Jersey companies using either deemed dividend or attribution mechanisms, were abolished, effective from 1 January 2012. The EU Code of Conduct Group accepted that the abolishment of the specific measures means that the regime is no longer harmful. The Economic and Financial Affairs Council ratified this acceptance in December 2011.

**International Business Companies.** The International Business Company status was abolished, effective from 1 January 2012.

**Exempt companies.** Jersey's former exempt company status was abolished, effective from the 2009 year of assessment. An alternative exemption regime for eligible investment schemes was introduced from 2010. However, because of the existence of the 0% tax rate, this regime is rarely used.

**Capital gains.** Jersey does not impose a tax on capital gains.

**Administration.** Corporate income tax returns must be filed by 6:00 p.m. on the last Friday in July in the year following the year of assessment. A GBP250 penalty is imposed for a failure to file or late filing of tax returns. However, by concession provided by the Jersey Taxes Office, effective from the 2013 year of assessment, if a company tax return is submitted before 31 December in the year following the year of assessment to which the return

relates, no penalty is applied. Assessments are normally issued to taxpayers in the year following the income year (the Jersey fiscal year coincides with the calendar year), and tax is payable on the day following the date of the issuance of the assessment. A 10% surcharge is imposed if tax remains unpaid as of the deadline, which is 6:00 p.m. on the Friday following the first Monday in December in the year following the year of assessment.

The basis of assessment for trading is profits arising in the current accounting period.

Although no statutory clearance mechanism exists, on specific request, the tax authorities promptly provide advance rulings on the Jersey tax treatment of transactions.

**Dividends.** Dividends paid by Jersey resident companies may be deemed to be paid net of tax. The rate depends on the tax rate applicable to the profits from which the dividend was paid.

Effective from 1 January 2013, Jersey resident individuals who own more than 2% of a Jersey resident company whose profits are taxed at less than 20% are subject to tax on any value taken by them out of the company that is less than or equal to their share of taxable profits. This applies to any distributions made on or after 1 January 2013. Before 2013, a deemed distribution regime applied.

**European Union Savings Directive.** Effective from 1 January 2015, Jersey moved to mandatory automatic exchange of information under the EU Savings Directive.

Before 1 January 2015, Jersey had enacted legislation, which took effect on 1 July 2005, implementing measures similar to the withholding tax and exchange-of-information measures contained in the European Council Directive 2003/48/EC on the Taxation of Savings Income. The directive applied to interest on certain debt-related distributions paid to individuals resident in the EU. The withholding tax rate was 35%. The withholding tax applied unless the person beneficially entitled to the interest payment specifically authorized disclosure of the interest payment to the Jersey tax authorities that were required to exchange this information with the tax authorities in the country of residence of the person beneficially entitled to the interest payment. The legislation affected companies that fell within the definition of "paying agent."

**Automatic exchange of information.** Jersey has entered into intergovernmental agreements with the United Kingdom and the United States, and has also adopted the Common Reporting Standard.

**Foreign tax relief.** Jersey has entered into full double tax treaties with Estonia, Guernsey, the Hong Kong Special Administrative Region (SAR), Isle of Man, Malta, Qatar, Singapore and the United Kingdom. It has entered into limited treaties with Australia, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Iceland, New Zealand, Norway, Poland and Sweden. The arrangements with Guernsey and the United Kingdom give credit for tax on all sources of income, except that the treaty with the United Kingdom specifically excludes dividends and debenture interest.

Unilateral relief is granted for income not covered by a treaty, to the extent that foreign tax paid is allowed as a deduction in the computation of the amount assessable. Unilateral relief in the form of a tax credit may also be granted by concession if the following conditions are satisfied:

- The income in question is substantial.
- The income would not otherwise come to Jersey.
- The income will be used to generate taxable profits, or it will help to overcome an obstacle to the restructuring or expansion of a commercial enterprise and accordingly result in the more efficient use of resources to the benefit of Jersey's economy.

Jersey has entered into various tax information exchange agreements (TIEAs) and some limited double tax agreements (see above). The TIEAs provide for the exchange of information between tax authorities, on request, with respect to the tax position of resident persons. The limited double agreements provide for the allocation of taxing rights with respect to certain income derived by individuals and enterprises operating ships and aircraft in international traffic.

### C. Determination of trading income

**General.** The amount assessable is based on the accounting profit, adjusted for tax purposes.

Revenue expenses incurred wholly and exclusively for the purposes of a trade or the managing of investments are deductible.

**Inventories.** No statutory rules prescribe which methods of stock valuation are acceptable. Inventory is normally valued at the lower of cost or net realizable value.

**Provisions.** Only provisions relating to specific expenses are allowed as deductions.

**Tax depreciation (capital allowances).** Capital allowances, normally at 25% of the declining balance, are given on capital expenditure incurred to acquire machinery or plant to be used wholly and exclusively for the purposes of the trade.

Capital allowances are calculated on a pool of assets. A balancing charge is imposed if the proceeds from the sale of an asset (limited to the cost of the asset) exceed the written-down tax value of the pool or if the business is terminated.

**Groups of companies.** A qualifying company that suffers a loss may surrender the loss to another qualifying company in the same group. The company receiving the loss can then offset the loss against its profits or gains. The loss can be offset only against profits or gains determined for an accounting period that is the same as, or overlaps with, the financial period in which the loss arises. For these purposes, a qualifying company is a regulated entity that is taxed at a rate of 10% (see Section B).

Companies taxed at 0% that are part of a group may also surrender losses to offset the profits of another company taxed at 0% in the group.

**Relief for losses.** Companies subject to tax at the 0% or 10% rates can relieve losses by carrying the losses forward and offsetting them against future profits or by surrendering losses under the group relief measures (see *Groups of companies*).

Losses incurred by companies subject to tax at a rate of 20% may be used to offset either income for the year in which the losses were incurred or profits derived from the same trade in the immediately preceding year of assessment. Unused losses may be carried forward, without time limit, to offset income from the same trade for any subsequent year of assessment.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Social security contributions; on salaries of employees resident in Jersey; payable by Employer (maximum monthly contribution for each employee of GBP261.30) (Employers are required to pay an additional contribution of 2% on the earnings of employees above GBP48,240 and up to GBP159,624 per year.)	6.5
Employee (maximum monthly contribution of GBP241.20)	6
Goods and services tax; on domestic supplies of goods and services; an exception applies to certain entities that are able to elect for a fee to have International Services Entity status	5
Land transaction tax; applies to the sale of shares in a company that give the owner of the shares the right to occupy a dwelling; the tax is the equivalent to the stamp duty levied on the sale of freehold property; a GBP80 charge also applies; the rate is reduced for reduced rate properties (below GBP400,000) and first-time buyers; other charges may also apply	0 to 7

#### E. Miscellaneous matters

**Anti-avoidance legislation.** The Income Tax (Jersey) Law contains a general anti-avoidance provision. The Comptroller may make assessments or additional assessments to counteract transactions if the primary purpose is the avoidance or reduction of income tax.

**Foreign-exchange controls.** Jersey does not apply any form of exchange controls, and capital can be freely repatriated.

**Related-party transactions.** No special legislation applies to related-party transactions.

**Debt-to-equity rules.** Jersey does not impose debt-to-equity requirements.

**Transfer pricing.** Jersey's law does not include transfer-pricing rules. However, see *Anti-avoidance legislation*.

**F. Treaty withholding tax rates**

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Estonia	0*	0	0
Guernsey	0*	0	0
Hong Kong SAR	0*	0	0
Isle of Man	0*	0	0
Luxembourg	0*	0	0
Malta	0*	0	0
Qatar	0*	0	0
Singapore	0*	0	0
United Kingdom	0*	0	0
Non-treaty countries	0*	0	0

\* See Section B.

In addition, Jersey has entered into tax information exchange agreements (TIEAs) with several countries. TIEAs provide for the exchange of information between tax authorities, on request, with respect to the tax positions of resident persons.

## A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	
On Shares	30 (b)
On Depreciable Assets	30 (a)
Branch Tax Rate (%)	30 (a)
Withholding Tax (%)	
Dividends	0
Interest	5 (c)
Other Payments to Nonresidents	7
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

(a) This is the maximum rate. For a listing of rates, see Section B.

(b) See Section B.

(c) This withholding tax is imposed on interest paid by banks to depositors (excluding interest paid on local interbank deposits). Interest paid by local banks on foreign banks' deposits is exempt from income tax.

## B. Taxes on corporate income and gains

**Corporate income tax.** In general, income tax is levied on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Jordan. Income is

deemed to arise in Jordan if one of the following circumstances exists:

- The place of performance of work is located in Jordan.
- The place of delivery of work is located in Jordan.
- The place of signing the contract is located in Jordan.
- Jordanian capital is invested outside Jordan.
- The output from a service performed outside Jordan is used in Jordan.

**Rates of corporate tax.** Corporate income tax in Jordan is imposed at flat rates. Rates for resident corporations vary from 14% to 30%, depending on the type of activity. The following are the corporate income tax rates.

<b>Sector</b>	<b>Rate (%)</b>
Banking	30
Insurance, telecommunications, stockbrokers, finance companies, currency-exchange companies and leasing companies	24
Others	14

**Capital gains.** Banks, financial companies, insurance companies, foreign-exchange dealers and finance leasing companies are subject to tax on their capital gains derived from sales of shares and bonds in Jordan. For other companies, capital gains derived from sales of shares in Jordan are exempt from tax (except for goodwill). However, a formula is used to calculate the disallowed part of the cost. This formula is the ratio of exempt income to total income, multiplied by total allowable cost. Capital gains derived from sales of shares in foreign markets that arise from Jordanian funds are subject to income tax.

Income derived from current assets, which are assets held for less than one year, and from depreciable assets are taxable as ordinary income.

**Administration.** The tax year for corporations is their accounting (financial) year. Tax returns must be filed on a prescribed form in Arabic within four months after the tax year-end.

The tax return includes a payroll listing and information pertaining to goods and services supplied for the year, including details related to the corporation's income, expenses, exemptions, and tax due.

The total amount of tax due must be paid at the time of filing to avoid penalties.

The tax authorities may conduct an income tax audit for up to five previous years and charge the company additional tax.

Taxpayers that have gross income exceeding JOD500,000 must make semiannual payments on account equal to 37.5% of the preceding year's tax.

**Dividends.** Dividends received from companies located in Jordan are exempt from tax except for dividends received by banks and financial institutions from mutual investment funds. Twenty-five percent (subject to change) of dividend income must be added back to income if it does not exceed the total allowable costs; that is, the cap for disallowed expenses is the lower of 25% of dividends or reported costs.

**Interest.** Interest paid by banks to depositors, except for interest on local interbank deposits, is subject to a 5% withholding tax. The withholding tax is considered to be a payment on account for resident companies and a final tax for individuals and nonresident companies. Interest paid by local banks on foreign banks' deposits is exempt from income tax.

**Foreign tax relief.** Foreign tax relief is granted in accordance with tax treaties signed with other countries.

### C. Determination of trading income

**General.** All income earned in Jordan from trading or other sources, except for income exempt under the income tax law, is taxable.

All business expenses incurred to generate income are allowable, with limitations on certain items, such as entertainment and donations. A certain percentage of entertainment expenses is deductible. Head office charges are limited to 5% of branch net taxable income.

**Provisions and reserves.** Provisions and reserves are not allowed as tax deductions, except for insurance companies' reserves and doubtful debts' provisions for banks.

**Tax depreciation.** Depreciation for tangible and intangible assets is not addressed in the Income Tax Law 28 for 2009, but instructions are expected to be issued on this matter. Until such instructions are issued, taxpayers must refer to the depreciation rates in the prior law.

The Income Tax Law allows assets with a value of less than JOD100 to be expensed in the year of purchase of the assets.

The Income Tax Department establishes statutory maximum depreciation rates for various fixed assets. If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed but may be used for tax purposes at a later date. The following are some of the maximum straight-line depreciation rates.

Asset	Rate (%)
Industrial buildings	4
Buildings	2
Office equipment	10
Motor vehicles	15
Plant, equipment and machinery	10 to 20*

\* The rate is 25% for computer equipment.

The taxpayer may choose to use the accelerated method. Under this method, twice the straight-line rate is applied (except for buildings).

Machinery and equipment and other fixed assets that are imported on a temporary-entry basis (equipment that the government allows foreign contractors to import on a temporary basis for the purpose of carrying out certain contractual work in Jordan) do not qualify for accelerated depreciation.

Used assets are depreciated at the above statutory rates, which are applied to the purchase price.

**Relief for losses.** Taxpayers are allowed to carry forward unabsorbed losses indefinitely to offset profits of subsequent periods. Losses may not be carried back.

**Groups of companies.** Companies must file separate financial statements for tax purposes.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
General sales tax (similar to value-added tax)	16
Social security contributions, on salaries and all benefits except overtime; the maximum salary subject to social security contributions is JOD3,000 for individuals joining the social security system on or after 1 March 2014; the maximum amount is subject to change at the beginning of each year according to the average of social security salaries (but should not exceed JOD3,000 in future years); different rules regarding maximum salary apply to individuals who joined the social security system before 1 March 2014; the amount of social security contribution is based on the employee's January salary; the employee's salary is subject to revision in January of each subsequent year; changes to the salary made during the year are not reflected in the employee's social security contribution until the following January; paid by	
Employer (this rate is expected to increase to 13/25%, effective from 1 January 2015)	12.75
Employee (this rate is expected to increase to 7%, effective from 1 January 2015)	6.75
Withholding tax on imports; imposed on the value of goods imported for resale; paid on account against the taxpayer's final tax liability	2
Withholding tax on payments to nonresident service providers	7

#### E. Miscellaneous matters

**Foreign-exchange controls.** Jordan does not impose any foreign-exchange controls.

**Debt-to-equity rules.** Under thin-capitalization rules, for 2013 and future years, interest paid on loans in excess of a 3:1 ratio of debt to the higher of capital or average equity is not deductible.

#### F. Tax treaties

Jordan has entered into double tax treaties with Algeria, Azerbaijan, Bahrain, Bulgaria, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iran, Iraq, Italy, Korea (South),

Kuwait, Lebanon, Libya, Malaysia, Malta, Morocco, the Netherlands, Pakistan, the Palestinian Authority, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, Ukraine, the United Kingdom, Uzbekistan and Yemen.

In addition, Jordan has entered into tax treaties, which primarily relate to transportation, with Austria, Belgium, Cyprus, Denmark, Italy, Pakistan, Spain and the United States.

The following is a table of treaty withholding tax rates.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Algeria	15	15	15
Azerbaijan	8	8	10
Bahrain	10	10	10
Bulgaria	10	10	10
Canada	10/15	10	10
Croatia	10	10	10
Czech Republic	10	10	10
Egypt	15	15	20
France	5/15	0/15	5/15/25
India	10	10	20
Indonesia	10	10	10
Iran	5/7.5	5	10
Iraq	— *	— *	— *
Italy	10	10	10
Korea (South)	10	10	10
Kuwait	5/10	5	30
Lebanon	10	10	10
Libya	— *	— *	— *
Malaysia	10	15	15
Malta	10	10	10
Morocco	10	10	10
Netherlands	15	5	10
Pakistan	10	10	10
Palestinian Authority	— *	— *	— *
Poland	10	10	10
Qatar	10	5	10
Romania	15	12.5	15
Sudan	15	15	15
Syria	10	10	18
Tunisia	— *	— *	— *
Turkey	10/15	10	12
Ukraine	10	10	10
United Kingdom	10	10	10
Uzbekistan	7/10	10	20
Yemen	10	10	10

\* The treaty does not provide for a maximum withholding tax rate.

Jordan is negotiating a double tax treaty with the United Arab Emirates.

## A. At a glance

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Permanent Establishment Tax Rate (%)	20
Branch Profits Tax Rate (Additional Tax) (%)	15 (a)
Withholding Tax (%)	
Dividends	15 (b)(c)
Interest	15 (c)
Royalties from Patents, Know-how, etc.	15 (c)
Capital Gains	15 (c)
Other Income	20
Net Operating Losses (Years)	
Carryback	0
Carryforward	10

(a) This tax is imposed on the taxable profits of permanent establishments after deduction of the profits tax.

- (b) This withholding tax applies to dividends paid to nonresident legal entities. Dividends paid to resident legal entities are generally exempt from tax (with some exceptions).
- (c) A 20% withholding tax rate applies to Kazakh-source income paid to entities registered in tax havens.

## B. Taxes on corporate income and gains

**Corporate income tax.** Kazakhstan legal entities and foreign legal entities operating through a permanent establishment are subject to tax. The definition of “permanent establishment” is generally similar to the definition in the model treaty of the Organisation for Economic Co-operation and Development, without the standard exemptions but with certain peculiarities. Kazakhstan tax resident legal entities are subject to tax on their worldwide income. Non-resident legal entities are subject to tax on income from Kazakh sources that are earned through a permanent establishment.

**Rates of corporate tax.** The regular corporate income tax rate is 20%. This rate applies to Kazakhstan companies, including enterprises with foreign participation (joint ventures) and companies with 100% foreign participation, and permanent establishments of foreign companies.

Permanent establishments are also subject to a 15% tax on their profits after deduction of corporate income tax. The 15% tax is imposed regardless of whether the profits are remitted to the home country of the permanent establishment.

Payments to foreign or nonresident legal entities without a permanent establishment are subject to withholding tax. The rate is 15% for dividends, interest, royalties, capital gains and insurance premiums. For reinsurance premiums and international transportation services, the rate is 5%. For all other payments, the rate is 20%. The rate is 20% for payments of any type of Kazakh-source income to tax-haven entities.

*Taxation of subsurface users.* Businesses engaging in the exploration and extraction of mineral resources in Kazakhstan (usually referred to as subsurface users under Kazakhstan law) operate under subsurface use contracts. The taxation under such contracts differs from the standard regime.

**Tax incentives.** Expenditure on certain qualifying fixed assets can be deducted in the first three years after commissioning, with each deduction equaling one-third of the initial value of the asset. Alternatively, it can be deducted in full in the tax year in which the expenditure is incurred.

*Special-Economic Zones.* Currently, the following 10 special-economic zones exist in Kazakhstan:

- Astana-New City
- National Industrial Petrochemical Technopark
- Innovation Technology Park
- Sea Port Aktau
- Ontustyk
- Burabai
- Saryarka
- Khorgos-East Gate
- Pavlodar
- Chemical Park Taraz

The Kazakhstan Tax Code provides certain tax benefits for entities carrying out their activities in a special-economic zone. These tax benefits generally include a reduction of the corporate income tax payable by 100% and exemptions from land and property taxes and payments for the use of land plots. In addition, an exemption from social tax may be applied by entities carrying out their activities in the Innovation Technology Park special-economic zone. The tax benefits may be claimed by entities that meet certain requirements established by the Tax Code.

**Capital gains.** Capital gains are included in taxable profit and subject to tax at the regular corporate income tax rates. For non-residents, certain capital gains are taxed by withholding tax.

**Administration.** The tax year is the calendar year.

Legal entities must make advance payments of tax on or before the 25th day of each month. These payments are based on the estimated income and corporate income tax due for the current year. Annual tax returns must be filed by 31 March of the year following the tax year. Corporate income tax due must be paid within 10 calendar days after the deadline for filing annual tax returns. The following legal entities are not required to make advance payments of tax:

- Legal entities that had adjusted aggregate annual income not exceeding 325,000 monthly calculation indices (this index is established annually) in their antepenultimate tax year
- Legal entities in their year of registration and in the following year

**Dividends.** Dividends paid to nonresident legal entities are subject to withholding tax at a rate of 15% (for legal entities from tax-haven countries, a 20% rate applies). Dividends paid to resident legal entities are generally exempt from withholding tax (with some exceptions). Dividends received by resident legal entities are generally exempt from corporate income tax (with some exemptions).

For purposes of the Tax Code, resident legal entities are legal entities created in accordance with Kazakhstan legislation and legal entities with their place of effective management (actual management body) located in Kazakhstan.

**Foreign tax relief.** A foreign tax credit is available for foreign tax paid on income earned abroad, unless such income is exempt from tax in Kazakhstan. The amounts that may be offset are determined for each country separately and equal the lowest amount of the following:

- The amount actually paid in a foreign state on income received by a taxpayer outside of Kazakhstan
- The amount of income tax on income received by a taxpayer outside Kazakhstan, calculated in accordance with the Tax Code and the provisions of an international treaty

### C. Determination of taxable income

**General.** Under accounting legislation, large business entities, financial institutions, joint stock companies and certain other companies must prepare their financial reporting in accordance with International Financial Reporting Standards (IFRS). Other

entities may choose to prepare their financial reporting in accordance with IFRS. Entities that do not choose to follow IFRS must prepare their financial reporting in accordance with National Accounting Standards.

In general, taxable profit equals the difference between annual aggregate income and allowable deductions. Income and expenses in accounting records generally serve as the basis for the calculation with adjustments.

In general, under the Tax Code, all properly documented expenses related to activity aimed at generation of revenues are deductible, unless the Tax Code explicitly indicates that a certain expense is nondeductible.

Interest (in certain cases, the amount actually paid within the amount of accrued interest expense) is deductible up to an amount calculated on the basis of the following formula:

$$(A + E) + \left(\frac{OC}{AL}\right) \times (MC) \times (B + C + D)$$

The following are descriptions of the items contained in the above formula:

- “A” is the amount of the interest, excluding amounts included in values B, C, D and E.
- “B” is the amount of interest payable to a related party, excluding amounts included in value E.
- “C” is the amount of remuneration payable to persons registered in a state with a preferential tax regime (tax haven), excluding amounts included in value B.
- “D” is the amount of interest payable to an independent party with respect to loans granted against a deposit or a secured guarantee, surety bond or other form of security provided by related parties in the event of the enforcement of the guarantee, surety bond or other form of security, excluding amounts included in value C.
- “E” is the amount of remuneration for credits (loans) issued by a credit partnership established in Kazakhstan.
- “MC” is the marginal coefficient – seven for financial institutions and four for others.
- “OC” is the average annual amount of owners’ capital.
- “AL” is the average annual amount of liabilities.

The amount of interest in excess of the amount calculated under this formula is not deductible.

Subsurface users (see Section B) may deduct in the form of depreciation deductions expenses incurred during the exploration period on geological studies, exploration and preparation work for the extraction of mineral resources, including expenses for assessment, expenses for equipping, general administrative expenses and expenses connected with the payment of bonuses. Subsurface user operations are works related to geological studies and to the exploration and production of natural resources. Enterprises begin to calculate depreciation when the extraction of mineral resources begins after commercial discovery. They may set the annual depreciation rate at their discretion, but the rate may not exceed 25%.

**Provisions.** Banks and insurance companies may deduct provisions for doubtful and bad debts created in accordance with IFRS in the order established by the National Bank of Kazakhstan and agreed to by the authorized state body. Other entities may generally deduct actual bad debts that are three years past due if certain other conditions are met.

**Tax depreciation.** Buildings may be depreciated using an annual declining-balance rate of up to 10%. The maximum annual declining-balance depreciation rate for machinery and equipment (with the exception of machinery used in the oil and gas extraction industry) is 25%. The maximum depreciation rate for computers and software is 40%. Other fixed assets not included in the above categories are depreciated at a rate of up to 15%. Depreciation rates for subsurface users may be doubled in the tax year in which fixed assets are first placed into service in Kazakhstan if these fixed assets are used in the business for at least three years.

**Relief for losses.** Enterprises may generally carry forward tax losses from business activities to offset annual taxable profits in the following 10 tax years. Loss carrybacks are not allowed.

**Groups of companies.** The Tax Code does not include any measures permitting related enterprises to offset profits and losses among group members.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on supplies of goods, work and services that are considered to be supplied in Kazakhstan, as well as on imports of goods	
Standard rate	12
Exports of goods	0
Export duties on certain types of goods (for example, crude oil and specified oil products); the duty is calculated as a specific percentage of the customs value, with a minimum duty of a specified amount of euros or US dollars per unit of measurement	Various
Import duty on certain goods; the duty is calculated as a specific percentage of the customs value, with a minimum duty of a specified amount of euros or US dollars per unit of measurement	
Percentage rates	Various
Excise taxes on certain goods; the tax is calculated as a specified amount of tenge per unit or a specified percentage of the customs value	
Percentage rates	Various
Property tax; imposed on annual average balance-sheet value of immovable property	1.5
Payroll taxes	
Personal income tax, payable by employee; calculated at a flat general rate	10

Nature of tax	Rate (%)
Social tax, paid by employer; calculated at a flat rate	11
Pension fund contributions; withheld from employees' salaries; the maximum base used to calculate the monthly contributions is KZT1,602,300 (approximately USD8,800)	
Standard rate	10
Additional professional pension fund contributions; paid by employer for employees working in hazardous health conditions (according to a list of professions); calculated at a flat rate	5
Social insurance contributions paid by employers and self-employed individuals; the base used to calculate the monthly contributions may not exceed KZT213,640 (approximately USD1,170)	
Percentage rate	5
Rent tax on crude oil and gas condensate for export	
Percentage rates	0 to 32

Other taxes include land tax and vehicle owners' tax.

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Kazakhstan is the tenge (KZT).

The principal measures governing foreign-exchange controls in Kazakhstan are the Law on Currency Regulations and Currency Control and the resolutions of the National Bank of Kazakhstan. The foreign-exchange control system operates largely through the following two sets of rules:

- Rules for residents (that is, Kazakhstan citizens, Kazakhstan legal entities, representative offices and branches of Kazakhstan legal entities in and outside Kazakhstan, diplomatic, trade and other official representative offices of Kazakhstan, located outside Kazakhstan, and foreign citizens having a Kazakh residency permit)
- Rules for nonresidents (that is, foreign citizens, foreign companies, representative offices and branches of foreign legal entities, international organizations, and diplomatic and other official representative offices of foreign countries)

In general, payments between residents may only be made in tenge.

Under the Civil Code, an obligation between two residents may not be denominated in foreign currency, with certain exceptions. This rule does not apply to contracts between residents and non-residents.

**Transfer pricing.** The Transfer Pricing Law strengthens controls over prices used by taxpayers in cross-border transactions and certain domestic transactions related to cross-border transactions. The law does not differentiate between related and unrelated parties in applying transfer-pricing controls (for example, no price deviation allowed for unrelated parties). The law contains extensive transfer-pricing documentary and monitoring requirements

that include, among other items, industry, market, functional and risk analysis. Under the law, the following methods may be used to determine the market price:

- Comparable uncontrolled price method
- Cost-plus method
- Subsequent resale price method
- Profit-split method
- Net margin method

## F. Treaty withholding tax rates

The following table lists the withholding tax rates under Kazakhstan's tax treaties.

	Dividends %	Interest %	Royalties %
Armenia	10	10	10
Austria	5/15 (a)	10	10
Azerbaijan	10	10	10
Belarus	15	10	15
Belgium	5/15 (a)	10	10

Slovak Republic	10/15 (e)	10	10
Spain	5/15 (a)	10	10
Sweden	5/15 (a)	10	10
Switzerland	5/15	10	10
Tajikistan	10/15	10	10
Turkey	10	10	10
Turkmenistan	10	10	10

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Ukraine	5/15 (b)	10	10
United Arab Emirates	5/15 (a)	10	10
United Kingdom	5/15 (a)	10	10
United States	5/15 (a)	10	10
Uzbekistan	10	10	10
Non-treaty countries	15 (f)	15 (f)	15 (f)

- (a) The lower rate applies to dividends paid to companies owning at least 10% of the payer. The 15% rate applies to other dividends.
- (b) The lower rate applies to dividends paid to companies owning at least 25% of the payer. The 15% rate applies to other dividends.
- (c) The lower rate applies to dividends paid to companies owning at least 20% of the payer. The 15% rate applies to other dividends.
- (d) The lower rate applies to dividends paid to companies owning at least 15% of the payer. The 15% rate applies to other dividends.
- (e) The lower rate applies to dividends paid to companies owning at least 30% of the payer. The 15% rate applies to other dividends.
- (f) For payments to entities registered in tax havens (according to a list), the rate is 20%.

## A. At a glance

Corporate Income Tax Rate (%)	30
Turnover Tax Rate (%)	3 (a)
Capital Gains Tax Rate (%)	5
Branch Tax Rate (%)	37.5
Withholding Tax (%)	
Dividends	10 (b)
Interest	15 (c)
Royalties	20 (d)
Commissions	20 (e)
Management, Professional and Training Fees	20 (f)
Sports and Entertainment Fees	20 (g)
Telecommunication Service Fees	5 (g)
Rent	
Real Estate (Immovable Property)	30 (g)
Equipment	15 (h)
Winnings from Betting and Gaming	20 (i)
Sales of Property or Shares of Stock by Companies in the Oil and Mining Sector	10 (j)

Natural Resource Income	20 (k)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	4 (l)

- (a) This tax applies to taxpayers with annual gross turnover not exceeding KES5 million.
- (b) This rate applies to dividends paid to nonresidents. A 5% rate applies to dividends paid to residents and citizens of other states in the East African Community.
- (c) This rate applies to payments to residents and nonresidents. However, a 25% withholding tax rate applies to interest arising from bearer instruments.
- (d) This rate applies to payments to nonresidents. A 5% withholding tax is imposed on royalties paid to residents.
- (e) This rate applies to payments to nonresidents. For insurance commissions paid to residents, a 5% withholding tax rate applies to payments to brokers and a 10% rate applies to payments to others. The following commissions are exempt from withholding tax:
  - Commissions paid to nonresident agents with respect to flower, fruit or vegetable auctions
  - Commissions paid by resident air transport operators to nonresident agents to secure tickets for international travel
- (f) This rate applies to management, professional and training fees paid to nonresidents. However, for consultancy fees, payments to citizens of other East African Community countries are subject to a reduced withholding tax rate of 15%. For residents, management, professional and training fees are subject to a withholding tax rate of 5%. The resident withholding tax rate for contractual fee payments is 3%.
- (g) This withholding tax applies only to payments to nonresidents.
- (h) This rate applies to rent paid to nonresidents under leases of machinery and equipment. Rent paid to residents under leases of machinery and equipment is exempt from withholding tax.
- (i) This rate applies to payments to residents and nonresidents.
- (j) This rate applies to payments made to residents. Effective from 1 January 2015, the tax is imposed on the net gain. Payments to nonresidents were removed from the scope of the withholding tax, effective from 1 January 2014. However, the licensee or contractor is required to account for tax at 20% of the net gain realized.
- (k) This rate applies to payments to nonresidents. A 5% withholding tax is imposed on natural resource royalties paid to residents.
- (l) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Kenya income tax is payable by companies and by unincorporated organizations and associations (excluding partnerships). Taxable trading income consists of income arising or deemed to arise in Kenya.

**Rates of corporate tax.** The corporate tax rate is 30% for resident companies and 37.5% for nonresident companies. The corporate tax rate for companies newly listed on a securities exchange approved under the Capital Markets Act is reduced to 20% for a five-year period beginning with the tax year following the year of the listing if the company's listed capital is at least 40% of its paid-up share capital.

**Turnover tax.** Turnover tax is imposed on taxpayers with annual gross turnover not exceeding KES5 million. The tax rate is 3% of annual gross turnover. The tax is a final tax. Turnover tax does not apply to rental income, management or professional or training fees, income of incorporated companies or income that is subject to a final withholding tax.

**Administration.** A company's year of assessment (tax year) coincides with its financial accounting year. A change in a financial accounting year must be approved by the Commissioner of Income Tax.

A company must make payments, each equal to 25% of its estimated tax for the year, by the 20th day of the 4th, 6th, 9th and 12th months of its financial accounting year. The estimated tax must equal either 110% of the previous year's tax or 100% of the tax estimated to be due for the current year.

A company must file a self-assessment return within six months after the end of its financial year. It must also file financial statements within six months after the end of its financial year. Late filing of a return is subject to a penalty of 5% of the tax balance. The minimum penalty is KES10,000. The tax on the self-assessment, reduced by installment tax paid, is due within four months after a company's financial year-end. Late payments are subject to a penalty of 20% plus 2% per month (or part of a month) of the tax balance.

**Capital gains.** Effective from 1 January 2015, capital gains tax applies to gains realized by companies and individuals on the transfer of property located in Kenya. The general tax rate is 5%. The gain equals the amount by which the transfer value exceeds the adjusted cost of the property. The adjusted cost is the sum of the cost of acquisition of the property and other costs incurred subsequently to enhance or preserve the property, provided that such costs had not been previously allowed for tax purposes.

**Dividends.** Dividends paid by Kenya companies to resident companies are exempt if the recipient controls at least 12.5% of the distributing company's voting power. Taxable dividend income is subject to a final withholding tax of 10% for nonresidents and 5% for residents.

Compensating tax at the regular corporate rate is levied on dividends paid out of untaxed profits.

**Foreign tax relief.** Relief for foreign taxes paid is granted in accordance with tax treaties with other countries. Foreign tax paid to a country that does not have a tax treaty with Kenya does not qualify as a tax-deductible expense in Kenya.

### C. Determination of trading income

**General.** Taxable income is accounting income adjusted for non-taxable income, such as dividends and capital gains, and for non-deductible expenses such as depreciation. Expenses are deductible if incurred wholly and exclusively in the production of income.

To encourage industrial growth and attract foreign investment, certain special deductions are allowed.

**Inventories.** The normal accounting basis of the lower of cost or net realizable value is generally accepted for tax purposes. In certain circumstances, obsolescence provisions may be challenged.

**Provisions.** Provisions included in computing financial accounting income are generally not deductible for tax purposes.

**Tax depreciation.** Depreciation charged in the financial statements is not deductible for tax purposes. It is replaced by the following tax depreciation allowances.

Asset class	Method	
	Declining-balance (%)	Straight-line (%)
Heavy machinery such as tractors and combines	37.5 (a)	—
Other vehicles such as automobiles, trucks and airplanes	25	—
All other machinery including ships	12.5	—
Specified office equipment such as computers	30	—
Other office equipment	12.5	—
Telecommunication equipment	—	—
Computer software	—	—
Irrevocable right to use fiber optic cable	—	5
Industrial buildings	—	10 (b)
Hotel buildings	—	10 (b)
Hostel, educational and training buildings	—	50 (b)
Commercial and rental residential buildings	—	25 (b)
Farming operations	—	100

- (a) Effective from 1 January 2015, petroleum pipelines are subject to an allowance of 37.5%.
- (b) The rate for the buildings is applied to the capital cost, which is generally the lower of the construction cost or the purchase price, unless purchased from the business entity that constructed the building. To qualify for the above deduction, commercial and rental residential buildings must be provided with roads, power, water sewers and other social infrastructure. In addition, rental residential buildings must be constructed in a planned developed area approved by the Minister responsible for matters relating to housing.

Deduction on capital expenditure incurred under concessionaire arrangements is claimed in equal proportions over the period of the concession.

A 100% investment allowance is granted for capital expenditure on industrial buildings and hotels and on machinery installed on such structures. Licensed local film producers also qualify for a 100% investment allowance with respect to the purchase of film equipment. An investment deduction may be claimed at a rate of 150% if an investment for manufacturing purposes is made outside the city of Nairobi and the municipalities of Mombasa or Kisumu and if the investment value is KES200 million or more.

Capital allowances are subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Amounts recaptured are treated as ordinary income and subject to tax at the regular corporate income tax rate.

**Relief for losses.** Tax deficits (losses) are allowable deductions in the year in which they arise and in the following four years of income. However, companies operating in the extractive industry may carry forward losses indefinitely. Profits and losses arising

from specified sources (rental income, income from agriculture and similar activities, and other profits from business) are computed separately. If a company has a loss in a year from one of the specified sources, the loss may be offset only against subsequent profits derived from the same specified source.

**Groups of companies.** The income tax law does not permit consolidated returns combining the profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on the supply of goods and services in Kenya and on imported goods and services	0/16
Railway Development Levy; imposed on the import value of all imported goods; import value is the Cost, Insurance and Freight value	1.5
Contributions to the National Social Security Fund (NSSF); expatriates who are members of social security schemes in their home countries and those expected to be in Kenya for not more than three years are exempt; contributions are payable monthly by	
Employer (maximum contribution of KES200)	5
Employee (maximum contribution of KES200)	5
(A new NSSF Act was enacted on 24 December 2013. Under the new act, both the employer and employee are required to contribute 6% of the employee's monthly pensionable pay subject to an upper earnings limit based on the national average earnings provided by the Kenya Bureau of Statistics. The contributions are categorized into Tier I and Tier II contributions. Tier I contributions must be remitted to the NSSF, while Tier II contributions may be remitted to a contracted-out (private) scheme. However, these contributions are not yet operational because of an Industrial Court ruling blocking the implementation of the new act.)	

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Central Bank of Kenya imposes certain foreign-exchange regulations.

**Transfer pricing.** The transfer-pricing rules include measures regarding the following matters:

- Entities and transactions to which the rules apply
- Methods that may be used to determine arm's-length prices
- Records regarding transactions that must be maintained

The methods for determining arm's-length prices are consistent with those approved by the Organisation for Economic Co-operation and Development.

**Debt-to-equity rules.** The deductibility of interest on loans and foreign-exchange losses is restricted for a foreign-controlled company with a debt-to-equity ratio exceeding 3:1 (except for companies operating in the extractive industry for which the ratio is 2:1). For purposes of the ratio, debt includes any form of indebtedness for which the company is incurring interest, a financial charge, a discount or a premium. Interest-free loans provided or secured by nonresidents are deemed to accrue interest at a rate equal to the average 91-day Treasury Bill rate.

## F. Treaty withholding tax rates

<b>Payee resident in</b>	<b>Dividends %</b>	<b>Interest %</b>	<b>Royalties/ management and professional fees %</b>
Canada	15	15	15
Denmark	20	20 (a)	20
France	10	12	0 (f)
Germany	15	15 (a)	15
India	15	15	20 (d)
Mauritius (g)	5 (h)	10	0 (f)
Norway	15	20 (a)	20
Sweden	15	15	20
United Kingdom	15	15 (a)	15 (b)
Zambia	0 (c)	15	20
Non-treaty countries	10	15	20 (e)

- (a) Interest paid by the government and the Central Bank of Kenya is tax-exempt.  
 (b) The rate is 12.5% for management and professional fees.  
 (c) No Kenya tax is due if the dividend is subject to tax in Zambia.  
 (d) The rate is 17.5% for management and professional fees.  
 (e) The withholding tax rate is 15% for consultancy fees paid to residents of other East African Community countries.  
 (f) The rate is 10% for royalties.  
 (g) The Mauritius treaty is expected to enter into force on 1 January 2015.  
 (h) This rate applies if the beneficial recipient of the dividend owns at least 10% of the share capital in the Kenyan company. The rate is 10% in all other cases.

**A. At a glance**

Corporate Income Tax Rate (%)	22 (a)(b)
Capital Gains Tax Rate (%)	22 (a)(b)(c)
Branch Income Tax Rate (%)	22 (a)(b)
Branch Profits Tax Rate (Additional Tax) (%)	— (d)
Withholding Tax (%)	
Dividends	0 (e)
Interest	14 (b)(e)
Royalties from Patents, Know-how, etc.	0 (e)
Net Operating Losses (Years)	
Carryback	1 (f)
Carryforward	10

- (a) This is the maximum rate (see Section B).
- (b) Local income tax (formerly referred to as resident surtax) is also imposed at a rate of 10% of corporate income tax payable before offsetting tax credits and exemptions (see Section D).
- (c) Capital gains are included in ordinary taxable income for corporate tax purposes.
- (d) This tax is imposed on income that is remitted or deemed to be remitted by a Korean branch of a foreign corporation. The branch profits tax may be payable if the foreign company is resident in a country with which Korea has entered into a tax treaty and if the treaty requires the imposition of a branch profits tax. For a list of these countries and the rates of the tax, see Section B. The branch profits tax is imposed in addition to the income tax imposed on branches.
- (e) For payments to domestic corporations and foreign corporations with a place of business in Korea. For withholding rates applicable to payments to foreign corporations that do not have a place of business in Korea, see Section B.
- (f) Only small and medium-sized enterprises are entitled to carry back losses.

## B. Taxes on corporate income and gains

**Corporate income tax.** Korean domestic corporations are taxed on their worldwide income, including income earned by their foreign branches. A domestic corporation is one that has its head office in Korea. Foreign corporations are taxed on Korean-source income only.

**Rates of corporate income tax.** The rates are indicated below.

*Domestic corporations.* Corporate income tax is imposed at a rate of 10% on taxable income up to KRW200 million, at a rate of 20% on taxable income in excess of KRW200 million up to KRW20 billion, and at a rate of 22% exceeding KRW20 billion. Local income tax (formerly referred to as resident surtax), equal to 10% of corporate income tax payable before offsetting tax credits and exemptions, is also imposed (see Section D), resulting in an effective tax rate of 24.2% on taxable income exceeding KRW20 billion if no tax credits and exemptions are available.

*Accumulated earnings tax.* Effective from 1 January 2015, Korean domestic large corporations with equity capital (total assets minus total liabilities) of KRW50 billion or more and Korean corporations that are members of an enterprise group with restrictions on cross shareholding are taxed on their excess earnings at a rate of 10% in addition to the above corporate income tax.

Excess earnings are calculated by applying one of two methods. Under Method A, excess earnings equal 80% of adjusted taxable income less amounts spent on investment, salary and wages increases, dividends and certain other items. Under Method B, the calculation is the same except that a 30% percentage is applied. The computation of adjusted taxable income differs based on the applied method. The only difference is that adjusted taxable income under Method A includes the add-back of depreciation and amortization expenses relating to the amount spent on the investment.

*Foreign corporations with a domestic business operation.* The same tax rates as those for domestic corporations apply.

A Korean branch of a foreign corporation is also subject to a branch profits tax, which may be imposed if the foreign company is resident in a country with which Korea has entered into a tax treaty and if the treaty requires the imposition of a branch profits tax. Companies resident in the following countries are subject to the branch profits tax at the rates indicated, which include the resident surtax.

Country	Rate (%)
Australia	15
Brazil	15
Canada	5
France	5
Indonesia	10
Kazakhstan	5
Morocco	5
Panama	2
Peru	10
Philippines	11
Thailand	10

*Foreign corporations without a domestic business operation.* A foreign corporation that does not have a domestic business place (that is, a “permanent establishment”) in Korea is subject to the following withholding tax rates on its Korean-source income (unless other rates apply under a tax treaty).

Type of income	Rate
Leasing income from vessels, aircraft, heavy equipment and other assets, and business income	2%
Personal services income	20%
Interest on bonds	14%
Interest on items other than bonds, dividends, royalties and other income	20%
Gain from transfer of securities or shares	Lesser of 10% of the gross sales price and 20% of net gain

Local income surtax (formerly referred to as resident surtax) at a rate of 10% is imposed in addition to the above rates.

*Domestic place of business.* A foreign corporation that has any of the following fixed operations in Korea is deemed to have a domestic place of business:

- A branch, office or any other business office
- A store or any other fixed sales place
- A workshop, factory or warehouse
- A construction site or place of installation or assembly, which exists for more than six months
- A place where services are rendered through employees for more than six months during a consecutive 12-month period or a place where services are rendered recurrently or repeatedly through employees over a period of two years or more
- A mine, quarry or other location for natural resources exploitation

A fixed place of business does not include the following:

- A purchasing office
- A storage or custody area for property that cannot be sold
- An office involved in advertising, public relations, collecting and furnishing information, market survey, and other preparatory or auxiliary activities
- The place to maintain an asset belonging to the enterprise solely for the purpose of processing by another enterprise

A foreign corporation that does not have a fixed place of business in Korea may be considered to have a domestic place of business if it operates a business through a person in Korea authorized to conclude contracts or perform similar activities on its behalf.

*Tax Incentives Limitation Law.* The Tax Incentives Limitation Law (TILL) grants tax incentives to foreign investors approved by the Ministry of Strategy and Finance. The following are the most commonly applied incentives among foreign-invested companies:

- High technology tax incentive
- Individual-type Foreign Investment Zone (FIZ) tax incentive
- Free Economic Zone (FEZ) tax incentive

Under the high technology tax incentive and individual-type FIZ tax incentive, beginning with their first profitable year, companies are exempt from corporate income tax on their qualified income for five years and benefit from a 50% tax reduction on such income for the following two years. For companies that do not earn a profit in the first five years, the tax exemption begins in the sixth year. For investments made in FEZs, a tax exemption applies for the first three years and a 50% tax reduction applies for the following two years. The percentage of income qualifying for the above tax incentives corresponds to the percentage of shares owned by foreign investors in the company.

Depending on the type of investment, exemptions or reductions may apply to other taxes, including acquisition tax, property tax, and value-added tax, special excise tax and customs duty on imported capital goods.

**Capital gains.** Capital gains are included in ordinary taxable income for corporate tax purposes.

**Administration.** A corporation must file a tax return within three months after the end of its fiscal year. In general, tax due must be paid at the time of submitting the tax return. However, if tax liability exceeds KRW10 million, the tax due may be paid in installments.

**Dividends.** A corporation must include dividends received in taxable income. However, dividends received by a domestic corporation from another domestic corporation are deductible from taxable income according to a formula provided in the measure entitled "Dividends Received Deduction."

**Foreign tax relief.** A tax credit is allowed for corporate taxes paid to a foreign government. The foreign tax credit relief is limited to the lesser of the tax paid abroad or the Korean tax amount multiplied by the ratio of income from foreign sources to total taxable income. If a company has places of business abroad in two or more countries, it can only determine the foreign tax credit limitation on a country-by-country basis for each country individually. If the amount of the foreign tax credit is limited by this rule, the excess foreign tax paid over the limitation may be carried forward for up to five tax years. Alternatively, the corporate tax paid to a foreign government may be claimed as a tax deduction (the deduction method).

### C. Determination of trading income

**General.** The tax law defines the specific adjustments that are required in computing taxable income. If not specified by law, the accrual basis is applied.

**Inventories.** A corporation must select and notify the tax office of its basis for the valuation of inventories on its first annual income tax return. It may select the cost method or the lower of cost or market value method. The cost method may be applied using any of the following methods:

- First-in, first-out (FIFO)
- Last-in, first-out (LIFO)

- Moving average
- Total average
- Individual costing (specific identification)
- Retail

If a corporation fails to notify the tax office, it must use FIFO for tax purposes.

### **Reserves**

*Reserves for employee retirement allowance.* Under the Korean Labor Standard Law, employees with one year or more of service are entitled to a retirement allowance equal to 30 days' salary or more for each year of service on termination of employment. Reserves for retirement allowances are permitted, up to 5% of the total amount of wages paid to employees who are eligible for payment of a retirement allowance. However, the accumulated amount of the reserves is limited to no more than 10% of the estimated retirement allowances payable to all employees assuming that they retire on the closing date of the business year.

A company may claim a tax deduction for the remainder of the estimated retirement allowances by funding the portion of the reserve in excess of the tax-deductible limit. The permitted funding methods specified by the tax law include the depositing of an amount equal to the excess portion in a retirement pension account with qualified institutions, such as insurance companies, banks and the Korea Workers' Compensation and Welfare Service.

*Bad debt reserve.* A corporation is allowed to set up a reserve for bad debts. The maximum amount of the reserve is the greater of the following:

- 1% of the book value of receivables at the end of the accounting period
- Historical bad-debt ratio multiplied by the book value of receivables at the end of the accounting period

However, for financial institutions, the maximum amount of the reserves is the greatest of the following:

- The amount to be accumulated based on reserve guidelines issued by the Financial Services Commission in consultation with the Ministry of Strategy and Finance
- 1% of the book value of the receivables at the end of the accounting period
- Historical bad-debt ratio multiplied by the book value of receivables at the end of the accounting period

**Depreciation and amortization.** In general, corporations may depreciate tangible fixed assets using the straight-line, declining-balance or unit-of-production (output) depreciation methods. However, buildings and structures must be depreciated using the straight-line method. Intangible assets must be amortized using the straight-line method. A corporation must select from among the depreciation methods and useful lives specified in the tax law and notify the tax office of its selections in its first annual income tax return. Otherwise, the depreciation method and useful life designated in the tax law for the respective class of asset are applied. The following are the statutory rates of depreciation under the declining-balance method and useful lives for certain types of assets.

Asset	Annual depreciation rate under declining-balance method (%)	Years of useful life
Commercial buildings	—	20 or 40
Industrial buildings	—	20 or 40
Office equipment	45.1	5
Motor vehicles	45.1	5
Plant and machinery	45.1 to 14	5 to 20

**Relief for losses.** Tax losses can be carried forward for 10 years. Small and medium-sized enterprises may carry back losses one year.

**Groups of companies.** A consolidated tax return is available for a group containing a parent company and its 100%-owned subsidiaries. The consolidated tax return allows losses of group companies to be offset against profits of other group companies. After the parent company elects tax consolidation, it must maintain the consolidation for five fiscal years (including the first fiscal year of tax consolidation) and apply the consolidation to all 100%-owned subsidiaries.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Local income tax; levied on corporate taxable income	
Taxable income up to KRW200 million	1
Taxable income in excess of KRW200 million up to KRW20 billion	2
Taxable income exceeding KRW20 billion	2.2
(The above rates result in a local income tax rate of 10% of corporate income tax payable before offsetting tax credits and exemptions.)	
Value-added tax	
Standard rate	10
Acquisition tax, including surtax, on land, buildings, ships, automobiles and heavy equipment	Various
Registration license tax, including local education surtax	
Normal rate on registration of incorporation	0.48
Registration of incorporation in the Seoul metropolitan area	1.44
Payroll taxes, including local income surtax, on salaries and wages	6.6 to 41.8

#### E. Transfer pricing

Korea has transfer-pricing rules. The acceptable transfer-pricing methods include comparable uncontrolled price, resale price, cost-plus, profit-split, the transactional net margin method (TNMM) and other reasonable methods designated by the tax law. It is possible to reach transfer-pricing agreements in advance with the tax authorities.

Carryforward	7

- (a) Insurance institutions operating in Kosovo are subject to tax at a rate of 5% on the gross premiums accrued during the tax period.
- (b) Interest on financial instruments issued or guaranteed by a public authority of Kosovo are exempt from tax.
- (c) This withholding tax applies to payments to residents and nonresidents.
- (d) This withholding tax applies to payments to nonresidents.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in Kosovo are companies that are established in Kosovo or have their place of effective management in Kosovo. Kosovo-resident companies are subject to corporate income tax on their worldwide income. Foreign companies are subject to tax on profits generated from activities performed through a permanent establishment in Kosovo and on income from Kosovo sources.

**Rate of corporate income tax.** The rate of corporate income tax in Kosovo is 10%.

Insurance institutions operating in Kosovo are subject to tax at a rate of 5% on the gross premiums accrued during the tax period.

**Capital gains and losses.** Capital gains derived from the disposal of capital assets, including real estate and shares, are subject to tax at the standard rate of 10%, together with operating income. Capital losses are deductible for tax purposes. Capital gains derived by a foreign company that does not have a permanent establishment in Kosovo to which such capital gains are attributable are not subject to tax in Kosovo.

**Administration.** The tax year is the calendar year.

Taxpayers must make quarterly advance payments of corporate income tax no later than 15 days after the close of each calendar quarter.

Taxpayers with annual gross income from business activities of up to EUR50,000 that do not keep books and records must make the following quarterly payments:

- Three percent of each quarter's gross income from trade, transport, agriculture and similar economic activities, but not less than EUR37.50 per quarter
- Five percent of each quarter's gross income from professional, vocational and entertainment services and similar activities, but not less than EUR37.50 per quarter

Taxpayers with annual gross income from business activities in excess of EUR50,000 and taxpayers that keep books and records (including partnerships and groups of persons) must make the following advance payments for each calendar quarter:

- For the first quarter, 25% of the total tax liability for the current tax period based on estimated taxable income, reduced by any amount of tax withheld
- For the second and subsequent tax quarters, one-fourth of 110% of the total tax liability for the tax period immediately preceding the current tax period, reduced by any amount of tax withheld

By 31 March, taxpayers with annual turnover in excess of EUR50,000 and taxpayers that keep books and records must file an annual tax return and pay the corporate tax due for the tax year less advance payments made.

Taxpayers not complying with the filing and payment deadlines described above are subject to interest and penalties. No penalty is applied if the difference between the amount due and the advance payments made is not greater than 10%.

Late filing of the corporate income tax return is subject to a penalty of 5% of the tax due for each month of delay, capped at 25% of the unpaid tax liability.

Late payment of a tax liability results in a penalty amounting to 1% of tax due for each month or part of the month in delay, up to a maximum of 12 months.

The penalties do not apply cumulatively. Instead, the late payment penalty begins to apply to the extent that the unpaid liability is not paid by the time the late filing penalty reaches its ceiling.

In addition, interest may apply on such penalties if the underlying tax liability remains unpaid for more than 120 days. Such interest accrues at a rate that is 0.5 percentage point higher than the inter

bank lending interest rate in Kosovo after a notice is issued to the taxpayer, starting from the first day of the month following the 120-day period.

Erroneous completion of a tax filing or of a tax refund claim is subject to a penalty of 15% of the undeclared tax liability or the excess tax refund claimed if such understatement or overstatement is 10% or less of such tax, or to a 25% penalty if the understatement or overstatements is more than 10% of such tax.

**Dividends.** Dividends received by resident and nonresident companies are exempt from corporate income tax.

**Foreign tax relief.** Foreign direct tax on income and gains of a Kosovo resident company may be credited against the corporate tax on the same profits. The foreign tax relief cannot exceed the Kosovo corporate income tax charged on the same profits. If a company receives income from a country with which Kosovo has entered into a double tax treaty, other forms of foreign tax relief may apply, as stipulated in the provisions of the treaty.

### C. Determination of trading income

**General.** For taxpayers with an annual turnover exceeding EUR50,000 and taxpayers that keep books and records, the assessment of trading income is based on the financial statements prepared in accordance with the generally accepted accounting principles; International Financial Reporting Standards for large, medium and small business organizations; and Kosovo Accounting Standards for microenterprises, subject to certain adjustments for tax purposes.

All necessary and reasonable expenses incurred wholly and exclusively for the business activity that are properly documented are deductible, including health insurance premiums paid on behalf of employees and their dependents, but excluding, among others, the following:

- Fines and penalties and interest related to them
- Losses from sales or exchanges of property between related persons
- Voluntary pension contributions made by employers above a maximum amount of 15% of an employee's gross salary

Other types of expenses may be deducted up to a ceiling. These expenses include, but are not limited to, the following:

- Training expenses are deductible up to EUR1,000 per employee in a tax period.
- Fifty percent of representative and entertainment expenses are deductible, up to 2% of annual turnover.
- Contributions made for humanitarian, health, education, religious, scientific, cultural, environmental protection and sports purposes are deductible up to a maximum of 5% of taxable income before deducting such contributions.

**Inventories.** The inventory valuation rules stipulated in the accounting law also apply for tax purposes. Inventory is valued at historical cost, which is determined by using the weighted average, first-in, first-out (FIFO) or other specified methods. The method must be applied in the year in which it has been selected and for at least three additional tax periods. Changes in the method after such period are subject to an ad hoc ruling from the Kosovo tax administration.

**Provisions.** Companies may not deduct provisions, except for certain levels of provisions and special reserve funds of financial institutions as specified by the Central Bank of Kosovo.

**Tax depreciation.** Tangible property is depreciated separately for tax purposes using the straight-line method at the rates mentioned below.

Buildings and other constructed structures are depreciated at a rate of 5%.

Vehicles, computers and information systems, office furniture and equipment, instruments and livestock are depreciated at a rate of 20%.

Plant and machinery, trains, airplanes, ships, trees and all other tangible assets are depreciated at a rate of 10%.

Acquisition costs for assets amounting up to EUR1,000 are deducted in full from business income in the current year.

All assets with an acquisition value between EUR1,000 and EUR3,000 are depreciated in a single asset pool at a rate of 20%.

Intangible assets, including patents, copyrights, licenses for drawings and models, contracts, and franchises, are amortized for tax purposes using the straight-line method over the useful life of the asset.

Exploration and development costs incurred for the extraction of natural resources and interest attributable to such costs are capitalized and amortized at the following coefficient:

$$\text{Amortization coefficient} = \frac{\text{Quantity of minerals extracted during the year}}{\text{Total estimated quantity in deposit}}$$

**Relief for losses.** Losses may be carried forward for seven consecutive years. However, if a change in the ownership of the company of more than 50% occurs, the remaining losses are forfeited. Loss carrybacks are not allowed.

**Groups of companies.** Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; exempt supplies include supply of land, welfare, financial services and insurance	
Standard rate	16
Exports of goods and international transport	0
Real estate property tax; imposed on the taxable value of the property; for residential properties, the taxable value is the appraised value of property after the principal residence deduction amounting to EUR10,000	0.05 to 1
Mandatory social security contributions on monthly salary paid by	
Employer	5
Employee	5

Nature of tax	Rate (%)
Excise duties imposed on specified goods (tobacco products, natural mineral and non-carbonated water, alcoholic beverages, petrol, diesel, kerosene, fuels, lubricants, gas, cars and other motor vehicles, used tires, electric bulbs, and plastic bags); the tax is calculated as a specific amount per unit	Various

## E. Miscellaneous matters

**Foreign-exchange controls.** Kosovo has a free foreign-exchange market. Since 2002, the euro (EUR) has been the official currency in Kosovo. All entities must properly document all of their money transfers to comply with the regulations of the Central Bank of Kosovo. No limits are imposed on the amount of foreign currency that may be brought into Kosovo. Hard-currency earnings may be repatriated after the deduction of any withholding tax.

**Transfer pricing.** Kosovo corporate tax law contains transfer-pricing rules. Under these rules, the tax authorities may adjust the prices applied in transactions with related parties if they substantiate that the prices applied deviate from the arm's-length standard. Taxpayers must maintain sufficient supporting documentation to show that the prices applied in transactions with related parties are in line with the arm's-length principle and to justify the transfer-pricing method used in determining such prices. Organisation for Economic Co-operation and Development transfer-pricing methods are acceptable. However, the traditional transactional pricing methods are preferred over the transactional profit methods, which can be used only if the traditional methods are not the most appropriate ones and if the tax authorities approve the use of a transactional profit method.

## F. Treaty withholding tax rates

The withholding tax rates in Kosovo's tax treaties are shown in the following table.

	Dividends %	Interest %	Royalties %
Albania	10	10	10
Belgium (b)	10	10	10
Finland (b)	5/10 (a)	0	10
Germany (b)	10	0	10
Hungary (c)	0/5 (a)	0	0
Macedonia	0/5 (a)	10	10
Netherlands (b)	5/10 (a)	0	10
Slovenia (c)	5/10 (a)	5	5
Turkey	5/10 (a)	10	10
United Kingdom (b)	5/10 (a)	10	10
Non-treaty countries	0	10	10

(a) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.

(b) Kosovo honors the treaties entered into by the former Republic of Yugoslavia with respect to these countries.

(c) This treaty enters into force on 1 January 2015.

Kosovo has signed a tax treaty with the Czech Republic, which has not yet been ratified by the Czech Republic.

Carryforward	3 (e)

- (a) Under Law No. 2 of 2008, for fiscal years beginning after 3 February 2008, the tax rate is a flat 15%. Before the approval of this new law, Amiri Decree No. 3 of 1955 had provided that the maximum tax rate was 55%. The maximum rate under Law No. 23 of 1961, which applies to profits derived from the operations in the Divided Neutral Zone, is 57%. For further details, see Section B.
- (b) This rate applies only to dividends distributed by companies listed on the Kuwait Stock Exchange (see Section B).
- (c) Under Article 2 of the Bylaws, income derived from the granting of loans by foreign entities in Kuwait is considered to be taxable income in Kuwait, which is subject to tax at a rate of 15%. Previously, foreign banks that solely granted loans in Kuwait were not taxed on the interest income received with respect to these loans.
- (d) This income is treated as ordinary business income and is normally assessed on a deemed profit ranging from 98.5% to 100%.
- (e) Article 7 of the Bylaws provides that losses can be carried forward for a maximum of three years (as opposed to an unlimited period under the prior tax law) if the entity has not ceased its operations in Kuwait.

## B. Taxes on corporate income and gains

**Corporate income tax.** Foreign “bodies corporate” are subject to tax in Kuwait if they carry on a trade or business in Kuwait, directly or through an “agent” (see below), in the islands of Kubr,

Qaru, and Umm Al Maradim or in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia. Kuwaiti-registered companies wholly owned by Kuwaitis and companies incorporated in Gulf Cooperation Council (GCC) countries that are wholly owned by GCC citizens are not subject to income tax. The members of the GCC are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and United Arab Emirates.

The term “body corporate” refers to an association that is formed and registered under the laws of any country or state and is recognized as having a legal existence entirely separate from that of its individual members. Partnerships fall within this definition.

Law No. 2 of 2008 includes a definition of an “agent.” Under this definition, an “agent” is a person authorized by the principal to carry out business, trade or any activities stipulated in Article 1 of the law or to enter into binding agreements with third parties on behalf and for the account of the person’s principal. A foreign principal carrying on business in Kuwait through an agent (as defined in the preceding sentence) is subject to tax in Kuwait.

Foreign companies carrying on a trade or business in Kuwait are subject to income tax under Amiri Decree No. 3 of 1955 and its amendments contained in Law No. 2 of 2008.

Foreign companies carrying on a trade or business in the islands of Kubr, Qaru and Umm Al Maradim are subject to tax in Kuwait under Law No. 23 of 1961.

Foreign companies carrying on a trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of the taxable profit under Law No. 23 of 1961. In practice, the tax department computes the tax on the total income of the taxpayer and expects that 50% of such tax should be settled in Kuwait. Many taxpayers are currently contesting this practice. Law No. 2 of 2008 and Law No. 23 of 1961 differ primarily with respect to tax rates.

Foreign companies can operate in Kuwait either through an agent or as a minority shareholder in a locally registered company. In principle, the method of calculating tax is the same for companies operating through an agent and for minority shareholders. For minority shareholders, tax is levied on the foreign company’s share of the profits (whether or not distributed by the Kuwaiti company) plus any amounts receivable for interest, royalties, technical services and management fees.

**Tax rates.** Under Law No. 2 of 2008, the tax rate is 15%,

The following are the tax rates under Law No. 23 of 1961.

Taxable profits		Rate (%)
Exceeding (KWD)	Not exceeding (KWD)	
0	500,000	20
500,000	—	57

**Investment incentives.** Kuwait offers the investment incentives described below.

*Industry Law.* To encourage investments in local industrial undertakings, Industry Law No. 56 of 1996 offers the following incentives:

- Reduced import duties on equipment and raw materials
- Protective tariffs against competing imported goods
- Low-interest loans from local banks
- Export assistance
- Preferential treatment on government supply contracts

*Law for the Promotion of Direct Investment in the State of Kuwait.* The Law for the Promotion of Direct Investment in the State of Kuwait (PDISK; Law No. 116 of 2013) was published in the Kuwait Official Gazette on 16 June 2013 and took effect six months from the date of issuance (that is, in December 2013). PDISK replaced the Direct Foreign Capital Investment Law (DFCIL; Law No. 8 of 2011). The new law calls for the establishment of the Kuwait Direct Investment Promotion Authority, which will take over from its predecessor, the Kuwait Foreign Investment Bureau. The new authority will be part of the Ministry of Commerce and Industry.

The Executive Regulations to the PDISK were issued on 14 December 2014 through Ministerial Decision No. 502 of 2014.

The PDISK adopts a negative-list approach to determine the applicability of the law. Under this approach, the PDISK provides a list of business activities and sectors that are not eligible for benefits under it. All business sectors and activities not on the negative list are entitled to the benefits of the PDISK. The PDISK maintains the current incentives for investors including, but not limited to, the following:

- Tax incentives for a maximum period of 10 years from the date of commencement of the licensed entity
- Customs duty exemptions for the importation of materials and equipment if the material and equipment is held for a period of five years from the date of obtaining the incentive
- Protection from Kuwaitization requirements
- Allocation of land and real estate to investors

In addition, PDISK provides that all foreign investors may take advantage of double tax treaties and other bilateral treaty benefits.

In addition to a 100% foreign-owned Kuwaiti company, PDISK introduces two new types of investment entities, which are a licensed branch of a foreign entity and a representative office. The representative office may only prepare marketing studies and may not engage in any commercial activity.

*Kuwait Free Trade Zone.* To encourage exporting and re-exporting, the government has established the Kuwait Free Trade Zone (KFTZ) in the vicinity of the Shuwaikh port. The KFTZ offers the following benefits:

- Up to 100% foreign ownership is allowed and encouraged.
- All corporate and personal income is exempt from tax.
- All imports into and exports from the KFTZ are exempt from tax.
- Capital and profits are freely transferable outside the KFTZ and are not subject to any foreign-exchange controls.

*Public Private Partnership Law.* The Public Private Partnership Law (Law No. 116 of 2014), which was published in the *Official Gazette* on 17 August 2014, provides incentives for investors in private public partnership projects including exemptions from

income tax and other taxes, customs duties and other fees. The new law also improves corporate governance and investment security by providing protection for the intellectual property rights of a concept or idea originator.

**Capital gains.** Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at the rates stated above.

Article 1 of Law No. 2 of 2008 and Article 8 of the Bylaws provide for a possible tax exemption for profits generated from dealing in securities on the Kuwait Stock Exchange (KSE), whether directly or through investment portfolios. However, no further clarifications have been provided regarding the definitions of “profits” and “dealing.”

**Administration.** The calendar year is generally used for Kuwaiti tax purposes, but a taxpayer may request in writing for permission to prepare financial statements for a year ending on a date other than 31 December. For the first or last period of trading or carrying on a business, a taxpayer may be allowed to file a tax declaration covering up to 18 months.

Accounting records should be kept in Kuwait, and it is normal practice for the tax authorities to insist on inspecting the books of account (which may be in English) and supporting documentation before agreeing to the tax liability.

The tax authorities have issued notifications restating the requirement that taxpayers comply with Article 13 and Article 15 of the Bylaws, which relate to the preparation of books and accounting records and the submission of information together with the tax declaration.

Article 13 requires that taxpayers enclose the prescribed documents, such as the trial balance, list of subcontractors, list of fixed assets and inventory register, together with the tax declaration.

Article 15 requires that taxpayers prepare the prescribed books of accounts, such as the general ledger and the stock list.

The tax authorities recently issued Executive Rules for 2013, which are effective for fiscal years ending on or after 31 December 2013. These rules require analyses of contract revenues, tax retentions, expenses, depreciation rates and provisions included in the tax declaration. In addition, they require that these analyses and the financial statements contain comparative figures for the preceding year.

In the event of non-compliance with the above regulations, the Department of Income Taxes (DIT) may finalize an assessment on a basis deemed reasonable by the DIT. The Bylaws provide that a taxpayer must register with the DIT within 30 days after signing its first contract in Kuwait. The prior tax law did not specify a period. In addition, a taxpayer is required to inform the Ministry of Finance (MOF) of any changes that may affect its tax status within 30 days after the date of the change. The taxpayer must also inform the MOF of the cessation of activity within 30 days after the date of cessation.

Under the Bylaws, a new system of tax cards is introduced. All taxpayers are issued tax cards that are renewable annually. All government departments and public authorities are prohibited from dealing with companies that do not hold an active tax card. The information required to be included in the tax card application form is generally the information that is provided to the MOF at the time of registration. Currently, applications for tax cards are being accepted and the MOF is updating its database.

A tax declaration must be filed on or before the 15th day of the 4th month following the end of the tax period (for example, 15 April in the case of a 31 December year-end). Tax is payable in 4 equal installments on the 15th day of the 4th, 6th, 9th and 12th months following the end of the tax period, provided that the tax declaration is submitted on or before the due date for filing. The Bylaws provide that a request for extension of time for the filing of the tax declaration must be submitted to the DIT by the 15th day of the 2nd month (the 3rd month under the prior law) after the fiscal year-end. The maximum extension of time that may be granted is 60 days (75 days under the prior law).

In the event of a failure to file a tax declaration by the due date, a penalty that equals 1% of the tax for each 30 days or fraction thereof during which the failure continues is imposed. In addition, in the event of a failure to pay tax by the due date, a penalty that equals 1% of the tax payment for each period of 30 days or fraction thereof from the due date to the date of the settlement of the tax due is imposed.

The tax authorities recently issued Circular No. 1 of 2014. This Circular applies to all taxpayers filing tax declarations after the issuance of the Circular.

If tax declarations are prepared on an actual-accounts basis, the Circular requires that they be prepared in accordance with the tax laws and the Executive Rules issued by the tax authorities. For these types of declarations, the Circular also requires the submission of a draft income and expense adjustment (self-assessment) computed in accordance with the last assessment finalized by the tax authorities within three months after the date of submission of the tax declaration.

If tax declarations are prepared on a deemed-profit basis, the Circular requires that the percentage applied in the tax declaration be the same as the percentage that was applied in the last assessment. It also requires that details regarding all subcontractors and certain supporting documents be provided together with the tax declaration.

Articles 24 to 27 of the Bylaws provide for the filing of objections and appeals against tax assessments.

Article 24 of the Bylaws provides that an objection may be filed against an assessment within 60 days after the date of the assessment. The tax department must consider and issue a revised assessment within 90 days from the date of filing of the objection. If the department fails to issue a revised assessment during this period, the objection is considered to be rejected.

The Bylaws allow companies to submit a revised tax declaration if a tax assessment has not yet been issued by the DIT.

If the DIT accepts the amended tax declaration, the date of filing of the revised tax declaration is considered to be the actual date of filing the declaration for the purpose of imposing delay fines.

Law No. 2 of 2008 introduced a statute of limitation period of five years into the tax law. The prior Kuwait tax law did not provide a statute of limitations for tax. However, under Article No. 441 of the Kuwait Civil Law, any claims for taxes due to Kuwait or applications for tax refunds may not be made after the lapse of five years from the date on which the taxpayer is notified that tax or a refund is due.

Article 13 of the Bylaws provides that companies that may not be subject to tax based on the application of any tax laws or other statutes or based on double tax treaties must submit tax declarations in Kuwait.

**Dividends.** Under the prior tax law, no tax was imposed on dividends paid to foreign shareholders by Kuwaiti companies. However, tax was assessed on the share of profits attributable to foreign shareholders according to the audited financial statements of the company, adjusted for tax purposes.

Under Law No. 2 of 2008, dividends received by the investors in companies listed on the KSE are subject to a 15% withholding tax. The tax must be withheld by the foreign investor's custodian or broker in Kuwait. The MOF requires the local custodian or broker of the foreign investor to provide information about the foreign investor, deduct 15% tax on payments of dividends to the foreign investor and deposit the tax with the MOF.

100% GCC-owned investors are also subject to withholding tax in Kuwait by local custodians or brokers until they are able to obtain a tax clearance certificate indicating that they are not subject to tax in Kuwait.

The MOF recently issued forms to allow 100% GCC-owned investors and investors from countries with which Kuwait has a double tax treaty to obtain a tax-clearance certificate for exemption or reduction of withholding tax on dividends received from companies listed on the KSE.

An entity that wants to claim a lower withholding tax rate in accordance with a tax treaty needs to approach the MOF and apply for a refund.

Article 46 of the Bylaws provides that investment companies or banks that manage portfolios or funds or act as custodians of listed shares for foreign entities must withhold corporate tax due from amounts paid to such foreign entities. The amount withheld must be deposited within 30 days after the date of withholding, together with a list showing the names of the foreign entities and the amounts of corporate tax withheld. The DIT requires investment companies or banks that manage portfolios or funds to comply with this rule.

However, foreign shareholders in unlisted Kuwaiti companies continue to be assessed on the share of profits attributable to foreign shareholders according to the audited financial statements of the company, adjusted for tax purposes.

### C. Determination of trading income

**General.** Tax liabilities are generally computed on the basis of profits disclosed in audited financial statements, adjusted for tax depreciation and any items disallowed by the tax inspector on review.

The tax declaration, supporting schedules and financial statements, all of which must be in Arabic, are to be certified by an accountant in practice in Kuwait who is registered with the Ministry of Commerce and Industry.

**Foreign-currency exchange gains and losses.** Under Executive Rule No. 37 of 2013, gains and losses on foreign currency conversion are classified into realized gains and losses and unrealized gains and losses.

Realized gains and losses resulting from the fluctuation of exchange rates are considered taxable gains and allowable losses if the taxpayer can substantiate the basis of the calculations and provides documents in support of such transactions.

Unrealized gains are not considered to be taxable income, and unrealized losses are not allowed as deductible expenses.

**Design expenses.** Under Executive Rule No. 26 of 2013 (applicable for fiscal years ending on or after 31 December 2013), costs incurred for engineering and design services provided are restricted to the following percentages:

- If design work is carried out in the head office, 75% (previously 75% to 80%) of the design revenue is allowed as costs.
- If design work is carried out by an associated company, 80% (previously 80% to 85%) of the design revenue is allowed as costs, provided the company complies with the regulations for retention of 5% and submission of the contract with the associated company to the DIT.
- If design work is carried out by a third party, 85% (previously 85% to 90%) of the design revenue is allowed as costs, provided the company complies with the regulations for retention of 5% and submission of the contract with the third company to the DIT.
- If the design revenue is not specified in the contract, but design work needs to be executed outside Kuwait, tax authorities may use the following formula to determine the revenue:

$$\text{Design revenue for the year} = \frac{\text{Design costs for the year} \times \text{annual contract revenue}}{\text{Total direct costs for the year}}$$

**Consultancy costs.** Under Executive Rule No. 26 of 2013, costs incurred for consultancy costs incurred outside Kuwait are restricted to the following percentages:

- If consultancy work is carried out in the head office, 70% (previously 75% to 80%) of the consultancy revenue is allowed as costs.
- If consultancy work is carried out by an associated company, 75% (previously 75% to 80%) of the consultancy revenue is allowed as costs if the company complies with the regulations for the 5% retention on payments and the submission of the contract with the associated company to the DIT.

- If consultancy work is carried out by a third party, 80% (previously 80% to 85%) of the consultancy revenue is allowed as costs if the company complies with the regulations relating to the 5% retention and the submission of the contract with the third party to the DIT.
- If the consultancy revenue is not specified in the contract, but consultancy work needs to be executed outside Kuwait, the tax authorities may use following formula to determine the revenue:

$$\text{Consultancy revenue for the year} = \frac{\text{Consultancy costs for the year} \times \text{annual contract revenue}}{\text{Total direct costs for the year}}$$

**Imported material costs.** Under Executive Rule No. 25 of 2013, the Kuwaiti tax authorities deem the following profit margins for imported materials and equipment:

- Imports from head office: 15% of related revenue (previously 10% to 15%)
- Imports from related parties: 10% of related revenue (previously 6.5% to 10%)
- Imports from third parties: 6.5% of related revenue (previously 3.5% to 6.5%)

The imputed profit described above is normally subtracted from the cost of materials and equipment claimed in the tax declaration. If the revenue from the materials and equipment supplied is identifiable, the DIT normally reduces the cost of such items to show a profit on such materials and equipment in accordance with the percentages described above. If the related revenue from the materials and equipment supplied is not identifiable or not stated in the contract, the following formula may be applied to determine the related revenue:

$$\text{Material and equipment revenue for the year} = \frac{\text{Material \& equipment costs for the year} \times \text{annual contract revenue}}{\text{Total direct costs for the year}}$$

**Interest paid to banks.** Interest paid to local banks relating to amounts borrowed for operations (working capital) in Kuwait may normally be deducted. Interest paid to banks or financial institutions outside Kuwait is disallowed unless it is proven that the funds were specifically borrowed to finance the working capital needs of operations in Kuwait. In practice, it is difficult to claim deductions for interest expenses incurred outside Kuwait. Interest paid to the head office or agent is disallowed. Interest that is directly attributable to the acquisition, construction or production of an asset is capitalized as part of the cost of the asset if it is paid to a local bank.

**Leasing expenses.** The Kuwait tax authorities may allow the deduction of rents paid under leases after inspection of the supporting documents. The deduction of rent for assets leased from related parties is restricted to the amount of depreciation charged on those assets, as specified in the Kuwait Income Tax Law. The asset value for the purpose of determining depreciation is based upon the supplier's invoices and customs documents. If the asset value cannot be determined based on these items, the value is determined by reference to the amounts recorded in the books of the related party.

**Agency commissions.** The tax deduction for commissions paid to a local agent is limited to 2% of revenue, net of any subcontractors' costs paid to the agent and reimbursed costs.

**Head office overhead.** Article 5 of the Bylaws provides that the following head office expenses are allowed as deductions:

- Companies operating through an agent: 1.5% (previously 3.5%) of the direct revenue
- Companies participating with Kuwaiti companies: 1% (previously 2%) of the foreign company's portion of the direct revenue generated from its participation in a Kuwaiti company
- Insurance companies: 1.5% (previously 2%) of the company's direct revenue
- Banks: 1.5% (previously 2%) of the foreign company's portion of the bank's direct revenue

Article 5 of the Bylaws also provides that for the purpose of computation of head office overheads, direct revenue equals the following:

- For companies operating through an agent, companies participating with Kuwaiti companies and banks: gross revenue less subcontract costs, reimbursed expenses and design cost (except for design cost carried out by the head office)
- For insurance companies: direct premium net of share of reinsurance premium, plus insurance commission collected

**Reimbursed costs.** For deemed profit filings, reimbursed costs are allowed as a deductible expense if the following conditions are satisfied:

- Such costs are necessary and explicitly mentioned in the contract.
- Such costs do not exceed 30% of gross revenues.
- Supporting documentation is available for such costs.

In addition, if reimbursable costs exceed 30% of gross revenues, the taxpayer must file its tax declaration on an accounts basis instead of on a deemed-profit basis.

**Inventory.** Inventory is normally valued at the lower of cost or net realizable value, on a first-in, first-out (FIFO) or average basis.

**Provisions.** Provisions, as opposed to accruals, are not accepted for tax purposes.

**Tax depreciation.** Tax depreciation is calculated using the straight-line method. The following are some of the permissible annual depreciation rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	4
Prefabricated buildings	15
Furniture and office equipment	15
Drilling equipment	25
Electrical equipment and electronics	15
Plant and equipment	20
Computer and its accessories	33.3
Software	25
Trucks and trailers	15
Cars and buses	20

**Relief for losses.** Article 7 of the Bylaws provides that approved losses can be carried forward for a maximum of three years (as

opposed to an unlimited period under the prior tax law) if the entity has not ceased its operations in Kuwait.

**Aggregation of income.** If a foreign company has more than one activity in Kuwait, one tax declaration aggregating the income from all activities is required.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Social security contributions; levied only with respect to Kuwaiti employees and employees who are citizens of other GCC countries; payable monthly by employers and employees; for Kuwaiti employees, social security is payable on monthly salary up to KWD2,250 at the following rates	
Employer	11.5
Employee	8.5
(Different monetary ceilings and percentages are prescribed for citizens of other GCC countries who are employed in Kuwait.)	
Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS); contribution payable by Kuwait shareholding companies; contribution levied on profits after transfer to the statutory reserve and offset of loss carryforwards	1
National Labour Support Tax; imposed annually on the profits derived from activities in Kuwait by a Kuwaiti Company listed on the KSE; Ministerial Resolution No. 24 of 2006 provides rules for the application of the tax	2.5
<i>Zakat</i> ; imposed on annual net profits of public and closed Kuwaiti shareholding companies; Ministerial Order 58 of 2007 provides rules for the application of <i>zakat</i>	1

#### E. Miscellaneous matters

**Foreign-exchange controls.** No foreign-exchange restrictions exist. Equity capital, loan capital, interest, dividends, branch profits, royalties, management and technical services fees, and personal savings are freely remittable.

**Supply and installation contracts.** In supply and installation contracts, a taxpayer is required to account to the tax authorities for the full amount received under the contract, including the offshore supply element, which is the part of the contract (cost, insurance and freight to the applicable port) pertaining to the supply of goods.

**Contractors' revenue recognition.** Tax is assessed on progress billings (excluding advances) for work performed during an accounting period, less the cost of work incurred. Previously, the authorities did not accept the completed contract or percentage-of-completion methods of accounting. However, the new Executive Rules of 2013 do not specifically prohibit the percentage-of-completion method in determining the revenue to be offset against the cost recognized.

**Subcontractors' costs.** The Kuwait tax authorities are normally stringent with respect to the allowance of subcontractors' costs, particularly subcontractors' costs incurred outside Kuwait. Subcontractors' costs are normally allowed if the taxpayer provides the related supporting documentation (contract, invoices, settlement evidence and other documents), complies with the regulations for the 5% retention on the payments made to the subcontractors and the submission of the contracts to the DIT (see *Retention on payments to subcontractors*) and fulfills certain other conditions. The tax authorities have also taken the view that they no longer accept losses from work that is subcontracted to other entities.

**Retention on payments to subcontractors.** Article 37 of the By-laws and Executive Rules Nos. 5 and 6 of 2010 require that every business entity operating in Kuwait must take all of the following actions:

- It must notify the names and addresses of its contractors and subcontractors to the DIT.
- It must submit copies of all the contracts and subcontracts to the DIT.
- It must retain 5% from each payment due to the contractors or subcontractors until the contractor or subcontractor provides a valid tax-clearance certificate issued by the DIT.

In the event of non-compliance with the above rules, the DIT may disallow the related costs from the contract or subcontract.

Article 39 of the Bylaws empowers the Ministry of Finance to demand payment of the 5% retained amount from the entities holding the amounts, if the concerned contractors or subcontractors fail to settle their taxes due in Kuwait. It also provides that if business entities have not retained the 5%, they are liable for all of the taxes and penalties due from the contractors and subcontractors.

**Work in progress.** Costs incurred but not billed by an entity at the end of the fiscal year may be carried forward to the subsequent year as work in progress. Alternatively, revenue relating to the costs incurred but not billed may be estimated on a reasonable basis and reported for tax purposes if the estimated revenue is not less than the cost incurred.

**Salaries paid to expatriates.** In a press release issued on 23 September 2003, the Ministry of Social Affairs announced that it would impose stiff penalties if companies fail to comply with the requirement to pay salaries to employees in their local bank accounts in Kuwait. These penalties apply from 1 October 2003. This requirement has been further emphasized through the new labor law issued in 2010. The DIT may disallow payroll costs if employees do not receive their salaries in their bank accounts in Kuwait.

**Offset program.** The MOF had issued Ministerial Order 13 of 2005 to reactivate the offset program. In 2006, the National Offset Company (NOC) was formed to manage and administer the implementation of the offset program on behalf of the Kuwait government and the MOF. Under Decision No. 890 of the Council of Ministers, which was taken in their session No. 2014/2-30 on 7 July 2014, the offset program is officially suspended in Kuwait until further notification. It appears that the offset program has

been suspended with respect to all tenders issued after Decision No. 890 on 7 July 2014 and all other tenders that were issued earlier but had not closed as of the date of the decision.

The following were significant aspects of the earlier offset program:

- All civil contracts with a value of KWD10 million or more and defense contracts with a value of KWD3 million or more attracted the offset obligations for contractors. The obligations became effective on the signing date of the contract.
- Contractors subject to the offset obligation were required to invest 35% of the value of the contract with Kuwaiti government bodies.
- Contractors subject to the offset obligation were allowed to take any of the following actions to fulfill their offset obligation:
  - Option 1: equity participation in an approved offset business venture (direct participation in a project company)
  - Option 2: contribution of cash and/or in-kind technical support
  - Option 3: participation in any of the offset funds managed by certain banks or investment companies in Kuwait
  - Option 4: purchase of commodities and services of Kuwaiti origin
- Contractors covered by the offset obligation were required to provide unconditional, irrevocable bank guarantees issued by Kuwaiti banks to the MOF equal to 6% of the contract price. The value of the bank guarantee was gradually reduced based on the actual execution by the foreign contractor or supplier of its work. The MOF was able to cash in the bank guarantee if the company subject to the offset obligation failed to fulfill such obligation.

The following were practical considerations:

- Option 3 above was not a viable option because the NOC has indicated that investment in funds is not considered for the completion of offset obligations.
- The NOC insisted that every offset venture have a local equity partner and had issued guidelines in this respect.
- A combination of Options 1, 2 and 4 was being used.

The offset program was implemented through the inclusion of clauses in supply contracts that referred to an offset obligation of the foreign contractor.

## **F. Treaty withholding tax rates**

Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

Disputes about the interpretation of various clauses of tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a permanent establishment
- Income attributable to a permanent establishment
- Tax deductibility of costs incurred outside Kuwait

Kuwait has also entered into treaties with several countries relating solely to international air and/or sea transport. Kuwait is also

a signatory to the Arab Tax Treaty and the GCC Joint Agreement, both of which provide for the avoidance of double taxation in most areas. The other signatories to the Arab Tax Treaty are Egypt, Iraq, Jordan, Sudan, Syria and Yemen.

The domestic tax law in Kuwait does not provide for withholding taxes except in the case of dividend income received by investors in companies listed on the KSE (see Section B). As a result, it is not yet known how the Kuwaiti government will apply the withholding tax procedures related to interest and royalties included in the treaties listed in the table below. The withholding rates listed in the table are for illustrative purposes only.

- (a) The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
- (b) The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
- (c) The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
- (d) The rate is 10% for dividends paid to the government of Kuwait or any of its institutions or any intergovernmental entities. The rate is 15% for other dividends.
- (e) The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
- (f) The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a permanent establishment and the debt on which the interest is paid is connected to such permanent establishment.
- (g) The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid up capital.
