- (h) For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned directly or indirectly by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
- (i) A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
- (j) The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 25% of the capital is owned directly or indirectly by, the government or a governmental institution of the other contracting state.
- (k) The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed directly or indirectly by a financial entity or other local body wholly owned by the government of the other contracting state.
- (l) The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 25% of the payer. The 10% rate applies to other dividends.
- (m) The rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting shares or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.
- (n) Dividends or interest paid by a company that is a resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
- The government
  - A political subdivision or a local authority of the other contracting state

- The Central Bank of the other contracting state
  - Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting states
- (o) The rate is 10% in the case of financial institutions (including insurance companies) and 15% in all other cases.
- (p) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The rate is 10% in all other cases.
- (q) The rate is 15% for the use of, or the right to use, cinematographic films, tapes for radio or television broadcasting and copyrights of literary or artistic works. The rate is 10% for the right to use patents, trademarks, designs, models, plans, secret formulas or processes, copyrights of scientific works and industrial, commercial or scientific equipment.
- (r) This rate applies only to dividends distributed by companies listed on the KSE (see Section B).
- (s) The 0% rate applies if either of the following circumstances exists:
- The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends, such holding is possessed for an uninterrupted period of at least one year, and the dividends are declared within that period.
  - The beneficial owner is the other contracting state, a governmental institution or an entity resident in the other contracting state.
- (t) The 10% rate applies if the beneficial owner of the dividends or royalties is a resident of the other contracting state.
- (u) The 0% rate applies if the beneficial owner of the dividends is the government of the other contracting state or an institution or other entity wholly owned directly by the government of that other contracting state. The 5% rate applies in all other cases.
- (v) The 5% rate applies if the beneficial owner of the interest is a resident of the other contracting state. In the case of the Hong Kong Special Administrative Region (SAR), the 0% rate applies if the interest is paid to the following:
- The government of the Hong Kong SAR
  - The Hong Kong Monetary Authority
  - An institution set up by the government of the Hong Kong SAR under statutory law, such as a corporation, fund, authority, foundation, agency or other similar entity
  - An entity established in the Hong Kong SAR, all the capital of which is provided by the government of the Hong Kong Special SAR or any institution as defined in Subparagraph (a)(3) of Paragraph 3 of Article 11 of the tax treaty
- In the case of Kuwait, the 0% rate applies to interest paid to the following:
- The government of Kuwait
  - A governmental institution created in Kuwait under public law, such as a corporation, central bank, fund, authority, foundation, agency or similar entity
  - An entity established in Kuwait, all the capital of which is provided by the Kuwaiti government or a governmental institution
- (w) The 5% rate applies if the beneficial owner of the dividends, interest or royalties is a resident of the other contracting state.
- (x) The 15% rate applies if the beneficial owner of the royalties is a resident of the other contracting state.
- (y) The 5% rate applies if the beneficial owner is a company that has owned directly or indirectly for the period of six months ending on the date on which entitlement to the dividends is determined at least 10% of the voting shares of the company paying the dividends. The 10% rate applies in all other cases.
- (z) The 10% rate applies if the beneficial owner of the interest is a resident of the other contracting state.
- (aa) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (bb) The 2.5% rate applies if the beneficial owner of the dividends is the government of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (cc) The 0% rate applies if the beneficial owner of the dividends is an entity mentioned in Paragraph 2 of Article 4 of the treaty. The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

## A. At a glance

Corporate Income Tax Rate (%)	24 (a)
Capital Gains Tax (%)	– (b)
Branch Tax Rate (%)	24 (c)
Withholding Tax (%) (d)	
Dividends	10
Interest	10
Royalties	5
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) This tax is known as the “profit tax.” Tobacco businesses are subject to tax at a rate of 26%.
- (b) The tax law does not provide for the taxation of capital gains derived from the transfer of tangible assets. Income from the sale of shares is subject to income tax at a rate of 10%.
- (c) Lao income tax regulations do not contain a definition of a “permanent establishment.” A foreign company may establish a branch only in certain sectors of the economy. Only a foreign bank, financial institution, insurance company or airline company may establish a branch in Laos.
- (d) These are final withholding taxes that are imposed on Lao and foreign legal entities and individuals.

## B. Taxes on corporate income

**Profit tax.** Companies and individuals engaged in manufacturing, trading and services are subject to profit tax on their Lao-source income. Foreign companies deriving income from Laos or entering into joint venture contracts with project owners in Laos are also subject to profit tax.

The accounts of a branch of a Lao company are consolidated with the accounts of the parent company for purposes of calculating profit tax.

**Rates of profit tax.** The standard rate of profit tax for business activities is 24%.

Companies in certain industries, such as mining, are taxed at different rates, depending on their agreement with the government of Laos.

Foreign investors may be entitled to profit tax exemptions for certain periods, depending on the activities and location of the business.

Listed companies in Laos may be entitled to a reduced tax rate for a four-year period.

**Lump Sum Tax.** Lump Sum Tax applies to the income of individuals and small and medium-sized businesses not registered for value-added tax (VAT) purposes.

**Capital gains.** The law is silent on the taxation of capital gains arising from the transfer of tangible assets. However, income derived from sales of securities is subject to a withholding tax of 10%.

**Administration.** The normal fiscal year in Laos is the calendar year.

For companies and individuals using the advanced or ordinary accounting system, profit tax must be declared and paid quarterly on 10 April, 10 July and 10 October with a final payment due on 10 March of the following year. The quarterly payments are based on the final tax liability of the preceding year or the projected liability for the current year. Any excess payments may be credited against the final annual profit tax liability or future profit tax liability.

For companies or individuals using the basic accounting system, profit tax is declared and paid based on their agreements with the government.

**Dividends.** A 10% withholding tax is imposed on dividends paid.

**Foreign tax relief.** Laos has entered into double tax treaties with several countries (see Section F).

### C. Determination of taxable business income

**General.** The calculation used to determine the taxable income of companies and individuals subject to profit tax depends on whether the taxpayers use the advanced, ordinary or basic accounting system. Taxpayers that use the advanced or ordinary accounting system may determine taxable income using either of the following calculations:

- The difference between the actual value of the assets at the close of the year and the value of those assets at the beginning of the year less capital contributed during the year plus personal drawings of the shareholders (this method is known as the “profit method”)
- Gross income less total authorized deductions

Companies and individuals using the basic accounting system determine their taxable business income by deducting their total authorized expenses from gross income. Alternatively, they may declare their gross annual profit if the difference between gross

income and expenses cannot be calculated. Gross annual profit is equal to the annual income multiplied by the profit ratio for each type of activity.

Taxable income includes income from the following sources:

- Income from handicraft, agriculture and industry
- Income from the exploitation of natural resources
- Income from import and export business
- Income from banking, insurance and financial activities
- Income from tourism including hotels
- Income from lottery, casino and sports activities
- Income from the provision of general services

Deductions from gross income include the following:

- General business expenses such as electricity, advertising, repair charges, salaries and wages, welfare and social security expenses, rent, interest and insurance
- Depreciation (see *Depreciation*)
- Cost of travel, up to 0.6% of annual income
- Cost of guest entertainment and telephone, up to 0.4% of annual income
- Donations and support, up to 0.3% of annual income

Expenses not related to business activities are not deductible.

Other nondeductible expenses include the following:

- Profit tax
- Interest paid to shareholders on capital contributions
- Penalties or fines
- Golf expenses, dancing expenses, gifts and awards
- Reserves for risks and unexpected expenses

**Inventories.** The law does not prescribe a basis for the valuation of inventory. Inventory for a tax year is valued at the lower of cost or market value.

**Depreciation.** Depreciation can be claimed based on the straight-line or declining-value method. In the year of acquisition or disposal, depreciation may be claimed for the portion of the asset that was put in use. The following are straight-line depreciation rates.

<b>Assets</b>	<b>Annual rate (%)</b>
Intangible fixed assets	20 to 50
Buildings	
Industrial	2 to 5
Commercial and residential	5 to 10
Plant and machinery	20
Motor vehicles	20
Office equipment	20
Software	50

Establishment expenses are expensed over two years.

**Relief for losses.** Losses can be carried forward for a period of three consecutive years. Losses may not be carried back.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
VAT applies to businesses with annual revenues exceeding LAK400 million (USD50,000) and businesses that voluntarily register for VAT	
Taxable goods, materials and services	10
Exported goods, materials and services	0
Tax on income from the lease of immovable property; payable by the recipient each time the income is received	10
Excise duty; on the import value of various commodities	
Fuel	5 to 25
Alcoholic drinks	50 to 70
Soft drinks and mineral water	5 to 10
Cigarettes and cigars	60
Perfume and cosmetics	20
Motorbikes	10 to 25
Cars	25 to 150
Motorboats	15
Electrical products (televisions, cameras and musical instruments)	10
Refrigerators, washing machines and vacuum cleaners	10
Sport related (for example, snooker, football and any game cabinet)	20 to 30
Entertainment (nightclub, disco and karaoke)	60
Mobile phone and internet	10
Lottery and casino activities	25 to 80
Social Security contributions; imposed on salaries of up to LAK2 million per month	
Employee	4.5
Employer	5

### **E. Foreign-exchange controls**

The Bank of Laos determines foreign-exchange controls. Foreign investors can freely repatriate their after-tax profits and capital to other countries, subject to certain substantiation requirements.

The currency of Laos is the kip (LAK). Bank accounts may be held in other currencies.

### **F. Treaty withholding tax rates**

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>

- (a) These taxes apply to payments by Latvian residents or permanent establishments to nonresidents.
- (b) No withholding tax is imposed on dividends paid by Latvian entities, except for dividends paid to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations. The 30% rate applies to payments of interim (extraordinary) dividends (the Commercial Law contains specific rules regarding these dividends), and the 15% rate applies to the payments of all other dividends made to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations. The holder of a securities account that settles payments with a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations must withhold the tax on dividends that have been disbursed by stock companies with publicly traded shares.
- (c) No withholding tax is imposed on interest payments made by Latvian entities except for interest paid to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations. The 5% rate applies to the interest paid by Latvian-registered banks, and the 15% rate applies to all other interest payments made to a resident of a low-tax or no-tax state or territory in accordance with Cabinet Regulations.
- (d) No withholding tax is imposed on royalties, except for royalties paid by Latvian entities to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations. A 15% tax rate applies to payments made to a resident of a low-tax or no-tax state or territory in accordance with Cabinet Regulations.

- (e) The 10% rate applies to management and consulting fees. The 0% rate applies to management and consulting fees paid to residents of countries that have entered into double tax treaties with Latvia (the residence certificate must be submitted). The 15% rate applies to payments of management and consulting fees made to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations.
- (f) This is a final withholding tax imposed on gains derived by nonresident companies without a permanent establishment in Latvia from sales of Latvian real estate. This tax also applies to sales of shares if certain conditions are met (see Section B).
- (g) Losses incurred in or after 2008 may be carried forward for an unlimited number of years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Under the Law on Corporate Income Tax, Latvian (resident) companies are subject to income tax on their worldwide income. Nonresident companies without a permanent establishment in Latvia are subject to tax on their Latvian-source income.

Resident companies include companies registered in Latvia and companies incorporated in foreign countries that are registered in Latvia as branches or permanent establishments. All other companies are considered to be nonresident companies. Nonresident companies operating through a permanent establishment in Latvia are subject to tax on income derived by the permanent establishment in Latvia as well as on income independently derived abroad by the permanent establishment. If a nonresident company engages directly in business activities in Latvia that are similar to the business activities performed by its permanent establishment or subsidiary in Latvia, income derived from the nonresident company's activities is included in the taxable income of the permanent establishment or the subsidiary.

**Tax rates.** Companies are subject to income tax at a rate of 15%.

**Tax incentives.** Companies that enter into an agreement with the management of the Liepaja or Rezekne special-economic zones or the Riga and Ventspils free ports benefit from several tax incentives including an 80% rebate of corporate income tax on income derived from the relevant zone.

Companies that invest more than EUR10 million in supportable long-term investment projects may apply for the following corporate income tax rebates:

- 25% of the whole initial investment amount up to EUR50 million
- 15% of the part of the whole initial investment amount that exceeds EUR50 million

The Ministry of Economics of Latvia needs to agree to the above investment projects, and criteria specified in the Law on Corporate Income Tax for the granting of the tax benefits must be met.

**Capital gains.** Income on the disposal of equity shares is excluded from the taxable revenue of the taxpayer, except for shares of a commercial company that is a resident of a state or territory that has been recognized as a low-tax or tax-free state or territory in accordance with Cabinet Regulations.

For nonresident companies without a permanent establishment in Latvia, the final withholding tax is imposed on proceeds received from the sale of Latvian real estate, as well as from the sale of

shares of a company if in the tax year of the sale or in the preceding year, 50% or more of the company's assets directly or indirectly consists of real estate located in Latvia. Withholding tax at a rate of 2% is imposed on income from the sale of Latvian real estate or from the sale of a company's shares. Nonresident companies that are residents of European Union (EU) member states or residents of states that have entered into a double tax treaty with Latvia may file a tax calculation statement with the State Revenue Service in accordance with the procedures stipulated by the Cabinet Regulations, together with documents that prove the amount of the expenses related to the earned income, and apply the tax rate of 15% to the calculated income.

**Administration.** The tax year is either the calendar year or another year stipulated in the charter of the company.

An annual income declaration must be filed with the State Revenue Service within 30 days after the annual shareholders' meeting, but not later than four months after the end of the tax year. In certain cases, the annual income tax declaration can be filed within seven months after the end of the tax year.

Companies must make advance payments of tax by the 15th day of each month. For the months before and including the month of filing the annual income declaration, up to a maximum of four months, the monthly advance payments are equal to  $\frac{1}{12}$  of the tax calculated for the year two years before the current year, adjusted for inflation. For the remaining months, monthly advance payments are equal to  $\frac{1}{8}$  of the tax calculated for the preceding year, adjusted for inflation and reduced by the advance tax payments made in accordance with the rule described in the preceding sentence.

Any balance of tax due must be paid to the State Revenue Service within 15 days after the submission date for the annual income declaration, or within 15 days after the filing deadline for the annual income tax declaration if the declaration was submitted after the deadline.

**Dividends.** Dividends paid by a resident company out of profits taxed under the Law on Corporate Income Tax are not included in the taxable income of a resident recipient company. This rule does not apply if the payer is enjoying a tax holiday.

A resident company is not taxable on dividends received from a nonresident company unless the payer company is a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations.

**Foreign tax relief.** A foreign tax credit is available to resident companies for foreign tax paid on taxable income earned abroad. The amount of credit may not exceed an amount equal to the tax that would be imposed in Latvia on the income earned abroad.

### C. Determination of taxable income

**General.** Taxable income is the income reported in a company's profit and loss statements, prepared in accordance with the Latvian accounting law and subject to certain adjustments specified in the Law on Corporate Income Tax.

For corporate income tax purposes, companies may not deduct interest expenses that exceed the lower of the following amounts:

- An amount equal to the average amount of liabilities multiplied by the annual weighted average interest rate for loans issued to domestic non-financial companies (calculated based on statistical indicators of monetary financial institutions), which is multiplied by a coefficient of 1.57. The annual weighted average interest rate for loans issued to domestic non-financial companies is published on the Bank of Latvia website within a month after the end of a tax period.
- The actual amount of the interest divided by a coefficient C. Coefficient C is calculated using the following formula:

$$C = \frac{D}{(E - R) \times 4}$$

- The following are the values of the items in the formula:
  - D = average liabilities
  - E = total equity
  - R = amounts in long-term revaluation reserve and similar reserves that have not resulted from profit distributions

The thin-capitalization rules do not apply to interest on loans obtained from the following:

- Credit institutions that are residents of the EU, European Economic Area (EEA) or a country with which Latvia has entered into a double tax treaty
- Latvian Treasury
- Nordic Investment Bank
- European Bank for Reconstruction and Development
- European Investment Bank
- Council of Europe Development Bank
- World Bank Group

The second calculation described above for calculating the limitation on the interest deduction does not apply if the loans are obtained from financial institutions (as defined in the Credit Institution Law) that are resident in the EU, EEA or a country with which Latvia has entered into a double tax treaty and if such financial institution provides crediting or financial leasing services and is under the supervision of credit institutions or the financial monitoring agency.

The thin-capitalization rules do not apply to credit institutions and insurance companies.

The amount of interest that exceeds the deductible amount may not be used to reduce taxable income in future tax years.

**Inventories.** Inventories can be valued using the first-in, first-out (FIFO) or weighted average methods.

Expenditure on low-value inventory may be fully deducted in the year of the expenditure.

**Tax depreciation.** Tax depreciation is calculated using the declining-balance method.

Depreciation rates range from 10% (buildings and structures) to 70% (computing devices and related equipment).

The Law on Corporate Income Tax provides for the depreciation of the acquisition value or establishment value of new manufacturing technological equipment. For this purpose, “acquisition value” is the amount paid to purchase such equipment, while “establishment value” is the total expenditure incurred to create such equipment. Before calculating the depreciation, the acquisition or establishment value may be increased by multiplying such value by a coefficient, which is 1.5 for assets acquired from 2014 through 2020.

The acquisition price of patents, licenses and trademarks is amortized using the straight-line method for 5 years, but concessions (as defined in the Latvian Concession Law) are amortized over 10 years. Patents, licenses and trademarks that are issued for a term of less than five years can be written off for tax purposes during the period of their validity.

Research and development costs can be written off for tax purposes in the same year in which they are incurred. Taxable income may be reduced by the amount of specific expenses incurred in research and development activities multiplied by a coefficient of three if certain criteria are met.

Tax depreciation may not be claimed for a “representation automobile,” which is defined as an automobile that meets all of the following criteria:

- It has no more than eight passenger seats plus the driver’s seat.
- The purchase value is greater than EUR50,000 without value-added tax.
- It is not an emergency vehicle.
- It is not a specialized automobile for disabled persons.
- It is not a promotion automobile.

**Relief for losses.** Losses incurred in or before 2007 may be carried forward eight years. Tax losses incurred in 2008 and subsequent years may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** Effective from 1 January 2014, the intra-group transfer of losses was abolished.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax on goods and services, including imports	
Standard rate	21
Medical services, and supplies of books and subscriptions	12
Exports	0
Social security contributions, paid by	
Employer	23.59
Employee	10.5
Property tax; applies to land, engineering structures and buildings, except for residential buildings	1.5

Nature of tax	Rate (%)
Property tax on residential buildings	
Cadastral value under EUR56,915	0.2
Cadastral value between EUR56,915 and EUR106,715	0.4
Cadastral value above EUR106,715	0.6

## E. Miscellaneous matters

**Foreign-exchange controls.** The official currency of Latvia is the euro (EUR). No significant foreign-exchange controls are imposed in Latvia.

**Transfer pricing.** Latvian law requires the arm's-length principle to be followed in all related-party transactions. The Latvian tax authorities may reassess transactions between related parties and recalculate the tax base if the prices applied in related-party transactions are not arm's length. Transfer-pricing methods, such as the comparable uncontrolled price, resale price, cost-plus, profit-split and transactional net margin methods, may be used to assess whether the prices applied in controlled transactions are consistent with the arm's-length principle.

Latvian taxpayers with annual net turnover exceeding EUR1,430,000 are required to prepare transfer-pricing documentation containing industry, company, functional and economic analysis. The documentation requirements apply to all related-party transactions with an annual value over EUR14,300. The generally accepted practice for transfer-pricing issues is based on the Organisation for Economic Co-operation and Development (OECD) transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Taxpayers can enter into an advance pricing agreement (APA) with the tax administration on the establishment of an arm's-length price (value) for a transaction conducted with a related foreign company if the transaction annual value is planned to exceed EUR1,430,000. If a taxpayer complies with an APA, the tax administration may not adjust in a tax audit the arm's-length price established for the transaction.

## F. Treaty withholding tax rates

The domestic withholding tax rate for dividends, interest and royalties is 0% (with certain exceptions, but these exceptions do not apply to treaty countries). The following table lists the withholding tax rates under Latvia's tax treaties.

	Dividends %	Interest %	Royalties %
Albania	5/10 (a)	5/10 (p)	5
Armenia	5/15 (a)	10	10
Austria	5/10 (a)	10	5/10 (b)

(a) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends.

(b) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.

- 
- (c) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting power of the payer of the dividends.
- (d) The 0% rate applies if the recipient of the dividends is a company (or a partnership) that holds 25% of the capital and voting power of the payer of the dividends.
- (e) See Section A.
- (f) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 75% of the capital of the payer of the dividends. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to all other dividends.
- (g) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting power of the payer of the dividends.
- (h) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the payer of the dividends.
- (i) The 0% rate applies to interest paid on loans granted by banks, or to the government, the central bank or any financial institution controlled by the government of Tajikistan.
- (j) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the payer of the dividends.
- (k) The 7% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting, patents, trademarks, designs, and models, plans, secret formulas or processes. The 5% rate applies to other royalties.
- (l) The 10% rate applies to royalties paid for the use of, or the right to use, cinematographic films or films or tapes for radio or television broadcasting. The 5% rate applies to other royalties.
- (m) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and if the dividends are paid out of profits that are exempt from tax or subject to tax at a rate lower than the normal Israel tax rate under the Israel investment encouragement law.
- (n) The 5% rate applies to interest paid by Israel-registered banks. The 10% rate applies to other interest payments.
- (o) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes and other means of image or sound reproduction for radio or television broadcasting. The 10% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment
  - Information concerning industrial, commercial or scientific experience
- (p) The 5% rate applies to interest paid on loans granted by banks.
- (q) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting capital of the company paying the dividends.
- (r) The 6% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- (s) Latvia has ratified the tax treaty with Kuwait, which will enter into force when Latvia receives notification that Kuwait has also ratified the treaty.

### Tax Policy and Controversy

Mohammad Najjar +961 (1) 760-800  
Email: mohammad.najjar@lb.ey.com

## A. At a glance

Corporate Income Tax Rate (%)	15
Capital Gains Tax Rate (%)	10
Branch Tax Rate (%)	15
Withholding Tax (%)	
Dividends	10 (a)
Interest	10 (a)(b)
Royalties from Patents, Know-how, etc.	10 (c)
Payments for Services Provided by	
Nonresidents	7.5
Branch Remittance Tax	10 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) Applicable to both residents and nonresidents.  
(b) Bank interest is subject to a 5% withholding tax.  
(c) Applicable if the royalties are received by Lebanese holding companies (see Section B).  
(d) Profits derived by branches operating in Lebanon are presumed to be distributed and consequently are subject to remittance tax.

## B. Taxes on corporate income and gains

**Corporate income tax.** Lebanese companies and branches of foreign companies carrying on business in Lebanon are subject to tax

only on their income derived from Lebanon. A company is considered Lebanese if it is registered in Lebanon. The following are the two main conditions for registering a company in Lebanon:

- The company's registered office is located in Lebanon.
- The majority of the company's board of directors is of Lebanese nationality (unless the government authorizes the company to have less than a majority).

**Rates of corporate income tax.** In general, companies are subject to tax at a flat rate of 15%.

Profits derived in Lebanon by branches of foreign companies are presumed to be distributed and consequently are subject to the 10% remittance tax.

Contractors on government projects are subject to tax at the regular corporate income tax rate on a deemed profit of 10% or 15% of actual gross receipts, depending on the type of project.

Lebanese holding companies and offshore companies are exempt from corporate income tax. However, special taxes apply to these companies (see Section D). A Lebanese holding company is a special type of company that is formed to hold investments in and outside Lebanon ("holding company" is not synonymous with "parent company"). An offshore company is a company that engages exclusively in business transactions outside Lebanon.

Insurance companies are subject to tax at the regular corporate income tax rate of 15% on a deemed profit ranging from 5% to 10% of their premium income.

Lebanese air and sea transport companies are exempt from corporate income tax. Foreign air and sea transport companies are also exempt from corporate income tax if their home countries grant reciprocal relief to Lebanese companies. However, dividends distributed remain subject to movable capital tax.

Profits derived by industrial enterprises established in Lebanon after 1 January 1980 are exempt from income tax for up to 10 years from the date of commencement of production if such enterprises satisfy all of the following conditions:

- The factory is built in certain areas the government intends to develop.
- The object of the enterprise is to manufacture new goods and materials that were not manufactured in Lebanon before 1 January 1980.
- The total value of property, plant and equipment used in Lebanon by the new enterprise and allocated for the production of new goods and materials is at least LBP500 million.

Profits qualifying for this tax holiday may not exceed the original cost of the property, plant and equipment used by the enterprise on the date production begins.

Under Law No. 248, dated 15 April 2014, an exemption of 50% applies to profits realized from the exportation of goods produced in Lebanon. A certificate-of-origin document is needed to prove that the exports are from Lebanon. Companies engaged in the extraction of natural resources are excluded from this exemption.

**Capital gains.** Capital gains on the disposal of fixed assets are taxed at a rate of 10%.

If a company reinvests all or part of a capital gain subject to the 10% rate to construct permanent houses for its employees during a two-year period beginning with the year following the year in which the gain was realized, it may obtain a refund of the tax imposed on the reinvested gain.

**Administration.** The official tax year is the calendar year. Companies or branches may use a different tax year if they obtain the prior approval of the tax authorities.

Corporations with a financial year-end of 31 December must file their tax returns by 31 May of the year following the year in which the income is earned. Other corporations must file their returns within five months of their financial year-end. The tax authorities may grant a one-month extension at the request of the taxpayer if the taxpayer's circumstances warrant the extension. Tax must be paid by the same deadline.

If a taxpayer does not submit timely returns, the tax authorities may levy tax on an amount of deemed profit and impose a fine of 5% of the tax due for each month or part of a month that the return is late. The minimum penalty is LBP750,000 for joint stock companies, LBP500,000 for limited liability companies, and LBP100,000 for other taxpayers. The maximum penalty is 100% of the tax due. For failure to pay tax by the due date, a penalty of 1% of the tax due is imposed for each month or part of a month that the tax remains unpaid.

**Dividends and interest.** In general, dividends and interest are subject only to a withholding tax of 10%.

Dividends received by a Lebanese corporation from another Lebanese corporation are excluded from the taxable income of the receiving company. However, dividends redistributed by a parent company to its shareholders or partners are subject only to a withholding tax of 10%.

Dividends distributed by Lebanese holding companies and off-shore companies are exempt from dividend withholding tax.

Dividends and interest income earned by banks and financial institutions are considered trading income and consequently are subject to tax at the regular corporate tax rate of 15%.

**Foreign tax relief.** Lebanon has entered into double tax treaties with several countries (see Section F).

### **C. Determination of trading income**

**General.** The tax assessment is based on audited financial statements prepared according to generally accepted accounting principles, subject to certain adjustments.

Deductions are allowed for expenses incurred wholly and exclusively for business purposes. Branches, subsidiaries and affiliates of foreign companies may deduct the portion of foreign head office overhead charged to them if the auditors of the head office present to the tax authorities a certificate confirming that the overhead was fairly and equitably allocated to the various subsidiaries,

associated companies and branches and that the amount of head office overhead charged back to the Lebanese entity is in accordance with the limits set by the Ministry of Finance. However, the deductible portion of the overhead charged back to the Lebanese entity is subject to a tax of 7.5% (see Section D).

**Inventories.** Inventories are normally valued at the lower of cost or net realizable value. Cost is usually determined using the first-in, first-out or weighted average cost method.

**Provisions.** The following are the only provisions that are allowed for tax purposes:

- The actual amount due at the balance-sheet date for employees' end-of-service indemnities
- Doubtful debts owed by debtors that have been declared legally bankrupt
- A provision for obsolete inventory if the following conditions are met:
  - The tax authorities are notified about the intention to destroy the obsolete stock.
  - The obsolete stock is destroyed in the presence of a representative from the tax authorities.
  - The tax authorities prepare formal minutes evidencing the destruction of the obsolete stock.

Banks and financial institutions may deduct provisions for doubtful debts before declaration of bankruptcy of the debtor if they obtain the approval of the Banking Control Commission of the Central Bank of Lebanon.

**Tax depreciation.** Depreciation must be calculated using the straight-line method. The Ministry of Finance has specified the minimum and maximum depreciation rates. A company may select appropriate rates within these limits for its activities. Companies must notify the relevant income tax authorities of the adopted depreciation rates before the declaration deadline. Otherwise the company is considered eligible for the minimum depreciation rates only.

<b>Assets</b>	<b>Minimum rate (%)</b>	<b>Maximum rate (%)</b>
Developed buildings from concrete for use in the commercial, tourism and service sectors (for example, offices, shops, stores, restaurants, hotels and hospitals)	2	5
Developed buildings from concrete that are used for industry and handcrafts	3	10
Developed buildings from metal for commercial and industrial use	6	20
Large renovations, maintenance and decoration works for buildings	6	20
Technical installations, industrial equipment and accessories	8	25
Computer hardware and software	20	50
Cars	10	25
Vehicles for transportation of goods and people	6	20

<b>Assets</b>	<b>Minimum rate (%)</b>	<b>Maximum rate (%)</b>
Means of sea transport	5	10
Means of air transport	20	25
Office equipment, furniture and fixtures	8	25
Non-consumable tools in restaurants and coffee shops (for example, glass cups and silver spoons)	— *	— *
Gas bottles	8	20

\* These items are subject to count each year and are valued at cost.

**Relief for tax losses.** Tax losses may be carried forward for three years. In addition, under Law No. 273, dated 15 April 2014, losses incurred in 2003 and 2004 can be carried forward for one extra year (four years in total). Losses incurred in 2005, 2006, 2007 and 2008 can be carried forward for an additional four or seven years. This applies to certain companies specified under this law.

**Groups of companies.** Parent companies are not required to prepare consolidated financial statements that incorporate the activities of their associated companies and subsidiaries. Each legal entity is taxed separately.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Value-added tax (VAT); imposed on the supply of goods and services by a taxable person in the course of an economic activity in Lebanon and on imports; certain supplies are exempt; registration with the Directorate of VAT is required if an entity's total taxable turnover for the four preceding quarters exceeded LBP150 million; all persons performing taxable economic activities have the option of registering, regardless of the amount of turnover	
Standard rate	10%
Tax on portion of foreign head office overhead allocated to a Lebanese subsidiary, associated company or branch	7.5%
Customs duties on imported goods	Various
Social security contributions	
Sickness and maternity, on monthly salaries up to LBP2,500,000; paid by	
Employer	7%
Employee	2%
Family allowances, on monthly salaries up to LBP1,500,000; paid by employer	6%
End-of-service indemnity, on monthly salaries; paid by employer	8.5%
Stamp duty on documents, such as the issuance of share capital, corporate bonds, commercial bills, lease agreements, employment agreements	

Nature of tax	Rate
and other agreements (contracts related to foreign transactions of Lebanese offshore companies are exempt) General rate	0.3%
Built property tax; imposed on rental income generated by entities subject to income tax; such income is not subject to corporate income tax and is excluded from the taxable results together with the related expenses; the annual net income from each parcel of real estate is separately subject to built property tax Net income not exceeding LBP20 million Net income exceeding LBP20 million, but not exceeding LBP40 million Net income exceeding LBP40 million, but not exceeding LBP60 million Net income exceeding LBP60 million, but not exceeding LBP100 million Net income exceeding LBP100 million	4% 6% 8% 11% 14%
Municipal taxes on developed property Sidewalk and sewage tax, paid by landlords on annual gross rental from buildings (since 1989, the municipalities have collected this tax from tenants)	1.5%
Security and cleaning tax, paid by tenant on a percentage of the rental value of buildings (nonprofit enterprises are exempt from this tax) Residential buildings (minimum tax of LBP5,000) Nonresidential buildings (minimum tax of LBP10,000)	5% 7%
Registration duty, paid by purchaser of land or buildings; levied on fair-market value of building, which is deemed to be 20 times the fair annual rental income set by the government (approximate rate)	6%
Annual tax on total capital and reserves of Lebanese holding companies, up to a maximum tax of LBP5 million (tax is due in full from the first year of company's operations, regardless of the month operations begin); imposed on amounts Not exceeding LBP50 million Exceeding LBP50 million but not exceeding LBP80 million Exceeding LBP80 million	6% 4% 2%
Annual tax on Lebanese offshore companies (tax is imposed in full from the first year of company's operations, regardless of the month operations begin)	LBP1 million

## E. Miscellaneous matters

**Foreign-exchange controls.** Lebanon does not impose any foreign-exchange controls.

**Anti-avoidance legislation.** Under the Lebanese tax law, criminal or tax penalties may be imposed for specified tax-avoidance schemes.

**Related-party transactions.** Transactions with related entities must be on an arm's-length basis.

## **F. Tax treaties**

Lebanon has entered into double tax treaties with Algeria, Armenia, Bahrain, Belarus, Bulgaria, Cuba, Cyprus, the Czech Republic, Egypt, France, Gabon, Iran, Italy, Jordan, Kuwait, Malaysia, Malta, Morocco, Oman, Pakistan, Poland, Qatar, Romania, the Russian Federation, Senegal, Sudan, Syria, Tunisia, Turkey, Ukraine, United Arab Emirates and Yemen.

## A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%)	
Dividends	25 (b)(c)
Interest	25 (b)(d)(e)
Royalties	25 (b)(d)
Management Charges	25 (b)(d)
Payments for Services	10 (b)
Payments to Resident Contractors	5
Branch Remittance Tax	25 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) For manufacturing companies, the rate is 10%. For companies that manufacture and export outside the Southern African Customs Union, the rate is now also 10%.
- (b) These withholding taxes apply to payments to nonresidents only.
- (c) Dividends paid by manufacturing companies subject to a concessionary corporate tax rate are exempt from withholding tax.
- (d) For interest, royalties and management charges paid by manufacturing companies subject to a concessional corporate tax rate, the rate is 15%.
- (e) A 10% withholding tax is imposed on interest paid to residents.
- (f) This tax is imposed on repatriated income. Repatriated income is the chargeable income of the branch less Lesotho income tax paid on the chargeable income and any profits reinvested in the branch.

## B. Taxes on corporate income and gains

**Company tax.** Company tax is imposed on income from all sources located in and outside Lesotho.

**Rates of company tax.** The standard tax rate is 25%.

The rate is reduced to 10% for income from manufacturing operations and for companies that manufacture and export to countries outside the Southern African Customs Union. The special rate for manufacturing income does not apply to a Lesotho branch of a nonresident company.

**Capital gains.** Capital gains are treated as ordinary income and subject to tax at the regular corporate income tax rate.

**Administration.** The year of assessment runs from 1 April to 31 March. However, a company may select a year of assessment other than 1 April to 31 March, subject to the approval of the Commissioner of Income Tax.

Returns must be filed by the last day of the third month following the end of the year of assessment. If a return is not filed, the Commissioner may issue an estimated assessment.

Tax is payable in three installments, which are due on 30 September, 31 December and 31 March of each year of assessment. The fourth and final payment is due on submission of the return. For companies whose year-end is other than 31 March, the installments of tax are due on the last day of the sixth, ninth and twelfth months of the year of assessment.

Withholding taxes are payable when the payee becomes legally entitled to the payment.

If tax levied under the Income Tax Act is not paid by the due date, additional tax of 3% compounded monthly is payable.

**Dividends.** Resident companies are exempt from tax on dividends received, but they may not deduct related expenses or dividends declared. A resident company is a company that satisfies one of the following conditions:

- It is incorporated and formed under the laws of Lesotho.
- Its management and control is located in Lesotho.
- It undertakes the majority of its operations in Lesotho.

Dividends paid to nonresidents are subject to a final withholding tax at a rate of 25%. Dividends paid by manufacturing companies subject to a concessionary corporate tax rate are exempt from withholding tax.

Resident companies that pay dividends are liable for advance corporation tax (ACT).

The following is the calculation for ACT:

$$\frac{A}{100 - A} \times 100$$

In the above calculation, A is the corporate tax rate for income other than manufacturing income.

Installment tax is set off against ACT; that is, installment tax paid settles the ACT due.

**Foreign tax relief.** In the absence of treaty relief provisions, unilateral relief is granted through a credit for foreign taxes paid on income earned abroad. The amount of the credit is the lesser of the foreign tax paid and the Lesotho tax on the foreign-source income.

### C. Determination of trading income

**General.** Taxable income is financial statement income, adjusted as required by the Income Tax Act. To be eligible for deduction, expenses must be incurred in the production of income, and they must not be of a capital nature.

**Inventories.** Inventories are valued at the lower of cost or realizable value. Cost is determined using the first-in, first-out (FIFO) method or the average-cost method.

**Provisions.** Specific provisions are allowable for tax purposes. General provisions are not allowed.

**Depreciation.** Depreciation is computed using the declining-balance method at the following rates.

<b>Asset</b>	<b>Rate (%)</b>
Motor vehicles	25
Furniture, fixtures and office machines	20
Plant and machinery	20
Industrial buildings and public utility plant	5
Mining	100
Other assets	10

**Relief for losses.** Assessed losses may be carried forward for an unlimited period. A carryback of losses is not allowed.

**Groups of companies.** Companies in a group may not share their tax losses with profitable companies in the group.

#### **D. Value-added tax**

Value-added tax is levied at the following rates:

- Specified basic commodities: 0%
- Electricity and telecommunications: 5%
- Liquor: 15%
- Other commodities: 14%

#### **E. Tax treaties**

Lesotho has entered into tax treaties with Mauritius, South Africa and the United Kingdom. The following are the withholding tax rates for dividends, interest and royalties under these treaties.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>	<b>Management and technical fees</b>
	<b>%</b>	<b>%</b>	<b>%</b>	<b>%</b>
Mauritius	10	10	10	0
South Africa	15	10	10	10
United Kingdom	10	10	10	10
Non-treaty countries*	25	25	25	25

\* See applicable footnotes in Section A.

*This chapter reflects the law in Libya as of the time of writing. In view of the current transition in Libya, the legislative situation is difficult to assess and may be subject to change. Consequently, readers should obtain updated information before engaging in transactions.*

## A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	20 (a)(b)
Branch Tax Rate (%)	20 (a)
Withholding Tax (%)	
Dividends	0 (c)
Interest	0
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (d)

- (a) Corporate income tax is imposed at a flat rate of 20%. In addition, Jihad Tax at a rate of 4% is imposed on the profits of Libyan companies and branches. Oil companies are subject to a composite rate of 65% which includes income tax, Jihad Tax and a surtax.
- (b) Capital gains are treated as trading income.
- (c) Tax on dividends has been reinstated, but regulations relating to rates and rules of collection have not yet been issued.
- (d) Oil companies may carry forward losses 10 years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Libyan companies and foreign branches are subject to tax on their worldwide income. A national company or foreign branch is considered to be resident in Libya if it is registered with the Ministry of Economy. A foreign company that does not register but engages in activities in Libya is deemed to immediately have de facto permanent establishment status in Libya and is subject to tax on its income.

**Tax rates.** Corporate income tax is imposed at a flat rate of 20% of profits.

In addition, Jihad Tax is payable at a rate of 4% of profits.

Oil companies are subject to a composite rate of 65% which includes income tax, Jihad Tax and a surtax.

Companies established under Law 9/2010 (Investment Law) or Law 7/2003 (Tourism Law) are exempt from corporate taxes for up to 5 years and a possible additional 3 years or 10 years, respectively, as well as from stamp duty and import duties.

**Capital gains.** Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate.

**Administration.** The financial year is the calendar year, but, on application, the Tax Department may allow a different financial year.

An annual tax return must be filed within one month after approval of the company or branch accounts or four months after the year end, whichever is earlier. Consequently, for companies using the calendar year as their financial year, tax returns must be filed by 30 April.

Tax is payable in four quarterly installments beginning with the first quarterly due date after the issuance of an assessment. The quarterly due dates are 10 March, 10 June, 10 September and 10 December.

**Dividends.** Tax on dividends has been reinstated, but regulations relating to rates and rules of collection have not yet been issued.

**Royalties.** Subject to the provisions of double tax treaties, royalties are treated as trading income.

**Foreign tax relief.** Libya does not grant any relief for foreign taxes unless a double tax treaty applies.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments. A detailed body of Libyan GAAP does not exist.

Business expenses are generally deductible if incurred for business purposes unless specifically disallowed by the tax law.

**Basis of assessment.** The Commercial Code (Law 23/2010) requires that a report be issued on the accounts. Tax Law 2010 states that this will be relied on, and tax will be assessed on declared profits. Tax audits of accounts will be discretionary. However, little reliable precedent to date exists with respect to the application of the 2010 laws.

Notwithstanding the Commercial Code and Tax Law, in practice, tax has been assessed on private Libyan and foreign companies (joint stock companies and branches) based on a percentage of turnover. This is known as the “deemed profit” basis of assessment. Consequently, tax is payable even if losses are declared.

The percentage of deemed profit based on turnover varies according to the type of business activity. These percentages include the following:

- Civil works and contracting: 10% to 15%
- Oil service: 15% to 25%
- Design and consulting engineers: 25% to 40%

Each case is reviewed individually and a percentage is determined within the above broad ranges. After the preliminary final assessments are issued, taxpayers have a period of 45 days in which to negotiate an agreed settlement or to appeal. Thereafter, appeals may be made to the First and Second Appeal Committees, the Court of Appeal and finally the Supreme Court.

The deemed profit percentage applied to any year is higher than the profit percentage declared in the annual tax return.

The deemed profit basis of assessment does not apply to Libyan public companies, which are assessed on an actual basis.

**Inventories.** Inventories are valued at cost.

**Provisions.** General provisions are not allowed.

**Tax depreciation.** Depreciation must be computed using the straight-line method. The following are some of the standard depreciation rates allowed in Libya.

<b>Asset</b>	<b>Rate (%)</b>
Furniture and tools	10 to 20
Buildings	20
Passenger cars	20
Computer hardware	25
Computer software	50

Head office overhead charges are limited to 5% of expenses.

**Relief for losses.** In general, losses may be carried forward five years. However, oil companies may carry forward losses 10 years. Losses may not be carried back.

**Groups of companies.** Libyan law does not provide for the fiscal integration of related parties.

## **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Social security contributions; on employee's annual salary; paid by	
Employer	11.25
Employee	3.75
Stamp duty; the Stamp Duty Law contains 45 schedules; the most relevant items for companies and branches are the duties to register contracts and subcontracts; customers do not pay invoices unless contracts are registered and duty paid; duty for registration is based on the contract value	

<b>Nature of tax</b>	<b>Rate (%)</b>
Contracts	1
Subcontracts	0.1

### **E. Foreign-exchange controls**

The Libyan currency is the dinar (LYD).

By concession, Libyan branches of foreign companies may be paid directly offshore (up to 100%).

Libyan joint stock companies with a foreign shareholding (which may be up to 49%, effective from mid-2012; previously, up to 65%) may be paid in foreign currency, but the payments must be made into accounts held at Libyan banks.

As a result, no issue exists with respect to the remittance of profits.

### **F. Tax treaties**

Libya has entered into a multilateral tax treaty with the other Mahgreb Union countries (Algeria, Mauritania, Morocco and Tunisia). It has also entered into double tax treaties with Egypt, France, India, Malta, Pakistan, Singapore, the Slovak Republic and the United Kingdom.

Libya has signed double tax treaties with many other Asian and European countries, but these treaties have not yet been ratified.

Libya has entered into a treaty of "Friendship and Co-Operation" with Italy.

On 1 June 2013, as part of a package of measures to reduce the budget deficit, an amendment of the Liechtenstein tax law came into effect. As proposed in July 2013, a decision on further changes to the tax law was made in September 2014. These changes entered into force in December 2014 and are effective from the 2014 tax year.

## A. At a glance

Corporate Income Tax Rate (%)	12.5 (a)
Capital Gains Tax Rate (%)	24 (b)
Branch Tax Rate (%)	12.5 (a)
Withholding Tax (%)	
Dividends	0 (c)
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (d)

(a) The minimum corporate income tax is CHF1,200 per year.

(b) This is the maximum rate. See Section B.

(c) Reserves existing as of 31 December 2010 (old reserves) are subject to a withholding tax at a rate of 2.5%, which must be paid by the end of December 2015, regardless of whether the reserves are distributed. For old reserves distributed as dividends to a parent company in a treaty country, a 0% rate may be possible.

(d) The amount of the offsetting loss is limited (see Section C).

## B. Taxes on corporate income and gains

**Corporate income tax.** The current Liechtenstein tax law entered into force on 1 January 2011. It no longer contains provisions regarding special tax status (domiciliary company or holding company status). Certain tax favorable situations may result by applying deemed deductions to taxable income (see *Notional interest*

*deduction and Patent box regime for intellectual property companies*). In June 2013 and September 2014, parliament passed amendments of the Liechtenstein tax law to reduce the budget deficit (for example, changes to notional interest deduction; see *Notional interest deduction*).

Resident corporations carrying on activities in Liechtenstein are generally taxed on worldwide income other than income from foreign real estate. Income from permanent establishments abroad is exempt from income tax.

Branches of foreign corporations and nonresident companies owning real property in Liechtenstein are subject to tax on income attributable to the branch or real property.

**Rates of corporate tax.** Companies resident in Liechtenstein and foreign enterprises with permanent establishments in Liechtenstein are subject to income tax. The corporate income tax rate is 12.5%. The minimum corporate income tax is CHF1,200 per year.

**Notional interest deduction.** Deemed interest on the equity of the taxpaying entity may be deducted from taxable income. Parliament sets the applicable interest rate annually in the financial law, based on the market development. The rate was 4% for 2013 and 2014. The notional interest deduction on equity can reduce taxable income only to CHF0. As a result, loss carryforwards cannot be generated as a result of the notional interest deduction.

**Patent box regime for intellectual property companies.** Intellectual property (IP) companies may reduce taxable income by a deemed deduction of 80% on qualifying income from intellectual property (referred to as patent income). As a result of this regime, an effective tax burden of less than 2.5% may be feasible.

**Capital gains.** Capital gains, except those derived from the sales or liquidations of investments in shares or similar equity instruments and from the sales of real property, are included in income and subject to tax at the regular rate.

Capital gains derived from sales, liquidations or unrealized appreciations of investments in shares or similar equity instruments are not taxed in Liechtenstein.

Real estate profits tax applies to capital gains from the sale of real property. The tax rate depends on the amount of taxable profit. The maximum rate is 24%.

**Administration.** The tax year for a company is its fiscal year.

Companies with operations in Liechtenstein must file their tax return and financial statements no later than 1 July of the year following the end of the fiscal year (extension of the filing deadline of up to six months is possible in specific cases). The tax authorities issue a tax assessment, generally in the second half of the calendar year, which must be paid within 30 days of receipt. If they obtain approval from the tax administration, companies may pay their tax in installments.

**Dividends.** Dividends are not included in the taxable income of companies subject to tax.

Distributions of stock corporations (and other companies with capital divided into shares) are generally not subject to a withholding tax (the so-called coupon tax was abolished, effective from 1 January 2011). However, reserves existing as of 31 December 2010 are subject to a compulsory payment of withholding tax at a rate of 2.5% by the end of 2015, regardless of whether the reserves are distributed. Exemptions may be available for distributions of reserves to parent companies located in countries that have entered into double tax treaties with Liechtenstein.

### **C. Determination of trading income**

**General.** Taxable income is accounting income, subject to adjustments for tax purposes and excluding income from capital gains from sales of shares or similar equity instruments, dividends on investments in shares or similar equity instruments, foreign real property and income from permanent establishments located abroad.

Expenses related to the company's business are generally deductible. Taxes are not deductible.

Nondeductible expenses include hidden distributions to shareholders or related persons and excessive depreciation.

**Inventories.** Inventories must be valued at the lower of cost or market value, with cost calculated using the first-in, first-out (FIFO) or average-cost method. Companies may establish a general inventory reserve of up to one-third of the inventory cost or market value at the balance sheet date if detailed inventory records are available for review by the tax authorities. The need for a reserve exceeding this amount must be documented to the satisfaction of the tax authorities.

**Depreciation.** Depreciation of fixed assets that is commercially justified and recorded in the statutory accounts may be deducted for tax purposes. The straight-line and declining-balance methods are acceptable. The following are acceptable declining-balance rates:

- 5% for industrial buildings
- 20% for office equipment and furnishings
- 30% for machinery, equipment, computers and vehicles other than automobiles
- 35% for automobiles

**Relief for losses.** Losses may be carried forward to offset income for an unlimited number of years following the year of the loss. Losses may not be carried back.

The offsetting loss is limited to 70% of taxable income (even if unused loss carryforwards exist). Consequently, at least 30% of the positive taxable income is taxed. In addition, the notional interest deduction on equity can only reduce taxable income to a minimum of CHF0. This means that loss carryforwards cannot be generated as a result of the notional interest deduction.

**Groups of companies.** On request, associated companies (corporations) may form a group for tax purposes. Under group taxation,

losses of group members may be credited against profits of other group members within the same year. To apply for group taxation, the following conditions, among others, must be met:

- The parent company must have its legal seat in Liechtenstein.
- The parent company must hold at least 50% of the voting rights and the capital of the subsidiaries as of the beginning of the respective year.

For purposes of group taxation, the subsidiaries in a group may be located in foreign countries.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard rate	8
Hotels and lodging services (overnight stays only)	3.8
Basic necessities, such as food and medicine	2.5
Stamp duty on capital; imposed on incorporations and increases in capital; the first CHF1 million is exempt	1
Payroll taxes	
Social security contributions, on gross salary; paid by	
Employer	5.2204
Employee	4.55
Accident insurance, imposed on gross salary; rates vary depending on the extent of coverage	
On the job, paid by employer; rate depends on class of risk and insurance company	Various
Off the job, paid by employee (approximate rate)	1.5
Unemployment insurance; paid by	
Employer (yearly maximum, CHF630)	0.5
Employee (yearly maximum, CHF630)	0.5
Company pension fund, imposed on gross salary; minimum contribution (approximate rate, depending on plan); paid by	
Employer (approximate rate)	4
Employee (approximate rate)	4
Child allowance, imposed on gross salary; paid by employer	1.9
Health insurance, imposed on gross salary; paid in equal amounts by employer and employee; rate depends on the contribution of the mandatory insurance company	Various

#### E. Transfer pricing

Intercompany charges should be determined at arm's length. It is possible to reach an agreement in advance with the tax authorities concerning arm's-length pricing.

**F. Treaty withholding tax rates**

The rates shown are the lower of the treaty rates or the normal domestic rates.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	%	%	%
Austria	0*	0	0
Germany	0*	0	0
Hong Kong SAR	0*	0	0
Luxembourg	0*	0	0
Malta	0*	0	0
San Marino	0*	0	0
Singapore	0*	0	0
United Kingdom	0*	0	0
Uruguay	0*	0	0
Non-treaty countries	0*	0	0

\* Reserves existing as of 31 December 2010 (old reserves) are subject to a withholding tax at a rate of 2.5%, which must be paid by the end of December 2015, regardless of whether the reserves are distributed. For old reserves distributed as dividends to a parent company in a treaty country, a 0% rate may be possible.

Liechtenstein has signed double tax treaties with the Czech Republic and Guernsey, but these treaties have not yet been ratified.

**A. At a glance**

Corporate Profit Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 (b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%) (c)	
Dividends	0/15 (d)
Interest	0/10 (e)(f)
Royalties and Know-how	0/10 (e)(g)
Sale, Rent or Other Transfer of Real Estate Located in Lithuania	15 (e)
Compensation for Violations of Copyrights or Related Rights	0/10 (e)(g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5/Unlimited (h)

- (a) This is the standard rate of profit tax. Reduced rates apply to small, agricultural, social or nonprofit companies and to companies registered and operating in free-economic zones that satisfy certain conditions.
- (b) In general, capital gains are included in taxable profit and are subject to tax at the regular profit tax rate. A capital gain derived from the sale of shares of a company registered in a European Economic Area (EEA) country or in a tax treaty country is exempt from tax if either of the following conditions is satisfied:
- The shares have been held for at least two years and the holding represents more than 25% of shares of the company throughout that period.
  - The shares were transferred in a reorganization (as stipulated in the Law on Profit Tax), the shares have been held for at least three years, and the holding represents more than 25% of the shares of the company throughout that period.
- This rule does not apply if the shares are sold to the issuer of the shares.
- (c) The withholding tax rates may be reduced by applicable tax treaties.
- (d) The dividend withholding tax is a final tax. Under the participation exemption rule, the rate is 0% if the recipient is a company (not located in a tax haven) that holds at least 10% of the shares of the payer of the dividends for a period of at least 12 months.
- (e) These withholding taxes apply to payments to nonresident companies.
- (f) Interest paid to an entity registered in an EEA country or in a tax treaty country is exempt from tax. In other cases, a 10% withholding tax is applied.
- (g) Royalties, payments for know-how and compensation for violations of copyrights or related rights are subject to a 0% withholding tax if the criteria stipulated in the Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different member states are met. In other cases, the 10% withholding tax rate applies.
- (h) Losses from disposals of securities and derivative financial instruments may be carried forward five years to offset gains derived from disposals of such items. Losses from the disposal of shares of companies registered in an EEA country or in another tax treaty country cannot be carried forward if the shares have been held for at least two years and if the holding represents at least 25% of shares of the company throughout that period. However, these losses can be offset against capital gains derived from disposals of securities and derivative financial instruments in the current year. Other losses may be carried forward for an unlimited period, unless the entity ceases to carry on the activity that resulted in the loss. Also, see Section C.

**B. Taxes on corporate income and gains**

**Profit tax.** Under the Law on Profit Tax, Lithuanian companies are subject to profit tax on their worldwide income. Lithuanian (resident) companies are defined as enterprises with the rights of legal persons registered in Lithuania. For purposes of the profit tax, Lithuanian companies include companies formed in Lithuania and companies incorporated in foreign countries that are registered in Lithuania as branches or permanent establishments.

Profits of Lithuanian companies earned through permanent establishments in the EEA or in tax treaty countries are exempt in Lithuania if the profit from activities carried out through these permanent establishments is subject to corporate income tax or equivalent tax in such countries.

Foreign (nonresident) companies, which are defined as companies not incorporated in Lithuania, are subject to profit tax on their Lithuanian-source income only.

A foreign enterprise is deemed to have a permanent establishment in Lithuania if it satisfies any of the following conditions:

- It permanently carries out activities in Lithuania.
- It carries out its activities in Lithuania through a dependent representative (agent).
- It uses a building site or a construction, assembly or installation object in Lithuania.
- It uses installations or structures in Lithuania for prospecting or extracting natural resources, including wells or vessels used for that purpose.

International telecommunication income and 50% of income derived from transportation that begins in Lithuania and ends in a foreign country or that begins in a foreign country and ends in Lithuania are considered to be income received through a permanent establishment if such activities relate to the activities of a foreign enterprise through a permanent establishment in Lithuania.

**Tax rates.** The standard profit tax rate is 15%.

A 5% rate applies to small entities with annual income not exceeding EUR300,000 (effective from 1 January 2015) and an average number of employees that does not exceed 10 for the tax year.

A 5% rate applies to the taxable profit of agricultural entities. An entity is deemed to be an agricultural entity if more than 50% of its income is derived from agricultural activities.

Entities registered and operating in a free economic zone benefit from 100% exemption from profit tax for 6 years and a further 50% reduction in profit tax for an additional 10 years if they make investments in fixed assets of at least EUR1 million and if at least 75% of the entity's income is derived from the following activities:

- Production
- Processing
- Storage
- Manufacturing of aircraft and spacecraft and related equipment
- Repair and maintenance of aircraft and spacecraft and services related to such activities
- Computer programming activities
- Computer consulting activities
- Management of computer equipment
- Other information technologies and computer services activities
- Data analytics
- Web servers (hosting) and related activities
- Call center activities
- Wholesale trade in goods stored in the zone and services related to such activities

Currently, free-economic zones are located in Kaunas, Kėdainiai, Klaipėda, Marijampolė and Panevėžys. Free-economic zones in Akmenė and Šiauliai are in the process of establishment.

Social enterprises, which have 40% or more employees included in target groups (for example, disabled individuals and long-term unemployed), are eligible for a 0% tax rate. In addition, the entity may not perform the activities included in the list of unsupported activities (for example, hunting, and alcohol and tobacco production) of social enterprises.

Nonprofit entities are subject to profit tax if they engage in business activities. If the annual business income of a nonprofit entity does not exceed EUR300,000 (effective from 1 January 2015), a 0% tax rate applies to the first EUR7,250 (effective from 1 January 2015) of taxable profit. The remaining part of the taxable profit is subject to tax at a rate of 15%. Income received from activities carried out to satisfy public interests that is intended to be used for the funding of such activities is not considered income received from business activities of nonprofit entities.

Entities engaged in international transportation by ships or in a directly related activity can elect to be taxed on a special tax base related to the net tonnage of their fleet. The tax on such entities is calculated by applying the 15% corporation tax to the net tonnage instead of the taxable profit of the entities.

**Capital gains.** Capital gains are included in taxable profit and are subject to tax at the regular profit tax rate, except for gains and losses derived from disposals of securities and derivatives. Gains and losses on securities and derivatives are included in a separate tax base that is subject to tax at the regular profit tax rate. A capital gain derived from the sale of shares of a company registered in an EEA country or in a tax treaty country is exempt from tax if the shares have been held for an uninterrupted period of at least two years and if the holding represents more than 25% of the shares of the company throughout that period.

The exemption mentioned above does not apply if the shares are transferred to the issuer of the shares.

Capital gains derived from the transfer of shares in a reorganization or from another transfer specified in the law is exempt from tax if the shares have been held for an uninterrupted period of at least three years and if the holding represents more than 25% of the shares of the company throughout that period.

### **Administration**

*Tax year.* The tax year is the calendar year. Companies may request permission to use a different 12-month tax year, which must be used continuously.

*Profit tax.* Companies must file profit tax returns with the tax inspectorate by the first day of the sixth month following the end of the tax year.

Companies must make quarterly advance payments of profit tax by the last day of the first three quarters and by the 25th day of the last quarter. The law specifies two methods that companies may choose to calculate their advance profit tax. The chosen method

must be applied consistently throughout the year, but it can be changed once in the tax year. The following are the specified methods:

- The results of prior financial years. The advance payments for the first nine months are calculated based on the profit tax for the year before the preceding year. Each of these advance payments equals 25% of the profit tax for such year. For the 10th through 12th months of the tax year, the advance payment equals 25% of the profit tax calculated for the preceding tax year.
- The forecasted profit tax of the current year. Each of the advance payments equals 25% of the forecasted profit tax for such year. However, the total of the advance profit tax payments made during the tax year must total at least 80% of annual profit tax.

If companies choose to pay the advance profit tax based on the results of prior financial years, they must file two profit tax advance payment returns. The first return covers the first nine months of the tax year and must be filed by the last day of the first month of the tax year. The second return covers the last 3 months of the tax year and must be filed by the last day of the 10th month of the tax year.

If the advance profit tax payment is based on the forecasted profit tax of the current year, the profit tax advance payment return must be filed by the last day of the first month of the tax year.

Newly registered enterprises in their first tax year and enterprises with taxable profit not exceeding EUR300,000 (effective from 1 January 2015) in the preceding tax year are not required to make advance payments of profit tax.

Any balance of tax due for a tax year must be paid by the first day of the sixth month following the tax year. If the total of the advance payments exceeds the tax due for the tax year, a company may obtain a refund or apply the excess to future taxes. Taxes must be paid in euros, effective from 1 January 2015.

*Withholding taxes.* Withholding taxes together with returns for such taxes must be submitted to the tax inspectorate by the 15th day of the month following the month in which the taxes are withheld.

**Withholding taxes.** Withholding tax at a rate of 10% is imposed on the following types of payments to nonresident companies:

- Interest
- All types of royalties
- Compensation for violations of copyrights or related rights

Interest paid to an entity registered in an EEA country or in a tax treaty country is exempt from tax.

Royalties, payments for know-how and compensation for violations of copyrights or related rights are exempt from withholding tax if the criteria stipulated in the Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different member states are met.

Withholding tax at a rate of 15% is imposed on the following types of payments to nonresident companies:

- Dividends (for further details, see *Dividends*)
- Payments with respect to the sale, rent or other transfer of immovable property located in Lithuania
- Payments for performance and sport activity in Lithuania
- Directors' fees to members of the Supervisory Board

**Dividends.** Dividends received from Lithuanian and foreign companies are subject to corporate profit tax at a rate of 15%. The 15% tax on dividends paid by Lithuanian companies is withheld at source.

For dividends paid by Lithuanian companies to other Lithuanian companies, profit tax for the preceding tax year is reduced for the company receiving dividends by the withholding tax calculated on the dividends. However, the amount of the reduction may not exceed the amount of profit tax for the preceding tax year. The amount of the withholding tax not used to reduce the preceding year's tax may be set off against other taxes or refunded by the tax authorities. Payers of dividends must pay the withholding tax on the dividends to the tax authorities by the 10th day of the month following the month of payment of the dividends.

Lithuanian resident companies receiving dividends from foreign companies must pay the tax on the dividends to the tax authorities by the 10th day of the month following the month of receipt of the dividends.

Under the participation exemption rule, dividends are not subject to profit tax if the recipient is a company (not located in a tax haven) that holds at least 10% of the shares of the payer of the dividends for a period of at least 12 months. The participation exemption does not apply to dividends distributed to individuals from the following types of profit:

- Profits that were subject to a 0% tax rate
- Profits that were reduced by investment relief
- Profits that were not taxed because of specific exemptions indicated in the law

Dividends paid by foreign companies to Lithuanian companies are not subject to tax if the company paying the dividends is registered in an EEA country and if the company's profits were subject to corporate profit tax or an equivalent tax.

The participation exemption also applies to the following:

- Dividends that are attributed to the permanent establishment of a foreign company in Lithuania
- Cash payments made to reduce the company's capital that was formed using the company's earnings

**Foreign tax relief.** In general, a foreign tax credit may be claimed in an amount not exceeding the amount of Lithuanian profit tax payable on the foreign income. Special rules apply to particular types of income, unless a double tax treaty provides otherwise.

The exemption method is applied to profit from activities carried out through permanent establishments of Lithuanian entities in EEA countries or in tax treaty countries if profit from activities carried out through these permanent establishments is subject to corporate income tax or equivalent tax in such countries.

## C. Determination of taxable income

**General.** Profit before tax equals gross revenue, minus expenses incurred in earning such revenue.

Taxable profit is calculated by taking the following actions:

- Subtracting non-taxable income (for example, after-tax dividends, revenues from the revaluation of fixed assets under certain circumstances and payments received from insurance companies up to the amount of incurred losses) from the accounting profit
- Taking into account nondeductible expenses and deductible expenses of a limited amount

Deductions are allowed if they are incurred during the usual business activity and are necessary to earn revenues or obtain economic benefits, provided that documentary evidence is presented.

Expenses incurred for the benefit of employees are allowable deductions if the benefit received by employees is subject to personal income tax.

Expenses that may be deducted up to certain limits include, among others, the following:

- Depreciation and amortization
- Business trip expenses
- Representation expenses
- Provisions for bad debts
- Natural losses

A double deduction is allowed for sponsorship payments (except payments in cash exceeding EUR9,750 to a single sponsorship recipient), up to a maximum deduction equal to 40% of the taxable profit.

A triple deduction is allowed for research and development (R&D) costs if the scientific R&D activities are related to the usual or intended activities of the entity that generate or will generate income or economic benefits.

Nondeductible amounts include dividends and costs that are incurred outside the usual business operations, that are inappropriately documented or that are related to earning non-taxable income.

Payments to tax havens may be deducted only if the Lithuanian enterprise can prove that certain conditions evidencing the economic basis of the transaction were met.

Other taxes (for example, social insurance contributions and real estate tax) may be deducted from taxable income.

Effective from 1 January 2015, the income and expenses of enterprises must be converted to euros.

**Inventories.** Inventories must be valued at actual cost, which is calculated using the first-in, first-out (FIFO) method. On approval of the tax authorities, a taxpayer may apply the average cost or last-in, first-out (LIFO) method.

**Tax depreciation.** To calculate tax depreciation, companies may select the straight-line method, double-declining value method or

production method. The selected depreciation method must be applied for all assets of the same type. To change the depreciation method, companies must obtain the approval of the local tax authorities.

Under the straight-line method, depreciation is claimed each year in equal portions. Under the double-declining value method, the depreciation or amortization coefficient is calculated by multiplying the straight-line rate by two. For the purpose of calculating the amount of depreciation or amortization for the tax period during the first year, the acquisition price of long-term assets is multiplied by the depreciation coefficient. To calculate the depreciation or amortization of long-term assets during the other years, except for the last year, the residual value of long-term assets at the beginning of the tax year is multiplied by the depreciation coefficient. Under the production method, depreciation is calculated based on the number of units produced over the asset's useful life.

Accelerated depreciation may be claimed for assets used in R&D activities. The law sets the maximum depreciation rates. These rates determine the minimum number of years over which assets may be depreciated. The following are some of the minimum periods.

<b>Assets</b>	<b>R&amp;D Minimum period for depreciation Years</b>	<b>Other Minimum period for depreciation Years</b>
Intangible assets	2 to 15	3 to 15
Buildings and premises		
Constructed or reconstructed on or after 1 January 2002	8	8
Constructed or reconstructed before 1 January 2002	15 to 20	15 to 20
Plant and machinery	2 to 15	5 to 15
Computers	2	3
Vehicles	4 to 10	4 to 10
Other assets	2	4

**Relief for research and development works.** In the calculation of profit tax, three times the amount of R&D expenses, except for depreciation or amortization costs of fixed assets, may be deducted from income in the corresponding tax year. Fixed assets that are used for R&D may be depreciated or amortized applying accelerated depreciation (amortization) rates.

**Relief for investment projects.** The taxable profit of a Lithuanian entity may be reduced by up to 50% by the amount of expenses that are incurred in the acquisition of fixed assets used in an "investment project." For this purpose, an "investment project" is investment in certain categories of fixed assets (machinery, equipment, information technology hardware and software, acquired intellectual property rights and lorries, trailers and semitrailers that are not older than five years), required for the manufacturing or supply of new products (or services), increasing production volume, the implementation of a new process of production (or supply of services), essential changes to an existing process (or part of the process) and the implementation of new technologies that are protected by international patent law. Acquisition costs of

lorries, trailers and semitrailers purchased during a tax year may reduce taxable profit only up to EUR300,000 (effective from 1 January 2015); the 50% taxable profit reduction rule still applies. This relief may be applied in the 2009 through 2018 tax years, and the balance of unused relief may be carried forward to the subsequent four years.

**Relief for film production.** A Lithuanian entity or a foreign entity operating through a permanent establishment in Lithuania that makes a contribution to a Lithuanian film producer for the production of a film or parts of a film may deduct 75% of the contribution from its taxable income and reduce its profit tax payable by the amount of the contribution if certain conditions are met. Profit tax payable for the tax year may be reduced up to 75%, and the balance of unused relief may be carried forward to the subsequent two years. This tax relief may be applied in the 2014 through 2018 calendar years.

**Relief for losses.** Losses, except losses resulting from disposals of securities and derivative financial instruments, may be carried forward for an unlimited period. Effective from the 2014 tax year, taxpayers except for small entities can cover only up to 70% of their taxable profit with accumulated tax losses. The carry-forward of such losses is no longer allowed if the activity that resulted in the loss ceases. Loss resulting from disposals of securities and/or derivative financial instruments may be carried forward for five years. However, such losses may be covered only by future gains from the disposal of securities and/or derivative financial instruments.

For a reorganization or transfer, the acquiring entity may carry forward the acquired losses, except for losses of entities (non-financial institutions) resulting from the disposal of securities and derivatives, incurred before the completion of the reorganization or transfer if the acquiring entity continues to carry on the activity taken over or a part of such activity for a period of at least three years. Effective from the 2014 tax year, taxpayers except for small entities can cover only up to 70% of their taxable profit with tax losses acquired during a reorganization or transfer.

**Groups of enterprises.** Corporations are taxed separately in Lithuania. Consolidated returns are not allowed. The transfer between group entities of tax losses incurred in the 2010 tax year and subsequent tax years is allowed. Certain conditions apply.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; intra-EU supplies and exports are zero-rated	0/5/9/21
Real estate tax, on the taxable value of real estate (the value is calculated by real estate registry institutions using methodology established by the government); maximum rate	3
Social security tax; paid by	
Employer	27.98
Employee	3

Nature of tax	Rate (%)
(Until 30 November 2013, employees could write a request to the pension accumulation company to pay additional contributions from his or her salary to the pension accumulation fund; in such cases, an employer must withhold 4% as social security contributions.)	
Health insurance contributions; paid by Employer	3
Employee	6

Other significant taxes include excise duty, land and land lease tax, tax on the use of Lithuanian natural resources and pollution tax.

## E. Miscellaneous matters

**Foreign-exchange controls.** Effective from 1 January 2015, the Lithuanian currency is the euro (EUR).

If agreed to by the parties, foreign currency may be used for bank payments between business entities, and the euro may be used for both bank and cash payments. Commercial operations involving foreign currency, such as purchasing, selling and exchanging, may be performed by the following:

- Credit, payment and electronic money institutions or other payment service providers if it is related to provision of payment service
- Financial brokerage companies if it is related to provision of investment service
- Currency exchange operators working under the Law on Currency Exchange Operators

**Transfer pricing.** Entities operating in Lithuania that had revenues exceeding EUR2,896,200 for the tax year preceding the tax year during which transactions with related parties are undertaken are subject to the Lithuanian transfer-pricing rules. Under these rules, they must maintain supporting documentation establishing that all transactions with associated parties are carried out on an arm's-length basis. Lithuanian transfer-pricing rules are based on the Organisation for Economic Co-operation and Development Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Companies must file with the tax inspectorate a return reporting the transactions entered into with associated parties, together with their profit tax returns, if the total value of the transactions exceeds EUR90,000 (effective from 1 January 2015).

**Controlled foreign companies.** Certain income of controlled entities located in countries or zones included in the special list approved by the Minister of Finance is added to taxable income of Lithuanian entities and taxed at the standard profit tax rate.

## F. Treaty withholding tax rates

The following table lists the maximum withholding rates under Lithuania's tax treaties.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Armenia	5/15 (a)	10	10
Austria	5/15 (a)	10	5/10 (b)

## A. At a glance

Corporate Income Tax Rate (%)	21 (a)
Capital Gains Tax Rate (%)	21 (a)
Branch Tax Rate (%)	21 (a)
Withholding Tax (%)	
Dividends	0/15 (b)
Interest	0/10 (c)
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) This is the maximum rate. In addition, a municipal business tax and an additional employment fund contribution (employment fund surcharge) are levied on income (see Section B). A new minimum tax regime is effective from 1 January 2013 (see Section B).
- (b) A 15% dividend withholding tax is imposed on payments to resident and nonresidents. Under Luxembourg domestic law, a full withholding tax exemption applies to dividends if they are paid to qualifying entities established in European Union (EU)/European Economic Area (EEA) member states, Switzerland or a country with which Luxembourg has entered into a double tax treaty and if certain conditions are met (see Sections B and F).
- (c) For details, see *Interest* in Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide income. Companies whose registered office or central administration is in Luxembourg are considered resident companies.

Taxation in Luxembourg of foreign-source income is mitigated through several double tax treaties. In addition, if no tax treaty applies, a foreign tax credit is available under domestic law.

Nonresident companies whose registered office and place of management are located outside Luxembourg are subject to corporate income tax only on their income derived from Luxembourg sources.

A new minimum tax regime applicable to all taxpayers took effect in Luxembourg on 1 January 2013.

**Tax rates.** Corporate income tax rates range from 20% to 21%, depending on the income level. In addition, a surcharge of 7% is payable to the employment fund. A local income tax (municipal business tax) is also levied by the different municipalities. The rate varies depending on the municipality, with an average rate of 7.5%. The municipal business tax for Luxembourg City is 6.75% and the maximum effective overall tax rate for companies in Luxembourg City is 29.22%. The following is a sample 2015 tax calculation for a company in Luxembourg City.

Profit	EUR100.00
Corporate income tax at 21%	(21.00)
Employment fund surcharge at 7%	(1.47)
Municipal business tax	(6.75)
	<u>EUR70.78</u>
Total income taxes	<u>EUR29.22</u>
As percentage of profit	<u>29.22%</u>

A new general minimum tax for all taxpayers subject to corporate income tax (except certain holding companies; see next paragraph) took effect in Luxembourg on 1 January 2013. The tax ranges from EUR500 to EUR20,000 (plus contribution to the employment fund), depending on the balance-sheet total as of the closing date of the financial year. Assets that generate income (or are likely to generate income) for which the taxation right belongs to another country based on a double tax treaty concluded with Luxembourg (for example, immovable property, or assets allocated to a permanent establishment) must be excluded from the balance-sheet total for the purpose of determining the minimum tax. As a result, the new minimum tax does not significantly affect, among others, Luxembourg real estate vehicles holding directly foreign real estate property. It is not possible to reduce the minimum tax by applying certain available domestic tax credits (see *Tax Credits* in Section C), except with respect to local withholding tax. The minimum tax applies only to corporate entities that have their statutory seat or place of central administration in Luxembourg. Consequently, nonresident corporate entities deriving Luxembourg-source income, such as foreign entities with a permanent establishment in Luxembourg or holding a real estate property in Luxembourg, are out of the scope of the minimum tax. Companies that are part of a tax-consolidation group suffer this minimum tax at the level of each entity, but the consolidated amount of minimum tax is capped at an amount of EUR20,000. The minimum tax (plus the contribution to the employment fund)

levied for a given year is regarded as an advance payment of corporate income tax for subsequent years, to the extent that it exceeds the amount of minimum tax (plus contribution to the employment fund) determined for that subsequent year. However, the minimum tax is never refunded to the taxpayer.

The minimum tax for certain holding companies was increased, effective from 1 January 2013. All corporate entities having their statutory seat or central administration in Luxembourg are in the scope of the amended minimum tax regime and subject to a EUR3,000 minimum tax if the sum of fixed financial assets, transferable securities, cash, and receivables owed to affiliated companies exceeds 90% of their balance-sheet total. Consequently, a regulated entity (such as a venture capital company [*société d'investissement en capital à risque*, or SICAR] and a securitization vehicle) are in the scope of the minimum tax for holding companies to the extent that the above threshold requirements are met. The provision under prior law restricting the minimum tax regime to entities whose activities do not require a business license or the approval of a supervisory authority was abolished. The rules mentioned in the preceding paragraph with respect to tax consolidation (cap of EUR20,000), the unavailability of domestic tax credits and the treatment as an advance corporate income tax payment also apply.

The 2015 Budget Law provides for a further condition to be met in order for the EUR3,000 minimum tax to apply. In addition to the 90% threshold described in the preceding paragraph, the sum of the qualifying financial assets must exceed EUR350,000.

**Luxembourg investment vehicles.** Luxembourg offers a large number of investment vehicles (companies and funds) that can be used for tax-efficient structuring.

Luxembourg Undertakings for Collective Investment in Transferable Securities (UCITs) are subject to an annual subscription tax (*taxe d'abonnement*) of 0.05%, levied on their total net asset value, unless a reduced rate or an exemption applies. For the rates of the subscription tax, see Section D. Distributions made by UCITs are not subject to withholding tax.

Investment vehicles offered in Luxembourg are described below.

*Specialized Investment Funds.* Specialized Investment Funds (SIFs) are lightly regulated investment funds for “informed investors.” In this context, an “informed investor” is one of the following:

- An institutional investor
- A professional investor
- Any other type of investor who has declared in writing that he or she is an “informed investor” and either invests a minimum of EUR125,000 or has an appraisal from a bank, an investment firm or a management company (all of these with a European passport), certifying that he or she has the appropriate expertise, experience and knowledge to adequately understand the investment made in the fund

SIFs are subject to significantly simplified rules for setting up fund structures such as hedge funds, real estate funds and private equity funds. Amendments to the SIF Law covering items, such

as the authorization process, delegation, risk management, conflict of interest and cross investment between compartments of SIFs, took effect on 1 April 2012.

An exemption for corporate income tax, municipal business tax and net worth tax applies to investment funds in the form of an SIF. These funds are subject only to a subscription tax at an annual rate of 0.01% calculated on the quarterly net asset value of the fund, unless an exemption regime applies (for example, investments in funds already subject to the subscription tax, certain money market funds and pension pooling vehicle funds). Distributions by SIFs are not subject to withholding tax.

Certain double tax treaties signed by Luxembourg apply to an SIF incorporated as an investment company with variable capital (*société d'investissement à capital variable*, or SICAV) or an investment company with fixed capital (*société d'investissement à capital fixe*, or SICAF). In general, an SIF constituted as a common fund (*fonds commun de placement*, or FCP) does not benefit from double tax treaties.

*Venture capital companies.* A venture capital company (*société d'investissement en capital à risque*, or SICAR) can be set up under a transparent tax regime as a limited partnership or under a nontransparent tax regime as a corporate company. SICARs are approved and supervised by the Commission for the Supervision of the Financial Sector, but they are subject to few restrictions. They may have a flexible investment policy with no diversification rules or leverage restrictions. SICARs in the form of a corporation benefit from a partial objective exemption regime for income from securities under which losses on disposals and value adjustments made against such investments are not deductible from taxable profits. In addition, SICARs are exempt from subscription tax and net worth tax. For corporations, a dividend withholding tax exemption regime applies. SICARs may be in scope of the minimum tax regime, effective from 1 January 2013, to the extent that the threshold requirements are met (see *Tax rates*).

*Securitization companies.* A securitization company can take the form of a regulated investment fund or a company (which, depending on its activities, may or may not be regulated). Securitization companies are available for securitization transactions in the broadest sense and are not subject to net worth tax. They are subject to corporate income tax and municipal business tax. However, commitments to investors (dividend and interest payments) are deductible from the tax base. Nevertheless, securitization companies may be in scope of the minimum tax regime, effective from 1 January 2013, to the extent that the threshold requirements are met (see *Tax rates*). Distributions of proceeds are qualified as interest payments for Luxembourg income tax purposes and are consequently not subject to withholding tax.

*Private Asset Management Companies.* The purpose of a Private Asset Management Company (Société de Gestion de Patrimoine Familial, or SPF) is the management of private wealth of individuals without carrying out an economic activity. SPFs are subject to subscription tax levied at a rate of 0.25% with a minimum amount of EUR100 and a maximum amount of EUR125,000. An exemption for corporate income tax, municipal business tax and net worth tax applies.

SPFs may not benefit from double tax treaties entered into by Luxembourg or from the EU Parent-Subsidiary Directive. Dividend and interest income arising from financial assets may be subject to withholding tax in the state of source in accordance with the domestic tax law of that state. Until 31 December 2011, the favorable tax status for SPFs was lost for any year in which the vehicle received 5% or more of its dividend income from participations in unlisted and nonresident companies that were not subject to a tax similar to Luxembourg corporate income tax. Under the amended law, effective from 1 January 2012, this restriction is removed. Dividend distributions to shareholders are not subject to Luxembourg withholding tax. Interest payments are exempt from withholding tax unless the recipient is a Luxembourg resident individual (see *Interest*).

*Patrimonial foundations.* To further enhance the attractiveness of Luxembourg as a location for the management and administration of private wealth, the Minister of Finance issued on 22 July 2013 a draft Law No. 6595 on patrimonial foundations. The patrimonial foundation manages and administers assets for the benefit of one or more beneficiaries or for the benefit of one or more purposes other than those exclusively reserved to foundations governed by the modified law dated 21 April 1928 on nonprofit associations and foundations. It may not engage in any commercial, industrial, agricultural or self-employed activities. In contrast to a trust, the patrimonial foundation benefits from a legal personality.

The patrimonial foundation is an autonomous taxpayer subject to corporate income tax. The income generated by the foundation is treated as commercial income from a tax perspective. Consequently, it is also subject to municipal business tax. However, the patrimonial foundation is exempt from net wealth tax.

The following types of income are exempt from tax at the level of the patrimonial foundation:

- Any income derived from capital
- Capital gains realized on the sale of assets generating income from capital
- Capital gains realized on the sale of movable assets if the sale takes place more than six months after the acquisition
- Capital and the redemption value received under an individual long-term savings, disability or life insurance policy

Realized and unrealized losses, as well as foreign-exchange losses, on the above assets are not deductible for tax purposes.

*Holding companies.* Holding companies (*sociétés de participations financières*, or *SOPARFI*) are fully taxable Luxembourg resident companies that take advantage of the participation exemption regime. They may benefit from double tax treaties signed by Luxembourg as well as the provisions of the EU Parent-Subsidiary Directive. For information regarding debt-to-equity rules, see Section E. A SOPARFI can be set up as a public company limited by shares (*société anonyme*), limited company (*société à responsabilité limitée*) or a partnership limited by shares (*société en commandite par actions*, or *SCA*). Loss-making qualifying holding companies are subject to a minimum tax of EUR3,000 plus employment fund (EUR1,500 plus employment fund until 31 December 2012; see *Tax rates*).

**Capital gains.** The capital gains taxation rules described below apply to a fully taxable resident company.

Capital gains are generally regarded as ordinary business income and are taxed at the standard rates. However, capital gains on the sale of shares may be exempt from tax if all of the following conditions apply:

- The recipient is one of the following:
  - A resident capital company or a qualifying entity fully subject to tax in Luxembourg.
  - A Luxembourg permanent establishment of an entity that is resident in another EU state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
  - A Luxembourg permanent establishment of a capital company resident in a state with which Luxembourg has entered into a tax treaty.
  - A Luxembourg permanent establishment of a capital company or cooperative company resident in an EEA state other than an EU state.
- The shares have been held for 12 months or the shareholder commits itself to hold its remaining minimum shareholding in order to fulfill the minimum shareholding requirement for an uninterrupted period of at least 12 months.
- The holding represents at least 10% of the capital of the subsidiary throughout that period, or the acquisition cost is at least EUR6 million.
- The subsidiary is a resident capital company or other qualifying entity fully subject to tax, a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax or an entity resident in an EU member state that is covered by Article 2 of the EU Parent-Subsidiary Directive.

However, capital gains qualifying for the above exemption are taxable to the extent that related expenses deducted in the current year and in prior years exceed the dividends received. These related expenses include interest on loans used to finance the purchase of such shares and write-offs.

**Administration.** In general, the tax year coincides with the calendar year unless otherwise provided in the articles of incorporation. Tax returns must be filed before 31 May in the year following the fiscal year. The date may be extended on request by the taxpayer. Late filing may be subject to a penalty of up to 10% of the tax due.

Taxes are payable within one month after receipt of the tax assessment notice. However, advance payments must be made quarterly by 10 March, 10 June, 10 September and 10 December for corporate income tax, and by 10 February, 10 May, 10 August and 10 November for municipal business tax and net worth tax. In general, every payment is equal to one-quarter of the tax assessed for the preceding year. If payments are not made within these time limits, an interest charge of 0.6% per month may be assessed.

Luxembourg has introduced a partial self-assessment procedure that is optional for the authorities. This procedure allows the authorities to release tax assessments without verifying the filed tax returns, while keeping a right of verification within a statute of limitations period of five years. In practice, the self-assessment primarily applies to companies having a holding activity.

**Dividends.** Dividends received by resident companies are generally taxable. However, dividends received from resident taxable companies are fully exempt from corporate income tax if the following conditions are fulfilled:

- The recipient is one of the following:
  - A resident capital company or a qualifying entity fully subject to tax in Luxembourg.
  - A Luxembourg permanent establishment of an entity that is resident in another EU state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
  - A Luxembourg permanent establishment of a capital company resident in a state with which Luxembourg has entered into a tax treaty.
  - A Luxembourg permanent establishment of a capital company or cooperative company resident in an EEA state other than an EU state.
- The recipient owns at least 10% of the share capital of the distributing company or the acquisition cost of the shareholding is at least EUR1,200,000.
- The recipient holds the minimum participation in the distributing company for at least 12 months. The 12-month period does not need to be completed at the time of the distribution of the dividends if the recipient commits itself to hold the minimum participation for the required period.

Dividends received from nonresident companies are fully exempt from tax if the above conditions are met and if either of the following applies:

- The distributing entity is a capital company subject to a tax comparable to Luxembourg corporate income tax of at least 10.5%.
- The distributing entity is resident in another EU member state and is covered by Article 2 of the EU Parent-Subsidiary Directive.

The exemption for dividends also applies to dividends on participations held through qualifying fiscally transparent entities.

Expenses (for example, interest expenses or write-downs with respect to participations that generate exempt income) that are directly economically related to exempt income (for example, dividends) are deductible only to the extent that they exceed the amount of exempt income.

If the minimum holding period or the minimum shareholding required for the dividend exemption granted under Luxembourg domestic law is not met, the recipient can still benefit from an exemption for 50% of the dividends under certain conditions.

On the distribution of dividends, as a general rule, 15% of the gross amount must be withheld at source; 17.65% of the net dividend must be withheld if the withholding tax is not charged to the recipient. No dividend withholding tax is due if one of the following conditions is met:

- The recipient holds directly, or through a qualifying fiscally transparent entity, for at least 12 months (the holding period requirement does not need to be completed at the time of the distribution if the recipient commits itself to eventually hold the minimum participation for the required 12-month period) at least 10% of the share capital of the payer, which must be a fully taxable resident capital company or other qualifying entity, or

shares of the payer that had an acquisition cost of at least EUR1,200,000, and the recipient satisfies one of the following additional requirements:

- It is a fully taxable resident capital company or other qualifying entity or a permanent establishment of such company or entity.
- It is an entity resident in another EU member state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
- It is a capital company resident in Switzerland that is fully subject to tax in Switzerland without the possibility of being exempt.
- It is a Luxembourg permanent establishment of an entity that is resident in another EU member state and that is covered by Article 2 of the EU Parent-Subsidiary Directive.
- It is a company resident in a state with which Luxembourg has entered into a tax treaty and is subject to a tax comparable to the Luxembourg corporate income tax of at least 10.5%, or it is a Luxembourg permanent establishment of such a company.
- It is a company resident in an EEA member state and is subject to a tax comparable to the Luxembourg corporate income tax of at least 10.5%, or it is a Luxembourg permanent establishment of such a company.
- A more favorable rate is provided by a tax treaty.
- The distributing company is an investment fund, an SIF, an SPF, an SICAR or a securitization company.

**Interest.** Except for the cases discussed below, no withholding tax is imposed on interest payments. For interest linked to a profit-sharing investment, dividend withholding tax may apply.

According to the EU Savings Directive as implemented in the law, interest payments made by Luxembourg payers to beneficial owners who are individuals resident in other EU member states or to certain residual entities (defined as paying agents on receipt in the directive) are subject to withholding tax, unless the recipient elects that information regarding the interest payment be exchanged with the tax authorities of his or her state of residence. The withholding tax rate is 35%.

On 29 May 2013, the Minister of Finance signed the convention on Mutual Administrative Assistance in Tax Matters, which represents a commitment to implement the principle of automatic exchange of information. The law of 25 November 2014 abolished the withholding tax described above. As of 1 January 2015, the option to deduct withholding tax from interest payments to EU-resident individuals is no longer applicable in Luxembourg.

Withholding tax at a rate of 10% is imposed on interest payments made to individuals resident in Luxembourg by the following:

- Luxembourg paying agents
- Paying agents established in the EEA or in a state with which Luxembourg has concluded an agreement containing measures equivalent to those in the EU Savings Directive, if a specific form is filed by 31 March of the calendar year following the year of receipt of the interest

The withholding tax is final if the interest income is derived from assets held as part of the private wealth of the individual. The

10% final tax has been extended to interest payments made by paying agents residing in other EU and EEA countries. In principle, the convention on Mutual Administrative Assistance in Tax Matters does not affect the fiscal regime for Luxembourg resident individuals. Consequently, this regime remains unchanged.

**Foreign tax relief.** A tax credit is available to Luxembourg resident companies for foreign-source income (derived from a country with which no double tax treaty is in place) that has been subject to an equivalent income tax abroad. The same applies to withholding tax that would have been levied in the country of source of the income, according to the provisions of the applicable double tax treaty and Luxembourg tax law. The maximum tax credit corresponds to the Luxembourg corporate income tax that is payable on the net foreign-source income.

### C. Determination of trading income

**General.** The taxable income of corporations is based on the annual financial statements prepared in accordance with generally accepted accounting principles. Profits disclosed are adjusted for exempt profits, nondeductible expenses, special deductions and loss carryforwards.

Expenses incurred exclusively for the purposes of the business are deductible. Expenses incurred with respect to exempt income are disallowed (see Section B for a description of the tax treatment of expenses related to tax-exempt dividends).

**Accounting rules.** International Financial Reporting Standards (IFRS), as adopted by the EU, were introduced in Luxembourg in 2010. Undertakings may apply the IFRS provisions to financial years that remained open on the date of entry into force of this law. However, a tax balance sheet is required to avoid the taxation of unrealized gains.

A new chart of accounts and an electronic filing requirement for the trial balance for statistical purposes became mandatory in Luxembourg for certain entities for fiscal years beginning after December 2010.

**Inventories.** Inventory must be valued at the lower of acquisition (or production) cost or fair market value. The cost may be calculated either on the basis of weighted-average prices, first-in, first-out (FIFO), last-in, first-out (LIFO) or a similar method, provided the business situation justifies such a method. The method chosen should be applied consistently.

**Provisions.** Provisions for losses and uncertain liabilities may be deductible for tax purposes if they are based on objective facts and if the corresponding charge is deductible and economically connected to the relevant tax year.

**Tax depreciation.** The straight-line depreciation method and, under certain conditions, the declining-balance method (except for buildings) are allowed.

Commercial buildings are depreciated at straight-line rates ranging from 1.5% to 4%. The straight-line rate for industrial buildings is 4%. Land may not be depreciated.

The depreciation rates under the straight-line method are 10% for plant and machinery, 20% for office equipment and 25% for motor vehicles. The declining-balance depreciation rates may be as high as 3 times the straight-line depreciation rate without exceeding 30% (4 times and 40% for equipment exclusively used for research and development).

Depreciable assets with a useful life of one year or less and those with a value not exceeding EUR870 may be deducted in full from business income in the year of acquisition.

**Special tax depreciation for investments in clean technology.** Businesses making eligible investments aimed at protecting the environment and providing for rational use of energy may elect an accelerated tax amortization of 80% of the depreciation base.

**Intellectual property.** Income, royalties and capital gains derived by resident corporate entities or Luxembourg permanent establishments of nonresident companies from certain intellectual property (IP) rights acquired or developed after 31 December 2007, except those acquired from an associated company, benefit from a partial tax exemption of 80% of the net income arising from the use of, or the right to use, the IP rights. A loss remains fully deductible for tax purposes but it is recaptured in the year in which a gain is derived on the sale of IP. A notional deduction of 80% for the use of a self-developed patent by a company for its own activity is also granted. Capital gains derived from the disposal of qualifying IP rights also benefit from the exemption regime. In addition to the partial exemption from income taxes, qualifying IP rights also benefit from a full net worth tax exemption in Luxembourg.

### **Tax credits**

*General investment tax credit.* A tax credit of 12% is granted for additional investments in qualifying assets. Qualifying assets consist of depreciable tangible fixed assets other than buildings physically used in EU member states, Iceland, Liechtenstein and Norway (EEA). Certain assets are excluded from the additional tax credit in the year of their acquisition, such as motor vehicles, assets that have a useful life of less than three years and second-hand assets. In addition, a 7% credit is granted for qualifying new investments up to EUR150,000, and a 2% credit is granted for investments over that amount. If investments are made to create jobs for disabled persons, these rates are increased to 8% and 4%, respectively. Investments may qualify for both credits.

*Tax credit for ecological equipment.* The rates for the general investment tax credit (see *General investment tax credit*) are increased from 7% to 8% and from 2% to 4% for certain investments intended to protect the environment.

The above credits reduce corporate income tax and may be carried forward for 10 years.

*Tax credit for professional training.* Ten percent of training costs can be offset against corporate income tax under certain conditions.

*Tax credit for hiring of unemployed.* Fifteen percent of the annual gross salary paid to persons who were unemployed can be offset against corporate income tax under certain conditions.

*Tax credit for venture capital investments.* Eligible projects may qualify for a corporate income tax credit of 30% of the nominal amount of so-called venture capital certificates, limited to a maximum credit of 30% of taxable income.

**Relief for losses.** Trading losses, adjusted for tax purposes, incurred in or after 1991 may be carried forward without a time limitation. Losses may not be carried back.

**Groups of companies.** A Luxembourg company and its wholly owned (at least 95% of the capital, which may be reduced to 75% in exceptional situations) Luxembourg subsidiaries may form a “fiscal unity.” The fiscal unity allows the affiliated subsidiaries to combine their respective tax results with the tax result of the parent company of the consolidated group. To qualify for tax consolidation, both the parent and its wholly owned subsidiaries must be resident capital companies that are fully subject to tax. A permanent establishment of a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax also qualifies as a parent company of the group. The tax consolidation rules also allow consolidation between a Luxembourg parent company and its indirectly held Luxembourg subsidiary through a nonresident qualifying company or a tax-transparent entity.

Companies that are part of a tax-consolidation group suffer the minimum tax at the level of each entity, but the consolidated amount of minimum tax is capped at the amount of EUR20,000 (see *Tax rates* in Section B). The net worth tax reduction is not granted up to the amount of minimum corporate income tax due from corporate entities, either on a stand-alone basis or within a tax-consolidation group (see Section D).

#### D. Other significant taxes

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax, on the supply of goods and services within Luxembourg and on the import of goods and services into Luxembourg	
General rate	17
Other rates	3/8/14
Net worth tax, on net asset value as of 1 January, reduced by the value of qualifying participations (at least 10% of the capital of qualifying domestic or foreign subsidiaries) that are held directly or through a qualifying fiscally transparent entity; net worth tax may be reduced up to the amount of corporate income tax (including the contribution to the employment fund and before deduction of tax credits) by creation of a net worth tax reserve that must be maintained for five years in the accounts; this net worth tax reduction is not granted up to the amount of minimum corporate income tax due from corporate entities, either on a stand-alone basis or within a tax-consolidation group	0.5

Nature of tax	Rate (%)
Subscription tax ( <i>taxe d'abonnement</i> ), annual tax on the value of a company's shares; rate depends on type of company	
Société de Gestion de Patrimoine Familial (SPFs)	0.25
Investment funds	
Certain funds of funds, certain institutional monetary funds, Pension Fund Pooling Vehicles (PFPVs), microfinance UCIs and Exchange Traded Funds	0
Specialized Investment Funds (SIFs), dedicated funds (funds owned exclusively by institutional investors), institutional compartments of funds, monetary funds and cash funds, on the condition that the exemption regime does not apply	0.01
Other funds	0.05
Social security contributions on salaries (2014 rates); paid by	
Employer (including health at work contribution and accident insurance but excluding mutual insurance)	12.26
Employee (including care insurance and temporary budget balancing tax)	12.95
Payroll taxes, for accident insurance; paid by employer (2015 rate)	1.10
Health at work contribution, on salaries; paid by employer (2015 rate)	0.11
Care insurance on gross employment income; paid by employee (2015 rate)	1.4
Mutual insurance (2015 rates); paid by employer	0.47 to 2.64

## E. Miscellaneous matters

**Foreign-exchange controls.** Luxembourg does not impose transfer restrictions. The Banque Centrale de Luxembourg (BCL) and the Service Central de la Statistique et des Etudes Économiques (the national statistical institute of Luxembourg) monitor the transfer of funds. Effective from 1 January 2012, this obligation was transferred to the companies themselves on a monthly basis. The reporting obligation also applies to selected companies in the non-financial sector that, based on previous activity, are expected to realize large volumes of transactions, mainly services, with foreign counterparts.

**Debt-to-equity rules.** The Luxembourg tax law does not contain any specific thin-capitalization rules. In principle, borrowed money that is necessary for financing an operation is not limited to a percentage of paid-in capital. However, based on the abuse-of-law doctrine, the authorities tend to challenge debt-to-equity ratios of companies engaged in holding activities that are greater than 85:15. Under the abuse-of-law doctrine, the tax authorities may challenge fictitious or abnormal transactions and schemes that are entered into for the sole purpose of avoiding taxes.

**Anti-avoidance legislation.** No specific anti-avoidance rules are contained in the law. The 2015 Budget Law replaces the wording of the existing transfer-pricing rule contained in Article 56 of the Income Tax Law by a nearly literal reproduction of the arm's-length principle set forth in Article 9, Paragraph 1 of the OECD Model Tax Convention on Income and on Capital (the version

dated 22 July 2010). Under this measure, if associated enterprises enter into transactions that do not meet the arm's-length principle, any profits that would have been realized by one of the enterprises under normal conditions are included in the profits of that enterprise and taxed accordingly. Based on this measure and on the general anti-abuse provision, the tax authorities can substitute an arm's-length price if transactions with a related party are entered into at an artificial price or if transactions are entered into in an abnormal manner and are solely tax-motivated.

Since 2011, guidance formalizing transfer-pricing rules for intra-group financing activities applies in Luxembourg. To obtain a binding tax clearance from the authorities, it is now required that such companies have a minimum equity of at least 1% of the loans granted, with a cap of EUR2 million, and that they have available a transfer-pricing study incorporating OECD standards. The companies must further meet the required substance criteria in Luxembourg. A grandfather period to comply with this guidance ended on 31 December 2011.

**Chamber of Commerce fee.** Membership in the Chamber of Commerce, which requires an annual membership fee, is mandatory for all commercial companies having their legal seat in Luxembourg and for Luxembourg branches of foreign companies. The fee ranges from 0.025% to 0.20%, depending on the taxable profit of the company, before loss carryforwards, as provided by the Luxembourg income tax law. The fee is assessed on the basis of the taxable profit realized two years before the year the contribution is due. For companies in a loss situation, partnerships and limited companies (*société à responsabilité limitée*) must make a minimum contribution of EUR70, while other corporations must make a minimum annual contribution of EUR140. Companies that mainly perform a holding activity and that are listed as such in the Statistical Classification of Economic Activities in the European Community (Nomenclature statistique des activités économiques dans la communauté européenne, or NACE) Code must pay a lump-sum fee of EUR350.

**Special tax regime for expatriate highly skilled employees.** The provisions of the beneficial income tax regime for expatriates apply to assignments or recruitments made after 1 January 2011. If the employer meets certain conditions, the tax regime can apply to employees who are sent to work temporarily in Luxembourg on an assignment between intragroup entities and to employees who are directly recruited abroad by a company to work temporarily in Luxembourg. Under the tax regime, tax relief is provided for certain costs related to expatriation if several conditions are met.

**Special tax regime for carried interest.** The Law on Alternative Investment Fund Managers (AIFMs), dated 12 July 2013, defines "carried interest" as a share in the profits of the Alternative Investment Fund (AIF) accrued to the AIFM as compensation for the management of the AIF, excluding any share in the profits of the AIF accrued to the AIFM as a return on any investment by the AIFM in the AIF. The AIFM law allows the taxation of carried interest realized by certain natural persons that are employees of the AIF or their management company as "speculative income" under Luxembourg's income tax law. The tax rate is 25% of the marginal tax rate applicable to the adjusted income.

To benefit from the tax regime, natural persons must not have been Luxembourg tax residents, nor have been subject to tax in Luxembourg on their professional revenues, during the five years preceding the year of implementation of the AIFM law. Natural persons must establish their tax domicile in Luxembourg during the year of implementation of the AIFM law or during the following five years. The favorable tax treatment is limited to the 10-year period beginning with the year in which the individual persons begin their activity entitling them to the above income.

#### **Limitation of corporate tax deductibility of "golden handshakes."**

To limit excessive "golden handshakes" to departing employees, voluntary departure indemnities or dismissal indemnities above EUR300,000 are not tax-deductible for employers. Tax rules at the level of the employee remain fully applicable. A fractioned payment that is made over several years is deemed to be a single payment.

**Islamic finance.** The Luxembourg tax administration provides guidance covering the Luxembourg tax treatment of some contracts and transactions with respect to Islamic finance. This clarifies the revenue repatriation mechanism of Luxembourg's Sharia-compliant financing instruments as well as structuring capacities.

**VAT free zone.** In 2011, Luxembourg introduced a temporary exemption regime for VAT purposes. This regime provides a VAT suspension system for transactions concerning goods stored in specific locations.

### **F. Treaty withholding tax rates**

The rates reflect the lower of the treaty rate and the rate under Luxembourg domestic tax law. Dividend distributions to companies resident in a treaty country are covered by the Luxembourg participation exemption regime. As a result, a full exemption from Luxembourg dividend withholding tax may apply if certain conditions are met (see Section B).

- (a) The 5% rate (Netherlands, 2.5%; Indonesia, Korea (South), Morocco and Thailand, 10%) applies if the beneficial owner is a company that holds directly at least 25% of the capital of the payer of the dividends.
- (b) The 0% rate applies if the beneficial owner is a company that, on the date of payment of the dividends, has owned directly at least 25% of the voting shares of the payer for an uninterrupted period of at least two years and if such dividends are derived from an industrial or commercial activity effectively operated in Luxembourg. The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 10% of the voting shares of the payer. The 15% rate applies to other dividends.
- (c) The 10% rate applies if the recipient is a company that, since the beginning of the fiscal year, has a direct holding in the capital of the company paying the dividends of at least 25% or paid a purchase price for its holding of at least EUR6,197,338.
- (d) Under an EU directive, withholding tax is not imposed on dividends distributed to a parent company resident in another EU state if the recipient of the dividends holds directly at least 10% of the payer or shares in the payer that it acquired for a price of at least EUR1,200,000 for at least one year. This holding period does not need to be completed at the time of the distribution if the recipient commits itself to eventually holding the participation for the required period.
- (e) The 15% rate applies if the beneficial owner of the dividends is a collective-investment vehicle established in the other jurisdiction and treated as a body corporate for tax purposes in that other jurisdiction. The 10% rate applies to other dividends.
- (f) The 0% rate applies if, at the time of the distribution, the beneficial owner is a company that has held at least 25% of the share capital of the payer for an uninterrupted period of at least two years. The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the share capital of the payer. The 15% rate applies to other dividends.
- (g) The second listed rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer.
- (h) The 5% rate applies if the beneficial owner is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends. The 15% rate applies to other dividends.
- (i) The 5% rate applies if the beneficial owner of the dividends is a company that meets either of the following conditions:
- It holds directly or indirectly at least 50% of the capital of the payer.
  - It has invested in the payer more than USD10 million or the equivalent in Luxembourg or Vietnamese currency.
- The 10% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 25%, but less than 50%, of the capital of the payer and if such beneficial owner's investment in the payer does not exceed USD10 million or the equivalent in Luxembourg or Vietnamese currency. The 15% rate applies to other dividends.
- (j) The lower rate of 5% applies if the beneficial owner is a company that holds directly at least 10% of the capital in the distributing company and that has invested at least EUR80,000 (or equivalent in rubles) in such company.
- (k) The 7.5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the shares of the payer. The 10% rate applies to other dividends.
- (l) The 0% rate applies if the beneficial owner is a company that holds at least 10% of the payer for a continuous period of 12 months before the decision to distribute the dividend. The 15% rate applies to other dividends.
- (m) Interest payments may be subject to withholding tax in certain circumstances. For details, see Section B.
- (n) The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 30% of the paying company's capital and if the value of its investment in the paying company is at least USD300,000 at the payment date.
- (o) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer and that has invested more than EUR2 million or its equivalent in the currency of Georgia. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the payer and that has invested more than EUR100,000 or its equivalent in the currency of Georgia. The 10% rate applies to other dividends.
- (p) The 0% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer. The 5% rate applies to individuals who own directly at least 10% of the capital of the company paying the dividends and who have been residents of the other contracting state for at least 48 months preceding the year in which the dividends are paid. The 10% rate applies to other dividends.

- (q) The lower rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the shares in the payer or if it acquired the shares in the payer for a price of at least EUR1,200,000. The 10% rate applies to other dividends.
- (r) Withholding tax is not imposed on dividends distributed to a parent company if the beneficial owner of the dividends is a company that, at the time of the payment of dividends, has held directly for an uninterrupted period of 12 months at least 10% of the capital of the company paying the dividends or that has a capital participation with an acquisition cost of at least EUR1,200,000 in the company paying the dividends. The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
- (s) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (t) The 5% rate applies if the beneficial owner is a company that holds directly at least 20% of the capital of the payer. The 10% rate applies to other dividends.
- (u) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer. The 10% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and if the payer company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate lower than the normal rate of Israeli company tax. The 15% rate applies to other dividends.
- (v) The 5% rate applies if the beneficial owner is a company that holds at least 25% of the voting shares of the payer of the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
- (w) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the shares of the payer company.
- (x) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital in the distributing company. In other cases, the 15% rate applies, including dividends arising from real estate companies that benefit from a full or partial tax exemption or that treat distributions as tax deductible. SICAVs, SICAFs, SICARs and qualifying FCPs are in the scope of the new double tax treaty with Germany and may benefit from the withholding tax regime.
- (y) The 0% rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of 24 months. The 15% rate applies to other dividends.
- (z) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 15% of the shares of the payer. The 15% rate applies to other dividends.
- (aa) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the shares of the payer. The 15% rate applies to other dividends.
- (bb) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the shares of the payer. The 10% rate applies to other dividends.
- (cc) The 0% rate applies if the beneficial owner is a company (other than a partnership) that holds for an uninterrupted period of at least one year directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (dd) On 7 July 2014, Luxembourg and Estonia signed a new treaty that is intended to replace the current 2006 treaty. Under the new treaty, a 0% rate will apply if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. A 10% rate will apply to other dividends.

Mongolia repealed its treaty with Luxembourg, effective from 1 January 2014.

Luxembourg has signed and enacted new tax treaties or amendments to existing tax treaties with Argentina, Ukraine and the United States, but these treaties and amendments are not yet in force. The withholding tax rates under these new treaties and amendments are not reflected in the table above.

Following treaty negotiations, treaty drafts have been initialed with Botswana, Brunei Darussalam, Cyprus, Kyrgyzstan, Oman and Serbia. New treaties or amendments to existing treaties have been signed with Albania, Andorra, Croatia, Estonia, France, Hungary, Ireland, Kuwait, Lithuania, Mauritius, Singapore, Tunisia, United Arab Emirates and Uruguay.

Tax treaty negotiations with Egypt, Lebanon, Montenegro, New Zealand, Pakistan, Senegal, Syria and the United Kingdom are under way.

Since 2009, Luxembourg has signed numerous new treaties or treaty amendments with other countries. As a result, Luxembourg complies with OECD standards with respect to information exchange between tax authorities and reinforces international fiscal cooperation against tax fraud.

### A. At a glance

Corporate Income Tax Rate (%)	12 (a)
Capital Gains Tax Rate (%)	12 (a)(b)
Branch Tax Rate (%)	12 (a)
Withholding Tax (%) (c)	
Dividends	0 (d)
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) For the 2014 tax year, complementary tax is imposed on taxable profits in excess of MOP300,000 at a rate of 12%.
- (b) For details regarding the taxation of capital gains, see Section B.
- (c) Macau law does not contain any specific measures imposing withholding taxes except for service fees paid to individuals. Under certain circumstances, interest or royalties received by nonresidents from Macau may be regarded as income from commercial or industrial activities in Macau and taxed at the normal corporate income tax rates.
- (d) Dividends are not taxable if they are distributed by entities that have paid corporate income tax at the corporate level on the distributed income.

### B. Taxes on corporate income and gains

**Corporate income tax.** Companies and individuals carrying on commercial or industrial activities in Macau are subject to complementary tax in Macau. An entity established in Macau is regarded as carrying on business in Macau, and its profits are subject to complementary tax. Non-Macau entities that derive profits from commercial or industrial activities in Macau are also subject to complementary tax.

**Rates of corporate income tax.** The same complementary tax rates apply to companies and individuals. The following are the complementary tax rates for the 2014 tax year.

Exceeding MOP	Taxable profits		Tax on lower amount MOP	Rate on excess %
	Not exceeding MOP			
0	300,000		0	0
300,000	–		0	12

**Offshore companies.** Macau Offshore Companies (MOCs) are exempt from Macau complementary tax. A company qualifies as an MOC if it is established under Macau's offshore law and if it meets certain criteria. In general, MOCs must use non-Macau currencies in its activities, target only non-Macau residents as customers and concentrate only on non-Macau markets. Newly established MOCs may engage only in the eight categories of services contained in a list published by the government.

**Capital gains.** The Macau Complementary Tax Law does not distinguish between a "capital gain" and "revenue profit." Companies carrying on commercial or industrial activities in Macau are subject to complementary tax on their capital gains derived in Macau.

**Administration.** The tax year is the calendar year.

For tax purposes, companies are divided into Groups A and B. These groups are described below.

*Group A.* Group A companies are companies with capital of over MOP1 million (USD125,000) or average annual taxable profits over the preceding three years of more than MOP500,000 (USD62,500). Other companies maintaining appropriate accounting books and records may also elect to be assessed in this category by filing an application with the Macau Finance Services Bureau before the end of the tax year.

Income of Group A companies is assessed based on their financial accounts submitted for tax purposes. These companies are required to file between April and June of each year complementary tax returns with respect to the preceding year. The tax returns must be certified by local accountants or auditors registered with the Macau Finance Services Bureau.

Group A companies may carry forward tax losses to offset taxable profits in the following three years.

*Group B.* All companies that are not Group A companies are classified as Group B taxpayers.

For Group B companies, tax is levied on a deemed profit basis. Financial information in tax returns submitted by Group B companies normally serves only as a reference for tax assessment. Group B companies are normally deemed to earn profits for each year of assessment, regardless of whether the taxpayers have earned no income or incurred losses for the year.

Group B companies are required to file annual tax return forms for the preceding year between February and March. Certification of the tax return forms by registered accountants or auditors is not required.

Group B companies may not carry forward tax losses.

**Dividends.** Dividends are normally paid out of after-tax profits. Consequently, no tax is imposed on dividends.

Group A companies (see *Administration*) may claim deductions for dividends declared out of current-year profits. Under such circumstances, the recipients of the dividends are subject to complementary tax on the dividends.

**Foreign tax relief.** Macau does not grant relief for foreign taxes paid.

### C. Determination of trading income

**General.** As discussed in Section B, companies are divided for tax purposes into Groups A and B. For Group A companies, taxable profits are based on the profits shown in the signed complementary tax return, subject to adjustments required by the tax law. Group B companies are taxed on a deemed profit basis.

To be deductible, expenses must be incurred in the production of taxable profits. Certain specific expenses are not allowed, such as life insurance and fines. The deduction of provisions is restricted.

**Inventories.** Inventories are normally valued at the lower of cost or net realizable value. Cost can be determined using the weighted average or first-in, first-out (FIFO) methods.

**Provisions.** The following are the rules for the tax-deductibility of provisions in Macau:

- Provision for bad debts: deductible up to 2% of trade debtor's year-end balance
- Provision for inventory loss: deductible up to 3% of the value of the closing inventory at the end of the year
- Provision for taxes: not deductible
- Other provisions: subject to approval by the tax authorities

**Tax depreciation.** Tax depreciation allowances are granted for capital expenditure incurred in producing taxable profits. These allowances are calculated based on the actual cost of purchase or construction, or, if the amount of the cost is not available, the book value accepted by the Macau Finance Services Bureau. The following are the maximum straight-line depreciation rates in Macau.

<b>Asset</b>	<b>Maximum rate (%)</b>
Industrial buildings (including hotels)	
First year	20
Subsequent years	4
Commercial and residential buildings	
First year	20
Subsequent years	2
Central air-conditioning plant	14.29
Central telecommunication, telephone and telex systems	10
Elevators and escalators	10
Vessels, dredgers and floating cranes	10
Transport equipment	
Light vehicles	20
Heavy vehicles	16.66

<b>Asset</b>	<b>Maximum rate (%)</b>
Furniture	
Office	20
Residential	16.66
Computers, minicomputers and word processors	25
Other office equipment	20
Non-electronic equipment and machinery	14.29
Electronic equipment and machinery	20
Computer software	33.33
Molds	33.33
Patents	10
Other assets	Various

**Relief for losses.** Group A companies (see Section B) may carry forward losses for three years. Loss carrybacks are not allowed.

**Groups of companies.** Macau does not allow consolidated returns or provide other relief for groups of companies.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Property tax, levied annually on owners of real property in Macau; the tax is applied to the actual rental income for leased property and to the deemed rental value for other property as determined by the Macau Finance Services Bureau; up to 10% of the rent or rental value may be deducted to cover repairs and maintenance, and other expenses related to the property; certain buildings are exempt including industrial buildings occupied by their owners for industrial purposes, new residential or commercial buildings for the first 6 years on the islands of Coloane and Taipa and for the first 4 years in other parts of Macau, and new industrial buildings for the first 10 years on Coloane and Taipa and for the first 5 years in other parts of Macau	
Rental property	10%
Other property	6%
Stamp duty, on selling price or assessable value of transferred property; payable by purchaser	1% to 3% (plus 5% surcharge)
Additional stamp duty; payable on the acquisition of residential properties by corporations or non-Macau residents	10%
Special stamp duty, on transaction price; payable by transferor of residential properties, shops, offices and car parks; subject to exemptions under certain special circumstances	
Property acquired by the vendor on or after 14 June 2011 (for residential properties) and 30 October 2012 (for shops, offices and car parks) and sold within one year after	

Nature of tax	Rate
acquisition (from the issuance date of the stamp duty demand note)	20%
Property acquired by the vendor on or after 14 June 2011 (for residential properties) and 30 October 2012 (for shops, offices and car parks) and sold in the second year after acquisition (from the issuance date of the stamp duty demand note)	10%

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Macau is the pataca (MOP). Since 1977, the pataca has been closely aligned with the Hong Kong dollar (HKD), moving within a narrow band around an exchange rate of MOP103 to HKD100. Because the Hong Kong dollar is officially pegged to the US dollar, the value of the pataca is closely associated with the value of the US dollar. The current exchange rate is approximately MOP8:USD1.

Macau does not impose foreign-exchange controls.

**Debt-to-equity rules.** Except for the banking and financial services sector, no statutory debt-to-equity requirements or capitalization rules are imposed in Macau.

## F. Tax treaties

Macau has entered into double tax treaties with Cape Verde, Mainland China, Mozambique and Portugal. Macau has also signed a tax treaty with Belgium, but this treaty is not yet in force.

## B. Taxes on corporate income and gains

**Corporate income tax.** Macedonian companies are subject to corporate tax on their worldwide income. Macedonian companies are companies incorporated in Macedonia. Foreign companies are taxed in Macedonia on their profits generated from activities conducted through a permanent establishment in the country and on income from Macedonian sources.

**Rate of corporate income tax.** The corporate income tax rate is 10%.

**Tax incentives.** Tax incentives available in Macedonia are described below.

*Tax relief for reinvested profits.* As of January 2015, companies may claim tax relief for the amount of profits reinvested in business-related tangible and intangible assets. No relief is available for profits reinvested in cars, furniture, carpets, audiovisual devices and other decorative objects used to equip administrative premises. The tangible and intangible assets acquired under the tax relief may not be sold or otherwise disposed of within the five-year period beginning with the year in which the investment is made. If this condition is not satisfied, the company must pay the tax saved.

*Technological Industrial Development Zones.* Companies are exempt from income tax for the first 10 years of their activities in a Technological Industrial Development Zone, subject to the conditions and procedures established in the Law on Technological Industrial Development Zones.

**Capital gains and losses.** Capital gains are included in taxable income and are subject to tax at the regular corporate income tax rate of 10%.

**Administration.** The tax year is the calendar year.

Companies must make advance monthly payments of corporate income tax by the 15th day of each month. The tax base for the monthly payments equals  $\frac{1}{12}$  of the nondeductible expenses (payments subject to income tax) incurred in the preceding year adjusted by the percentage of the cumulative growth of retail prices in the country in the preceding year.

Companies must file annual tax returns by 15 March of the year following the tax year. Filing of monthly tax returns is not required. If the tax determined in an annual tax return is more than the amount of advance tax paid, the company must pay the difference within 30 days after the filing due date. Any overpaid amount must be refunded within 30 days following the request of the taxpayer.

**Dividends.** Dividends paid to foreign companies are subject to withholding tax at a rate of 10% on the net amount of the distributed dividends (that is, after deduction of the 10% corporate tax), unless tax treaty relief applies. Remittances of profits by branches to their home countries are not subject to withholding tax.

Dividends distributed to resident companies are exempt from corporate tax.

**Foreign tax relief.** Resident companies may claim a tax credit for foreign income tax paid, but the amount of the credit may not exceed the 10% profit tax imposed in Macedonia on the foreign-source income.

### **C. Determination of trading income**

**General.** Companies pay income tax on payments made that are considered nondeductible expenses and on profit distributions.

**Inventories.** Inventories are valued at cost, but the value for tax purposes may not exceed the sales value on the date when taxable income is determined.

**Provisions.** Provisions booked for current liabilities are deductible for tax purposes. Write-offs of receivables for which no final court decision on their non-collectibility has been issued are not deductible for tax purposes. Written-off receivables taxed in prior years as nondeductible expenses are deducted from the tax base in the year in which the receivables are collected.

**Tax depreciation.** Tax depreciation follows the accounting depreciation of tangible and intangible assets. The excess amount of the accounting depreciation not recognized for tax purposes taxed in prior years is deductible from the nondeductible expenses in the following years in which such differences become deductible for tax purposes.

**Relief for losses.** As of 1 January 2015, losses may be carried forward for three years. Losses may not be carried back.

**Groups of companies.** Group registration is not permitted in Macedonia.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; imposed on goods sold and services rendered in the RM, on sales of real property in the RM and on imports; certain items are exempt, such as banking, insurance and other financial activities	
Standard rate	18%
Reduced rate (for food products for human use, drinking water from public water supply systems, books, brochures and newspapers, certain materials and fixed assets for agriculture, drugs and medicine products for human use, computers, printers and accessories, software, equipment that is used for the production of solar electricity and passenger transport)	5%
Exports	0%
Excise tax on sales in the RM and on imports of various items; tax is imposed at ad valorem rates, which are applied to the sales or import price, or at specific rates, which are expressed in Macedonian denars per unit of goods; for petrol, Diesel D-1 and gas, the rates are subject to change every two weeks	
Petrol	MKD21.692 to MKD24.396 per liter
Diesel D-1 (petrol for use in motor cars)	MKD12.121 per liter
Heating oil	MKD3.136 per liter
Fuel oil	MKD0.10 per kilogram
Alcoholic beverages	MKD340 per liter of pure alcohol
Beer	MKD4 per percentage of alcohol in a liter
Cigars and cigarillos	MKD21.37 per piece
Cigarettes	MKD1.30 per piece plus 9% of the retail price
Other tobacco products	MKD1,350 per kilogram

Nature of tax	Rate
Taxes contained in Property Tax Law Property tax; annual tax on owners of immovable property, including non-rural land, residential buildings or apartments, industrial, business and administrative buildings, and garages and other structures; tax base is the market value of the real estate or movable property; tax return must be filed by 31 January (only if changes have occurred since the previous period)	0.1% to 0.2%
Tax on sales and other transfers of real estate and rights to real estate; tax base is the market value of the real estate or right at the time of the sale; for exchanges, the tax base is the difference between the market values of the items being exchanged; tax payable by transferor; tax return must be filed within 15 days after the transfer of the property	2% to 4%
Inheritance and endowment tax, on the inheritance or endowment of immovable or movable property; tax applies regardless of whether inheritance or endowment is granted in a will or is acquired under the inheritance law or under an endowment agreement; tax base is the market value of the inheritance and endowment, reduced by debts and expenses; tax is paid by resident and nonresident recipients, including companies; tax return must be filed within 15 days after the transfer of the property	0%
Individuals in first line of heritage	2% to 3%
Individuals in second line of heritage	4% to 5%
All others	4% to 5%

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Macedonia is the denar (MKD). All transactions in Macedonia must be made in denars.

The National Bank of the Republic of Macedonia, which is the central bank, is exempt from income tax.

Residents and nonresidents may maintain foreign-currency accounts at commercial banks.

Registration with the central bank is required for the following transactions:

- Obtaining or granting loans
- Paying or receiving cash
- Opening bank accounts abroad

**Transfer pricing.** Macedonia has transfer-pricing rules. Under these rules, the tax authorities may adjust the taxable income of taxpayers derived from transactions with related companies if they deem prices paid (or charged) to related companies for various types of items to be excessive. In such circumstances, the difference between prices stated in financial statements and arm's-length prices is subject to tax.

**Debt-to-equity ratios.** Under thin-capitalization rules, interest on loans received from shareholders owning at least 25% of the capital of the borrower or on loans guaranteed by such shareholders is subject to tax to the extent that such interest corresponds to the excess of the loan balance over three times the shareholders' share in the equity of the borrower.

The thin-capitalization restrictions apply only to loans provided by direct shareholders that are nonresidents. In addition, the 25% participation threshold is alternatively measured by reference to voting rights. Loans provided from financial institutions are excluded from the thin-capitalization restrictions. Newly established entities are excluded in their first three years of operations.

- (a) The lower rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends.
- (b) The 0% rate applies if the beneficial owner of the interest is the government or the central bank.
- (c) The 0% rate applies if the beneficial owner of the interest is the government, a municipality, the central bank or an agency fully owned and controlled by the government or a municipality (debts indirectly financed by the government, a local authority or the central bank).
- (d) The 0% rate applies if the recipient of the dividend is a company that holds directly or indirectly at least 10% of the equity of the payer of the dividends.
- (e) The 0% rate applies if the beneficial owner of the interest is the government, municipalities, the central bank, other financial institutions fully owned by the government or municipalities, or other legal entities that are directly financed by the government, the central bank or municipalities.
- (f) The 0% rate applies if the beneficial owner of the dividends is a pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement benefits. The 5% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends and if such holding is maintained for an uninterrupted period of at least one year and the dividends are declared within that period.
- (g) The 0% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the voting power of the payer of the dividends.
- (h) The 0% rate applies if the beneficial owner of the interest is the State of Finland, Bank of Finland, Finnish Fund for Industrial Co-operation or if the interest is from loans supported by the government of Finland.
- (i) The 0% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.
- (j) The 0% rate applies if the beneficial owner of the interest is the government, municipalities or their fully owned entities or if the interest payments arise from loans of other agencies or instrumentalities (including financial institutions) based on agreements between the governments.
- (k) The 0% rate applies if the beneficial owner of the interest is the government including municipalities, the central bank and financial institutions controlled by the government or if the interest is derived from loans guaranteed by the government.
- (l) The 0% rate applies if the beneficial owner of the interest is the government including municipalities, agencies or banks of the government or municipalities or if the interest is derived from loans warranted, insured or financed by the government.
- (m) The 0% rate applies if any of the following circumstances exist:
  - The beneficial owner of the interest is the state, a statutory body or the central bank.
  - The interest is paid on loans approved by the government of the country of the interest payer.
  - The interest is paid on loans granted by the SWEDCORP, Swedfund International AB, the Swedish Export Credits Guarantee Board or any other public institution with the objective of promoting exports or development.
  - The interest is paid on bank loans.
- (n) The 0% rate applies if the beneficial owner obtained the interest with respect to sales on credit of industrial, commercial or scientific equipment or with respect to sales on credit of merchandise between enterprises or if the interest is paid on bank loans.
- (o) The 0% rate applies if the beneficial owner of the interest is the government, municipalities or the central bank.
- (p) The 0% rate applies if the beneficial owner obtained the interest with respect to sales on credit of industrial, commercial or scientific equipment or with respect to sales on credit of merchandise between enterprises or if the interest is paid on long-term bank loans (over five years).
- (q) The lower rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.
- (r) The 0% rate applies if the beneficial owner of the dividends owns at least 25% of the equity of the payer of the dividends for the entire 12-month period ending on the date of payment of the dividend or if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the voting power of the payer of the dividends.

- (s) The 0% rate applies to interest paid with respect to a loan granted or credit extended by an enterprise to another enterprise and to interest paid to political subdivisions, local authorities or public entities.
- (t) The 0% rate applies to interest paid with respect to a loan granted or credit extended for the sale of industrial, commercial or scientific equipment (unless the sale or loan is between related persons), and to interest paid to the government including local authorities, the central bank and financial institutions wholly owned by the government.
- (u) The higher rate applies to royalties paid for the use of, or the right to use, movies or tapes for radio and television broadcasting.
- (v) The 0% rate applies if the beneficial owner of the dividends owns at least 25% of the equity of the payer of the dividends for the entire 12-month period ending on the date of payment of the dividend or if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.
- (w) This treaty is not yet in force.
- (x) The 0% rate applies if the beneficial owner of the dividends is the Central Bank of Norway, the government pension plan of Norway or Norfund or, in case of Macedonia, the Central Bank of Macedonia. The 10% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends.
- (y) The 0% rate applies to the following:
- Interest paid to the government of a contracting state, a political subdivision or local authority thereof, the central bank of a contracting state or an institution wholly owned by the government of a contracting state
  - Interest paid on a loan insured or guaranteed by a governmental institution for the purpose of promoting exports
  - Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment
- (z) The 0% rate applies to the following:
- Interest paid with respect to the sale of commercial or scientific equipment on credit
  - Interest paid with respect to the sale of goods by an enterprise to another enterprise on credit
  - Interest paid on a loan guaranteed by the Federal Republic of Germany with respect to the export of foreign direct investment
  - Interest paid to the government of the Federal Republic of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau, the Deutsche Investitions- und Entwicklungsgesellschaft or the Macedonian government.
- (aa) The 0% rate applies if the recipient of the dividend is a company that holds directly at least 25% of the equity of the payer of the dividends.

## A. At a glance

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	20
Withholding Tax (%)	
Dividends	0 (a)
Interest	20 (b)
Royalties	10 (c)
Other Non-salary Payments	5/10 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The withholding tax on dividends was repealed in 2008. A parent-subsidiary regime exists (see Section B).
- (b) This withholding tax applies to resident and nonresident corporations and individuals.
- (c) This withholding tax applies to nonresident corporations.
- (d) The 5% withholding tax applies to residents, and the 10% withholding tax applies to nonresident corporations and individuals.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies deriving taxable income from activities carried out in Madagascar are subject to corporate income tax. Resident companies are companies incorporated in Madagascar, which include subsidiaries and branches of foreign companies.

**Tax rates.** The standard corporate income tax rate is 20%.

In general, the minimum tax is MGA100,000 plus 0.5% of annual turnover (including capital gains) for companies carrying out the following activities:

- Agricultural
- Craft
- Mining
- Industrial
- Tourism
- Transport

This minimum tax equals 0.1% of annual turnover for fuel station filling companies. For companies engaged in other activities, the minimum tax is MGA320,000 plus 0.5% of annual turnover.

The minimum tax applies if the company incurs a loss or if the corporate income tax calculated using the 20% rate is less than the minimum tax to be paid as stated above.

Individuals or companies performing exclusively public market activities are exempt from minimum tax.

New entities performing industrial, handmade, agricultural, mining, transport, tourism and hotel activities are exempt from corporate income tax and minimum tax for their first two financial years.

*Free zones' companies.* Free zones' companies are exempt from corporate income tax for the first five years of their activities and are subject to corporate income tax at a rate of 10% for subsequent years.

*Large mining investments.* Mining companies making investments over USD25 million can benefit from legal and tax incentives if they are eligible under a special law called Loi sur les Grands Investissements Miniers (LGIM). They are exempt from minimum tax for five years from the beginning of exploitation. The corporate income tax rates are 10% for owners of mining permits and 25% for the transformation entities.

**Capital gains.** Capital gains are included in taxable income and subject to the corporate income tax rate of 20%.

**Administration.** The standard tax year is the calendar year. However, companies may select a tax year running from 1 July to 30 June or another tax year.

Companies using the standard tax year must file financial statements and the corporate income tax return with the Malagasy tax authorities by 15 May of the year following the tax year. For companies choosing a tax year-end other than the standard tax year-end, the filing must be made by the 15th day of the fourth month following the year-end. Companies must make six installments of corporate income tax for each tax year. Each payment must equal one-sixth of the preceding year's tax amount. The installments are payable by 15 February, 15 April, 15 June, 15 August, 15 October and 15 December.

Before engaging in activities in Madagascar, an entity must apply for tax registration by completing a specified form during the company creation procedure. The tax registration for wholesalers requires the filing of a specific declaration. A tax identification card is issued to a new taxpayer on the completion of registration.

The tax identification card must be renewed every year at the time of submission of the corporate income tax return.

Taxpayers that compute taxable income under the actual or simplified actual regime must open a bank account in their name.

Financial statements provided to private or public entities require the visa or certification of the tax administration.

Nonresident entities must file a declaration that details all goods and services purchased during a financial year (annual third-party declaration).

Shareholders' current-account transactions (loans granted by shareholders to the company) must be evidenced by registered-loan agreements and be regularly recorded.

In the case of a tax audit, the tax authority may require any documents and information about the nature of the business relationships between a resident company and foreign company, the companies' transfer-pricing methods, and the activities and tax regimes of the companies. A failure to provide documents and information to the tax authority is subject to a fine of MGA5 million (approximately USD2,300).

Industrialists and commercial enterprises under the value-added tax regime are required to have an analytical accounting and a stock card. A failure to comply with this obligation is subject to a fine of 1% of annual turnover. Analytical accounting is a system that is primarily intended to track expense and revenue accounts by categories in order to determine profit and loss for each activity. A stock card is a statement of goods kept regularly on hand for use or sale.

Tax litigation claims may be made only if prior payment of accepted tax is made. The relevant receipt must be attached to the claim.

Tax may be collected through various legal means, including the seizure of assets. However, sales of seized objects are subject to prior written authorization of the Head of Tax Office.

**Dividends.** Special withholding tax on dividends was repealed in 2008. Companies are subject to corporate income tax on dividends received. Individuals are exempt from income tax on dividends received.

A special local parent-subsidiary regime exists. Under this regime, only 5% of the dividends received by parent companies from their subsidiaries is subject to corporate income tax. To benefit from this regime, the company receiving the dividends must satisfy the following requirements:

- It must submit an application for the parent-subsidiary regime to the tax authorities before the end of the financial year.
- It must be resident in Madagascar.
- It must hold at least 75% of the share capital of the subsidiary.
- It must be a public limited company or a private limited company.
- It must be subject to corporate income tax.
- It must have a consolidated annual turnover of more than MGA200 million.
- It must not have subsidiaries and branches located in jurisdictions that have lower tax rates than Madagascar.
- It must not be subject to another preferential regime.

**Withholding income tax.** All payments made to nonresident service suppliers are subject to withholding income tax at a rate of 10%, regardless of whether the service is rendered inside or outside Madagascar. This is a final tax. The tax is withheld and paid by

the recipient of the service to the competent tax authority before the 15th of the month following the month of payment.

Unregistered resident individuals and companies that import and export goods and/or provide services and goods to registered individuals and companies are subject to income tax at a rate of 5%. This income tax is withheld by the following:

- Custom agents for imported and exported goods
- Purchasers for resident suppliers of goods and services

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to the Chart of Account or the Plan Comptable Général (PCG 2005), which conforms to the International Financial Reporting Standards (IFRS' 2003 version) and International Accounting Standards (IAS).

Business operating expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on shareholder loans in excess of the interest rate determined for the interest applicant by the central bank plus two percentage points on an amount not exceeding two times the authorized capital. None of the interest on shareholder loans is deductible if the capital is not fully paid up.
- Certain specified charges and subsidies.
- Taxes, penalties and most liberalities (payments that do not produce a compensatory benefit to the company).
- Interest, arrears, income from bonds, loans, deposits, royalties on operating licenses, patents, trademarks, manufacturing processes or formulas, or other similar rights and remuneration for services paid by residents to nonresident individuals or companies, unless it is established that these payments are in line with the resident's business, regularly evidenced and not exaggerated.

Expenses incurred on transactions with unregistered individuals or companies that have been subject to withholding tax of 5% are deductible if the correct tax has been paid to the tax authority.

Turnover and charges relating to public market are not included in the corporate income tax base. However, losses incurred in public-market activities are not deductible.

The 2014 Finance Act confirmed the arm's-length principle for payments made between affiliated entities.

**Inventories.** Inventory is normally valued at the lower of cost or market value. For goods that are not identifiable, cost must be determined through the use of the weighted average cost-price method or the first-in, first-out method.

**Provisions.** Provisions are generally deductible for tax purposes if they are established for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Depreciation.** Land is not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates generally used in the industry. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Commercial and industrial buildings	5
Office equipment	10
Motor vehicles	15
Plant and machinery	10

In certain circumstances, plant and machinery and other assets may be depreciated using the declining-balance method or an accelerated method.

**Tax credit.** The 2012 Finance Act introduced a tax credit equal to 50% of the amount invested by entities engaged in renewable energy production and distribution activities. The 2013 Finance Act extends this incentive to other specified investments by entities in the tourism, industrial or construction sectors. The credit is annually capped to 50% of the amount of corporate income tax. The excess amount may be carried forward without time limitation, subject to the above limit of 50%.

**Relief for losses.** Losses may be carried forward for five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** Malagasy law does not provide for consolidated tax filings.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); on goods sold and services rendered in Madagascar; also imposed on public and private companies engaged in telecommunications activities, redistribution of broadcasting and television programs or the providing of services electronically; entities that have annual turnover of less than MGA200 million (approximately USD100,000) are not liable to VAT unless they voluntarily apply for the VAT regime; materials and equipment for the production of renewable energy are exempt from VAT; cash payments made between entities liable to VAT are forbidden; only payments by bank check, wire transfer, credit card, non-endorsed bill of exchange and mobile banking are allowed	20
General rate	
Special VAT on public market; discharges entities from corporate income tax and VAT; VAT is withheld by the public accountant at the moment of payment (advances or balance) and paid by the public accountant to the competent tax authority by the 15th day of the following month; the tax base is the amount of the transaction; operator must file VAT returns with the competent tax authority by the 15th day of the month following the month of the withholding made by the public accountant;	

Nature of tax	Rate (%)
details of operations linked to the public market must be attached to the financial statements submitted to the tax authority at the end of a financial year	8
Urban tax; annual tax on the rental value of property that is part of business assets	Various
Registration duties on transfers of real property, businesses or movable property, and free inter vivos transfers (The occupying or use of movable or immovable property must be supported by a lease agreement. This implies that registration fees at a rate of 2% are imposed on the total amount of rent during the lease agreement period.)	5
Social security contributions	
For family allowances; on gross monthly remuneration; amount of remuneration subject to contributions is limited based on the minimum salary provided by decree	
Employer	13
Employee	1
For illness and pregnancy; on gross monthly remuneration, which is not limited; payable by employer	5

### E. Foreign-exchange controls

The currency in Madagascar is the ariary (MGA).

Exchange-control regulations exist in Madagascar. For foreign-exchange control purposes, the two kinds of operations are current operations and capital operations.

Current operations include transfers abroad of profits after payments of taxes, dividends, earned income, expatriate allowances and savings. Current operations require only a transfer declaration to a local bank.

Capital operations include operations relating to stock transfers, shares of liquidation bonuses, sales of businesses or assets and compensation for expropriations. Capital operations involving transfers abroad require an authorization from the Ministry of Finance.

Madagascar is a member of the South African Development Community (SADC) and the Common Market for Eastern and Southern Africa (COMESA).

### F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
France	0	15	10/15
Mauritius	0	10	5
Non-treaty countries	0	10	10*

\* This withholding tax applies to nonresident companies.

(a) For other rates, see Section B.

(b) See Section B.

(c) See Section B for an extended list of withholding taxes and for further details regarding these taxes.

- (d) This withholding tax is imposed on dividends paid to residents and non-residents.
- (e) This withholding tax is imposed on residents and on nonresidents with a permanent establishment in Malawi. A 15% rate applies to payments to non-residents without a permanent establishment in Malawi.

## B. Taxes on corporate income and gains

**Corporate income tax.** Locally incorporated companies and branches of foreign companies are subject to corporate income tax on their income deemed to be from a source in Malawi. Income is deemed to be from a source within Malawi if it is derived from the carrying on in Malawi of a “trade.” For this purpose, “trade” covers any employment, profession, business, calling, occupation, or venture, including the leasing of property. Foreign-source income is exempt from corporate income tax.

**Rates of corporate income tax.** Locally incorporated companies are subject to corporate income tax at a rate of 30%. Branches of foreign companies are subject to tax at a rate of 35%.

Income tax is imposed on income from life business at a rate of 21%. Life insurance companies are now subject to tax on their investment income, including income from the leasing of property, in accordance with the general provisions of the Taxation Act.

**Minimum tax on turnover.** Minimum tax based on turnover was abolished, effective from 1 July 2012.

**Capital gains and losses.** Pending enactment of the Capital Gains Tax Act, capital gains derived by companies are included in taxable income and are subject to tax at the applicable corporate income tax rate.

For assets qualifying for capital allowances, capital gains and losses equal the difference between the sales proceeds and the written-down tax value of the assets. For assets not qualifying for capital allowances, capital gains equal the difference between sales proceeds and the cost of the asset or open market price of the asset at the time of acquisition. The basis of a capital asset may be determined under either of the following methods:

- Applying the consumer price index published by the National Statistical Office at the date of disposal of the asset that is applicable to the year in which the purchase or the construction of the asset was effected or completed
- Using the value of the asset as of 1 April 1992 that was submitted to and accepted by the Commissioner of Taxes, adjusted by the consumer price index published by the National Statistical Office at the date of disposal of the asset

Capital gains are not subject to tax if they are used within 18 months to purchase a qualifying asset similar to or related in service or use to the asset that was sold.

Capital losses on assets not qualifying for capital allowances can be offset only against current or future capital gains. However, such capital losses may be set off against other income in the year in which a company ceases to exist. Capital losses with respect to assets on which capital allowances have been granted are fully deductible from taxable income.

**Administration.** The tax year runs from 1 July to 30 June. The year of assessment for income tax is any period of 12 months with respect to which tax is chargeable. Financial years ending on or before 31 August are normally treated as relating to the tax year ended in June of that calendar year.

Companies must file an income tax return with the Commissioner General of the Malawi Revenue Authority within 180 days after the end of the year of assessment.

At the beginning of each year of assessment, the company must estimate the tax payable in that year. This estimated tax, which is known as provisional tax, must be paid quarterly by the 25th day of the month following the end of each quarter. The total installments must equal at least 90% of the actual tax liability for the year of assessment.

If the amount of tax unpaid as a percentage of the total tax liability exceeds 10% but does not exceed 50%, a penalty equal to 25% of the unpaid tax is imposed. If the percentage of unpaid tax exceeds 50%, a penalty equal to 30% of the unpaid tax is imposed.

Interest on unpaid tax is levied at the rate of 0.75% for the first month and 0.25% for each additional month or part thereof. The final penalty rate is the total of these rates multiplied by the number of months the amount of tax has remained unpaid.

Under a self-assessment system, taxpayers are responsible for calculating their tax liability and submitting tax returns together with any outstanding tax due. The Malawi Revenue Authority accepts the return as filed and does not issue any administrative assessments. If it is not satisfied, it will undertake to verify the correctness of the information contained in the return.

**Dividends.** A final withholding tax at a rate of 10% is imposed on dividends distributed to resident and nonresident companies and individuals. Dividends are not subject to another 10% withholding tax if they are redistributed.

**Withholding taxes.** Certain payments are subject to withholding tax. The tax is withheld by the payer and remitted to the Malawi Revenue Authority on a monthly basis by the 14th day of the following month. Recipients of the payments treat the withholding tax as an advance payment of tax that offsets income tax subsequently assessed.

Withholding Tax Exemption Certificates may be issued to qualifying taxpayers whose affairs are up to date (that is, companies that have no outstanding tax liabilities or who have made satisfactory arrangements to settle any outstanding tax liabilities). Under the Income Tax Act, no exemption from withholding tax is granted for bank interest, rent, royalties, fees, commission, payments for casual labor and payments to contractors and subcontractors. The Commissioner General may exempt from withholding tax the receipts of certain persons or organizations that are exempt from tax under the Income Tax Act. The following table provides withholding tax rates for payments to residents and to nonresidents with a permanent establishment in Malawi. For tax purposes, resident companies are companies incorporated in Malawi.

Payment	Withholding tax rate (%)
Bank interest exceeding MWK10,000	20
Royalties	20
Rent	15
Payments for supplies to traders and institutions	3
Fees	10
Commissions	20
Payments for carriage and haulage	10
Payments for sales of tobacco and other products	3
Payments to contractors and subcontractors in the building and construction industry	4
Payments for public entertainment	20
Payments of over MWK20,000 for casual labor	20
Payments for services	20

The income of nonresidents arising or deemed to arise from a source within Malawi that is not attributable to a permanent establishment of the nonresident in Malawi is subject to a final withholding tax at the rate of 15% of the gross amount of such income unless the income is specifically exempt from tax under a double tax treaty or tax law.

A withholding tax is also imposed on dividends (see *Dividends*).

**Foreign tax relief.** If foreign income that has been taxed in a foreign country is included in taxable income in Malawi, a tax credit is available to reduce the tax payable in Malawi. To qualify for this relief, the company must prove to the Commissioner General that it has paid the tax on the income in the foreign country. On receipt of this proof, the Commissioner General grants the relief.

### C. Determination of trading income

**General.** Taxable income is the income reported in the companies' financial statements, subject to certain adjustments.

Amounts received for the right of use or occupation of land and buildings or plant and machinery or for the use of patents, designs, trademarks or copyrights or other property, which in the opinion of the Commissioner General is of a similar nature, is included in taxable income.

Certain income is specifically exempt from tax under the Taxation Act, including foreign-source income.

Realized foreign-exchange gains and losses are assessable. Unrealized foreign-exchange gains and losses are not taxable or deductible.

Expenditure that is not of a capital nature and losses, wholly and exclusively and necessarily incurred for the purposes of trade or in the production of income, are allowable as deductions in determining the taxable income of a company. For tax purposes, certain expenses are not allowed as deductions, including the following:

- Losses or expenses that are recoverable under insurance contracts or indemnities
- Tax on the income of the taxpayer or interest payable on such tax
- Income carried to any reserve fund or capitalized

- An expense relating to income that is not included in taxable income
- Contributions by an employer to any pension, sickness, accident or unemployment fund that has not been approved by the Commissioner General
- An expense for which a subsidy has been or will be received
- Rent or cost of repairs to premises not occupied for purposes of trade
- Fringe benefits tax and any penalty chargeable on the fringe benefits tax

Expenditure incurred within 18 months before the start of a manufacturing business is allowable as a deduction if it would normally be allowable in the course of business.

Deductions of employer pension contributions are limited to 15% of the employees' annual salary.

If land is sold and if timber that is intended for sale is growing on the land, the market value of the timber is included in the seller's taxable income. However, a deduction is allowed. If the land was acquired by the taxpayer for valuable consideration, the Commissioner General apportions a reasonable portion of that consideration to the timber and this amount may be deducted. If no valuable consideration was given for the land, the Commissioner General sets a reasonable value for the standing timber, which may be deducted.

In determining taxable income derived from farming, expenses with respect to the following are allowed as deductions:

- The stamping, leveling and clearing of land
- Works for the prevention of soil erosion
- Boreholes
- Wells
- Aerial and geophysical surveys
- Water control work with respect to the cultivation and growing of rice, sugar or other crops approved by the Minister of Finance and water conservation work (reservoir, weir, dam or embankment constructed for the impounding of water)

**Inventories.** Trading stock and work in progress must be valued on the basis of cost or market sales price.

Livestock may be valued for tax purposes at either cost or estimated market value.

### **Capital allowances**

*Investment allowance.* An investment allowance is granted at a rate of 100% of the cost of new or unused industrial buildings and plant or machinery that is used by the company for "manufacturing," which includes hotels and farming. The rate is 40% if these items are used.

For purposes of investment allowance, plant and machinery does not include motor vehicles intended or adapted for use on roads.

Staff housing does not qualify for the investment allowance.

The investment allowance reduces the value of the asset for purposes of calculating the annual allowance in subsequent years of assessment.

*Initial allowance.* The initial allowance is granted with respect to capital expenditure incurred during the year of assessment on certain assets that are used for the purposes of the company's trade or business or for farming purposes. "Manufacturers" can claim either initial allowances or investment allowances on industrial buildings and plant and machinery, but they cannot claim both allowances for the same asset. The following are the rates for the initial allowance.

<b>Assets</b>	<b>Rate (%)</b>
Farm improvements, industrial buildings and railway lines	10
Articles (includes working instruments), implements, machinery and utensils (private passenger vehicles are excluded)	20
Farm fencing	33½

*Annual allowances.* Annual allowances are claimed on cost in the first year and subsequently on written-down values. For newly constructed commercial buildings, other than industrial buildings, with a cost of at least MWK100 million, the rate is 2.5%. For farm improvements, industrial buildings and railway lines, the rate of the annual allowance is 5%. For farm fencing, the rate is 10%. For other assets, the allowances granted are determined by the Commissioner General. The rates vary between 10% and 40%, depending on the type of asset.

*Mining allowance.* An allowance equal to 100% of expenditure incurred by mining companies may be claimed. The export allowance and transport allowance (see *Special allowances*) may not be claimed by mining companies.

*Balancing charge or allowance.* If an asset for which capital allowances have been claimed and allowed is disposed of during the year of assessment, the proceeds of disposal, if any, are set off against the written-down tax value of the asset, and either a balancing charge or allowance arises.

**Special allowances.** Malawi offers special tax allowances, which are described below.

*Export allowance.* An allowance equal to 25% of taxable income from export proceeds is granted with respect to sales of goods that are classified as nontraditional exports. The Commissioner General has issued a directive providing that the export allowance should be calculated on "taxable" export proceeds less export-related expenses. This remains an area of controversy with much debate surrounding the interpretation of the meaning of "taxable income." Tea, tobacco, sugar and coffee do not qualify for this allowance.

*International transport allowance.* An allowance equal to 25% of the international transport costs with respect to non-traditional exports may be claimed. Tea, tobacco, sugar and coffee do not qualify for this allowance.

**Research expenditure.** Expenditure not of a capital nature that is incurred by a company on experiments and research with respect to the company's business are allowed as a deduction from taxable income. Similar deductions apply to contributions, bursaries

(broadly, scholarships) and donations to research institutions for the purposes of industrial research or scientific experimental work or education connected with the business of the company.

**Relief for losses.** In general, losses incurred in trading operations may be carried forward and offset against profits in the following six years. Loss carrybacks are not allowed.

**Groups of companies.** Malawi does not allow consolidated returns or provide other types of relief for groups of companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; levied on a wide range of imported and locally manufactured goods and services; collected by the Malawi Revenue Authority from the importer, manufacturer, wholesaler, retailer or provider of services	16.5%
Stamp duties	
Transfer of shares	0%
Sale of real property; imposed on sales proceeds	3%
Partnership instruments	MWK20
Mortgages, bonds, debentures or covenants exceeding MWK1,000	MWK1.20 per each MWK200
Registration fee	
Authorized capital of a company	
First MWK1,000	MWK50
Each additional MWK2,000 or part thereof	MWK15
Memorandum and articles of association of a company	MWK1,175
Property tax; levied by local authorities on the value of industrial, commercial or private properties owned by a taxpayer in the district; payable semiannually; the rates vary depending on whether the property is located in an urban or rural area and whether it is an industrial, commercial or private property	Various
Fringe benefits tax; imposed on employers other than the government with respect to fringe benefits provided to employees, excluding employees earning less than MWK240,000 per year	30%
Resource rent tax; imposed on after-tax profits of mining companies if the company's rate of return exceeds 20%	10%

#### E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Malawi is the kwacha (MWK).

The Reserve Bank of Malawi is responsible for enforcing foreign-exchange control regulations in Malawi, which include the following:

- Approval for foreign equity investments in Malawian companies must be obtained from the Reserve Bank of Malawi.
- Foreign currency denominated loans to Malawian entities must be approved by the Reserve Bank of Malawi.

**Tax clearance certificate.** The following transactions require a tax clearance certificate from the Commissioner General:

- Transfer of land and buildings
- Renewal of certificate of fitness for commercial vehicles
- Renewal of Business Residence Permit
- Renewal of professional business licenses and permits of medical practitioners, dentists, legal practitioners (lawyers), engineers and architects who are engaged in a private practice or in partnership with another private practitioner
- Renewal of a certificate of registration under the National Construction Industry Act
- Transfer of a company as a going concern
- Externalization of funds to nonresident service providers whose source is deemed to be Malawi
- Renewal of temporary employment permits, business licenses, tourism licenses, telecommunications licenses and energy licenses
- Renewal, extension or transfer of mining licenses, or transfers of mineral rights by the ministry responsible for energy and natural resources
- Change of ownership of company
- Renewal of registration of public transport conveyances by the Road Traffic Directorate

**Transfer pricing.** Under the Taxation Act, if a person not resident in Malawi carries on business with a person resident in Malawi and if in the course of such business it is arranged that the business of the person resident in Malawi produces either no profits or less profit than might be expected had no such relationship existed, the profits of the resident person from that business are deemed to be the amount that might have been expected to accrue if the business had been conducted by independent persons.

## **F. Tax treaties**

Malawi has entered into double tax treaties with France, Kenya, the Netherlands, Norway, South Africa, Sweden, Switzerland and the United Kingdom. The treaty with Kenya is not operational. Malawi's treaty with Denmark has been suspended. The treaties vary in the definition of "exempt income."

Carryback

0

Carryforward

Unlimited (i)

- (a) Resident companies that have paid up ordinary capital of MYR2,500,000 or less and that satisfy specified conditions are taxed at a rate of 20% on their first MYR500,000 of chargeable income. The balance is taxed at 25%. Effective from the 2016 year of assessment, the main rate of corporate tax will decrease to 24%, while the rates for resident companies that have paid-up capital of MYR2,500,000 or less and that satisfy specified conditions will be reduced by one percentage point; that is, the rates will be 19% on the first MYR500,000 of chargeable income and 24% on the remaining chargeable income. The above rates do not apply to petroleum companies, which are taxed at a rate of 38%.
- (b) Real property gains tax is imposed on gains derived from disposals of real property or shares in real property companies. The maximum rate is 30% (see Section B).
- (c) This is a final tax applicable only to payments to nonresidents.
- (d) Interest on approved loans is exempt from tax (see footnote [b] to Section F). Bank interest paid to nonresidents without a place of business in Malaysia is exempt from tax. Interest paid to nonresident companies on government securities and on Islamic securities is exempt from tax.
- (e) This withholding tax is imposed on exempt income distributed to nonresident corporate unit holders by Real Estate Investment Trusts (REITs) and Property Trust Funds (PTFs). Distributions made to individuals, trust bodies and other non-corporate unit holders are subject to withholding tax at a rate of 10%.
- (f) This withholding tax is treated as a prepayment of tax on account of the final tax liability.
- (g) This is a final tax applicable to payments to nonresidents for specified services rendered in Malaysia and to payments for the use of movable property excluding payments made by Malaysian shipping companies for the use of ships under voyage charter, time charter or bare-boat charter. The rate is reduced under certain tax treaties.
- (h) Withholding tax is imposed on "other income," which includes, among other payments, commissions and guarantee fees.
- (i) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident and nonresident companies are taxed only on income accruing in or derived from Malaysia. Resident companies engaged in banking, insurance, shipping or air transport are taxable on their worldwide income. A company is resident in Malaysia if its management and control is exercised in Malaysia; the place of incorporation is irrelevant.

**Rates of corporate tax.** Resident and nonresident companies are subject to income tax at a rate of 25%. Resident companies that have paid up ordinary capital of MYR2,500,000 or less are taxed at a rate of 20% on their first MYR500,000 of chargeable income. The balance is taxed at 25%. This concessionary tax rate does not apply if the company controls or is controlled directly or indirectly by another company that has paid up ordinary capital of more than MYR2,500,000. Effective from the 2016 year of assessment, the main rate of corporate tax will decrease to 24%, while the rates for resident companies that have paid up capital of MYR2,500,000 or less and that satisfy specified conditions will be reduced by one percentage point; that is the rates will be 19% on the first MYR500,000 of chargeable income and 24% on the remaining chargeable income.

Special rates apply to nonresident companies on income from interest (15%) and from royalties, specified services rendered in Malaysia and payments for the use of movable property (10%).

Rental payments for ships made by Malaysian shipping companies for voyage charter, time charter or bare-boat charter are exempt from withholding tax. Withholding tax (10%) is imposed on "other income" derived by nonresident companies from Malaysia, which includes, among other payments, commissions and guarantee fees, to the extent that these payments are not business income to the recipient. For treaty withholding tax rates applicable to interest and royalties, see Section F.

For resident and nonresident companies carrying on petroleum operations, petroleum income tax is charged at a rate of 38% instead of the above rates.

**Tax incentives.** Malaysia offers a wide range of incentives such as tax holidays or investment allowances, which are granted to promote investments in selected industry sectors and/or promoted areas.

**Labuan international business and financial center.** In 1990, the Malaysian government enacted legislation that created a business and financial center on the island of Labuan with a separate and distinct tax and regulatory regime.

Except for companies intending to engage in banking, insurance or the provision of fund management services, government approval is not required to establish a Labuan company. A Labuan company is required to have one director that may be a foreign corporation and at least one secretary who must be an officer of a Labuan trust company.

Labuan companies may transact business with Malaysian residents and may hold shares, debt obligations or other securities in domestic companies.

Labuan companies are subject to tax at a rate of 3% on their net audited profits derived from their trading activities in Labuan.

Labuan trading activities include banking, insurance, trading, management, licensing and shipping operations. Instead of paying tax at the 3% rate, Labuan companies may elect to pay a fixed annual tax of MYR20,000 on their Labuan trading activities. Income derived from wholly non-trading activities, such as dividends, interest and rent, is exempt from tax.

Labuan companies may alternatively elect to be taxed under the Income Tax Act, 1967 (ITA). If they make such election, the rules described above in *Corporate income tax* and *Rates of corporate tax* apply. Labuan companies are exempt from the obligation to withhold tax on payments made to nonresidents.

Labuan companies may open and maintain bank accounts in foreign currency in Malaysia or abroad. No restrictions are imposed on the movement of funds through these accounts.

**Real property gains tax.** Real property gains tax is levied on capital gains derived from disposals of real property located in Malaysia and shares in closely controlled companies with substantial real property interests. The tax applies to gains derived by residents and nonresidents. The following rates apply to disposals by companies, effective from 1 January 2014.

Time of disposal	Rate (%)
Disposal within 3 years after the acquisition date	30
Disposal in the 4th year after the acquisition date	20
Disposal in the 5th year after the acquisition date	15
Disposal in the 6th or subsequent year after the acquisition date	5

Different rates apply to disposals by persons other than companies.

Purchasers of real property located in Malaysia or shares in real property companies must withhold tax at a rate of up to 2% of the purchase price, except in limited circumstances. Effective from 1 January 2015, the maximum withholding tax rate is increased to 3%. Losses incurred on disposals of real property may be carried forward indefinitely to offset future real property gains. Losses on the disposal of shares in real property companies are disregarded.

**Administration.** The year of assessment is the calendar year, but companies may adopt their accounting year as the basis period for a year of assessment. Income tax is chargeable in the year of assessment on the income earned in the basis period for that year of assessment.

Malaysia has a self-assessment regime under which companies must file their tax returns within seven months after the end of their accounting period. A tax return is deemed to be an assessment made on the date of filing the return. Under a proposal, effective from the 2014 year of assessment, the tax return must be based on audited accounts.

Companies must provide an estimate of their tax payable no later than 30 days before the beginning of their basis period. The estimated tax is payable in 12 equal monthly installments by the 15th day (effective from 1 January 2015; previously, the installments were due on the 10th day) of each month beginning in the second month of the basis period. Small and medium enterprises (SMEs; companies that have paid up ordinary capital of MYR2,500,000 or less and are controlled directly or indirectly by another company that has paid up ordinary capital of less than MYR2,500,000) that begin their operations during a year of assessment are exempt from the requirement to pay their tax by installments in the year of assessment in which they commence business and in the immediately following year of assessment. Effective from the 2014 year of assessment, SMEs are not required to furnish an estimate of tax payable for that year of assessment and the two following years of assessment when they first commence operations in a year of assessment and have no basis period for that year of assessment and for the immediately following year of assessment. They are required only to settle the tax due when they file their income tax returns. All companies may revise their estimate of tax payable in the sixth and ninth months of their basis period.

Companies must pay any balance of tax due by the tax filing deadline.

**Dividends.** Effective from the 2008 year of assessment, a single-tier system of taxation replaces the full imputation system. Under the single-tier system, dividends paid, credited or distributed by a company are exempt from tax in the hands of the shareholders. However, a six-year transitional rule (which has expired) allowed

companies to continue to pay franked dividends to their shareholders up to 31 December 2013 under the prior imputation system by using corporate income tax that has been paid or deemed paid up to 31 December 2007. Any balance remaining in the dividend franking account after 31 December 2013 is disregarded. However, at any time during the transitional period, a company could have made an irrevocable election to proceed to the single-tier system and forego the dividend franking credit balance.

**Foreign tax relief.** Malaysian law allows both bilateral and unilateral foreign tax relief. However, because Malaysia generally does not tax foreign-source income, foreign tax relief is usually not applicable, except for companies engaged in banking, insurance, shipping or air transport. These companies are taxed on their worldwide income and may claim foreign tax relief with respect to foreign taxes imposed on their foreign-source income.

### C. Determination of trading income

**General.** The assessment is based on the audited financial statements, subject to certain adjustments. In practice, a nonresident company trading in Malaysia prepares the financial statements of its Malaysian branch in accordance with the Malaysian Companies Act. This act sets out disclosure requirements for financial statements, but does not prescribe the accounting treatment for specific transactions. Malaysian Financial Reporting Standards, which are based on the International Financial Reporting Standards (IFRS), govern the accounting treatment for transactions.

Deductions are allowed for expenses incurred wholly and exclusively in the production of income and for bad debts. No deduction is allowed for the book depreciation of fixed assets, but statutory depreciation (capital allowances) is granted. In general, the cost of leave passages is not deductible. The deductibility of entertainment expenses is generally limited to 50% of the costs incurred. However, a full deduction for entertainment expenses may be claimed in specified circumstances. Double deductions are available with respect to certain expenses relating to the following:

- Participation at approved trade fairs, exhibitions or trade missions
- Maintenance of overseas trade offices
- Research and development

**Inventory.** Trading inventory is valued at the lower of cost or net realizable value. Cost must be determined under the first-in, first-out (FIFO) method; the last-in, first-out (LIFO) method is not accepted.

**Provisions.** General provisions and reserves for anticipated losses or contingent liabilities are not deductible.

#### Capital allowances

*Plant and machinery.* Depreciation allowances are given on capital expenditure incurred on the acquisition of plant and machinery used for the purposes of trade or business. An initial allowance of 20% and an annual allowance ranging from 10% to 20% are granted for qualifying expenditure.

*Industrial buildings.* An initial allowance of 10% and an annual allowance of 3% are granted for qualifying expenditure on the

construction or purchase of industrial buildings. As a result of these allowances, qualifying expenditure on industrial buildings is fully written off in the 30th year after the year of construction or purchase. For purposes of the allowances, industrial buildings include hotels.

*Child care centers.* An annual allowance of 10% is granted for expenditure incurred for the construction or purchase of buildings used as child care facilities for employees.

*Employee housing.* An annual allowance of 10% is granted for expenditure incurred by manufacturers and certain approved service companies for the purchase or construction of buildings for the accommodation of employees. Buildings occupied by management or administrative staff do not qualify for this allowance.

*Educational institutions.* An annual allowance of 10% is granted for expenditure on the construction or purchase of buildings used as schools or educational institutions or for industrial, technical or vocational training.

*Motor vehicles.* Capital expenditure incurred on motor vehicles qualifies for an annual allowance of 20%. Qualifying capital expenditure on non-commercial vehicles is restricted to MYR100,000 per vehicle if the vehicle is new and if the total cost of the vehicle does not exceed MYR150,000. Qualifying capital expenditure is restricted to MYR50,000 per vehicle if the vehicle costs more than MYR150,000.

*Office equipment.* An initial allowance of 20% and an annual allowance of 10% are granted for capital expenditure on office equipment.

*Computer equipment.* An initial allowance of 20% and an annual allowance of 80% are granted for capital expenditure on computer hardware and software. These accelerated capital allowance rates are a temporary incentive that is available up to the 2016 year of assessment. Certain conditions must be met to benefit from these accelerated capital allowances.

*Small value asset.* For assets with a value not exceeding MYR1,000, a 100% allowance is given in the year the asset is acquired. However, the total allowance granted for such assets is capped at MYR10,000 for non-SMEs. For the 2015 year of assessment and future years, these amounts are increased to a value of MYR1,300 and to a cap of MYR13,000 for non-SMEs.

*Agriculture.* Annual allowances are given on capital expenditure incurred on new planting (50%), roads or bridges (50%), farm buildings (10%) and buildings for accommodation of farm workers (20%). Accelerated allowances may be allowed at the discretion of the Minister of Finance.

*Forestry.* Annual allowances are given on capital expenditure incurred for purposes of extraction of timber from a forest. Effective the 2015 year of assessment, the capital allowances are available only to persons with a concession or license to extract timber. The rates are 10% for a road or building and 20% for a building for accommodation of employees.

*Other matters.* Capital allowances are generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. To the extent sales proceeds are less than the tax-depreciated value, an additional allowance is given.

**Relief for trading losses.** Trading losses may offset all other chargeable income of the same year. Unused losses may be carried forward indefinitely for offset against chargeable income from business sources. Excess capital allowances may not be offset against other chargeable income of the same year, but may be carried forward indefinitely for offset against income from the trade that generated the capital allowances.

The carryforward of losses and excess capital allowances is subject to the shareholders remaining substantially (50% or more) the same at the end of the year in which the losses or capital allowances arose and on the first day of the year of assessment in which relief is claimed. If the shareholder of the loss company is another company, the loss company is deemed to be held by the shareholders of that other company. Under an administrative concession, the tax authorities have decided not to enforce the shareholding test except in the case of dormant companies. In addition, under the concession, the substantial change in shareholder rule only applies to changes in the immediate shareholder of the loss company. As a result, unused losses of non-dormant companies may continue to be carried forward indefinitely even if a substantial change in shareholders occurs.

Losses arising in the 2009 or 2010 years of assessment may be carried back for offset against the defined aggregate income of the immediately preceding year. The losses allowed to be carried back are capped at MYR100,000 or the defined aggregate income of the immediately preceding year, whichever is less.

**Groups of companies.** Under group relief provisions, 70% of current-year adjusted losses may be transferred by one company to another company in a group. A group consists of a Malaysian-incorporated parent company and all of its Malaysian-incorporated subsidiaries. Two Malaysian-incorporated companies are members of the same group if one is at least 70% owned by the other, or both are at least 70% owned by a third Malaysian-incorporated company. To obtain group relief, the recipient of the losses and the transferor of the losses must have the same accounting period and each must have paid-up capital exceeding MYR2,500,000.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax; imposed on certain taxable goods imported into Malaysia for home consumption and on certain goods manufactured locally when sold, disposed of or used by the manufacturer; general rates (specific rates apply to certain petroleum products)	5/10
Service tax; imposed on the provision of certain prescribed taxable services by prescribed taxable persons	6

Nature of tax	Rate (%)
Goods and services tax (GST; effective from 1 April 2015); on any supply of goods and services, except an exempt, zero-rated or out-of-scope supply, made in Malaysia by a taxable person (a business making taxable supplies must register for GST if its annual taxable turnover exceeds MYR500,000); sales tax and service tax will be abolished when the GST takes effect	6

## E. Miscellaneous matters

**Foreign-exchange controls.** Over the years, the foreign exchange administration policies have been progressively liberalized and simplified. Nonresidents are now free to make direct or portfolio investments in Malaysia in either ringgits or foreign currency. No restrictions are imposed on the repatriation of capital, profits or income earned in Malaysia.

However, the ringgit may not be traded overseas, and payments outside Malaysia should be made in foreign currency.

Nonresidents may obtain any amount of foreign currency credit facilities from licensed onshore banks and from nonbank residents that do not have domestic credit facilities.

Nonresidents may lend in foreign currency to residents if the resident's total foreign currency borrowings are within permitted limits. However, no limits are imposed on loans in foreign currency by nonresident entities within its group of entities to resident companies or on loans in foreign currency by nonresident suppliers to resident companies to finance purchases from the nonresident suppliers.

**Foreign-equity restrictions.** Foreign-equity restrictions have recently been liberalized. As a result, no restrictions are imposed on the ownership of most companies except those in certain regulated industries.

**Anti-avoidance legislation.** Legislation permits the Revenue authority to disregard or vary any transaction that is believed to have the effect of tax avoidance.

**Transfer pricing.** The tax authorities have issued transfer-pricing legislation, rules and guidelines requiring taxpayers to determine and apply an arm's-length price in their intercompany transactions. The transfer-pricing rules also require the preparation of contemporaneous transfer-pricing documentation to substantiate the arm's-length contention.

The guidelines provide a detailed list of information, documentation and records with respect to related-party transactions that need to be compiled to meet the contemporaneous documentation requirement. The guidelines are based on the arm's-length principle set forth in the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines and provide several methods for determining an arm's-length price. However, the prevailing rules and guidelines contain significant departures in the tax authorities' interpretation of the arm's-length standard from the practices set out in the OECD transfer-pricing guidelines.

In addition, companies carrying out cross-border transactions with associated persons may apply for an advance pricing arrangement (APA) from the tax authorities subject to conditions. Specific measures in the tax law also address thin-capitalization adjustments.

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

- (a) No dividend withholding tax is imposed in Malaysia. However, for dividends paid under the transitional imputation system, tax would have been deducted at source at the prevailing corporate tax rate for that year of assessment (see Section B).
- (b) Interest on approved loans is exempt from Malaysian tax. An approved loan is a loan or credit made by a nonresident to the government, state government, local authority or a statutory body, or guaranteed by the government or state government.
- (c) These treaties have been ratified, but they are not yet in force.
- (d) Approved royalties are exempt from Malaysian tax.
- (e) Malaysia is honoring the USSR treaty with respect to the Russian Federation. Malaysia has entered into separate tax treaties with Kazakhstan, Kyrgyzstan, Turkmenistan and Uzbekistan.
- (f) This is the income tax treaty between the Taipei Economic and Cultural Office (TECO) in Malaysia and the Malaysian Friendship and Trade Centre (MFTC) in Taipei.

Malaysia has also entered into limited agreements covering only aircraft and ship transportation with Argentina and the United States.

## A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	10*

\* The 10% withholding tax is imposed on specified payments made to persons not resident in the Maldives. These payments include the following:

- Management fees
- Fees for technical services
- Fees for the use of computer software
- Payments for performances by public entertainers
- Rents paid for the viewing of cinematographic films in the Maldives
- Royalties and rents paid for the use of plant, machinery, equipment or property
- Payments for carrying on research and development
- Fees for personal services
- Other commissions or fees

## B. Taxes on corporate income and gains

Although a tax specifically applicable to corporate profits does not currently apply, a tax of 15% is imposed on the business profits of any “person” deemed to be carrying on a business. A “person” includes, but is not limited to, corporations, partnerships and individuals. The taxable profits or losses of a partnership for a year are computed as if it were a body corporate.

Also, resident and nonresident banks are subject to a tax of 25% on taxable profits.

## C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax; the tax is passed on to the end consumer	6
Tourism Goods and Services Tax (TGST); applies to goods and services supplied by tourist establishments	12

Stamp duty; imposed on all imports and exports	0.1
Customs duties; imposed on imports; rates vary according to the type of import	Various

**D. Foreign-exchange controls**

The Maldivian currency is the rufiyaa (MVR).

The Maldives does not impose any strict foreign-exchange controls. Businesses may remit all of their net profits after payment of business profits tax.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies that are considered to be ordinarily resident and domiciled in Malta are subject to income tax on their worldwide income. Companies registered in Malta are considered resident in Malta. In addition, companies registered outside Malta are considered to be resident in Malta if management and control is exercised in Malta.

**Rates of corporate tax.** Income tax is the only tax imposed on the profits of companies. The standard rate of income tax is 35%.

**Tax incentives.** Tax incentives are offered in the Malta Enterprise Act and in regulations to the act, as well as in the Income Tax Act.

The Malta Enterprise Act has introduced a new set of incentives for the promotion and expansion of business, covering a wide range of sectors and activities. The incentives available under the act may be divided into six categories, which are described in the following six subsections. Other tax incentives available in Malta are discussed in the subsequent subsections.

*Access to finance.* The Micro Guarantee Scheme provides eligible undertakings with a guarantee of up to 80% on loans of up to EUR100,000, which may be used to finance projects leading to business enhancement, growth and development. Soft loans (loans at lower interest rates) are available to manufacturing enterprises covering 33% of an approved project but they may not exceed 75% of the cost of plant, machinery and equipment. Loan interest subsidies and royalty financing are available for highly innovative projects.

*Investment aid.* Companies engaged in specified activities can benefit from tax credits regarding capital expenditure, job creation or reinvestment of profits derived from trade or business in an approved project.

*Small and medium-sized business development.* Grants are available for the creation and development of innovative start-ups and the development of forward-looking small and medium-sized businesses carrying on or intending to carry out an activity that may contribute to the economic development of Malta, provided that certain conditions are fulfilled. The Malta Enterprise Corporation also provides assistance regarding the hiring of experts and the use of information communications technology or e-business (the conduct of business through information technology systems). Grants under this scheme are currently not available or under review. Businesses should monitor any amendments.

*Research and development and innovation programs.* Fiscal incentives and cash grants are offered to stimulate innovative enterprises to engage in research and development. Grants under this scheme are currently closed or under review.

*Royalty income from patents.* The scheme for royalty income from patents is aimed to encourage investment in research, knowledge creation and exploitation of intellectual property. Fiscal benefits are available to individuals and enterprises that own the rights to patented intellectual property and are receiving royalty income.

*Enterprise support.* Assistance is offered to businesses to support them in developing their international competitiveness, improving their processes and networking with other businesses.

*Employment and training.* The Employment and Training Corporation (ETC) is taking over and administering the employment and training incentives. Enterprises are supported in recruiting new employees and training their staff. These incentives help generate more employment opportunities and training activities.

*Income Tax Act.* The Income Tax Act provides for a deduction of 150% of research and development expenditure incurred.

*Shipping.* Maltese shipping law is modeled on British legal sources by incorporating measures containing a system of mortgages that provide excellent security. However, Maltese law also includes measures offering attractive fiscal packages to the shipping industry.

An organization qualifies as a shipping organization if it engages in one or more specified activities and if it obtains a license from the Registrar-General to enable it to carry on such activities. The following are the specified activities:

- The ownership, operation (under charter or otherwise), administration and management of a ship or ships registered as a Maltese ship under the Merchant Shipping Act and the carrying on of related financial, security and commercial activities
- The ownership, operation (under charter or otherwise), administration and management of a ship or ships registered under the flag of another state and the carrying on of related financial, security and commercial activities
- The holding of shares or other equity interests in Maltese or foreign entities that are established for any of the purposes stated in the law and the carrying on of related financial, security and commercial activities
- The raising of capital through loans, the issuance of guarantees or the issuance of securities by a company if the purpose of such activity is to achieve the objectives of the shipping organization itself or for other shipping organizations within the same group
- The carrying on of such other activities within the maritime sector that are prescribed in regulations

A shipping organization may be established as a limited liability company (public or private), a foreign corporate body that has established a place of business in Malta or another type of entity specified in the law.

If the activities of a shipping organization are restricted to the activities and related activities described above, the following favorable tax treatment applies:

- No income tax is imposed on the income derived from the shipping activities of a licensed shipping organization.
- No income tax is imposed on gains arising on the liquidation, redemption, cancellation or any other disposal of shares, securities or other interests, including goodwill, held in a licensed shipping organization owning, operating, administering or managing a tonnage-tax ship while the ship is a tonnage-tax ship.
- No income tax is imposed on interest or other income paid to a person with respect to the financing of the operations of licensed shipping organizations.

Income derived by a ship manager from ship management activities is deemed to be income derived from “shipping activities” and is exempt from income tax under the Income Tax Act if the following conditions are satisfied:

- The company maintains proper accounts relating to its shipping activities.
- The ship manager pays an annual tonnage tax to the Registrar-General.

For these purposes, “shipping activity” is the international carriage of goods or passengers by sea or the provision of other services to or by a ship as may be ancillary to such activities or associated with such activities, including the ownership, chartering or other operation of a ship engaged in all or any of the above activities or as otherwise may be prescribed.

Income derived by a licensed shipping organization from the sale or transfer of a tonnage-tax ship or from the disposal of a right to a ship, which when delivered or completed would qualify as a tonnage-tax ship, is exempt from tax. In 2012, the European Union (EU) Commission initiated a state-aid investigation into Malta’s tonnage tax system. This investigation is still ongoing.

*Collective Investment Schemes or Funds.* Collective Investment Schemes or Funds must be licensed under the Investment Services Act. Collective Investment Schemes usually take the form of corporate funds, including open-ended (SICAVs) and close-ended funds, or non-corporate funds, such as unit trusts.

The income of Collective Investment Schemes (other than income from immovable property located in Malta and investment income) is exempt from tax. In addition, resident prescribed funds are subject to withholding tax on their local investment income. These funds are subject to a 15% final withholding tax on bank interest received and to a 10% final withholding tax on other investment income received, such as interest on bonds and government stocks (units issued by the government to which the general public is invited to subscribe). Under regulations issued by the Inland Revenue Department, prescribed funds are funds whose assets in Malta amount to 85% or more of their total assets. Capital gains derived by funds from disposals of investments and assets are also exempt from tax.

Capital gains derived by unit holders on disposals of their units in prescribed funds listed on the Malta Stock Exchange are exempt from tax. Unit holders in unlisted prescribed funds are subject to tax on their gains. Tax at 15% is withheld on the capital gains realized by resident investors on the disposal of listed shares in accumulator non-prescribed funds. For nonresident Collective Investment Schemes, the withholding tax provisions apply only if the disposal of the shares is effected through an authorized financial intermediary. If the disposal of shares in nonresident non-prescribed funds is not effected through an authorized financial intermediary, no withholding tax is due and any capital gains must be disclosed by the resident investor in the individual’s tax return and taxed at the normal rates of income tax, up to a maximum of 35%.

**Aviation income.** Income derived from the ownership, lease or operation of aircraft and aircraft engines used in the international transport of passengers or goods (aviation income) is deemed to arise outside Malta regardless of whether the aircraft is operated from Malta. Consequently, a company that is incorporated outside Malta but managed and controlled in Malta (resident but not domiciled for income tax purposes, or a “non-dom co”) must pay tax on income derived from its aviation income on a remittance basis. Aviation income that is not received in Malta is not taxed in Malta. This implies that a non-dom co may control its Maltese

tax liability through its remittances and that a non-dom co deriving aviation income that is not received in Malta is exempt from tax on its aviation income.

**Capital gains.** Income tax is imposed on capital gains derived from the transfer of ownership of the following assets only:

- Immovable property. However, transfers of immovable property or rights over immovable property that are subject to the new Property Transfers Tax (see *Property Transfers Tax*) are exempt from income tax.
- Securities (company shares that do not provide for a fixed rate of return, units in Collective Investment Schemes and units relating to linked long-term business of insurance [life insurance contracts under which benefits are wholly or partially determined by reference to the value of, or income from, property]).
- Goodwill, business permits, copyrights, patents, trademarks and trade names.
- Beneficial interests in trusts.
- Full or partial interests in partnerships

In certain cases, value shifting and degrouping result in taxable capital gains.

If a person acquires or increases a partnership share, a transfer of an interest in the partnership to that partner from the other partners is deemed to occur, and is accordingly subject to tax.

For purposes of the capital gains rules, “transfer” has a broad definition that is not restricted to sale. It also includes any assignment or cession of any rights, reduction of share capital, liquidation or cancellation of units or shares in Collective Investment Schemes and other types of transactions. The definition does not include inheritance.

Transfers that are exempt from tax include the following:

- Donations to philanthropic institutions
- “Emphyteutical” grants for periods of less than 50 years (the Civil Code defines “emphyteusis” as a contract under which one of the contracting parties grants to the other, in perpetuity or for a time, a tenement for a stated annual rent or ground rent, which the grantee agrees to pay to the grantor, either in money or in kind, as an acknowledgment of the tenure)
- Transfers of chargeable assets between companies belonging to the same group of companies
- Transfers by nonresidents of securities in Maltese companies that are not primarily engaged in holding immovable property in Malta
- Transfers of securities listed on the Malta Stock Exchange as well as transfers of units relating to linked long-term business of insurance if the benefits derived by the units are wholly determined by reference to the value of, or income from, securities listed on the Malta Stock Exchange
- Transfers by nonresidents of units in Collective Investment Schemes

Rollover relief for assets used in business is also available if the asset has been used in the business for at least three years and if it is replaced within one year by an asset used only for a similar purpose.

Taxable capital gains are included in chargeable income and are subject to income tax at the normal income tax rates. Capital losses may be set off only against capital gains. Trading losses may be carried forward to offset capital gains in future years.

Provisional tax of 7% of the consideration or of the value of the donation must be paid by a seller on the transfer of property if the transaction is subject to the capital gains regime. The Commissioner for Revenue may authorize a reduction in the rate of provisional tax if it can be proved that the capital gain derived from the transaction is less than 20% of the consideration. Provisional tax paid is allowed as a credit against the income tax charge.

If a company transfers property to its shareholders, or to an individual related to a shareholder, in the course of a winding up or distribution of assets, who own all of the share capital of the company transferring the property, the transfer is exempt from tax if certain conditions are satisfied.

**Property Transfers Tax.** In 2006, Article 5A, which regulates the Property Transfers Tax, was added to the Income Tax Act. This tax is a final tax that is imposed at a rate of 12% on the value of the consideration for transfers of immovable property and rights over immovable property. In general, the Property Transfers Tax is imposed instead of the income tax on capital gains. However, in certain circumstances, taxpayers may elect to be taxed on transfers of immovable property under the income tax measures instead of under the 12% tax regime.

**Securitization.** The total income or gains of a securitization vehicle is realized or deemed to arise during the year in which such income or gains are recognized for accounting purposes. For purposes of calculating the chargeable income or gains of the securitization vehicle for income tax purposes, the following expenses are deductible:

- Relevant expenses provided under Article 14 of the Income Tax Act
- Amounts payable by the securitization vehicle to the originator or assignor
- Premiums, interest or discounts with respect to financial instruments issued or funds borrowed by the securitization vehicle
- Expenses incurred by the securitization vehicle with respect to the day-to-day administration of the securitization vehicle

Tax is chargeable on any remaining total income of the securitization vehicle, and a further deduction of an amount equal to the remaining total income may be claimed at the option of the securitization vehicle, subject to certain provisos and anti-abuse provisions.

**Administration.** The year of assessment is the calendar year. Income tax for a year of assessment is chargeable on income earned in the corresponding basis year, which is generally the preceding calendar year. A company may adopt an accounting period other than the calendar year, subject to approval by the Inland Revenue Department.

Companies with a January to June accounting year-end must file their income tax returns by 31 March (extended if filed

electronically) of the year of assessment. Companies with other accounting year-ends must file their income tax returns within nine months after the end of their accounting year (extended if filed electronically).

A self-assessment system applies in Malta. The Inland Revenue Department issues an assessment only if it determines that a greater amount of income should have been declared or that the company omitted chargeable income from its tax return.

Companies must make three provisional payments of tax, generally on 30 April, 31 August and 21 December. The provisional payments are equal to specified percentages of the tax due as reported in the last income tax return filed with the Commissioner for Revenue on or before 1 January of the year in which the first provisional tax payment is due. The percentages are 20% for the first payment, 30% for the second and 50% for the third. Companies must pay any balance of tax payable on the due date for submission of the income tax return for that year of assessment.

Penalties are imposed for omissions of income, and interest is charged for late payments of tax. The Inland Revenue Department pays interest on certain late refunds.

*Advance Revenue Rulings.* Advance Revenue Rulings may be obtained from the Inland Revenue Department on certain transactions, activities and structures. Rulings survive any change in legislation for a period of two years. In all other circumstances, rulings are binding for five years. Renewals may be requested.

**Allocation and distribution of profits.** The distributable profits of a company are allocated to five tax accounts in the following order:

- Final Tax Account
- Immovable Property Account
- Foreign Income Account
- Maltese Taxed Account
- Untaxed Account

The Final Tax Account contains distributable profits that have been subject to a final tax. The Immovable Property Account contains profits connected with immovable property located in Malta. The Foreign Income Account contains, broadly, foreign-source passive income and foreign-source active income attributable to a permanent establishment located outside Malta. The Maltese Taxed Account contains profits that are not included in the Final Tax Account, Immovable Property Account or Foreign Income Account. The Untaxed Account contains an amount of profits or losses that is calculated by deducting the total sum of amounts allocated to the other accounts from the total amount of profits shown in the profit-and-loss account for that year.

The Full Imputation System applies to distributions from the Immovable Property Account, Foreign Income Account and Maltese Taxed Account. Under this system, the tax paid by the company is imputed as a credit to the shareholder receiving the dividends. Profits allocated to the Foreign Income Account and the Maltese Taxed Account result in tax refunds under the Refundable Tax Credit System (see *Refundable Tax Credit System*).

*Refundable Tax Credit System.* In 2007, the Maltese House of Representatives passed a law that implemented an agreement with the EU relating to a refundable tax system for all companies distributing dividends to shareholders. The imputation system under which the tax paid by a company is essentially treated as a prepayment of tax on behalf of the shareholder has been retained but a new refund system is introduced. The new refundable tax system applies both to profits allocated to a company's Maltese Taxed Account and to profits allocated to its Foreign Income Account and is available both to residents and nonresidents.

A person receiving a dividend from a company registered in Malta from profits allocated to its Maltese Taxed Account or its Foreign Income Account that do not consist of passive interest or royalties may claim a refund of six-sevenths of the tax paid by the distributing company on the profits out of which the dividends were paid. As a result of the introduction of the new system, the dividend recipient receives a full imputation credit plus a refund of six-sevenths of the tax paid by the distributing company.

Distributions of profits derived from passive interest or royalties or profits derived from a participating holding in a body of persons that does not satisfy the anti-abuse provision (see *Participation exemption and participating holding system*) do not qualify for the six-sevenths refund. Instead, they qualify for a refund of five-sevenths of the tax paid by the company.

The six-sevenths and five-sevenths refunds apply to distributions made by companies that do not claim any form of double tax relief. Dividends paid out of profits allocated to the Foreign Income Account with respect to profits for which the distributing company has claimed any form of double tax relief (double tax treaty relief, unilateral relief or the flat-rate foreign tax credit; see *Foreign tax relief*) are entitled to a refund equal to two-thirds of the tax that was suffered by the distributing company gross of any double tax relief. However, for the purposes of this calculation, the amount of tax suffered by the company is limited to the actual tax paid in Malta by the distributing company.

The refundable tax system is extended to shareholders of foreign companies that have Maltese branches. Tax paid in Malta by branches on profits attributable to activities performed in Malta is refunded when such profits are distributed.

Persons must register with the Commissioner for Revenue to benefit from the tax refunds described above.

**Participation exemption and participating holding system.** Before 1 January 2007, profits derived from a participating holding were taxed at the rate of 35%. On distribution of such profits to non-resident shareholders, such shareholders were entitled to receive a full refund of the tax paid by the company. Effective from 1 January 2007, the Maltese income tax system exempts from tax income and capital gains derived by a company registered in Malta from a participating holding or from the disposal of such holding. This exemption is referred to as the participation exemption. At the option of the shareholders, a full refund may still be obtained.

Effective from 2013, the participation exemption is extended to branch profits. This applies to income and gains derived by a company registered in Malta that are attributable to a permanent establishment (including a branch) located outside Malta or that are attributable to the transfer of such permanent establishment, regardless of whether such permanent establishment belongs exclusively or in part to the particular company, including a permanent establishment operated through an entity or relationship other than a company.

Under the recent tax reform, a holding in another company is considered to be a participating holding if any of the following circumstances exist:

- A company holds directly at least 10% of the equity shares of a company whose capital is wholly or partly divided into shares, and such holding confers an entitlement to at least 10% of any two of the following:

- Right to vote.
- Profits available for distribution.
- Assets available for distribution on a winding up.

The Commissioner for Revenue may determine that the above provisions are satisfied if the minimum level of entitlement exists in the circumstances referred to in the proviso to the definition of “equity holding.” See below for the definition of “equity holding.”

- A company is an equity shareholder in another company, and the equity shareholder company may at its option call for and acquire the entire balance of the equity shares not held by that equity shareholder company to the extent permitted by the law of the country in which the equity shares are held.
- A company is an equity shareholder in a company, and the equity shareholder company is entitled to first refusal in the event of a proposed disposal, redemption or cancellation of all of the equity shares of that company not held by that equity shareholder company.
- A company is an equity shareholder in a company and is entitled to either sit on the board or appoint a person to sit on the board of that company as a director.
- A company is an equity shareholder that holds an investment representing a total value, as of the date or dates on which it was acquired, of a minimum of EUR1,164,000 (or the equivalent sum in a foreign currency) in a company and that holding in the company is held for an uninterrupted period of not less than 183 days.
- A company is an equity shareholder in a company, the holding of such shares is for the furtherance of the equity shareholder’s own business, and the holding is not held as trading stock for the purpose of a trade.

A holding of a company in a body of persons or a collective-investment vehicle that provides for limited liability of investors constituted, incorporated or registered outside Malta, that is not resident in Malta and that is of a nature similar to a partnership *en commandite* (limited partnership) and whose capital is not divided into shares constituted under the Companies Act, is deemed to constitute a participating holding if it satisfies the provisions of any of the six bullets above.

For the purposes of the above rules, an “equity holding” is a holding of the share capital in a company that is not a property company if the shareholding entitles the shareholder to at least any two of the following rights (equity holding rights):

- Right to vote
- Right to profits available for distribution to shareholders
- Right to assets available for distribution on a winding up of the company

The terms “equity shares,” “equity shareholder” and “equity shareholding” are construed in accordance with the above definition.

The Commissioner for Revenue may determine that an equity holding exists even if such holding is not a holding of the share capital in a company or does not consist solely of such a holding of share capital, provided that it can be demonstrated that at any time an entitlement to at least two of the equity holding rights exists in substance.

A “property company” is a company that owns immovable property located in Malta or any rights over such property, or a company that holds, directly or indirectly, shares or interests in a body of persons owning immovable property located in Malta or any rights over such property.

A company or body of persons carrying on a trade or business that owns immovable property located in Malta or rights over such property is treated as not owning the immovable property or rights over such property if all of the following conditions are satisfied:

- The property consists only of a factory, warehouse or office used solely for the purpose of carrying on such trade or business.
- Not more than 50% of its assets consist of immovable property located in Malta.
- It does not carry on an activity from which income is derived directly or indirectly from immovable property located in Malta.

The application of the participation exemption is subject to an anti-abuse provision. The participation exemption applies to participating holdings if the body of persons in which the participating holding is held satisfies any one of the following three conditions:

- It is resident or incorporated in a country or territory that forms part of the EU.
- It is subject to a foreign tax of at least 15%.
- It does not derive more than 50% of its income from passive interest or royalties.

If none of the above conditions is satisfied, both of the following two conditions must be fulfilled:

- The equity holding by the company registered in Malta in the body of persons not resident in Malta is not a portfolio investment. For this purpose, the holding of shares by a company registered in Malta in a company or partnership not resident in Malta that derives more than 50% of its income from portfolio investments is deemed to be a portfolio investment.
- The body of persons not resident in Malta or its passive interest or royalties has been subject to a foreign tax of at least 5%.

The participation exemption applies only to gains or profits derived from transfers of holdings in companies resident in Malta. For this purpose, transfers encompass a wide scope of transactions, including, among others, assignment, sale, emphyteusis (a contract under which one of the contracting parties grants to the other a tenement in land for stated rent), sub-emphyteusis, partition, donation and transfer of assets by a company to its shareholders, in the course of winding up of the company or in the course of a distribution of assets to its shareholders in accordance with a scheme of distribution.

**Foreign tax relief.** Under tax treaty provisions and the domestic law, a tax credit against Maltese tax is granted for foreign tax suffered. The amount of the credit is the lower of Maltese tax on the foreign income and the foreign tax paid.

Maltese companies may also reduce their tax payable in Malta by claiming double tax relief with respect to British Commonwealth income tax.

Unilateral tax relief, which is another form of double tax relief, applies if treaty relief is not available and if the taxpayer has proof of the foreign tax suffered. The unilateral relief is also available for underlying tax.

Another form of double tax relief is a flat-rate foreign tax credit (FRFTC), which may be claimed by companies that have a special empowerment clause in their Memorandum and Articles of Association. The empowerment clause requirement applies to companies resident in Malta before 1 January 2007 and is effective from 1 January 2011. Companies, other than companies subject to the empowerment clause requirement, can currently claim the FRFTC. A company resident in Malta before 1 January 2007 could claim the FRFTC without an empowerment clause until 1 January 2011. The FRFTC, which is equivalent to 25% of the net income received (before any allowable expenses), applies to all foreign-source income that may be allocated to the Foreign Income Account. An auditor's certificate stating that the relevant income is foreign-source income is sufficient evidence that profits may be allocated to the Foreign Income Account. The FRFTC is added to chargeable income and credited against the Maltese tax charge. The credit is limited to 85% of the Maltese tax due before deducting the credit.

The interaction of the four types of double tax relief not only ensures that tax is not paid twice on the same income; it also reduces the overall effective rate of the Maltese tax.

### C. Determination of trading income

**General.** Chargeable income is the net profit reported in the companies' audited financial statements, subject to certain adjustments. Expenses incurred wholly and exclusively in the production of income are deductible.

Expenses that are not deductible include the following:

- Amortization of goodwill
- All types of provisions

- Voluntary payments
- Expenses recoverable under insurance
- Pretrading expenses (except for expenditure incurred with respect to staff training, salaries or wages and advertising within the 18 months preceding the date on which the company begins to carry on its trading activities)
- Unrealized exchange differences
- Other expenses that are not incurred in the production of income

**Inventories.** Inventories are normally valued at the lower of cost or net realizable value in accordance with generally accepted accounting principles.

**Tax depreciation (capital allowances).** Tax depreciation allowances include initial allowances and annual wear-and-tear allowances.

Initial allowances are granted at a rate of 10% with respect to new industrial buildings and structures.

Wear-and-tear allowances for plant and machinery are calculated using the straight-line method. Industrial buildings and structures are also depreciated using the straight-line method.

The following are the minimum number of years over which the principal categories of plant and machinery may be depreciated.

Asset	Years
Computers and electronic equipment	4
Computer software	4
Motor vehicles	5*
Furniture, fitting and soft furnishings	10
Other machinery	5
Other plant	10

\* The cost of non-commercial motor vehicles is limited to EUR6,988.20.

The annual straight-line rate for industrial buildings and structures, including hotels, is 2%. Commercial buildings may not be depreciated.

Capital allowances are generally subject to recapture on the sale of an asset to the extent the sale proceeds exceed the tax value after depreciation. Any amounts recaptured are added to taxable income for the year of sale or are used to reduce the cost of a replacement asset. To the extent sales proceeds are less than the asset's depreciated value, an additional allowance is granted. Capital allowances on assets for which investment allowances have been granted are not recaptured, and no additional allowances described in the preceding sentence are granted.

**Groups of companies.** A company that is part of a group of companies may surrender losses to another member of the group. Two companies are deemed to be members of a group of companies for tax purposes if they are resident in Malta and not resident in any other country for tax purposes, and if one of the companies is a 51% subsidiary of the other or both are 51% subsidiaries of a third company that is resident in Malta. A company is considered to be a 51% subsidiary of another company if all of the following conditions exist:

- More than 50% of the subsidiary's ordinary shares and more than 50% of its voting rights are owned directly or indirectly by the parent company.
- The parent company is beneficially entitled to receive directly or indirectly more than 50% of profits available for distribution to the ordinary shareholders of the subsidiary.
- The parent company is beneficially entitled to receive directly or indirectly more than 50% of the assets of the subsidiary available for distribution to the ordinary shareholders of the subsidiary in the event of a liquidation.

The group company surrendering the losses and the group company receiving the losses must have accounting periods that begin and end on the same dates, except for newly incorporated companies and companies in the process of liquidation.

**Relief for losses.** Tax losses incurred in a trade or business may be carried forward indefinitely to offset all future income. Unabsorbed tax depreciation may also be carried forward indefinitely, but may offset only income derived from the same source. A carry-back of losses is not allowed.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; standard rate	18
Stamp duty on various documents and transfers of ownership	
Sales of real property	5
Transfers of marketable securities	2
Life insurance policies	0.1
Other insurance policies	10
Excise duty, on various commodities including cigarettes, soft drinks and beer; although levied on producers or importers when they distribute the products for general consumption, the duty is ultimately borne by consumers because it is included in the price of the products	Various

#### E. Miscellaneous matters

**Foreign-exchange controls.** When Malta became a member of the EU, it abolished foreign-exchange controls and introduced some reporting obligations under the External Transactions Act.

**Anti-avoidance legislation.** Maltese law includes no specific transfer-pricing rules. However, it does contain general anti-avoidance provisions to prevent the avoidance of tax through arrangements that are solely tax-motivated. Under these provisions, the Inland Revenue Department may ignore an arrangement and add an amount to chargeable income if it establishes that a transaction has the effect of avoiding or postponing tax liability.

**Debt-to-equity rules.** Malta does not impose any debt-to-equity requirements.

## F. Treaty withholding tax rates

Under Maltese domestic tax law, dividends, interest, discounts, premiums and royalties paid to nonresidents are not subject to withholding tax. Interest and royalties paid to nonresidents are exempt from income tax in Malta if they are not effectively connected with a permanent establishment in Malta through which the nonresidents engage in a trade or business.

Under Malta's tax treaties, the maximum tax rates applicable to dividends paid by Maltese companies to persons resident in the other treaty countries do not exceed the tax rate payable by the recipient companies in Malta.

The following table provides the maximum withholding tax rates for dividends, interest and royalties under Malta's tax treaties.

	Dividends		Required percentage for major shareholding %	Interest %	Royalties %
	Rate for minor shareholding %	Rate for major shareholding %			
Albania	15	5	25	5	5

Non-treaty countries	0	0	– (a)	0	0

(a) Not applicable.

(b) These are the general rates, but other rates may apply in specified circumstances.

Malta has signed tax treaties with Moldova and Ukraine and a protocol with Belgium, but these agreements are not yet in force.

# Mauritania

ey.com/GlobalTaxGuides  
ey.com/TaxGuidesApp

Please direct all inquiries regarding Mauritania to Tom Philibert of the Dakar, Senegal, office (telephone: +221 (33) 849-2217; fax: +221 (33) 823-8032; email: tom.philibert@sn.ey.com).

## A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (b)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%)	
Dividends	10
Interest	10
Royalties from Patents, Know-how, etc.	3 (c)
Directors' Fees	10
Payments for Services	3 (c)
Branch Remittance Tax	10 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The minimum tax is 2.5% of annual turnover. However, the tax may not be less than MRO750,000.
- (b) The tax may be deferred (see Section B).
- (c) Applicable to payments by residents to nonresidents. A tax treaty may reduce the rate applicable to nonresidents.
- (d) See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Mauritanian companies are taxed on the territoriality principle. As a result, Mauritanian companies carrying on a trade or business outside Mauritania are not taxed in Mauritania on the related profits. Foreign companies with activities in Mauritania are subject to Mauritanian corporate tax on Mauritanian-source profits only.

**Tax rates.** The regular corporate income tax rate is 25%. The minimum tax (Impôt Minimum Forfaitaire, or IMF) is 2.5% of turnover. However, the tax may not be less than MRO750,000.

Profits realized in Mauritania by branches of foreign companies are deemed to be distributed and, consequently, are subject to a branch withholding tax of 10% on after-tax income.

The new investment code provides for a preferential tax regime, which is available to companies producing goods or services for export exclusively and companies working exclusively for them.

Apart from the simplified tax regime for the oil and gas sector, a simplified tax regime exists for foreign companies that carry out activities in Mauritania with a duration of less than six months. Companies that benefit from this tax regime are subject to a withholding tax of 15% on their Mauritanian-source revenue and are exempt from all other taxes (except taxes on salaries).

**Capital gains.** Capital gains are taxed at the regular corporate income tax rate. However, the tax may be deferred if the proceeds are used to acquire new fixed assets in Mauritania in the following three fiscal years.

**Administration.** The fiscal year is the calendar year. Tax returns must be filed by 31 March of the year following the fiscal year.

Companies must pay the IMF (see *Tax rates*) in two equal installments, which are due on 31 March and 30 June of the year following the tax year. Companies must pay any balance of tax due by 30 April.

**Dividends.** Dividends are subject to a 10% withholding tax, which may be a deductible expense if the recipient is subject to corporate income tax.

**Foreign tax relief.** Foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Mauritanian tax under the territoriality principle is taxable net of the foreign tax.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the National General Accounting Plan.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on loans from shareholders to the extent that the rate exceeds the current rate of the central bank and all of the interest on shareholder loans if the capital of the company is not fully paid
- Corporate income tax and IMF (see Section B)
- Certain specified charges
- Taxes, penalties, gifts and most liberalities (payments exceeding 0.5% of trading income that do not produce a compensatory benefit)

**Inventories.** Inventory is normally valued at the lower of cost or market value.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

**Capital allowances.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at maximum rates specified by the tax law. The following are some of the applicable straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Commercial buildings	4
Industrial buildings	5
Office equipment	10
Motor vehicles	25
Plant and machinery	20

Certain industrial assets may be depreciated using the declining-balance method. The Mauritanian tax law does not allow accelerated depreciation methods.

**Relief for tax losses.** Losses may be carried forward for five years. Losses may not be carried back.

**Groups of companies.** Fiscal integration of Mauritanian companies equivalent to a consolidated filing position is not allowed.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on sales of goods and services, and on imports and exports Standard rate	14
Business activity tax ( <i>patente</i> ); calculated based on the turnover of the business	Various
Registration duties, on transfers of real property or businesses	0.25 to 15
Social security contributions, on an employee's annual gross salary up to MRO840,000; paid by Employer	15
Employee	1

#### E. Foreign-exchange controls

The Mauritanian currency is the ouguiya (MRO).

Exchange-control regulations exist in Mauritania for foreign financial transactions.

#### F. Tax treaties

Mauritania has entered into double tax treaties with France, the Maghreb Arab Union, Senegal and Tunisia.

## A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	0 (a)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	0
Interest	15 (b)
Royalties	10/15 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) See Section B.  
(b) This withholding tax applies to interest paid to any person, other than a company resident in Mauritius, by a person, other than a Mauritian bank or a person authorized to carry on deposit-taking business in Mauritius. This rate may be reduced if the recipient is a tax resident of a treaty-partner country.  
(c) The withholding tax rate is 10% for royalties paid to residents. For nonresidents, the rate is 15% unless the recipient is resident in a treaty country and the applicable treaty provides for a lower rate. The withholding tax rate does not apply if the payer is a corporation holding a Category 1 Global Business License under the Financial Services Act 2007 and if it pays the interest out of its foreign-source income.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in Mauritius are subject to income tax on their worldwide income. Resident companies are companies incorporated in Mauritius and companies with their central management and control in Mauritius. If a nonresident company has a branch carrying on business in Mauritius, the nonresident company is subject to tax on the income of the branch.

**Rates of corporate income tax.** The corporate income tax rate is 15% of the annual taxable net profits.

A requirement to establish a Corporate Social Responsibility (CSR) fund applies to companies. Companies must set up a CSR fund equal to 2% of chargeable income for the preceding year if they intend to take any of the following actions:

- Implement an approved program

- Implement an approved program under the National Empowerment Foundation
- Finance an approved Non-Government Organization

A committee has been set up for the purposes of the approval process. This committee is chaired by the Minister of Finance and Economic Empowerment. The committee provides that the CSR activities must focus on the following areas:

- Socioeconomic development
- Health
- Education and training
- Environment
- Catastrophic intervention and support

All companies must use 50% of their CSR fund to finance any one of the following four priority areas:

- Houses for the needy
- Absolute poverty and community empowerment
- Welfare of children from vulnerable groups
- Prevention of non-communicable diseases

If the contribution is less than the 2% minimum, the difference must be paid to the Mauritius Revenue Authority (MRA) when the company submits its annual tax return. Certain companies, such as Global Business Corporations set up under the Financial Services Act 2007 and companies that hold an Integrated Resort certificate referred to in the Investment Promotion (Real Estate Development Scheme) Regulations, 2007, are excluded from the purview of the CSR rules. Effective from the 2013 year of assessment, companies may spend up to 20% more than their statutory CSR obligation in any year but not more than two consecutive years and the excess CSR spending may then be offset in five equal consecutive annual installments against its future CSR liability. Subject to the approval of the CSR committee, up to 20% of the CSR liability may be carried forward to the following year.

A special levy is imposed on banks. The levy does not apply if, in the preceding year, the bank had incurred a loss or if its book profit did not exceed 5% of its operating income. For the 2009 through 2013 years of assessment, the levy equals the sum of 3.4% of book profit and 1% of operating income. For the 2014 and 2015 years of assessment, the tax base and rates remain unchanged for Segment B banking business. Segment B banking business refers to banking transactions with nonresidents and corporations that hold a Global Business License under the Financial Services Act 2007. The levy is computed at 10% of the chargeable income from other sources. For the 2016 and subsequent years of assessment, the levy will equal the sum of 1.7% of the book profit and 0.5% of operating income. For purposes of the levy, operating income is the sum of net interest income and other income before deducting any non-interest expenses.

“Telephony service providers,” defined as a provider of public fixed or mobile telecommunication networks and services, are subject to a solidarity levy for the 2009, 2010, 2011, 2012, 2013 and 2014 years of assessment. The levy equals the sum of 5% of book profit and 1.5% of turnover. The levy does not apply if, in the preceding year, the service provider incurred a loss or if its book profit did not exceed 5% of its turnover.

**Tax advantages for certain companies.** Freeport companies, Information and Communication Technology companies, companies engaged in offshore activities and companies engaged in spinning, weaving, dyeing or knitting may qualify for tax advantages.

*Freeport companies.* Freeport operators and private Freeport developers are exempt from corporate income tax on sales made to persons outside Mauritius for an indefinite time period.

*Information and Communication Technology companies.* Information and Communication Technology (ICT) companies are classified as tax-incentive companies. If the investment certificate of an ICT company is issued before 30 September 2006 and if the ICT company is engaged in business-process outsourcing and back-office operations or in the operation of call centers or contact centers, the ICT company may elect within 60 days of the date of the issuance of its investment certificate to have two-thirds of its net income exempted from tax up to and including the income year ended 30 June 2012. This reduces the effective tax rate to 5% of taxable income. Income derived by other ICT companies from nonresidents is exempt from tax through the income year ended 30 June 2012. Income derived from residents is taxable at the incentive rate of 15%. Losses incurred during the exemption period may be carried forward to years following the expiration of the exemption period.

*Companies engaging in offshore activities.* Offshore business activities may be conducted through GBL1 companies or GBL2 companies. GBL2 companies must conduct their activities with nonresidents of Mauritius or GBL1 companies. Under the amendment contained in the Finance (Miscellaneous Provisions) Act 2010, GBL1 companies may conduct business within Mauritius. Under the amendment contained in the Economic and Financial Measures (Miscellaneous Provisions) Act 2012, GBL1 companies must seek the approval of the Financial Services Commission with respect to the following:

- Conduct of their business in Mauritius
- Dealings with GBL2 companies and Mauritian resident persons
- Holding of shares or other interests in Mauritian resident corporations

Mauritian residents, including GBL1 companies, are eligible for a foreign tax credit on their foreign-source income. The foreign tax credit is generally the lower of the Mauritian tax and the foreign tax. If the shareholding in the foreign company is 5% or more, an underlying tax credit can be claimed. A tax-sparing credit can also be claimed. A GBL1 company can compute its foreign tax based on a presumed amount of 80% of the Mauritian tax chargeable on foreign-source income (including local-source income derived in the course of its global business) if no written evidence is produced in support of the payment of foreign tax. This reduces the effective tax rate to 3% of the chargeable income on the foreign-source income. Dividends paid to residents and nonresidents and royalties paid by GBL1 companies out of their foreign-source income to nonresidents are exempt from tax. Interest paid by GBL1 companies to nonresidents that do not have a place of business in Mauritius is exempt from tax to the extent that the interest is paid out of its foreign-source income. GBL1 companies may be considered residents of Mauritius for purposes of double tax treaties.

GBL2 companies are regulated by the Companies Act, 2001 and the Financial Services Act, 2007. To qualify as a GBL2 company, the company must be beneficially owned by nonresidents, operate exclusively outside Mauritius and meet certain other requirements. GBL2 companies are exempt from corporate income tax. Dividends paid by GBL2 companies are exempt from income tax. Interest, royalties and other payments made by GBL2 companies to nonresidents are exempt from income tax. GBL2 companies are subject to a more flexible regime than GBL1 companies, but they do not benefit from double tax treaties.

*Companies engaged in qualifying activities.* Companies engaged in dyeing, knitting, spinning, or weaving activities that began their operations before 30 June 2006 are exempt from income tax for a period of up to 10 income years. If a company began operations during the period of 1 July 2006 through 30 June 2008, its income is exempt from income tax up to and including the income year ending 30 June 2016. Losses incurred during the exemption period may be carried forward to years following the expiration of the exemption period.

A company that subscribes to the stated capital of a spinning company on or before 30 June 2008 for an amount of MUR60 million or more is granted a tax credit equal to 60% of the investment in share capital over a period of either four or six income years. This tax credit is also granted to a company subscribing to the stated capital of a company engaged in dyeing, knitting and weaving activities on or before 30 June 2008 for an amount of MUR10 million or more. The credit is available beginning in the income year preceding the income year in which the shares are acquired and is spread equally over the four- or six-year period. Any unused portion of the tax credit may be carried forward to subsequent income years, subject to a maximum period of five consecutive income years beginning with the income year of the investment.

Manufacturing companies or companies producing specified goods or products can claim a tax credit on the total capital expenditure incurred on the acquisition of new plant and machinery (excluding motor cars) exceeding MUR100 million during the period of 1 January 2014 through 31 December 2018. The annual tax credit equals 5% of the cost of the plant and machinery. The credit is subtracted from the income tax liability in the year of acquisition and the two subsequent income years. Any unrelieved tax credit with respect to an income year may be carried forward to the following income year. The carryforward applies to a maximum of five consecutive income years following the income year in which the capital expenditure is incurred. The tax credit applies to the acquisition of the following goods or products:

- Computers
- Electrical equipment
- Film
- Furniture
- Jewelry and bijouterie
- Medical and dental instruments, devices and supplies
- Pharmaceuticals or medicinal chemicals
- Ships and boats
- Textile
- Wearing apparel

**Alternative minimum tax.** The alternative minimum tax (AMT) applies if a company either declares a dividend or distributes any shares instead of dividends and if the tax payable is less than 7.5% of the book profit. The AMT equals the lower of 7.5% of the book profit or 10% of the sum of any dividends declared and amounts distributed instead of dividends. The tax payable by the company is the higher of the AMT or the tax payable under the normal rules.

For purposes of the AMT calculation, capital gains (losses) or revaluation of fixed assets, dividends received from companies resident in Mauritius and trading profits (losses) from the sale or revaluation of securities are excluded in the computation of the book profit. In addition, a foreign tax credit is not subtracted in computing the tax payable.

The AMT does not apply to companies that are exempt from tax and GBL1 companies.

For the 2013 and 2014 income years, manufacturing companies and companies operating hotels are outside the scope of AMT.

**Capital gains.** Capital gains are not subject to income tax. The Finance (Miscellaneous Provisions) Act 2010 (FMPA 2010) introduced a capital gains tax regime for transactions in immovable properties or interests in immovable properties; however, it was repealed by the Finance (Miscellaneous Provisions) Act 2011, effective from 5 November 2011.

**Withholding taxes.** Withholding taxes apply to certain payments. The tax withheld at source is an interim tax payment that may or may not be the final tax liability. Amounts deducted are credited to the final tax liability of the taxpayer for the relevant tax year.

The following are the withholding tax rates.

<b>Payment</b>	<b>Rate (%)</b>
Interest	15 (a)
Royalties	10/15 (b)
Rent for buildings	5
Payments to contractors and subcontractors	0.75
Payments to architects, attorneys, barristers, engineers, land surveyors, legal consultants, medical service providers, project managers in the construction industry, property valuers, quantity surveyors and solicitors	3
Payments made by a ministry, government department, local authority, statutory body or the Rodrigues Regional Assembly on contracts, other than payments to contractor and subcontractors and payments to service providers specified in the preceding entry above	
For the procurement of goods and services under a single contract, if the payment exceeds MUR300,000	1
For the procurement of goods under a contract, if the payment exceeds MUR100,000	1
For the procurement of services under a contract, if the payment exceeds MUR30,000	3

Payment	Rate (%)
Payments made to the owner of immovable property or agent, other than a hotel, unless the payments are made to a body of persons specified in Part I of the Second Schedule or a person exempt from income tax as a result of any other enactment, by a tour operator or travel agent, other than an individual, an Integrated Resort Scheme (IRS) or Real Estate Development Scheme (RES) company or a provider of property management services designated by an IRS or RES company, under the Investment (Real Estate Development) Regulations 2007, or any other agent, other than an individual, carrying on the business of providing services with respect to the leasing of properties	5
Payments made to nonresidents for services rendered in Mauritius	10
(a) This withholding tax applies to interest paid by any person, other than by a bank or nonbank deposit-taking institution under the Banking Act, to any person, other than a company resident in Mauritius.	
(b) This withholding tax is imposed on residents and nonresidents. The withholding tax rate is 10% for residents and 15% for nonresidents. For a recipient of royalties that is resident in a treaty country, the treaty rate applies if it is lower than 15%. The treaty rate does not apply if the payer is a GBL1 company.	

If a recipient of a payment proves to the Director-General of the MRA that the recipient is not liable for tax, the Director-General may, by written notice to the payer, direct that no tax be withheld from the payment to the recipient.

**Administration.** The income year is 1 January to 31 December of the year preceding the year of assessment. Companies may choose a financial year-end other than 31 December for tax purposes. The income year-end was previously 30 June.

Companies are required to file their tax returns within six months after their year-end. If the year-end of a company is 30 June and if the company does not have any tax payable, the tax return can be submitted by 15 January of the following year.

Any tax payable in accordance with the annual return must be paid at the time of filing the return. The Advance Payment System (APS) requires companies to pay tax on a quarterly basis. For purposes of the APS, companies can either use the taxable profits of the preceding tax year or the results of the relevant quarter. A company with annual turnover of MUR4 million or less is not required to pay tax under the APS. The APS requirement also does not apply if the company did not have any chargeable income in the preceding year.

If a payment is late or an incorrect return is filed, a penalty of 5% of the tax payable is imposed. Interest at a rate of 1% for each month or part of a month the tax remains unpaid also applies. In addition, a penalty of MUR2,000 is imposed for each month or part of a month that the annual tax return is late. The penalty is limited to a maximum amount of MUR20,000.

After the MRA issues a notice of assessment, the taxpayer may object to the assessment. For an objection to be valid, 30% of the

total tax claimed must be paid to the MRA. If the MRA is satisfied that the taxpayer cannot pay the 30% tax, a bank guarantee may be provided.

**Dividends.** Dividends paid to residents and nonresidents are exempt from tax.

**Foreign tax relief.** Residents of Mauritius may claim a foreign tax credit (FTC), regardless of whether they may claim other tax credits. The FTC equals the lower of the Mauritian tax liability and the amount of the foreign taxes. In computing the FTC, all foreign-source income may be pooled. An underlying FTC is also available if the residents, including individuals and trusts, own directly or indirectly at least 5% of the share capital of the foreign company. The underlying FTC is extended to all previous tiers. The FTC takes into account any tax sparing credits granted to the payer of the dividends.

### C. Determination of trading income

**General.** Taxable income of resident companies and foreign branches comprises gross income less cost of goods sold and expenses incurred exclusively in the production of income, unless specifically excluded by law. Income and expenses are determined in accordance with generally accepted accounting principles.

**Inventories.** Inventories may be valued according to accounting standards. However, the income tax rules provide that the last-in, first-out (LIFO) method of valuation may not be used.

**Provisions.** No provisions are allowed for tax purposes.

**Tax depreciation.** No deduction is allowed for book depreciation of non-current assets, but statutory depreciation (capital allowances) is granted. Mauritian law provides for investment allowances and annual allowances. However, the investment allowance and the additional investment allowances have been repealed and are now available only in limited cases under transitional rules.

Under the transitional rules, a company whose application has been approved under the Investment Promotion Act, or whose proposed activity has been approved under any other enactment, may elect by irrevocable notice in writing to the Director-General to claim annual allowances for capital expenditure incurred on or before 30 June 2009 at the rates prevailing on 30 June 2006. Manufacturing companies may claim additional investment allowances on state-of-the-art technological equipment for acquisitions made in the years ended 30 June 2007 and 30 June 2008. ICT companies may claim additional investment allowances on computer equipment and plant and machinery for acquisitions made on or before 30 June 2008.

The following investment allowances are provided.

<b>Allowance</b>	<b>Rate (%)</b>
Investment allowance on certain new assets, including industrial buildings, office equipment, plant and machinery, and buses with a seating capacity of at least 30	25

<b>Allowance</b>	<b>Rate (%)</b>
Additional investment allowance for a manufacturing company that has incurred capital expenditure on the acquisition of state-of-the-art technological equipment in the year ended 30 June 2008	10
Additional investment allowance for an ICT company that incurs capital expenditure on the acquisition of new plant and machinery or computer software	25

The following are the rates of annual allowances computed using the declining-balance method.

<b>Asset</b>	<b>Rate (%)</b>
Hotels	30
Plant and machinery	35
Heavy equipment (such as agricultural tractors or excavators)	35
Computers and high precision equipment	50
Motor vehicles	25
Setting up of golf courses	15

The following are the rates of annual allowances computed using the straight-line method.

<b>Asset</b>	<b>Rate (%)</b>
Commercial premises	5
Industrial premises excluding hotels	5
Any item of a capital nature not listed above that is subject to depreciation under the normal accounting principles	5
Plant and machinery costing MUR30,000 or less	100
Aircraft and aircraft simulators leased by aircraft leasing companies	100

The following are the rates of annual allowances for capital expenditure incurred during the 2013 and 2014 income years.

<b>Asset</b>	<b>Rate (%)</b>
Industrial premises dedicated to manufacturing	30
Plant and machinery costing MUR50,000 or less	100
Electronic and high-precision equipment	50
Plant and machinery acquired by a manufacturing company	50
Green technology equipment	50
Landscaping and other earthworks for embellishment purposes	50
Scientific research	50
Renovation-works expenditure by hotels, restaurants and retail outlets	33

Except for the annual allowance rates on industrial premises, the above rates will be applied on a straight-line basis.

To qualify as capital expenditure on green technology, it must be incurred on the following:

- Renewable energy
- Energy-efficient equipment or noise-control devices

- Water-efficient plant and machinery and rainwater harvesting equipment and systems
- Pollution-control equipment or devices, including wastewater recycling equipment
- Effective chemical hazard control devices
- Desalination plant
- Composting equipment
- Equipment for shredding, sorting and compacting plastic and paper for recycling

Any unused annual allowances that arise as a result of the above increased rates can be carried forward indefinitely. Expenditure on passenger cars will not be eligible for increased annual allowances.

Capital allowances are subject to recapture on the sale of an asset to the extent the sales price exceeds the tax value after depreciation. Amounts recaptured are included in ordinary income and are subject to tax at the normal tax rate. To the extent that the sales price is lower than the depreciated value, an additional allowance is granted.

Under an amendment contained in the Finance (Miscellaneous Provisions) Act 2010, the total annual allowances on a motor car cannot exceed MUR3 million. The MUR3 million cap does not apply to persons engaged in the business of tour operator or car rental.

**Relief for losses.** Losses can be offset against future corporate income in the following five income years. Losses attributable to annual allowances claimed with respect to assets acquired on or after 1 July 2006 can be carried forward indefinitely. Losses may not be carried back.

If a company takes over a company engaged in manufacturing activities or if two or more companies engaged in manufacturing activities merge into one company, any unrelieved losses of the acquired company or merging companies may be transferred to the acquirer or to the company resulting from the merger in the income year of the takeover or merger, subject to certain conditions relating to the safeguarding of employment that may be established by the Minister of Finance. The loss transferred is withdrawn if, within three years from the date of the takeover or merger, more than 50% of the employees are made redundant.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	15
National pension fund, a statutory savings plan for employees' old-age retirement; monthly contribution imposed on gross salary; paid by Employer, limited to MUR888	6
Employee, limited to MUR444	3
Land transfer tax; payable by transferor based on the value of the immovable property transferred; also applies to transfers of shares that result in a change in control of a company that owns immovable property	5

Nature of tax	Rate (%)
Tax on transfer of leasehold rights in state land; based on the open market value of the leasehold rights; payable equally by the transferor and the transferee	20
Registration duty; payable on the registration of certain transactions, such as the sale of land; based on the value of the property transferred; payable by the transferee; certain transactions are not subject to the duty	5

## E. Miscellaneous matters

**Foreign-exchange controls.** The Exchange Control Act was suspended in 1993. Consequently, approval of the Bank of Mauritius is no longer required for transactions involving foreign exchange.

**Anti-avoidance legislation.** Anti-avoidance provisions apply to interest on debentures issued by reference to shares, excessive remuneration to shareholders or directors, benefits to shareholders, excessive management expenses, leases with inadequate rent, rights over income retained and other transactions designed to avoid tax liability. Certain of these items are discussed below.

*Interest on debentures issued by reference to shares.* If a company issues debentures in the proportion of shares held by each shareholder, the interest on the debentures is treated as a dividend and is therefore not an allowable deduction for the company. The 2004 Finance Act provides that such interest on the debentures is not treated as a dividend for the shareholder.

*Benefits to shareholders.* If a benefit of any nature, whether in money or money's worth, is granted by a company to a shareholder or a party related to the shareholder, the value of the benefit is deemed to be a taxable benefit in the hands of the shareholder or the related party.

*Rights over income retained.* If a person transfers property or any right to income to a related party and retains or obtains power to enjoy income from the property or the right, the income is deemed to be derived by the transferor.

## F. Treaty withholding tax rates

Under Mauritian domestic law, dividends paid to residents and nonresidents and royalties paid by GBLI companies (see Section B) to nonresidents are exempt from tax. Interest payments are exempt from tax if they are paid by Mauritian banks to nonresidents or if they are paid by GBLI companies to nonresidents that do not have a place of business in Mauritius. The following table lists the tax rates for dividends, interest and royalties under the tax treaties entered into by Mauritius. However, Mauritian domestic law prevails if it exempts the payments from tax.

Recipient's country of residence	Dividends %	Interest %	Royalties %
Bangladesh	10	15	15
Barbados	5	5	5
Belgium	5 (i)	0/10	0
Botswana	5 (j)	12	12.5
China	5	10 (f)	10

Recipient's country of residence	Dividends %	Interest %	Royalties %
Congo			
(Republic of)	0/5 (s)	5	0
Croatia	0	0	0
Cyprus	0	0	0
France	5 (a)	15 (f)	15 (g)
Germany	5 (r)	0	10
Guernsey	0	0	0
India	5 (a)	15 (f)	15
Italy	5 (b)	15 (f)	15
Kuwait	0	0	10
Lesotho	10	10	10
Luxembourg	5 (a)	0	0
Madagascar	5 (h)	10	5
Malaysia	5 (a)	15 (f)	15
Monaco	0	0	0
Mozambique	8/10/15	8 (f)	5
Namibia	5/10	10 (f)	5
Nepal	5/10/15 (o)	10/15 (p)	15
Oman	0	0	0
Pakistan	10	10	12.5
Qatar	0	0	5

Thailand	10	10/15	5/15
Tunisia	0	2.5	2.5
Uganda	10	10	10
United Arab Emirates	0	0	0
United Kingdom	10 (c)	15 (f)	15 (d)
Zambia	5 (q)	10	5
Zimbabwe	10 (e)	10 (f)	15
Non-treaty countries	0	0/15 (m)	0/15 (n)

- (a) Applicable if the recipient has a direct shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 15%.
- (b) Applicable if the recipient has a direct shareholding of at least 25% of the capital of the Mauritian company; otherwise, the rate is 15%.
- (c) Applicable if the recipient has a direct or indirect shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 15%.
- (d) The reduced rate applies only if the royalties are subject to tax in the United Kingdom.
- (e) Applicable if the recipient controls directly or indirectly 25% of the voting power of the Mauritian company; otherwise, the rate is 20%.
- (f) The rate is 0% if the interest is paid to a bank resident in the treaty country (subject to additional conditions) and, under the France treaty, if the loan is made or guaranteed by the Banque Française du Commerce Extérieur.
- (g) The rate is 0% for literary, artistic or scientific copyright royalties and for royalties for the use of motion picture films or works recorded for broadcasting or television.
- (h) Applicable if the recipient is the beneficial owner of the dividends and if the payer of the dividends is a venture capital company; otherwise, the rate is 10%.

- (i) Applicable if the recipient is a company that holds at least 10% of the voting power of the company paying the dividends. Otherwise, the rate is 15% if the shareholder is the beneficial owner of the dividend income. The limitations-of-benefits clause of the tax treaty should be considered.
- (j) Applicable if the recipient has a direct or indirect shareholding of at least 25% of the capital of the Mauritian company; otherwise, the rate is 10%.
- (k) Applicable if the recipient has invested at least USD500,000 in the authorized capital of the payer of the dividends; otherwise, the rate is 10%.
- (l) This treaty has been signed, but it has not yet been ratified.
- (m) Interest paid by GBL1 companies to nonresidents or by Mauritian banks to nonresidents is exempt. Interest paid by other resident companies to nonresidents is taxed at a rate of 15%.
- (n) Royalties paid by GBL1 companies to nonresidents are exempt from tax. Royalties paid by other companies to nonresident companies are subject to tax at a rate of 15%.
- (o) The 5% rate applies if the recipient of the dividends holds directly at least 15% of the capital of the payer. The 10% rate applies if the recipient of the dividends holds directly at least 10%, but less than 15%, of the capital of the payer. The 15% rate applies to other dividends.
- (p) The 10% rate applies if the recipient of the interest is a financial institution or an insurance company. The 15% rate applies to other interest payments.
- (q) The 5% rate applies if the recipient is a company that owns at least 25% of the share capital of the paying company. Otherwise, the rate is 15%.
- (r) The 5% rate applies if the recipient is a company with a shareholding of at least 10%. Otherwise, the rate is 15%.
- (s) The 5% rate applies if the recipient owns less than 25% of the company paying the dividends.

Tax treaties with Burkina Faso, Cape Verde and Morocco await signature. Mauritius is negotiating tax treaties with Algeria, Canada, the Czech Republic, Greece, the Hong Kong Special Administrative Region, Iran, Malawi, Montenegro, Morocco, Portugal, St. Kitts and Nevis, Saudi Arabia, Tanzania, Vietnam and Yemen.

From Know-how and Technical Assistance	25 (b)
From Railroad Wagons	5 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10

- (a) This tax applies to dividends paid out of profits generated after 2013 (see Section B).
- (b) This is a final tax applicable to nonresidents. Payments to tax havens are generally subject to a 40% withholding tax.
- (c) This rate can be reduced to 4.9% if certain requirements are met.
- (d) A reduced rate of 4.9% is granted each year to banks resident in treaty countries.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporations resident in Mexico are taxable on their worldwide income from all sources, including profits from business and property. A nonresident corporation in Mexico is subject to profits tax on income earned from carrying on business in Mexico. Corporations are considered residents of Mexico if they are established under Mexican law or if their principal place of management is located in Mexico.

Corporations are taxed in Mexico only by the federal government. Mexico has a general system for taxing corporate income, ensuring that all of a corporation's earnings are taxed only once, in the fiscal year in which the profits are obtained.

The income tax law recognizes the effects of inflation on the following items and transactions:

- Depreciation of fixed assets
- Cost on sales of fixed assets
- Sales of capital stock (shares)
- Monetary gains and losses
- Tax loss carryforwards

Investment in capital stock may be indexed at the time of capital stock reductions or liquidation. Taxes are also indexed for inflation in certain circumstances.

**Tax rate.** Corporations are subject to federal corporate income tax at a rate of 30%.

**Capital gains.** Mexican tax law treats capital gains as normal income and taxes them at regular corporate tax rates, except for capital gains derived from publicly traded shares sold by individuals or non-Mexican residents, which are taxed at a rate of 10%. To determine the deductible basis for sales of real estate, fixed assets and shares, the law allows for indexation of the original cost for inflation.

**Administration.** The tax period always ends on 31 December and cannot exceed 12 months. The tax return must be filed by the end of the third month following the tax year-end. Monthly tax installments must be paid during the corporation's tax year.

**Dividends.** Resident individuals and nonresident shareholders of a Mexican corporation are subject to a 10% income tax on dividends received that are paid out of profits generated after 2013.

Dividends are not subject to corporate income tax if the earnings were already subject to corporate income tax and if the distributing corporation has sufficient accumulation in its “net tax profit” (CUFIN) account to cover the dividend. If the accumulated amount is not sufficient, the dividends are taxed at the corporate level at a rate of 30%. The following is an illustration of how to compute the net tax profit for the CUFIN account.

	<b>MXN</b>
Corporate taxable income	1,000
Income tax (30%)	(300)
Nondeductible profit sharing to employees (estimated)	(150)
Nondeductible expenses	<u>(50)</u>
Net tax profit (not subject to corporate income tax on distribution)	<u>500</u>

Income tax paid on distributed profits may be credited against corporate income tax in the year in which the dividend is paid and in the following two years.

Similar rules apply to remittances abroad by branches of foreign corporations.

**Foreign tax relief.** A tax credit is allowed for foreign income tax paid or deemed paid by Mexican corporations, but the credit is generally limited to the amount of Mexican tax incurred on the foreign-source portion of the company’s worldwide taxable income.

### **C. Determination of trading income**

**General.** Taxable profits are computed in accordance with generally accepted accounting principles, with the following exceptions:

- Nondeductibility of penalties and unauthorized donations
- Nondeductibility of increases to reserves for bad debts, obsolescence, contingencies, indemnities and so forth
- Monetary gain on debts, and monetary loss on credits, to recognize the effect of inflation
- Nondeductibility of 53% of exempt salaries (percentage may be decreased to 47% if the exempt salaries are not reduced from previous year)

Employee profit-sharing (see Section D) is effectively deductible.

**Inventories.** Instead of deducting the normal cost of sales, inventory purchases, labor costs and overhead expenses are deductible each fiscal year. However, beginning in 2005, the cost of goods sold is deductible instead of inventory purchases. Complex rules apply with respect to this measure.

**Depreciation.** The straight-line method is used to depreciate tangible fixed assets and to amortize intangible assets. Depreciation must be computed using the annual percentages set by law. The depreciation of new assets must be computed on a proportional basis relating to the months in which the assets are used. Depreciation is computed on original cost of fixed assets, with the amount of depreciation indexed for inflation as measured by price indices.

The following are the maximum annual depreciation rates for certain types of assets.

Asset	Rate (%)
Buildings	5
Motor vehicles	25
Office equipment	10
Computers	
Mainframe equipment	30
Peripheral equipment	30
Plant and machinery	10
Environmental machinery and equipment	100

**Relief for losses.** Business losses may be carried forward for 10 years.

**Groups of companies.** A Mexican holding company may obtain an authorization to effectively compute a tax on a consolidated basis, but each company of the group is responsible for filing and paying the tax individually. This option is subject to several rules and limitations.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods or services, excluding exports, and on imports	
General rate	16
Certain foods and medicines	0
Excise tax, on the supply of goods or services, excluding exports, and on imports; goods and services subject to tax include food with high caloric density, alcoholic beverages, alcohol, tobacco, gasoline, diesel and telecom services	Various
Real estate acquisition tax; local tax on market value of real estate transferred (approximate rates)	2 to 4.5
State tax on salaries	2 to 3
Residence tax, on each employee's salary (approximate rate)	5
Employee profit sharing, on taxable profits (loss carryforwards may not be deducted)	10
Social security contributions, on salaries up to a specified amount; paid by	
Employer (approximate rate)	15
Employee (approximate rate)	4

#### E. Miscellaneous matters

**Foreign-exchange controls.** Mexico has no foreign-exchange controls.

**Transfer pricing.** Mexico has transfer-pricing rules. Acceptable transfer-pricing methods include the comparable uncontrolled price method, the resale price method, the cost-plus method, the profit-split method, the residual profit-split method and the transactional net-margin method. In certain cases, specific appraisals are used. Transactions between related parties are subject to greater

scrutiny. It may be possible to reach transfer-pricing agreements in advance with the tax authorities. These agreements may apply for a period of up to five years.

**Debt-to-equity rules.** Interest deductions may be disallowed if the debt-to-equity ratio exceeds 3 to 1.

Non-treaty countries	10	4.9/10/21/35 (i)	25/35 (i)

- (a) The lower rate applies if the recipient is a corporation owning at least 25% (20% under the Brazil treaty) of the shares of the payer. Under the Panama treaty, the lower rate applies if the recipient owns at least 25% of the shares of the payer.
- (b) These treaties have a most favorable nation (MFN) clause with respect to interest and/or royalties. Under the MFN clause in the Chile treaty, the withholding tax rate for interest may be reduced to 5% for banks or 10% for other recipients and the withholding tax rate for royalties may be reduced to 10%, if Chile enters into a tax treaty with another country that provides for a lower withholding tax rate than 15% for such payments. Under the MFN clause in the France treaty, the withholding tax rate for interest and royalties is reduced if Mexico enters into a tax treaty with an Organisation for Economic Co-operation and Development (OECD) member that provides for withholding tax rates that are lower than the rates under the Mexico-France treaty. However, the rate may not be lower than 10% if the OECD member country is not a member of the European Union (EU). Under the Italy treaty, the MFN clause applies only to interest. It may reduce the withholding tax rate for interest to as low as 10% only if Mexico enters into a treaty with an EU country that provides for a withholding tax rate for interest of less than 15%. Under the MFN clause in the Spain treaty, the withholding tax rates for interest and royalties may be reduced if Mexico enters into a tax treaty with an EU country that provides for withholding tax rates that are lower than the rates under the Mexico-Spain treaty. Under the Brazil treaty, if this country agrees with another country regarding a lower rate for dividends, interest or royalties, such rate will apply. For interest and royalties, the applicable rate may not be lower than 4.9% and 10%, respectively. Under the New Zealand treaty, if this country agrees with another country regarding a lower rate for dividends, such rate will apply. Under the MFN clause in the Colombia treaty, the withholding tax rate for royalties related to technical services and assistance will be automatically reduced if Colombia enters into a tax treaty with a third country that provides a lower rate. The standard rate for interest and for patent and know-how royalties under all of the above treaties is generally 15%. However, as a result of the operation of the MFN clause, the lower rates listed in the table may apply in certain circumstances.
- (c) The 0% rate applies if the recipient of the dividends is the effective beneficiary of the dividends. The 5% rate applies if the recipient is a company that is resident in France and if more than 50% of such recipient is owned by residents of countries other than France or Mexico.
- (d) The 5% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer. Under the US treaty, the 0% rate applies if the recipient owns 80% of the voting shares and if other requirements are met. Under the Switzerland treaty, the 0% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer or if the beneficiary of the dividend is a pension fund. Under the Sweden treaty, the 0% rate applies if the recipient is a corporation owning at least 25% of the voting shares of the payer of the dividends and if at least 50% of the voting shares of the company that is the effective beneficiary of the dividends is owned by residents of that contracting state. Under the Luxembourg treaty, the 8% rate applies to Mexico if the recipient is a corporation that owns at least 10% of the voting shares of the payer.

- (e) The 10% rate applies to interest derived from loans granted by banks and insurance companies. Under the Germany treaty, the 10% rate also applies to interest paid to pension funds. Under the Australia and Japan treaties, the 10% rate also applies to interest paid on bonds or with respect to sales by suppliers of machinery and equipment. Under the Poland treaty, the 10% rate also applies to interest paid on publicly traded securities.
- (f) The 5% rate applies if the recipient is a corporation that owns at least 10% of the shares of the payer and if the tax levied in Israel is not less than the corporate tax rate.
- (g) The effective beneficiary of royalties is subject to withholding tax on the gross payments. Royalties on cultural works (literature, music and artistic works other than films for movies or television) are not subject to withholding tax if they are taxed in the recipient's country.
- (h) A 10% rate applies to interest paid on bank loans or publicly traded bonds, as well as to interest paid with respect to sales by suppliers of machinery and equipment.
- (i) See Section A and the applicable footnotes in the section.
- (j) The 5% rate applies if the beneficial owner of the interest is a bank or insurance company or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to interest paid by a bank or by a purchaser with respect to a sale on credit of machinery if the seller is the beneficial owner of the interest. The 15% rate applies to other interest.
- (k) The 0% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer.
- (l) Dividends are not subject to withholding tax under Mexican domestic law.
- (m) Beginning in the sixth year the treaty is in effect, the 15% rate is reduced to 10% if the beneficial owner of the interest is a bank. For the first five years, however, the 15% rate applies to such interest.
- (n) The lower rate applies if the beneficial owner of the interest is a bank. Under the Colombia treaty, a 0% rate also applies if the beneficial owner of the interest is an insurance company. Under the Estonia treaty, the 4.9% rate also applies if the beneficial owner is a pension fund.
- (o) The 5% rate applies if the recipient is a corporation owning at least 25% of the shares of the payer. The 0% rate applies if the condition described in the preceding sentence is satisfied and if both of the following conditions are satisfied:
- The recipient's shares are regularly traded on a recognized stock exchange.
  - More than 50% of the recipient's shares are owned by one or any combination of the following:
    - The state of residence of the recipient.
    - Individuals resident in the state of residence of the recipient.
    - Corporations resident in the state of residence of the recipient if their shares are traded on a recognized stock exchange or if more than 50% of their shares are owned by individuals resident in the state of residence of the recipient.
- (p) The 5% rate applies if the interest is derived from loans granted by banks or insurance companies or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest.
- (q) The 10% rate applies to interest derived from loans granted by banks.
- (r) The 4.9% rate applies if the beneficial owner of the interest is a bank or insurance company or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest.
- (s) Under a protocol to the treaty with the Netherlands, the 5% rate is reduced to 0% if the dividends are paid on a shareholding that qualifies for the participation exemption under the corporate tax law of the Netherlands.
- (t) The 10% rate applies if the beneficial owner of the interest is a bank.
- (u) The 5% rate applies if the recipient is a corporation owning at least 20% of the shares of the payer.
- (v) The treaty does not limit the withholding tax rate on this income.
- (w) Dividends are taxed only in the country of residence of the recipient.
- (x) In general, dividends are exempt if the beneficial owner is resident in the United Kingdom. However, if the dividend derives from rental income from real property located in Mexico through an investment vehicle and if the majority of the rents are distributed annually and are not subject to tax, the dividend rate may not exceed 15%.

Carryforward	3 (i)

(a) See Section B.

(b) In general, a 6% withholding tax applies to dividends paid to nonresidents and residents. A 15% rate applies to dividends related to the 2008 through 2011 fiscal years.

- (c) Interest on deposits and securities of individuals is not taxable until 2020. Interest on bank deposits or corporative bonds of legal entities is not taxable until 2020, if the deposits are made for a period of more than three years or if the bonds are issued for a period of more than three years. Interest on state securities is not taxable until 1 January 2020.
- (d) A 12% withholding tax rate applies to royalties paid to nonresidents and to resident individuals.
- (e) The 12% rate applies to services rendered by nonresidents. The 10% rate applies to rent paid to individuals, except for rent paid for agricultural land. The 7% rate applies to certain payments made to resident individuals.
- (f) The 2% rate applies to agricultural products on a list. The 7% rate applies to other types of goods acquired from resident individuals (with certain exceptions).
- (g) This withholding tax applies to insurance premiums paid to nonresidents.
- (h) The 12% rate applies to winnings from gambling and from advertising campaigns paid to nonresidents. The 18% rate applies to winnings from gambling paid to residents. The winnings from advertising campaigns and lotteries paid to residents are subject to the following withholding tax rates:
  - 18% if the value of the winnings exceeds MDL951.6 but does not exceed MDL50,000
  - 25% if the value of the winnings exceeds MDL50,000
- (i) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide income. Resident companies are companies with activities managed or organized in Moldova (an activity is organized in Moldova if it is carried out by a company that is registered in Moldova as a legal entity) and companies that carry out their business activities primarily in Moldova.

Permanent establishments of nonresident companies in Moldova are subject to tax on their income from Moldovan sources. For tax purposes, permanent establishments are considered to be resident entities.

**Rate of corporate income tax.** The rates of corporate income tax in Moldova are described below.

*Standard corporate income tax rate.* The standard corporate income tax rate in Moldova is 12%.

*Small and medium-sized companies (except for farmers and individual entrepreneurs) that are not registered as value-added taxpayers.* The following are the tax rates applicable to small and medium-sized companies (except for farmers and individual entrepreneurs) that are not registered as value-added tax (VAT) payers:

- If, for the previous fiscal reporting period (ending 31 December), the company obtained income from operational activities in an amount up to MDL100,000, it must apply a 3% tax rate to the operational activity income obtained in the current reporting period.
- If, for the previous fiscal reporting period (ending 31 December), the company obtains income from operational activities in an amount from MDL100,000 to MDL600,000 and if it voluntarily registers as a value-added tax (VAT) payer, it can choose to be taxed at a 3% tax rate applied to operational activity income obtained in the current reporting period or at the standard corporate income tax rate of 12%.

*Farmers.* The income tax rate for farmers is 7%.

*Individual entrepreneurs.* For individual entrepreneurs, the income tax rates are 7% of annual taxable income that does not exceed MDL27,852 and 18% of annual taxable income that exceeds MDL27,852.

**Tax incentives.** The main tax incentives available in Moldova are described below.

*Free-economic zones.* Residents of free-economic zones benefit from the following incentives:

- A 50% reduction of the standard corporate profits tax rate on income derived from the exportation outside Moldova of goods originating in the free-economic zone
- A 25% reduction of the standard corporate profits tax rate on income other than the income indicated in the preceding bullet
- A three-year exemption from corporate profits tax on income derived from the exportation of goods originating in a free-economic zone, beginning with the quarter following the quarter in which investments made in fixed assets or in the development of the free-economic zone infrastructure are at least of USD1 million
- A five-year exemption from corporate profits tax on income derived from the exportation of goods originating in a free-economic zone, beginning with the quarter following the quarter in which investments made in fixed assets or in the development of the free-economic zone infrastructure are at least of USD5 million

*Commercial banks.* Commercial banks providing loans that finance capital investments in specified activities (see next paragraph) benefit from the following incentives:

- Exemption from corporate income tax on income earned from loans granted for more than three years
- A 50% reduction of corporate income tax on income earned from loans granted for a period of two to three years

The corporate income tax incentives mentioned in the preceding paragraph are granted to commercial banks financing capital investments in the following activities:

- Acquisition of fixed assets for use in a business activity, contractor's works and engineering services
- Acquisition and processing of agricultural products
- Designing, development, mastering and implementation of new techniques and technologies
- Restructuring of production process technologies
- Planting and renewal of perennial plantations
- Alcoholic aging of cognacs, raw material wine used to produce classic wines saturated with carbon dioxide and high-quality wines

*Business entities that create new jobs.* Business entities can benefit from a reduction of taxable income if they increase annually the number of employees. The amount of taxable income subject to reduction is determined by multiplying the prior-year average national annual salary with the increase in the average number of employees on payroll compared with the prior year.

**Capital gains.** Capital gains and losses on sales, exchanges or other transfers of capital assets are equal to the difference between amounts received and the cost bases of the assets. The amount of

capital gains subject to income tax in a tax year equals 50% of the excess of capital gains over capital losses. Net capital losses may be carried forward to offset capital gains in the following three years.

**Administration.** The tax year is the calendar year. A company may not elect a different tax year.

The corporate income tax return must be filed by 25 March of the year following the tax year.

An amended tax return can be filed to correct errors contained in the original tax return if no tax audit was announced or performed by the tax authorities for the respective fiscal period.

Under the Moldovan Tax Code, companies may either obtain a refund of an overpayment of tax or offset the overpayment against existing or future tax liabilities.

All taxes in Moldova must be paid in Moldovan lei (MDL). To calculate the tax on income realized in foreign currency, the income must be converted into lei using the official exchange rate on the payment date.

**Dividends.** In general, a 6% withholding tax is imposed on dividends paid to nonresidents and residents. A 15% withholding tax continues to be imposed on dividends related to the 2008 through 2011 fiscal years.

**Foreign tax relief.** Companies may claim a credit against corporate income tax for foreign tax paid on income that is subject to tax in Moldova. The foreign tax credit is granted for the year in which the relevant income is subject to tax in Moldova.

### C. Determination of trading income

**General.** Taxable income includes income earned from all sources, less deductible expenses and allowances provided for by the tax law. In general, companies may deduct ordinary and necessary expenses accrued during the tax year with respect to its business activities. However, they may not deduct the following items:

- Personal and family expenses of the company founders and employees
- Amounts paid for the acquisition of depreciable property
- Losses resulting from sales or exchanges of property, performance of works and provisions of services between related parties
- Unjustified expenses paid to related parties, including compensation, interest and rent
- Amounts paid to the holders of business patents
- Expenses related to exempt income
- Provisions for bad debts

**Inventories.** Assets valuation income is non-taxable. Assets valuation losses are nondeductible.

**Provisions.** If a court decision confirms that a debt owed to a company will not be recovered, the company may deduct for tax purposes the amount of the debt. Provisions for bad debts are not deductible for tax purposes.

**Tax depreciation.** Fixed assets used in business activities may be depreciated using the declining-balance method. To calculate depreciation, fixed assets are classified into five categories. The following are the categories and the applicable depreciation rates.

Category	Rate (%)
1	5
2	8
3	12.5
4	20
5	30

The allocation of the fixed assets to the above categories is based on the Catalogue of Fixed Assets approved by the government of Moldova.

The assets in Category 1 (real estate) are depreciated individually. The assets in the other categories are depreciated as groups.

**Relief for losses.** Companies incurring a tax loss may deduct one-third of the loss in each of the three subsequent tax years. Losses may not be carried back.

**Groups of companies.** The Moldovan tax law does not contain any measures regarding groups of companies in Moldova. Consequently, the filing of consolidated returns or the granting of relief for losses on a group basis is not permitted.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods and services delivered in or imported into Moldova	
Standard rate	20
Bread and bread products, milk and dairy products, medicines, natural and liquefied gases, beet sugar and agricultural products	8
Exports of goods and services, international cargo and passenger transport, certain distributions of electric power, thermic energy and hot water, and other specified goods and services relating to diplomatic missions and international organizations	0
Excise taxes, on certain consumption goods; tax is imposed at a fixed amount per unit of the good or by applying an ad valorem rate to the market value of the good	Various
Social security contributions, on remuneration; paid by	
Employer	23
Employee	6
Medical insurance contributions, on remuneration; paid by	
Employer	4
Employee	4
Customs duties; rates set by Customs Tariff Law	Various
Local taxes on real estate (other than real estate used for agricultural or dwelling purposes)	0.1

## E. Foreign-exchange controls

The Moldovan leu (MDL) is the only currency that may be used to make payments in Moldova. The National Bank of Moldova (NBM) establishes the official exchange rate for the leu in relation to other foreign currencies. Both resident and nonresident companies may open leu or foreign currency accounts in authorized banks of Moldova.

Resident companies are not required to convert proceeds received in foreign currency into lei (plural of leu). However, they may not transfer foreign currency from their accounts to the accounts of other residents of Moldova, except for authorized banks.

Nonresidents may transfer abroad currency if the currency was registered in their account or if the funds were previously held in a leu deposit account with a Moldovan authorized bank.

Payments in currency by resident companies to nonresidents may be made only from foreign-currency accounts at authorized Moldovan banks (or at foreign banks that are authorized by NBM), and these payments may be made by bank transfer only.

For a distribution of profits during the year, a company should be ready to present to interested bodies the statutory act of the company that indicates the amount of the distribution. For a distribution of profits at the end of the fiscal year, the company should have ready for inspection a copy of the filed annual tax return and the statutory act of the company that indicates the amount of the distribution.

## F. Treaty withholding tax rates

The following table shows the applicable withholding rates under Moldova's bilateral tax treaties.

	Dividends		Interest	Royalties
	A	B		
	%	%	%	%
Albania	10	5	5	10
Armenia	15	5	10	10
Austria	15	5	5	5

A These are the general dividend withholding tax rates.

B In general, the rates apply if the beneficiary of the dividends is a company that holds directly at least 25% of the share capital of the payer.

- (a) This rate applies if the effective beneficiary of the dividends is a company that has invested foreign capital of at least USD250,000 in the payer of the dividends.
- (b) This rate applies if the beneficiary of the dividends is a company holding directly at least 10% of the capital of the payer.
- (c) The 3% rate applies to royalties paid for the use of, or the right to use, patents, computer software, designs or models, plans, and secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 7% rate applies to other royalties.
- (d) This rate applies if the beneficiary of the dividends is a company holding directly at least 10% of the payer of the dividends.
- (e) This rate applies if the effective beneficiary of the dividends is a company (other than a society) that has invested more than USD300,000 in the capital of the payer of the dividends.
- (f) Royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting, are exempt from tax.
- (g) No tax is withheld if the effective beneficiary of the interest is a financial institution.
- (h) No tax is withheld if the effective beneficiary of the dividends is a company that directly holds at least 50% of the capital of the payer of the dividends and that has invested USD300,000 or an equivalent amount of national currency of a European Union (EU) member state in the capital of the payer of the dividends.

- (i) The 10% rate applies to royalties paid for the use of patents, trademarks, drawings or patterns, plans, secret formulas or manufacturing procedures as well as for industrial, commercial or scientific information. The 15% rate applies to other royalties.
- (j) No tax is withheld if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends.
- (k) No withholding tax is imposed on interest paid on bank loans or on interest paid with respect to the following:
  - Sales on credit of industrial, commercial or scientific equipment
  - Sales of goods between enterprises
- (l) No tax is withheld if either of the following conditions is satisfied:
  - The beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends and that has invested at least GBP1 million (or the equivalent amount in another currency) in the capital of the company paying the dividends at the date of payment of the dividends.
  - The beneficial owner of the dividends is a pension scheme.
- (m) In general, the withholding tax rate for dividends is 6%. For dividends related to the 2008 through 2011 fiscal years, the withholding tax rate is 15%.
- (n) Interest on deposits and securities of resident individuals is not taxable until 2020. Interest on bank deposits or corporative bonds of legal entities is not taxable until 2020, if the deposits are made for a period of more than three years or if the bonds are issued for a period of more than three years. Interest on state securities is not taxable until 1 January 2020.
- (o) This treaty has been signed, but it is not yet in effect.

*Mongolia is currently in the process of undergoing potentially significant tax reform. At the time of writing, it was not known what changes would be enacted. Because of this expected tax reform, readers should obtain updated information before engaging in transactions.*

## A. At a glance

Corporate Income Tax Rate (%)	10/25 (a)
Capital Gains Tax Rate (%)	10/25 (a)(b)
Nonresident Corporate Income Tax Rate (%)	10/25 (a)
Withholding Tax (%) (c)	
Dividends	20
Interest	20 (d)
Royalties	20
Rent	20
Management and Administrative Fees	20
Lease Interest	20
Use of Tangible and Intangible Assets	20
Goods Sold, Work Performed or Services Provided	20
Branch Profits Remittance Tax	20 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	2/4/8 (f)

- (a) The corporate tax system is progressive with annual taxable income of up to MNT3 billion subject to tax at a rate of 10% and taxable profits in excess of this amount taxed at a rate of 25%.
- (b) Gains derived from the sale of immovable property are subject to tax at a rate of 2%.
- (c) These withholding tax rates apply to payments to nonresidents.
- (d) A 10% rate applies to interest payments to nonresident bondholders on bonds issued by Mongolian commercial banks.
- (e) This is a technical tax because the Investment Law of Mongolia generally requires foreign companies to carry on business through a Mongolian limited liability company (LLC).

- (f) The general rule is that losses can be carried forward for two years, and the use of such losses is limited to 50% of taxable income in any year. For companies in the mining and infrastructure sector, losses can be carried forward for four to eight years, depending on the investment amount, and no restriction is imposed on the use of losses.

## B. Taxes on corporate income and gains

**Corporate income tax.** Permanent residents of Mongolia are taxed on their worldwide income. A company is regarded as a permanent resident of Mongolia in either of the following circumstances:

- It is incorporated in Mongolia.
- It is a foreign entity that has its head office located in Mongolia.

Permanent residents may qualify for a tax credit with respect to income generated from the production and planting of specified products (see *Tax incentives*).

Nonresidents of Mongolia are taxed on Mongolian-source income only. The term nonresident is generally defined to include foreign corporate entities that conduct business in Mongolia through a permanent establishment and foreign entities that generate income sourced in Mongolia other than through a permanent establishment.

**Rates of corporate tax.** The corporate tax system is progressive with annual taxable income of up to MNT3 billion subject to tax at a rate of 10% and taxable profits in excess of this amount taxed at a rate of 25%.

Certain types of income received by residents are taxed at different tax rates, as indicated in the following table.

Income	Rate (%)
Dividends	10
Royalties	10
Interest	10
Sale of rights (gross)	30
Gambling and lottery income	40
Sale of immovable property	2

**Tax incentives.** A 50% tax credit is available to taxpayers that generate income from the production and planting of the following:

- Cereal, potatoes and vegetables
- Milk
- Fruits and berries
- Fodder plants

Double tax treaties offer additional tax credits for corporate entities taxed in foreign countries.

An exemption from corporate tax is available to investors that operate in the oil industry in Mongolia under a product-sharing contract with the Mongolian government.

Both foreign and domestic companies may apply for a tax-stabilization certificate (subject to meeting certain criteria such as introducing new technology and creating stable jobs) to govern their investment in Mongolia. This certificate provides for stable tax conditions for a fixed term (consistent tax treatment regardless of changes in the tax law) across four different taxes; which are corporate income tax, customs duty, value-added tax (VAT)

and tax on royalties. The term (5 years to 18 years) of a tax-stabilization certificate depends on the industry, the amount of investment and the geographical location of the investment. Previously, a tax stabilization certificate was granted for up to 30 years; however, this was limited to companies engaged in the mining industry under the Mineral Law of Mongolia.

**Capital gains.** Capital gains and losses are treated in the same manner as other taxable income and losses. Gains are subject to the progressive Mongolian corporate tax rates of 10% and 25%. The exception to this rule is that gains derived from the sale of immovable property are subject to tax at a rate of 2% on a gross basis.

**Administration.** The tax year in Mongolia is the calendar year.

Tax is generally calculated by the taxpayer on an accrual basis. The tax authorities deliver monthly and quarterly tax schedules to taxpayers that must pay tax before the 25th day of each month.

Taxpayers must also file quarterly returns within 20 days after the end of each quarter. An annual return is due on 10 February following the end of the tax year and the taxpayer must settle all outstanding liabilities by that date.

If it is necessary to withhold tax on dividends, royalties, sales of rights, transfers of profits overseas by permanent establishments of foreign companies and other Mongolian-source income earned by nonresident taxpayers, the withholding tax must be remitted to the state within seven working days. Withholding tax on income received from the sale of immovable property must be remitted to the state within 10 working days after the sale of the property. All withholding tax statements must be submitted within 20 days after the end of the quarter, and an annual statement must be filed by 10 February following the end of the tax year.

On submission of the tax returns, the Mongolian tax authorities generally conduct an administrative check of the returns to ensure that all requirements have been satisfied with respect to the filing. At a later stage, the tax authorities can conduct a more detailed review of the returns through a tax audit.

**Dividends.** Dividends paid between permanent residents of Mongolia are subject to a 10% withholding tax. Dividend income received by a nonresident from a permanent resident is subject to withholding tax at a rate of 20%. This rate may be reduced under an applicable double tax treaty.

**Foreign tax relief.** The domestic law states that a foreign tax credit is generally available only if the foreign tax is paid in a country with which Mongolia has a double tax treaty.

### C. Determination of trading income

**General.** Taxable income is broadly defined as total revenue less the following:

- Deductible expenses
- Exempt income
- Tax losses

Taxable revenue falls under the following three categories:

- Income from operations. This is primarily income generated from business activity. However, it also includes, among other items, income from the sale of shares and securities, income from the sale of licenses, income from the sale of intangible assets and gains on foreign-currency exchange rates.
- Income associated with property. This includes rental income, royalties, dividends and interest income.
- Income from the sale of property. This includes the sale of movable and immovable property (with the exception of shares and securities).

Different sources of taxable income are taxed at different rates (see Section B).

The following types of income are exempt from tax:

- Interest earned on government bonds
- Income and dividends earned by taxpayers trading in the oil industry in Mongolia under a product-sharing contract and derived from the sale of its share of product
- Income earned by cooperatives from sales of their members' products through an intermediary
- Income earned by investment funds

The tax law provides a list of deductible expenses. Any items that are not listed as deductible in the tax law must be added back when computing taxable income.

The following are nondeductible expenses:

- Expenses incurred in earning exempt income
- Expenses not documented by the taxpayer
- Payments from which tax has not been withheld correctly
- Rental payments under finance leases
- Fines and penalties imposed by the tax authorities

Specific restrictions apply to the deductibility of the following:

- Regular maintenance expenses
- Voluntary insurance premium fees
- Reserves accumulated in the risk funds of banks and other non-banking financial institutions
- Per diem expenses
- Natural disaster restoration fees
- Depreciation of inventory

Third-party interest payments on loans to finance the company's primary and auxiliary production, operations, services and purchases of properties are generally deductible for tax purposes, subject to thin-capitalization rules.

Nonresidents carrying out trading activities in Mongolia through a permanent establishment may deduct business expenses in accordance with the rules applicable to permanent residents. However, expenses incurred outside of Mongolia and management and administrative expenses not related to the generation of business income are not deductible for tax purposes.

**Tax depreciation.** Tax depreciation of non-current assets is calculated using the straight-line method. The following are the useful economic lives of various non-current assets.

<b>Non-current assets</b>	<b>Useful economic life (years)</b>
Building and construction	40
Machinery and equipment	10
Computers, computer parts, software	3
Intangible asset with indefinite useful life	10
Intangible asset with definite useful life (includes licenses for mineral exploration and extraction)	Validity period
Other non-current assets	10

The depreciation value for a mineral exploration and extraction license is the sum of its purchase price and fees paid for ownership and transference of such license.

If an asset is only partially used in generating taxable profits, the tax depreciation claimed is accordingly prorated. If the taxpayer ceases to use its own depreciable assets to generate taxable profits, the asset is deemed sold and tax is levied on the higher of the book value or the market value of the asset. Land and inventory are non-depreciable assets.

**Relief for losses.** In general, tax losses can be carried forward for up to two years and the use of such losses is restricted to 50% of taxable profits in any tax year. For companies in the mining and infrastructure sector, losses can be carried forward for four to eight years, depending on the investment amount, and no restriction is imposed on the use of losses.

The carryback of losses is not allowed.

**Groups of companies.** Tax grouping is not allowed in Mongolia.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Royalties; paid on the sale of mining products; the two types of royalties are standard flat rate royalties and surtax royalties; the rates of the standard flat rate royalties depend on the type of minerals and whether they are sold within Mongolia; the rates of the surtax royalties vary depending on the type of minerals, their market prices and their degree of processing; surtax royalties are not imposed on minerals below a certain market price	
Standard flat rate royalties	
Coal and commonly occurring minerals sold in Mongolia for power plants	2.5
Coal sold abroad, commonly occurring minerals sold abroad and minerals that are not commonly occurring and that are sold in Mongolia or abroad	5
Surtax royalties	
Copper	0 to 30
Other minerals	0 to 5

Nature of tax	Rate (%)
Value-added tax (VAT); applicable to the supply of taxable goods and services in Mongolia and to goods imported into Mongolia; taxpayers must register for VAT if taxable turnover exceeds MNT10 million; taxpayers can voluntarily register for VAT if taxable turnover reaches MNT8 million or if they have invested more than USD2 million in Mongolia; the tax law specifically indicates zero-rated and exempt items; taxable supplies are subject to VAT on the fair market value of the goods sold, work performed or services provided; the taxpayer is responsible for VAT on goods and services received from nonresidents; the Mongolian tax law allows VAT-registered taxpayers to offset output VAT with input VAT if this is supported by appropriate documentation; the excess of input VAT over output VAT can be carried forward for offset against future VAT or other tax liabilities; VAT exemptions are available in certain industries; VAT grouping is possible; VAT is accounted for monthly and VAT payments must be made by the 10th day of the following month; VAT returns must be filed by the 10th day of each month	10
Excise tax; levied on individuals and legal entities that manufacture or import goods, such as alcoholic beverages, tobacco, gasoline and diesel fuel and automobiles; physical units of technical devices and equipment used for betting and gambling are also subject to excise tax; rate varies depending on the amount and the product	Various
Customs duty; levied on the majority of goods imported into Mongolia; information technology, medical equipment and pure-bred livestock are zero-rated and specified equipment imported into Mongolia by small and medium-sized enterprises are exempt	5
Stamp duty; levied on various types of services; the rate depends on the type of services involved	Various
Immovable property tax; levied on the value of the immovable property; the value on which the tax is levied is the value registered with the government registration authority; if the property has not been registered, the insured value is used; if neither the registered nor the insured value is available, the accounting value is used in the calculation; rate depends on the size, location and market demand	0.6 to 1
Air pollution payment; applies to domestically produced raw coal, used or imported organic solvents and vehicles	Various
Social security taxes; applicable to Mongolian citizens and foreign citizens employed on a contract basis by economic entities, the	

Nature of tax	Rate (%)
government or religious or other organizations undertaking activities in Mongolia; consists of compulsory health and social insurance taxes; charges are capped at MNT140,400 per month for employees	
Employers	11 to 13
Employees	10

## E. Miscellaneous matters

**Foreign-exchange controls.** The Mongolian currency is the tugrik (MNT).

Foreign revenue and expenses must be converted into tugriks on the date of the transaction.

Realized foreign-exchange gains and losses are taxable and deductible, respectively.

**Transfer pricing.** Transactions between the taxpayer and a related party must follow arm's-length principles. If these principles are not followed, the tax authorities may seek to adjust the transaction to fair market value. The Ministry of Finance has released guidelines setting out the pricing methodologies that can be used by taxpayers and the documentation requirements for related-party transactions.

**Debt-to-equity rules.** Interest paid to certain related parties is subject to a debt-to-equity ratio of 3:1.

## F. Treaty withholding tax rates

The table below provides Mongolian withholding tax rates for dividends, interest and royalties paid from Mongolia to residents of various treaty countries. The rates reflect the lower of the treaty rate and the rate under domestic law. The table below is for general guidance only.

	Dividends %	Interest %	Royalties %
Austria	5/10 (a)	10	5/10 (b)
Belarus (c)	10	0/10 (d)	10
Belgium	5/15 (e)	10 (f)(bb)	5 (bb)
Bulgaria	10	10	10
Canada	5/15 (g)	0/10 (h)	5/10 (i)
China	5	10	10
Czech Republic	10	0/10 (j)	10
France	5/15	0/10	0/5
Germany	5/10 (k)	0/10 (l)	10
Hungary	5/15 (m)	0/10 (n)	5
India	15	0/15 (o)	15
Indonesia	10	0/10 (p)	10
Kazakhstan	10	10	10
Korea (South)	5	5	10
Kuwait (q)	5	5	10
Kyrgyzstan	10	10	10
Malaysia	10	10	10
Poland	10	0/10 (r)	5
Russian Federation	10	10	20 (s)

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Singapore	0/5/10 (t)	5/10 (u)(bb)	5
Switzerland	5/15 (v)	10	5
Thailand (c)	10	10/15 (w)	5/15 (x)
Turkey	10	10	10
Ukraine	10	0/10 (y)	10
United Arab Emirates (cc)	0	0	10
United Kingdom	5/15 (z)	7/10 (aa)	5
Vietnam	10	10	10
Non-treaty countries	20	20	20

- (a) The 5% rate applies if the recipient of the dividends is a company (excluding partnerships) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to all other dividends.
- (b) The 5% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films.
- (c) This treaty is not yet in force.
- (d) The 0% rate applies if the loan is provided to the government or the central bank. The 10% rate applies in all other cases.
- (e) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.
- (f) The following types of interest are exempt from tax in the contracting state in which the interest arises:
- Interest on commercial debt claims
  - Interest paid with respect to loans made, guaranteed or insured by public entities or credits extended, guaranteed or insured by public entities, the purpose of which is to promote exports
  - Interest on loans granted by banking enterprises
  - Interest on deposits and interest paid to the other contracting state, or a political subdivision or local authority thereof
- (g) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends (except in the case of dividends paid by a nonresident-owned investment corporation that is a resident of Canada). The 15% rate applies to other dividends.
- (h) The 0% rate applies to interest paid on loans made to the government or a political subdivision. The 10% rate applies in all other cases.
- (i) The 5% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting) and royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid with respect to rental or franchise agreements). The 10% rate applies in all other cases.
- (j) The 0% rate applies to interest paid to (or by) the government (or specified institutions), subject to further conditions.
- (k) The 5% rate applies if the recipient of the dividends is a company (other than a partnership) that owns directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends. Silent partnership income is taxed at the domestic rate of 25%.
- (l) The 0% rate applies to interest arising in Germany that is paid to the Mongolian government or a Mongolian bank.
- (m) The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
- (n) The 0% rate applies to interest paid on loans to the government, the central bank, a political subdivision or a local authority. The 10% rate applies in all other cases.
- (o) The 0% rate applies to interest paid on loans to the government, the central bank, a political subdivision or a local authority, the Trade and Development Bank in Mongolia or the Industrial Development Bank of India or another recipient approved by the government. The 15% rate applies in all other cases.

- (p) The 0% rate applies to interest paid on loans to the government or central bank. The 10% rate applies in all other cases.
- (q) In November 2012, domestic legislation was passed to terminate this treaty, effective from 1 April 2015.
- (r) The 0% rate applies to interest arising in the contracting state and derived by the government of the other contracting state or a political subdivision, local authority or the central bank thereof or a financial institution wholly owned by that government or by a resident of the other contracting state, with respect to a debt claim indirectly financed by the government of that contracting state, a local authority or the central bank thereof or a financial institution wholly owned by the government.
- (s) Royalties may be taxed in the contracting state in which they arise and according to the laws of that state.
- (t) The 0% rate applies to dividends paid by a company that is resident in a contracting state to the government of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (u) The 5% rate applies to interest received by banks or similar financial institutions. The 10% rate applies in all other cases. Interest is exempt from tax under certain circumstances.
- (v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly 25% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.
- (w) The 10% rate applies if the interest is received by a financial institution (including an insurance company). The 15% rate applies in all other cases.
- (x) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 15% rate applies in all other cases.
- (y) The 0% rate applies to interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank. The 10% rate applies in all other cases.
- (z) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends. The 15% rate applies to other dividends.
- (aa) The 7% rate applies to interest paid to banks and other financial institutions. The 10% rate applies in all other cases.
- (bb) Please consult treaty for further details.
- (cc) In November 2012, domestic legislation was passed to terminate this treaty, effective from 1 January 2015.

Mongolia's tax treaties with Luxembourg and the Netherlands were terminated, effective from 1 January 2014.

Please direct all inquiries regarding the Republic of Montenegro to Ivan Rakic (office telephone: +381 (11) 209-5794; mobile telephone: +381 (63) 635-690; fax: +381 (11) 209-5891; email: [ivan.rakic@rs.ey.com](mailto:ivan.rakic@rs.ey.com)) of the Belgrade, Serbia, office.

The Union of Serbia and Montenegro ceased to exist on 25 May 2006. The following chapter provides information on taxation in the Republic of Montenegro only.

### A. At a glance

Corporate Income Tax Rate (%)	9
Capital Gains Tax Rate (%)	9
Branch Tax Rate (%)	9
Withholding Tax (%)	
Dividends	9 (a)
Interest	9 (b)
Royalties from Patents, Know-how, etc.	9 (b)
Capital Gains and Leasing Fees	9 (c)
Consultancy, Market Research and Audit Fees	9 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This tax applies to resident and nonresident legal entities and individuals.  
 (b) This tax applies to nonresident legal entities and resident and nonresident individuals. Interest paid to nonresident individuals is taxed at a rate of 5%.  
 (c) This tax applies to nonresident legal entities. Individuals are taxed under the Personal Income Tax Law at a rate of 9%.

### B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in the Republic of Montenegro (RM) are subject to tax on their worldwide income. A company is resident in the RM if it is incorporated in the RM or if its central management and control is actually exercised in the RM. Nonresident companies are subject to tax only on their income derived from the RM. Nonresident companies are companies registered in other countries that have a permanent place of business in the RM.

**Rate of corporate income tax.** The rate of corporate income tax in the RM is 9%.

**Tax incentives.** Newly established companies in undeveloped municipalities, engaging in production activities, are exempt from corporate profit tax for an eight-year period from the date of the commencement of their business activities.

The corporate profit tax liability of companies that have business units established in undeveloped municipalities that engage in production activities may be reduced proportionally based on the percentage of the business unit's profit in the total profit of the company. This tax relief can be claimed for an eight-year period from the date of the incorporation of the business unit.

**Capital gains.** Capital gains derived from the disposal of land, real estate, industrial property rights, capital participations and shares and other securities are included in taxable income and are subject to tax at the regular corporate income tax rate.

Capital gains may be offset by capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years.

**Administration.** The tax year is the calendar year, except in the case of liquidation or the beginning of business activities during the year. A company may not elect a different tax year. Companies must file annual tax returns and pay tax due by 31 March of the year following the tax year.

**Dividends.** Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount of the tax credit for dividend taxes paid abroad can be carried forward to offset corporate income tax in the following five years. This tax credit applies only to dividends received by companies with a shareholding of 10% or more in the payer for at least one year before the date of submission of the tax return.

A 9% withholding tax is imposed on dividends paid to nonresidents.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

**Foreign tax relief.** Companies resident in the RM that perform business activities through permanent establishments outside the RM may claim a tax credit for corporate income tax paid in other jurisdictions. The credit is equal to the lower of the foreign tax and the Montenegrin tax paid on the foreign-source income.

### C. Determination of trading income

**General.** The assessment is based on the profit or loss shown in the financial statements prepared in accordance with Montenegrin accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. Dividend income of taxpayers is not included in the tax base if the payer of the dividend is a taxpayer according to the Montenegrin Corporate Profit Tax Law.

Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see *Tax depreciation*) and donations, are deductible up to specified limits.

**Inventories.** Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

**Write-offs (provisions).** Legal entities may claim deductions for adjustments or write-offs (provisions) of receivables if such actions are in conformity with the Accounting Law. This conformity exists if the following conditions are satisfied:

- It can be proved that the amounts of receivables were previously included in the taxpayer's revenues.
- The receivable is written off from the taxpayer's accounting books as uncollectible.
- It can be proved that the receivables cannot be settled.
- The taxpayer can provide clear evidence of the unsuccessful collection of receivables.

Long-term provisions made for renewal of the natural resources, expenses payable in a guarantee period and expected losses on the basis of court disputes are recognized as expenses in accordance with the local accounting regulations. In addition, long-term provisions made by the banks are recognized as expenses up to the amount determined in the relevant banking regulations.

Severance payments that are calculated but not paid are deductible up to the amount determined in the Labor Law.

**Tax depreciation.** Assets with the value over EUR300 are subject to tax depreciation. Intangible and fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. A ruling classifies assets into the groups. Group I includes immovable assets.

The straight-line method must be used for Group I, while the declining-balance method must be used for the assets in the other groups.

The following are the depreciation and amortization rates.

Group of assets	Rate (%)
I	5
II	15
III	20
IV	25
V	30

**Relief for losses.** Tax losses incurred in business operations may be carried forward for five years.

Loss carrybacks are not allowed.

**Groups of companies.** Under group relief provisions, companies in a group that consists only of companies resident in the RM may offset profits and losses for tax purposes. Tax consolidation is available if a parent company holds directly or indirectly at least 75% of the shares of subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If tax consolidation is allowed, the group companies must apply the group relief rules for five years. Each group company files its own annual income tax return and the parent company files a consolidated tax return based on the subsidiaries' tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on supplies of goods and services in the RM and on imports of goods; certain tax exemptions with or without the right to deduct input VAT are granted; VAT taxpayers are legal entities and entrepreneurs who had turnover of goods and services in excess of EUR18,000 in the preceding 12 months or who expect to have annual turnover greater than the threshold	
Standard rate	19
Lower rate	7
Property tax; paid on rights over immovable property in the RM, including residential and business buildings, apartments, garages, buildings and rooms for resting and recreation, and other buildings; certain immovable property is exempt; tax credits are available for the dwellings of owners and their immediate families; the amount of tax due is determined by a tax authority's ruling, which should be issued by 31 May of the year for which the tax is rendered; the tax is payable in two installments, which are due on 30 June and 30 November; tax rate varies depending on the municipality in which the immovable property is located	0.1 to 1
Transfer tax; imposed on the transfer of the immovable property located in Montenegro; the tax base equals the market value of the transferred property at the time of acquisition; the acquirer of the property is the taxpayer; the tax is due within 15 days after the date on which the tax authority's ruling determining the amount of tax due is issued	3
Tax on income; paid by employee (higher rate applies only to the 2013 and 2014 fiscal years for gross salary exceeding EUR720)	9/15
Surtax on salary tax; paid by employer	13/15
Social security contributions (for health and pension/disability funds); paid by Employer	9.3
Employee	23.5

## E. Miscellaneous matters

**Foreign-exchange controls.** The official currency in the RM is the euro (EUR).

Capital transactions (investments), current foreign-exchange transactions and transfers of property to and from the RM are generally free.

**Transfer pricing.** Under general principles, transactions between related parties must be made on an arm's-length basis. The difference between the price determined by the arm's-length principle and the taxpayer's transfer price is included in the tax base for the computation of corporate income tax payable.

**F. Treaty withholding tax rates**

Montenegro became an independent state in June 2006. The government has rendered a decision that it will recognize tax treaties signed by the former Union of Serbia and Montenegro and the former Yugoslavia until new tax treaties are signed. The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the former Yugoslavia that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>

## A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (a)(b)
Branch Tax Rate (%)	30 (a)
Withholding Tax (%)	
Dividends	15 (c)
Interest	10/20/30 (d)
Royalties, Scientific Know-how Payments, Technical Assistance Fees and Remuneration for Most Services	10 (e)
Wages and Indemnities Paid to Non-permanent Employees	30 (f)
Rent on Equipment Used in Morocco	10 (e)
Branch Remittance Tax	15 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	4

- (a) The corporate income tax rate is 37% for banks, financial institutions and insurance companies. A 10% rate applies to such companies with taxable income of less than MAD300,000. The Casablanca Finance City regime provides a 10% rate for regional or international head offices.
- (b) See Section B.
- (c) The dividend withholding tax is a final tax for nonresidents. Withholding tax does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax if a property attestation (a certificate containing the company's tax number and attesting that the company is the owner of the shares) is delivered by the beneficiary company.
- (d) The 10% rate applies to interest paid to nonresidents on loans or other fixed-interest claims. The 10% tax is a final tax. The 20% rate applies to interest paid to resident companies and interest paid to resident self-employed individuals in connection with a business conducted by the recipient. The 20% tax may be credited by recipients against their total income tax. The 30% rate applies to interest payments made to resident individuals if the payments are unrelated to a business conducted by the recipient. The 30% tax is a final withholding tax.
- (e) This is a final tax applicable only to nonresidents. Rental and maintenance of aircraft used for international transport are exempt from this withholding tax.
- (f) This withholding tax applies only to payments to persons who are not salaried employees and do not hold a special function in the company paying the indemnities. The rate is 17% for teachers.

## B. Taxes on corporate income and gains

**Corporate income tax.** The following companies are subject to corporate income tax:

- Resident companies (those incorporated in Morocco)
- Nonresident companies deriving taxable income from activities carried out in Morocco
- Nonresident companies deriving capital gains from sales of unlisted shares and bonds in Morocco (unless a double tax treaty between Morocco and the residence country of the beneficiary provides otherwise)
- Branches of foreign companies carrying on business activities independent of those performed by their head office

In general, only Moroccan-source income is subject to tax unless a provision of a double tax treaty provides otherwise.

**Rates of tax.** The regular corporate tax rate is 30% of taxable income. Banks, financial institutions and insurance companies are subject to tax at a rate of 37%. A 10% rate applies to such companies with taxable income of less than MAD300,000. The Casablanca Finance City regime provides a 10% rate for regional or international head offices.

In general, the minimum tax is the greater of MAD3,000 or 0.5% of the total of the following items:

- Turnover from sales of delivered goods and services rendered
- Other exploitation income (for example, directors' fees received when the company acts as an administrator of another company, revenues from buildings that are not used in the company's activities and profits and transfers of losses with respect to shared operations)
- Financial income (excluding financial reversals and transfers of financial expenses)
- Subsidies received from the state and third parties

However, the rate of minimum tax is reduced to 0.25% for sales of petroleum goods, gasoline, butter, oil, sugar, flour, water and electricity. The minimum tax is imposed if it exceeds the corporate income tax calculated using the 30% rate or if the company incurs a loss. New companies are exempt from minimum tax for 36 months after the commencement of business activities.

For regional or international head offices benefiting from the Casablanca Finance City regime, the minimum tax is 5% of the total operating expenses.

Nonresident contractors may elect an optional method of taxation for engineering, construction or assembly work or for work on industrial or technical installations. Under the optional method, an 8% tax is applied to the total contract price including the cost of materials, but excluding value-added tax (VAT).

If the remittance of branch profits can be directed by the head office and if no double tax treaty between Morocco and the head office's jurisdiction exists, a 15% withholding tax is imposed on branch profits after deduction of corporate income tax. Otherwise, the rate under the double tax treaty applies.

**Tax incentives.** Morocco offers the same tax incentives to domestic and foreign investors. Various types of companies benefit from tax exemptions and tax reductions, which are summarized below.

*Permanent exemptions.* Permanent tax exemptions are available to agricultural enterprises and cooperatives with annual turnover of less than MAD5 million, excluding VAT. However, these organizations do not benefit from the 100% rebate for dividends and are not exempt for profits on transfers of shares.

Capital risk companies are exempt from corporate income tax on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

*Total exemption followed by permanent reduction.* Export companies are exempt from corporate income tax on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced rate of 17.5% in subsequent years. This exemption no longer applies to exporters of recovery metals. For service exportation, the related turnover must be generated in foreign currency that is properly repatriated.

Hotel companies benefit from a tax exemption and a tax reduction with respect to their profits corresponding to their foreign currency revenues that are generated by their hotels and are remitted to Morocco either directly or through travel agencies. Hotel companies are fully exempt from tax on such profits for the first five years following their first foreign currency sale operation, and they benefit from a reduced rate of 17.5% on such profits in subsequent years. Management companies of "real estate residences for tourism promotion" also benefit from this measure, under the same conditions. A "real estate residence for tourism promotion" is a residence assimilated to a hotel in which the housing units belong to one or more owners and of which a minimum percentage of the housing units (fixed by regulations at 70%) is managed by a licensed management company for at least 9 years.

The Casablanca Finance City regime provides to service provider companies a 5-year tax exemption and an 8.75% tax rate after the fifth year for a period of 20 years.

*Permanent reductions.* Mining companies, including those that sell products to export companies, benefit from a reduced corporate income tax rate of 17.5%.

A 10% rate applies to regional or international head offices that benefit from the Casablanca Finance City regime.

*Total exemption followed by temporary reduction.* Export companies established in Moroccan free zones (*zones franches*) are exempt from corporate income tax for the first 5 years of activity and are subject to corporate income tax at a rate of 8.75% for the following 20 years.

*Temporary exemption.* Under a transitional measure, the following agricultural enterprises continue to benefit from the temporary corporate income tax exemption:

- From 1 January 2014 until 31 December 2015: agricultural enterprises with turnover of less than MAD35 million
- From 1 January 2016 until 31 December 2017: agricultural enterprises with turnover of less than MAD20 million
- From 1 January 2018 until 31 December 2019: agricultural enterprises with turnover of less than MAD10 million

Companies holding a hydrocarbon exploration and exploitation permit are exempt from corporate income tax for 10 years from the beginning of hydrocarbon regular production.

Subject to certain conditions, real estate developers benefit from a total exemption from corporate income tax and other taxes with respect to construction programs for social housing under agreements entered into with the government. This temporary regime applies from 1 January 2010 through 31 December 2020.

*Temporary reduction.* Handicraft companies, private schools and educational institutes benefit from a reduced corporate income tax rate of 17.5% for their first five years of operations.

Banks and holding companies located in offshore zones benefit from a reduction in corporate income tax for the first 15 years of operation. Banks may elect to pay a minimum corporate income tax of USD25,000 or pay tax at a reduced rate of 10%. Holding companies pay a flat tax of USD5,000 per year.

**Capital gains.** Capital gains on the sale of fixed assets are taxed at regular corporate tax rates.

Nonresident companies are taxed on profits derived from sales of unlisted shares of Moroccan companies at a rate of 30%, unless a double tax treaty between Morocco and the residence country of the beneficiary provides otherwise. In addition, they must file an income declaration before the end of the month following the month in which the sales occurred.

Special rules apply to mergers and liquidations of companies (see Section E).

**Administration.** Within three months after the end of their financial year, companies must file a corporate income tax return with the inspector of direct taxes for the district in which their company headquarters are located. The companies' financial statements must be enclosed with the return.

Companies must make advance payments of corporate income tax. For companies with a 31 December year-end, the payments must be made by 31 March, 30 June, 30 September and 31 December. Each payment must be equal to 25% of the previous year's tax.

If the minimum tax does not exceed MAD3,000, it is fully payable in one installment. Payment of the minimum tax exceeding this amount is made in accordance with the rules applicable to the corporate income tax.

**Dividends.** Dividends are generally subject to a 15% withholding tax. However, withholding tax does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax if a property attestation is delivered by the beneficiary company. Such companies are also exempt from corporate income tax on the dividends.

**Foreign tax relief.** Foreign tax relief is granted in accordance with the provisions of Morocco's double tax treaties and the Moroccan Tax Code.

### C. Determination of trading income

**General.** The computation of taxable income is based on financial statements prepared according to generally accepted accounting principles, subject to modifications provided in the Moroccan Tax Code.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on shareholders' loans in excess of the interest rate determined annually by the Ministry of Finance or on the portion of a shareholder's loan exceeding the amount of capital stock that is fully paid up. No interest on shareholders' loans is deductible if the capital stock is not fully paid up.
- Certain specified charges, gifts, subsidies and penalties.

The tax base for coordination centers (*centers de coordination*) is equal to the sum of the following:

- Ten percent of their operating expenses
- Their income derived from non-current operations, such as sales of goods and services, and investments in securities

**Inventories.** Inventory is normally valued at the lower of cost or market value. For non-identifiable goods, cost must be determined by a weighted average cost-price method or the first-in, first-out (FIFO) method.

**Provisions.** Provisions included in the financial statements are generally deductible for tax purposes if they are established for clearly specified losses or expenses that are probably going to occur.

Provisions on bad debts are deductible if a court action is instituted against the debtor within 12 months after the booking of the provision.

**Depreciation.** Land may be amortized only if it contributes to production (for example, mining lands). Other fixed assets may be depreciated using the following two methods:

- The straight-line method at rates generally used in the sector of the activity.
- A declining-balance method with depreciation computed on the residual value by applying a declining coefficient that ranges from 1.5 to 3 and that is linked to the term of use. The declining-balance method may not be used for cars and buildings.

The following are some of the applicable straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Commercial and industrial buildings	4 or 5
Office equipment	10 to 15
Motor vehicles (for vehicles used in tourism, the maximum depreciable value is MAD300,000 including VAT)	20 to 25
Plant and machinery	10 to 15

Certain intangible assets, such as goodwill, do not depreciate over time or by use and, consequently, are not amortizable.

**Relief for tax losses.** Losses may be carried forward for four years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** Moroccan law does not provide for the financial integration of Moroccan companies equivalent to a consolidated filing position.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods sold and services rendered in Morocco	
General rate	20
Electric power, transport of tourists and goods and certain foodstuffs, such as tea	14
Restaurants, hotels, salt, bank and credit operations, petroleum gas, other gaseous hydrocarbon, refined or untreated petroleum and schist oil	10
Utilities (water provided through public distribution network and oil), pharmaceuticals and sugar	7
Professional tax, on gross rental value of the business premises	10 to 30
Local services tax; annual tax on the rental value for professional tax purposes	6.5/10.5
Registration duties, on transfers of real property or businesses	1 to 6
Professional training tax, on gross salaries including fringe benefits	1.6
Social security contributions, paid by employer	
For family allowances, on gross monthly remuneration (no maximum limit of remuneration applies)	6.4
For illness and pregnancy, on gross monthly remuneration, up to a maximum remuneration of MAD6,000 a month	8.6
For required medical care	3.5
Contribution to support social cohesion ( <i>la contribution pour l'appui à la cohésion sociale</i> ); payable by companies, public institutions, associations and other similar organizations, funds liable to corporation tax, coordination centers and other legal entities; contribution calculated on the basis of net income (profit after tax); amount of the contribution is deductible in calculating taxable income; the tax return for the contribution together with the payment of the contribution must be submitted within three months after the end of the fiscal year	
Amount of net income between MAD15 million and MAD25 million	0.5
Amount of net income between MAD25 million and MAD50 million	1

Nature of tax	Rate (%)
Amount of net income between MAD50 million and MAD100 million	1.5
Amount of net income over MAD100 million	2

## E. Miscellaneous matters

**Foreign-exchange controls.** Remittances of capital and related income to nonresidents are guaranteed. No limitations are imposed on the time or amount of profit remittances. The remittance of net profits on liquidation, up to the amount of capital contributions, is guaranteed through transfers of convertible currency to the Bank of Morocco.

As a result of the liberalization of foreign-exchange controls, foreign loans generally do not require an authorization from the exchange authorities. However, to obtain a guarantee for the remittance of principal and interest, notes are commonly filed at the exchange office, either through the bank or directly by the borrower. In general, if the loan's conditions are equivalent to those prevailing in foreign markets, the exchange office approves the loan agreement. The loan agreement must be filed with the exchange office as soon as it is established.

To promote exporting, Moroccan law allows exporters of goods or services to hold convertible dirhams amounting to 50% of repatriated currency. Exporters must spend these convertible dirhams on professional expenses incurred abroad. Such expenses must be paid through bank accounts of convertible dirhams, called "Convertible Accounts for the Promotion of Export" (Comptes Convertibles de Promotion des Exportations).

**Mergers and liquidations.** The Moroccan Tax Code provides two types of taxation for mergers, which are the common tax regime and the specific regime.

Under the common tax regime, the absorbed company is subject to tax on all profits and capital gains relating to the merger and on the profits realized between the beginning of the fiscal year and the effective date of the merger.

The specific regime allows deferred taxation of profit related to goodwill and land if certain conditions are met.

The 2010 Finance Bill instituted a temporary regime, which originally applied from January 2010 through December 2012. This regime was extended until 31 December 2016. In addition to the incentives provided by the specific regime, the temporary regime provides other incentives such as an exemption for profits derived from share transfers at the level of the shareholders. The temporary regime also applies to total scissions of companies.

Liquidations of companies trigger immediate taxation in accordance with the tax rules described above and, if applicable, a 15% withholding tax on liquidation profit called "Boni de liquidation." The "Boni de liquidation" is the balance of assets that remains for shareholders on the liquidation of a company after settlement of all liabilities, and the reimbursement of the share capital and reserves aged more than 10 years.

(a) No withholding tax is imposed in France if the recipient is subject to tax on the dividend in Morocco.

- (b) Tax is payable in the country in which the recipient is domiciled.
- (c) The 7% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The higher rate applies to other dividends.
- (d) The Maghreb Arab Union countries are Algeria, Libya, Mauritania, Morocco and Tunisia.
- (e) Under Moroccan domestic law, the withholding tax rate for interest is 10%. Consequently, for interest paid from Morocco, the treaty rates exceeding 10% do not apply. In addition, the domestic withholding tax rate for dividends is 15%, effective from 1 January 2013. Consequently, for dividends paid from Morocco, the treaty rates exceeding 15% do not apply.
- (f) The 5% rate applies if the beneficiary of the dividends holds more than USD500,000 of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (g) The 5% rate applies if the beneficiary of the dividends holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (h) The 5% rate applies if the beneficiary of the dividends is a company that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (i) The 5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (j) The 6.5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (k) The 8% rate applies if the beneficial owner of the dividend is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (l) The 7% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (m) The 6% rate applies if the beneficial owner of the dividends is a company that owns directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (n) The treaty with Singapore is effective from 1 January 2015.

Morocco has signed tax treaties with Burkina Faso, Cameroon, Côte d'Ivoire, Estonia, Ghana, Iran, Lithuania and Mali, but these treaties have not yet been ratified.

Morocco has ratified tax treaties with Serbia and Yemen, but these treaties are not yet in force.

## A. At a glance

Corporate Income Tax Rate (%)	32
Capital Gains Tax Rate (%)	32
Branch Tax Rate (%)	32 (a)
Withholding Tax (%)	
Dividends	10/20 (b)
Interest	20
Royalties	20
Technical Services	10/20 (c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) Income earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique is generally subject to withholding tax at a rate of 20% (see Section B).
- (b) The 10% rate applies to dividends paid on shares listed on the Mozambique Stock Exchange.
- (c) The 10% rate applies to fees paid with respect to the rendering of telecommunication services and associated installation and assembling of equipment, international transport services, aircraft maintenance, freight services, and the chartering of fishing vessels and vessels used in coasting activities.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax (IRPC) is levied on resident and nonresident entities.

*Resident entities.* Resident entities are companies and other entities with their head office or effective management and control in Mozambique. Resident companies, including unincorporated entities, whose main activity is commercial, industrial or agricultural, are subject to IRPC on their worldwide income, but a foreign tax credit may reduce the amount of IRPC payable.

*Nonresident entities.* Companies and other entities operating in Mozambique through a permanent establishment are subject to IRPC on the profits attributable to the permanent establishment.

Companies and other entities without a permanent establishment in Mozambique are subject to IRPC on income deemed to be obtained in Mozambique.

**Tax rates.** The standard corporate income tax rate is 32%.

Income earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique is generally subject to withholding tax at a rate of 20%. However, the rate is reduced to 10% for income derived from the rendering of telecommunication services and associated installation and assembling of equipment, international transport services, aircraft maintenance, freight services, and the chartering of fishing vessels and vessels used in coasting activities. Income that is subject to a 20% withholding tax includes, but is not limited to, the following:

- Income derived from the use of intellectual or industrial property and the providing of information in the industrial, commercial or scientific sectors
- Income derived from the use of, or the assignment of, rights to industrial, commercial or scientific equipment
- Income from the application of capital
- Income from the rendering of any services realized or used in Mozambique

**Tax incentives.** Mozambique offers various tax incentives to investors, which are summarized below.

The tax incentives described in the following three paragraphs are available for five tax years beginning with the tax year in which the company commences activities within the scope of an investment project approved by the Investment Promotion Centre.

Companies implementing investment projects benefit from the following main incentives:

- Tax credit for investment that ranges from 5% to 10%, depending on the location of the project
- Tax deductions ranging from 5% to 10% of the taxable income for investments with acquisition of state-of-the-art technology and training of Mozambican employees
- Tax deductions of up to 110% of investments for the construction and rehabilitation of public infrastructure
- Accelerated depreciation of buildings and equipment by increasing the normal rates by 50%

Companies implementing investment projects are also exempt from import duties and value-added tax on the importation of equipment classified as Class K in the Customs Manual.

Special tax incentives may be granted to the following projects:

- Projects in agriculture and tourism
- Projects with respect to basic infrastructure
- Projects located in Special Economic Zones
- Projects located in Industrial Free Zones
- Manufacturing

Special tax rules apply to manufacturing units that intend to operate under an Industrial Free Zone (IFZ) regime or in a Special Economic Zone. The main requirements for the IFZ regime are that at least 70% of production is exported and that a minimum

of 250 workplaces are created. The government establishes the Special Economic Zones, which provide benefits similar to those of IFZs.

**Capital gains.** Capital gains derived by resident entities are combined with the other income of the taxpayer and taxed at the end of the financial year. Capital gains derived by nonresident entities are also taxable in Mozambique at a rate of 32%. Gains derived from direct or indirect transfers between two nonresident entities of shares or other participation interests or rights involving assets located in Mozambique are considered to be derived in Mozambique, regardless of the location of the transaction.

**Administration.** The tax year is the calendar year. However, companies may apply to the tax authorities for a different year-end if more than 50% of the company is held by entities that adopt a different financial year and if the different year-end is justified by the type of activity of the company.

Companies must make two types of provisional payments of corporate income tax. The two types are known as advance payments and special advance payments. The advance payments are made in three equal monthly installments in May, July and September of the tax year to which the tax relates. The total amount of these payments equals 80% of the tax assessed in the preceding year. The special advance payments are made in three equal monthly installments, in June, August and October. They equal the difference between 0.5% of the company's turnover and the total of advance payments made in the preceding tax year. The minimum amount of the special advance payments is MZN30,000, while the maximum amount of such payments is MZN100,000. Companies that have adopted a tax year other than the calendar year make advance payments in the 5th, 7th and 9th months of the tax year and make special advance payments in the 6th, 8th and 10th months of the tax year.

**Dividends.** Dividends are subject to a 20% withholding tax, except for dividends on shares listed on the Mozambique Stock Exchange, which are subject to a 10% final withholding tax.

**Foreign tax relief.** Foreign-source income derived by resident entities is taxable in Mozambique. However, foreign tax may be credited against the Mozambican tax liability up to the amount of IRPC allocated to the income taxed abroad. Foreign tax credits may be carried forward for five years.

### C. Determination of trading income

**General.** Taxable income is determined according to the following rules:

- For companies with a head office or effective management control in Mozambique that are mainly engaged in commercial, agricultural or industrial activities, taxable income is the net accounting profit calculated in accordance with Mozambican generally accepted accounting principles, adjusted according to the tax norms.
- For companies with a head office or effective management control in Mozambique that do not mainly engage in commercial, industrial or agricultural activities, taxable income is the net

total of revenues from various categories of income as described in the Individual Income Tax (IRPS) Code, less expenses.

Expenses that are considered essential for the generation of profits or the maintenance of the production source are deductible for tax purposes. Nondeductible expenses include, but are not limited to, the following:

- Undocumented expenses (taxed separately at a rate of 35%)
- 50% of the rent paid by a lessee that is intended to be applied toward the purchase price of the leased asset
- Interest on shareholders loans that exceeds the Maputo Inter-Bank Offered Rate (MAIBOR) for 12 months plus 2%

Premiums paid for health, accident and life insurance and contributions to pension funds and other complementary social security schemes are deductible for tax purposes up to 10% of the salary fund. If the employees do not have the right to social security pensions, this limit can be increased to 20%.

**Inventories.** Inventories must be valued consistently by any of the following criteria:

- Cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin
- Any other special valuation that receives the prior authorization of the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities. Any profits resulting from such a change are taxable.

**Provisions.** Provisions for the following items are deductible up to amounts considered reasonable by the tax authorities:

- Doubtful accounts as a percentage of accounts receivable
- Inventory losses
- Obligations and expenses that are subject to a judicial process
- Other provisions imposed by the central bank or General Insurance Inspection (the body that inspects insurance activities) for specific activities

**Depreciation.** In general, depreciation is calculated using the straight-line method. Maximum depreciation rates are fixed by law for general purposes and for certain specific industries. If rates below 50% of the official rates are used, the company cannot claim total allowable depreciation over the life of the asset. The following are some of the maximum straight-line depreciation rates fixed by law.

<b>Asset</b>	<b>Rate (%)</b>
Commercial buildings	2
Industrial buildings	2
Motor vehicles	20 to 25
Plant and machinery	10 to 16.66

**Relief for losses.** Tax losses may be carried forward for five years. No carryback is allowed.

**Groups of companies.** Mozambican law does not contain any measures allowing the filing of consolidated returns.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	17
Tax on specific consumption; levied on specified goods at the production stage and on imports of such goods; specified goods include vehicles and luxury goods; maximum rate	75
Social security contributions, on monthly salaries and wages; paid by	
Employer	4
Employee	3
Import duties	2.5 to 25
Property transfer tax (SISA); payable by purchaser of immovable property	2

## E. Foreign-exchange controls

The central bank controls all transfers of capital (including direct investments) and payments into and out of Mozambique. An authorization from the central bank is required for the maintenance of local foreign-currency bank accounts. Service agreements with nonresident entities are subject to registration with the central bank. Loan agreements with nonresident entities are subject to the prior approval of the central bank.

In general, the repatriation of profits, dividends and proceeds from the sale or liquidation of an investment is permitted for approved foreign-investment projects if the investment has been registered and compliance with other requirements exists.

## F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Botswana	10/12/15 (b)	10	10
India	7.5	10	10
Italy	15	10	10
Macau SAR	10	10	10
Mauritius (a)	8/10/15 (b)	8	5
Portugal (a)	10	10	10
South Africa	8/10/15 (b)	8	5
United Arab Emirates (a)	0	0	5
Vietnam	10	10	10
Non-treaty countries	20	20	20

- (a) These rates apply to an effective beneficiary of the income that does not have a permanent establishment in Mozambique.
- (b) The 8% (10% under the Botswana treaty) rate applies if the effective beneficiary of the dividends is a company that holds at least 25% of the share capital of the company distributing the dividends. The 10% (12% under the Botswana treaty) rate applies if the effective beneficiary of the dividends is a company that holds less than 25% of the share capital of the company distributing the dividends. The 15% rate applies to other dividends.

## A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	10/40 (a)
Branch Tax Rate (%)	35
Withholding Tax (%)	
Dividends	0
Interest	15 (b)(c)
Royalties from Patents, Know-how, etc.	20 (b)(d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The 10% rate applies to resident companies, and the 40% rate applies to nonresident companies.
- (b) Under Myanmar's tax treaties, certain types of interest and royalties are subject to reduced rates or are exempt from tax (see Section F).
- (c) This withholding tax applies to payments to nonresidents.
- (d) This withholding tax applies to payments to residents and nonresidents.

## **B. Taxes on corporate income and gains**

**Corporate income tax.** Myanmar resident companies are subject to corporate income tax on their worldwide income. Myanmar resident companies are those incorporated in Myanmar. Branches of foreign corporations are subject to Myanmar tax on their Myanmar-source income only.

**Rates of corporate tax.** Myanmar resident companies are subject to corporate income tax at a flat rate of 25% on net taxable profits. Myanmar branches of foreign corporations are subject to corporate income tax at a flat rate of 35% on net taxable profits.

**Capital gains.** Capital gains are assessed separately from business income and are subject to a flat rate of 10% for Myanmar resident companies and 40% for non-Myanmar resident companies.

Resident companies must declare capital gains tax within one month after the date of the sale, exchange or transfer of capital assets.

**Administration.** The Myanmar fiscal year runs from 1 April to 31 March.

Companies must file corporate income tax returns, together with audited financial statements, with the Myanmar Internal Revenue Department within three months after the end of the fiscal year (that is, by the end of June).

Companies must also file an annual year-end report (Form E) with audited accounts and minutes of the annual general meeting resolution with the Directorate of Investment and Company Administration. A newly established company must file Form E within 18 months after its first fiscal year. Beginning with the second fiscal year, companies must file Form E within 15 months (but not more than one full calendar year) after the fiscal year-end.

Myanmar's laws provide that tax payments must be made on a quarterly basis.

**Dividends.** Dividends paid are not subject to withholding tax.

**Foreign tax relief.** The Myanmar domestic tax law does not provide for a foreign tax credit. However, Myanmar has entered into double tax treaties with eight countries. In general, these treaties provide for a foreign tax credit that is limited to the lower of the foreign tax and the amount of Myanmar tax calculated on such income.

## **C. Determination of trading income**

**General.** Corporate income tax is based on the audited financial statements, subject to certain adjustments.

In general, expenses are deductible for tax purposes if they are incurred wholly and exclusively for the purpose of generating income.

**Depreciation and amortization allowance.** A company may depreciate its fixed assets in accordance with the following depreciation rates prescribed by the Myanmar Income Tax Law and Regulations.

Asset	Percentage of initial cost per year (%)
Buildings	1.5 to 10
Furniture	5 to 10
Machinery	5 to 20
Motor vehicles	12.5 to 20

**Relief for losses.** Operating losses can be carried forward and offset against profits in the following three consecutive years. Loss carrybacks are not allowed.

**Groups of companies.** The Myanmar tax law does not include any provisions for consolidated treatment under which companies within a group may be treated as one tax entity. Each individual company must file its income tax return and pay its taxes.

### D. Commercial tax

Commercial tax at a rate of 5% is generally imposed on goods sold, services rendered and imports. The tax base is gross sales and services income. Certain items specified under the laws can be exempt from commercial tax.

### E. Miscellaneous matters

**Foreign-exchange controls.** The repatriation and/or remittance of foreign currency out of Myanmar requires the permission of the Foreign Exchange Control Department of the Central Bank of Myanmar.

**Transfer pricing.** Myanmar does not have any transfer-pricing rules.

### F. Treaty withholding tax rates

The rates in the following table reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest %	Royalties %
India	0	15 (a)(b)	20 (f)
Korea (South)	0	15 (a)(b)	20 (g)(h)
Laos	0	15 (a)(b)	20 (f)
Malaysia	0	15 (a)(b)	20 (f)
Singapore	0	15 (a)(c)	20 (g)(h)
Thailand	0	15 (a)(b)	20 (h)(i)(j)
United Kingdom	0	15 (d)	20 (e)
Vietnam	0	15 (a)(b)	20 (f)
Non-treaty countries	0	15	20

- (a) The following types of interest are exempt from tax:
  - Interest paid to the government, a political subdivision or a local authority
  - Interest paid to the central bank as prescribed under an applicable tax treaty
- (b) The rate is reduced to 10% if the beneficial owner of the interest is a resident of a contracting state.
- (c) The rate is reduced to 8% for Singapore if the recipient of the interest is a financial institution or a bank.
- (d) The UK tax treaty does not provide for a reduced withholding tax rate for interest.
- (e) Royalties are exempt from tax if the recipient of does not have a permanent establishment in the other contracting state and if the amount of royalties represents a fair and reasonable consideration for the rights for which the royalties are paid.

- (f) The rate is reduced to 10% if the beneficial owner of the royalties is a resident of India, Laos, Malaysia or Vietnam.
- (g) The rate is reduced to 10% for royalties paid for patents, designs, models, plans, secret formulas or processes, industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.
- (h) The rate is reduced to 15% for royalties in other cases.
- (i) The rate is reduced to 5% for royalties paid for copyrights of literary, artistic or scientific works.
- (j) The rate is reduced to 10% for royalties paid for services of a managerial or consultancy nature or for information concerning industrial, commercial or scientific experience.

Myanmar has signed tax treaties with Bangladesh and Indonesia, but these treaties have not yet been ratified.

## A. At a glance

Corporate Income Tax Rate (%)	33 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	33 (a)
Withholding Tax (%)	
Dividends	10/20 (b)
Interest	10 (c)
Royalties from Patents, Know-how, etc.	9.9 (d)
Services	25 (e)
Branch Remittance Tax	0 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) Under an announcement made by the Minister of Finance in her 2013 budget speech, this rate is expected to be reduced to 32%, effective for years of assessment beginning on or after 1 January 2014. At the time of writing, an amendment to confirm the reduction of this rate had not yet been tabled in the National Assembly.
- (b) This is a final tax applicable to nonresidents. Dividends paid to nonresidents are subject to a final 10% withholding tax if the recipient of the dividend is a company that holds at least 25% of the capital of the company paying the dividend and if it is the beneficial owner of the shares. For all other cases, the dividend withholding tax rate is 20%. Dividends paid out of oil and gas profits are exempt from withholding tax.
- (c) This withholding tax applies to interest paid to all persons, excluding Namibian companies, by Namibian banking institutions and Namibian unit trust schemes.
- (d) This withholding tax applies to nonresidents. The rate is determined by applying the regular corporate tax rate of 33% to a deemed taxable profit of 30% of gross royalties. This rate is expected to decrease in accordance with the reduction in the corporate tax rate (see footnote [a]).
- (e) The withholding tax on services applies to amounts paid by Namibian residents to nonresidents directly or indirectly for the following:
- Management, administrative, technical or consulting services
  - Directors' fees
  - Fees paid for entertainment including payments for cabaret, motion picture, radio, television, theatre artists, musicians and sportspersons
- (f) In the absence of treaty protection, the 10% dividend withholding tax may be imposed on branch profits when the parent company declares a dividend.

## **B. Taxes on corporate income and gains**

**Corporate income tax.** Companies subject to tax include companies registered in Namibia and branches of foreign companies in Namibia deriving income from a Namibian source. Other associations (such as close corporations) registered or incorporated outside Namibia that carry on business or have an office in Namibia are taxed as companies. Corporate income tax is levied primarily on income from Namibian sources.

**Rates of tax.** The rate of tax for companies, other than those companies that have been awarded manufacturing status, is 33%. The tax rate for companies that have been awarded manufacturing status is 18% for their first ten years of registration as a manufacturer and 33% thereafter. The Receiver of Revenue, in consultation with the Ministry of Trade and Industry, reviews and approves applications to register as manufacturers. Approval is granted only if the company is engaged in manufacturing and if its activities economically benefit Namibia or its inhabitants (see Section C for information regarding special deductions available to registered manufacturers).

Mining companies are taxed at a rate of 37.5% for hard-rock mining and 55% for diamond mining. Companies that render hard-rock mining services are taxed at a rate of 37.5%, effective from 1 January 2008. Companies that render diamond mining services are taxed at a rate of 55%. Petroleum exploration and production companies are taxed at a basic rate of 35% plus additional profit tax that is calculated in accordance with a complex formula.

Under the Export Processing Zone Act, an export processing zone has been established in Walvis Bay. Companies operating in the zone are exempt from corporate income tax. Value-added tax, transfer duty and stamp duty are not imposed in the zone.

**Capital gains.** Capital gains tax is not imposed in Namibia.

Proceeds received as consideration for the alienation or disposal of a mineral license, as defined in the Minerals (Prospecting and Mining) Act, or the sale of shares in a company that own such a license are specifically included in the gross income of a taxpayer.

**Administration.** Annual financial statements must be prepared as of the last day of February, unless another date is agreed to by the tax authorities. In practice, permission to use the company's financial year-end is always granted. A company's tax year generally coincides with its financial year.

A company is required to make two provisional tax payments, the first payment six months after the start of the financial year and the second at the end of the year. Payments must be based on an estimate of the current year's taxable income and must be accurate to within 80% of the actual tax liability for the year for which the payment is due. A penalty for underestimation of the first or second provisional tax payment is imposed if the respective payments are less than the minimum payment required.

Companies must file an annual return within seven months after the tax year-end unless an extension is obtained. If the total provisional tax payments are less than the tax liability shown on the return, the balance of tax due must be paid within seven months after the end of the tax year, regardless of whether a company has

obtained an extension to file its tax return. Interest accrues at a rate of 20% per year on any unpaid tax liability.

**Dividends.** Dividends received by a company are exempt from the regular company tax, and expenses incurred in the production of dividend income are not deductible in the determination of the company's taxable income. Dividends paid to nonresidents are subject to a final 10% withholding tax if the recipient of the dividend is a company that holds at least 25% of the capital of the company paying the dividend and if it is the beneficial owner of the shares. For all other cases, the dividend withholding tax rate is 20%. Dividends paid out of oil and gas profits or long-term insurance business profits are not subject to dividend withholding tax. A tax treaty may reduce the rate of dividend withholding tax.

**Foreign tax relief.** In the absence of treaty provisions, a unilateral tax credit is available for foreign direct and withholding taxes paid on dividends and royalties. The credit may not exceed the Namibian tax attributable to such income. The credit is denied to the extent that a refund of the foreign tax is possible.

### C. Determination of trading income

**General.** Taxable income includes both trade and non-trade income (interest) not of a capital nature. Revenue amounts and realized foreign-exchange gains are subject to tax. Taxable income rarely coincides with profit calculated in accordance with accepted accounting practice.

To be eligible for deduction, expenditures must be incurred in the production of taxable income in Namibia, must be for purposes of trade and must not be of a capital nature. However, realized foreign-exchange losses are deductible even if they are of a capital nature.

Scientific research expenditures are deductible if the research is undertaken for the development of business or is contributed to an institution approved by the Council for Scientific and Industrial Research.

**Special deductions.** The following special deductions are available to registered manufacturers:

- An additional deduction of 25% of the wages paid to their manufacturing staffs
- An additional deduction of 25% of approved training expenses for their manufacturing staffs
- An additional deduction of 25% of export marketing expenses
- An additional deduction of 25% of expenses incurred to transport by road or rail raw materials and equipment used in the manufacturing activity for the first 10 tax years as a manufacturer

Losses resulting from these special deductions may not be used to offset other income.

Taxable income derived from exports of manufactured goods, excluding fish and meat products, is reduced by 80% if the goods are manufactured in Namibia. This allowance is available to trading houses and manufacturers. For manufacturers, this allowance applies in addition to the special deductions listed above. For the first 10 years of operation, the tax rate for registered manufacturers that export all goods manufactured is 3.6%. After the 10-year period, the rate increases to 6.8%.

**Inventories.** Trading stock includes all goods, materials or property acquired for manufacture or sale, including packaging but excluding consumables and machinery parts. The value of stock is based on original cost plus the costs of preparing stock for sale. The last-in, first-out (LIFO) method of stock valuation may be applied on approval by the Minister of Finance, subject to various conditions.

**Provisions.** Deductible expenses must be actually incurred, and consequently, provisions are not deductible. However, an allowance for doubtful accounts may be established equal to 25% of the debts that the Minister of Finance is satisfied are doubtful. The amount of irrecoverable debts written off is allowed as a deduction if the debts were once included as taxable income or if the write-off can be construed as an operating loss incurred in the production of income (for example, the write-off of casual loans to staff members who are unable to repay).

### **Tax depreciation (capital allowances)**

*Machinery, equipment and vehicles.* The cost of machinery, motor vehicles, utensils, articles, ships and aircraft may be deducted in three equal annual amounts, beginning in the year of acquisition. No amount may be deducted in the year of disposal of the asset.

*Buildings.* An initial allowance of 20% of construction cost is permitted for commercial buildings in the year the buildings are first used. An allowance of 4% is permitted in each of the following 20 years. For industrial buildings of a registered manufacturer, an initial allowance of 20% and an annual allowance of 8% are allowed. No allowance is granted for employee housing.

*Patents, designs, trademarks and copyrights.* If used in the production of income, the cost of developing, purchasing or registering patents, designs, trademarks, copyrights and similar property is allowed in full if such cost is not more than NAD200, or the cost can be amortized over the estimated useful life if more than NAD200. The period of write-off may not exceed 25 years.

*Mining including oil and gas.* Prospecting and development expenses incurred in mining operations are not subject to the tax depreciation rules described above. In general, prospecting expenses may be deducted in the year production begins. Costs incurred on infrastructure may be deducted over three years, beginning in the year production begins.

*Recapture.* Capital allowances are generally subject to recapture to the extent the sales proceeds exceed the tax value after depreciation. In addition, capital allowances are recaptured if assets are withdrawn from a business or removed from Namibia, regardless of whether the assets are sold. The market value of the assets is used to determine the amount recaptured if no proceeds are received.

**Relief for trading losses.** Companies may carry forward unused losses indefinitely to offset taxable income in future years if they carry out a trade. Losses may not be carried back. Companies that carry on mining operations may offset current-year and prior-year trading losses from mining against other trade income and vice versa. However, such losses must be apportioned on a pro rata basis between mining and other trade income to determine taxable income from each source in the current year. Oil and gas

companies may not offset losses from oil and gas activities against other trade income, or vice versa, in any year.

**Groups of companies.** A group of companies is not taxed as a single entity in Namibia, and an assessed loss of one company cannot be offset against the taxable income of another company in the group. An assessed loss of a branch of a foreign company may be transferred to a Namibian subsidiary under certain circumstances.

#### D. Value-added tax

Value-added tax (VAT) is levied on supplies of goods or services, other than exempt supplies, made in Namibia and on imports of goods and certain services.

The standard VAT rate is 15%. The following items are zero-rated:

- Exports of goods
- Certain services rendered to nonresidents who are not registered for VAT
- Disposals of going concerns
- Local supplies of fuel levy goods (petrol and diesel)
- Maize meal, fresh or dried beans, sunflower cooking oil, fried animal fat used for the preparation of food, bread and bread or cake flour, if these items are not served as cooked or prepared food, fresh milk and white or brown sugar

Local public passenger transport, medical services, services supplied by registered hospitals, educational services and long-term residential rentals are exempt from VAT.

#### E. Miscellaneous matters

**Exchange controls.** Namibia is a member of the Common Monetary Area, which also includes Lesotho, South Africa and Swaziland. Consequently, it is subject to the exchange control regulations promulgated by the Reserve Bank of South Africa. If Namibia withdraws from the Common Monetary Area, it is likely to introduce its own exchange control restrictions along similar lines.

Exchange controls are administered by the Bank of Namibia, which has appointed various commercial banks to act as authorized foreign-exchange dealers.

The Namibian dollar (NAD) is the Namibian currency. The Namibian dollar and the South African rand (ZAR) are convertible one for one (that is, ZAR1 = NAD1), and this rate does not fluctuate.

**Debt-to-equity rules.** The tax law includes measures that counter thin capitalization by adjusting both the interest rate and the amount of the loan based on arm's-length principles. Although no guidelines have been published in this area, a debt-to-equity ratio of up to 3:1 is generally acceptable.

**Transfer pricing.** The Namibian Income Tax Act includes transfer-pricing measures, which are designed to prevent the manipulation of prices for goods and services, including financial services (loans), in cross-border transactions between related parties.

**Anti-avoidance legislation.** Namibian legislation contains a general anti-avoidance provision to attack arrangements that are primarily tax-motivated and, in certain respects, abnormal when considered in the context of surrounding circumstances. In general, the

Bank of Namibia requires a debt-to-equity ratio of 3:1 when approving foreign investment into Namibia. Another anti-avoidance provision deals with transactions involving companies (including changes in shareholdings) that are designed to use a company's assessed loss, usually by diverting income to, or generating income in, that company.

## F. Treaty withholding tax rates

Namibia has entered into double tax treaties with Botswana, France, Germany, India, Malaysia, Mauritius, Romania, the Russian Federation, South Africa and Sweden. In addition, it has a treaty with the United Kingdom, which is the 1962 treaty between the United Kingdom and South Africa as extended to Namibia.

The treaties provide for withholding tax rates on dividends, interest and royalties paid to residents of the other treaty countries as indicated in the following table.

	Dividends %	Interest %	Royalties %	Services %
Botswana	10	10	10	0/15 (h)
France	5/15 (a)	10	10	0
Germany	10/15 (b)	0	10	0
India	10	10	10	0/10 (i)
Malaysia	5/10 (c)	10	5	0/5 (j)
Mauritius	5/10 (c)	10	5	0
Romania	15	15	15	0
Russian Federation	5/10 (d)	10	5	0
South Africa	5/15 (c)	10	10	0
Sweden	5/15 (a)	10	5/15 (e)	0/15 (h)
United Kingdom	5/15 (f)	20	5	0
Non-treaty countries	10	0 (g)	9.9	25

- (a) The 5% rate applies if the recipient is a company that owns at least 10% of the payer of the dividends. The 15% rate applies to other dividends.
- (b) The 10% rate applies if the recipient is a company that owns at least 10% of the payer of the dividends. The 15% rate applies to other dividends.
- (c) The 5% rate applies if the recipient owns at least 25% of the payer of the dividends. The 10% rate applies to other dividends.
- (d) The 5% rate applies if the recipient is a company that owns at least 25% of the payer of the dividends and has invested at least USD100,000 in the share capital of the payer. The 10% rate applies to other dividends.
- (e) The 5% rate applies to royalties paid for patents, secret formulas or information relating to industrial or scientific experience. The 15% rate applies to other royalties.
- (f) The 5% rate applies if the recipient is a company that controls directly or indirectly more than 50% of the voting power of the payer of the dividends. The 15% rate applies to other dividends.
- (g) A 10% withholding tax is imposed on interest paid to all persons, excluding Namibian companies, by Namibian banking institutions, Namibian unit trust schemes and the Namibia Post Office Savings Bank.
- (h) The 15% rate applies to payments for administrative, technical, managerial or consultancy services performed outside Namibia.
- (i) The 10% rate applies to technical, managerial or consultancy fees paid by Namibian residents.
- (j) The 5% rate applies to technical, managerial or consultancy fees paid by Namibian residents.

Namibia has a signed tax treaty with Canada, but the treaty has not yet been ratified. Namibia is negotiating tax treaties with Lesotho, Seychelles, Spain, Zambia and Zimbabwe.

- (a) A tax rate of 20% applies to the first EUR200,000 of taxable income. An effective tax rate of 5% is available for income related to certain intellectual property (Innovation Box). For details regarding the Innovation Box, see Section B.
- (b) This rate may be reduced to 0% if the recipient is a parent company established in a European Union (EU) member state or European Economic Area (EEA) state. In addition, this rate is typically reduced under the extensive Dutch tax treaty network (see Section F), to as low as 0%. Under Dutch domestic law, dividends paid by a Dutch Cooperative, which is a specific legal entity, are not subject to Dutch dividend withholding tax, provided that certain anti-abuse requirements are met. For corporate income tax purposes, a Dutch Cooperative is similar to a Dutch private limited liability company (*besloten vennootschap met beperkte aansprakelijkheid*, or BV) but, among other advantages, it may offer more flexibility from a legal perspective. For further details, see Section B.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Corporate income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Dutch civil law, including subsidiaries of foreign companies, European Companies (*Societas Europaea*, or SEs) and European Co-operative Societies (*Societas Cooperativa Europaea*, or SCEs) established in the Netherlands, even if their management and statutory seat are located abroad. In addition, companies are resident if incorporated under foreign civil law, but effectively managed and controlled in the Netherlands. Resident companies are subject to tax on their worldwide income. Nonresident companies, primarily branch offices of foreign companies doing business in the Netherlands, are taxable only on specific income items, such as real estate and business profits generated in the Netherlands.

**Tax rates.** The standard corporate tax rate is 25%. A tax rate of 20% applies to the first EUR200,000 of taxable income. An effective tax rate of 5% is available for income related to certain intellectual property (IP). For details regarding this IP regime, see *Innovation Box*.

**Innovation Box.** If certain conditions are met, a taxpayer can elect to apply the Innovation Box. The aim of this box is to encourage innovation and investment in research and development (R&D), including software development. The Innovation Box is the successor of the Patent Box. The Patent Box, which applied from 1 January 2007, was converted into the Innovation Box, as of 1 January 2010.

In the Innovation Box, net income from qualifying intellectual property is effectively taxed at a rate of 5%. The 5% rate applies only to the extent that the net earnings derived from the self-developed intangible assets exceed the development costs. The development costs are deductible at the statutory tax rate of 25% (see Section A) and form the so-called threshold. The Innovation Box regime can be elected with respect to a particular intangible asset; it is not required to include all intangibles. The Innovation Box does not impose a limit on the amount of income from intangible assets that can be taxed at the effective 5% rate (that is, no cap exists).

An important condition for the application of the Innovation Box is that the taxpayer must have been granted a patent, a breeder's right (this right is granted for newly invented seeds) or an R&D declaration from the Netherlands Enterprise Agency (part of the Ministry of Economic Affairs) for an intangible asset created by or for the risk and account of the taxpayer. Trademarks, logos and similar assets do not qualify. Contract R&D arrangements for qualifying intangible assets are allowed to a certain extent. Advance Tax Rulings (ATRs) and Advance Pricing Agreements (APAs) are available (see *Administration*).

Foreign royalty withholding tax can normally be credited against Dutch corporate income tax, but the amount of the credit is limited to the Dutch corporate income tax attributable to the relevant net royalty income.

**Research and development allowance.** A taxpayer subject to the regular corporate income tax rate may deduct immediately from taxable income the costs of developing intangible assets. As a result, such costs do not need to be capitalized. An additional deemed notional deduction of 60% (for 2015) is available for expenses (excluding wages that can qualify for an R&D wage tax incentive) incurred for, and investments related to, R&D work for which an R&D declaration has been obtained from the Netherlands Enterprise Agency (part of the Ministry of Economic Affairs). At the standard tax rate of 25% (see Section A), this results in a net benefit of 15% for 2015.

**Capital gains.** No distinction is made between capital gains and other income. In certain cases, capital gains are exempt (for example, if the participation exemption described in Section C applies) or a rollover is available based on case law or under the reinvestment reserve (see the discussion in *Provisions* in Section C).

**Administration.** The standard tax year is the financial year (as indicated in the articles of association of a taxpayer).

An annual tax return must be filed with the tax authorities within 5 months after the end of the tax year, unless the company applies for an extension (normally, an additional 10 months based on an agreement between the tax advisers and the tax authorities).

Companies must make partial advance payments of corporate income tax during the year, which are known as preliminary assessments. The preliminary assessments are based on the expected final assessment. For 2015, assuming the tax year is the calendar year, the assessments are levied according to the following schedule:

- The first preliminary assessment is due on 31 January 2015. The tax administration may estimate the profits by applying a percentage to the average fiscal profit of the previous two years. If the taxpayer can plausibly show that the expected final assessment will be a lower amount, the preliminary assessment is based on that amount.
- The second preliminary assessment is due at the end of the eighth month of 2015. This preliminary assessment is derived from an estimate made by the taxpayer.

These preliminary assessments may be paid in as many monthly installments as there are months remaining in the year. It is important that taxpayers provide a timely and accurate estimate of the taxable income. If the preliminary corporate income tax liability is understated, this may result in a charge of tax interest when the tax assessment appears to be higher. If the preliminary corporate income tax liability is overstated, this may not result in a tax interest refund when the tax assessment appears to be lower.

The final assessment is made within three years (plus any extensions granted) from the time the tax liability arises.

The tax authorities may impose *ex officio* assessments if the taxpayer fails to file a return or fails to meet the deadline to file a return. Penalties may apply.

Additional assessments may be imposed if, as a result of deliberate actions by the taxpayer, insufficient tax has been levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally reduced to 25% or 50%.

*Rulings.* Rulings are agreements concluded with the tax authorities with respect to the Dutch tax consequences of transactions or situations involving Dutch taxpayers. Rulings are based on Dutch tax laws that apply at the time of the request.

For certainty in advance regarding general transfer-pricing matters (see Section E), an APA can be concluded with the tax authorities. APAs provide taxpayers with upfront certainty regarding the arm's-length nature of transfer prices. APAs can be entered into on a unilateral, bilateral or multilateral basis (that is, with several tax administrations). APAs may cover all or part of transactions with related parties, including transactions involving permanent establishments. The Dutch APA program also allows the use of adjustments for the application of the agreed transfer-pricing methodology on a retrospective basis.

For most other matters (for example, the applicability of the participation exemption), the tax consequences of hybrid finance structures or the existence or nonexistence of a permanent establishment in the Netherlands or abroad, an ATR can be concluded.

The benefit of an APA or ATR is that companies can obtain certainty in advance regarding their Dutch tax position (for example, before the investment is made).

The ruling process with the tax authorities may require a pre-filing meeting. In general, rulings are concluded for a period of four or five years, but facts and circumstances may allow for a longer term. If the facts on which the APA or ATR was based do not change, in principle, the APA or ATR can be renewed indefinitely. No fees are required to be paid when filing an APA or ATR request with the Dutch tax authorities.

The time required for the total process from initiation of the ruling process to conclusion of the ruling depends on the circumstances. However, in general, it takes between 6 to 10 weeks from the date of the filing of the ruling request to obtain the ruling. It is often possible to expedite the process if required from a commercial perspective (for example, merger and acquisition transactions).

**Dividend withholding tax.** The statutory withholding tax rate for dividends is 15%. However, several exemptions and reductions, as described below, can apply. Under the extensive Dutch treaty network (see Section F), the Dutch dividend withholding tax rate is typically reduced to a rate as low as 0%. Under the participation exemption (see Section C) or within a Dutch fiscal unity (see Section C), dividends paid by resident companies to other resident companies are usually exempt from dividend withholding tax.

The withholding tax exemption is available to EU/EEA member state resident investors (and who are not treated as a resident outside the EU/EEA under a tax treaty between the EU/EEA state and a third state) holding an interest in a Dutch dividend distributing entity that would qualify for participation exemption benefits if the investor resided in the Netherlands. For this purpose, the EEA is limited to the countries of Iceland, Liechtenstein and Norway. The withholding tax exemption does not apply if the foreign shareholder fulfills a similar function as a Netherlands fiscal investment company or tax-exempt investment company.

Under Dutch domestic law, members in a Dutch Cooperative are not subject to Dutch dividend withholding tax, provided certain anti-abuse requirements are met. A Dutch Cooperative is similar to a Dutch BV but, among other advantages, can offer more flexibility from a legal perspective.

*Measures to combat dividend stripping.* The Dividend Tax Act provides measures to combat dividend stripping. Under these measures, a reduction of dividend withholding tax is available only if the recipient of the dividends is regarded as the beneficial owner of the dividends. The measures provide that a recipient of dividends is generally not regarded as the beneficial owner if the following circumstances exist:

- The dividend recipient entered into a transaction in return for the payment of the dividends as part of a series of transactions.

- It is likely that the payment of the dividends benefits a person who would have been entitled to a lesser (or no) reduction, exemption or refund of dividend tax than the recipient.
- The person benefiting from the dividends directly or indirectly maintains or acquires an interest in the share capital of the payer of the dividends that is comparable to the person's position in the share capital before the series of transactions.

*Share repurchases.* Publicly listed companies are not required to withhold dividends tax when they repurchase their own shares if certain requirements are met. One of these requirements is that the company must not have increased its share capital in the four years preceding the repurchase. This requirement does not apply if the share capital was increased for bona fide business reasons.

*Credit for dividend withholding tax.* A Dutch intermediate company may credit a portion of the foreign dividend withholding tax imposed on dividends received against any Dutch withholding tax due on its dividend distributions if certain conditions are satisfied. The credit is generally 3% of the gross amount of qualifying dividends received. However, if the dividends received are not passed on in full by the Dutch intermediate company, the credit is 3% of the dividend distribution made by the Dutch intermediate company.

**Foreign tax relief.** Under unilateral provisions in the corporate income tax act, the Netherlands exempts foreign business profits derived through a permanent establishment, profits from real estate located abroad and certain other types of foreign income from corporate income tax. If the income is derived from a tax treaty country, the exemption applies with consideration of the relevant treaty provisions. If such foreign (operational) income is derived from a non-treaty country, no "subject to tax" requirement applies. To the extent that the foreign business income is negative, this amount does not reduce Dutch taxable income unless the foreign business is terminated (object exemption/territorial system). A credit is available for profits allocable to low-taxed portfolio investment/passive branches.

### C. Determination of taxable income

**General.** The fiscal profit is not necessarily calculated on the basis of the annual financial statements. In the Netherlands, all commercial accounting methods have to be reviewed to confirm that they are acceptable under fiscal law. The primary feature of tax accounting is the legal concept of "sound business practice."

Expenses incurred in connection with the conduct of a business are, in principle, deductible. However, certain expenses are not deductible, such as fines and penalties, and expenses incurred with respect to a crime. For companies that do not have shareholders with substantial interests, no other restrictions exist, except with respect to the deductibility of related-party interest expense. For other companies, certain expenses are partially deductible, such as meals, drinks, and conferences. If expenses exceed normal arm's-length charges and are incurred directly or indirectly for the benefit of shareholders or related parties, the excess is considered a nondeductible expense (a deemed dividend or informal capital contribution). Restrictions are imposed on the deductibility of certain related-party interest expense (see Section E).

**Functional currency.** Taxpayers must calculate their taxable income in euros. On request, Dutch corporate tax returns may be calculated in the functional currency of the taxpayer, provided the financial statements of the relevant financial year are prepared in that currency. The financial statements may be expressed in a foreign currency if it is justified by the company's business or the international nature of the company's group. If this regime is applied, in principle, the functional currency must be used for at least 10 years. Only currencies listed by the European Central Bank qualify for the regime.

**Inventories.** Inventories are generally valued at the lower of cost or market value, but the last-in, first-out (LIFO) and the base stock methods of valuation are acceptable if certain conditions are fulfilled. Both of these make it possible to defer taxation of inventory profits. Valuation under the replacement-cost method is not accepted for tax purposes.

**Provisions.** Dutch law permits the creation of tax-free equalization and reinvestment reserves.

The equalization reserve may be established in anticipation of certain future expenditure that might otherwise vary considerably from year to year, such as ship maintenance, overhauling, pension payments or warranty costs.

If certain conditions are met, the tax book profit arising from the disposal of a tangible or intangible business asset may be carried forward and offset against the acquisition cost of a reinvestment asset. This is known as a reinvestment reserve. The reinvestment asset must be purchased within three years after the year in which the reinvestment reserve was established. If a reinvestment asset is not purchased within three years after the establishment of the reinvestment reserve, the amount in the reinvestment reserve is included in taxable income for corporate income tax purposes in the third year following the year in which the reinvestment reserve was established. The offset of the book profit may not reduce the book value of the reinvestment asset below the book value of the asset that was sold. An amount that cannot be offset as a result of the rule described in the preceding sentence may continue to be carried forward if the condition of the same economic function for the reinvestment does not apply (see below). If the depreciation period for the reinvestment asset is more than 10 years or if the reinvestment asset is not depreciable, the reinvestment asset must fulfill the same economic function as the asset that was sold. The condition of the same economic function for the reinvestment does not apply to reinvestment assets with a depreciation period of 10 years or less.

**Participation exemption.** All companies resident in the Netherlands (except qualified investment companies that are subject to a corporate income tax rate of 0%), including holding companies, are in principle exempt from Dutch corporation tax on all benefits connected with certain qualifying shareholdings (participations). Benefits include cash dividends, dividends-in-kind, bonus shares, "hidden" profit distributions and capital gains realized on disposal of the shareholding. A capital loss that might result from the disposal of the shareholding is similarly nondeductible (however, a liquidation loss of a subsidiary company may be deductible under certain circumstances).

The participation exemption applies to all (rights to) interests of 5% or more in the nominal paid-up capital of the subsidiary, unless the participation is a “portfolio investment” (determined through the motive test; see below). A less than 5% direct shareholding may be a qualifying participation if a related company owns an interest of at least 5% in the same subsidiary. If the shareholding is reduced to less than 5% (for example, as a result of a dilution or another event), the participation exemption may still apply for a period of three years from the date the 5% threshold is no longer met. A condition for applying the participation exemption during the three-year period is that the shareholding must have been owned by the Dutch shareholder for more than one year during which the Dutch shareholder was able to fully benefit from the Dutch participation exemption. If the participation can be considered a “portfolio investment” on a particular date, the Dutch shareholder may no longer benefit from the participation exemption as of such date.

The motive test is applied to determine whether a participation is a “portfolio investment.” In general, the motive test is met if the shares in the subsidiary are not merely held for the return that can be expected from normal asset management. In a limited number of specific situations, the participation is deemed to be held as a portfolio investment, which is generally determined based on the function and assets of the subsidiary. However, even if the motive test is not met, the Dutch taxpayer may still benefit from the participation exemption if the reasonable tax test or the asset test is met.

The reasonable tax test is satisfied if the direct subsidiary is subject to a profit tax that results in a reasonable levy of profit tax in accordance with Dutch tax standards. Based on the parliamentary history, in principle, the local tax system needs to be compared with the Dutch tax system. The primary elements that are taken into account for this assessment are the tax base and the local statutory corporate income tax rate. In general, a statutory profit tax rate of at least 10% qualifies as a reasonable levy if no significant deviations exist between the local tax system and the Dutch tax system. Such significant deviations include, among others, a tax holiday, a cost-plus tax base with a limited cost base and the absence of limitation provisions with respect to the interest deduction.

The asset test is satisfied if less than half of the assets of the direct subsidiary usually consist of, directly or indirectly, low-taxed “free” portfolio investments on an aggregated basis. The portfolio investments are considered “free” if the investments are not used in the course of the business of the company. Real estate and rights directly or indirectly related to real estate are excluded from the definition of a portfolio investment. As a result, the participation exemption normally applies to benefits from real estate participations.

Subject to prior approval of the Dutch tax authorities, a taxpayer can apply the participation exemption to the foreign-exchange results relating to financial instruments that hedge the foreign-exchange exposure on qualifying participations.

*Hybrid loans.* The participation exemption is generally also available for benefits derived from so-called hybrid loans. These are

legal debt instruments that are deemed to function as equity for Dutch tax purposes. On 8 July 2014, the EU's Economic and Financial Affairs Council (ECOFIN) formally adopted an amendment to the EU Parent-Subsidiary Directive. Under this amendment, the participation exemption does not apply to income on hybrid loans to the extent that the corresponding payments are deductible at the level of the debtor. At the time of writing, the Dutch government had not yet issued the proposed amendment of the relevant domestic legislation to implement this rule. Taxpayers should consult their Dutch tax advisers to obtain further details regarding the status of the proposed amendment.

*Partitioning reserve.* Under new rules that were introduced in 2013, companies claiming exemption from corporate income tax (under the 2007 revised participation exemption rules) for dividends received from foreign subsidiaries must apportion the income to the year in which it originated. The change applies retroactively to 14 June 2013, when the proposed new rules were first announced. It prevents companies from claiming the exemption on income originating from a non-exempt period (so-called compartmentalization rules). Under the new rules, a taxpayer must create a fiscal "partitioning reserve" if it holds a (share) interest in a company to which the participation exemption no longer applies and if the participation exemption did apply until that moment (and vice versa). Taxpayers should consult their Dutch tax advisers to obtain further details regarding these rules.

**Tax depreciation.** In principle, depreciation is based on historical cost, the service life of the asset and the residual value. Effective from 1 January 2007, depreciation is limited on buildings, goodwill and other assets.

*Buildings.* Effective from 1 January 2007, buildings (including the land and surroundings on which they were erected) can be depreciated only for as long as the tax book value does not drop below the threshold value. Buildings may not be depreciated to a tax book value lower than the threshold value. The threshold value of buildings held as a portfolio investment equals the value provided in the Law on Valuation of Real Estate (Wet Waardering Onroerende Zaken), known as the WOZ value. The threshold value of buildings used in the taxpayer's business or a related party's business equals 50% of the WOZ value. In principle, the WOZ value approximates the fair market value of the real estate. The local municipality determines annually the WOZ value. If the threshold value increases, tax depreciation that had been previously claimed is not recaptured.

*Goodwill and other assets.* Goodwill must be depreciated over a period of at least 10 years. As a result, the maximum annual depreciation rate is 10%. If the goodwill is useful for a longer period, this period must be taken into account. For other assets such as inventory, cars and computers, the depreciation is limited to an annual rate of 20% of historical cost.

**Groups of companies.** Under the Dutch fiscal unity regime, a group of companies can be treated as one taxpayer for Dutch tax purposes. The fiscal unity regime has the following characteristics:

- To elect a fiscal unity, among other requirements, a parent company must own at least 95% of the shares of a subsidiary.

- Both Dutch and foreign companies may be included in a fiscal unity if their place of effective management is located in the Netherlands, and if the foreign company is comparable to a Dutch BV or *naamloze vennootschap* (NV).
- A permanent establishment in the Netherlands of a company with its effective management abroad may be included in, or can be the parent of, a fiscal unity.
- A subsidiary may be included in the fiscal unity from the date of acquisition.

Advantages of such group treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the group.
- Reorganizations, including transfers of assets with hidden reserves from one company to another, have no direct fiscal consequences.
- Intercompany profits between members of a Dutch fiscal unity may be fully deferred.

On 12 June 2014, the Court of Justice of the European Union (CJEU) ruled that the current Dutch fiscal unity regime is incompatible with the EU freedom of establishment because of the current absence of the option to form a fiscal unity between Dutch companies that are linked via a company that resides in another member state. As a result of this ruling, it should be possible to form a fiscal unity that includes the following:

- A Dutch parent and a Dutch second-tier subsidiary that is held by an intermediate company in another EU member state
- Two Dutch subsidiary (sister) companies held by a parent company in another member state

At the time of writing, the Dutch government had not yet issued a proposed amendment of the relevant domestic legislation. Taxpayers should consult their Dutch tax advisers to obtain further details regarding the status of the amendment.

**Relief for losses.** Losses of a company may be carried back one year and carried forward nine years.

Restrictions on loss relief apply to holding and financing companies. The restrictions apply to a company if holding activities and direct or indirect financing of related parties account for at least 90% of the company's activities during at least 90% of the financial year.

A company meeting the above condition may offset losses from a financial year against profits earned in another financial year only if its activities in both financial years consist of (or almost exclusively consist of) holding activities and the direct or indirect financing of related parties. This rule is designed to prevent companies from offsetting losses incurred in years in which they primarily engaged in holding and financing activities against profits of other activities that are subsequently commenced or acquired.

A second restriction provides that the balance of the related-party receivables and the related-party payables of the company during the financial year in which the profits are realized may not exceed this balance in the financial year in which the losses were incurred. This rule is designed to prevent companies from using losses

by increasing the profitable finance activities. However, the company may make a case that the balance of the receivables and payables has increased for business reasons and not only for the purpose of using the loss carryforwards. If a taxpayer has at least 25 employees engaged in activities other than holding or financing, this ring-fencing rule does not apply.

The Corporate Income Tax Act contains specific rules to combat the trade in so-called “loss companies.” If 30% or more of the ultimate interests in a Dutch taxpayer changes among ultimate shareholders or is transferred to new shareholders, in principle, the losses of the company may not be offset against future profits. However, many exceptions to this rule exist (for example, the going-concern exception). The company has the burden of proof with respect to the applicability of the exemptions. A similar rule applies to companies with a reinvestment reserve and other attributes (such as tax credit carryforwards).

#### **D. Value-added tax**

Value-added tax is imposed on goods delivered and services rendered in the Netherlands other than exempt goods and services. The general rate is 21%. Other rates are 0% and 6%.

#### **E. Miscellaneous matters**

**Dutch intermediate companies.** The Netherlands may be used as a base for intermediate companies. These are primarily holding companies, finance companies, licensing companies and leasing companies. Companies that perform these activities within a group must bear a certain level of risk with respect to these activities. A safe-harbor test involving a requirement with respect to minimum equity at risk determines whether sufficient risk is involved.

The Netherlands does not impose withholding tax on interest and royalty payments (see Section A). In addition, dividend withholding tax is typically reduced to 0% (see Section B). Because of the participation exemption (see Section C), a Dutch intermediate company is usually exempt from Dutch corporate tax on dividends from, and capital gains connected with, a foreign shareholding.

A new decree, which is effective from 1 January 2014, codifies the existing administrative guidance on substance requirements for companies engaged in intercompany financing and/or licensing activities. Dutch companies that claim the benefits of a tax treaty or EU Directive (treaty benefits) must now declare in their annual corporate income tax return whether the taxpayer meets a defined set of substance requirements. If one or more of these requirements are not met and if the company has claimed the benefits of a tax treaty, the Dutch tax authorities notify the foreign tax authorities. This is a simple notification. It is up to the foreign tax authorities to take action regarding this notification. Taxpayers should consult their Dutch tax advisers to discuss these rules in more detail.

**Foreign-exchange controls.** No real restrictions are imposed on the movement of funds into and out of the Netherlands.

**Debt-to-equity rules and other restrictions on deductibility of interest**

*Statutory thin-capitalization rules.* Effective from 1 January 2013, the statutory thin-capitalization rules were abolished.

*Other anti-base erosion provisions.* The deduction of interest paid, including related costs and currency exchange results, by a Dutch company on a related-party loan is disallowed to the extent that the loan relates to one of the following transactions:

- Dividend distributions or repayments of capital by the taxpayer or by a related Dutch company to a related company or a related individual resident in the Netherlands
- Capital contributions by the taxpayer, by a related Dutch company or by a related individual resident in the Netherlands into a related company
- The acquisition or extension of an interest by the taxpayer, by a related Dutch company or by a related individual resident in the Netherlands in a company that is related to the taxpayer after this acquisition or extension

This interest deduction limitation does not apply if either of the following conditions is satisfied:

- The loan and the related transaction are primarily based on business considerations.
- At the level of the creditor, the interest on the loan is subject to a tax on income or profits that results in a levy of at least 10% on a tax base determined under Dutch standards, disregarding the Innovation Box (see Section B). In addition, such interest income may not be set off against losses incurred in prior years or benefit from other forms or types of relief that were available when the loan was obtained. In addition, the loan may not be obtained in anticipation of losses or other types of relief that arise in the year in which the loan was granted or in the near future. Effective from 1 January 2008, even if the income is subject to a levy of at least 10% on a tax base determined under Dutch standards at the level of the creditor, interest payments are not deductible if the tax authorities can demonstrate it to be likely that the loan or the related transaction is not primarily based on business considerations. The measure described in the preceding sentence applies to loans that were in existence on 1 January 2008, with no grandfathering.

*Hybrid loans.* Interest expense incurred on loans that are (deemed) to function as equity for Dutch tax purposes is not deductible and may be subject to Dutch dividend withholding tax.

*Acquisition interest limitation.* Effective from 1 January 2012, the deduction of interest expense related to the acquisitions of a Dutch company that is subsequently included in a fiscal unity with its Dutch acquirer (or merged) is restricted. In such a transaction, the interest expense incurred by the Dutch acquirer with respect to the acquisition is tax deductible without limitation only if the acquirer has “stand-alone” taxable income. If the acquirer does not have sufficient “stand-alone” taxable income, limitations to the amount of deductible acquisition interest expense may apply. This is the case if the acquisition interest exceeds an amount of EUR1 million and if the fiscal unity has “excess liabilities.” To determine whether the fiscal unity has “excess liabilities,” the amount of outstanding liabilities related to an acquisition, expressed as a percentage

of the initial purchase price, is reviewed annually. In the first year, “excess liabilities” are recognized only if more than 60% of the purchase price is financed with (any) debt, and the deductibility of interest expenses is limited to the amount of the “excess liabilities.” This percentage is reduced by 5% per year. Taxpayers should consult their Dutch tax advisers to discuss these rules in more detail. The restriction was introduced with a grandfathering provision. Under this provision, if the target is included in a fiscal unity with the acquirer before 15 November 2011 or if it was merged before that date, the limitations do not apply.

*Participation interest limitation.* The participation interest limitation applies to fiscal years beginning on or after 1 January 2013. It seeks to limit the deduction of “excessive interest” paid by a Dutch corporate taxpayer with respect to “participation debt,” which is debt (deemed to be) used to finance assets generating income that is exempt under the Dutch participation exemption. Such assets primarily include participations (such as share interests of at least 5%). The new rule applies only if the interest exceeds EUR750,000 (only the excess above EUR750,000 would potentially be limited).

Under the proposed rule, “participation debt” exists if the average cost price (that is, the combined amount of the purchase prices of the subsidiaries held by the Dutch taxpayer) of a Dutch taxpayer’s participations exceeds the taxpayer’s equity for Dutch tax purposes. Excess interest is calculated using the following formula:

$$\text{Excess interest} = \text{Total interest and costs at the level of the taxpayer} \times \frac{\text{Participation debt}}{\text{Total amount of debt}}$$

Certain exceptions exist. The cost price of a subsidiary is not taken into account for purposes of calculating the participation debt (that is, a purchase price is excluded from the combined amount of purchase prices of the subsidiaries held by the Dutch taxpayer) if and to the extent that the interest held in an operational subsidiary can be considered an expansion of the operational activities of the group (expansion investment escape). This exception does not apply in certain situations that the legislation deems abusive. Taxpayers should consult Dutch tax advisors to discuss these rules in more detail.

A grandfathering rule applies for subsidiaries held by the Dutch taxpayer on or before 1 January 2006. These subsidiaries are deemed to be an expansion investment for 90%. The Dutch taxpayer can still substantiate that the subsidiary should be considered an expansion investment for 100%.

Another exception is made for active financing activities. When calculating the excess interest, the interest and costs relating to payables held with respect to active financing are excluded from the total amount of interest and costs. In addition, payables that relate to active financing lower the average total debt that is needed to calculate the excessive amount of interest. For this active financing rule to apply, a taxpayer must demonstrate that the payables as well as the receivables connected thereto are held with respect to the active financing activities. This is subject to specific criteria.

**Transfer pricing.** The Dutch tax law includes the arm's-length principle (codified in the Corporate Income Tax Act) and contains specific transfer-pricing documentation requirements. Transactions between associated enterprises (controlled transactions) must be documented. Such documentation should include a description of the terms of the controlled transactions, the entities (and permanent establishments) involved and a thorough analysis of the so-called five comparability factors (both from the perspective of the controlled transactions and companies and uncontrolled transactions and companies), of which the functional analysis is the most important. The documentation must establish how transfer prices were determined and provide a basis for determining whether the terms of the intercompany transactions would have been adopted if the parties were unrelated. If such information is not available on request in the case of an audit or litigation, the burden of proof with respect to the arm's-length nature of the transfer prices shifts to the taxpayer. As a result, the taxpayer is exposed to possible non-compliance penalty charges. Taxpayers can use the Dutch transfer-pricing decrees for guidance. These decrees provide the Dutch interpretation of the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines.

APAs can be concluded with the Dutch tax authorities with respect to transfer pricing (see Section B).

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Dutch domestic law.

	Dividends (a)	Interest	Royalties

- (a) The dividend withholding tax rates in this table are based on the lowest available treaty rates.
- (b) The rate is increased to 15% (China, Slovak Republic and Venezuela, 10%) if the recipient is not a corporation owning at least 25% of the distributing company.
- (c) The rate is increased to 15% (or other rate as indicated below) if the recipient is not a corporation owning at least 10% of the distributing company.
- |         |     |              |     |                      |     |
|---------|-----|--------------|-----|----------------------|-----|
| Bahrain | 10% | Kuwait       | 10% | South Africa         | 10% |
| Ghana   | 10% | Oman         | 10% | United Arab Emirates | 10% |
| Japan   | 10% | Saudi Arabia | 10% |                      |     |
- (d) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 20% of the distributing company.
- (e) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 15% of the distributing company and if other conditions are met.
- (f) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 5% of the distributing company.
- (g) A dividend withholding tax exemption is available to EU/EEA member state resident investors (who are not treated as a resident outside the EU/EEA under a tax treaty between the EU/EEA state and a third state) holding an interest in a Dutch dividend distributing entity that would qualify for participation exemption benefits. For this purpose, the EEA is limited to the countries of Iceland, Liechtenstein and Norway. The withholding tax exemption does not apply if the foreign shareholder fulfills a similar function as a Netherlands fiscal investment company or tax-exempt investment company. No minimum holding period applies.
- (h) The treaty withholding rate is increased to 10% if the recipient is not a corporation owning at least 7.5% of the distributing company.
- (i) The former USSR tax treaty continues to apply to Kyrgyzstan, Tajikistan and Turkmenistan.
- (j) The former Yugoslavia tax treaty continues to apply to Bosnia and Herzegovina, Kosovo, Montenegro and Serbia.
- (k) The treaty withholding rate is 15% but contains a most-favorite-nation clause. The 10% rate is based on the treaty withholding rate with Germany. The 5% rate is based on the treaty withholding rate with Slovenia and requires ownership of at least 10% of the distributing company.
- (l) The 0% rate applies if the recipient is exempt from tax on the dividend.
- (m) The 5% rate applies if the recipient has invested at least EUR75,000 in the capital of the distributing company and has an interest of at least 25% in the distributing company.
- (n) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the distributing company or has invested more than USD10 million, or the equivalent in local currency, in the distributing company. The 7% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 25% but less than 50% of the distributing company and if, under the provisions of the Netherlands Company Tax Act and future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands company tax with respect to dividends received by the company from a company that is a resident of Vietnam.
- (o) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the distributing company and has invested more than USD2 million or the equivalent in euro or Georgian currency in the capital of the distributing company.

- (p) The 0% rate applies if the recipient is a corporation that owns at least 50% of the distributing company and has invested EUR250,000 in the share capital of the distributing company or if the recipient is a corporation owning at least 25% of the shares of the distributing company and the capital of the distributing company is guaranteed or insured by the government.
- (q) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the distributing company and if certain other conditions are met. Please consult your Dutch tax advisor for further details.
- (r) The 0% rate applies if the recipient of the dividends owns at least 50% of the distributing company and the recipient has invested at least USD300,000, or the equivalent in local currency, in the capital of the distributing company.
- (s) The 5% rate applies if the recipient has invested at least EUR200,000 in the capital of the distributing company.
- (t) The 0% rate applies if the recipient has invested more than USD250,000 in the capital of the distributing company.
- (u) The 0% rate applies if the profits out of which the dividends are paid have been effectively taxed at the normal rate for profits tax and if the dividends are exempt from tax in the hands of the company receiving such dividends.
- (v) The 0% rate applies if the beneficial owner is a company that has directly or indirectly owned shares representing at least 50% of the voting power of the distributing company for the six-month period ending on the date on which entitlement to the dividends is determined and if other conditions are met.
- (w) The 10% rate applies if, according to the law in force in Venezuela, taxation of the dividends in Venezuela results in a tax burden of less than 10% of the gross amount of the dividends.
- (x) The 0% rate applies if under the provisions of the Netherlands Company Tax Act and the future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands company tax with respect to dividends the company receives from a company that is a resident of Uzbekistan.
- (y) The 0% rate applies if the recipient is a company that directly owns shares representing 80% or more of the voting power in the payer of the dividends and if other conditions are met. The 5% rate applies if the recipient is a company that holds directly at least 10% of the voting power of the payer of the dividends.
- (z) The 0% rate applies if the recipient is a company owning at least 50% of the distributing company with respect to investments made, including increases of investments, after the entry into force of this treaty on 10 September 2006. The 5% rate applies if the recipient is a company that owns less than 50% of the distributing company. The competent authorities of the contracting states regulate in an agreement the application of the reduced rates.
- (aa) The 5% rate applies if the recipient of the dividend is subject to profit taxation of at least 5.5%.
- (bb) Dividends paid by a resident of the Netherlands to a resident of Curaçao or Sint Maarten are subject to Dutch dividend withholding tax at a rate of 15%. A reduced rate of 8.3% is available if certain requirements are met. On 12 December 2013, the Netherlands and Curacao announced that they reached an agreement on a new tax arrangement. When ratified, the new tax arrangement provides for a reduced withholding rate of 0% if certain requirements are met.
- (cc) On 10 August 2012, the Netherlands and Ethiopia signed a new tax treaty. When ratified, the new tax treaty provides for a reduced treaty withholding rate of 5% if certain requirements are met.
- (dd) On 12 April 2012, the Netherlands and Germany signed a new treaty. After the new treaty is ratified, a reduced treaty withholding rate of 5% will apply to dividends if certain requirements are met.

The Netherlands is in continuous negotiations with other countries to conclude new tax treaties or amend existing ones. During 2014, the Netherlands continued discussions with Algeria, Australia, Belgium, Brazil, Canada, Chile, Colombia, Cyprus, France, Guernsey, India, Indonesia, Iraq, Ireland, Isle of Man, Jersey, Kenya, Korea (South), Malawi, Mongolia, Poland, South Africa, Spain, Tajikistan, Tanzania and Uruguay. In addition, in 2014, the Netherlands contacted Bangladesh, Bulgaria, Cyprus, Egypt, Georgia, Ghana, Kyrgyzstan, Moldova, Morocco, New Zealand, Pakistan, Philippines, Russia, Sri Lanka, Uzbekistan, Vietnam, Zambia and Zimbabwe to begin tax treaty negotiations or renegotiate existing treaties.

## A. At a glance

Corporate Income Tax Rate (%)	28
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	28
Withholding Tax (%)	
Nonresidents	
Dividends	30 (a)
Interest	15 (b)
Royalties from Patents, Know-how, etc.	15 (c)
Payments to Contractors	15
Branch Remittance Tax	0
Residents	
Dividends	33 (d)
Interest	33 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) This is a final tax. If dividends are fully imputed (see Section B), the rate is reduced to 15% (for cash dividends) or to 0% (for all non-cash dividends and for cash dividends if nonresident recipients have direct voting interests of at least 10% or if a tax treaty reduces the New Zealand tax rate below 15%). The rate is also reduced to 15% to the extent that the dividends are fully credited under the dividend withholding payment system (which is being phased out) or to the extent that imputation credits are passed on to foreign investors through the payment of supplementary dividends under the foreign investor tax credit regime.
- (b) This is a final tax if the recipient is not associated with the payer. For an associated person, this is a minimum tax (the recipient must report the income on its annual tax return, but it may not obtain a refund if the tax withheld exceeds the tax that would otherwise be payable on its taxable income). Under the Income Tax Act, associated persons include the following:
- Any two companies in which the same persons have a voting interest of at least 50% and, in certain circumstances, a market value interest of at least 50% in each of the companies
  - Two companies that are under the control of the same persons
  - Any company and any other person (other than a company) that has a voting interest of at least 25% and, in certain circumstances, a market value interest of at least 25% in the company
- Interest paid by an approved issuer on a registered security to a non-associated person is subject only to an approved issuer levy (AIL) of 2% of the interest payable. An AIL rate of 0% applies to interest paid on or after 7 May 2012 to nonresidents on certain widely offered and widely held corporate bonds that are denominated in New Zealand currency.
- (c) This is a final tax on royalties relating to literary, dramatic, musical or artistic works. For other royalties, this is a minimum tax.
- (d) See Section B.
- (e) The 33% rate is a default rate if recipients' tax file numbers are not supplied. Individuals may elect rates of 10.5% (if their expected annual income does not exceed NZD14,000), 17.5%, 30% or 33%. The basic rate for interest paid to companies is 28%, but companies may elect a 33% rate.

## B. Taxes on corporate income and gains

**Income tax.** Resident companies are subject to income tax on worldwide taxable income. Nonresident companies carrying on business through a branch pay tax only on New Zealand-source income.

A company is resident in New Zealand if it is incorporated in New Zealand, if it has its head office or center of management in New Zealand or if director control is exercised in New Zealand.

**Rate of income tax.** Resident and nonresident companies are subject to tax at a rate of 28%.

**Capital gains.** No capital gains tax is levied in New Zealand. However, residents may be taxed on capital gains derived from many types of financial arrangements and from certain real and personal property transactions. These gains are subject to tax at the standard corporate tax rate.

**Administration.** The income year is from 1 April to 31 March. A company with an accounting period that ends on a date other than 31 March may apply to the Commissioner of Inland Revenue for permission to adopt an income year that corresponds to its accounting period. If the Commissioner approves an alternative income year, income derived during that year is deemed to have been derived during the year ending on the nearest 31 March. For this purpose, year-ends up to 30 September are deemed to be nearest the preceding 31 March, and year-ends after 30 September are deemed to be nearest the following 31 March.

Companies with year-ends from 1 April to 30 September must file tax returns by the seventh day of the fourth month following the end of their income year. All other companies must file their returns by 7 July following the end of their income year.

Provisional tax payments must generally be made in the fifth, ninth and thirteenth months after the beginning of the company's income year. The first installment equals one-third of the provisional tax payable; the second installment equals two-thirds of the provisional tax payable, less the amount of the first installment; and the balance of the provisional tax is payable in the third installment. In general, the provisional tax payable in a year equals 105% of the income tax payable in the preceding year. Companies that are registered for Goods and Services Tax (GST; see Section D) that meet certain criteria may elect to calculate their provisional tax under a GST ratio method and pay the provisional tax in installments when they file their GST returns, generally every two months.

Companies with year-ends from October to January must pay terminal tax by the seventh day of the eleventh month following the end of the income year. Companies with a February year-end must pay terminal tax by the fifteenth day of the following January. All other companies must pay terminal tax by the seventh day of February following the end of their income year. The date for payment of terminal tax may be extended by two months if the company has a tax agent.

Several measures impose interest and penalties on late payments of income tax. For late payments or underpayments, the basic penalty equals 5% of the unpaid tax. This penalty is reduced to 1% if the tax is paid within a week after the due date. An additional penalty of 1% of the unpaid balance, compounding monthly, is also imposed. Interest may be payable if provisional tax paid at each installment date is less than the relevant proportion (generally, one-third for the first installment date, two-thirds for the second installment date and three-thirds for the third installment date) of the final income tax payable for the year. Conversely, interest may be credited on overpaid provisional tax.

Interest charges and the risk of penalties with respect to provisional tax may be reduced if provisional tax is paid under a tax-pooling arrangement through a Revenue-approved intermediary.

The risk of interest and penalties is minimized for companies that use the GST ratio method for calculating and paying their provisional tax.

## **Dividends**

*Exempt income.* Dividends received by New Zealand resident companies from other New Zealand resident companies are taxable. However, dividends received from wholly owned subsidiaries resident in New Zealand are exempt. Dividends received by New Zealand resident companies from nonresident companies are generally exempt. However, as a result of changes applying for taxpayers' income years beginning on or after 1 July 2009, certain dividends received by New Zealand resident companies from nonresident companies are taxable, including the following:

- Dividends that are directly or indirectly deductible overseas
- Dividends on certain fixed-rate shares
- For income years beginning on or after 1 July 2011, dividends derived by Portfolio Investment Entities (PIEs; see Section E)
- Dividends relating to certain portfolio (less than 10%) investments that are exempt from income attribution under the foreign investment fund regime (see Section E)

*Imputation system.* New Zealand's dividend imputation system enables a resident company to allocate to dividends paid to shareholders a credit for tax paid by the company. The allocation of credits is not obligatory. However, if a credit is allocated, the maximum credit is based on the current corporate income tax rate. Based on the current corporate income tax rate of 28%, the maximum credit is 28/72, meaning that a dividend of NZD72 may have an imputation credit attached of up to NZD28.

The imputation credits described above may not be used to offset nonresident withholding tax on dividends paid to nonresidents. However, effective from 1 February 2010, they may allow nonresident withholding tax to be reduced to 0% for all non-cash dividends and for cash dividends if nonresident recipients hold direct voting interests of at least 10% or if a tax treaty reduces the tax rate below 15%. A New Zealand company may pass on the benefit of such credits to other nonresident investors through payments of supplementary dividends. The aim of this mechanism is to allow nonresident investors to claim a full tax credit in their home countries for New Zealand nonresident withholding tax. The New Zealand company may also claim a partial refund or credit with respect to its own New Zealand company tax liability. Effective from 1 February 2010, payment of supplementary dividends can generally be made only to nonresident companies and individuals who hold direct voting interests of less than 10% and who are subject to a tax rate of at least 15% after any tax treaty relief. Effective from the 2013-14 income year, supplementary dividends can also be paid with respect to qualifying nonresident investors in certain portfolio investment entities (PIEs) that invest in assets outside New Zealand.

Australian resident companies may also elect to maintain a New Zealand imputation credit account and collect imputation credits

for income tax paid in New Zealand. New Zealand shareholders in an Australian resident company that maintains such an imputation credit account and attaches imputation credits to dividends can receive a proportion of the New Zealand imputation credits equal to their proportion of shareholding in the Australian company. Imputation credits must be allocated proportionately to all shareholders.

In general, the carryforward of excess credits for subsequent distribution must satisfy a 66% continuity-of-shareholding test. Interests held by companies or nominees are generally traced through to the ultimate shareholders. Listed, widely held companies and limited attribution foreign companies are entitled to special treatment. In effect, they are treated as the ultimate shareholder if their voting interest in other companies is less than 50% or if the actual ultimate shareholders would each have voting interests of less than 10% in the underlying company. The definition of a listed company includes companies listed on any exchange in the world that is recognized by the Commissioner of Inland Revenue. For carryforward purposes, direct voting or market value interests of less than 10% may be considered to be held by a single notional person, unless such an interest is held by a company associated with the company that has the carryforward.

*Foreign dividend payments.* The foreign dividend payment system was previously called the dividend withholding payment system. Under the foreign dividend payment system, dividends received by a resident company from a nonresident up to the end of their 2008-09 or 2009-10 income year (depending on their year-end date) were subject to a 30% (33% until the end of the 2007-08 income year) foreign dividend payment to be made by the recipient to the Inland Revenue Department.

Companies with foreign dividend payment credits may pass the benefit of the payments to the shareholder by way of a credit attaching to dividends paid by the company. The credit may be available under either the imputation system or the foreign dividend payment system. The unused portion of a foreign dividend payment credit can be refunded to the shareholder, but an excess imputation credit is not refundable.

In accordance with changes enacted in October 2009, the foreign dividend payment system is being phased out. New Zealand resident companies are no longer required to make foreign dividend payments to the Inland Revenue Department on dividends received. Companies may continue attaching credits to dividends paid to pass on the benefit of previous foreign dividend payments.

*Resident withholding tax.* For dividends paid to a resident company by another resident company that is not in a tax group with the recipient, the payer must deduct a withholding tax equal to 33%, having first allowed for any imputation credits attached to the dividend, unless the recipient holds an exemption certificate. This rate has not been reduced to align with the reduced corporate income tax rate of 28%, but any excess tax can be used as tax credits during or refunded through the annual income tax return process.

**Foreign tax relief.** In general, any tax paid outside New Zealand by a New Zealand resident taxpayer can be claimed as a credit

against the tax payable in New Zealand. The credit is limited to the amount of New Zealand tax payable on that income.

### C. Determination of trading income

**General.** Assessable income consists of all profits or gains derived from any business activity, including the sale of goods and services, commissions, rents, royalties, interest and dividends.

A gross approach applies to the calculation of taxable income. Under this approach, a company calculates its gross assessable income and then subtracts its allowable deductions to determine its net income or loss. If the company has net income, it subtracts any loss carryforwards or group losses to determine its taxable income.

To be deductible, expenses must generally be incurred in deriving gross income or necessarily incurred in carrying on a business for the purpose of deriving gross income. Interest is now generally deductible for most New Zealand resident companies, subject only to the thin-capitalization rules (see Section E). Effective from taxpayers' income years beginning on or after 1 July 2009, interest paid on certain debts that are stapled to shares on or after 25 February 2008 may be treated as nondeductible dividends. Substituting debentures, which have been treated as equity for income tax purposes, will generally be treated as debt, effective from 1 April 2015. Related interest will then be taxable and deductible as interest instead of being treated as dividends.

Deductions for certain business entertainment expenses are limited to 50% of the expenses incurred. Capital expenditures are generally not deductible.

**Exempt income.** The only major categories of exempt income are dividends received from a wholly owned subsidiary resident in New Zealand, certain dividends received from nonresident companies and certain dividends paid out of capital gains derived from arm's-length sales of fixed assets and investments on winding up.

A specific exemption applies until 31 December 2019 for income derived by nonresident companies from certain oil and gas drilling and related seismic survey vessel activities in New Zealand's offshore permit areas.

**Inventories.** Stock in trade must generally be valued at cost. Market selling value may be used (but not for shares or "excepted financial arrangements") if it is lower than cost. Cost is determined by reference to generally accepted accounting principles, adjusted for variances between budgeted and actual costs incurred. Simplified rules apply to "small taxpayers," which are those with annual turnover of NZD3 million or less. A further concession applies to taxpayers with annual turnover of NZD1,300,000 or less and closing inventory of less than NZD10,000.

**Depreciation.** The depreciation regime generally allows a deduction for depreciation of property, including certain intangible property, used in the production of assessable income. Depreciation cannot be claimed for income tax purposes on buildings with useful lives estimated by the Commissioner of Inland Revenue to

be at least 50 years, effective from taxpayers' 2011-12 income years. Depreciation may continue to be claimed on commercial building fit-outs, certain depreciable land improvements and structures other than 50-year buildings. Most assets can be depreciated using the straight-line or the declining-balance methods. For assets valued at less than NZD2,000, a taxpayer may elect to pool the assets and apply the pool-depreciation method. Under the pool-depreciation method, the lowest rate applicable to any asset in the pool is used to depreciate all assets in the pool. A taxpayer may have more than one pool of assets. Assets in a pool must be used for business purposes only or be subject to Fringe Benefit Tax (see Section D) to the extent the assets are not used for business purposes. Buildings may not be pooled. Property costing NZD500 or less may generally be written off immediately.

Assets, other than intangible property, acquired before 1 April 1993 are depreciated at the rates provided under the prior depreciation regime.

A transitional system applies to assets, including certain intangible property, acquired from 1 April 1993 through the end of the taxpayer's 1994-95 income year (the income year ending nearest to 31 March 1995). Under the transitional system, a taxpayer could elect to use the depreciation rates under the prior regime or the economic depreciation rates set by the Commissioner of Inland Revenue, which are based on the effective useful life of an asset.

Assets acquired in a taxpayer's 1995-96 or subsequent income year must be depreciated using economic depreciation rates. In general, most of these assets, other than buildings and used imported motor cars, qualified for a 20% loading on the applicable depreciation rates for the 1995-96 and subsequent income years, if the assets were not previously used in New Zealand and if they were acquired by 20 May 2010. In certain circumstances, a taxpayer may apply for a special depreciation rate. The formula for setting depreciation rates has changed for the 2005-06 income year and subsequent years, resulting in increased rates for most plant and equipment acquired on or after 1 April 2005, and reduced rates for buildings acquired on or after 19 May 2005. The following table provides some of the general straight-line and declining-balance depreciation rates applicable to assets acquired between the 1995-96 and 2004-05 income years and assets acquired in the 2005-06 and subsequent income years, before the addition of any loading.

Asset	Method			
	Declining-balance		Straight-line	
	1995-96 to 2004-05 Rate (%)	From 2005-06 Rate (%)	1995-96 to 2004-05 Rate (%)	From 2005-06 Rate (%)
Buildings*	4	3	3	2
Chairs (office)	15	16	10	10.5
Computers and software	40	50	30	40
Desks	12	13	8	8.5
Filing cabinets	12	13	8	8.5
Motor vehicles	15 to 40	16 to 50	10 to 30	10.5 to 40
Photocopiers	33	40	24	30

\* Effective from taxpayers' 2011-12 income years, no tax depreciation can be claimed on buildings with useful lives estimated by the Commissioner to be at least 50 years, regardless of the date of acquisition of the building.

The rates for plant and machinery vary depending on the particular industry and type of plant and machinery.

Tax depreciation is generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Amounts recaptured are generally included in assessable income in the earliest year in which the disposal consideration can be reasonably estimated. If sales proceeds are less than the tax value after depreciation, the difference may generally be deducted as a loss in the year of disposal. However, such losses on buildings are deductible only if they occur as a result of natural disasters or other events outside the taxpayer's control. Specific rules have been introduced to provide some deferral and rollover relief with respect to irreparable damage arising from the 2010-11 Canterbury earthquakes, and related insurance recoveries and replacements.

**Special deductions.** A few special deductions designed to achieve specific government objectives are available, such as certain deductions relating to petroleum, mining, forestry and agricultural activities. Some concessionary provisions relating to exploring for and mining certain minerals (including gold and silver) have been repealed and new rules introduced for income and expense recognition, effective from taxpayers' 2014-15 income years. Transitional provisions allow the add-back of previous concessionary deductions for anticipated expenditure to be spread over the 2014-15 and 2015-16 income years.

**Trading losses.** Trading losses may be carried forward and offset against future taxable income if, at all times from the beginning of the year of loss to the end of the year of offset, a group of persons held aggregate minimum voting interests in the company and, in certain circumstances, minimum market value interests of at least 49%.

**Group losses.** Losses incurred within a group of companies may be offset against other group company profits either by election or subvention payments.

Subvention payments are intercorporate payments specifically made to effect the transfer of company losses. They are treated as deductions to the paying (profit) company and as taxable income to the recipient (loss) company. The loss company and the profit-making company must be in the same group of companies throughout the relevant period. The required common ownership is 66%.

Wholly owned corporate groups may elect income tax consolidation.

**Elective regime for closely held companies.** Look-through companies with five or fewer shareholders may elect to be taxed similarly to partnerships. However, reforms enacted following the May 2010 budget restrict shareholders' ability to claim losses, effective from their 2011-12 income years.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST), similar to a value-added tax, levied on the supply of goods and services and on imports	15
Fringe Benefit Tax (FBT); paid by the employer on the value of fringe benefits provided to employees and on non-cash dividends distributed to shareholder-employees (If benefits are attributable to particular employees, employers may elect to calculate FBT on the attributable benefits at a range of rates between 11.73% and 49.25%. The rates vary depending on the employee's cash remuneration inclusive of the fringe benefits. Unattributed benefits provided to such employees are subject to FBT at a rate of 42.86% [49.25% if provided to major shareholder-employees]. As a further alternative, employers may pay FBT at a rate of 49.25% on attributed benefits and 42.86% on unattributed benefits [49.25% if provided to major shareholder-employees].)	49.25
Accident compensation levy, on gross salaries and wages, paid by Employer; rate (before residual and health and safety elements) varies according to industry class and may be reduced if the employer meets certain work safety criteria; certain employers may take direct responsibility under full self-cover or partnership discount plans	0.02 to 4.81
Employee Self-employed; rate (before residual and health and safety elements) varies according to industry class, incorporating income and non-income benefit portions (the calculation of which depends on the individual's earnings) and according to age and abatement factors if a guaranteed amount of weekly compensation is purchased	1.45
	0.02 to 4.81

## E. Miscellaneous matters

**Anti-avoidance legislation.** Legislation permits the Inland Revenue Department to void any arrangement made or entered into if tax avoidance is one of the purposes or effects of the arrangement and is not merely incidental.

**Branch-equivalent system.** Under the branch-equivalent system of taxation, New Zealand residents that have interests in the income of a controlled foreign company (CFC) may be taxed on attributed income as if the CFC is a branch of a New Zealand resident company. A CFC is a foreign company under the control of five or fewer New Zealand residents or a group of New Zealand resident directors. In general, for the purposes of the CFC rules, control is more than 50% ownership. A New Zealand resident with an income interest greater than 10% is required to calculate and include in income the attributed foreign income or loss of the CFC unless the CFC is resident in Australia and meets certain criteria or the active-income exemption applies. Branch-equivalent losses are quarantined.

No attribution is required under the CFC rules if passive income is less than 5% of the CFC's or a relevant group's income. If the 5% threshold is exceeded, any attribution is limited to passive income. The rules defining passive income and calculating the percentage of a CFC's passive income in relation to total income are complex.

**Foreign investment fund system.** New Zealand has a foreign investment fund (FIF) system that aims to tax the change in value of a New Zealand resident's interest in the FIF over an income year. The change in value may include income, capital growth and any exchange fluctuation.

The FIF regime generally applies to all offshore investments that are not CFC interests, including interests in foreign companies, foreign unit trusts, foreign life insurance, and foreign savings and superannuation funds.

The FIF rules do not apply to individuals owning FIF interests that cost less than NZD50,000. Exemptions are also provided for certain employment-related foreign superannuation schemes and foreign private annuities and pensions as well as for the first four years that individuals who become resident in New Zealand hold interests in foreign life insurance funds and superannuation schemes, if the individuals held these interests before they became resident in New Zealand. Superannuation scheme interests acquired by individuals before becoming resident in New Zealand have generally been removed from the FIF regime, effective from 1 April 2014.

As a result of reforms to the FIF rules, which generally apply for the 2007-08 and subsequent income years, a general exclusion of interests in grey list country companies no longer exists. Interests in certain Australian listed companies and unit trusts, certain venture capital investments in grey list country companies and shares held under certain employee share schemes may be excluded from the FIF rules if statutory criteria are met. The grey list countries are Australia, Canada, Germany, Japan, Norway, Spain, the United Kingdom and the United States.

Initially, the four permissible methods for calculating FIF income were a branch-equivalent method, a deemed rate of return method, a comparison of opening and closing values, and a method based on accounting profits. Effective from the 2007-08 income year, two other alternatives could generally be used if the FIF interest held was less than 10%. These two methods were the 5% fair dividend rate method and the cost method.

An "active business" and "active income" exemption for FIF interests in companies of at least 10% replaced the previous grey list country exemption for income years beginning on or after 1 July 2011. An exemption is retained for FIF interests of at least 10% in Australian companies. Application of the outbound thin-capitalization rules (see *Debt-to-equity ratios*) is extended to residents with interests of at least 10% in FIFs that are exempt from attribution of FIF income under the Australian FIF exemption and to cases in which the "active income" method is used. The branch-equivalent and accounting profits methods are no longer available for taxpayers' income years beginning on or after

1 July 2011, and use of the deemed rate of return method is more restricted. The 5% fair dividend rate method is the general default method if taxpayers with FIF interests of at least 10% do not have sufficient information, or do not want, to use the “active income” method to determine exempt or non-exempt status or to calculate any attributable FIF income.

**Portfolio investment entities.** Certain collective-investment entities that elect to be in the Portfolio Investment Entity (PIE) regime are not taxable on gains on the disposal of New Zealand and certain Australian shares. In addition, their income may generally be taxed at the corporate tax rate or at rates approximating their individual investors’ marginal tax rates (which may be 0% for non-resident investors in certain types of PIEs that invest wholly or partly in assets outside New Zealand).

**Transfer pricing.** The transfer-pricing regime in New Zealand is aimed primarily at cross-border arrangements between associated parties. Taxpayers are able to adopt the method that produces the most reliable measure of arm’s-length consideration. The allowable methods are the comparable uncontrolled price method, the resale price method, the cost-plus method, the profit-split method and the comparable profits method. Binding rulings with respect to transfer-pricing issues are available from the Commissioner of Inland Revenue. New Zealand and countries with which New Zealand has concluded tax treaties may enter into multilateral advance pricing agreements under the transfer-pricing regime.

**Debt-to-equity ratios.** In conjunction with the transfer-pricing regime (see *Transfer pricing*), a thin-capitalization regime applies to New Zealand entities that are at least 50% owned or controlled by a single nonresident (however, interests held by persons associated with a nonresident may be included for the purpose of determining the nonresident’s level of control). Effective from taxpayers’ 2015-16 income years, the scope of the inbound thin-capitalization rules is extended to apply also to the following:

- New Zealand companies that are at least 50% owned or controlled by two or more non-associated nonresident investors if they are regarded as acting together with respect to the debt funding of the New Zealand entities
- Certain trusts and trust-controlled companies if at least 50% of the value of trust settlements have been made by a nonresident or by nonresidents acting together or if entities otherwise subject to the rules have general powers to appoint or remove trustees

The inbound thin-capitalization regime generally denies interest deductions to the extent that the New Zealand entity’s level of interest-bearing debt exceeds both a safe harbor debt to total assets ratio of 60% and 110% of the ratio of interest-bearing debt to total assets of the entity’s worldwide group. A netting rule excludes borrowings that are in turn loaned to the following:

- Nonresidents that are not carrying on business in New Zealand through a fixed establishment
- Non-associated persons
- Associates that are subject to the thin-capitalization regime but are not in the lender’s New Zealand group

Specific rules and thresholds apply to registered banks.

As a result of changes enacted in October 2009 for thin-capitalization purposes, certain stapled debt securities and fixed-rate shares are included as debt. Investments in CFCs and interests of at least 10% in FIFs may be excluded from assets.

For income years beginning on or after 1 July 2009, dividend amounts paid on certain fixed-rate shares may also be added back when interest deductions are limited under the thin-capitalization rules.

Other changes applying from taxpayers' 2015-16 income years include the following:

- Asset revaluation amounts that arise from associated party transactions in the 2015-16 income year or a subsequent income year are generally excluded from asset values in calculating New Zealand group debt percentages unless the revaluations could have been recognized, without a transaction, under generally accepted accounting practices or unless the revaluations arise from a restructuring following acquisition of the company by a non-associated party.
- Certain related-party debt is excluded from the debt amounts used in calculating worldwide group debt percentages in inbound situations.
- Changes are made to the complex New Zealand and worldwide group membership rules.

Similar thin-capitalization rules are extended to New Zealand residents with income interests in CFCs, effective from their income years beginning on or after 1 July 2009. For income years beginning on or after 1 July 2011, the outbound thin-capitalization rules are extended to New Zealand residents with interests in FIFs of at least 10% that are subject to the new "active income" method or Australian exemptions from FIF income attribution.

Under safe harbor rules, the outbound thin-capitalization rules do not limit interest deductions on outbound investment if the New Zealand group debt percentage does not exceed 75% and 110% of the worldwide group debt percentage. Additional exemptions with respect to outbound investment may apply in certain circumstances, including situations in which New Zealand group assets (generally excluding CFC investments and certain interests of at least 10% in FIFs) are at least 90% of the worldwide group assets. An alternative safe harbor threshold calculation based on an interest-to-net income ratio may be used in limited outbound circumstances. The apportionment calculation provides an effective exemption with respect to outbound investment by eliminating any adjustment if annual New Zealand group finance costs are below NZD1 million and provides relief on a tapering basis if those annual finance costs are between NZD1 million and NZD2 million.

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

- (a) Interest paid to a contracting state or subdivision, to certain state financial institutions or with respect to certain state-guaranteed loans may be exempt.
- (b) These rates apply to payments of dividends, interest and royalties, effective from 1 January 2014.
- (c) The rate is reduced to 10% for bank interest. Interest paid to certain government bodies or central banks may be exempt.
- (d) See applicable footnotes to Section A.
- (e) The rate is 10% for interest paid to banks and insurance companies.
- (f) The rate is 10% for interest paid to financial institutions, including insurance companies, or if the interest relates to arm's-length sales on credit of equipment, merchandise or services. Interest paid to certain institutions of the government or the central bank is exempt.
- (g) The 10% rate applies to payments for the use of copyrights, industrial, scientific or commercial equipment, films, tapes or other broadcast matter. The 15% rate applies to other royalties.
- (h) In August 2011, this rate was reduced from 10% with retrospective effect from 1 May 2010.
- (i) The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria.
- (j) No tax applies to interest paid to government bodies or to unrelated financial institutions in certain circumstances.

- (k) The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria. Dividends paid to certain government institutions are exempt.
- (l) The rate may be reduced to 5% for dividends paid to companies that have an interest of at least 10% in the payer.
- (m) Interest paid to certain government institutions may be exempt.
- (n) A new treaty was signed with Canada on 3 May 2012, but it is not yet in force. It reduces the tax rates applicable to dividends (0% for certain government bodies if the competent authorities so agree; 5% if paid to companies holding at least 10% of the voting power; otherwise, 15%), interest (0% for loans made by certain export development bodies or unrelated financial institutions; otherwise, 10%) and royalties (5% on certain copyright, cultural, software and patent royalties; otherwise, 10%).
- (o) The rate may be reduced to 5% if the dividends are paid to companies that have an interest of at least 25% in the payer and if the dividends are exempt in the recipient's country.
- (p) The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria. The reduced rates were announced in August 2011 and apply retrospectively, effective from 1 May 2010.
- (q) The rate may be reduced to 0% for dividends paid to company shareholders, depending on the shareholders' level of ownership and certain other criteria.
- (r) A minimum rate of 15% applies to interest paid to certain associated persons.
- (s) These rates apply to payments of dividends, interest and royalties, effective from 1 January 2015.
- (t) The 5% rate applies if the dividends are paid to companies that directly hold at least 50% of the voting power in the payer.

New Zealand has also signed protocols to its tax treaties with Belgium, Canada and Malaysia, but those protocols have not yet entered into force.

New Zealand has signed and ratified the multilateral Convention on Mutual Administrative Assistance in Tax Matters, which enters into force for New Zealand on 1 March 2014. It has entered into an agreement with the United States with respect to reporting requirements for financial institutions under the US Foreign Account Tax Compliance Act.

New Zealand has entered into tax information exchange agreements with Cayman Islands, Cook Islands, Curaçao, Gibraltar, Guernsey, Isle of Man, Jersey, Netherlands Antilles, Niue, Samoa and Sint Maarten. It has also entered into tax information exchange agreements that are not yet in force with Anguilla, Bahamas, Bermuda, British Virgin Islands, Dominica, Marshall Islands, St. Kitts and Nevis, St. Vincent and the Grenadines, Turks and Caicos Islands, and Vanuatu.

- (a) This withholding tax applies to residents and nonresidents.  
 (b) For income derived from real estate property, the tax base equals the net income after applying a deduction of 30% of the gross income.  
 (c) This withholding tax is creditable against income for residents and final for nonresidents.  
 (d) Transactions with tax havens are subject to a 17% withholding tax. However, the list identifying such tax havens has not yet been issued.

**B. Taxes on corporate income and gains**

**Corporate income tax.** The Nicaraguan tax system is based on an extended territorial principle. The following items are subject to corporate income tax:

- Income from business activities
- Income from capital income, capital gains and capital losses

**Corporate income tax rates.** The standard corporate tax rate is 30% of taxable income.

Companies operating under certain special incentive regimes, such as Free Trade Zone companies, are exempt from income tax.

After the third year of operations, companies are subject to tax on their Nicaraguan-source income, which equals the higher of the following:

- 30% of net taxable income
- 1% of gross taxable income (income subject to withholding at source is not included in the tax base)

Certain exceptions may be stated in the law.

**Capital gains.** Capital gains are realized gains resulting from the transfer of immovable and movable assets, goods and rights of the taxpayer. The following are the capital gain tax rates:

- Transfer of assets entrusted: 5%
- Other capital gains derived by residents and nonresidents: 10%

An advance payment is required on the transfer of property subject to public registration. This payment ranges from 1% to 4% of the transfer value. It is creditable against the capital gains tax.

**Administration.** The statutory tax year runs from 1 January through 31 December. However, taxpayers may request a special fiscal year.

Annual income tax returns must be filed within three months after the end of the tax year.

Companies must make monthly advance payments for purposes of income tax equal to 1% of their monthly gross income. The advance payments are applied to the annual income tax liability. In addition, for large collectors of the excise tax and financial institutions supervised by the Superintendent of Banks and Other Financial Institutions, the minimum monthly payment is the greater of 30% of monthly profits and 1% of gross monthly income. The advance payments are applied to the annual income tax liability.

**Dividends.** A 10% withholding tax is imposed on dividends paid to resident and nonresident individuals and business entities.

**Foreign tax relief.** Foreign taxes may not be claimed as a tax credit in Nicaragua. A deduction for foreign taxes paid with respect to the production of Nicaraguan-source income is available if the general deductibility requirements are met.

### C. Determination of trading income

**General.** Taxable income is calculated in accordance with generally accepted accounting principles (GAAP) or International Financial Reporting Standards (IFRS), subject to adjustments required by the Nicaraguan income tax law.

In general, taxable income includes Nicaraguan-source income derived from goods, services, assets, rights and any other economic activity in Nicaragua, even if such income is accrued or realized abroad, and regardless of whether the taxpayer has physical presence in the country.

Allowable deductions generally include all expenses necessary to generate taxable income.

Expenses paid or credited by a resident taxpayer or a permanent establishment of a nonresident to a person or entity resident in a tax haven are subject to a final withholding tax rate of 17%.

**Inventories.** If inventories are a significant element in the determination of a company's taxable income, the company must value each item based on the lower of the acquisition cost or market price. The law allows companies to use the weighted-average cost, first-in, first-out (FIFO) or last-in, first-out (LIFO) methods to determine the cost of merchandise sold. The tax administration may authorize other methods.

**Provisions.** In general, companies may deduct 2% of the balance of accounts receivable from customers.

Banks may deduct increases in minimum reserves for debtors in accordance with the standards of the Superintendent of Banks in Nicaragua.

**Tax depreciation.** Regulations under the income tax law allow the use of the straight-line method to calculate depreciation. However, the tax authorities may authorize certain exporters to use accelerated depreciation methods. The regulations containing the applicable straight-line rates are pending.

**Relief for losses.** Companies may carry forward their net operating losses for three years to offset all types of income. Net operating losses may not be carried back.

**Groups of companies.** Nicaraguan law does not allow consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	15
Municipal taxes	
Monthly tax on gross income	1
Annual municipal registration tax; tax base equals one-third of the gross income for the last three months of the preceding tax year	2
Real estate tax; imposed on 80% of the appraised value of the property	1
Payroll taxes; paid by employers (average rate)	18

## E. Foreign-exchange controls

The Nicaraguan currency is the córdoba oro (NIO). As of 10 November 2014, the exchange rate for the córdoba oro against the US dollar was NIO26.627 = USD1.

No restrictions apply to foreign-trade operations or to foreign-currency transactions.

## F. Tax treaties

Nicaragua has not entered into any income tax treaties with other foreign countries.

**A. At a glance**

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	10
Withholding Tax (%) (a)	
Investment Income (b)	
Dividends	10 (c)
Interest	10 (d)
Rental Income	10
Royalties	10
Building, Construction and Related Activities	5
Contract for Supplies	5
Consulting, Management and Technical Services	10
Commissions	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

(a) Applicable to residents and nonresidents.

(b) For nonresidents, these are final taxes. For resident companies, only the withholding tax on dividends is a final tax.

(c) Certain dividends are exempt (see Section B).

(d) Certain interest is exempt (see Section C).

(e) Insurance companies may carry forward losses for only four years.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Resident companies are subject to tax on their worldwide profits. Nonresident companies are taxed on the profits of their operations in Nigeria only. However, if a nonresident company performs a contract for survey, deliveries, installation or construction, the entire contract price is taxable in Nigeria, regardless of whether a portion of the contract is performed outside Nigeria. Assessable profits from all sources accruing in the accounting period are aggregated for tax purposes. Total profit on which tax is assessed is calculated by deducting capital allowances (tax depreciation) from the aggregate of assessable profits.

A company is resident in Nigeria if it is incorporated in Nigeria. A foreign company that intends to carry on a trade or business in Nigeria is required by the Companies and Allied Matters Act to incorporate a Nigerian company.

**Rates of corporate tax**

*Corporate income tax.* The corporate income tax rate is 30%. However, tax is assessed at a reduced rate of 20% for a Nigerian company's first five tax years if it is engaged in manufacturing or agricultural production or in the mining of solid materials, and if its turnover (gross sales) is under NGN1 million.

*Tax holidays.* Limited liability companies registered in Nigeria may apply for pioneer status, which is granted to companies in industries that are considered vital to Nigeria's economic development. A company with pioneer status is granted a tax holiday of up to three years, with a possible extension for two years.

Approved enterprises operating in export free-trade zones are exempt from all federal, state and local government taxes, levies and rates. New export-oriented companies located outside free-trade zones may qualify for a three-year tax holiday if they satisfy certain conditions. Under the Companies Income Tax (Amendment)

Act of 2007, the exempt profit list also includes the profit of a company established in an Export-Processing Zone (EPZ) or Free-Trade Zone (FTZ) that exports 100% of its production.

New companies engaged in the mining of solid minerals also benefit from a tax holiday during their first three years of operations. Under the Mining and Minerals Act 2007, the tax holiday can be extended for two years.

*Oil and gas companies.* Companies engaged in the marketing and distribution of gas for domestic and industrial use are subject to the Companies Income Tax Act.

Beginning on the date on which they begin production, companies engaged in gas utilization (downstream operations), which is the marketing and distribution of gas for domestic and industrial use, and companies using gas in industrial projects benefit from an initial three-year tax holiday. This tax holiday is renewable for an additional two years after the tax holiday expires if the company is performing satisfactorily. The companies also benefit from accelerated capital allowances after the tax-holiday period. These allowances consist of the following:

- An annual allowance of 90% with a 10% retention for investment in plant and machinery
- An additional 15% investment allowance, which does not reduce the cost of the asset for the purposes of calculating the annual allowance

All expenditure necessarily incurred to separate gas from the reservoir (underground rock formation containing crude oil or gas), to convert it into usable product and to deliver gas to points of use is considered part of the capital investment for oil field development, which may be charged against profits.

A gas-flaring penalty is imposed on oil companies for wasteful disposals of gases through burning in oil fields and refineries.

Companies engaged in gas exploration are subject to the Companies Income Tax Act.

Companies engaged in petroleum operations are deemed to be in the upstream sector of the oil and gas sector and are subject to tax under the Petroleum Profit Tax Act. The applicable Petroleum Profit Tax rate is 85%. A reduced rate of 65.75% applies if certain conditions are met. However, for petroleum operations carried out under the production-sharing contract regime, the applicable rate is 50%.

*Minimum tax.* Companies are required to pay minimum corporate tax if the minimum tax is greater than their actual tax liability. If a company's turnover is NGN500,000 or less, the minimum tax is the highest of the following:

- 0.5% of gross profit
- 0.5% of net assets
- 0.25% of paid-up capital
- 0.25% of turnover

If turnover is higher than NGN500,000, the minimum tax equals the amount computed in the preceding paragraph plus 0.125% of the turnover exceeding NGN500,000.

The minimum tax does not apply to companies until the fifth year after the commencement of business. Companies engaged in an agricultural trade or business and companies with at least 25% imported equity capital are exempt from the minimum tax requirement.

*Withholding tax.* The withholding tax rate on dividends and interest for residents and for recipients in non-treaty countries is generally 10%. However, certain dividends are exempt from tax (see *Dividends*). Taxable interest income includes interest on all time deposits with banks and on savings passbook accounts of NGN50,000 and above. Certain types of interest income are exempt from tax (see Section C). Tax withheld from dividends and interest accruing to nonresident companies is regarded as a final tax. For resident companies, the withholding tax from dividends is also regarded as a final tax, but they must account for other investment income in their tax returns and claim credit for tax withheld. Both resident and nonresident companies must include in their tax returns earned income subject to withholding and claim the tax withheld as a credit.

**Special tax reliefs.** Nigeria offers the special types of tax relief described below.

*Employment tax relief.* If, in an assessment period, a company has minimum net employment of 10 employees and if 60% of the employees do not have any form of previous work experience and are within three years of graduating from school or a vocation, the company is granted employment tax relief. This relief is an exemption from income tax equal to 5% of its assessable profits in the assessment period in which the profits are generated, subject to other specified conditions.

*Work Experience Acquisition Programme Relief.* If a company has a minimum net employment of five new employees and if it retains such employees for a minimum of two years from the year of assessment in which the employees are first employed, it is granted Work Experience Acquisition Programme Relief. This relief is an exemption from income tax equal to 5% of the company's assessable profits in the assessment period in which the company qualifies, subject to other specified conditions.

*Infrastructure Tax Relief.* Qualifying companies are granted Infrastructure Tax Relief. This relief equals 30% of the cost incurred in providing infrastructure or facilities of a "public nature," which includes power (electricity), roads, bridges, water and other items. The relief is granted in addition to the usual deductions allowed with respect to the costs incurred under the relevant provisions of the Companies Income Tax Act, and it forms part of the deductible expenses of the company.

**Capital gains.** Capital gains tax is chargeable on the gains accruing from the disposal of all types of assets, including the following:

- Land and buildings
- Options, debts and other property rights
- Any currency other than Nigerian currency
- Any form of property created by the person disposing of it or otherwise coming to be owned without being acquired
- Movable assets (motor vehicles)

For resident companies, disposals of assets located outside Nigeria are taxable regardless of whether gains accruing from such disposals are received in Nigeria. For nonresident companies, only gains accruing in Nigeria are taxable.

Taxable gain is the difference between the consideration accruing on the disposal of an asset and its original cost together with expenses incurred on its disposal.

Any loss incurred on a disposal may not be offset against the gains accruing from the disposal of another asset for the purpose of calculating capital gains tax. However, if assets are sold under a single agreement comprising two or more transactions, the transactions are treated as a single disposal for the purpose of calculating capital gains. Taxable gains are assessed in the year of disposal of an asset. The capital gains tax rate is 10%.

A company may claim rollover relief if the proceeds from the disposal of an asset used in a trade or business are applied within a year before or after the disposal toward the acquisition of a similar asset to be used in the same trade or business.

**Dividends.** Dividends are generally subject to a final 10% withholding tax.

Dividends distributed from pioneer profit (see *Rates of corporate tax*) or from after-tax petroleum profit are exempt from tax.

### **Administration**

*Tax authority.* The Federal Inland Revenue Service (Establishment) Act, which was enacted in 2007, established the Federal Inland Revenue Service (FIRS). The FIRS is responsible for assessing, collecting and accounting for tax revenue accruable to the federal government of Nigeria.

*Filing and tax payment.* The FIRS is responsible for administering and collecting companies' income tax, petroleum profits tax (see Section D) and capital gains tax imposed on companies.

The tax year is from 1 January to 31 December. Under the self-assessment regime modified by the government in December 2011, all companies subject to tax must compute their tax liability, make payment and file their tax return with the FIRS on or before the due date. The due date for filing of the company income tax return is six months after the end of its accounting year or within 18 months after its date of incorporation. A penalty of NGN25,000 is imposed for the first month of lateness in filing a return and NGN5,000 for each subsequent month.

A taxpayer must apply to the tax authority for the making of installment payments. The final installment must be paid not later than the due date. The tax authority may grant approval for three installment payments beginning from the due date such that the last installment is paid not later than two months after the due date. Companies that do not comply with the requirement to file self-assessment returns and pay taxes due on or before the due date are assessed tax based on an administrative assessment issued by the FIRS. These companies may be required to pay their tax liability within two months after the date the assessment notice is served.

A 10% penalty and interest at the prevailing bank lending rate are imposed for late payment of assessed tax.

*Tax refunds.* The reforms to the tax system in Nigeria included the introduction of a tax refund system. After auditing a company's documents, the FIRS determines whether an overpayment was made.

*Excess dividend tax.* If dividends are distributed from profits on which no tax is payable as a result of no taxable profits or taxable profits that are less than the amount of dividends paid, the company paying the dividends is charged to tax on the dividends as if such dividends are the taxable profits of the company for the relevant year of assessment.

**Foreign tax relief.** Foreign tax relief for the avoidance of double taxation is governed by tax treaties with other countries. If foreign tax is paid to a country that does not have a tax treaty with Nigeria, resident companies may claim the foreign tax paid as a tax-deductible expense.

### C. Determination of trading profit

**General.** Taxable income is based on financial statements prepared on commercial principles (that is, International Financial Reporting Standards [IFRS], adopted in 2010). Trading profit is adjusted for deductions not allowed for tax purposes and for profits or gains not subject to tax.

Investment income earned abroad is tax-exempt if it is brought into Nigeria through the Central Bank of Nigeria or through any bank or other corporate body appointed by the Minister of Finance as an authorized dealer.

Interest received by banks on loans with a moratorium of at least 18 months and with an interest rate that is not more than the base lending rate at the time the loan was granted is exempt from tax if the following circumstances exist:

- The loans are granted to agricultural trades or businesses.
- The loans are granted to companies or individuals engaged in the manufacturing of plant and machinery in Nigeria.
- The loans are granted for working capital for any cottage industry established by the company.

Interest on bank loans granted for the manufacturing of goods for export are exempt from tax if certain specified conditions are met.

Interest on foreign loans is exempt from tax in accordance with the following percentages.

Repayment period including moratorium	Grace period	Tax exemption allowed (%)
More than 7 years	Not less than 2 years	100
5 to 7 years	Not less than 18 months	70
2 to 4 years	Not less than 12 months	40
Less than 2 years	None	0

Interest earned by a nonresident company on a deposit account consisting entirely of foreign-currency transfers is exempt from tax. In addition, interest on foreign-currency accounts maintained or operated in Nigeria is exempt from tax.

The following are exempt from income tax, effective from 2 January 2012:

- Trading income derived from short-term federal government securities, such as treasury bills and promissory notes
- Trading income derived from bonds issued by federal, state and local governments and their agencies
- Trading income derived from bonds issued by corporate bodies including supranationals
- Interest earned by holders of the bonds and securities listed above

The exemption is for a period of 10 years with the exception of income derived from bonds issued by the federal government which have an indefinite exemption.

Expenses must be reasonable and incurred wholly, exclusively, necessarily and reasonably for the purpose of the trade or business.

Deductions are not allowed for the following:

- Losses reimbursable under an insurance contract or a contract of indemnity
- Donations made to public bodies and institutions not approved by the government
- Subscriptions to social organizations

Limitations apply to the deductibility of the following:

- Donations to approved bodies and institutions
- Management fees

**Inventory.** The tax law does not prescribe any basis for the valuation of inventory, provided a method is used consistently from year to year. However, subject to certain exceptions stated in the Statement of Accounting Standards issued by the Financial Reporting Council (formerly Nigerian Accounting Standards Board), stocks must be valued at the lower of cost or net realizable value.

### **Tax depreciation (capital allowances)**

*Initial and annual allowances.* Annual allowances are granted under the straight-line method. The company deducts the initial allowance from the asset's cost once in the life of an asset and then applies the annual allowance rate to the balance. The following are rates of initial and annual allowances.

<b>Qualifying expenditure</b>	<b>Initial allowance (%)</b>	<b>Annual allowance (%)</b>
Buildings (industrial and non-industrial)	15	10
Mining Plant	95	Nil
Agricultural production	95	Nil
Others	50	25
Furniture and fittings	25	20
Motor vehicles		
Public transportation	95	Nil
Others	50	25
Plantation equipment	95	Nil
Housing estate	50	25
Ranching and plantation	30	50
Research and development	95	Nil

**Investment allowances.** An investment allowance at a rate of 10% is granted for expenditure incurred on plant and equipment. If the expenditure is for replacement of obsolete industrial plant and equipment, an investment tax credit of 15% is granted. The investment allowance is not taken into account in determining the written-down tax value of the asset. It is granted in addition to the initial allowance.

Initial and annual allowances are recaptured on the sale of an asset if the sales price exceeds the written-down tax value. The amount recaptured may not exceed the initial and capital allowances granted. Amounts recaptured are taxed as ordinary income at the regular corporate tax rates.

**Investment tax relief.** Investment tax relief is similar to the rural investment allowance. It is granted for expenditures on certain infrastructural facilities by companies established at least 20 kilometers (12.4 miles) from such facilities. The following are the types of facilities and the applicable percentages of the relief:

- Electricity: 50%
- Water: 30%
- Tarred road: 15%

The investment tax relief may be claimed for three years. A company that has enjoyed or is enjoying pioneer status (see Section B) may not claim the relief.

Companies engaged in research and development activities may claim a tax credit of 20% of their qualifying capital expenditure.

**Relief for losses.** Trade and business losses may be carried forward to offset profits of the same trade or business for an unlimited number of years. Losses may not be carried back.

**Groups of companies.** Each company must file a separate tax return. No provisions exist for filing consolidated returns or offsetting losses and capital allowances against profits within a group of companies.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, levied on specified goods and services, including goods manufactured or assembled in Nigeria, imported goods, certain bank services and services performed by professionals	5
Education tax, on assessable income; the tax is deductible for purposes of the petroleum profits tax	2
Pension contributions, on monthly gross salary (for pension purposes, gross salary consists of basic pay, housing and transport allowances); paid by	
Employer	10
Employee	8

Nature of tax	Rate (%)
(Expatriates covered by a plan in their home country may qualify for exclusion.) Information technology levy; imposed on before-tax profits of specified companies and enterprises with annual turnover of NGN100 million or more	1

## E. Miscellaneous matters

**Foreign-exchange controls.** Foreign investors that intend to set up businesses in Nigeria must register with the Nigeria Investment Promotion Commission and obtain a Certificate of Capital Importation from authorized foreign-exchange dealers through whom foreign currency is imported. This certificate, which serves as documentary evidence of the importation of the currency, guarantees the unconditional transferability of dividends and interest and the repatriation of capital through authorized dealers.

Companies are free to determine the amount of dividends distributed. Borrowing funds to remit dividends is not allowed. The application to remit dividends must be submitted with the Certificate of Capital Importation and a tax clearance certificate, which establishes that tax was paid or that no tax is due with respect to the dividends to be remitted. If the appropriate amount of tax is withheld from dividends and interest paid to nonresidents, no additional tax clearance is required.

Remittances of royalties and fees require the approval of the underlying agreements by the National Office for Technology Acquisition and Promotion. Permission is granted if the royalties and fees are within certain prescribed limits.

Importation and exportation of the naira (NGN), the Nigerian currency, are regulated.

Exporters must open a local domiciliary bank account marked "Export Proceeds" and must credit their foreign-currency export earnings to this account.

**Anti-avoidance provisions.** Under the general anti-avoidance provisions, if the tax authority determines that a disposition has not in fact had an effect or that a transaction that reduces or would reduce the amount of any tax payable is artificial or fictitious, it may disregard any such disposition or transaction or direct that appropriate adjustments be made to the tax liability. These actions are designed to counteract the reduction of the tax liability that would otherwise result from the transaction. Any company concerned is then assessed accordingly. For this purpose, a disposition includes a trust, grant, covenant, agreement or arrangement.

**Transfer pricing.** Transfer Pricing Regulations, which took effect on 2 August 2012, apply to transactions between connected taxable persons (related parties, as defined in the regulations). Connected taxable persons entering into transactions to which the regulations apply must determine the taxable profits resulting from such transactions in a manner that is consistent with the

arm's-length principle. For purposes of the regulations, a permanent establishment is treated as a separate entity, and a transaction between a permanent establishment and its head office or other connected taxable persons is considered a controlled transaction subject to the regulations. Key provisions of the regulations include those pertaining to the following:

- Entities and transactions to which the regulations apply
- Methods that may be used to determine arm's-length prices
- Documentation that must be maintained to support the arm's-length price and advance pricing agreements

The regulations must be applied in a manner consistent with the arm's-length principle in Article 9 of the United Nations (UN) and Organisation for Economic Co-operation and Development (OECD) Model Tax Conventions on Income and Capital, the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, and the UN Transfer Pricing Manual.

**Debt-to-equity rules.** No tax-related thin-capitalization rules apply in Nigeria.

## F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Belgium	7.5	7.5	7.5
Canada	7.5	7.5	7.5
China	7.5	7.5	7.5
Czech Republic	7.5	7.5	7.5
France	7.5	7.5	7.5
Netherlands	7.5	7.5	7.5
Pakistan	7.5	7.5	7.5
Romania	7.5	7.5	7.5
Slovak Republic	7.5	7.5	7.5
South Africa	7.5	7.5	7.5
United Kingdom	7.5	7.5	7.5
Non-treaty countries	10	10	10

Nigeria has signed double tax treaties with Bulgaria, Mauritius, the Philippines and Poland, but these treaties have not yet been ratified.

Nigeria has begun tax treaty negotiations with Algeria and Tunisia.

## A. At a glance

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	35 (a)
Branch Income Tax Rate (%)	35 (a)
Withholding Tax (%)	
Dividends	30 (a)(b)
Interest	30 (a)(b)(c)
Royalties from Patents, Know-how, etc.	30 (a)(b)
Branch Profits Tax	30 (a)(d)
Net Operating Losses (Years)	
Carryback	2
Carryforward	20 (e)

- (a) Income tax on income sourced within the Northern Marianas that exceeds gross revenue tax on the same income is subject to a rebate. For details, see Section B.
- (b) Imposed on payments to nonresidents. See Section E.
- (c) Bank deposit interest not effectively connected with a trade or business in the Northern Marianas and interest on certain portfolio debt obligations are exempt from withholding tax.
- (d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn.
- (e) No deduction is available for net operating losses arising before 1 January 1985.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporations are subject to a gross revenue tax. In addition, the Commonwealth of the Northern Mariana Islands (CNMI) has adopted the US Internal Revenue Code (IRC)

as its income tax law. For a description of the income taxation of resident corporations doing business in CNMI, refer to the chapter in this book on the United States and substitute “CNMI” for each reference to the “United States.”

To avoid double taxation, a credit against income tax is given for gross revenue tax paid or accrued on income earned within the Northern Marianas. If income tax on Northern Marianas income exceeds the gross revenue tax, the company is entitled to a rebate of specified percentages of the excess. The following are the rebate percentages:

- 90% of the excess up to USD20,000
- 70% of the next USD80,000
- 50% of the excess over USD100,000

Income earned by residents from foreign sources is subject to the full amount of tax under the IRC. A special rule prevents US residents from taking advantage of the rebate by changing their residence to report gains on the sale of US property or stock in US companies on their Northern Marianas tax return.

**Gross revenue tax.** A gross revenue tax is imposed on the gross income of businesses from their activities and investments in the CNMI. The gross revenue tax rates are shown in the following table.

Gross revenue		Rate on total gross income %
Exceeding USD	Not exceeding USD	
0	5,000	0
5,000	50,000	1.5
50,000	100,000	2
100,000	250,000	2.5
250,000	500,000	3
500,000	750,000	4
750,000	—	5

These rates apply to total gross income and are not progressive.

**Tax incentives.** The CNMI, through the Commonwealth Development Authority, is authorized by law to grant tax rebates to qualified investors. The Commonwealth Development Authority grants Qualifying Certificates (QCs) for tax incentives to businesses engaged in activities that are deemed to be beneficial to the development of the CNMI economy. The incentives are aimed primarily at franchise restaurants, water parks, aquariums, cultural centers, theme parks, resort hotels, golf courses, convention centers, dinner theaters, special events, CNMI-based airlines, manufacturing of high-technology products and internet-related businesses. In general, QCs can provide rebates of up to 100% of income tax paid for up to 25 years.

**Basis of qualified fresh-start assets.** Under the Northern Marianas Territorial Income Tax, effective 1 January 1985, income from pre-1985 appreciation of Northern Marianas property is not subject to income tax. For the purposes of determining gain and allowances for depreciation and amortization, the basis of the Northern Marianas real and personal property is the greater of the basis determined under the IRC or the fair-market value as of 1 January 1985. Fair-market value can be established either by

independent appraisal or by discounting the ultimate sales price back to 1 January 1985, using the discount factors specified by regulation. Currently, rates published by the US Internal Revenue Service are used.

**Administration.** Income taxes are paid to the government of the Northern Marianas, which administers its tax system. In general, the administration of the Northern Marianas tax is the same as in the United States, but estimated taxes are due on the last day of the month following the end of each quarter of the tax year. The income tax rebate is not available to reduce estimated tax payments.

**Foreign tax relief.** Foreign tax credits are available in the Northern Marianas to reduce income tax in the same manner as foreign tax credits in the United States. The credits do not reduce gross revenue tax, which is imposed on CNMI-source income only.

### C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Hotel occupancy tax	15%
Bar tax	10%
Excise taxes on all property except school and library books and machinery and raw materials used in manufacturing	Various
Liquid fuel taxes	
Gasoline, diesel and other liquid fuels (refunded if used by commercial vessels outside CNMI)	15 cents a gallon
Aviation fuel (reduced depending on flight schedule)	3%
Social security contributions (including 1.45% Medicare Tax; US system); imposed on Wages up to USD118,500 (for 2015); paid by	
Employer	7.65%
Employee	7.65%
Wages in excess of USD118,500 but not in excess of USD200,000 (for 2015); paid by	
Employer	1.45%
Employee	1.45%

### D. Miscellaneous matters

**Foreign-exchange controls.** CNMI does not impose foreign-exchange controls, but large currency transfers must be reported to the US Treasury Department.

**Transfer pricing.** The US transfer-pricing rules apply in CNMI.

**Debt-to-equity rules.** The US thin-capitalization rules apply in CNMI.

### **E. Treaties and withholding taxes**

CNMI does not participate in the US income tax treaties and has not entered into any treaties with other countries. The withholding tax rate for dividend, interest and royalty payments to nonresidents is 30%, but the rebate discussed in Section B is available if a recipient files a CNMI income tax return. In general, no withholding tax is imposed on payments between CNMI and the United States or Guam, unless the recipient exceeds certain foreign ownership and income limitations.

*Unless otherwise indicated, the rates and thresholds stated in the chapter apply to 2014 income. Certain proposed tax measures for 2015 are also mentioned in the chapter. Changes with respect to the taxation of 2015 income may be introduced with retroactive effect until 31 December 2015.*

**A. At a glance**

Corporate Income Tax Rate (%)	27
Capital Gains Tax Rate (%)	27
Branch Tax Rate (%)	27
Withholding Tax (%)	
Dividends	25 (a)
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (b)
Carryforward	Unlimited

(a) This tax applies to dividends paid to nonresident shareholders. Dividends paid to corporate shareholders that are tax residents and genuinely established in member states of the European Economic Area (EEA) (including the European Union [EU], Iceland and Liechtenstein) are exempt from withholding tax.

(b) See Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** In general, resident companies are subject to corporate income tax on worldwide income. However, profits and losses on upstream petroleum activities in other jurisdictions are exempt from Norwegian taxation. Nonresident companies are subject to corporate income tax on income attributable to Norwegian business operations.

A company is tax resident in Norway if it is legally incorporated in Norway or if its central management and control are effectively exercised in Norway.

**Rates of corporate tax.** For 2014, the corporate tax rate is 27%.

In addition to the general income tax of 27%, a special petroleum tax of 51% applies to income from oil and gas production and from pipeline transportation. A special power production tax of 31% applies on top of the general income tax of 27% for the generation of hydroelectric power.

Qualifying shipping companies may elect a special shipping tax regime instead of the ordinary tax regime. Under the shipping tax regime, profits derived from shipping activities are exempt from income tax. However, companies electing the shipping tax regime must pay an insignificant tonnage excise tax. Financial income is taxed at a rate of 27%.

**Capital gains.** In general, capital gains derived from the disposal of business assets and shares are subject to normal corporate taxes. However, for corporate shareholders, capital gains derived from the sale of shares in limited liability companies, partnerships and certain other enterprises that are qualifying companies under the tax exemption system are exempt from tax. This tax exemption applies regardless of whether the exempted capital gain is derived from a Norwegian or a qualifying non-Norwegian company. In general, life insurance companies and pension funds are not covered by the tax exemption regime.

For companies resident in another EEA member state (the EEA includes the EU, Iceland, Liechtenstein and Norway), the exemption applies regardless of the ownership participation or holding period. However, if the EEA country is regarded as a low-tax jurisdiction (as defined in the Norwegian tax law regarding controlled foreign companies [CFCs]; see Section E), a condition for the exemption is that the EEA resident company be actually established and carrying out genuine economic activities in its home country.

For non-EEA resident companies, the exemption does not apply to capital gains on the alienation of shares in the following companies:

- Companies resident in low-tax jurisdictions, as defined in the Norwegian tax law regarding CFCs; see Section E)
- Companies of which the corporate shareholder has not held at least 10% of the capital and the votes in the company for more than two years preceding the alienation

The right of companies to deduct capital losses on shares is basically eliminated to the same extent that a gain would be exempt from tax.

The exit from Norwegian tax jurisdiction of goods, merchandise, intellectual property, business assets and other items triggers capital gains taxation as if such items were sold at the fair market price on the day before the day of exit. The payment of the exit tax on business assets, financial assets (shares) and liabilities may be deferred until the actual realization of the asset if the taxpayer is tax resident in the EEA. Interest is calculated on the deferred tax amount. If a genuine risk of non-payment of the deferred tax exists, the taxpayer must furnish security for the outstanding tax payable. No deferral of the tax is available for intangible assets and inventory.

The National Budget contained several proposed changes to the Norwegian exit tax rules, which would be effective from 2014. Under the proposed rules, it would not be possible to defer the payment of the exit tax on gains. The principal change would be that exit tax for all types of assets taken out of the Norwegian tax jurisdiction would be payable in equal installments over a period of seven years.

**Administration.** The annual tax return is due 31 March for accounting years ending in the preceding calendar year. The deadline is extended to 31 May if the tax return is submitted electronically. Assessments are made in the fourth quarter of the year in which the return is submitted (normally October). Tax is paid in three installments. The first two are paid on 15 February and 15 April,

respectively, each based on  $\frac{1}{2}$  of the tax due from the previous assessment. The last installment represents the difference between the tax paid and the tax due, and is payable three weeks after the issuance of the assessment. Interest is charged on residual tax.

**Dividends.** An exemption regime with respect to dividends on shares is available to companies. However, the 100% tax exemption is limited to 97% if the recipient of the dividends does not hold more than 90% of the shares in the distributing company and a corresponding part of the votes that may be given at the general meeting (that is, the companies do not constitute a tax group of companies). In such cases, the remaining 3% of the dividends is subject to 27% taxation, which results in an effective tax rate of 0.81%.

The tax exemption applies regardless of the ownership participation or holding period if the payer of the dividends is a resident in an EEA member state. However, if the EEA country is regarded as a low-tax jurisdiction, conditions for the exemption are that the EEA resident company be actually established and carrying out genuine economic activities in its home country and that Norway and the EEA country have a treaty containing exchange-of-information provisions. As of 2014, all of Norway's treaties with EEA countries have such provisions.

For non-EEA resident companies, the exemption does not apply to dividends paid by the following companies:

- Companies resident in low-tax jurisdictions as defined in the Norwegian tax law regarding CFCs (see Section E)
- Other companies of which the recipient of the dividends has not held at least 10% of the capital and the votes of the payer for a period of more than two years that includes the distribution date

Dividends paid to nonresident shareholders are subject to a 25% withholding tax. The withholding tax rate may be reduced by tax treaties. Dividends distributed by Norwegian companies to corporate shareholders resident in EEA member states are exempt from withholding tax. This exemption applies regardless of the ownership participation or holding period. However, a condition for the exemption is that the EEA resident company be actually established and carrying out genuine economic activities in its home country.

**Foreign tax relief.** A tax credit is allowed for foreign tax paid by Norwegian companies, but it is limited to the proportion of the Norwegian tax that is levied on foreign-source income. Separate limitations must be calculated according to the Norwegian tax treatment of the following two different categories of foreign-source income:

- Income derived from low-tax jurisdictions and income taxable under the CFC rules
- Other foreign-source income

For dividend income taxable in Norway, Norwegian companies holding at least 10% of the share capital and the voting rights of a foreign company for a period of more than two years that includes the distribution date may also claim a tax credit for the underlying foreign corporate tax paid by the foreign company, provided the Norwegian company includes an amount equal to the tax credit in taxable income. In addition, the credit is also available for tax paid

by a second-tier subsidiary, provided that the Norwegian parent indirectly holds at least 25% of the second-tier subsidiary and that the second-tier subsidiary is a resident of the same country as the first-tier subsidiary. The regime also applies to dividends paid out of profits that have been retained by the first- or second-tier subsidiary for up to four years after the year the profits were earned. The tax credit applies only to tax paid to the country where the first- and second-tier subsidiaries are resident.

### C. Determination of taxable income

**General.** Although taxable income is based on book income shown in the annual financial statements (which must be prepared in accordance with generally accepted accounting principles), the timing of income taxation is based on the realization principle. Consequently, the basic rules are that an income is taxable in the year in which the recipient obtains an unconditional right to receive the income, and an expense is deductible in the year in which the payer incurs an unconditional obligation to pay the expense. In general, all expenses, except gifts and entertainment expenses, are deductible.

**Inventory.** Inventory is valued at cost, which must be determined on a first-in, first-out (FIFO) basis.

**Depreciation.** Depreciation on fixed assets must be calculated using the declining-balance method at any rate up to a given maximum. Fixed assets (with a cost of more than NOK15,000 and with a useful life of at least 3 years) are allocated to one of the following 10 different groups.

Group	Maximum depreciation rates (%)
A Office equipment and similar items	30
B Acquired goodwill	20
C Trailers, trucks, buses, taxis and vehicles for the transportation of disabled persons	20
D Cars, tractors, other movable machines, other machines, equipment, instruments, furniture, fixtures and similar items	20*
E Ships, vessels, drilling rigs and similar items	14
F Aircraft and helicopters	12
G Installations for transmission and distribution of electric power, electronic equipment in power stations and such production equipment used in other industries	5
H Industrial buildings and industrial installations, hotels, rooming houses, restaurants and certain other structures	
Useful life of 20 years or more	4
Useful life of less than 20 years	10
I Office buildings	2
J Technical installations in buildings	10

\* The rate is 30% in the acquisition year.

Assets in groups A, B, C and D are depreciated as whole units, while assets in groups E, F, G, H, I and J are depreciated individually.

If fixed assets in groups A, B, C and D are sold, the proceeds reduce the balance of the group of assets and consequently the basis for depreciation. If a negative balance results within groups A, C or D, part of the negative balance must be included in income. In general, the amount included in income is determined by multiplying the negative balance by the depreciation rate for the group. However, if the negative balance is less than NOK15,000, the entire negative balance must be included in taxable income.

A negative balance in one of the other groups (B, E, F, G, H, I and J) must be included in a gains and losses account. Twenty percent of a positive balance in this account must be included annually in taxable income.

The depreciation rate for assets in Group D is increased by 10 points in the acquisition year. As a result, the total depreciation rate for assets in Group D in the acquisition year is 30%.

**Relief for losses.** A company holding more than 90% of the shares in a subsidiary may form a group for tax purposes. Intragroup contributions to set off profits in one company against losses in another may be made if included in the statutory accounts.

Alternatively, losses may be carried forward indefinitely. Losses can only be carried back when a line of business has been terminated. Losses may be carried back to offset profits of the preceding two years.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods and services, other than an exempt supply, in Norway	
General rate	25
Articles of food	15
Passenger transportation	8
Social security contributions, on all taxable salaries, wages and allowances, and on certain fringe benefits; paid by	
Employer (general rates; lower in some municipalities and for employees age 62 and over)	14.1
Employee (expatriates liable unless exempt under a social security convention)	8.2
Professional income	11.4
Pensioners and persons under 17 years old	5.1

#### E. Miscellaneous matters

**Anti-avoidance legislation.** Based on general anti-avoidance principles developed by court and administrative practice, substance prevails over form. The tax authorities may disregard transactions or structures if the dominant motive is to save taxes and the tax effects of entering into the transaction or structure are regarded as disloyal to the tax system.

**Foreign-exchange controls.** Norway does not impose foreign-exchange controls. However, foreign-exchange transactions must be carried out by approved foreign-exchange banks.

**Debt-to-equity rules.** Norway does not have statutory thin-capitalization rules. Based on general anti-avoidance principles, the tax authorities may deny an interest deduction on a case-by-case basis if they find that the equity of the company is not sufficient (for example, the Norwegian debtor company is not able to meet its debt obligations). An allocation rule regulates the deductibility of interest expenses for income subject to petroleum tax.

Interest-barrier rules are effective from 1 January 2014. Under these rules, interest expenses paid to related parties that exceed 30% of “tax EBITDA,” which is defined as ordinary taxable income with the add-back of tax depreciation and net interest expenses, are nondeductible.

These rules impose a general restriction on interest deductibility, which applies to corporations and transparent partnerships as well as Norwegian permanent establishments of foreign companies. The restriction applies to interest payments made to related parties in both domestic and cross-border situations. Companies taxed under the tonnage tax regime and under the hydropower tax regime are also subject to the interest restrictions. However, entities subject to the Norwegian Petroleum Tax Act are not yet covered by the rules.

Under the rules, a related party is a person, company or entity if, at any point during the fiscal year, is either of the following is true:

- It directly or indirectly controls at least 50% of the debtor.
- It is a company or entity of which the debtor directly or indirectly controls at least 50%.

In general, interest expenses that cannot be deducted during the fiscal year can be carried forward for 10 years. However, the interest expenses carried forward cannot exceed 30% of the basis of the calculation to be made in any future year. Any carryforward of non-deducted interest expenses must be deducted before the current year’s interest expenses.

The interest deduction rules apply only if net interest expenses exceed NOK5 million. If the threshold is surpassed, all interest expenses become nondeductible, including the first NOK5 million.

**Controlled foreign companies.** Norwegian shareholders in controlled foreign companies (CFCs) resident in low-tax jurisdictions are subject to tax on their allocable shares of the profits of the CFCs, regardless of whether the profits are distributed as dividends. A CFC is a company of which 50% or more of its shares is directly or indirectly owned or controlled by Norwegian residents. A low-tax jurisdiction is a jurisdiction with an effective corporate tax rate for that kind of company that is less than two-thirds of the Norwegian effective tax rate that would have been imposed if the taxpayer had been resident for tax purposes in Norway. The CFC rules do not apply to the following CFCs:

- A CFC resident in a country with which Norway has entered into a tax treaty if the income of the CFC is not of a predominantly passive nature.

- A CFC resident in an EEA member country if such CFC is actually established and carries out genuine economic activities in its home country and if Norway and the home country have entered into a treaty containing exchange-of-information provisions. As of 2014, all of Norway's treaties with EEA countries have such provisions.

The losses of a CFC may not offset the non-CFC income of an owner of the CFC, but they may be carried forward to offset future profits of the CFC.

**Transfer pricing.** Norwegian law allows the tax authorities to impute arm's-length prices if transactions between related parties are not considered to be at arm's length.

As an attachment to the annual tax return, Norwegian companies and Norwegian permanent establishments must report summary information about transactions with affiliated companies.

Norwegian companies and Norwegian permanent establishments must prepare and maintain written documentation describing certain transactions with related parties. To avoid a deemed tax assessment, such documentation must be presented to the tax authorities no later than 45 days after it has been requested. The statutory limitation for providing such documentation is 10 years.

Companies belonging to a group of companies with less than 250 employees may be exempted from the documentation requirement if the group has sales revenue of less than NOK400 million or a balance sheet total of less than NOK350 million. The exemption does not apply if the Norwegian entity has transactions with related parties located in countries from which Norwegian tax authorities cannot claim exchange of information under a treaty. The exemption also does not apply to companies subject to tax under the Norwegian Petroleum Tax Act.

## F. Treaty withholding tax rates

Interest and royalties paid to foreign recipients are not subject to withholding tax under Norwegian domestic law. Consequently, the following table provides treaty withholding tax rates for dividends only.

	Dividends (a)	
	Normal rate	Reduced rate
	%	%
Albania	15	5 (c)
Argentina	15	10 (c)

Zimbabwe	20	15 (c)
Non-treaty countries	25	—

- (a) Dividends paid to corporate residents of EEA member states are exempt from withholding tax if the EEA resident company is really established in its home country.
- (b) A revision of this treaty is currently being negotiated. The revised treaty with Belgium has been signed, but it has not yet entered into force.
- (c) The treaty withholding rate is increased if the recipient is not a company owning at least 25% of the distributing company.
- (d) The treaty withholding rate is increased if the recipient is not a company owning at least 10% of the distributing company.
- (e) Norway honors the Czechoslovakia treaty with respect to the Slovak Republic. Norway has entered into a tax treaty with the Czech Republic. The withholding tax rates under the Czech Republic treaty are shown in the above table.
- (f) Norway honors the suspended Yugoslavia treaty with respect to Bosnia and Herzegovina (effective from 2009), Croatia, and Serbia. Norway had honored the suspended Yugoslavia treaty with respect to the Union of Serbia and Montenegro based on an exchange of notes. However, when the Union of Serbia and Montenegro was dissolved on 3 June 2006, the Norwegian Ministry of Foreign Affairs considered Serbia to be the successor state. Accordingly, the tax treaty applied to Serbia only. Based on an exchange of notes on 31 October 2011, the Yugoslavia tax treaty also applies to Montenegro, effective from 3 June 2006.
- (g) The treaty withholding rate is increased if the recipient is not a company holding at least 50% of the voting power of the distributing corporation.
- (h) The 5% rate applies if the recipient is a company owning at least 25% of the distributing company. The rate is increased to 10% if the recipient is a company owning at least 10%, but less than 25%, of the distributing company. For other dividends, the rate is 15%.
- (i) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 25% of the distributing company. However, the rate is 5% if the recipient is a French corporation owning at least 10%, but less than 25%, of the distributing company.
- (j) The 5% rate applies if the recipient of the dividends owns at least 70% of the capital of the Norwegian payer. The rate is increased to 10% if the recipient owns at least 25%, but less than 70%, of the Norwegian payer. For other dividends, the rate is 15%.

- (k) The treaty withholding rate is increased to 15% if the recipient is not a company that satisfies both of the following conditions:
  - It owns at least 30% of the capital of the distributing company.
  - It has invested more than USD100,000 in the payer.
- (l) Norway has not entered into a double tax treaty with Liechtenstein. However, because Liechtenstein is a member of the EEA, under domestic Norwegian tax law, the reduced rate applies to dividends paid to companies. In other cases the rate is 25%.
- (m) The 0% rate applies if the recipient is a company that owns at least 20% of the distributing company.
- (n) The Hong Kong and Macau Special Administrative Regions (SARs) are not covered by the China treaty.
- (o) The rate is 0% if the corporate recipient of the dividends owns at least 80% of the voting power in the distributing company and if certain other criteria are met.
- (p) The 0% rate applies if the recipient is a company.
- (q) The treaty withholding rate is increased if the recipient is not a company owning at least 20% of the distributing company.
- (r) The treaty withholding rate is increased if the recipient is not a company owning at least 15% of the distributing company.
- (s) The treaty withholding rate is increased if the recipient does not directly own at least 10% of the distributing company for a minimum of 24 months, including the time of the dividend distribution.
- (t) The treaty withholding tax rate is increased if the recipient is not a company directly owning at least 10% of the distributing company for the last 12 months. If the distributing company has existed for less than 12 months, the recipient must satisfy the 10% condition since the date on which the distributing company was established.
- (u) The treaty withholding tax rate is increased if the recipient is not a company owning, directly or indirectly, at least 10% of the distributing company or is a pension scheme.
- (v) Norway has signed a protocol to its tax treaty with Brazil, but the protocol has not yet into force.

Norway is currently negotiating or renegotiating tax treaties with Egypt, Germany (protocol), Israel, Italy, Malaysia, New Zealand, Romania, Serbia, the Slovak Republic, Singapore, South Africa (protocol) and the United States.

Norway has entered into exchange-of-information tax treaties with Andorra, Anguilla, Antigua and Barbuda, Aruba, Bahamas, Bahrain, Belize, Bermuda, British Virgin Islands, Cayman Islands, Cook Islands, Costa Rica, Dominica, Gibraltar, Grenada, Guernsey, Isle of Man, Jersey, Liberia, Lichtenstein, Macau, Marshall Islands, Mauritius, Monaco, Montserrat, Niue, Panama, St. Lucia, Samoa, Seychelles, St. Kitts and Nevis, St. Vincent and the Grenadines, San Marino, the Turks and Caicos Islands, the United States and Uruguay.

In addition, Norway is currently negotiating exchange-of-information tax treaties with Botswana, Brunei Darussalam, Guatemala, the Hong Kong SAR, the United Arab Emirates and Vanuatu.

*The Income Tax Law (ITL), which is effective from the tax year beginning on 1 January 2010, was published in the Official Gazette on 1 June 2009. The Executive Regulations (ERs), which provide clarifications to certain provisions of the ITL, were issued on 28 January 2012 through Ministerial Decision (MD) 30/2012.*

## A. At a glance

Corporate Income Tax Rate (%)	12 (a)
Capital Gains Tax Rate (%)	12
Branch Tax Rate (%)	12
Withholding Tax (%)	10 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

(a) See Section B.

(b) This tax is imposed on certain payments to foreign persons that do not have a permanent establishment in Oman. Companies or permanent establishments in Oman that pay these items must deduct tax at source and remit it to the Secretary General of Taxation (for a listing of these items, see Section B).

(c) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies, which include Omani companies, partnerships, joint ventures and sole proprietorships, and permanent establishments of foreign companies are subject to Omani income tax. A permanent establishment is defined in the law. In addition, a permanent establishment is created for a foreign person providing consultancy or other services in Oman through employees or designated agents visiting Oman for at least 90 days in any 12-month period.

Omani companies and Omani sole proprietorships are subject to tax on overseas income (income accrued from a source outside Oman). However, a foreign tax credit limited to Oman's tax rate of 12% is available against the tax payable in Oman.

**Rates of corporate income tax.** Companies registered in Oman, regardless of the extent of foreign participation, and permanent establishments of foreign companies are subject to tax at a rate of 0% on their first OMR30,000 of taxable income, and at a rate of 12% on their taxable income in excess of OMR30,000.

Oil exploration and production companies are taxed at a rate of 55% and are usually covered by special rules contained in concession agreements. Exploration and production sharing agreements (EPSAs) signed between the government of Oman and concession partners provide detailed procedures for computing taxable income and settlement of tax due. Under an EPSA, the government of Oman settles tax due on behalf of the concession partner out of the government's share of production.

Foreign shipping and aviation companies are exempt from tax in Oman if the Omani shipping and aviation companies enjoy similar reciprocal treatment in the respective foreign countries. Omani companies and sole proprietorships engaged in shipping are exempt from tax.

Income derived by investment funds established in Oman and by funds established outside Oman dealing in Omani securities listed in the Muscat Securities Market (MSM) is exempt from tax. These exemptions are for indefinite periods.

Tax holidays are available to companies engaged in manufacturing, mining, exports, operating of hotels and tourist villages, farm and animal products processing, fishing and fish processing, higher education, private schools and nurseries, private hospitals, teaching and training institutions in education and medical care fields. The exemption for these categories of companies is available for five years but may be renewed for a maximum period of an additional five years, subject to the fulfillment of certain conditions.

No income can be exempt from tax unless provided by a law or Royal Decree.

**Capital gains.** No special rules apply to capital gains. Capital gains are taxed as part of regular business income at the rates set out in *Rates of corporate income tax*.

The tax law provides that profits and gains derived from disposals of all assets, including disposals of goodwill, trade names or

trademarks with respect to all or part of a business, are included as deemed income.

Gains derived from the sale of investments and securities listed on the MSM are exempt from tax.

**Withholding tax.** Withholding tax at a rate of 10% of gross payments is imposed on certain gross payments made to foreign companies, including the following:

- Royalties (see below)
- Consideration for research and development
- Management fees
- Consideration for the use of or right to use computer software

Entities in Oman, including permanent establishments, are responsible for deducting and remitting tax to the government. The tax is final. Foreign persons do not have any further filing or other obligations with respect to such income.

If a foreign company has a permanent establishment in Oman, but the permanent establishment in Oman is unconnected to the receipt of income that is subject to withholding tax, withholding tax applies to such payments.

Royalties include payments for the use of or right to use software, intellectual property rights, patents, trademarks, drawings, equipment rentals, consideration for information concerning industrial, commercial or scientific experience, and concessions involving minerals.

### **Administration**

*General.* A taxpayer is required to register with the Secretariat General for Taxation by filing a Form for Declaration of Business Particulars within a period of 3 months after the date of incorporation or commencement of activities. Any changes to the registration information must be communicated within two months. The accounting period begins on the date of commencement of business for joint ventures and permanent establishments. For companies, the start date is the date of registration or incorporation. The first accounting period may be less than 12 months but cannot exceed 18 months. The accounting period may be changed with the approval of the Secretary General for Taxation.

The books of account are required to be maintained for a period of 10 years. Permission is required for maintaining books of accounts in a foreign currency. In such a case, income must be converted at exchange rates prevailing on the last day of the accounting year. The accrual method of accounting must be used.

The term "Principal Officer" is defined for various entities. If a permanent establishment carries on an activity in Oman through a dependent agent, the agent is treated as Principal Officer. If a sole proprietor or owner of a permanent establishment is outside Oman, the individual or permanent establishment must designate a Principal Officer to comply with the obligations under the law. Such Principal Officer may not be absent from Oman for more than 90 days in a tax year.

Partners of joint ventures are jointly and severally liable for taxes of the joint venture.

*Returns.* Provisional returns of income must be filed within three months after the year-end. A final return of income, together with audited financial statements, must be filed within six months after the end of the accounting year.

*Assessments.* Assessments must be issued within five years from the end of the year in which tax returns are filed. If no assessment is issued within a period of five years, such assessments are deemed to have been issued (that is, tax returns are accepted as filed).

Corrections of assessments as a result of obvious errors are allowed. Such corrections must be made within five years after the year of issuance of the original assessment.

If a tax return is not submitted for a tax year, the time limit for making an assessment is 10 years from the end of the tax year for which the tax return is due.

Assessed tax, reduced by tax already paid, must be paid within 30 days from the date of issuance of the assessment. A delay results in a delay fine of 1% per month on taxes due for the period of delay. If a refund is assessed, the refund must be claimed within five years from the end of the year in which such refund is due.

Assessments are made with respect to withholding tax.

*Statutory periods of limitation.* For the period of limitation related to assessments, see *Assessments*.

The government's right to collect taxes expires after seven years from the date taxes became due and payable, unless the tax authority initiates action to recover taxes.

*Appellate processes.* An objection against the assessment order must be filed with the Secretary General for Taxation. Other appellate procedures are an appeal with the Tax Committee, a tax suit filed in the primary court, an appeal to the appellate court, and finally a case before the Supreme Court.

The objection against an assessment must be filed within 45 days from the date of serving of the assessment order. An appeal must be submitted within 45 days from the date of the decision on the objection or the date of expiration of the specified period for deciding on the objection if no decision is issued.

The time limit for consideration of the objection is five months, with an extension of an additional five months. If no decision is issued, an implied rejection of the objection is deemed to occur.

A taxpayer can seek extension of time for the payment of disputed tax. However, the undisputed tax must be paid within 30 days after the date of assessment.

**Dividends.** Dividends received by Omani companies, permanent establishments of foreign companies or Omani sole proprietorships from Omani companies are exempt from tax.

**Foreign tax relief.** A foreign tax credit limited to Oman's tax rate of 12% is available against the tax payable in Oman on overseas income of Omani companies and sole proprietors.

### C. Determination of trading income

**General.** Tax is levied on the taxable income earned by Omani companies, permanent establishments of foreign companies and Omani sole proprietorships. Financial accounts must be prepared using the accrual basis of accounting.

Gains on the disposal of goodwill and trademarks are deemed to be taxable income.

Income arising before registration or incorporation is considered to be taxable income in the first year after registration. The market value of assets received in exchange for other assets is considered to be the disposal value, suggesting that mergers may give rise to a taxable event.

Other types of income such as payments on insurance claims, debts recovered in subsequent periods, balancing charges and reversals of liabilities, are treated as income subject to tax.

Expenses are deductible only if they are incurred wholly and exclusively for the purpose of production of gross income. If only a portion of the expense is incurred for the purpose of income generation, the proportionate expense attributable to the income generated is allowed as a deduction. Expenses incurred before registration, incorporation or the commencement of business are deemed to be incurred on the day on which business commences and are deductible in the first year of commencement of operations.

Expenses that are incurred in generating tax-exempt income are not allowed as deductions.

Special rules apply to allowances, such as depreciation, bad debts, donations, remuneration of shareholders, proprietors and directors, rent, head-office overhead allocated to branches and sponsorship fees. Exchange differences relating to head-office or related-party balances are normally disregarded.

Foreign taxes are not deductible for tax purposes. However, foreign taxes can be set off against taxes due on the same income in Oman (see Section B).

**Inventories.** The tax law does not stipulate a required method of accounting for inventories. In general, inventories are valued at the lower of cost or net realizable value, with cost determined using the weighted average or first-in, first-out (FIFO) method. Provisions to reduce the value to net realizable value are not allowed for tax purposes.

**Provisions.** In general, provisions are not allowed as deductible expenses when created. However, they are allowed as deductions when they are written off or utilized. Exceptions to this rule include the following:

- Provisions for loan losses are deductible for tax purposes for banks and other financial companies regulated by the central bank.
- Provisions for unexpired risks, unsettled claims and contributions to contingency funds are deductible for tax purposes for insurance companies.

**Tax depreciation.** Depreciation of assets other than buildings must be calculated using the pooling (or block) of assets method. Each pool's asset base is calculated with reference to the written-down value plus additions minus sale proceeds from disposals.

The straight-line depreciation method applies to buildings.

The following annual depreciation rates are set out under the tax law.

<b>Assets</b>	<b>Rate (%)</b>
Permanent buildings (selected materials)	4
Building (other than selected materials)	15
Quays, jetties, pipelines, road, railways	10
Ships and aircraft	15
Drilling rigs	10
Other machinery and equipment	15
Tractors, cranes, and other heavy equipment	33½
Computers, vehicles, self-propelling machines	33½
Furniture and fixtures (including computer software and copyrights)	33½
Hospital buildings and educational establishments	100

The rate for intangible assets is determined by the Secretary General of Taxation.

**Relief for losses.** Losses may be carried forward for five years. Losses of an earlier year must be set off first before using losses of a later year.

Companies that are exempt from tax because they carry on the activities set out in Section B may carry forward net losses incurred during the first five years of exemption for an indefinite period.

No carryback of losses is permitted.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Social security contributions, on "monthly wage" of Omani employees only, effective from 1 July 2014; "monthly wage" is defined as "all amounts paid to the insured in cash or in kind or periodically or regularly for his work whatever the method used for its determination, or is the sum of basic wages plus allowances, which shall be determined by a decision of the Minister after the approval of the Board of Directors"; the amount (wage) is capped at OMR3,000 per month	
Pension fund; paid by	
Employer	10.5%
Employee	7%
Government	5.5%

Nature of tax	Rate
Occupational injuries and diseases; payable by employer	1%
End-of-service benefit payable to expatriate staff on the termination of service	15 days of basic salary for each of the first 3 years and 30 days' basic salary for years of service in excess of 3 years
Vocational training levy for each non-Omani employee; paid biennially by employer	OMR200

## E. Miscellaneous matters

**Anti-avoidance legislation.** If a company carries out a transaction with a related party that is intended to reduce the company's taxable income, income arising from such transaction is deemed to be the income that would have arisen had the parties been dealing at arm's length.

For transactions between related parties that are not at arm's length, certain arrangements and terms may be ignored by the tax authorities if such arrangements or terms result in lower taxable income or greater losses.

The tax authorities may make adjustments if the principal purpose of a transaction is to avoid taxation even if the transaction is between unrelated parties.

**Thin-capitalization rules.** Under the ITL, interest payable by Omani companies other than banks and insurance companies may be deducted from taxable income, subject to the satisfaction of certain conditions prescribed by the ERs.

The ERs provide that interest on loans from related parties paid by Omani companies other than banks and insurance companies may be deductible if total loans do not exceed twice the value of the shareholder's equity.

The above provision introduces the concept of thin capitalization requiring Omani companies to comply with a minimum capital requirement, which is that loans may not exceed a debt-to-equity ratio of 2 to 1.

**Transfer pricing.** The tax law has introduced the concept of transfer pricing. It seeks to restrict any measures that may be taken by related parties for the avoidance of tax through transactions entered into between them.

**Head office overhead.** Allocations of overhead by the head office to a branch are capped at the lower of 3% of revenue or actual charges. If the head office has only a supervisory role with respect to a branch, no overhead deduction is allowed.

**Others.** Oman does not have any rules relating to foreign-exchange controls or controlled foreign companies.

**F. Tax treaties**

Oman has entered into double tax treaties with Algeria, Belarus, Brunei Darussalam, Canada, China, Croatia, France, India, Iran, Italy, Japan, Korea (South), Lebanon, Mauritius, Moldova, Morocco, Netherlands, Pakistan, Seychelles, Singapore, South Africa, Sudan, Syria, Thailand, Tunisia, Turkey, the United Kingdom, Uzbekistan, Vietnam and Yemen.

Oman has signed double tax treaties with Belgium, Egypt, Germany, the Russian Federation and Spain, but these treaties are not yet in force.

Oman has also entered into treaties with several countries with respect to the avoidance of double taxation on income generated from international air transport.

Under Omani domestic law, withholding tax is not imposed on dividends or interest. Under the Mauritius treaty, no withholding tax is imposed on royalties paid to companies resident in this country, subject to the satisfaction of certain conditions.

Few of the double tax treaties include the benefit of reduced withholding tax rates on royalties. The applicability of reduced tax rates under the provisions of a double tax treaty is not automatic. With the issuance of the ERs, the Secretariat General for Taxation is now requiring companies to provide supporting documents before allowing reduced tax rates.

**A. At a glance**

Corporate Income Tax Rate (%)	33
Capital Gains Tax Rate (%)	10/12.5/33 (a)
Branch Tax Rate (%)	33
Withholding Tax (%) (b)	
Dividends	7.5/10/12.5/15/20/25 (c)
Interest	10/15/20 (d)

Royalties from Patents, Know-how, etc.	15/20 (e)
Fees for Technical Services	6/15 (f)
Branch Remittance Tax	10 (g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	6

- (a) Capital gains on listed securities are taxable at reduced rates (see Section B).
- (b) See Section B for a listing of additional withholding taxes.
- (c) The 10% rate is the general tax rate for dividends. The 7.5% rate applies to dividends paid by companies engaged in power generation, by purchasers of power projects privatized by the Water and Power Development Authority or by companies supplying coal exclusively to power generation projects. The 12.5% rate applies to dividends paid by a stock fund if the dividend receipts are less than capital gains. The 15% rate applies to dividends paid by companies (other than power projects, stock funds, money market funds, income funds or other funds) if the recipient is a non-filer (that is, it does not file an income tax return). The 20% rate applies to dividends received by banking companies from their asset management companies. The 25% rate applies to dividends received by banks from money market funds and income funds and to dividends received by companies from money market funds, income funds or other funds (other than stock funds). The withholding tax is imposed on the gross amount of the dividend. The withholding tax on dividends is considered a final discharge of the tax liability on such income (except for banks and the 15% rate for non-filers).
- (d) The withholding tax on interest is considered to be an advance payment of tax, which may be credited against the final tax liability for the year. Interest paid on loans and overdrafts to resident banks and Pakistani branches of nonresident banks and financial institutions is not subject to withholding tax. The withholding tax rate is 10% of the gross amount of interest paid to resident persons and to nonresident persons without a permanent establishment (PE) in Pakistan. The 15% rate applies if the recipient is a non-filer. The rate is 20% for nonresidents with a PE in Pakistan.
- (e) The general withholding tax rate for royalties is 15%. This tax is considered to be a final tax for nonresident recipients of royalties. However, if royalties are derived with respect to properties or rights effectively connected with a PE of a nonresident, a 20% withholding tax rate is imposed, unless a non-deduction certificate is obtained by the PE. The 20% withholding tax is credited against the final tax liability.
- (f) Fees for technical services do not include consideration for construction, assembly or similar projects of the recipient (such consideration is subject to a 6% withholding tax) or consideration that is taxable as salary. The general withholding tax rate is 15% of the gross amount of the payment. This withholding tax is considered to be a final tax for nonresident recipients. However, if technical services are rendered through a PE in Pakistan, the 6% rate applies. The 6% tax is considered to be an advance payment of tax by the nonresident recipient of such technical service fees and may be credited against the eventual tax liability.
- (g) Remittances of after-tax profits by branches of nonresident petroleum exploration and production companies are not taxable.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies that are resident in Pakistan are subject to corporation tax on their worldwide income. Tax is levied on the total amount of income earned from all sources in the company's accounting period, including dividends and taxable capital gains. Branches of foreign companies and nonresident companies are taxed only on Pakistan-source income. A company is resident in Pakistan if it is incorporated in Pakistan or if its control and management are exercised wholly or almost wholly in Pakistan during the tax year. Company is defined to include the following:

- A company as defined in the Companies Ordinance, 1984
- A body corporate formed by or under any law in force in Pakistan

- An entity incorporated by or under the corporation law of a country other than Pakistan
- The government of a province
- A local authority
- A foreign association that the Federal Board of Revenue declares to be a company
- A modaraba, cooperative society, finance society or other society
- A nonprofit organization
- A trust, entity or a body of persons established or constituted by or under any law

**Tax rates.** For the 2015 tax year (income year ending on any day between 1 July 2014 and 30 June 2015), the tax rate is 33%. However, for banking companies, the tax rate is 35%.

Small companies are subject to tax at a rate of 25%.

Small companies are companies that meet the following conditions:

- They have paid-up capital and undistributed reserves of not exceeding PKR25 million.
- They have no more than 250 employees at any time during the year.
- They have annual turnover not exceeding PKR250 million.
- They were not formed as a result of a restructuring involving the splitting up or reorganization of an already existing business.

The gross revenue of nonresidents' air transportation and shipping businesses is taxed at 3% and 8%, respectively. This income is not subject to any other tax.

Certain types of income are subject to final withholding taxes. For information regarding these taxes, see Section A and *Withholding taxes*.

**Alternative corporate tax.** The 2014 Finance Act introduced an alternate corporate tax, which is effective from the 2014 tax year. If the corporate tax is less than 17% of the accounting income (excluding certain types of income and related expenses), alternative corporate tax is required to be paid as minimum tax. The difference between the corporate tax and alternative corporate tax can be carried forward to offset corporate tax for a maximum period of 10 years.

**Tax incentives.** Some of the significant tax incentives available in Pakistan are described in the following paragraphs.

Private sector projects engaged in the generation of electricity are exempt from tax. However, this exemption is not available to oil-fired electricity generation plants set up during the period of 22 October 2002 through 30 June 2006.

Income derived from instruments of redeemable capital, as defined in the Companies Ordinance, 1984, by the National Investment (Unit) Trust of Pakistan established by the National Investment Trust Limited or by mutual funds, investment companies or collective-investment schemes approved by the Securities and Exchange Commission is exempt from tax if such enterprises distribute at least 90% of their profits to their unit holders.

Income derived by a collective-investment scheme or real estate investment trust scheme is exempt from tax if at least 90% of the

scheme's accounting income for the year, reduced by realized and unrealized capital gains, is distributed among the unit or certificate holders or shareholders.

Income derived from the export of computer software developed in Pakistan and related services is exempt from tax until 30 June 2016.

A tax credit of 10% of the amount invested by a company that is an industrial undertaking for the purchase of plant and machinery for the purposes of extension, expansion, balancing, modernization and replacement in an industrial undertaking set up in Pakistan and owned by the company may be claimed against the tax payable if the plant and machinery is purchased and installed between 1 July 2010 and 30 June 2015. Any unused tax credit may be carried forward to the following two tax years.

A tax credit equal to 100% of the tax payable on taxable income for a period of five years is granted to a company if the following conditions are satisfied:

- The company is incorporated and an industrial undertaking is set up during the period of 1 July 2011 through 30 June 2016.
- The investment is made entirely out of equity.

A tax credit is allowed to a company that is set up in Pakistan before 1 July 2011 if it invests any amount with 100% new equity raised through issuance of new shares in the purchase and installation of plant and machinery for an industrial undertaking, for the expansion of plant or machinery already installed or for the undertaking of a new project. The credit is allowed against the tax payable for a period of five years. The credit is calculated by applying the proportion of new equity to total equity including new equity against the tax payable.

A tax credit equal to 20% of the amount of investment is allowed to a company that is set up in Pakistan before 1 July 2011 and that makes an investment during the period of 1 July 2011 through 30 June 2016 with 100% new equity raised through the issuance of new shares, for the purpose of balancing, modernization and replacement of plant and machinery already installed in an industrial undertaking owned by a company. The tax credit may be carried forward up to five years.

A tax credit of 15% of the tax payable is allowed in the tax year in which a company becomes listed on a registered stock exchange in Pakistan.

The corporate tax rate is reduced to 20% for a period of five years for a company setting up an industrial undertaking between 1 July 2014 and 30 June 2017 through foreign direct investment of at least 50% of the cost of the project, including working capital.

**Capital gains.** Capital gains on shares of public companies, vouchers of the Pakistan Telecommunication Corporation, modaraba certificates, instruments of redeemable capital, debt securities and derivative products are taxable. The tax rates for the 2015 tax year vary according to the holding period of the securities. If the holding period for such securities is two years or more, the tax rate is 0%. The following are the tax rates if the holding period is less than two years:

- Holding period of 12 months or less: 12.5%
- Holding period of more than 12 months but less than 24 months: 10%

Capital gains on other assets (including non-public securities) are taxable at the corporate rate. However, only 75% of capital gains derived from transfers of capital assets, excluding immovable properties and assets on which tax depreciation or amortization is claimed, is taxed if the assets were held for more than 12 months.

Capital gains on the disposal of listed securities and the tax payable on the gains are computed, determined, collected and deposited on behalf of a taxpayer by the National Clearing Company of Pakistan Limited (NCCPL), which is licensed as a clearing house by the Securities and Exchange Commission of Pakistan. However, the NCCPL does not collect tax from the following categories of the taxpayers:

- Mutual funds
- Banking companies, nonbanking finance companies and insurance companies
- Modarabas
- Companies, with respect to debt securities only
- Other persons or classes of persons notified by the Federal Board of Revenue

The investors listed above are required to self-pay their capital gain tax obligation on a quarterly basis at a rate of 1.5% or 2% of the amount of gain, depending on the amount of gain. They must file a statement of advance tax and pay the tax within 21 days after the end of each quarter.

Capital gains arising on immovable property held for a period of up to two years by a person are subject to tax at the following rates:

- Immovable property held for a period of up to one year: 10%
- Immovable property held for a period of more than one year but up to two years: 5%

Capital losses can be offset only against capital gains. Capital losses can be carried forward for six years. However, capital losses on disposals of securities (shares of public companies, vouchers of the Pakistan Telecommunication Corporation, Modaraba Certificates, instruments of redeemable capital and derivative products) can be set off only against capital gains on disposal of securities in the current year.

### **Administration**

*Filing requirements.* The tax year commences on 1 July and ends on 30 June. Companies are required to end their fiscal years on 30 June. Special permission is required from the Commissioner of Income Tax to use a different year-end. The Federal Board of Revenue has specified 30 September as the year-end for certain industries, such as sugar and textiles, and 31 December as the year-end for insurance companies.

An income tax return must be filed by 30 September of the following year if the company's year-end is from 1 July through 31 December and by the following 31 December if the year-end is from

1 January through 30 June. Any balance due after deducting advance payments and withholding taxes must be paid when the tax return is filed.

*Advance tax payments.* In general, advance tax is payable quarterly based on the tax to turnover ratio of the latest tax year. However, banking companies must pay advance tax on a monthly basis. If the tax liability is estimated to be more or less than the tax charged for the prior tax year, an estimate of tax liability can be filed and advance tax liability can be paid in accordance with such estimate, subject to certain conditions. For taxpayers other than banking companies, the due dates for the advance tax payments are 25 September, 25 December, 25 March and 15 June. Banking companies must pay advance tax by the 15th day of each month.

Adjustable quarterly advance tax on capital gains from sale of securities is payable on the capital gains derived during the quarter at a rate of 2% if the holding period is less than 6 months and 1.5% if the holding period is between 6 and 12 months.

*Minimum tax.* Resident companies and nonresident banking companies are subject to a minimum income tax equal to 1% of gross receipts from sales of goods, services rendered and the execution of contracts, if the corporate tax liability is less than the amount of the minimum tax. The excess of the minimum tax over the corporate tax liability may be carried forward and used to offset the corporate tax liability of the following five tax years.

*Withholding taxes.* Withholding tax is an interim tax payment that may or may not be the final tax liability. Amounts withheld that are not final taxes are credited to the final tax liability of the taxpayer for the relevant year.

In addition to the withholding taxes listed in Section A, payments by corporations are subject to the following taxes that are deducted or collected at source.

<b>Tax</b>	<b>Rate</b>
Foreign-exchange proceeds from exports of goods	1% (a)
Rent for immovable property	Various (b)
Payments for goods	
Specified goods	1.5%
Other goods	
Payments to companies	4% (c)
Payments to PEs of nonresidents	3.5%
Payments to others	4.5%
Imports of goods	
By industrial undertakings and companies	5.5% (d)
By other taxpayers	6%
Payments under executed contracts for construction, assembly and similar projects	
By companies and nonresident contractors	6%/7% (e)
By other taxpayers	7.5%
Sportspersons	10%
Payments for services	
Rendered by residents	
Transportation services	2%

Tax	Rate
Other services	
By companies	8% (f)
By other taxpayers	10%
Rendered by nonresidents through PEs	
Transportation services	2%
Other services	6% (f)
Brokerage and commission	
Indenting commission	5% (a)(g)
Advertising agents	7.5% (a)(g)
Other commission and brokerage	12% (a)(g)
Advertisement services by a nonresident person relaying from outside Pakistan (broadcasting an advertisement into Pakistan from outside the country)	6%/10% (a)
Payments to employees	– (g)(h)
Commission earned by members of stock exchange	0.01% (i)
Cash withdrawals exceeding PKR50,000	0.3%/0.5% (j)
Purchases of domestic air tickets	5%
Purchases of international air tickets other than economy class	4%
Payments to distributors, dealers and wholesalers for specified goods	0.1%/0.2%/0.4% (k)
Transfers of immovable property	0.5%/1%/2% (l)
Sales to retailers	0.5% (m)
Cable operators	Various (n)
Internet protocol television (IPTV), FM radios, mobile television, satellite television channels and landing rights (tax collected from licensee)	20% (o)
Dealers, commission agents and arhatis (middlemen) and similar persons	Various (p)
Payments for holding functions and gatherings	5%
Foreign-produced films and television plays	PKR100,000 per film or episode
Purchase of motor vehicles	Various (q)
Registration of motor vehicles	Various (q)
Electricity consumption	5%/7.5%/10% (r)
Issuance of bonus shares	5% (s)

- (a) This tax is a final tax.
- (b) Property income is subject to bottom-line profit taxation. The tax deducted at source may be credited against the eventual tax liability. A 15% rate applies if the payment is being made to a company. For payments made to individuals or association of persons, the rate ranges from 0% to 15%, depending on the amount of rent.
- (c) Tax deducted on the sale of goods is a final tax for resident companies, other than listed companies, engaged in trading.
- (d) This tax is a final tax for entities engaged in the trading of imported goods. Lower rates may apply to importers or manufacturers of specific goods.
- (e) Nonresident contractors may irrevocably elect to treat the withholding tax as a final tax. The 7% rate applies to resident companies and the 6% rate applies to nonresidents. The withholding tax is a final tax for all resident contractors, other than listed companies.
- (f) For corporate taxpayers, including permanent establishments of nonresident companies, the tax is considered an advance payment of tax, which is credited against the final tax liability for the year.
- (g) This tax is imposed on residents and nonresidents.

- (h) The applicable rate depends on the income earned by the employee for the year.
- (i) The 0.01% rate applies to the traded value (sales price) of shares traded on the stock exchange that relate to the commission earned by the members on the purchase, sale and trading of shares for its clients and investors. The 0.01% tax is considered to be an advance payment of tax, which is credited against the final tax liability of the member of the stock exchange for the year.
- (j) The 0.3% rate applies to filers (that is, persons filing income tax returns) and the 0.5% rate applies to non-filers, with respect to all withdrawals exceeding PKR50,000 except for withdrawals by the following:
- The federal government or provincial governments
  - Foreign diplomats
  - Diplomatic missions in Pakistan
  - Persons who produce a certificate from the Commissioner of Income Tax that the person's income is exempt from tax
- The withholding tax is imposed on the entire sum if the aggregate of sums withdrawn during a day exceeds PKR50,000.
- (k) The tax is collected by manufacturers and commercial importers at the time of the sale of goods in specified sectors. The tax collected is an advance tax for distributors, dealers and wholesalers. The rates of 0.1% and 0.2% apply to sales of goods other than fertilizers to filers and non-filers respectively, and the rates of 0.2% and 0.4% apply for fertilizer sales to filers and non-filers respectively.
- (l) A person responsible for registering or attesting the transfer of immovable property must collect the tax from the person selling or transferring the property. The tax collected is an advance tax. The 0.5% and 1% rates apply to the sale of property by filers and non-filers respectively, and the rates of 1% and 2% apply to the purchase of property with a value exceeding PKR3 million by filers and non-filers respectively (the 2% rate is applicable from the date specified by the authorities).
- (m) The tax is collected by manufacturers, distributors, dealers, wholesalers or commercial importers at the time of the sale of goods in specified sectors to retailers. The tax collected may be credited against the eventual tax liability.
- (n) The tax is collected by Pakistan Electronic Media Regulatory Authority at the time of issuance or renewal of a license. The amount of tax depends on the category of license. The tax collected may be credited against the eventual tax liability.
- (o) The tax is collected on the permission or renewal fee.
- (p) The market committee collects the tax from dealers, commission agents, arhatis, and similar persons on the issuance or renewal of the license. The tax collected may be credited against the eventual tax liability.
- (q) This advance tax is collected by the motor vehicle registration authorities at the time of registration of the vehicle. The rates vary according to the engine capacity of the relevant motor vehicles.
- (r) This advance tax is collected by electric companies at the time of issuance of invoices to consumers. The 5% rate applies to industrial consumers with a bill exceeding PKR20,000. The 10% rate applies to commercial consumers with a bill exceeding PKR20,000. The 7.5% rate applies to domestic consumers with a bill exceeding PKR100,000.
- (s) Effective from 1 July 2014, the issuance of bonus shares is subject to tax in Pakistan. The rate is applied to the value of the bonus shares and is deducted by the issuer company at the time of issuance.

In general, for payments not listed in the above tables or in Section A, withholding tax is imposed at a rate of 20% on payments to nonresidents subject to tax in Pakistan.

*Interest and penalties.* For a failure to file an income tax return by the due date, a penalty equal to 0.1% of the gross tax payable for each day of default is imposed, subject to a maximum penalty of 50% of the gross tax payable. However, if the calculated penalty is less than PKR20,000 or if no tax is payable for that tax year, the penalty is PKR20,000.

In addition, interest and penalties are imposed in the following circumstances:

- Interest at a rate equal to 18% per year is charged if tax payments, including advance tax payments, are not made or are partially paid.

- For non-payment or underpayment of tax, a penalty equal to 5% of the amount of tax in default is imposed. For a second default, a penalty equaling an additional 25% of the amount of tax in default is imposed. For any subsequent defaults, an additional penalty equal to 50% of the amount of tax in default is imposed. For any subsequent defaults, an additional penalty equal to 50% of the amount of tax in default is imposed.
- If income is concealed, a penalty equal to the amount of tax sought to be evaded or PKR25,000, whichever is higher, is levied in addition to the normal tax payable.

The income tax department is required to pay compensation at a rate of 15% per year on refunds due that have not been paid within three months after the due date, from the expiration of the three months until the date on which the refund is paid.

**Dividends.** Dividends, including remittances of profits by a Pakistan branch to its head office (other than remittances of profits by a Pakistan branch engaged in exploration and production of petroleum), are subject to withholding tax at a general rate of 10%. The withholding tax is considered to be a final discharge of the tax liability. A 7.5%, 12.5%, 15%, 20% or 25% rate is imposed on certain dividends (see footnote [c] to Section A). Intercorporate dividends paid within a wholly owned group are exempt from tax.

**Foreign tax relief.** A foreign tax credit is granted to resident companies with respect to foreign-source income at the average rate of Pakistani income tax or the actual foreign tax paid, whichever is less. If foreign income is derived under different heads (categories) of income, the amount of the allowable credit is applied separately to each head of income. However, income derived under a particular head of income from different locations is pooled together. A credit is allowed only if the foreign income tax is paid within two years after the end of the tax year in which the foreign-source income is derived.

### C. Determination of trading income

**General.** The determination of taxable income is generally based on the audited financial statements, subject to certain adjustments. Any income accruing or arising, whether directly or indirectly, through or from a PE or any other business connection in Pakistan, through or from any asset, property or source of income in Pakistan, or through the transfer of a capital asset located in Pakistan, is subject to tax.

Expenses incurred to derive income from business that is subject to tax are allowed as deductions to arrive at taxable income. For branches of foreign companies, allocated head-office expenses may be deducted, up to an amount calculated by applying the ratio of Pakistani turnover to worldwide turnover.

**Inventories.** Inventory for a tax year is valued at the lower of cost or net realizable value of the inventory on hand at the end of the year. If a particular item of inventory is not readily identifiable, the first-in, first-out (FIFO) or weighted-average methods may be used. The valuation method should be applied consistently from year to year, but the method may be changed with the prior approval of the tax authorities.

**Provisions.** General provisions for bad debts are not allowed as deductions from income. However, a charge for specific bad debts may be allowed if the debt is accepted by the income tax officer as irrecoverable.

Nonbanking finance companies and the House Building Finance Corporation may claim a deduction equal to 3% of the income from consumer loans for the maintenance of a reserve for bad debts resulting from such loans. In this context, a consumer loan is a loan obtained for personal, family or household purposes and includes debts resulting from the use of a credit card or insurance premium financing.

For advances and off-balance sheet items, banking companies are allowed a provision not exceeding 1% of their total advances. This percentage is increased to 5% with respect to consumers and small and medium-sized enterprises. The provision is allowed if a certificate from the external auditor is furnished by the banking company to the effect that such provisions are based on and are in line with the Prudential Regulations issued by the State Bank of Pakistan. The amount in a provision in excess of the allowable percentage may be carried over to succeeding years.

**Tax depreciation.** Depreciation recorded in the financial statements is not allowed for tax purposes. Tax depreciation allowances are given on assets, such as buildings, plant and machinery, computers and furniture owned by the company and used for business purposes. A depreciation allowance for a full year is allowed in the year the asset is placed in service, but no depreciation allowance is allowed in the year of disposal of the asset.

Depreciation is calculated using the declining-balance method. The following depreciation rates are generally used.

<b>Assets</b>	<b>Annual allowance %</b>
Buildings	10
Furniture and fixtures	15
Machinery and plant, including computer hardware, technical or professional books, ships, aircraft and motor vehicles	15 to 30
Below-ground installations (including offshore) of mineral oil enterprises	100
Offshore platform and production installations of mineral oil enterprises	20

To promote industrial development in Pakistan, certain other allowances relating to capital expenditure have been introduced. These allowances are summarized below.

*Initial allowance.* An initial depreciation allowance is available at a rate of 15% for buildings and at a rate of 25% for all other categories of eligible depreciable assets placed in service in Pakistan. The allowance is granted in the tax year in which the assets are first placed in service in Pakistan and used in the taxpayer's business for the first time, or in the tax year in which commercial production begins, whichever is later.

*First-year allowances.* A first-year depreciation allowance at a rate of 90% is granted for plant machinery and equipment installed by an industrial undertaking established in specified rural and underdeveloped areas. This allowance is granted instead of the initial allowance.

A first-year depreciation allowance at a rate of 90% is granted for plant machinery and equipment installed for generation of alternate energy. This allowance is available to an industrial undertaking set up anywhere in Pakistan and owned and managed by a company. The allowance is granted instead of the initial allowance.

*Amortization of intangibles.* Amortization of intangibles is allowed over the normal useful life of intangibles. If an intangible does not have an ascertainable useful life or if the normal useful life is more than 10 years, for purposes of calculating annual amortization, the normal useful life is considered to be 10 years for the purposes of calculating amortization.

*Amortization of expenses incurred before the commencement of business.* The amortization of expenses incurred before the commencement of business is allowed on a straight-line basis at an annual rate of 20%.

**Relief for losses.** Business losses, other than capital losses and losses arising out of speculative transactions, may be carried forward to offset profit in subsequent years for a period not exceeding six years. Unabsorbed depreciation may be carried forward indefinitely.

**Groups of companies.** A group of companies comprising holding companies and subsidiaries in a 100%-owned group can file its tax returns as one fiscal unit, subject to the satisfaction of certain conditions.

In addition, on the satisfaction of certain conditions, group companies can surrender their assessed losses (excluding capital losses and losses brought forward) for the tax year to other group companies.

The option of group taxation is available to group companies that comply with the corporate governance requirement and group designation rules or regulations, as specified by the Stock Exchange Commission of Pakistan.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax, on the supply of goods, on the cost of imported goods and on certain services; certain items and classes of persons are exempt	0/17
Excise duties, on specified goods imported or manufactured in Pakistan and on specified services provided or rendered in Pakistan (the government may declare any goods or class of goods exempt)	Various

Nature of tax	Rate (%)
State and local taxes; an annual trade tax on companies, including branches of foreign companies	Various
Capital value tax; imposed on purchases of immovable property	2.5
Net assets tax ( <i>zakat</i> , a religious levy), on certain assets of companies having a majority of Muslim shareholders who are citizens of Pakistan	2.5
Social security contributions, on salaries of employees (maximum of PKR600 per month)	6
Employees' old-age benefits; based on minimum wages of employees under law of PKR11,000 per month; payable by Employer	5
Employee	1

### E. Miscellaneous matters

**Foreign-exchange controls.** In general, remittances in foreign currency are regulated, and all remittances are subject to clearance by the State Bank of Pakistan. However, foreign currency may be remitted through the secondary market.

**Debt-to-equity rules.** Under the thin-capitalization rules, if the foreign debt-to-equity ratio of a foreign-controlled company (other than a financial institution or a banking company) exceeds 3:1, interest paid on foreign debt in excess of the 3:1 ratio is not deductible.

The State Bank of Pakistan prescribes that borrowers from financial institutions have a debt-to-equity ratio of 60:40. This may be increased for small projects costing up to PKR50 million or by special government permission.

Loans and overdrafts to companies (other than banking companies), controlled directly or indirectly by persons resident outside Pakistan, and to branches of foreign companies are generally restricted to certain specified percentages of the entities' paid-up capital, reserves or head-office investment in Pakistan. The percentage varies, depending on whether the entities are manufacturing companies, semi-manufacturing companies, trading companies or branches of foreign companies operating in Pakistan. No limits apply, however, to companies exporting at least 50% of their products.

To meet their working capital requirements, foreign controlled companies and branches of foreign companies may contract working capital loans in foreign currency that can be repatriated. The State Bank of Pakistan also permits foreign controlled companies to take out additional matching loans and overdrafts in rupees equal to the amount of the loans that may be repatriated. Other loans in rupees are permitted in special circumstances. Certain guarantees issued on behalf of foreign controlled companies are treated as debt for purposes of the company's borrowing entitlement.

**F. Treaty withholding tax rates**

The maximum withholding rates provided in the treaties are shown in the following table.

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Austria	10/20 (d)	– (b)(g)	20
Azerbaijan	10	10	10
Bahrain	10	10 (b)	10

Non-treaty countries	7.5/10/12.5/ 15/20/25 (z)	10/15/20 (aa)	15/20 (bb)

- (a) Treaty-determined percentage holding required.
- (b) Interest paid to the government or, in certain circumstances, to a financial institution owned or controlled by the government is exempt.
- (c) Fifteen percent for industrial, commercial or scientific know-how.
- (d) Treaty-determined percentage holding required, and payer must be engaged in an industrial undertaking; otherwise, higher rate or normal rate applies.
- (e) Royalties are exempt from withholding tax to the extent they represent a fair and reasonable consideration.
- (f) Certain approved loans are exempt.
- (g) Normal rates apply.
- (h) Treaty-determined percentage holding by a public company required and the profits out of which the dividends are paid must be derived from an industrial undertaking; otherwise, normal rates apply.
- (i) Ten percent if the recipient is a financial institution.
- (j) Lower amount for literary, artistic or scientific royalties.
- (k) Fifteen percent if payer is an enterprise engaged in preferred activities.
- (l) Rate reduced to 10% if recipient is a bank or financial institution or if certain types of contracts apply. Rate reduced to 15% if recipient holds 25% of the capital of the paying company.
- (m) Copyright royalties and other similar payments for literary, dramatic, musical or artistic work are exempt.
- (n) Fifteen percent if the recipient is a company. Further reduced to 10% if the treaty-determined percentage is held by the recipient and the industrial undertaking is set up in Pakistan after 8 December 1987. Twenty percent in other cases.
- (o) Lower rate applies if the recipient is a company that controls, directly or indirectly, 10% of the voting power in the company paying the dividend.
- (p) Lower rate applies if recipient is a company that owns directly at least 25% of the capital of the paying company.
- (q) The 15% rate applies to dividends paid to companies. The 30% rate applies to other dividends.
- (r) The 15% rate applies if the recipient is a company that owns directly at least 25% of the capital of the payer and is engaged in an industrial undertaking.
- (s) The 12% rate applies if the recipient is a company that owns directly at least 25% of the capital of the payer; the 15% rate applies to dividends paid to other companies; and the 20% rate applies to other dividends.
- (t) Interest paid to the government or to an agency of or an instrumentality owned by the government is exempt from tax.
- (u) The 10% rate applies if the payer is engaged in an industrial undertaking and if the recipient is a company; the 12.5% rate applies if the recipient is a company; the 15% rate applies in all other cases.
- (v) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 20% of the shares of the payer.
- (w) The 10% rate applies to royalties for cinematographic films and to tapes for television or radio broadcasting. The 15% rate applies to royalties for literary, artistic or scientific works.
- (x) The treaty rate applies to the extent the amount represents a fair and reasonable consideration.

- (y) Interest paid to the government or to the central bank is exempt.
- (z) The 10% rate is the general tax rate for dividends. The 7.5% rate applies to dividends paid by companies engaged in power generation, by purchasers of power projects privatized by the Water and Power Development Authority or by companies supplying coal exclusively to power generation projects. The 12.5% rate applies to dividends paid by a stock fund if the dividend receipts are less than capital gains. The 15% rate applies to dividends paid by companies (other than power projects, stock funds, money market funds, income funds or other funds) if the recipient is a non-filer (that is, does not file an income tax return). The 20% rate applies to dividends received by banking companies from their asset management companies. The 25% rate applies to dividends received by banks from money market funds and income funds and to dividends received by companies from money market funds, income funds or other funds (other than stock funds). The withholding tax is imposed on the gross amount of the dividend. The withholding tax on dividends is considered a final discharge of the tax liability on such income (except for banks and the 15% rate for non-filers).
- (aa) The withholding tax on interest is considered to be an advance payment of tax, which may be credited against the final tax liability for the year. Interest paid on loans and overdrafts to resident banks and Pakistani branches of nonresident banks and financial institutions is not subject to withholding tax. The withholding tax rate is 10% of the gross amount of interest paid to resident persons and to nonresident persons without a PE in Pakistan. The 15% rate applies if the recipient is a non-filer. The rate is 20% for nonresidents with a PE in Pakistan.
- (bb) The general withholding tax rate for royalties is 15%. This tax is considered to be a final tax for nonresident recipients of royalties. However, if royalties are derived with respect to properties or rights effectively connected with a PE of a nonresident, a 20% withholding tax rate is imposed, unless a non-deduction certificate is obtained by the PE. The 20% withholding tax is credited against the final tax liability.

Pakistan has also entered into treaties that cover only shipping and air transport. These treaties are not included in the above table.

## A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	20 (a)
Branch Tax Rate (%)	20 (a)(b)
Withholding Tax (%) (c)	
Dividends	10
Interest	0
Royalties from Patents, Know-how, etc.	5
Payments for Services and Goods	10 (d)
Other Payments to Nonresidents	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This is the maximum rate, see Section B.  
 (b) Foreign branches operating in Palestine are taxed like Palestinian companies.  
 (c) In general, the withholding taxes may be credited against income tax due.  
 (d) This withholding tax applies to resident and nonresident companies. It applies to payments of higher than ILS2,500 if the vendor does not provide a deduction-at-source certificate.

## B. Taxes on corporate income and gains

**Corporate income tax.** Palestinian companies and branches of foreign companies carrying on business in Palestine are subject to corporate income tax. A company is considered Palestinian if it is registered in Palestine. A branch of a foreign company registered in Palestine is treated like a Palestinian company.

**Rates of corporate income tax.** Corporate income tax is imposed at a rate of 15% on income up to ILS125,000, and at a rate of 20% on the amount above ILS125,000. The tax rate on life insurance companies is 5% of the total life insurance premiums owed to the company. Interest income derived by banks from small and medium-sized entities' finance programs is subject to income tax at a rate of 10%.

Under the Law for Encouragement of Investments, as amended in 2014, approved companies may pay income tax at the following rates:

- 5% for a period of five years beginning on the date of realization of profit but not exceeding four years from the beginning of the company's operations
- 10% for a period of three years after the end of the first phase
- The standard rate after the end of the three-year period

An application must be filed with the Palestinian Investment Promotion Agency to obtain approval for these tax benefits.

**Capital gains.** Capital gains are taxable. However, gains arising from the sale of shares and bonds are exempt. The expenses related to these exempt gains are not deductible for tax purposes. These nondeductible expenses are calculated according to a formula in the law and subtracted from the total expenses of the entity.

**Administration.** Companies must file a corporate tax return by the end of the fourth month after their year-end. All companies must use the calendar year as their tax year, unless the tax authorities approve a different tax year. As a result, tax returns are generally due on 30 April. Any balance of tax due must be paid by the due date of filing the annual tax return.

Payment of income tax on account must be made in accordance with instructions issued by the Minister of Finance. The tax regulations provide incentives for advance tax payments made during the tax year. The incentive rates are announced at the beginning of the tax year.

Special incentives are granted for companies who file and pay within a certain period after the tax year-end. For filing and paying during the first and second months after the year-end, the discount is 4%. The discount is 2% for the third month.

**Dividends.** Under the Income Tax Law amendments in 2014, dividends are subject to income tax. Dividends distributed by companies resident in Palestine are subject to withholding tax at a rate of 10% and are considered as a payment on account.

**Interest.** Interest is subject to income tax at the applicable income tax rate.

### **C. Determination of trading income**

**General.** Taxable income is the income reported in the companies' financial statements, subject to certain adjustments.

All types of income are taxable, unless otherwise stated in the law.

All business expenses incurred to generate income may be deducted, with limitations on certain items, such as entertainment

and donations. A certain percentage of entertainment expenses is deductible. Head-office charges are limited to 2% of branch net taxable income.

**Inventories.** The tax law does not specify a particular method for determining the cost of inventory.

**Provisions.** In general, provisions are not deductible for tax purposes, except for banks and insurance companies. Banks can deduct bad debt provisions, and insurance companies can deduct part of its unexpired risks' and outstanding claims' provisions.

**Depreciation.** The Palestinian tax law provides straight-line tax depreciation rates for various types of assets. These rates are applied to the purchase prices for the assets. If the rates for accounting purposes are greater than the tax depreciation rates, the excess is disallowed but may be used for tax purposes at a later date. The following are the straight-line rates for certain assets.

Asset	Rate (%)
Industrial buildings	4
Transportation	
Land transportation	
Cars, trains, buses, trucks and trailers	10
Cars and buses for public transportation and for driving schools	12
Air transportation	
Aircraft	8
Cable cars	5
Sea transportation	
Ships for transportation, cargo and freezing	5
Boats and yachts	8
Sport and racing boats	15
Other ships or boats that work over or under the water	15
Office equipment	7 to 10
Equipment used in industrial activities	5 to 10
Equipment used in agricultural activities	7 to 25
Technological equipment	20 to 25
Office furniture and decoration	10 to 15
Computers	20

**Groups of companies.** Companies must file separate financial statements for tax purposes.

**Relief for losses.** Companies may carry forward losses to the following five tax years.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	16
Wages and profit tax; imposed on financial institutions instead of VAT and in addition to corporate income tax	16
Property tax; based on 80% of the assessed rental value	17

### **E. Foreign-exchange controls**

The Palestinian Authority does not have a currency. Major currencies used in Palestine include the Israeli shekel (ILS), Jordanian dinar (JOD) and the US dollar (USD).

### **F. Tax treaties**

The Palestinian Authority has entered into double tax treaties with Jordan, Oman, Serbia, Sri Lanka, Sudan, Turkey, the United Arab Emirates and Vietnam.

The Palestinian Authority has also entered into tax treaties related to customs with the European Union, Japan, Turkey, the United States and certain Arab countries. Under these treaties, goods imported from the treaty countries have either full or limited customs exemption, depending on the type of goods imported.

Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (d)

- (a) See Section B for details concerning deemed dividend tax.  
 (b) The withholding taxes apply only to nonresidents. Nonresident companies are entities not incorporated in Panama.  
 (c) Certain interest is exempt from tax. See Section B.  
 (d) For details, see Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Corporations, partnerships, branches of foreign corporations, limited liability companies and any other entity considered a legal entity by law are subject to income tax on any profits or income generated in or derived from Panama. Income that does not arise in Panama or is not derived from Panama is not subject to tax in Panama. However, dividends arising from foreign income that are distributed by Panamanian companies holding a Notice of Operation (formerly Commercial License) are subject to tax (for further details, see *Dividends*).

**Corporate income tax rates.** Income tax is assessed at a flat rate of 25% on net taxable income. For details regarding net taxable income, see Section C.

Taxpayers with annual taxable income greater than PAB1,500,000 are required by law to calculate the tax using two methods and pay the higher of the amounts calculated under these methods. This calculation must be included in their annual income tax return. The following are the two methods:

- Applying the corresponding tax rate to the net taxable income
- Applying the corresponding tax rate to 4.67% of the total income

**Headquarters Law.** The Headquarters Law contains a special tax-incentive regime for multinational companies that establish their headquarters in Panama (Multinational Company Headquarters [Sede de Empresas Multinacionales, or SEM] regime).

Under the Headquarters Law, a headquarters is the office that renders services, such as management services, to operations based in a geographically limited area or to the global operation as a whole. Under the law, a headquarters may provide only specified services, including the following:

- Technical assistance
- Financial and accounting services
- Logistics or warehousing services to the multinational group
- Marketing and publicity
- Plot or construction design

These services must be part of the ordinary course of business of the parent company or its affiliates.

Under the Headquarters Law, the headquarters must belong to a multinational company with either regional or international operations or significant operations in the country of origin. To operate under the Headquarters Law, a license granted by the Commission of Licenses of the Multinational Companies of the Ministry of Commerce and Industry must be obtained. Companies granted a license are exempt from income tax for services rendered to entities domiciled abroad that do not generate taxable income in Panama. However, if the services rendered by the company affect the production or conservation of Panamanian income and if the price or value of the services provided is considered to be a deductible expense by the services recipient, the income related to those services is considered to be Panamanian-source income. In this case, the recipient of the services must withhold 25% of 50% of the amount paid to the company under the Headquarters Law regime (effective tax rate of 12.5%).

Companies granted a license to operate under this regime, are exempt from value-added tax (VAT). However, the VAT exemption applies only to the export of services. The VAT exemption does not apply to imports made by the headquarters or the sale or purchase of goods or services rendered in Panama.

In addition, the Headquarters Law creates a special immigration regime for foreign employees working for the beneficiary company in Panama. Permanent visas can be obtained for expatriates with an employment contract. After five years, they can obtain permanent residency. These employees are exempt from income tax and social taxes if they receive all of their compensation directly from the head office outside of Panama and not through the local payroll.

Foreigners who have special temporary visas are not subject to income tax if they satisfy the following conditions:

- From an office established in Panama, they direct transactions that take place or produce effects abroad.
- They receive their income directly from abroad.

Contributions to the social security regime are not required for such foreigners.

### Capital gains

*Shares and quotas.* Under Section 701(e) of the Panamanian Fiscal Code, capital gains derived from the transfers of shares or quotas are subject to capital gains tax if the shares or quotas were issued by a company that has operations or assets located in Panama. The tax applies regardless of the place where the transaction takes place. Capital gains are taxed in accordance with the following rules:

- Capital gains derived from transfers of shares in Panama that constitute taxable income are subject to income tax at a reduced rate of 10%.
- The buyer must withhold 5% from the purchase price as an advance income tax payment and remit the withholding tax to the tax authorities within 10 days following the date on which the payment was made according to the transaction documents. Failure to comply with this obligation transfers the liability to the seller of the shares.
- The 5% tax withheld by the buyer can be credited against the final 10% capital gain tax. However, the seller may elect to consider the 5% tax to be the final income tax payment.
- If the 5% tax withheld by the buyer is higher than the 10% income tax on the capital gain, the taxpayer may claim a cash refund or credit the excess against other tax liabilities. The tax credit may also be transferred to another taxpayer.
- Income derived from capital gains is not included in the seller's ordinary income for the fiscal year, because the tax due is paid through withholding.

Indirect transfers of shares "economically invested in Panama" are also subject to Panamanian capital gains tax, even if the seller and buyer are nonresidents. Specific rules apply to compute the gain if one or several entities that are being transferred generate both Panamanian-source income and foreign-source income. In this case, the tax base is the proportion of Panamanian-source income determined by using the greater amount resulting from the following two methods:

- The equity amount of the entities that earn taxable income in Panama divided by the total equity of the transaction
- The proportion of assets economically invested in Panama divided by the total assets of the transaction

*Movable assets.* Capital gains derived from transfers of movable assets are subject to income tax at a reduced rate of 10%.

*Real estate transfer tax.* The sale of real estate located in Panama is subject to a 2% property transfer tax. The 2% property transfer tax rate is applied to the higher of the following amounts:

- Sales price set forth in the public deed of transfer
- The cadastral value of the property on the date of the acquisition, plus any increase in value derived from improvements, plus 5% per year computed on the sum of the cadastral value and the improvements

To execute the deed of transfer before a Notary Public, the seller of real estate must submit evidence to demonstrate that the corresponding transfer tax and capital gains tax have been paid.

The real estate transfer tax is not imposed on the first transfer of new houses and commercial establishments if the transfer occurs within the two-year period after the occupation permit is issued.

*Sales of homes and business premises by taxpayers engaged in real estate business.* Effective from 1 January 2012, for home sales by taxpayers in the real estate business, the following rates are applied to the higher of the total value of the transfer or the land value.

Higher of transfer or land value	Rate %
PAB0 to PAB35,000	0.5
PAB35,000 to PAB80,000	1.5
Over PAB80,000	2.5

The rate imposed on taxpayers in the real estate business for sales of new business premises is 4.5%.

The above rates apply if building permits are issued on or after 1 January 2010.

*Ordinary taxpayers that are not engaged in the trade or business of the purchase and sale of real estate.* For ordinary taxpayers that are not engaged in the trade or business of the purchase and sale of real estate, tax is calculated at a rate of 10% on taxable income. This income is not taken into account in determining the taxpayer's taxable income, and the taxpayer may not deduct the transfer tax or transfer fees incurred.

Advance income tax of 3% must be paid on the greater of the total value of the transfer or cadastral value.

The above tax can be considered as final payment or the surplus can be reimbursed if the amount of the tax exceeds 10% of taxable income.

**Administration.** The calendar year is the fiscal year. However, under certain circumstances, a special fiscal year may be requested from the Panamanian tax authorities. Businesses earning income subject to Panamanian tax must file annual income tax returns even if the net result for the period is a loss. Corporations having no Panamanian taxable income or loss are not required to file income tax returns. Tax returns are due 90 days after the end of the fiscal year. The regulations provide for an extension of time of up to one month to file an income tax return if the corporation pays the estimated tax due.

Monthly interest is charged for late payments. The interest charges are calculated based on rates established periodically by the tax authorities. These rates equal the local reference banking annual interest rate for commercial financing as defined by the Panamanian Banking Superintendence plus two percentage points. If an extension is obtained, any tax that is due when the return is filed is subject to the above-mentioned interest rate. Late payments of taxes made after 1 January 2015 are subject to a 10% surcharge. This 10% surcharge is imposed in addition to the late payment interest.

Tax returns must be filed on electronic forms provided by the Panamanian tax authorities. The taxpayer must file an estimated

tax return for the following year together with the income tax return. The total amount of estimated tax for the following year, which normally cannot be lower than the income declared in the current-year return, must be paid in full or in three equal installments by 30 June, 30 September and 31 December.

**Dividends.** All companies that have a Notice of Operations or Commercial License (the prior name of the Notice of Operations) or that generate taxable income in Panama must pay dividend tax at a fixed rate of 10% for nominative shares and 20% for bearer shares. Dividends distributed from foreign-source income, export operations, and certain types of exempt income are subject to a final 5% withholding tax. Subsequent distributions of these dividends are not taxed if they arise from dividends that already have been subject to the above-mentioned withholding.

Dividends distributed by entities in free-trade zones from local-source income, foreign-source income, export activities and certain types of exempt income are subject to a final 5% withholding tax.

The following are exempt dividends:

- Dividends distributed by Panamanian companies that do not require a Notice of Operations or Commercial License and that do not produce any taxable income in Panama
- Dividends distributed by entities under the tax-incentive system for multinational companies that establish headquarters in Panama (SEM regime; see *Headquarters Law*)
- Dividends distributed by entities under the Panama-Pacifico Special Economic Area (Howard Regime) from activities that are exempt under such regime

If a tax treaty applies, the treaty measures prevail over the domestic rules.

**Withholding taxes.** The withholding tax rate is 12.5% for interest and royalties paid to nonresident companies. Payments to non-residents for professional services rendered in Panama or from abroad are subject to a 12.5% withholding tax. The tax must be withheld by the enterprise that receives the benefits of the loans, leases or professional services, and must be remitted to the government within 10 days after the tax is withheld or the account is credited, whichever occurs first.

Interest income derived from the following investments is exempt from withholding tax:

- Savings and time deposits held in Panamanian banks
- Panamanian government securities
- Securities issued by companies registered with the National Securities Commission, if the securities were acquired through a securities exchange established to operate in Panama
- Interest and commissions paid by banking institutions in Panama to international banks or financial institutions established abroad, in connection with loans, bankers' acceptances and other debt instruments
- Interest paid to official or semiofficial institutions of international bodies or foreign governments
- Interest paid to foreign investors, if the capital on which such interest is paid is exclusively intended for housing projects for people of low income

For a loan granted by a domestic bank or related Panamanian party, no withholding tax is applicable, because the financial services payment is taxed in the lender's annual income tax return.

Except in the case of financing, if a local company does not take a deduction for an expense, no withholding tax applies.

**Foreign tax relief.** Because Panama taxes only income sourced in Panama, regardless of where payment is received or the residence of the taxpayer, no credit or deduction is available for any foreign taxes paid, except in international transport activities.

### C. Determination of trading income

**General.** Taxable income or revenue includes all income derived from business activities in Panama less expenses incurred wholly and exclusively in the production of taxable income or the conservation of its source.

Net taxable income is the difference or balance that results on deducting the following from gross income or general earnings:

- Foreign income
- Exempt income
- Deductible costs and expenses

Revenues must be recognized in the year in which they are earned. Construction companies may recognize long-term contract revenues either by the percentage-of-completion method, percentage-of-invoicing method or the completed-contract method. The installment-sales method of recognizing revenue is not permitted by the Panamanian Fiscal Code.

Earnings derived from the following activities are not considered to be Panamanian source:

- Invoicing by an office established in Panama for sales of merchandise or goods for amounts greater than cost, provided the merchandise never enters Panama
- Directing by an office established in Panama of transactions that are completed, consummated or take effect outside Panama
- Distributing dividends or profits derived from income not generated in Panama, including income derived from the two activities noted above, to the extent that the company distributing dividends does not hold a Notice of Operation

All expenses incurred wholly and exclusively in the production of taxable income or in the conservation of its source are allowed as deductions for income tax purposes, regardless of where the expense is incurred. Expenses of one tax year may not be deducted the following year, except those which, by their nature, cannot be determined precisely in the current tax year.

Interest is a deductible expense if it is incurred on loans or credits necessary for the production of taxable income. If non-taxable interest income from savings accounts or certificates of deposit is earned, the only interest deductible is the excess of the interest expense over the non-taxable interest income. Royalties are deductible, except for those paid abroad by free-zone companies.

**Inventories.** Inventories may be valued by using the first-in, first-out (FIFO), last-in, first-out (LIFO) or average-cost methods.

However, the Panamanian tax authorities may allow other methods. After a system of valuation is adopted, it may not be changed for five years.

**Provisions.** The only deductible reserves are those for depreciation, bad debts (1% of credit sales, up to 10% of total receivables) of entities other than banks and financial institutions and certain fringe benefits. Reserves for personal insurance and contingencies are not deductible.

**Tax depreciation and amortization allowances.** Depreciation allowances are permitted for capital expenditures incurred in the production of taxable income. Depreciation may be computed by using the straight-line, declining-balance or sum-of-the-years' digits methods. Depreciation is computed over the useful life of an asset. The minimum useful lives are 3 years for movable assets and 30 years for buildings.

Start-up expenses may be amortized over a period of five years. Improvements to leased properties must be amortized over the period of the lease. Purchasers of intangible assets, such as patents and goodwill, may claim straight-line amortization deductions for such assets when they derive income from such assets.

**Relief for losses.** Tax-loss carrybacks are not recognized under Panamanian law. Carryforwards of net operating losses are allowed. Taxpayers can deduct net operating losses over a period of five years following the year in which the loss is incurred. The maximum annual deduction is 20% of the relevant loss, but the amount of the deduction may not exceed 50% of the taxable income for the year.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; tax on the sale or transfer of any chattel, services and imports of goods; certain goods and services are specifically exempt, such as medical services and fixed telephony that is not for commercial use	7
Notice of Operation (formerly Commercial and Industrial Licenses); paid annually on corporate capital (up to a maximum amount of PAB60,000)	2
Notice of Operation for companies operating under a free-trade zone regime; paid annually on corporate capital (up to a maximum tax of PAB50,000)	1
Municipal tax; based on the nature of the business activity and the amount of sales (up to a maximum tax of PAB3,000 a month)	Various
Social security contributions and education tax, based on wages or salaries; paid by	
Employer	12.5
Employee	9.75
Excise taxes	
Imports and sales of alcoholic beverages	10
Imports and sales of tobacco and cigarettes	15

Nature of tax	Rate (%)
Imports of jewels, cars, motorcycles, jet skis, boats (including sailboats), non-commercial airplanes, cable and microwave television services and mobile phones	Various
Public accommodations and lodging services	10

## E. Miscellaneous matters

**Foreign-exchange controls.** Panama does not impose foreign-exchange controls.

**Transfer pricing.** Cross-border intercompany transactions conducted by Panamanian taxpayers are subject to transfer-pricing obligations if the transactions result in income, costs or expenses that are taken into account in the determination of taxable income.

The transfer-pricing rules are based on the arm's-length principle established in the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations.

An annual statement of transactions (Form 930) with related parties must be submitted to the tax authorities within six months after the end of the fiscal year (if the fiscal year coincides with the calendar year, the deadline is June 30). In addition, taxpayers must prepare a transfer-pricing study and make it available to the tax authorities.

If Form 930 is not filed, a 1% fine capped at PAB1 million applies to the gross amount of the transactions with related parties.

## F. Treaty withholding tax rates

Panama has entered into tax treaties with Barbados, the Czech Republic, France, Ireland, Israel, Korea (South), Luxembourg, Mexico, the Netherlands, Portugal, Qatar, Singapore, Spain, the United Arab Emirates and the United Kingdom. Panama has signed a tax treaty with Italy, but it is not yet in effect. Panama has concluded treaty negotiations with Austria, Bahrain, Belgium, Hungary and Vietnam.

The following are withholding tax rates under Panama's tax treaties.

	Dividends %	Interest %	Royalties %
Barbados	7.5 (a)	0/5/7.5 (j)(k)	0/7.5 (t)
Czech Republic	10	0/5/10 (w)(x)	10
France	5/15 (b)	0/5 (l)	5
Ireland	5	0/5 (y)	5
Israel (gg)	5/15/20 (ee)	0/15 (ff)	15
Korea (South)	5/15 (c)	0/5 (m)	0/10 (u)
Luxembourg	5/15 (b)	0/5 (l)	5
Mexico	5/7.5 (c)	0/5/10 (n)(o)	10
Netherlands	0/15 (d)	0/5 (p)	5
Portugal	10/15 (e)	10 (q)	10
Qatar	6 (f)	6 (r)	6
Singapore	5 (g)	5 (s)	5
Spain	0/5/10 (h)(i)	5 (v)	5

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
United Arab Emirates	5 (aa)	0/5 (bb)	5
United Kingdom	0/15 (cc)	0/5 (dd)	5
Non-treaty countries (z)	10/12.5	12.5	12.5

- (a) The rate equals 75% of the statutory nominal rate applicable at the time of dividend distribution. The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payor of the dividends. The rates do not apply to dividends paid on bearer shares.
- (b) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 10% of the capital of the payor of the dividends.
- (c) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 25% of the capital of the payor of the dividends.
- (d) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 15% of the capital of the payor of the dividends (additional specific conditions apply).
- (e) The rate is reduced to 10% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payor of the dividends.
- (f) The rate is reduced to 0% if the beneficial owner of the dividends is the other state, a political subdivision, a local authority or the central bank of the other state, a pension fund, an investment authority or any other institution or fund that is recognized as an integral part of the other state, political subdivision or local authority, as mutually agreed.
- (g) The rate is reduced to 4% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 10% of the capital of the payor of the dividends.
- (h) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 40% of the capital of the payor of the dividends.
- (i) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 80% of the capital of the payor of the dividends (additional specific conditions apply).
- (j) The rate is reduced to 5% if the interest is derived by a bank that is a resident of Barbados.
- (k) The rate is reduced to 0% if the beneficial owner of the interest is a contracting state, the central bank of a contracting state, or a political subdivision or local entity of the contracting state or if the interest is paid to another entity or body (including a financial institution) as a result of financing provided by such institution or body in connection with an agreement concluded between the governments of the states.
- (l) The rate is reduced to 0% with respect to the following:
- Interest paid to or by the state, a local authority or central bank
  - Interest paid on sales on credit
  - Interest paid by a financial institution to another financial institution
  - Interest paid to the state as a result of financing provided in relation to an agreement between the governments of the states
- (m) The rate is reduced to 0% with respect to the following:
- Interest paid to the state, a local authority, central bank or a public financial institution
  - Interest paid on sales on credit
  - Interest paid to entities (including financial institutions) as a result of financing provided in relation to an agreement between the governments of the states
- (n) The rate is reduced to 5% if the interest is derived by a bank that is a resident of Mexico.
- (o) The rate is reduced to 0% with respect to interest paid to the state, a political subdivision or local entity of the state, the central bank or specific credit institutions.
- (p) The rate is reduced to 0% with respect to the following:
- Interest paid to the state, a local authority or the central bank
  - Interest paid on sales on credit
  - Interest paid to the state as a result of financing provided in relation to an agreement between the governments of the states
  - Interest paid to pension funds

- 
- (q) The rate is reduced to 0% with respect to interest paid to the state, a political subdivision or local entity, or the central bank.
- (r) The rate is reduced to 0% with respect to the following:
- Interest paid to the state or a political subdivision or local authority of the state
  - Interest paid to specific credit institutions
  - Interest paid on sales on credit
  - Interest paid by a financial institution to another financial institution
  - Interest paid as a result of financing provided in relation to an agreement between the governments of the states
- (s) The rate is reduced to 0% with respect to interest paid to the government or to banks.
- (t) The rate is reduced to 0% with respect to royalties including royalties for scientific works related to biotechnology industry.
- (u) The rate is reduced to 3% with respect to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (v) The rate is reduced to 0% with respect to the following:
- Interest paid to or by the state, a local authority or central bank
  - Interest paid on sales on credit
  - Interest paid by a financial institution to another financial institution
  - Interest paid to the state as a result of financing provided in relation to an agreement between the governments of the states
  - Interest paid to pension funds
- (w) The rate is 5% if the beneficial owner is a bank that is a resident of the other contracting state.
- (x) The rate is reduced to 0% if any of the following circumstances exists:
- Interest arises in a contracting state and is paid to a resident of the other contracting state that is the beneficial owner thereof, and such interest is paid in connection with the sale on credit of merchandise or equipment.
  - Interest is paid to the government of the other contracting state, including a political subdivision or local authority thereof, the central bank or a financial institution owned or controlled by such government.
  - Interest is paid to a resident of the other state in connection with a loan or credit guaranteed by the government of the other state, including a political subdivision or local authority thereof, the central bank, or a financial institution owned or controlled by such government, if the loan or credit is granted for a period of not less than four years.
- (y) The rate is reduced to 0% if any of the following circumstances exists:
- The beneficial owner of the interest is a contracting state, the central bank of a contracting state, or a political subdivision or local authority of such state.
  - Interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of a contracting state.
  - Interest is paid to other entities or bodies (including financial institutions) as a result of financing provided by such institutions or bodies in connection with agreements concluded between the governments of the states.
  - Interest is paid to a pension fund established in the other contracting state to provide benefits under pension arrangements recognized for tax purposes in that other contracting state.
- (z) See Section A.
- (aa) The rate is reduced to 5% if the beneficial owner of the dividends is a resident of the other contracting state.
- (bb) The rate is reduced to 5% if the beneficial owner of the interest is a resident of the other contracting state. The rate is reduced to 0% if any of the following circumstances exists:
- The beneficial owner of the interest is the government, a political subdivision or a local authority of the other contracting state.
  - The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of a contracting state.
  - The interest is paid to financial institutions and other bodies as a result of financing provided by such institutions or bodies in connection with agreements concluded between the governments of the contracting states.
- (cc) The rate is 15% if the beneficial owner of the dividends is a resident of the other contracting state. The withholding tax rate is reduced to 0% if either of the following circumstances exists:
- The beneficial owner of the dividends is a company that is a resident of the other contracting state and that holds directly at least 15% of the capital of the entity paying the dividends, and other requirements are satisfied.
  - The beneficial owner of the dividends is a contracting state, a political subdivision or local authority thereof, or a pension scheme.

- (dd) The rate is reduced to 5% if the beneficial owner of the interest is one of the following persons:
- An individual
  - A company whose principal class of shares is regularly traded on a recognized stock exchange
  - A financial institution that is unrelated to, and dealing wholly independently with, the payor
  - A company other than those mentioned above, subject to conditions
- The rate is also reduced to 5% if the beneficial owner of the interest is a resident of the other contracting state and any of the following circumstances exists:
- The interest is paid by a contracting state or a political subdivision or local authority thereof.
  - The interest is paid by a bank in the ordinary course of its banking business.
  - The interest is paid on a quoted Eurobond.
- The rate is reduced to 0% if any of the following circumstances exists:
- The beneficial owner of the interest is a central bank of the contracting state or any of its political subdivisions or local authorities.
  - The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of a contracting state.
  - The interest is paid to other entities or bodies (including financial institutions) as a result of financing provided by such entities or bodies in connection with agreements concluded between the governments of the contracting states.
  - The beneficial owner of the interest is a pension scheme.
- (ee) The rate is reduced to 15% if the beneficial owner of the dividends is a resident of the other contracting state. The rate is reduced to 5% if the beneficial owner is a pension fund that is a resident of the other contracting state. A 20% withholding tax rate applies if dividends are distributed by a real estate investment company and if the beneficial owner holds less than 10% of the capital of the real estate investment company.
- (ff) The standard rate is 15%. Interest payments to specific entities and interest paid on traded corporate bonds are exempt (0% rate).
- (gg) The treaty between Panama and Israel is effective from 1 January 2015.

## A. At a glance

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	0
Branch Income Tax Rate (%)	48 (a)
Withholding Tax (%)	
Dividends	0/10/17 (b)
Interest	15
Royalties	
Associates	30
Non-associates	– (c)
Foreign contractors	12
Management fees	17
Net Operating Losses (Years)	
Carryback	0
Carryforward	20 (d)

- (a) See Section B.
- (b) The 0% rate applies to dividends paid out of oil or gas profits. The 10% rate applies to dividends paid out of mining profits. The 17% rate applies to other dividends.
- (c) For payments to non-associates, the amount of tax equals the lesser of 10% of assessable income or 48% of taxable income. Assessable income is the amount assessable under the provisions of the Income Tax Act. Taxable income is the amount remaining after deducting from assessable income all allowable deductions.
- (d) Resource (mining, oil and gas) and primary production taxpayers may carry forward losses for an unlimited number of years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to income tax on worldwide assessable income. Nonresident companies carrying on business through a branch pay tax only on Papua New Guinea (PNG)-source income. A resident company is a company

incorporated in PNG. A company not incorporated in PNG is considered a resident company if it carries on business in PNG and it has either its central management and control in PNG or its voting power controlled by shareholders who are residents of PNG.

**Tax rates.** Resident companies are subject to tax at a rate of 30%. Branches of nonresident companies (other than those engaged in mining operations) are subject to tax at a rate of 48%. Nonresident companies deriving “prescribed income” are subject to the foreign contractor provisions (see *Foreign Contractor Withholding Tax*).

The following table lists the tax rates for companies engaged in mining, petroleum and gas operations.

	Residents' rate (%)	Nonresidents' rate (%)
New petroleum operations	45	45
Incentive rate petroleum operations	30	30
Other petroleum operations	50	50
Gas operations	30	30
Mining operations	30	40

In addition to any tax liability determined in accordance with the above rates, an Additional Profits Tax may be levied with respect to gas projects in certain circumstances.

**Foreign Contractor Withholding Tax.** Most activities conducted by nonresidents in PNG (including PNG branches), other than individuals deriving employment income, fall under the foreign contractor and management fee (see *Management Fee Withholding Tax*) provisions of the domestic law. The Foreign Contractor Withholding Tax (FCWT) applies if income is derived by nonresidents (usually referred to as “foreign contractors”) from contracts for “prescribed purposes,” including installation and construction projects, consultancy services, lease of equipment and charter agreements.

FCWT is calculated by reference to the gross contract income. In broad terms, the PNG Income Tax Act provides that if a foreign contractor derives income from a prescribed contract, the person is deemed to have derived taxable income of 25% of the gross contract income. This taxable income is subject to tax at the nonresident corporate tax rate of 48%, resulting in an effective PNG tax rate of 12% on the gross contract payment. The local contracting party must withhold the tax and remit it to the Internal Revenue Commission (IRC) within 21 days after the end of the month in which the payment is made.

As an alternative to paying FCWT, the foreign contractor can elect to file an income tax return and pay tax on actual taxable income at the nonresident corporate tax rate of 48%. This election must be made by written request to the Commissioner of Internal Revenue before the end of the year following the commencement of the contract. The FCWT is considered the default tax regime. Requests to be assessed on a net profit basis are subject to the discretion of the Commissioner General.

If the foreign contractor elects to be assessed on a net profit basis, a deduction is available for all costs directly attributable to the derivation of the PNG-source income, including depreciation of equipment. A deduction is also available for any indirect costs

related to the income (that is, head office, general administration and management expenses). The deduction for indirect costs is limited to the lesser of the following:

- 5% of the gross income from the prescribed contract
- An amount calculated by applying to the total head office general administration and management expenses (other than expenses incurred directly in deriving the contract income) the ratio of the gross income from the prescribed contract to the worldwide income of the taxpayer

**Management Fee Withholding Tax.** Subject to the availability of treaty relief, Management Fee Withholding Tax (MFWT) at a rate of 17% must be withheld from management fees paid or credited to nonresidents.

The definition of “management fee” is very broad and includes “a payment of any kind to any person, other than to an employee of the person making the payment and other than in the way of royalty, in consideration for any services of a technical or managerial nature and includes payment for consultancy services, to the extent the Commissioner is satisfied those consultancy services are of a managerial nature.”

In practice, MFWT generally applies to services rendered outside PNG, and FCWT (see *Foreign Contractor Withholding Tax*) applies to fees for services rendered in PNG.

The deduction for management fees paid by a PNG resident company to a nonresident associate cannot exceed the greater of 2% of assessable income derived from PNG sources or 2% of allowable deductions excluding management fees paid. In addition, for resource companies, to the extent that management fees exceed 2% of the allowable exploration or capital expenditure (other than management fees) incurred during the year, the excess is not allowable exploration or capital expenditure, respectively. However, a full deduction is allowed if the management fee can be supported as an arm’s-length transaction. The above limit does not apply with respect to payments made to non-associates.

**Incentives.** Several specific incentives are available with respect to taxpayers operating in certain industries, including resource taxpayers (mining, oil and gas) and taxpayers engaged in primary production. These incentives range from general concessions with respect to the calculation of taxable income to concessions with respect to specific types of expenditure. Although some investors have been able to negotiate specific incentives for particular projects, the government now aims to include all tax concessions in the domestic legislation and make any concessions available on an industry basis with the goal of developing a more neutral and equitable treatment of projects.

**Capital gains.** Capital gains are not subject to tax in PNG. The disposal of a capital asset may be subject to tax to the extent the disposal takes place as part of a profit-making scheme or is part of the ordinary business activities of a taxpayer.

Although capital gains on the disposal of depreciable plant and equipment are generally not subject to tax, a calculation of any gain or loss on disposal must be performed. If the amount received exceeds the tax written-down value, an amount of income may

be derived (up to the amount of depreciation deductions previously claimed). Alternatively, if the amount received on disposal is less than the tax written-down value, the taxpayer may be able to claim a deduction.

**Administration.** The PNG tax year is the calendar year. However, for most companies, a substituted accounting period is permitted on written request to the Commissioner General of Internal Revenue. Tax for any fiscal year is payable in three equal installments on a provisional tax assessment basis according to the following schedule:

- First installment by 30 April
- Second installment by 31 July
- Third installment by 31 October

Provisional tax is generally assessed by the Commissioner based on the income tax return of the preceding year. Accordingly, provisional tax does not generally become payable until after a taxpayer has filed its first tax return.

Any balance must be paid within 30 days after the assessment is issued and served on the taxpayer. Any overpayment of provisional tax is refundable to the taxpayer. The Commissioner General of Internal Revenue does not pay interest on overpaid tax. Penalties apply for underestimation of provisional tax.

Companies are required to file tax returns within two months after the end of the fiscal year (that is, by the end of February of the following year). However, for returns filed by registered tax agents, extensions of an additional four, six or eight months are possible, depending on the level of taxable income. The income and expenses of taxpayers must be expressed in Papua New Guinea currency, unless permission is granted by the Commissioner General of Internal Revenue to report in a currency other than Papua New Guinea currency.

Companies carrying on business in PNG, or deriving income in PNG, must appoint a public officer to act as the representative of the company in all dealings with the IRC. The public officer need not be an employee or shareholder of the company but must be tax resident in PNG.

**Dividends.** Dividends received by resident companies from other resident companies are fully rebatable; that is, although dividends received by corporate taxpayers from other PNG corporations are fully assessable, the taxpayers may claim a credit of 30% (corporate tax rate), thereby reducing the effective tax rate to nil. Dividends are exempt if they are paid out of profits derived by petroleum or gas operations. Dividends paid out of profits arising from the sale or revaluation of assets that were acquired for purposes other than resale at a profit are also exempt if the dividend is distributed through the issuance of non-redeemable shares.

Dividends paid or credited by resident companies to nonresident shareholders are generally subject to a final 17% dividend withholding tax (unless the rate is reduced by a tax treaty), which is deducted at source from the gross amount of the dividend.

**Foreign tax relief.** A resident deriving foreign-source income that has been subject to foreign tax is entitled to a credit equal to the lesser of the following:

- The foreign tax paid
- The amount of PNG tax payable on that income

For purposes of the foreign tax credit, no distinction is made between income derived from treaty and non-treaty countries.

### C. Determination of trading income

**General.** Income is defined as the aggregate of all sources of income, including annual net profit from a trade, commercial, financial or of other business. Expenses are deductible to the extent that they are incurred in producing assessable income, and are not capital or of a capital nature or incurred in producing exempt income. Deductions are allowable for certain capital expenditures incurred in the agriculture and fishing industries.

**Foreign-exchange gains and losses.** Realized exchange gains and losses from debts incurred or borrowings made on or after 11 November 1986 (at any time with respect to reforestation activities) in a foreign currency are generally assessable and deductible, respectively, as well as any realized gains or losses made on amounts of income or deductions. Unrealized gains are not assessable, and unrealized losses are not deductible.

**Inventories.** Trading stock must be valued at the end of an income year either at cost, market selling price, or replacement price. Any change in the method of valuing trading stock must be approved by the Commissioner General of Internal Revenue. The Commissioner has the discretion to make adjustments if the trading stock is sold or otherwise disposed of other than at market value.

**Provisions.** Provisions are not deductible until payments are made or, in the case of doubtful debts, until the debts are considered totally irrecoverable and are written off.

**Tax depreciation.** Depreciation of fixed assets that are used in the production of taxable income is calculated using either the prime-cost (straight-line) method or the diminishing-value method. The default method is the diminishing-value method with taxpayers having the option by notice in writing to use the prime-cost method for any or all units of property. Any change in the method of depreciation must be approved by the Commissioner General of Internal Revenue.

The IRC publishes depreciation rates for certain items of plant and equipment. The following are some of the applicable rates published by the IRC.

Item	Method	
	Prime-cost (%)	Diminishing-value (%)
Manufacturing		
Cement, pipe and tile manufacturing plant	10	15
Chemical manufacturing plant	10	15
Primary industries, farmers and so forth		
Cocoa and coffee industry plant	10	15
Copra industry plant	5	7.5
Other industries		
Aircraft	10	15
Building industries	20	30

Item	Method	
	Prime-cost (%)	Diminishing-value (%)
Buildings		
Residential buildings	2	3
Storage buildings (steel framed)	4	6
Transportation		
Aircraft	12.5	18.75
Motor vehicles (other motor vehicles, including buses, lorries and trucks)	20	30
Wharves	5	7.5
Ships and steamers	7.5	11.25
Mining		
Development works	Nil	Nil
Dragline	13	20
Plant and machinery		
General plant and equipment	10	15
Drills	17	25
Earthmoving plant and heavy equipment	20	30
Motor trucks	20	30
Shovels	20	30
Oil		
Exploration	20	30
Oil companies		
Aircraft	25	37.5
Aircraft refueling equipment	15	22.5
Drilling plant	20	30
Seismic geophysical survey equipment	20	30
Oil rigs (offshore) and ancillary plant	10	15
Petroleum		
Drilling and down hole (specialized drilling) equipment	20	30
Earthmoving plant and heavy equipment	20	30
General plant and equipment	17	25
Onshore production plant	13	18
Offshore production plant	13	20
Refining plant	13	20
Wharves and jetties	5	7.5
Vehicles	20	30

The amortization deduction for allowable exploration expenditure (AEE) incurred by resource taxpayers is determined by dividing the undeducted expenditure by the lesser of the number of years in the remaining life of the project or four.

The deduction allowable for short-life allowable capital expenditure (ACE; effective life of less than 10 years) incurred by resource taxpayers is calculated by dividing the undeducted balance of ACE by the lesser of the number of years in the remaining life of project or 4. For long-life ACE (effective life of 10 years or more) incurred by resource taxpayers, depreciation must be calculated at a rate of 10% under the straight-line method.

The order of deductions for AEE and ACE amortization is AEE, long-life ACE and short-life ACE. The deductions may not create a loss and any excess deductions are carried forward to future years.

**Environmental protection and clean-up costs.** A specific deduction is available to taxpayers for certain expenditure incurred with respect to environmental-protection activities and clean-up costs incurred when pollution occurs. This measure is available to taxpayers in all industries. It was introduced to encourage taxpayers to safeguard the environment.

Several specific exclusions exist, including capital expenditure incurred to acquire land and buildings. Expenditure incurred for environmental impact studies is deductible under a separate measure (see *Environmental impact studies*).

Depreciation deductions are also available for plant and equipment used in environmental-protection activities.

**Environmental impact studies.** A deduction is allowed for environmental impact studies. For this purpose, an environmental impact study is the study of the environmental impact of an assessable income-producing activity or business that is carried on or proposed to be carried on in PNG by the taxpayer.

The expenditure incurred is apportioned over the life of the project or 10 years, whichever is less. If the taxpayer is in the resources industry, the cost of the environmental impact is not allowable under this measure, but is available under the specific resources taxation provisions.

Depreciation deductions are also available for plant and equipment used for environmental impact studies.

**Rehabilitation costs of resource taxpayers.** For resource projects that begin on or after 1 January 2012, at the end of a project, a resource taxpayer may transfer losses incurred on environmental rehabilitation to other projects owned by it. PNG uses ring-fencing provisions and calculates the profits of resource projects on a project-by-project basis. Historically, losses incurred were effectively lost if no further income was produced.

**Research and development.** On 1 January 2014, the extended deduction of 50% was phased out for research and development (R&D) expenditure. Previously, a 150% deduction was available for “prescribed” R&D expenditure. To claim the R&D concession, taxpayers needed to complete and submit an application annually to the Research and Development Expenses Approval Committee (within the PNG IRC) for approval before the start of the fiscal year. However, any expenditure on scientific research incurred before 1 January 2014 will continue to be eligible. In addition, although the additional deduction (50%) for eligible R&D expenditure has been abolished, such expenditure will continue to be deductible on a 100% basis even if such expenditure might otherwise be capital in nature and not deductible under general provisions.

The following payments and expenditure incurred by a taxpayer carrying on business for the purpose of obtaining assessable income may be allowable R&D deductions:

- Payments to an approved research institute for scientific research related to the business of the taxpayer and payments to an approved research institute for the purpose of undertaking research related to the business of the taxpayer
- Capital expenditure on scientific research related to the business of the taxpayer (except expenditure on plant, machinery, land or buildings, or alterations, additions or extensions to buildings)
- Expenditure on plant and equipment used solely for R&D purposes (depreciable at a rate of 33% per year)
- Expenditure on buildings and additions to buildings used solely for R&D purposes (deductible in equal installments over three years)

For purposes of the R&D concession, scientific research includes any activities in the fields of natural or applied science for the extension of knowledge.

**Relief for losses.** Losses incurred may generally be carried forward for 20 years. However, losses incurred by resource taxpayers and primary production taxpayers can be carried forward indefinitely. Losses incurred by a company are allowed as a deduction only if the taxpayer passes either the continuity of ownership test or the same business test.

For entities in the resources sector, losses may also be quarantined on a project basis.

Losses may not be carried back.

No provisions exist for grouping losses with associated companies (with the specific exception of certain company amalgamations).

**Groups of companies.** No provisions exist in PNG for the grouping of income or losses of associated companies or for other group relief. Companies are assessed on an individual basis.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and services tax (GST); imposed on virtually all goods and services unless the goods or services are exempt (for example, financial services and gambling) or the supply is zero-rated (for example, supplies to resource companies); any entity undertaking taxable activity in PNG must register and charge GST if taxable supplies exceed, or are expected to exceed, PGK250,000 in any 12-month period (the registration threshold before 1 January 2012 was PGK100,000); entities that are registered must account for GST collected (output tax) and GST paid (input tax) during each month with any excess of GST collected to be remitted to the IRC by the 21st day of the following month; entities may generally claim a refund for most GST input tax paid on importations or local purchases of goods and services	

Nature of tax	Rate (%)
Training levy; imposed on all businesses with an annual payroll exceeding PGK200,000; the amount payable is reduced by training expenses incurred by the employer for the benefit of PNG citizen employees; expenses incurred to train non-citizens are not qualifying training expenses for the purpose of the training levy	2
Customs and excise duty; imposed on all goods imported into PNG, unless the goods are duty-free or exempt from duty; duty is imposed on the total value including cost, insurance and freight; the rate of duty depends on the nature of the goods; a zero rate often applies to goods imported into PNG if the goods are not available in PNG, but a specific analysis must be undertaken in each instance	Various
Stamp duty; imposed on dutiable instruments such as deeds, share transfers and a wide range of other documents at varying rates; may also apply to documents executed outside PNG under provisions that impose an obligation to file documents for assessment for stamp duty with respect to property or activities in PNG	Various

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in PNG is the kina (PGK).

A tax-clearance certificate is required if certain cumulative remittances of foreign currency exceed PGK200,000 in a calendar year. For a remittance to a tax haven, a tax clearance is always required, regardless of the amount being remitted.

PNG resident companies are generally not permitted to receive payment for goods or services in a foreign currency. Consequently, if a contract is entered into between two PNG resident companies in a foreign currency (for example, US dollars), the settlement of the invoice must be made in Papua New Guinea currency. For exchange-control purposes, a resident includes a foreign company operating actively in PNG as a branch.

**Debt-to-equity ratios.** Previously, the thin-capitalization rules applied only to taxpayers operating in the resources sector. Effective from 2013, PNG's thin-capitalization rules apply to PNG companies in all industries. The 3:1 debt-to-equity ratio for resource companies is retained. However, all other companies are subject to a 2:1 ratio (with the exception of approved financial institutions which are not subject to any ratio). If the applicable ratio is breached, a proportion of the interest on foreign debt is denied as a tax deduction.

**Anti-avoidance legislation.** Contracts, agreements or arrangements that have the effect of avoiding any tax may be rendered void by the tax authorities.

**Transfer pricing.** Related-party transactions are accepted by the tax authorities if they are carried out at arm's length. However, a taxpayer's taxable income can be adjusted if transactions are not conducted on an arm's-length basis (that is, if the transaction

would not have been conducted on the same basis between independent parties). Specific provisions also exist with respect to management or technical fees paid to international related parties. Documentation of the appropriate methodology and calculation of pricing must be maintained.

**Controlled foreign companies.** The PNG tax legislation does not currently contain any controlled foreign company (CFC) rules. Consequently, any income derived by foreign subsidiaries of a PNG entity is typically taxed on a receipts basis only.

## F. Treaty withholding tax rates

Taxpayers self-assess any treaty reductions of withholding taxes.

The following table lists the treaty withholding tax rates for dividends, interest, royalties, management fees and payments to foreign contractors with respect to prescribed services.

	Dividends	Interest	Royalties	Management fees (a)	Payments to foreign contractors
	%	%	%	%	%
Australia	17	10	10	0 (b)	12 (c)
Canada	17	10	10	0 (b)	12 (c)
China	15	10	10	0 (b)	12 (c)
Fiji	17	10	15	15	12 (c)
Germany (f)	15	10	10	10	12 (c)
Korea (South)	15	10	10	0 (b)	12 (c)
Malaysia	15	15	10	10	12 (c)(d)
New Zealand	15	10	10	0 (b)	12 (c)
Singapore	15	10	10	0 (b)	12 (c)(d)
United Kingdom	17	10	10	10	12 (c)(d)
Non-treaty countries	17	15	– (e)	17	12

- (a) For the purposes of this table, management fees include technical fees.
- (b) Management services, including services of a technical nature rendered from sources outside of PNG for a resident of PNG are subject to MFWT at a rate of 17%. For services provided by a resident of a country with which PNG has entered into a double tax treaty that does not have a specific technical services article, the payment is not subject to withholding tax in PNG if all of the services were performed outside PNG.
- (c) Nonresident entities deriving income from “prescribed contracts” are subject to FCWT at a rate of 12% of the gross receipts. The income of residents of countries with which PNG has entered into a double tax treaty is subject to the FCWT provisions if the nonresident is conducting business in PNG through a permanent establishment.
- (d) Until recently, a reduced FCWT rate may have applied to foreign contractors from these countries in accordance with the non-discrimination article in the relevant treaty. However, the PNG tax authorities now apply the 12% rate to foreign contractors from all countries.
- (e) The rate is 30% for payments to associates. For payments to non-associates, the amount of the tax equals the lesser of 10% of assessable income or 48% of taxable income.
- (f) The treaty with Germany is not yet in force.

\* The 5% withholding tax is imposed when the decision to distribute dividends to residents and to nonresidents in Paraguay is made by the Paraguayan company. The 15% rate applies to dividends paid abroad to nonresidents.

## B. Taxes on corporate income and gains

**Corporate income tax.** Tax is levied on Paraguay-source income of corporations and commercial enterprises. Income is considered to be from a source in Paraguay if it is derived from capital, property or rights in Paraguay or from a business in Paraguay.

Residence is not relevant. Under Law 2421/04, for companies domiciled in Paraguay, income derived from capital invested abroad is considered Paraguayan-source income and, accordingly, subject to corporate income tax.

Income earned from farming activities in Paraguay is subject to Agribusiness Income Tax under the rules established by Law 5061/13. Farming is the business conducted for the purpose of obtaining primary foods, whether vegetable or animal, by the use of land. It includes, among other activities, breeding or fattening cattle; producing wool, hides or bristle; producing crops, fruit or vegetables; and producing milk. Under the law, the tax base is calculated through one of the following methods:

- Agribusiness Taxpayer method
- Small Agribusiness Taxpayer method
- Accounting method

**Rate of corporate income tax.** Under Law 2421/04, the corporate income tax rate is 10%. Branches are also subject to dividend withholding tax at a rate of 5% and to a 15% withholding tax on remittances to their home offices. Under Law 5061/13, Agribusiness Income Tax is calculated at a rate of 10% of the tax base.

The Paraguay incentive tax law provides an exemption from the 15% withholding tax mentioned above if an investment of greater than USD5 million is made in industrial processes.

**Capital gains.** Capital gains are taxed at the corporate income tax rate.

**Administration.** The tax year is the calendar year. Returns must be filed within four months after the end of the financial year. Penalties are imposed for failure to comply with these rules.

**Dividends.** A 5% withholding tax is imposed on dividends when the decision to distribute the dividends to residents and to non-residents in Paraguay is made by the Paraguayan company. A 15% withholding tax is imposed on dividends paid abroad to nonresidents.

### **C. Determination of trading income**

**General.** Taxable income is based on profits from the financial statements after tax adjustments. Expenses are generally deductible if they are incurred for the purposes of the business and in the production of taxable income.

**Inventories.** Inventory is valued at the cost of production or acquisition. The cost may be calculated under the average-cost or first-in, first-out (FIFO) methods. After choosing a method, a corporation may not change it without prior authorization.

**Tax depreciation.** Depreciation must be calculated using the straight-line method.

**Relief for losses.** The tax law does not allow loss carryforwards.

**Groups of companies.** Paraguayan law does not contain any measures for filing consolidated returns or for relieving losses within a group.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on goods sold, including imports, and services rendered in Paraguay; exports are exempt; in certain circumstances, payments of royalties are subject to the tax	
Standard rate	10
Basic consumer food items, pharmaceutical products, and the leasing and sale of real estate	5
Selective tax on consumption, on certain manufactured and imported goods, such as cigarettes, liquor and petroleum products	1 to 50
Social security contributions for nonbank institutions, on payroll; paid by	
Employer	16.5
Employee	9

## E. Foreign-exchange controls

The central bank does not control the foreign-exchange market. A free-market rate of exchange prevails.

## F. Tax treaties

Paraguay has entered into double tax treaties with Chile and Taiwan. It has also entered into a tax treaty on international freight with Argentina and tax treaties on international air freight with Belgium, Germany and Uruguay.

- (a) Mining companies are subject to an additional Special Mining Tax or to “voluntary” payments. For further details, see Section B.
- (b) Capital gains derived by nonresident entities are subject to income tax at a rate of 5% if the transfer is made in Peru. Otherwise, the rate is 30%. For further details regarding the applicable tax rate, see *Capital gains* in Section B. Capital gains derived by resident entities are subject to income tax at a rate of 30%.
- (c) Branches and permanent establishments of foreign companies are subject to the same corporate income tax rate as domiciled companies.
- (d) The Dividend Tax, which is imposed at a rate of 4.1% and is generally withheld at source, is imposed on profits distributed to nonresidents and individuals. For further details regarding the Dividend Tax, see Section B.
- (e) This tax applies to payments to nonresidents.
- (f) A reduced rate of 4.99% applies to certain interest payments. For further details, see Section B.
- (g) See Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Resident companies are subject to income tax on their worldwide taxable income. Resident companies are those incorporated in Peru. Branches and permanent establishments of foreign companies that are located in Peru and nonresident entities are taxed on income from Peruvian sources only.

**Tax rates.** The corporate income tax rate is 30%.

A Dividend Tax at a rate of 4.1% is imposed on distributions of profits to nonresidents and individuals by resident companies and by branches, permanent establishments and agencies of foreign companies. This tax is generally withheld at source. However, in certain circumstances, the company must pay the tax directly. For details regarding the Dividends Tax, see *Dividends*.

**Mining tax.** Mining companies are subject to an additional Special Mining Tax based on a sliding scale, with progressive marginal rates ranging from 2% to 8.4%. The tax is imposed on a quarterly

basis on the operating profits derived from sales of metallic mineral resources, regardless of whether the mineral producer owns or leases the mining concession.

In addition, mining companies that have signed stability agreements with the state are subject to “voluntary” payments, which are calculated based on a sliding scale with progressive marginal rates ranging from 4% to 13.12%. These rates are applied on a quarterly basis to the operating profits derived from sales of metallic mineral resources, regardless of whether the mineral producer owns or leases the mining concession. Higher tax rates apply to higher amounts of operating profits.

**Tax incentives.** Various significant tax incentives are available for investments in the following:

- Mining enterprises
- Oil and gas licenses and services contracts
- Certain agricultural activities

They are also available for investments in manufacturing industries located in the jungle, in designated tax-free zones and in borderline areas of the country.

**Capital gains.** Capital gains derived by nonresident entities are subject to income tax at a rate of 5% if the transfer is made in Peru. Otherwise, the rate is 30%. The regulations provide that a transaction is made in Peru if the securities are transferred through the Peruvian stock exchange. The transaction takes place abroad if securities are not registered with the Peruvian stock exchange or if registered securities are not transferred through the Peruvian stock exchange.

A special procedure has been introduced to determine the tax basis of listed securities acquired before 1 January 2010. The general rule is that the tax basis for these securities is the value of such securities at the closing of 31 December 2009, if this value is not lower than the price paid for the acquisition of the securities. The purpose of this rule is to impose capital gains tax only on the capital gain resulting from the appreciation of securities from 1 January 2010 (time when the exemption was repealed) and onward.

Capital gains derived from the disposal of bonds issued by the government as well as by Peruvian corporations before 10 March 2007, through public offerings, are exempt from Peruvian income tax.

CAVALI (Peruvian clearing house) withholds capital gains in transactions concluded on the Lima Stock Exchange. As a result, nonresidents are not required to pay their income tax liability to the Peruvian Tax Administration.

Indirect transfers of Peruvian shares are also subject to a 30% Peruvian capital gains tax. For this purpose, an indirect transfer of Peruvian shares is deemed to occur if the following conditions are met:

- At any time during the 12 months before the transaction, at least 50% of the value of the foreign company derives from one or more companies.
- More than 10% of the shares of the foreign company had been transferred during the 12-month period before the transaction.

Temporary provisions established a special procedure to determine the tax basis of shares acquired before 16 February 2011. Under this procedure, the tax basis is the higher of the price paid on acquisition or the market value on 15 February 2011.

**Administration.** The mandatory closing date for business enterprises is 31 December. Tax returns must be filed by the end of March or beginning of April, depending on the taxpayer number.

Companies must make advance payments of income tax. Such payments can be used as a credit against the annual income tax obligation, or they can be refunded at the end of the fiscal year if requested by the taxpayer.

The monthly advance payments equal the higher of the following amounts:

- The amount obtained by applying to the monthly net income the ratio obtained by dividing the amount of tax calculated for the preceding tax year by the total net income for that year. For the January and February payments, the ratio is determined by dividing the amount of tax calculated for the year before the preceding tax year by the net income for that year.
- The amount obtained by applying a 1.5% rate to the net income for the month.

Companies in a start-up process or in a net operating loss position make monthly advance payments equal to 1.5% of their monthly net income.

Monthly advance payments are due on the 9th to the 15th business day, according to a schedule. Taxes and related penalties not paid by due dates are subject to interest charges, which are not deductible for tax purposes.

**Dividends.** A Dividend Tax at a rate of 4.1% applies to profits distributed to nonresidents and individuals, if a distribution agreement is adopted by the relevant corporate body on or after 1 January 2003. All profits distributed thereafter, including those corresponding to prior years, are subject to this tax. The Dividend Tax applies to distributions by Peruvian companies, as well as to distributions by Peruvian branches, permanent establishments and agencies of foreign companies. The income tax law specifies various transactions that are considered profits distributions by resident entities for purposes of the Dividend Tax. These transactions include the distribution of cash or assets, other than shares of the distributing company, and, under certain circumstances, a capital reduction or a liquidation of the company. For permanent establishments, branches, and agencies of foreign companies, a distribution of profits is deemed to occur on the deadline for filing their annual corporate income tax return (usually at the end of March or the beginning of April of the following tax year).

The law also provides that if a resident company, or a branch, permanent establishment or agency of a foreign company, pays expenses that are not subject to further tax control, the amount of the payment or income is subject to the Dividend Tax. Dividend Tax for these items is paid directly by the resident entity or the branch or permanent establishment. The capitalization of equity accounts, such as profits and reserves, is not subject to the Dividend Tax, unless these items are further distributed.

**Interest.** Interest paid to nonresidents is generally subject to withholding tax at a rate of 30%. For interest paid to unrelated foreign lenders, the rate is reduced to 4.99% if all of the following conditions are satisfied:

- For loans in cash, the proceeds of the loan are brought into Peru as foreign currency through local banks or are used to finance the import of goods.
- The proceeds of the loan are used for business purposes in Peru.
- The participation of the foreign bank is not primarily intended to cover a transaction between related parties (back-to-back loans).
- The interest rate does not exceed the London Interbank Offered Rate (LIBOR) plus seven points. For this purpose, interest includes expenses, commissions, premiums and any other amounts in addition to the interest paid.

If the first three conditions described above are satisfied and the interest rate exceeds the LIBOR plus seven points, only the excess interest is subject to withholding tax at the regular rate of 30%.

Interest arising from loans granted by international banks to Peruvian banks and financial institutions is subject to a 4.99% withholding tax.

In general, interest derived from bonds and other debt instruments is also subject to a withholding tax rate of 4.99%, unless the holder of the bonds or other debt instruments is related to the issuer or its participation is primarily intended to avoid transactions between related parties (back-to-back transactions).

Interest earned on bonds issued by the government is exempt from tax. Effective from 1 January 2010, interest on bonds issued by Peruvian corporations before 11 March 2007, in general through public offerings, is exempt from tax. Interest from deposits in Peruvian banks is subject to a 4.99% withholding tax if the beneficiary is a foreign entity.

**Other withholding taxes.** Payments for technical assistance used in Peru are subject to withholding tax at an effective rate of 15%, regardless of whether the technical assistance is effectively provided. If the consideration for a service exceeds 140 Tax Units (approximately USD183,500), the resident company must obtain a certification from an international audit firm that the services were provided.

Payments for digital services that are provided through the internet and used in Peru are subject to withholding tax at an effective rate of 30%.

Payments for non-technical services provided in Peru are subject to withholding tax at a rate of 30%.

**Foreign tax relief.** Tax credits are permitted, within certain limits, for taxes paid abroad on foreign-source income. Under domestic legislation, a direct tax credit is allowed. Under certain treaties, an indirect tax credit is allowed.

### **C. Determination of trading income**

**General.** Taxable income of business enterprises is generally computed by reducing gross revenue by the cost of goods sold and all expenses necessary to produce the income or to maintain the

source of income. However, certain types of revenue must be computed as specified in the tax law, and some expenses are not fully deductible for tax purposes. Business transactions must be recorded in legally authorized accounting records that are in full compliance with International Financial Reporting Standards (IFRS). The accounting records must be maintained in Spanish and must be expressed in Peruvian currency. However, under certain circumstances, foreign investors who invest in foreign currency may enter into an agreement with the state or with state-owned corporations that allows them to keep their accounting books in foreign currency.

**Research and development expenses.** Up to 31 December 2013, the deduction of scientific and technological research and innovation expenses incurred by a company was limited to 10% of the annual net income, with a maximum annual limitation of 300 Tax Units (approximately USD393,103). Effective from 1 January 2014, these limits were eliminated.

In addition, to be tax-deductible, the expenses must be previously qualified. Effective from 1 February 2014, the treatment of research and development expenses varies depending on whether they are related to the core business of the taxpayer.

**Inflation adjustments.** For tax and accounting purposes, inflation adjustments apply only until 31 December 2004. Consequently, beginning 1 January 2005, transactions are recognized and recorded in local books at their historical value.

**Special activities.** Nonresident corporations, including their branches and agencies, engaged in certain specified activities are subject to tax on only a percentage of their gross income derived from such activities. This tax is withheld at source. The following are the applicable percentages for some of these specified activities.

Activity	Applicable percentage (%)
Air transportation	1 (a)(b)
Marine transportation	2 (a)(b)
Leasing of aircraft	60 (c)
Leasing of ships	80 (c)
International news agencies	10 (a)

(a) The withholding tax rate is 30%. As a result, the effective tax rates are 0.3% for air transportation, 0.6% for marine transportation and 3% for international news agencies.

(b) This percentage applies to services rendered partly in Peru and partly abroad.

(c) The withholding tax rate is 10%. As a result, the effective tax rates are 6% for leasing of aircraft and 8% for leasing of ships.

**Inventories.** Inventories must be carried at cost. Cost may be determined specifically or by the first-in, first-out (FIFO), average, retail or basic inventory method. The last-in, first-out (LIFO) method is not permitted.

**Provisions.** Provisions for bad debts, bonuses, vacations, employees' severance indemnities and other expenses are allowed if made in accordance with certain tax regulations.

**Tax depreciation.** Depreciation rates are applied to the acquisition cost of fixed assets. The following are some of the maximum annual depreciation rates allowed by law.

<b>Asset</b>	<b>Maximum rate (%)</b>
Buildings and structures	5*
Cattle and fishing nets	25
Vehicles	20
Machinery and equipment for construction, mining and oil activities	20
Machinery and equipment for other activities	10
Data processing equipment	25
Other fixed assets	10

\* This is a fixed rate rather than a maximum rate.

Taxpayers may apply any depreciation method for its fixed assets other than buildings and structures, taking into account the characteristics of the business as long as the resulting depreciation rate does not exceed the maximum rates stated above.

In general, except for buildings and structures, tax depreciation must match financial depreciation.

**Relief for losses.** Taxpayers may select from the following two systems to obtain relief for their losses:

- Carrying forward losses to the four consecutive years beginning with the year following the year in which the loss is generated
- Carrying forward losses indefinitely, subject to an annual deductible limit equal to 50% of the taxpayer's taxable income in each year

Loss carrybacks are not allowed.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Temporal net assets tax; imposed on companies, and on agencies, branches and permanent establishments of foreign entities; the tax base equals the value of the net assets of the taxpayer as of 31 December of the preceding year that exceeds PEN1 million (approximately USD344,830); the tax payments may offset the advance payments required under the general income tax regime or may be claimed as a credit against the income tax payable for the tax year; a refund may be requested for any balance of tax payment that is not used in the current year; the tax does not apply to certain companies; tax is payable beginning in the year following the first year of productive activities	0.4
Sales tax, on the sale of goods, services and the import of most products	18
Excise tax, on goods and imports; the tax is either a fixed amount or an amount determined by applying a percentage rate	Various
Social security contributions to the Peruvian Health Social Security Office, on salaries and legal bonuses; paid by employer	9

Nature of tax	Rate (%)
Pension Fund; paid by employee (Alternatively, employees may contribute approximately 11.8% of their salaries to the Private Pension Funds Trustee [AFP].)	13
Employees' profit sharing; calculated on pretax income and deductible as an expense in determining taxable income; rate varies depending on companies' activities (mining, fishing, manufacturing, telecommunications and other activities)	5 to 10
Tax on Financial Transactions; imposed on debits and credits in Peruvian bank accounts	0.005

## E. Miscellaneous matters

**Foreign-exchange controls.** Peru does not impose foreign-currency controls. Exchange rates are determined by supply and demand.

**Means of payment.** Any payment in excess of PEN3,500 or USD1,000 must be made through the Peruvian banking system using the so-called "Means of Payment," which include bank deposits, wire transfers, pay orders, credit and debit cards and non-negotiable checks. Non-compliance with this measure results in the disallowance of the corresponding expense or cost for income tax purposes. In addition, any sales tax (see Section D) related to the acquisition of goods and services is not creditable.

**Related-party transactions.** Expenses incurred abroad by a non-resident parent company, affiliates or the home office of a Peruvian subsidiary or branch (or prorated allocations of administrative expenses incurred by those entities) are deemed by law to be related to the generation of foreign revenue and, accordingly, non-deductible, unless the taxpayer can prove the contrary.

**Transfer pricing.** Peru has introduced transfer-pricing rules, which are consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines. Intercompany charges must be determined at arm's length. Regardless of the relationship between the parties involved, the fair market value (FMV) must be used in various types of transactions, such as the following:

- Sales
- Contributions of property
- Transfers of property
- Provision of services

For the sale of merchandise (inventory), the FMV is the price typically charged to third parties in profit-making transactions. For frequent transactions involving fixed assets, the FMV is the value used in such frequent transactions by other taxpayers or parties. For sporadic transactions involving fixed assets, the FMV is the appraisal value.

In the event that the transactions are performed without using the FMV, the tax authorities make the appropriate adjustments for the parties to the transaction.

The FMV of transactions between related parties is the value used by the taxpayer in identical or similar transactions with unrelated parties. The tax authorities may apply the most appropriate of the

following transfer pricing methods to reflect the economic reality of the transactions:

- Comparable uncontrolled price method
- Cost-plus method
- Resale price method
- Profit-based method

Effective from January 2013, specific rules are introduced for applying the comparable uncontrolled price method to the exportation and importation of commodities and other products, with prices set by reference to commodity prices.

The transfer-pricing rules provide for advance price agreements between taxpayers and the Peruvian tax authorities.

Domiciled taxpayers must file an information return if either of the following circumstances exists:

- The total amount of the operations (revenues and expenses) with related parties is higher than PEN200,000 (approximately USD68,966).
- They have disposed assets to related parties to, from or through a low-tax jurisdiction (tax haven) and the basis costs are lower than fair market value.

Taxpayers that must file information returns must file them in June of the following fiscal year in accordance with the Tax Administration's schedule.

Domiciled taxpayers must prepare a transfer-pricing study if either of the following circumstances exists:

- Gross revenues are higher than PEN6 million (approximately USD2,068,966), and the total amount of operations with related parties is higher than PEN1 million (USD344,828).
- They have disposed of assets to related parties to, from or through a low-tax jurisdiction (tax haven) and the basis costs (purchase prices for purposes of calculating taxable capital gains and losses) are lower than fair market value.

Taxpayers that must file a transfer-pricing study must file it in June of the following fiscal year in accordance with the Tax Administration's schedule.

**Debt-to-equity rules.** Interest on loans from related parties in excess of a 3:1 debt-to-equity ratio is not deductible.

**Transactions with residents in low-tax jurisdictions (tax havens).**

Expenses incurred in transactions with residents in low-tax jurisdictions (tax havens) are not deductible for tax purposes, except for the following:

- Toll payments for the right to pass across the Panama Channel
- Expenses related to credit operations, insurance or reinsurance, leasing of ships or aircraft and freight services to and from Peru

The following are considered low-tax jurisdictions.

Alderney	Dominica	Nauru
Andorra	Gibraltar	Netherlands
Anguilla	Granada	Antilles
Antigua and Barbuda	Guernsey	Niue
Aruba	Hong Kong SAR	Panama
	Isle of Man	St. Kitts and Nevis

Bahamas	Jersey	St. Lucia
Bahrain	Labuan	St. Vincent and the Grenadines
Barbados	Liberia	Seychelles
Belize	Liechtenstein	Tonga
Bermuda	Luxembourg	Turks and Caicos Islands
British Virgin Islands	Madeira	US Virgin Islands
Cayman Islands	Maldives	Vanuatu
Cook Islands	Marshall Islands	Western Samoa
Cyprus	Monaco	
	Montserrat	

In addition to the jurisdictions mentioned above, other jurisdictions are considered low-tax jurisdictions if the effective rate of income tax in the jurisdiction is 0% or if the effective rate that would apply to the relevant income is at least 50% less than the rate that would apply under the general income tax regime in Peru, and if one of the following additional conditions is met:

- The jurisdiction does not provide information regarding the taxation of companies in the jurisdiction.
- A tax benefit regime in the jurisdiction applies to nonresidents only.
- Beneficiaries of tax benefits in the jurisdiction may not carry out business activities in the jurisdiction.
- The jurisdiction promotes itself as a jurisdiction that can assist companies in the reduction of their taxation in their home countries.

**Controlled foreign corporations.** Recent amendments to the Peruvian Income Tax Law introduced the International Fiscal Transparency System, which applies to Peruvian residents who own a controlled foreign corporation (CFC). These amendments established the requirements for a foreign company to be qualified as a CFC. For these purposes, the ownership threshold is set at more than 50% of the equity, economic value or voting rights of a non-resident entity.

In addition, to be considered a CFC, a nonresident entity must be resident of either of the following:

- A tax-haven jurisdiction
- A country in which passive income is either not subject to income tax or subject to an income tax that is equal to or less than 75% of the income tax that would have applied in Peru

The amendments also provide a list of the types of passive income that must be recognized by the Peruvian resident (such as dividends, interest, royalties and capital gains).

The revenues are allocated based on the participation that the Peruvian entity owns in a CFC as of 31 December.

**General anti-avoidance rule.** Under a general anti-avoidance rule, which took effect on 19 July 2012, to determine the true nature of a taxable event, the Peruvian Tax Administration takes into account the events, situations and economic relationships that are actually carried out by the taxpayers.

If the Peruvian Tax Administration identifies a tax-avoidance case, it may demand payment of the omitted tax debt or decrease the amount of any credits, net operating losses or other tax benefits obtained by the taxpayer.

In addition, the rule establishes specific requirements to determine whether a taxpayer intended to avoid all or part of a taxable event or reduce the tax base or tax liability.

Also, if the Peruvian tax authorities determine that the taxpayer executed sham transactions, it applies the appropriate tax rules to such acts.

Nonetheless, the application of the general anti-avoidance rule has been temporally suspended until further guidance explaining the conditions that must be met to apply this rule.

**Domestic reorganizations.** Under the existing Income Tax Law, domestic reorganizations are subject to a tax-free regime, to the extent that the basis of the assets included in the reorganization is kept at historical value. A new law, which is effective from 1 January 2013, maintains this regime but establishes a minimum holding period in cases of spin-off reorganizations. The law states that the shareholders of the company being spun off that receive shares in the company to which the assets are contributed must keep the shares of the latter company until the closing of the next fiscal year following the reorganization. If the shares are transferred before that time, the underlying assets are deemed to be transferred by the acquiring company at market value. The tax is determined by the difference between the historic tax basis and the market value. In addition, the shareholder selling the shares is subject to the ordinary capital gains tax.

## F. Tax treaties

Peru has entered into double tax treaties with Brazil, Canada, Chile, Korea (South), Mexico, Portugal and Switzerland. It has also signed an agreement to avoid double taxation with the other members of the Andean Community (Bolivia, Colombia and Ecuador) under which the exclusive right to tax is granted to the source country. The following is a table of treaty withholding tax rates.

	Dividends %	Interest %	Royalties %
Brazil	10/15 (a)	15	15
Canada	10/15 (a)	15	15
Chile	10/15 (a)	15	15
Korea (South)	10	15	10/15
Mexico	10/15 (a)	15	15
Portugal	10/15 (a)	10/15	10/15
Switzerland	10/15 (a)	10/15	10/15
Non-treaty countries	4.1 (b)	4.99/30 (b)	30

(a) The dividends tax rate may vary depending on the percentage of the direct or indirect ownership of the beneficiary in the payer company.

(b) See Section B.

**A. At a glance**

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	
Real Property	6 (a)
Shares	5/10 (b)
Branch Tax Rate (%)	30 (c)
Withholding Tax (%)	
Dividends	0 (d)
Interest on Peso Deposits	20 (e)(f)
Royalties from Patents, Know-how, etc.	20 (f)
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (g)

(a) See Section B.

(b) These rates apply to capital gains on shares in domestic corporations not traded on a local stock exchange. See Section B for further details and for the rates applicable to gains derived from sales of shares traded on a local stock exchange.

(c) Certain types of Philippine-source income of foreign corporations are taxed at preferential rates (see Section B).

(d) Under domestic law, dividends paid to domestic corporations or resident foreign corporations are not subject to tax. Dividends paid to nonresident foreign corporations are generally subject to a final withholding tax of 30%. However, this rate may be reduced to 15% if certain conditions are met (see Section B).

(e) The withholding tax rate for interest on peso deposits derived by domestic and resident foreign corporations is 20%. For preferential rates under tax treaties for nonresident foreign corporations, see Section F. For preferential rates on interest derived from foreign currency deposits, see Section B.

(f) Under domestic law, if the recipient is a nonresident foreign corporation, the final withholding tax rate is 30%. For reduced rates under tax treaties for nonresident foreign corporations, see Section F.

(g) See Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Domestic corporations are taxed on their worldwide net taxable income. Domestic corporations are corporations incorporated under the laws of the Philippines. Resident foreign corporations are taxed on net taxable income derived from the Philippines, and nonresident foreign corporations are taxed on gross income derived from the Philippines. A resident foreign corporation (a branch) is one created under foreign laws and engaged in trade or business in the Philippines. Any other foreign corporation is considered a nonresident.

**Rates of corporate tax.** Domestic and foreign corporations are subject to tax at a rate of 30%.

Subject to certain exceptions, a 2% Minimum Corporate Income Tax (MCIT) may be imposed on domestic and resident foreign corporations beginning with the fourth tax year following the year of commencement of business operations. The MCIT must be paid if the corporation has zero or negative taxable income or if the MCIT is greater than the regular corporate income tax liability.

Philippine-source income of foreign corporations taxed at preferential rates includes the following.

Type of income	Rate (%)
Interest income derived by offshore banking units (OBUs) from foreign-currency loans granted to residents	10
Income derived by OBUs authorized by Bangko Sentral ng Pilipinas (BSP; the central bank) from foreign-currency transactions with nonresidents, other OBUs and local commercial banks, including branches of foreign banks authorized by the BSP to transact business with OBUs	0
Interest income of domestic corporations and resident foreign corporations from peso bank deposits and yields or other monetary benefits from deposit substitutes and from trust funds or similar arrangements	20
Interest income of domestic corporations and resident foreign corporations from depository banks under the expanded foreign-currency deposit system	7.5
Income of nonresidents from transactions with OBUs and depository banks under the expanded foreign-currency deposit system	0
Royalties derived by resident foreign corporations from sources in the Philippines	20
Gross Philippine billings of international carriers doing business in the Philippines	2.5
Taxable income of regional operating headquarters of multinational companies engaged in the following: general administration and planning services, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance and advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, and business development	10
Rentals, charter fees and other fees derived by nonresident owners or lessors of vessels chartered by Philippine nationals	4.5
Rentals, charter fees and other fees derived by nonresident lessors of aircraft, machinery and other equipment	7.5
Gross income of nonresident cinematographic film owners, lessors or distributors	25
Interest on foreign loans	20

Domestic and foreign enterprises registered with the Board of Investments under the 1987 Omnibus Investments Code may be granted an income tax holiday and exemption from certain other taxes and duties. Enterprises located in special-economic zones that are registered with the Philippine Economic Zone Authority (PEZA) or the special-economic zones may be granted an income tax holiday or a special tax regime under which a 5% tax is imposed on gross income instead of all national and local taxes.

Profits remitted by a branch to its head office are subject to a 15% tax. This tax is imposed on the total profits remitted, or earmarked for remittance, without deduction of tax. The tax does not apply to profits from activities registered with the PEZA. Dividends, interest, royalties, rent and similar income received by a foreign corporation from sources in the Philippines are not treated as branch profits unless they are effectively connected with the conduct of a trade or business in the Philippines.

**Capital gains.** A 6% tax is imposed on capital gains presumed to have been derived from the sale, exchange or disposition of land or buildings classified as capital assets. The tax is applied to the gross selling price or the fair market value, whichever is higher.

Gains derived from the sale of shares of domestic corporations not traded on the stock exchange are subject to tax at a rate of 5% of the net capital gain not exceeding PHP100,000 and at a rate of 10% on the excess. If the shares are listed and traded through the facilities of the Philippine Stock Exchange, the tax is 0.5% of the gross selling price. A tax is also imposed on the sale, barter, exchange or other disposition through an initial public offering of shares of stock in a closely held corporation at a rate of 1%, 2% or 4% of the gross sales price of the shares.

**Administration.** A corporation may use the calendar year or a fiscal year as its tax year.

Corporations must file quarterly returns within 60 days from the close of each of the first three quarters of the tax year, and a final or adjusted return on or before the 15th day of the fourth month following the close of the tax year. The corresponding tax is paid at the time the return is filed.

**Dividends.** Dividends received by a domestic or resident foreign corporation from a domestic corporation are not subject to tax. If the recipient is a nonresident foreign corporation, the 30% tax may be reduced to 15% if any of the following circumstances exists:

- The country of domicile of the recipient does not impose any tax on offshore or foreign-source income.
- The country of domicile of the recipient allows a credit for taxes deemed paid in the Philippines equal to 15%, which represents the difference between the regular corporate income tax rate of 30% and the 15% preferential tax on dividends.
- The dividend is not taxed in the recipient's country of domicile.

**Foreign tax relief.** For domestic corporations, tax credits are allowed for income taxes paid or accrued to any foreign country, subject to certain limitations. Alternatively, such income taxes may be claimed as a deduction from taxable income. Resident foreign corporations are not allowed to credit tax paid to foreign countries against Philippine income.

### C. Determination of trading income

**General.** The computation of income for income tax purposes must be in accordance with the accounting method regularly employed in maintaining the taxpayer's books of account, provided that method clearly reflects income.

Other allowable deductions include the usual, ordinary and necessary business expenses, such as interest, taxes, losses, bad debts, charitable and other contributions, and contributions to a pension trust. All of these expenses are required to be directly attributable to the development, management, operation or conduct of a trade or business in the Philippines.

The deduction for interest expense is reduced by an amount equal to 33% of interest income that has been subject to final tax. Interest incurred to acquire property used in a trade or business may be claimed as a deduction or treated as a capital expenditure.

Research and development expenses that are paid or incurred during the tax year in connection with a trade or business and that are not chargeable to a capital account or treated as deferred expenses may be claimed as deductible expenses.

**Inventories.** Inventory valuation must conform as nearly as possible to the best accounting practice in the trade or business and must clearly reflect income. The most commonly used methods of inventory valuation are cost and the lower of cost or market.

**Tax depreciation.** Taxpayers may deduct a reasonable allowance for exhaustion and wear and tear (including obsolescence) of property used in a trade or business. The depreciation method used must be reasonable and generally accepted in the particular industry. Depreciation methods that are generally acceptable include the straight-line method, declining-balance method, the sum-of-the-years' digits method or any other method that may be prescribed by the Secretary of Finance. Resident foreign corporations may claim depreciation only on property located in the Philippines.

**Relief for losses.** Net operating losses may be carried forward three years to offset future income in those years. A net operating loss is defined as the excess of allowable deductions over gross income in a tax year. Net losses may not be carried forward if the losses are incurred in a year in which a corporation is exempt from income tax or if a substantial change of ownership occurs.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on all persons who, in the course of their trade or business, sell, barter, exchange or lease goods or properties (including intangible personal properties and real properties), render services or import goods; services rendered in the Philippines by nonresident foreign persons are deemed to be rendered in the course of trade or business; specific goods and transactions are exempt; in general, exports of goods and services are subject to a 0% rate	12%
Improperly accumulated earnings tax; levied on accumulated income of corporations if the income was accumulated to avoid tax with respect to the shareholders of the corporation	

Nature of tax	Rate
or other corporations; a corporation serving as a holding company or investment company is prima facie evidence of a purpose to avoid tax with respect to shareholders; publicly held companies, banks and nonbank financial intermediaries, and insurance companies are exempt	10%
Fringe benefit tax; applied to the grossed-up monetary value of fringe benefits received by managerial and supervisory employees; the grossed-up monetary value is determined by dividing the monetary value of the benefit by 68%; the employer must withhold the tax and pay it to the tax authorities; the tax does not apply if the benefit is required for or is necessary to the trade or business of the employer or if the benefit is granted for the convenience of the employer; this tax is considered to be a final tax	32%
General rate Benefits paid to nonresident alien individuals who are not engaged in a trade or business in the Philippines (monetary value of benefit is divided by 75%)	25%
Benefits paid to certain other individuals, including aliens working for specified entities (monetary value of benefit is divided by 85%)	15%
Documentary stamp tax	
Original issue of all debt instruments; imposed on issue price	PHP1 per PHP200
Original issue of stock certificates; imposed on the par value or the consideration if no par value	PHP1 per PHP200
Transfer that is not made through a local stock exchange	PHP0.75 per PHP200
Bills of exchange or drafts; imposed on the face value	PHP0.30 per PHP200
Other specified transactions and documents	Various

### E. Miscellaneous matters

**Foreign-exchange controls.** The Philippines has adopted liberal foreign-exchange policies. In general, no restrictions are imposed on the repatriation of capital, profits or income earned in the Philippines. Foreign loans and foreign investments may be registered with the Philippine Central Bank (BSP). Only loans registered with the BSP are eligible for servicing through the use of foreign exchange purchased from the banking system. However, the registration of a foreign investment is required only if the foreign exchange needed to service the repatriation of capital and the remittance of dividends, profits and earnings is sourced in the banking system.

**Transfer pricing.** The method used by a corporation to fix prices must be consistent worldwide.

The Bureau of Internal Revenue (BIR) issued Revenue Regulations 2-2013 on Transfer Pricing (TP Regulations) in January 2013. These regulations are largely based on the arm's-length methodologies prescribed by the Transfer Pricing Guidelines of the Organisation for Economic Co-operation and Development (OECD). The following are significant aspects of the TP Regulations:

- They implement the authority of the Commissioner of Internal Revenue under Section 50 of the Tax Code to review controlled transactions among associated enterprises and to allocate or distribute their income and deductions to determine their appropriate revenues and taxable income.
- They provide the methods of establishing an arm's-length price.
- They require the maintenance and safekeeping of the documents necessary for the taxpayer to prove that efforts were exerted to determine the arm's-length price. The TP Regulations apply to both cross-border and domestic transactions between associated enterprises.

**Related-party transactions.** Related-party transactions must comply with the arm's-length standard. Under certain conditions, a deduction may not be claimed for losses on sales or exchanges of properties or for interest incurred on transactions between related parties. The BIR Commissioner may reallocate gross income or deductions among related entities to prevent manipulation of reported income.

## F. Treaty withholding tax rates

The table below lists the maximum withholding rates for dividends, interest and royalties provided under the treaties. Most of the treaties require that the recipient be the beneficial owner of the income for the preferential rates to apply. A tax treaty relief application must be submitted before a tax exemption or beneficial treaty rate under a tax treaty may be claimed.

	<b>Dividends (v)</b> %	<b>Interest (w)</b> %	<b>Royalties</b> %

Vietnam	15 (k)	15	15
Non-treaty countries	15/30 (y)	20/30 (y)	20/30 (y)

- (a) The rate is 15% if a rebate or credit is granted to the recipient.
- (b) The rate is 10% if the interest is paid with respect to public issues of bonds, debentures or similar obligations (under the United States treaty, with respect to public issues of bonded indebtedness). Under the Austria, Japan and Korea treaties, the 10% rate also applies to interest paid by a Board of Investments (BOI)-registered preferred pioneer enterprise. Under the India treaty, the 10% rate also applies to interest paid to financial institutions, including insurance companies.
- (c) The rate is 10% (Austria, Japan, Korea, Netherlands and Spain) or 15% (Australia, Finland, Indonesia, Italy, Malaysia, New Zealand, Pakistan, Singapore, Thailand, the United Kingdom and the United States) for royalties paid by a BOI-registered preferred enterprise (under the Austria, Japan and Korea treaties, the enterprise must be a pioneer enterprise). The 15% rate also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting under the treaties with Finland, Italy, Japan, Malaysia, Singapore, Thailand and the United Kingdom. Under the Spain treaty, the rate is 20% for such royalties. Under the Finland treaty, the rate is also 15% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works.
- (d) The rate is 10% (Canada, Japan, Norway, and the United Kingdom, 15%) if the recipient holds 10% (Romania, 25%) of the voting shares of the payer corporation. Under the treaties with Austria and Japan, the rate is also 10% if the payer holds 10% (Japan, 25%) of the total shares issued by the payer during the six months immediately preceding the dividend payment date. Under the Japan treaty, the rate is also 10% if the dividends are paid by a BOI-registered pioneer enterprise. Under the Romania and Spain treaties, the 10% rate does not apply to partnerships. Under the treaty with Romania, the shares must have been owned for at least two years preceding the date of the dividend payment.
- (e) This rate is subject to the "most-favored-nation" provision of the treaty.
- (f) The rate is 10% if the recipient of the dividends holds directly at least 10% of the capital of the payer. Under the treaties with Bahrain, Israel, Kuwait, Switzerland and the United Arab Emirates, partnerships do not qualify for the 10% rate. Under the treaty with the United Arab Emirates, the dividends are exempt from tax if the beneficial owner of the dividends is the government of a contracting state, a local government, a political subdivision, a local authority or any of their governmental institutions or entities.
- (g) The 25% rate applies to royalties paid for the use of, or the right to use, trademarks, cinematographic films, or films or tapes for television or radio broadcasting. A 15% rate applies to other royalties.

- (h) This rate applies if the interest payments or royalties are taxable in Canada.
- (i) A 15% rate applies if the recipient is a company (under the Brazil treaty, a partnership also qualifies). The 25% rate applies in all other cases. Under the Malaysia treaty, the recipient must be subject to tax in Malaysia.
- (j) The rate is 15% for royalties paid with respect to cinematographic films and tapes for television or broadcasting. The rate is 10% if the payer is registered with the BOI as a preferred pioneer enterprise.
- (k) The rate is 10% (Hungary, Indonesia, 15%) if the recipient holds directly at least 25% of the capital of the payer. Under the treaties with Bangladesh, Denmark, Germany, Korea, Poland, Sweden and Vietnam, a partnership does not qualify for the 10% rate. Under the Korea treaty, the 10% rate also applies if the dividends are paid by a BOI-registered preferred pioneer enterprise.
- (l) The rate is 10% for interest paid with respect to sales on credit of industrial, commercial or scientific equipment or with respect to public issues of bonds, debentures or similar obligations. Under the Germany and Netherlands treaties, the 10% rate also applies to interest on bank loans.
- (m) This rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. The rate is 10% for royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
- (n) The rate is 15% if the recipient held 25% of the capital of the payer during the two tax years preceding the year of the dividend payment. Partnerships do not qualify for the 15% rate.
- (o) The rate is 15% if the beneficiary of the dividends owns at least 10% of the shares of the payer.
- (p) The rate is 10% (India, 15%) if the Philippine payer is registered with the BOI (under the Norway treaty, the enterprise must be a preferred pioneer enterprise). Under the Norway treaty, the rate is 7.5% for payments for the use of containers.
- (q) Under the treaty with Romania, the rate is 10% for interest paid with respect to sales on credit of industrial, commercial or scientific machines or equipment; bank loans; or public issues of bonds, debentures or similar obligations. Under the treaty with the United Arab Emirates, interest is exempt from tax if it is derived with respect to a loan made, guaranteed or insured by the government of the other contracting state or a political subdivision, local authority or local government, including financial institutions wholly owned by the government or any other instrumentality, as agreed by the contracting states. Under the treaty with Nigeria, interest is exempt if it is derived and beneficially owned by the government of the other contracting state or a local authority thereof or an agency or instrumentality of that government or local authority. Under the treaty with Kuwait, the interest is exempt in the following circumstances:
- It is derived by the government of the other contracting state or a governmental institution or other entity thereof as defined in Paragraph 2 of Article 4 of the treaty.
  - It is derived by an institution or company that is a resident of the other contracting state, and the institution or company's capital is wholly owned by the government or a governmental institution or other entity thereof, as defined in Paragraph 2 of Article 4 of the treaty and as agreed to by the competent authorities of the two governments.
  - It is paid on loans guaranteed by the government of the other contracting state or a governmental institution or other entity thereof, as defined in paragraph 2 of Article 4 of the treaty.
- (r) The 15% rate (France, 10%; United States, 20%) applies if the recipient holds at least 10% (Thailand and Singapore, 15%) of the voting shares of the payer. Under the Finland and France treaties, partnerships do not qualify for the 10% rate. Under the Singapore and United States treaties, the shares must have been owned for at least two tax years preceding the year of the dividend payment.
- (s) The 15% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. A 10% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
  - The use of, or the right to use, industrial, commercial or scientific equipment
  - Information concerning industrial, commercial or scientific experience

- 
- (t) This rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. The rate is 10% for other royalties.
  - (u) The 15% rate applies to royalties paid for the use of, or the right to use, copyrights of cinematographic films, and films or tapes for television or radio broadcasting. A 10% rate applies to royalties paid for the following:
    - The use of, or the right to use, copyrights of literary, artistic or scientific works, with certain exceptions
    - The use of, or the right to use, patents, trademarks, designs or models, plans, or secret formulas or processes
    - The use of, or the right to use, industrial, commercial or scientific equipment
    - Information concerning industrial, commercial or scientific experience
  - (v) A preferential rate of 15% under the National Internal Revenue Code may apply if the recipient's country of domicile allows a credit for taxes deemed paid in the Philippines equal to 15%. This credit represents the difference between the regular corporate income tax rate of 30% and the 15% preferential rate. The 15% rate also applies if the dividend is not taxed in the recipient's country of domicile.
  - (w) Under Philippine domestic law, interest on foreign-currency deposits of non-residents is exempt from tax.
  - (x) The rate is 12.5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the paying company.
  - (y) See Section A.

*Poland joined the European Union (EU) on 1 May 2004. This has significantly affected the Polish tax system, particularly with respect to value-added tax (VAT). It has also affected the corporate tax treatment of cross-border transactions such as dividend payments and restructurings (mergers and divisions). Because of the rapidly changing regulatory framework in Poland, readers should obtain updated information before engaging in transactions.*

**A. At a glance**

Corporate Income Tax Rate (%)	19
Capital Gains Tax Rate (%)	19
Branch Tax Rate (%)	19
Withholding Tax (%)	
Dividends	19 (a)(b)
Interest	20 (c)(d)
Royalties	20 (c)(d)
Services	20 (e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (f)

- (a) This tax is imposed on dividends paid to residents and nonresidents.  
 (b) This rate may be reduced by a tax treaty, or under domestic law, if certain conditions are met (see Section B).  
 (c) This rate applies only to interest and royalties paid to nonresidents.  
 (d) The tax rate may be reduced by a tax treaty or under domestic law if certain conditions are met (see Section B).  
 (e) This withholding tax applies only to service payments made to nonresidents. In general, a foreign-service provider based in a treaty country is typically exempt from this tax if it submits a certificate of residency to the service recipient.  
 (f) No more than 50% of the original loss can be deducted in one year.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Resident companies (including companies in the process of incorporating or registering) are subject to corporate tax on their worldwide income and capital gains. Non-resident companies are taxed only on income earned in Poland. A company is resident in Poland for tax purposes if it is incorporated

in Poland or managed in Poland. For this purpose, the concept of management is broadly equivalent to the effective management test in many treaties and is typically deemed to be exercised where the board of directors (or equivalent) meets. A branch of a non-resident company is generally taxed according to the same rules as a Polish company, but only on its Polish-source income. Partnerships (in Poland, they include civil law partnerships, limited partnerships and general partnerships) are tax transparent except for foreign partnerships that are treated in their countries as taxpayers subject to corporate income tax. Under an amending law passed in 2013, Polish limited joint-stock partnerships are treated as corporate income tax taxpayers. The new law entered into force on 1 January 2014 (or some later date for certain partnerships with a non-calendar accounting year).

Under most tax treaties, income from an overseas representative office or permanent establishment of a Polish resident company is exempt from tax. Alternatively, certain tax treaties grant a tax credit for the foreign tax imposed on foreign-source income.

**Tax rates.** The general corporate income tax rate is 19%.

Withholding tax is not imposed on transfers of profits from a branch to its head office because from a legal perspective, a branch is regarded as an organizational unit of the foreign enterprise.

**Capital gains.** Capital gains, including those derived from the sale of publicly traded shares and state bonds, are treated as part of a company's profits and are taxed at the regular corporate tax rate. Capital losses are deductible from normal business income.

In general, capital gains are calculated by subtracting the cost of the asset (or its net value for tax purposes) and sales expenses from the sales proceeds. If the sales price differs substantially from market value, the tax office may apply an independent expert valuation.

Capital gains derived by nonresidents from sales and other disposals of state bonds issued on foreign markets may be effectively exempt from tax in Poland under domestic regulations if certain conditions are satisfied.

**Administration.** The Polish tax year must last 12 consecutive months, and it is usually the calendar year. However, a company can choose a different period of 12 consecutive months as its tax year by notifying the relevant tax office by certain deadlines. The first tax year after a change must extend for at least 12 months, but no longer than 23 months. If a company incorporated in the first half of a calendar year chooses the calendar year as its tax year, its first tax year is shorter than 12 months. A company incorporated in the second half of a calendar year may elect a period of up to 18 months for its first tax year (that is, a period covering the second half of the year of incorporation and the subsequent year). In the event of a liquidation, a merger or division of a company, the tax year may be shorter than 12 months.

In general, companies must pay monthly advances based on preliminary income statements. Monthly declarations do not need to be filed. In certain circumstances, a company may benefit from a simplified advance tax payment procedure.

Companies must file an annual income tax return within three months after the end of the company's tax year. They must pay any balance of tax due at that time.

An overpayment declared in an annual tax return is refunded within three months. However, before the overpayment is refunded, it is credited against any past and current tax liability of the company. If the company has no tax liability, it may request that the tax office credit the overpayment against future tax liabilities or refund the overpayment in cash. Overpayments earn interest at the same rate that is charged on late payments. Under the tax code, the rate of penalty interest on unpaid taxes varies according to the fluctuation of the Lombard credit rate. The interest rate on tax arrears is 200% of the Lombard credit rate, plus 2%. It cannot be lower than 8%. The penalty interest rate was 8% on 19 December 2014.

**Dividends.** A 19% withholding tax is imposed on dividends and other profit distributions paid to residents and nonresidents. Resident recipients do not aggregate dividends received with their taxable income subject to the regular rate. For nonresident recipients, the withholding tax is considered a final tax and, accordingly, the recipient is not subject to any further tax on the dividend received. A treaty may reduce the tax rate for distributions to nonresidents if the recipient who is the beneficial owner of the dividend provides the required certificate indicating that the recipient's tax residence is located in the other treaty country.

Polish companies (and joint-stock partnerships, effective from 1 January 2014), other European Economic Area (EEA; the EEA consists of the EU countries and Iceland, Liechtenstein and Norway) companies and Swiss companies are exempt from tax on dividends and other profit distributions received from Polish subsidiaries if they satisfy all of the following conditions:

- They are subject to income tax in Poland, an EU/EEA member state or Switzerland on their total income, regardless of the source of the income (the exemption applies also to dividends or other profit distributions paid to permanent establishments, located in EU/EEA member states or in Switzerland, of such companies).
- They do not benefit from income tax exemption on their total income (which should be documented with their written statement).
- For at least two years, they hold directly at least 10% (25% for Swiss recipients) of the capital of the company paying the dividend. The two-year holding period can be met after payment is made. If the two-year holding period is eventually not met (for example, the shareholder disposes of the shares before the two-year holding requirement is met), the shareholder must pay the withholding tax and penalty interest. Broadly, except for some specific cases, full ownership of the shares is required.
- The Polish payer documents the tax residency of the recipient with a certificate of residency issued by the competent foreign tax authorities (if payments are received by a permanent establishment, some other documents may be needed).
- A legal basis exists for a tax authority to request information from the tax administration of the country where the taxpayer is established, under a double tax treaty or other ratified international treaty to which Poland is a party.

- The dividend payer is provided with a written statement confirming that the recipient of the dividend does not benefit from exemption from income tax on its worldwide income, regardless of the source from which such income is derived.

The above exemption does not apply to revenues earned by a general partner from its share in the profits of a limited joint-stock partnership.

The amount of withholding tax on revenue earned by a general partner in a limited joint-stock partnership is reduced by the amount calculated by multiplying the percentage of the share in profits attributable to the general partner and the amount of the tax due on income of the limited joint-stock partnership.

**Interest, royalties and service fees.** Under the domestic tax law in Poland, a 20% withholding tax is imposed on interest, royalties and fees for certain services paid to nonresidents. This withholding tax may be eliminated or reduced if the following conditions are satisfied:

- The payer can document the tax residency of the recipient (beneficial owner) of the payment or the service provider with a certificate indicating that the recipient or service provider's tax residence is in a country that has concluded a double tax treaty with Poland.
- The relevant treaty allocates taxing rights to the country of the service provider or recipient, or provides a different rate.

Under most of Poland's tax treaties, the withholding tax on fees for services may not be imposed in Poland.

Poland was granted a transitional period for the implementation of the EU Interest and Royalties Directive (2003/49/EC). Under the transitional rules, Poland was required to incorporate the directive provisions into its domestic law, but it was entitled to impose withholding tax at reduced rates until 30 June 2013. Effective from 1 July 2013, the full exemption applies to interest and royalties paid to qualifying entities if the following conditions are met:

- The payer is a company that is a Polish corporate income taxpayer (the exemption does not apply to joint-stock partnerships) with a place of management or registered office in Poland (the exemption applies also to payments made by permanent establishments located in Poland of entities subject to income tax in the EU on their total income, regardless of the source of the income, provided that such payments qualify as tax-deductible costs in computing the taxable income subject to tax in Poland).
- The entity earning the income is a recipient of such income and is a company subject to income tax in an EU/EEA member state (other than Poland) on its total income, regardless of the source of the income (the exemption applies also to payments made to permanent establishments of such companies if the income earned as a result of such a payment is subject to income tax in the EU member state in which the permanent establishment is located). In addition, the company must not benefit from income tax exemption on its total income.
- For at least two years, the recipient of the payments holds directly at least 25% of the share capital of the payer or the payer holds directly at least 25% of the share capital of the recipient of the payments. This condition is also met if the same entity holds directly at least 25% of both the share capital of the payer and

the share capital of the recipient of the payments and such entity is subject to income tax in an EU/EEA member state on its total income, regardless of the source of the income. The two-year holding period can be met after payment is made. If the two-year holding period is eventually not met (for example, the shareholder disposes of the shares before the two-year holding requirement is met), the shareholder must pay the withholding tax together with the penalty interest. Full ownership of the shares is required.

- The Polish payer documents the tax residency of the recipients of the payments with a certificate of tax residency issued by the competent foreign tax authorities (if payments are received by a permanent establishment, some other documents may be needed).
- A legal basis exists for a tax authority to request information from the tax administration of the country where the taxpayer is established, under a double tax treaty or other ratified international treaty to which Poland is a party.
- The recipient of the payments provides a written statement confirming that it does not benefit from exemption from income tax on its total income, regardless of the source of the income.

Certain types of income are excluded from the exemption.

**Foreign tax relief.** Under its tax treaties, Poland exempts foreign-source income from tax or grants a tax credit (usually with respect to dividends, interest and royalties). Broadly, foreign taxes are creditable against Polish tax only up to the amount of Polish tax attributable to the foreign income.

In addition to a credit for tax on dividends (that is, a deduction of withholding tax; direct tax credit), Polish companies (or Polish permanent establishments of EU/EEA resident companies) may also claim a credit for the tax on profits generated by their subsidiaries in other treaty countries (indirect tax credit). A Polish company receiving a dividend from a subsidiary that is not resident in the EU, EEA or Switzerland may deduct from its tax the amount of income tax paid by the subsidiary on that part of the profit from which the dividend was paid if the Polish parent company has held directly at least 75% of the foreign subsidiary's shares for an uninterrupted period of at least 2 years. The total deduction is limited to the amount of Polish tax attributable to the foreign income.

Foreign-source dividends are added to other profits of a Polish taxpayer taxed at the standard 19% rate.

Dividends from companies resident in EU/EEA states or in Switzerland may be exempt in Poland if the Polish recipient holds directly at least 10% (25% in the case of Switzerland) of the share capital of the foreign subsidiary for an uninterrupted period of at least 2 years. The shareholding period requirement does not have to be met as of the payment date. The exemption does not apply if the dividends (or dividend-like income) are deductible for tax purposes in any form.

The above exemption does not apply if income from the participation, including redemption proceeds, is received as a result of the liquidation of the legal entity making the payments.

The domestic exemption or tax credit can be applied if a legal basis exists for a tax authority to request information from the tax

administration of the country from which the income was derived, under a double tax treaty or other ratified international treaty to which Poland is a party.

Broadly, except for some specific cases, full ownership of the shares is required to claim the credits and exemptions discussed above.

### C. Determination of trading income

**General.** Taxable income equals the difference between revenues subject to tax and tax-deductible expenses. Accounts prepared in accordance with Polish accounting standards are the basic source of information for determining taxable income. In practice, taxable income is arrived at by adjusting accounting results for tax purposes. Taxpayers must maintain accounting records in a manner that allows the tax base and the amount of tax payable to be determined. Otherwise, taxable income may be assessed by the tax authorities.

In general, taxable revenues of corporate entities carrying out business activities are recognized on an accrual basis. Revenues are generally recognized on the date of disposal of goods or property rights or the date on which services are supplied (or supplied in part), but no later than the following:

- Date of issuance of the invoice
- Date of receipt of payment

If the parties agree that services of a continuous nature are accounted for over more than one reporting period, revenue is recognized on the last day of the reporting period set out in the contract or on the invoice (however, not less frequently than once a year).

The definition of revenues includes free and partially free benefits.

Expenses are generally allowed as deductions if they relate to taxable revenues derived in Poland, but certain expenses are specifically disallowed.

Branches and permanent establishments of foreign companies are taxed on income determined on the basis of the accounting records, which must be kept in Polish currency. However, regulations provide coefficients for specific revenue categories, which may be applied if the tax base for foreign companies cannot be determined from the accounting records.

**Depreciation.** For tax purposes, depreciation calculated in accordance with the statutory rates is deductible. Depreciation is computed using the straight-line method. However, in certain circumstances, the reducing-balance method may be allowed. The following are some of the applicable annual straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Buildings	1.5 to 10*
Office equipment	14
Office furniture	20
Computers	30
Motor vehicles	20
Plant and machinery	4.5 to 20

\* For used buildings, an individual depreciation rate may be applied (the minimum depreciation period is calculated as a difference between 40 years and the time of use of the building).

For certain types of assets, depreciation rates may be increased. Companies may also apply reduced depreciation rates.

Intangibles are amortized over a minimum period, which usually ranges from 12 months (for example, development costs) to 60 months (for example, goodwill).

**Relief for losses.** Losses from one source of profits may offset income from other sources in the same tax year. Losses may be carried forward to the following five tax years to offset profits from all sources that are derived in those years. Up to 50% of the original loss may offset profits in any of the five tax years. Losses may not be carried back.

**Groups of companies.** Groups of related companies (limited-liability companies and joint-stock companies; the group rules do not apply to limited joint-stock partnerships) may report combined taxable income and pay one combined tax for all companies belonging to the group. To qualify as a tax group, related companies must satisfy several conditions, including the following:

- The parent company in the tax group must directly own 95% of the shares of the subsidiary companies.
- The agreement on setting up a tax group must be concluded for a period of at least three years. It must be concluded in front of a notary public and registered with the tax office.
- The taxable income of the group companies in each tax year must amount to at least 3% of the gross taxable revenues of the group companies.
- The members of the group may not benefit from any corporate income tax exemptions based on laws other than the Corporate Income Tax Law.

In practice, the applicability of the rules for tax groups is limited, primarily as a result of the profitability requirement and certain other restrictive conditions.

#### **D. Value-added tax**

Value-added tax (VAT) is imposed on goods sold and services rendered in Poland, exports, imports, and acquisitions and supplies of goods within the EU. Poland has adopted most of the EU VAT rules.

The standard rate of VAT is 23%. Lower rates may apply to specified goods and services. The 0% rate applies to exports and supplies of goods within the EU. Certain goods and services are exempt.

#### **E. Miscellaneous matters**

**Foreign-exchange controls.** Polish-based companies may open foreign-exchange accounts. All export proceeds received in convertible currencies and receipts from most foreign sources may be deposited in these accounts. Businesses may open foreign currency accounts abroad. However, restrictions apply to the opening of accounts in countries that are not members of the EU, EEA or the Organisation for Economic Co-operation and Development (OECD). No permit is required for most loans obtained by

Polish-based companies from abroad, including loans from foreign shareholders. Reporting requirements are imposed for certain loans and credits granted from abroad.

**Anti-avoidance legislation.** In applying the tax law, the tax authorities refer to the substance of a transaction in addition to its form.

If under the name (legal form) of the transaction, the parties have hidden some other transaction, the tax authorities may disregard the name (legal form) used by the parties and determine the tax implications of the transaction on the basis of actual intent of the parties.

If the tax authorities have doubts about the existence or the substance of the legal relationship between the parties, they refer the case to the common court to establish the type of the actual legal relationship.

The Polish Ministry of Finance is working on general anti-avoidance legislation. It is expected that the new rules will enter into force on 1 January 2016, but the final wording of the rules has not been yet published.

**Debt-to-equity rules.** The Polish thin-capitalization rules are amended, effective from 1 January 2015. The new rules restrict deductibility of interest on a broader range of loans than the rules that were in force until the end of 2014. The old rules restricted the deductibility of interest only on loans from direct shareholders or direct sister companies. Effective from 1 January 2015, in general, interest on all intra-group loans (as well as those from indirectly related entities) may be subject to deductibility restriction. Under the new thin-capitalization rules, if the value of debt owed to specified related parties exceeds the equity of the borrower, part (calculated based on a proportion) of the interest paid on a loan from a related party is not deductible for tax purposes. For purposes of these rules, equity is determined on the last day of the month preceding the month of the interest payment without taking into account a revaluation reserve and subordinated loans. The value of equity is further decreased by the value of the share capital that was not actually transferred to this capital or was covered with shareholder's loans, receivables and intangibles that are not subject to amortization. The definition of loan covers any form of debt financing, including the issuance of bonds, credits and bank and nonbank deposits. The definition does not cover derivatives. The thin-capitalization rules apply to interest on loans granted by Polish and foreign qualified entities. They cover the following loans:

- Loans granted by an entity that holds directly or indirectly at least 25% of the voting rights in the borrower
- Loans granted jointly by entities that jointly hold directly or indirectly at least 25% of the voting rights in the borrower
- Loans granted by one company to another company if the same entity holds directly or indirectly at least 25% of the voting rights in both the lender and the borrower

For general partners in a limited joint-stock partnership, the conditions concerning the minimum share (voting rights) are fulfilled, regardless of the general partner's share.

Effective from 1 January 2015, taxpayers have the right to opt for a new alternative thin-capitalization calculation method. The new method contains a general limitation applicable to all interest (including interest on third-party loans) based on a reference rate of the National Bank of Poland and a tax value of assets (excluding intangible assets) capped at 50% of earnings before interest and taxes. Interest that is not deducted in a tax year can be deducted in the following consecutive five tax years. If a taxpayer decides to use this method, it must be used for at least three tax years.

**Controlled foreign companies.** A law passed in 2014 introduced a controlled foreign companies (CFC) regime to the Polish tax system. Under the new law, effective from 1 January 2015, certain income or gains derived by foreign subsidiaries of Polish taxpayers that fulfill the definition of a CFC are subject to tax in Poland.

The following foreign companies are considered CFCs:

- A foreign company that has its registered office or management in a blacklisted territory or state
- A foreign company that has its registered office or management in a state with which Poland or the EU has not concluded an agreement containing an exchange-of-information clause
- A foreign company that fulfils all of the following criteria:
  - A Polish taxpayer holds for at least 30 days directly or indirectly at least 25% of the shares, voting rights or profit participation rights in this company.
  - At least 50% of this company's revenues is derived from dividends and other revenues from its share in the profits of legal persons, disposal of shares, receivables, interest and other loan proceeds, guarantees and warranty claims, copy-rights, industrial property rights and derivatives.
  - At least one kind of the revenues listed above is derived from the state where this foreign company has its registered office or management, and the revenues are subject to tax in that country at a rate lower than 14.25% or are exempt from tax or not subject to tax (unless exempt under the EU Parent-Subsidiary Directive).

A CFC's income is subject to tax in Poland at 19% at the level of the Polish shareholder. The shareholder is taxed on the part of the profits of the CFC in which the shareholder participates after deducting dividends received from the CFC and gains on disposal of shares in the CFC (these amounts may be deducted in the following five tax years). The tax payable in Poland is decreased by relevant proportion of corporate income tax paid by the CFC.

Taxation under the CFC rules does not apply if any of the following circumstances exists:

- The CFC is subject to tax on its worldwide income in an EU/EEA member state and carries a "genuine business activity" in this state.
- The CFC's revenues do not exceed EUR250,000 in a given tax year.
- The CFC carries on a "genuine business activity" in a state other than an EU/EEA member state and is subject to tax on its worldwide income in such state, its income does not exceed 10% of its revenues generated from the "genuine business activity" in this state, and Poland or the EU have concluded an agreement containing an exchange of information clause with this state.

The CFC rules apply to taxpayers carrying on business activity through a permanent establishment located outside of Poland, with certain exceptions.

**Transfer pricing.** The Polish tax law includes specific rules on transfer pricing. The fundamental rules, which are based on the OECD guidelines, are contained in the Corporate Income Tax Law and the Personal Income Tax Law.

Under the Corporate Income Tax Law, the following are related parties:

- A domestic entity (a legal person, natural person or organizational unit without legal form having its registered office [place of management] or residence in Poland) and a foreign entity (a legal or natural person having its registered office [place of management] or residence abroad), if any of the following circumstances exist:
  - The domestic entity participates, directly or indirectly, in the management, control or capital of the foreign entity.
  - The foreign entity participates, directly or indirectly, in the management, control or capital of the domestic entity.
  - The same legal person, natural person or organizational unit without legal form participates, directly or indirectly, in the management, control or capital of both the domestic entity and the foreign entity.
- Two domestic entities, if the following circumstances exist:
  - The domestic entity participates, directly or indirectly, in the management, control or capital of the other domestic entity.
  - The same legal person, natural person or organizational unit without legal form participates, directly or indirectly, in the management, control or capital of the domestic entities.
  - Family, capital, property or employment relations exist between the entities or the management, supervision or control personnel of the entities, or the same persons carry out management, supervision or control functions in the entities.

Polish tax law enumerates transfer-pricing methods that must be followed by the tax authorities in testing the prices applied in intercompany transactions (taxpayers do not have to apply these methods). The tax law provides for the following traditional transfer-pricing methods:

- The comparable uncontrolled price method (preferable one)
- The resale-price method
- The cost-plus method

If the above methods are inapplicable, the transactional methods (profit-split method and transactional net margin method) can be considered.

Polish transfer-pricing regulations indicate that the tax authorities must examine the terms agreed to or imposed with respect to business restructuring projects between related parties for compatibility with the terms that independent companies would have negotiated. They also cover the examination of the accuracy of the grounds for the right of related parties to receive a fee, and the amount of such fee, in business restructuring projects.

Under the tax law, on the request of the tax authorities, taxpayers conducting transactions with related parties exceeding certain

statutory thresholds (of a relatively low value) must prepare specific tax documentation regarding these transactions and present it to the tax authorities or tax inspection authorities within seven days after the date of the request. In addition, effective from 2015, tax documentation must be prepared with respect to an agreement to set up an entity without legal form, a joint venture agreement or a similar agreement. The documentation must be in Polish and must contain the following:

- A description of the functions of the parties to the transaction (including assets engaged and risks assumed)
- All expected costs of the transaction and the method and terms of payment
- The method for calculating profits and a description of the transaction price
- A description of the business strategy and any other related activity if this strategy affects the transaction value
- An indication of any other factors that were taken into account in determining the transaction value (a description of rules for the share of profits or losses between partners must be provided with respect to an agreement to set up an entity without legal form, joint venture agreement or a similar agreement)
- A description of the benefits that the entity required to prepare the documentation expects to obtain from the purchase of intangible assets or services, such as advisory or financial services, granting of licenses or purchase of intellectual property

Transfer-pricing regulations also define low value-added services and indicate the information to be verified by authorities while auditing these types of transactions. A transfer-pricing decree provides a list of shareholder costs that are not deductible for tax purposes in Poland.

The documentation requirements also apply to entities that enter into transactions involving payments to tax havens if the total value of the transactions exceeds EUR20,000 during the tax year.

If the tax authorities assess additional income to a taxpayer and if a taxpayer does not provide the transfer-pricing documentation required by the law, additional income that is assessed in connection with intercompany transactions that are not covered with the documentation is taxed at a penalty tax rate of 50%.

The transfer-pricing documentation requirements applicable to Polish entities also apply to permanent establishments of foreign residents located in Poland and to permanent establishments of Polish entities. In addition, if income earned by the permanent establishment of a foreign resident is assessed in Poland and if no transfer-pricing documentation is submitted by the statutory deadline, a corporate income tax rate of 50% can be applied to any excess over the fair market amount.

Taxpayers must report foreign related-party transactions if the total amount of the transactions exceeds EUR300,000 in a tax year. If the foreign entity has a representative office or a permanent establishment in Poland, the reporting obligation applies to single transactions exceeding EUR5,000.

The required information must be submitted to the tax office by the end of the third month following the end of the tax year.

The Advanced Pricing Agreement (APA) regulations entered into force on 1 January 2006. An APA concluded for a particular transaction is binding on the tax authorities with respect to the method selected by the taxpayer. APAs may apply to transactions that have not yet been executed or transactions that are in progress when the taxpayer submits an application for an APA.

In June 2006, Poland ratified the EU convention on the elimination of double taxation in connection with the adjustment of profits of associated enterprises (90/436/EEC).

Effective from 2015, it is possible to eliminate double taxation in domestic transactions.

## F. Treaty withholding tax rates

The standard withholding tax rates are 19% for dividends and 20% for interest and royalties. The rate may be reduced under a double tax treaty on presentation of a certificate of tax residence or, in some cases, under domestic regulations. The following table shows the withholding tax rates under Polish double tax treaties.

	Dividends %	Interest %	Royalties %
Albania	5/10 (d)	10	5

(a) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the payer.

- 
- (b) The lower rate applies if the recipient of the dividends is a company that owns at least 15% of the payer.
- (c) The lower rate applies if the recipient of the dividends is a company that owns at least 20% of the payer.
- (d) The lower rate applies if the recipient of the dividends is a company that owns at least 25% of the payer.
- (e) The lower rate applies if the recipient of the dividends is a company that owns more than 30% of the payer.
- (f) The lower rate applies to royalties paid for copyrights, among other items; the higher rate applies to royalties for patents, trademarks and industrial, commercial or scientific equipment or information.
- (g) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the voting shares of the payer.
- (h) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (i) The lower rate applies to cultural royalties.
- (j) This rate applies if the recipient of the dividends is a company that owns at least one-third of the payer.
- (k) The 0% rate applies to among other items, interest paid to government units, local authorities and central banks. In the case of certain countries, the rate also applies to banks (the list of exempt or preferred recipients varies by country). The relevant treaty should be consulted in all cases.
- (l) The 0% rate applies to royalties paid for, among other items, copyrights. The 10% rate applies to royalties paid for patents, trademarks and for industrial, commercial or scientific equipment or information.
- (m) The 20% rate applies if the recipient of the interest is not a financial or insurance institution or government unit.
- (n) The lower rate applies to know-how; the higher rate applies to copyrights, patents and trademarks.
- (o) The 10% rate applies if, on the date of the payment of dividends, the recipient of the dividends has owned at least 25% of the share capital of the payer for an uninterrupted period of at least two years. The 15% rate applies to other dividends.
- (p) The lower rate applies to royalties paid for the following:
- Copyrights
  - The use of or the right to use industrial, commercial and scientific equipment
  - Services comprising scientific or technical studies
  - Research and advisory, supervisory or management services
- The treaty should be checked in all cases.
- (q) The lower rate applies to know-how, patents and trademarks.
- (r) The 5% rate applies if the recipient is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- (s) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer of the dividends for at least one year and if the dividends are declared within such holding period. The 5% rate applies to dividends paid to pension funds or other similar institutions operating in the field of pension systems. The 15% rate applies to other dividends.
- (t) Because the rate under the domestic law of Poland is 19%, the treaty rate of 20% does not apply.
- (u) The treaty with the former Federal Republic of Yugoslavia that applied to the Union of Serbia and Montenegro should apply to the Republics of Montenegro and Serbia.
- (v) The lower rate applies to fees for technical services.
- (w) The 10% rate also applies to fees for technical services.
- (x) The 20% rate also applies to certain services (for example advisory, accounting, market research, legal assistance, advertising, management and control, data processing, search and selection services, guarantees and pledges and similar services).
- (y) The lower rate applies if the beneficial owner is a company (other than a partnership) that controls directly at least 25% of the capital of the company paying the dividends.
- (z) The lower rate applies if the owner of the dividends is the government or a government institution.
- (aa) The 10% rate applies to interest paid to banks and insurance companies and to interest on bonds that are regularly and substantially traded.
- (bb) The 0% rate applies to certain dividends paid to government units or companies.

- (cc) The lower rate applies if the recipient of the dividends is a company that owns either of the following:
- At least 25% of the payer
  - At least 10% of the payer, provided the value of the investment amounts to at least EUR500,000 or its equivalent
- (dd) The treaty rate is 15% for all types of interest. However, under a most-favored-nation clause in a protocol to the treaty, the 15% rate is replaced by any more beneficial rate agreed to by Chile in a treaty entered into with another jurisdiction. For example, under Chile's tax treaty with Spain, a 5% rate applies to certain types of interest payments, including interest paid to banks or insurance companies or interest derived from bonds or securities that are regularly and substantially traded on a recognized securities market.
- (ee) The general treaty rate for royalties is 15%. However, under a most-favored-nation clause in a protocol to the treaty, the 15% rate is replaced by any more beneficial rate agreed to by Chile in a treaty entered into with another jurisdiction. For example, under Chile's tax treaty with Spain, the general withholding tax rate for royalties is 10%.
- (ff) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the share capital of the payer of the dividends for an uninterrupted period of at least two years.
- (gg) The treaty has not yet entered into force.
- (hh) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends on the date on which the dividends are paid and has held the capital or will hold the capital for an uninterrupted 24-month period that includes the date of payment of the dividends.
- (ii) The rate is 10% if Switzerland imposes a withholding tax on royalties paid to nonresidents.
- (jj) The lower rate applies if the recipient of the dividends is a company (other than a partnership) that owns directly at least 10% of the payer. Certain limitations to the application of the preferential rates may apply.
- (kk) The lower rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting power of the payer. Under the Ireland treaty, if Ireland levies tax at source on dividends, the 0% rate is replaced by a rate of 5%.
- (ll) The 0% rate applies to dividends paid to a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends on the date the dividends are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls. The 0% rate may also apply to dividends paid to certain pension funds.
- (mm) The 10% rate applies to interest paid before 1 July 2013. For interest paid on or after 1 July 2013, the 5% rate applies unless an exemption applies. The 0% rate applies to such interest if any of the following conditions is satisfied:
- The beneficial owner of the interest is a company (other than a partnership) that holds directly at least 25% of the share capital of the payer of the interest.
  - The payer of the interest holds directly at least 25% of the share capital of the beneficial owner of the interest.
  - An EU/EEA company holds directly at least 25% of the share capital of both the beneficial owner of the interest and the payer of the interest.
- (nn) For royalties paid before 1 July 2013, the 10% rate applies if Switzerland imposes in its local provisions a withholding tax on royalties paid to nonresidents. Otherwise, a 0% rate applies. For royalties paid on or after 1 July 2013, a 5% rate applies unless an exemption applies. The 0% rate applies to such royalties if any of the following conditions is satisfied:
- The beneficial owner of the royalties is a company (other than a partnership) that holds directly at least 25% of the share capital of the payer of the royalties.
  - The payer of the royalties holds directly at least 25% of the share capital of the beneficial owner of the royalties.
  - An EU/EEA company holds directly at least 25% of the share capital of both the beneficial owner of the royalties and the payer of the royalties.
- Furthermore, if Poland enters into an agreement with an EU or EEA country that allows it to apply a rate that is lower than 5%, such lower rate will also apply to royalties paid between Poland and Switzerland.
- (oo) The lower rate (5% rate under the Singapore treaty) applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of 24 months.

- 
- (pp) The 0% rate applies to the following:
- Interest arising in Poland and paid to a resident of Canada with respect to a loan made, guaranteed or insured by Export Development Canada or to a credit extended, guaranteed or insured by Export Development Canada
  - Interest arising in Canada and paid to a resident of Poland with respect to a loan made, guaranteed or insured by an export financing organization that is wholly owned by the state of Poland or to a credit extended, guaranteed or insured by an export financing organization that is wholly owned by the state of Poland
  - Interest arising in Poland or Canada and paid to a resident of the other contracting state with respect to indebtedness arising as a result of the sale by a resident of the other contracting state of equipment, merchandise or services (unless the sale or indebtedness is between related persons or unless the beneficial owner of the interest is a person other than the vendor or a person related to the vendor)
- (qq) The lower rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works and royalties for the use of, or the right to use, patents or information concerning industrial, commercial or scientific experience (with some exceptions).
- (rr) The agreement with the Socialist Federal Republic of Yugoslavia should apply to Bosnia and Herzegovina.

(a) Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRC) applies to resident companies and nonresident companies with permanent establishments (PEs) in Portugal. Small and medium-sized companies

can benefit from a 17% reduced rate for the first EUR15,000 of taxable profit. See Section B for details of other rates.

- (b) A municipal surcharge of 1.5% is generally imposed on the taxable profit determined for IRC purposes. Certain municipalities do not levy the surcharge. For further details, see Section B.
- (c) A state surcharge of 3% is imposed on the taxable profit determined for IRC purposes between EUR1,500,000 and EUR7,500,000. If the taxable profit for IRC purposes exceeds EUR7,500,000, the state surcharge is levied at a rate of 5% on the excess up to EUR35 million. If the taxable profit for IRC purposes exceeds EUR35 million, the state surcharge is levied at a rate of 7% on the excess.
- (d) See Section B.
- (e) Income must be declared and is subject to the normal tax rates. Amounts withheld may be credited against the IRC due. See Section B.
- (f) Investment income paid to tax-haven entities is subject to a 35% withholding tax. The same tax applies if the beneficial owner of the income is not properly disclosed.
- (g) These rates may be reduced by tax treaties or by European Union (EU) Directives. Under the EU Parent-Subsidiary Directive (also applicable to dividends paid to Swiss parent companies), the rate on dividends may be reduced to 0%. The rate may also be reduced to 0% if the beneficiary is resident in a tax treaty country and if certain other conditions are met. Under the EU Interest and Royalties Directive, the rate on interest or royalties may be reduced to 0% if the interest or royalties are paid between EU associated companies.
- (h) This tax applies to interest from private and public company bonds.
- (i) This tax applies to interest on bonds issued after 15 October 1994. A 25% withholding tax applies to interest on bonds issued on or before that date.
- (j) Interest on certain bonds traded on the stock exchange and paid to nonresidents not operating in Portugal through a PE may in certain circumstances be exempt from tax. The same exemption may also apply to capital gains derived from disposals of such bonds. The exemption does not apply to entities resident in tax havens (except central banks and other government agencies), unless an applicable tax treaty or an exchange of information agreement with Portugal exists.
- (k) The 25% rate applies to most services and commissions. The 25% rate applies to services performed by artists and sportspersons and to fees paid to board members. This tax does not apply to communication, financial and transportation services. The tax is eliminated by most tax treaties, but this may not be the case for income derived from the performance of artists and sportspersons.
- (l) For tax losses computed before 2010, the prior six-year carryforward period applies. For tax losses computed in 2010 or 2011, a four-year carryforward period applies. For tax losses computed in 2012 or 2013, a five-year carryforward period applies. For tax losses used from 1 January 2014, the amount deductible each year is capped by 70% of the taxable profit for the year.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRC) is levied on resident and nonresident entities.

*Resident entities.* Companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRC on worldwide profits, but a foreign tax credit may reduce the amount of IRC payable (see *Foreign tax relief*).

Companies and other entities, including non-legal entities, that do not carry out commercial, industrial or agricultural activities, are generally subject to tax on their worldwide income (for details regarding the calculation of the taxable profit of these entities, see Section C).

*Nonresident entities.* Companies or other entities that operate in Portugal through a PE are subject to IRC on the profits attributable to the PEs.

Companies or other entities without a PE in Portugal are subject to IRC on income deemed to be obtained in Portugal.

For tax purposes, companies or other entities are considered to have a PE in Portugal if they have a fixed installation or a permanent representation in Portugal through which they engage in a commercial, industrial or agricultural activity. Under rules that generally conform to the Organisation for Economic Co-operation and Development (OECD) model convention, a PE may arise from a building site or installation project that lasts for more than six months or from the existence of a dependent agent. Under these rules, commissionaire structures, dependent agents and services rendered in Portugal are more likely to result in a PE for IRC purposes.

Double tax treaties may further limit the scope of a PE in Portugal.

**Tax rates.** For 2015, IRC is levied at the following rates.

<b>Type of enterprise</b>	<b>Rate (%)</b>
Companies or other entities with a head office or effective management control in Portugal, whose principal activity is commercial, industrial or agricultural	21
Companies or other entities with a head office or effective management control in the autonomous region of the Azores, or with a branch, office, premises or other representation there	16.8
Companies or other entities with a head office or effective management control in the autonomous region of the Madeira, or with a branch, office, premises or other representation there	21
Entities other than companies with a head office or effective management control in Portugal, whose principal activity is not commercial, industrial or agricultural	21.5
PEs	21
Nonresident companies or other entities without a head office, effective management control or a PE in Portugal	
Standard rate	25
Rental income	25

Certain types of income earned by companies in the last category of companies listed above are subject to the following withholding taxes.

<b>Type of income</b>	<b>Rate (%)</b>
Copyrights and royalties	25
Technical assistance	25
Income from shares	25
Income from government bonds	25
Revenues derived from the use of, or the right to use, equipment	25
Other revenues from the application of capital	25
Payments for services rendered or used in Portugal, and all types of commissions	25*

\* This tax does not apply to communications, financial and transportation services. It is eliminated under most tax treaties.

Applicable double tax treaties, EU directives or the agreement entered into between the EU and Switzerland may reduce the above withholding tax rates.

A 35% final withholding tax rate applies if income is paid or made available in a bank account and if the beneficial owner is not identified. A 35% final withholding tax rate also applies to investment income obtained by an entity located in a tax haven.

A municipal surcharge (*derrama municipal*) is imposed on resident companies and nonresident companies with a PE in Portugal. The rate of the municipal surcharge, which may be up to 1.5%, is set by the respective municipalities. The rate is applied to the taxable profit determined for IRC purposes. Consequently, the maximum combined rate of the IRC and the municipal surcharge on companies is 22.5%.

A state surcharge (*derrama estadual*) is also imposed on resident companies and nonresident companies with a PE in Portugal. The rate of the state surcharge, which is 3%, is applied to the taxable profit determined for IRC purposes between EUR1,500,000 and EUR7,500,000. For taxable profits exceeding EUR7,500,000, a 5% rate of state surcharge is levied on the excess up to EUR35 million. For taxable profits exceeding EUR35 million, a 7% rate of state surcharge is levied on the excess. Consequently, the maximum combined rate of the IRC and the surcharges on companies is 29.5%.

Companies established in the free zones of Madeira and the Azores enjoyed a tax holiday until 2011. The more important of the two, Madeira, is internationally known as the Madeira Free Zone (Zona Franca da Madeira). A new regime has been approved for companies licensed between 2007 and 2013 (extended to 31 December 2014). Under the new regime, the reduced rate is 5% for 2013 through 2020. This rate applies to taxable income, subject to a cap, which is generally based on the existing number of jobs. New requirements and limitations apply to the issuance of licenses for the Madeira Free Zone. The new regime is also available for companies licensed before 2007. However, it was subject to a formal option that should have been elected on or before 30 December 2011.

Significant incentives are also available for qualifying new investment projects established before 31 December 2020. To qualify for the incentives, the projects must satisfy the following requirements:

- They must have a value exceeding EUR3 million.
- They must develop sectors considered to be of strategic importance to the Portuguese economy.
- They must be designed to reduce regional economic imbalances, create jobs and stimulate technological innovation and scientific research in Portugal.

Qualifying projects may enjoy the following tax benefits for up to 10 years:

- A tax credit of 10% to 20% of amounts invested in plant, equipment and intangibles used in the project. However, buildings and furniture qualify only if they are directly connected to the development of the activity.
- An exemption from, or a reduction of, the municipal real estate holding tax for buildings used in the project.

- An exemption from, or a reduction of, the property transfer tax (see Section D) for buildings used in the project.
- An exemption from, or a reduction of, the stamp duty for acts and contracts necessary to complete the project, including finance agreements.

Portuguese tax law also provides for significant tax credits and deductions concerning research and development (R&D) investments, fixed-asset investments (some of which must have been performed by 31 December 2013) and creation of jobs. In addition, a specific tax benefit is introduced for the reinvestment of profits by small and medium-sized companies. Under this measure, such companies can benefit from a tax credit of 10% of the retained earnings (capped to the lower of 25% of the IRC liability and EUR500,000 per year) reinvested in the acquisition of eligible fixed assets if several conditions are met.

Micro, small and medium-sized companies held by individuals, venture capital companies and business angels (see *Capital gains*) can benefit for a four-year period from a notional interest deduction of 5% on the amount of cash contributions by shareholders to share capital made on or after 1 January 2014.

Certain incentives are also available to land transportation of passengers and stock activities, car-sharing and bike-sharing, and activities related to bicycle fleets.

**Simplified regime of taxation.** Resident companies that have annual turnover not exceeding EUR200,000 and total assets not exceeding EUR500,000 and that meet certain other conditions may opt to be taxed under a simplified regime of taxation. The taxable income corresponds to a percentage ranging between 4% and 100% of gross income, depending on the nature of the income.

**Capital gains.** Capital gains derived from the sale of fixed assets and from the sale of financial assets are included in taxable income subject to IRC. The capital gain on fixed assets is equal to the difference between the sales value and the acquisition value, adjusted by depreciation and by an official index. The tax authorities may determine the sales value for real estate to be an amount other than the amount provided in the sales contract.

Fifty percent of the capital gains derived from disposals of tangible fixed assets, intangibles assets and non-consumable biological assets held for more than one year may be exempt if the sales proceeds are invested in similar assets during the period beginning one year before the year of the disposal and ending two years after the year of the disposal. A statement of the intention to reinvest the gains must be included in the annual tax return for the year of disposal. The remaining 50% of the net gains derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If by the end of the second year following the disposal no reinvestment is made, the net capital gains remaining untaxed (50%) are added to taxable profit for that year, increased by 15%.

A full participation regime is introduced for capital gains and losses on shareholdings held for at least 24 months if the remaining

conditions for the dividends participation regime are met. The regime does not apply if the main assets of the company that issued the shares being transferred are composed, directly or indirectly, of Portuguese real estate (except real estate allocated to an agricultural, industrial or commercial activity [other than real estate trading activities]). This applies to gains and losses from onerous transfers of shares and other equity instruments (namely, supplementary contributions), capital reductions, restructuring transactions and liquidations.

Losses from the onerous transfer of shareholdings in tax-haven entities are not allowed as deductions. Losses resulting from shares and equity instruments are not deductible in the portion corresponding to the amount of dividends and capital gains that were excluded from tax during the previous four years under the participation regime or the underlying foreign tax credit relief.

Liquidation proceeds are treated as capital gains or losses. The losses from the liquidation of subsidiaries are deductible only if the shares have been held for at least four years. If within the four-year period after the liquidation of the subsidiary, its activity is transferred so that it is carried out by a shareholder or a related party, 115% of any loss deducted by the shareholder on liquidation of the subsidiary is added back.

Tax credits are available for a venture capital company (*sociedade de capital de risco*, or SCR) as a result of investments made in certain types of companies.

Nonresident companies that do not have a head office, effective management control or a PE in Portugal are subject to IRC on capital gains derived from sales of corporate participations, securities and financial instruments if any of the following apply:

- More than 25% of the nonresident entities is held, directly or indirectly, by resident entities.
- The nonresident entities are resident in territories listed on a blacklist contained in a Ministerial Order issued by the Finance Minister.
- The capital gains arise from the transfer of shares held in a property company in which more than 50% of the assets comprise Portuguese real estate or in a holding company that controls such a company.

Nonresident companies that do not have a head office, effective management control or a PE in Portugal are taxed at a 25% rate on taxable capital gains derived from disposals of real estate, shares and other securities. For this purpose, nonresident entities must file a tax return. A tax treaty may override this taxation.

*Exit taxes.* The IRC Code provides that the transfer abroad of the legal seat and place of effective management of a Portuguese company, without the company being liquidated, results in a taxable gain or loss equal to the difference between the market value of the assets and the tax basis of assets as of the date of the deemed closing of the activity. This rule does not apply to assets and liabilities remaining in Portugal as part of the property of a Portuguese PE of the transferor company if certain requirements are met.

The exit tax also applies to a PE of a nonresident company on the closing of an activity in Portugal or on the transfer of the company's assets abroad.

Following the European Court of Justice decision in Case C-38/10, significant changes to the existing exit tax rules were made. Under the revised rules, on a change of residency to an EU or EEA member state, the taxpayer may now opt for one of the following alternatives:

- Immediate payment of the full tax amount
- Payment of the tax whenever the gains are (deemed) realized
- Payment of the full tax amount in equal installments during a five-year period

The deferral of the tax payment triggers late payment interest. In addition, a bank guarantee may be requested. This guarantee equals the tax due plus 25%. In addition, annual tax returns are required if the tax is deferred.

**Administration.** Companies with a head office, effective management control or a PE in Portugal are required to make estimated payments with respect to the current financial year. The payments are due in July, September and December. For companies with turnover of up to EUR500,000, the total of the estimated payments must equal at least 80% of the preceding year's tax. For companies with turnover exceeding EUR500,000, the total of the estimated payments must equal at least 95% of the preceding year's tax. The first payment is mandatory. However, the obligation to pay the other installments depends on the tax situation of the company. For example, a company may be excused from making the third installment if it establishes by adequate evidence that it is suffering losses in the current year. However, if a company ceases making installment payments and if the balance due exceeds by 20% or more the tax due for that year under normal conditions, compensatory interest is charged. Companies must file a tax return by 31 May of the following year. Companies must pay any balance due when they file their annual tax return.

Companies with a head office, effective management control or a PE in Portugal that have adopted a financial year other than the calendar year must make estimated payments as outlined above, but in the 7th, 9th and 12th months of their financial year. They must file a tax return by the end of the 5th month following the end of that year.

Advance payments concerning the state surcharge are also required in the 7th, 9th and 12th months of the tax year.

In addition, companies must make a Special Payment on Account (SPA) in the 3rd month of the financial year, or they can elect to pay the amount in the 3rd and 10th months. The SPA is equal to the difference between the following amounts:

- 1% of turnover of the preceding year, with a minimum limit of EUR1,000, or, if the minimum limit is exceeded, EUR1,000 plus 20% of the excess with a maximum limit of EUR70,000
- The ordinary payments on account made in the preceding year

The SPA may be subtracted from the tax liability in the following six years, or refunded if, on the occurrence of certain events (for example, the closing of activity), a petition is filed.

A nonresident company without a PE in Portugal must appoint an individual or company, resident in Portugal, to represent it concerning Sany tax liabilities. The representative must sign and file the tax return using the general tax return form. IRC on capital gains derived from the sale of real estate must be paid within 30 days from the date of sale. IRC on rents from leasing buildings must be paid by 31 May of the following year.

*Binding rulings.* A general time frame of 150 days exists in the tax law to obtain a binding ruling. This period can be reduced to 90 days if the taxpayer pays a fee between EUR2,550 and EUR25,500 and if the ruling petition with respect to an already executed transaction contains the proposed tax treatment of the transaction as understood by the taxpayer. This tax treatment is deemed to be tacitly accepted by the tax authorities if an answer is not given within the 90-day period.

**Dividends.** Dividends paid by companies to residents and nonresidents are generally subject to withholding tax at a rate of 25%.

On distributions to resident parent companies, the 25% withholding tax is treated as a payment on account of the final IRC due.

A resident company subject to IRC may deduct 100% of dividends received from another resident company if all of the following conditions apply:

- The recipient company owns directly or directly and indirectly at least 5% of the capital or voting rights of the payer.
- The recipient company holds the interest described above for an uninterrupted period of at least two years that includes the date of distribution of the dividends, or it makes a commitment to hold the interest until the two-year holding period is complete.
- The payer of the dividends is a Portuguese resident company that is also subject to, and not exempt from, IRC or Game Tax (tax imposed on income from gambling derived by entities such as casinos).

A 100% dividends-received deduction is granted for dividends paid by entities from EU member countries to Portuguese entities (or Portuguese PEs of EU entities) if the above conditions are satisfied and if both the payer and recipient of the dividends qualify under the EU Parent-Subsidiary Directive. The same regime is also available for dividends received from European Economic Area (EEA) subsidiaries. The participation exemption regime also applies to dividends from subsidiaries in other countries, except tax havens, if the subsidiary is subject to corporate tax at a rate not lower than 60% of the standard IRC rate (this requirement can be waived in certain situations).

The participation exemption regime does not apply in certain circumstances, including among others, the following:

- The dividends are tax deductible for the entity making the distribution.
- The dividends are distributed by an entity not subject to or exempt from income tax, or if applicable, the dividends are paid out of profits not subject to or exempt from income tax at the level of sub-affiliates, unless the entity making the distribution is resident of an EU or an EEA member state that is bound to administrative cooperation in tax matters equivalent to that established within the EU.

If a recipient qualifies for the 100% deduction, the payer of the dividends does not need to withhold tax. This requires the satisfaction of a two-year holding period requirement before distribution.

A withholding tax exemption applies to dividends distributed to EU and EEA parent companies and to companies resident in treaty countries that have entered into tax treaties with Portugal that includes an exchange of tax information clause, owning (directly or indirectly and indirectly through eligible companies) at least 5% of a Portuguese subsidiary for more than two years. Companies outside the EU and EEA must be subject to corporate tax at a rate not lower than 60% of the standard IRC rate. A full or partial refund of the withholding tax may be available under certain conditions. A withholding tax exemption is also available for dividends paid to a Swiss parent company, but the minimum holding percentage is increased to 25%.

**Foreign PE profits.** Resident taxpayers may opt for an exemption regime for foreign PE profits. Under this regime, foreign PE losses are also not deductible if the PE is subject to one of the taxes listed in the EU Parent-Subsidiary Directive or to corporate tax at a rate not lower than 60% of the standard IRC rate and if the PE is not located in a tax-haven territory.

Transactions between the head office and the foreign PE must respect the arm's-length principle, and the costs related to the PE are not deductible for the head office.

The following are recapture rules:

- PE profits are not exempt up to the amount of PE losses deducted by the head office in the 12 preceding years.
- If the PE is incorporated, subsequent dividends and capital gains from shares are not exempt up to the amount of PE losses deducted by the head office in the 12 preceding years.
- If the exemption regime ceases to apply, the PE losses as well as the dividends and capital gains from shares (if the PE was previously incorporated) are not deductible or exempt, respectively, up to the amount of the PE profits that were exempt from tax during the preceding 12 years.

**Foreign tax relief.** Foreign-source income is taxable in Portugal. However, direct foreign tax may be credited against the Portuguese tax liability up to the amount of IRC attributable to the net foreign-source income. The foreign tax credit can be carried forward for five years.

In addition, taxpayers may opt to apply an underlying foreign tax credit with respect to foreign-source dividends that are not eligible for the participation exemption regime. Several conditions must be met, including the following:

- The minimum holding percentage is 5% for at least 24 months.
- The entity distributing the dividends is not located in a tax-haven territory, and indirect subsidiaries are not held through a tax-haven entity.

### C. Determination of trading income

**General.** Taxable profit is determined according to the following rules:

- For companies with a head office or effective management control in Portugal that are principally engaged in commercial, agricultural or industrial activities, the taxable profit is the net accounting profit calculated in accordance with Portuguese generally accepted accounting principles (GAAP), as adjusted by the IRC Code.
- For companies with a head office or effective management control in Portugal that do not principally engage in commercial, industrial or agricultural activities, the taxable profit is the net total of revenues from various categories of income as described in the Personal Tax (IRS) Code, less expenses.
- For PEs, the taxable profit is determined as outlined in the first item. In calculating taxable profit, general administrative expenses that are attributable to the PE may be deducted as a cost if justified and acceptable to the fiscal authorities.

Effective from 2010, Portuguese GAAP is similar to International Financial Reporting Standards (IFRS). In addition, the tax law has been adapted to the new GAAP, but several adjustments are still required between net accounting profit and taxable profit.

An intellectual property (IP) regime provides for a 50% exclusion from the tax base with respect to income derived from contracts for the transfer or temporary use of patents and industrial designs or models. To benefit from the IP regime, several conditions must be satisfied. This regime applies to patents and industrial designs or models registered on or after 1 January 2014.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible including, but not limited to, the following:

- The tax depreciation of private cars, on the amount of the acquisition price exceeding EUR25,000 but not exceeding EUR62,500 (depending on the acquisition date and type of vehicle), as well as all expenses concerning pleasure boats and tourism airplanes, except for those allocated to public transportation companies or used for rental purposes as part of the company's normal activities
- Daily allowances and compensation for costs incurred in traveling in the employees' own vehicles at the service of the employer that are not charged to clients if the company does not maintain a control map of the expenses, allowing it to identify the place, length and purpose of the displacements, except for the amounts on which the beneficiary is subject to IRS
- Expenses shown on documents issued by entities without a valid taxpayer number
- Improperly documented expenses
- IRC and surcharges (see Section B)
- Penalties and interest charges
- Contribution on banking sector (see Section D)

Assets under financial leases are deemed to be owned by the lessee, and consequently the lessee may deduct only applicable tax depreciation and any interest included in the rent payments. Special rules apply to sale and leaseback transactions.

Although representation expenses and expenses related to private cars are deductible with some limits, they are subject to a special stand-alone tax at a rate of 10%. This rate is increased to 27.5% for expenses related to private cars if the acquisition price of the

car is between EUR25,000 and EUR35,000, or to 35% if the acquisition price of the car exceeds EUR35,000. The rates applicable to expenses related to private cars may be significantly reduced, depending on the type of car (electric, liquefied petroleum gas [LPG] or natural gas powered and hybrid plug-in).

The 5% tax also applies to tax-deductible daily allowances and compensation for costs incurred in traveling in the employees' own vehicles at the service of the employer that is not charged to clients and not subject to IRS. The tax also applies if such expenses are not tax deductible as a result of the lack of proper documentation and if the taxpayer incurs a tax loss in the financial year.

Undocumented expenses are not deductible. In addition, these expenses are subject to a special stand-alone rate of 50% (70% with respect to entities partially or totally exempt from IRC, not principally engaged in commercial, industrial or agricultural activities or subject to the Game Tax). The tax authorities may classify an expense as undocumented if insufficient supporting documentation exists.

Certain indemnities and compensation paid to board members and managers (including "golden parachutes") are subject to a special stand-alone tax at a rate of 35%.

A special stand-alone tax at a rate of 35% applies to bonuses and other variable compensation paid to board members and managers, if such compensation exceeds 25% of the annual remuneration and EUR27,500. This tax does not apply if at least 50% of the payment is deferred over a period of at least three years and conditioned on the positive performance of the company during such period.

A "Robin Hood" tax is levied on both oil production and distribution companies and is charged based on the rise in value of the oil stocks held. For tax purposes, the first-in, first-out (FIFO) method or the weighted average cost method is deemed to be used for the valuation of oil stocks. The positive difference between the gross margin determined based on these methods and the gross margin determined under the accounting method used by the company is subject to a stand-alone tax at a flat rate of 25%. This tax is not deductible for IRC purposes and cannot be reflected in the purchase price paid by the final consumer.

The above stand-alone taxes are imposed regardless of whether the company earns a taxable profit or suffers a tax loss in the year in which it incurs the expenses. In addition, all stand-alone rates are increased by 10 percentage points if the taxpayer incurs a tax loss in the relevant year.

**Inventories.** Inventories must be consistently valued by any of the following criteria:

- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin
- Cost of sales of products cropped from biological assets, which is determined at the time of cropping, less the estimated costs at the point of sale, excluding transportation and other costs required to place the products in the market

- Any other special valuation considered basic or normal, provided that it has the prior approval of the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

**Provisions.** The following provisions, among others, are deductible:

- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses (inventory values in excess of market value)
- Warranty expenditures
- Technical provisions imposed by the Bank of Portugal or the Portuguese Insurance Institute

**Depreciation.** In general, depreciation is calculated using the straight-line method. The declining-balance method may be used for new tangible fixed assets other than buildings, office furniture and automobiles not used for public transport or rental. Maximum depreciation rates are established by law for general purposes and for certain specific industries. If rates that are less than 50% of the official rates are used, total depreciation will not be achieved over the life of the asset. The following are the principal official straight-line rates.

<b>Asset</b>	<b>Rate (%)</b>
Commercial buildings	2
Industrial buildings	5
Office equipment	12.5 to 25
Motor vehicles	12.5 to 25
Plant and machinery	5 to 33.33

Companies may request the prior approval of the tax authorities for the use of depreciation methods other than straight-line or declining-balance or rates up to double the official rates. Approval is granted only if the request is justified by the company's business activities.

For tax purposes, the maximum depreciable cost of private motor cars is between EUR25,000 and EUR50,000, depending on the acquisition date and type of vehicle.

Intangibles (excluding patents and goodwill from shares) that are acquired on or after 1 January 2014 for consideration and that do not have a defined economic life can be amortized over 20 years. Investment properties and non-consumable biological assets that are subsequently measured at fair value can also be depreciated during the remaining period of their maximum economic life.

**Relief for losses.** Tax losses may be carried forward for 12 years (6 years if the losses were computed before 2010, 4 years if the losses were computed in 2010 or 2011, or 5 years if the losses were computed in 2012 or 2013). For tax losses used from 1 January 2014, the amount deductible each year is capped at 70% of the taxable profit for the year. Loss carrybacks are not allowed. Tax losses existing at the time of the occurrence of certain changes may not be carried forward. A change of at least 50% of the shareholders or voting rights can trigger the cancellation of tax losses, unless it is derived from certain situations.

**Groups of companies.** Resident groups of companies may elect to be taxed on their consolidated profit. To qualify for tax consolidation, a group must satisfy certain conditions, including the following:

- The parent company must hold, directly or indirectly, at least 75% of the subsidiaries' registered capital, provided that the holding accounts for more than 50% of the voting rights.
- The parent company may not be deemed to be dominated by the other resident company.
- All companies belonging to the group must have their head office and place of effective management in Portugal.
- The parent company must hold the participation in the subsidiary for more than one year beginning from the date the regime begins to be applied.
- All group companies must be subject to IRC at the standard rate of 21%.

Effective from 2015, tax grouping is also allowed if the parent entity of the Portuguese resident companies is a local branch of an EU or EEA resident company or if Portuguese resident companies are under common control by the same EU or EEA resident company.

Applications for consolidated reporting must be filed with the Ministry of Finance before the end of the third month of the year for which the application is intended to take effect.

Losses of individual group companies may be offset against taxable profit within the consolidated group, in accordance with the following rules:

- Losses of individual group companies incurred in years before the consolidation can only be offset up to the amount of the taxable profit derived by the company that incurred such losses.
- Consolidated losses may be offset against consolidated profits only.
- Consolidated losses may not be offset against profits generated by companies after they leave the group.
- The consolidated group may not deduct losses incurred by companies after they leave the group.

The cap of 70% of the taxable profit with respect to deductible losses also applies for tax group purposes.

The consolidated taxable profit equals the sum of the group's companies' taxable profits or losses, as shown in each of the respective tax returns.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Value-added tax (IVA), levied on goods and services, other than exempt services	
General rates	
Portugal	23%
Madeira	22%
Azores	18%
Intermediate rates	
Portugal	13%
Madeira	12%

<b>Nature of tax</b>	<b>Rate</b>
Azores	10%
Reduced rates	
Portugal	6%
Madeira	5%
Azores	5%
Social security contributions, on salaries, wages and regular bonuses but excluding meal subsidies, up to a specified amount; paid by	
Employer	23.75%
Employee	11%
Property transfer tax; payable by purchaser	
Buildings	6.5%
Farm land	5%
Offshore companies	10%
Municipal real estate holding tax; local tax imposed annually on the assessed tax value of the property on 31 December; tax payable by the owner of the property; tax rate for urban property established by the Municipal Assembly in the location of the property	
Offshore companies	7.5%
Other entities	0.3% to 0.5%
Stamp duty	
Loans and mortgages (maximum rate)	0.6%
Interest on bank loans	4%
Transfer of real estate	0.8%
Insurance premiums	3% to 9%
Transfer of business as a going concern	5%
Immovable property with a tax value exceeding EUR1 million	
For residential purposes	1%
Owned by offshore companies	7.5%
Contribution on banking sector; imposed on Portuguese resident credit institutions and branches of credit institutions resident outside the EU	
Debt deducted by own funds (Tier 1 and Tier 2; own funds are computed based on the regulations of the Bank of Portugal) and deposits covered by the Deposits Guarantee Fund	0.01% to 0.085%
Notional value of derivative financial instruments not stated in the balance sheet	0.0001% to 0.0003%
Contribution on energy sector; applicable to entities that integrate the national energy sector and that have their domicile, legal seat, effective management or PE in Portugal; the tax base is the sum of the value of the tangible fixed assets, intangible fixed assets (except industrial property) and financial assets allocated to concessions or licensed activities; for regulated activities, the tax base is the value of the regulated assets, if higher	0.285% to 0.85%

Nature of tax	Rate
Contribution on pharmaceutical industry; applicable to entities that commercialize medicines; tax base is the turnover for each quarter	2.5% to 14.3%
Contribution on light plastic bags; applicable to entities that produce, import or acquire light plastic bags from outside mainland Portugal; tax base is each light plastic bag	EUR0.08

## E. Miscellaneous matters

**Foreign-exchange controls.** Portugal does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments.

**Mergers and reorganizations.** Mergers and other types of corporate reorganizations may be tax-neutral in Portugal if certain conditions are met.

**Controlled foreign entities.** The rules described below apply to controlled foreign entities (CFEs).

A Portuguese resident owning, directly or indirectly, at least 25% in the capital, voting rights or rights to income or estate of a CFE is subject to tax on its allocable share of the CFE's net profit or income. However, if at least 50% of the CFE's capital or rights is owned by Portuguese residents, the percentage described in the preceding sentence is reduced to 10%. For computing the 25% or 10% threshold, the capital and rights owned, directly or indirectly, by related parties are also considered.

An entity is deemed to be subject to a clearly more favorable tax regime if the entity is not subject to corporate income tax or is subject to tax at a rate of tax equal to or lower than 60% of the IRC standard rate or if its place of business is included in a blacklist of tax-haven territories provided in a Ministerial Order of the Finance Minister.

Several rules, which are based on the nature of the activity and whether the activity is predominantly directed to the Portuguese market, may result in the non-imputation of profits or income.

The income of the CFE is allocated to the first company subject to the regular IRC rate. This prevents the imposition of a Madeira Free Zone company, which may be exempt from tax or subject to a reduced rate but is considered to be resident in Portugal for tax purposes, between a CFE and a Portuguese resident company.

The CFE rules do not apply to entities resident in the EU or EEA if in the latter case a cooperation agreement on tax matters exists and if the taxpayer proves that the incorporation and functioning of the nonresident entity is based on valid economic reasons and that the entity carries out an agricultural, commercial, industrial or service activity.

In general, payments made by Portuguese residents to nonresidents subject to a clearly more favorable tax regime are not deductible for tax purposes, and the payers are subject to a stand-alone tax rate of 35% (55% for entities partially or fully exempt from IRC or not principally engaged in commercial, industrial or

agricultural activities). However, these payments may be deducted and are not subject to stand-alone taxation if the payer establishes the following:

- The payments were made in real transactions.
- The payments are normal.
- The amounts of the payments are not unreasonable.

The nondeductibility of payments to nonresidents subject to a clearly more favorable tax regime also applies if the payments are made indirectly to those entities; that is, the payer knew or should have known of the final destination of such payments. This is deemed to occur if special relations exist between the payer and the nonresident entity subject to a clearly more favorable tax regime or between the payer and the intermediary that makes the payment to the nonresident entity subject to a clearly more favorable tax regime.

**Related-party transactions.** For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm's-length basis. The IRC Code contains transfer-pricing rules, which are applied on the basis of the OECD guidelines. In addition, recent legislation had provided details regarding these rules.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the management decisions of another entity. This capacity is deemed to exist in the following relationships:

- Between one entity and its shareholders, or their spouses, ascendants or descendants, if they possess, directly or indirectly, 20% of the capital or voting rights of the entity
- Between one entity and the members of its board, administration, management or fiscal bodies, as well as the members' spouses, ascendants and descendants
- Between any entities bound by group relations
- Between any entities bound by dominance relations
- Between one entity and the other if the first entity's business activities depend on the other entity as a result of a commercial, financial, professional or legal relationship
- Between a resident entity and an entity located in a blacklisted territory

The IRC Code now provides for Advanced Pricing Agreements.

**Debt-to-equity rules.** The previous thin-capitalization rules contained in the IRC Code are abolished, effective from 2013.

A new limitation to the deduction of interest expenses (net of interest revenues) applies, effective from 2013. The tax deduction for net financial expenses is capped by the higher of the following amounts:

- EUR1 million
- 60% of the earnings before interest, taxes, depreciation and amortization (EBITDA)

The 60% threshold will be reduced by 10 percentage points annually until it reaches 30% in 2017. The nondeductible excess, as well as the unused fraction of the 30% threshold, may be carried forward to the following five years.

Effective from 2014, several adjustments are required to determine the relevant EBITDA. These adjustments exclude, among others, several items that are disregarded (not taxed or not deductible) for tax purposes and other items specifically stated in the law.

It is possible to consider the EBITDA on a group basis if tax grouping is being applied.

**Tax-planning disclosure.** Certain tax planning (use of low-tax entities, use of partially or fully exempt entities, use of hybrid instruments or entities, use of tax losses or the existence of a limitation or exclusion from responsibility clause for the promoter) must be disclosed to the tax authorities by the entity promoting the planning or by the respective user (in the absence of a locally registered promoter). Significant penalties apply for the lack of reporting.

- (a) The 10% rate applies if the recipient holds directly more than 50% of the capital of the payer. For other royalties, the rate is 5%.
- (b) See Section B for details regarding a 0% rate for distributions to parent companies in EU member states.
- (c) The 10% rate applies if the recipient holds directly at least 25% of the capital of the payer. The 15% rate applies to other dividends.
- (d) The 10% rate applies if, at the date of payment of the dividend, the recipient has owned directly at least 25% of the payer for an uninterrupted period of at least two years. The 15% rate applies to other dividends.
- (e) The 10% rate applies to interest on loans considered to be of economic or social interest by the Portuguese government. The 15% rate applies to other interest.
- (f) The rate is 10% for technical assistance fees.
- (g) The 10% rate applies to interest on bonds issued in France after 1965. The 12% rate applies to other interest payments.
- (h) The 10% rate applies to interest paid by an enterprise of a contracting state if a financial establishment resident in the other contracting state may deduct such interest. The 15% rate applies to other interest payments.
- (i) If the beneficial owner of the dividends is a company that owns 25% or more of the capital of the payer, and if, at the date of the distribution of the dividends, the participation has been held for at least two years, the withholding tax rate is 5%. For other dividends, the rate is 15%.
- (j) The 5% rate applies if the recipient holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (k) The 10% rate applies to interest on loans with a duration of more than two years. The 15% rate applies in all other cases.
- (l) The 10% rate applies to dividends paid by a company resident in Israel if the beneficial owner is a company that holds directly at least 25% of the capital of the payer of the dividends and if the dividends are paid out of profits that are subject to tax in Israel at a rate lower than the normal rate of Israeli company tax.
- (m) See Sections A and B for details.

- (n) The 5% rate applies to interest on bonds and other titles regularly and substantially traded on a recognized market. The 10% rate applies to interest on loans granted by banks and insurance companies as well as to interest from credit sales of machinery and equipment. The 15% rate applies in all other cases.
- (o) The 5% rate applies to the leases of equipment. The 10% rate applies in all other cases.
- (p) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
- (q) The 10% rate applies if the recipient holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
- (r) The 5% rate applies if the recipient is a bank resident in the other contracting state.
- (s) The 0% rate applies if the recipient holds directly at least 25% of the capital of the payer for at least two years and if both companies comply with certain requirements. The 5% rate applies if the recipient holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (t) The 0% rate applies if the recipient and the payer are associated companies that comply with certain requirements. The higher rate applies to other interest and royalties.
- (u) The 10% rate applies if the recipient holds directly at least 10% of the capital or of the voting rights of the payer. The 15% rate applies to other dividends.
- (v) The 10% rate applies if the recipient is a bank resident in the other contracting state.
- (x) The rate is 10% for technical assistance fees associated with copyrights or know-how.
- (y) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer or the beneficiary is the state. The 10% rate applies to other dividends.

Portugal has also signed double tax treaties with Barbados, Colombia, Croatia, Ethiopia, Georgia, San Marino, Senegal and Timor-Leste, but these treaties are not yet in force.

## A. At a glance

Corporate Income Tax Rate (%)	39 (a)
Capital Gains Tax Rate (%)	20 (b)
Branch Income Tax Rate (%)	39 (a)
Withholding Tax (%)	
Dividends	15 (c)
Interest	0 (d)
Royalties	2 to 29
Services Rendered	7 to 15
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	7/10/12 (e)

- (a) This is the maximum tax rate (see Section B). An alternative minimum tax (AMT) may apply instead of the regular tax. For details regarding the AMT, see Section B.
- (b) Under Act 77-2014, this rate applies to long-term capital gains realized after 30 June 2014.
- (c) Under Act 77-2014, this rate applies to distributions made after 30 June 2014.
- (d) A 29% withholding tax is imposed on interest paid to foreign corporations on related-party loans.
- (e) Net operating losses incurred during tax years beginning after 31 December 2004 and before 1 January 2013 may be carried forward for 12 years. For net operating losses incurred during tax years beginning after 31 December 2012, the carryforward period is 10 years. For years beginning before 1 January 2005, the carryforward period was seven years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies organized in Puerto Rico are subject to Puerto Rico income tax on worldwide income. Foreign companies engaged in trade or business in Puerto Rico are taxable on income earned in Puerto Rico and on income that is effectively connected with their Puerto Rico operation. Partnerships

are treated as pass-through entities. Accordingly, their partners are taxed on their distributive shares of the income and expenses of the partnership. Elections for Special Partnerships, which engage only in specified activities and are also treated as pass-through entities, are not available after 31 December 2010.

Limited liability companies are subject to tax in the same manner as regular corporations. However, they can elect to be taxed as partnerships or pass-through entities under certain conditions. If a limited liability company is treated as a partnership or a pass-through entity for federal tax purposes or in a foreign jurisdiction, it is treated as a partnership for Puerto Rico tax purposes. However, a limited liability company that is treated as a partnership for federal tax purposes or in a foreign jurisdiction is not treated as a partnership for Puerto Rico tax purposes if the entity was operating under any of the tax incentive laws or filed an application for a tax grant before 1 January 2011.

**Rates of corporate income tax.** The corporate income tax rates range from 20% to 39%. Special rules may apply to controlled group corporations in determining the net income subject to additional tax. Taxpayers that made the election to compute their tax liability under the provisions of the Puerto Rico Internal Revenue Code of 1994 (PRIRC) may opt out of such election for the tax years beginning after 31 December 2012 and may make an election subject to the provisions of the 2011 Internal Revenue Code for a New Puerto Rico (IRCPR), as amended by the Tax Burden Redistribution and Adjustment Act (Act 40-2013). After this irrevocable election is made, it is effective for the 2013 tax year and subsequent years.

Certain companies currently doing business in Puerto Rico are operating under the benefits of industrial tax exemption under various industrial incentives acts enacted by the government in 1963, 1978, 1987 and 1998. Under these acts, the period of tax exemption (10 to 25 years) is determined based on the degree of industrialization of the area or zone where the business is located. Under the 1963, 1978 and 1987 acts, businesses qualifying for industrial tax exemption are exempt from income taxes and property taxes at a rate of 90% and from municipal license taxes at a rate of 60% during the entire period of tax exemption. In addition, these corporations are not subject to alternative minimum tax (see *Alternative minimum tax*) on their industrial development income (IDI), and they benefit from favorable withholding tax rates on profit remittances. Activities qualifying for exemption under the various tax incentives acts include manufacturing, tourism, agriculture and export of services.

Under the Puerto Rico Tax Incentives Act of 1998, which expired on 30 June 2008, exempt businesses are subject to flat income tax rates ranging from 2% to 7% on their IDI. Dividends are not subject to withholding tax. Royalties are subject to a withholding tax rate ranging from 2% to 15%.

The Economic Incentives for the Development of Puerto Rico Act of 2008 (the 2008 Act) took effect on 1 July 2008. The exemption period under the 2008 Act is 15 years, regardless of the location of the exempt business.

The 2008 Act applies to the following:

- Eligible businesses engaged in the manufacturing or production of articles in Puerto Rico
- Entities that intend to perform on a commercial scale in Puerto Rico services destined for foreign markets
- Entities that provide services subcontracted in Puerto Rico or that provide key supplier services rendered in Puerto Rico at a commercial scale and on a continuous basis to exempt manufacturing businesses
- Entities engaged in the manufacturing of high-technology industrial units for the production of energy, other than fossil fuels, for use in Puerto Rico, and in the assembly of equipment for the generation of such energy
- Entities engaged in the construction of social-interest homes (affordable or low-interest housing)
- Entities dedicated to recycling activities
- Entities operating at a commercial scale that are engaged in the development of licensed or patented software
- Certain strategic projects, and entities devoted to the research, development, manufacture, transport, launch and operation of satellites from Puerto Rico
- Entities engaged in the development of service centers for processing or warehousing of data
- Value-added activities for the operation of ports

The 2008 Act provides for a 4% flat tax rate on IDI derived by companies that obtain exemption grants. An additional 0.5% reduction in the tax rate on IDI is available to exempt businesses operating in a zone of low or intermediate industrial development. The 2008 Act provides a 100% tax exemption during the first 10 years of operations for IDI derived from businesses located in the municipalities of Culebra and Vieques. The 2008 Act provides for no withholding tax on dividends and a 12% withholding tax on royalties paid by exempt businesses to entities not engaged in trade or business in Puerto Rico. Exempt businesses can take advantage of a 2% alternative tax on royalties instead of the 12% withholding tax, but such businesses are subject to a tax at a rate of 8% on IDI. Manufacturers may benefit from a 100% exemption from excise taxes and sales and use tax on raw materials, machinery and equipment. As provided in previous tax incentives acts, the 2008 Act provides a 90% property tax exemption and a 60% municipal license tax exemption. It also grants certain special deductions and credits with respect to the following:

- Job creation
- Energy costs
- Use of intangible property
- Strategic projects
- Research and development
- Net operating losses
- Investments in buildings, structures, machinery and equipment
- Purchases of locally manufactured products

The Export Services Act took effect on 17 January 2012. The exemption period under this act is 20 years.

The Export Services Act applies to eligible businesses. These are entities that have bona fide offices located in Puerto Rico and that have the main purpose of providing services to clients outside Puerto Rico. These services include but are not limited to the following:

- Research and development
- Marketing and public relations
- Consulting
- Professional services
- Call centers
- Centralized management services
- Shared service centers
- Promotion services for the establishment of new business in Puerto Rico

The Export Act provides for a 4% flat income tax rate on export income received from services provided by eligible businesses. An additional 1% reduction in the tax rate on export income is available to exempt businesses that derive 90% of their gross income from export services that are considered strategic services, subject to certain requirements.

The Export Act provides a 90% or 100% property tax exemption for certain eligible activities and a 60% municipal license tax exemption.

The Small and Medium Business Employment Creation and Retention Incentives Act (Act 120-2014) is intended to encourage the creation and expansion of small and medium businesses operating in Puerto Rico by providing state tax and payroll incentives. The following businesses may apply for these incentives:

- Microbusiness: annual gross income less than USD500,000 and 7 or fewer employees
- Small business: annual gross income less than USD3 million and 25 or fewer employees
- Medium business: annual gross income less than USD10 million and 50 or fewer employees

Other Puerto Rico legislation grants tax exemptions to enterprises engaged in specified economic activities. For example, under the Puerto Rico Tourist Development Act of 1993, as amended, or under the Puerto Rico Tourist Development Act of 2010, qualified tourist activities may enjoy exemption from income tax (90% to 100%), municipal license tax (90% to 100%), excise tax (100%) and real and personal property taxes (90%). In addition, under the Agricultural Tax Incentives Act of 1995, as amended, bona fide farmers may enjoy exemption from income tax (90%), municipal license tax (100%), excise tax (100%) and real and personal property taxes (100%).

**Alternative minimum tax.** The alternative minimum tax (AMT) is designed to prevent corporations with substantial economic income from using preferential deductions, exclusions and credits to substantially reduce or eliminate their tax liability. The AMT is the greater of the following:

- The regular AMT at a rate of 30%
- The sum of the following items:
  - 2% of the purchases of personal property from related persons made by a business (subject to certain exceptions) that had gross revenues in excess of USD10 million for the three consecutive preceding years
  - 20% of the payments made to or expenses incurred with respect to related parties, including the allocation of expenses from a home office to a branch not subject to tax in Puerto Rico

The AMT applies to the extent that the AMT exceeds the regular tax liability.

For purposes of the AMT, personal property refers to tangible property used in a trade or business in Puerto Rico except for raw materials or intermediate products used in manufacturing.

A related person is a member of a controlled group having 50% ownership.

Alternative minimum taxable income is determined by adding back certain tax preferential deductions to the taxable income computed for regular income tax purposes. The deduction for payments with respect to intercompany services incurred outside Puerto Rico that are not subject to tax is an adjustment for AMT purposes for the tax years beginning before 1 January 2013. As a result of the changes introduced by Act 40-2013, this deduction is not an AMT adjustment for tax years beginning after 31 December 2012.

In addition, Act 40-2013 limits the net operating loss deduction to 80% (rather than 90%) of the alternative minimum taxable income.

Sixty percent of adjusted financial statement income in excess of adjusted taxable income is included in determining the amount subject to tax. Any AMT paid may be recovered in subsequent years as a credit to the regular tax when the regular tax is in excess of that year's AMT.

**Special tax on gross income.** One of the major changes introduced by Act 40-2013 was the adoption of the special tax on gross income, known as the gross receipts tax. For tax years beginning after 31 December 2013, the gross receipts tax is no longer a component of the AMT (as it was in prior years) but is determined separately and in addition to the normal tax, surtax and alternative minimum tax applicable to corporations. The tax paid is deductible for regular income tax purposes. Entities engaged in trade or businesses in Puerto Rico are subject to the special tax on their gross income at the following rates.

Gross revenue		Rate %
Exceeding USD	Not exceeding USD	
3,000,000	100,000,000	0.35
100,000,000	300,000,000	0.50
300,000,000	600,000,000	0.70
600,000,000	1,500,000,000	0.80
1,500,000,000	—	1.00

Corporations and flow-through entities are subject to the special tax. However, entities operating with tax grants under tax incentive acts, including agricultural businesses and not-for-profit entities, are not subject to the special tax. Retail food sellers are subject to reduced tax rates, subject to limitations.

The special tax is subject to estimated tax payment requirements.

**Capital gains.** Under Act 77-2014, for sales or exchanges occurring after 30 June 2014, the holding period for long-term capital transactions is one year, and the special applicable tax rate is 20%.

Losses from the sale or exchange of capital assets are allowed only to the extent of 90% of the gains from the sale or exchange of such assets.

Capital losses can be carried forward for seven years to offset capital gains for tax periods after 31 December 2012.

Business assets that are not part of inventory are generally accorded capital gain treatment in the case of a gain and ordinary loss treatment in the case of a loss.

**Administration.** Corporate tax returns are due on the 15th day of the fourth month after the close of the taxable year. Extensions are available for up to three months; however, the tax must be fully paid by the original due date. Estimated tax payments are required on a quarterly basis. For tax years beginning on or before 31 December 2012, the estimated tax payments generally totaled 90% of the final liability or 100% of the preceding year's tax. Act 40-2013 modified the determination of the estimated tax liability for the tax years beginning after 31 December 2012. Under Act 40-2013, estimated tax equals the lesser of the following:

- 90% of the tax for the tax year
- The greater of the following:
  - 100% of the total tax liability of the prior year
  - The tax liability determined using current tax rates and applicable law based on the taxable income from the preceding year's tax return

The special tax on gross income is subject to the estimated tax calculation described above. Taxpayers that had made an election to continue to file their income tax returns in accordance with the prior tax code of 1994 (Option 94) must also pay estimated tax with respect to the special tax on gross income.

Tax returns of partnerships, Special Partnerships and limited liability companies that elected to be treated as partnerships and corporations of individuals, among others, are due on the 15th day of the third month after the close of the tax year. Extensions are also available for up to three months. However, the tax must be fully paid by the original due date.

**Dividends.** Corporations engaged in a trade or business in Puerto Rico may deduct 85% of the dividends they receive from domestic (Puerto Rican) corporations, subject to limitations. Dividends received by domestic corporations or partnerships from controlled domestic corporations or partnerships are 100% deductible.

Dividends paid to nonresident corporations are subject to a 10% withholding tax.

Act 77-2014 established a new 10% tax on implicit dividends. This tax is imposed on the implicit dividend received by a foreign owner from an entity taxed as a corporation. A foreign shareholder is defined as a nonresident person who owns directly or indirectly 50% or more of the interests in an entity. For these purposes, an implicit dividend is defined as the lesser of the following:

- The average value of certain assets held outside Puerto Rico
- Earnings and profits of the corporation at the end of the year

The following entities are excluded from this tax:

- Not-for-profit organizations
- International insurers
- International financial entities
- Foreign corporations taxed under IRCPR Section 1092.02

**Foreign tax relief.** A tax credit is allowed for foreign taxes incurred, but is limited to the equivalent Puerto Rican tax on the foreign-source portion of taxable income. A foreign tax credit is also allowable under the AMT system, subject to limitations.

### **C. Determination of trading income**

**General.** Income for tax purposes is computed in accordance with generally accepted accounting principles, as adjusted for certain statutory provisions. Consequently, taxable income frequently does not equal income for financial reporting purposes.

Interest income derived from certain instruments issued by the governments of the United States or Puerto Rico is exempt from tax. Expenses related to the generation of this type of income are not deductible.

For expenses to be deductible, they must be incurred wholly and exclusively for the production of income. Statutory provisions limit the amounts of certain deductible expenses. Only 50% of travel and entertainment expenses is deductible. The deduction for charitable contributions may not exceed 10% of taxable income before such deduction.

For tax years beginning after 31 December 2012, Act 40-2013 provides for a disallowance of 51% of payments made to related parties not engaged in trade or business in Puerto Rico, including the allocation of expenses between a branch and its home office. This adjustment does not apply to entities operating with tax grants under tax incentive laws.

**Inventories.** Inventory is valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most commonly used methods are first-in, first-out (FIFO) and last-in, first-out (LIFO). The method chosen must be applied consistently, except that an election to change from FIFO to LIFO may be made without prior permission.

**Tax depreciation.** A depreciation deduction is available for most property (except land) used in a trade or business. The time period over which an asset is depreciated is based on the asset classification. The following three depreciation methods are allowed in Puerto Rico:

- Straight-line
- A method similar to the US ACRS method
- Flexible depreciation

Deductions for ACRS depreciation are allowed only for assets acquired in tax years beginning on or after 1 July 1995. Deductions for flexible depreciation are allowed only for assets acquired in tax years beginning before 1 July 1995. The flexible method is limited to the following types of businesses:

- Construction
- Agriculture

- Selling or leasing of buildings
- Manufacturing
- Tourism
- Shipping

Businesses enjoying tax exemption (see Section B) may not use the flexible depreciation method. The amount of the flexible depreciation deduction is limited to a percentage of taxable income.

The depreciation expense deduction applicable to automobiles has been replaced with a limited mileage-based deduction, except, under certain circumstances, for lease business (operating leases) and taxi or limousine transportation business.

Depreciation computed under the straight-line depreciation method is not recaptured on the sale of an asset, but depreciation computed under the flexible depreciation and ACRS methods is subject to recapture.

Intangible property (other than goodwill) acquired by purchase or developed after 1 September 2010 is depreciated using the straight-line method over the lesser of 15 years or the useful life of the property.

**Groups of companies.** Affiliated corporations doing business in Puerto Rico may not elect to file a single income tax return on a consolidated basis.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Special excise tax; imposed on the acquisition from a related party of personal property manufactured in Puerto Rico and related services by a nonresident foreign corporation or partnership; if the provider has gross receipts in excess of USD75 million for any of the three preceding taxable years and if certain other requirements are met (the tax rate is fixed until 2017 when the tax expires)	4
Excise tax on purchases from a related person on tangible personal property used in a trade or business in Puerto Rico; the tax applies to purchases from related parties by businesses that had gross revenues in excess of USD10 million; for the three preceding consecutive years (the AMT is now the greater of the regular AMT or the sum of two items; for details, see Section B)	2
Sales and use tax; imposed on tangible personal property, taxable services, admission rights and mixed transactions; specific exemptions and exclusions are provided	6
Municipal sales and use tax; imposed by municipalities on taxable items; specific exemptions and exclusions are provided	1
Excise taxes on specified items, such as imports of cigarettes, gasoline and other fuels, vehicles and alcoholic beverages	Various

Nature of tax	Rate (%)
Payroll taxes	
Federal unemployment insurance (FUTA), imposed on first USD7,000 of wages (a credit of 5.4% is given for Puerto Rican unemployment tax; the overall rate can be less than 6%)	6
Workmen's compensation insurance, varies depending on nature of employee's activities	Various
Social security contributions; subject to the same limitations as in the United States; imposed on	
Wages up to USD118,500 (for 2015); paid by	
Employer	7.65
Employee	7.65
Wages in excess of USD118,500 (for 2015); paid by	
Employer	1.45
Employee (subject to an additional 0.9% of Medicare tax for wages in excess of USD200,000; no employer matching contribution for Medicare Tax)	1.45
Municipal license tax; on gross sales volume (if volume exceeds USD3 million, a financial statement certified by a certified public accountant [CPA] licensed in Puerto Rico must accompany the business volume declaration); rate varies by municipality; payable by	
Financial institutions	0.5 to 1.5
Other businesses	0.2 to 0.5
Property taxes (if volume exceeds USD3 million, a financial statement certified by a CPA licensed in Puerto Rico must accompany the tax return); rate varies by municipality	
Personal property	5.80 to 9.83
Real property	8.08 to 10.83
Additional special tax on insurance premiums; imposed on premiums earned by insurance companies; tax must be paid on or before 31 March of the following year (exemption is provided for domestic insurers maintaining a home office in Puerto Rico)	1
Money transfer business tax (contained in Act 136-2014); imposed on money-transmitting businesses for every money transmission processed or completed from Puerto Rico with any foreign entity, person or business	2

## E. Miscellaneous matters

**Financial statements requirements.** All entities engaged in trade or business in Puerto Rico must submit specified financial statements with their income tax returns.

Audited financial statements are required if the volume of business is equal to or greater than USD3 million. Not-for-profit corporations and entities with a volume of business of less than USD3 million are not required to file audited financial statements.

Financial statements must be prepared in accordance with US generally accepted accounting principles (GAAP) and issued by a CPA licensed to practice in Puerto Rico. Other detailed rules apply to the preparation of financial statements, including rules regarding foreign corporations and related entities.

Entities engaged in a trade or business in Puerto Rico that have a volume of business in excess of USD3 million must submit, together with their property and volume of business declaration tax returns, audited financial statements certified by a CPA licensed to practice in Puerto Rico. In addition, audited financial statements are required to be attached to the annual report filed with the Secretary of State in the case of a corporation with a volume of business in excess of USD3 million for tax years beginning on or after 1 August 2008. For corporations with a volume of business of USD3 million or less, a balance sheet with relevant footnotes, prepared by a person with general knowledge in accounting, must accompany the annual report filed with the Secretary of State.

For a group of related entities, the business volume is determined by adding the business volume of each of the entities included in the group. If the total exceeds USD3 million, each of the entities must submit audited financial statements with their income tax return. Special additional rules may apply to a group of related entities.

If foreign corporations do not keep available books of account and supporting documents in Puerto Rico, all of their tax deductions may be denied. A foreign corporation is deemed to be in compliance with this requirement if it can physically produce its books and records in Puerto Rico within 30 days. An extension of 15 days may be granted.

**Foreign-exchange controls.** Puerto Rico does not impose foreign-exchange controls, but large currency transfers must be reported to the US Treasury Department.

**Debt-to-equity rules.** Puerto Rico law does not include any specific thin-capitalization provisions, but US provisions in this area may be persuasive.

**Transfer pricing.** Under the income tax law, the tax authorities may redistribute or reallocate income, deductions, credits and other items between related taxpayers to prevent tax evasion. The law does not prescribe transfer-pricing methods. However, regulations identify methods that may be used by the Secretary of Treasury to determine the actual net income derived from sales of tangible property between related taxpayers. In addition, these regulations provide guidance on other types of transactions between related taxpayers, such as intercompany loans, rendering of services and transfers of intangible property.

## **F. Tax treaties**

Puerto Rico does not participate in US income tax treaties and has not entered into any treaties with other jurisdictions.

Capital Gains Tax Rate (%)	0/10
Branch Tax Rate (%)	10
Withholding Tax (%)	5/7
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

**B. Taxes on corporate income and gains**

**Corporate income tax.** Foreign companies, including partnerships and joint ventures, carrying on business activities in Qatar are subject to tax. Tax is imposed on a foreign entity operating in Qatar, regardless of whether it operates through a branch, a joint

venture with a locally registered company or through a wholly owned subsidiary. However, Qatar tax resident companies wholly owned by Qataris and citizens of the other Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Saudi Arabia and United Arab Emirates) are exempt from tax. Qatar tax resident companies that are not wholly owned by Qataris and other GCC citizens are taxable up to the level of profits ultimately attributable to the non-GCC national shareholders and to GCC national shareholders who are not tax residents in Qatar. Other GCC nationals are treated in the same manner as Qatari citizens for Qatar tax purposes.

Tax resident companies and permanent establishments (PEs) that are wholly owned by Qatari and other GCC nationals and that are exempt from corporate income tax must submit tax returns and audited financial statements to the Public Revenues and Taxes Department (PRTD) if their capital is QAR2 million or more or if their annual revenue is QAR10 million or more.

A company is considered to be a Qatar tax resident if it meets any of the following conditions:

- It is incorporated under the laws of Qatar.
- Its head office is located in Qatar.
- Its place of effective management is located in Qatar.

A PE is a fixed place of business through which the business of a taxpayer is wholly or partly carried on, including, among others, a branch, office, factory, workshop, mine, oil or gas well, quarry, building site, assembly project, or place of exploration, extraction or exploitation of natural resources. A PE also includes an activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in its interest, other than an independent agent.

**Rates of corporate income tax.** Income is subject to tax at a standard rate of 10% of profits, as adjusted for tax purposes.

Petroleum companies engaged in oil operations are taxed at the rates specified in their agreements, provided that the tax rate is not less than 35% on their taxable income. Taxable income is determined in accordance with the provisions of the underlying production-sharing contract or development and fiscal agreement. Petroleum operations are defined by law as the exploration for petroleum, improving oil fields, drilling, well repair and completion, the production, processing and refining of petroleum, and the storage, transport loading and shipping of crude oil and natural gas.

Foreign international shipping and aviation companies are exempt from tax in Qatar if Qatari shipping and aviation companies enjoy similar reciprocal treatment in the respective foreign countries.

Not-for-profit entities that are registered in Qatar or in another country are not covered by the provisions of the Qatar Income Tax Law and are accordingly exempt from tax. However, they must withhold tax if applicable.

The income of businesses registered and operating in the Qatar Financial Centre (QFC) is subject to a standard rate of tax of 10%. Regulated and non-regulated activities may be carried on at the QFC. Regulated activities include the following:

- International banking
- Insurance and reinsurance
- Fund management
- Brokerage and dealer operations
- Treasury management
- Funds administration and pension funds
- Financial advice and back-office operations

Non-regulated activities that may be carried on at the QFC include the following:

- Professional services (including, but not limited to, audit, legal, consultancy and tax advisory)
- Holding company and headquarter hosting
- Special-purpose company
- Single-family office
- Ship brokering and agency services

For the accounting periods ending after 18 June 2014, companies engaged in captive insurance or reinsurance business and companies of which least 90% of the ordinary capital, profit and asset entitlement are beneficially, directly or indirectly owned by Qatari nationals and are licensed to provide non-regulated activities may elect a 0% concessionary tax rate to apply to their chargeable profits.

Under Law No. 20 of 2008, the shares of non-Qatari investors in the profits of public companies listed on the Qatar Stock Exchange (the local stock exchange) were exempt from tax. This exemption did not extend to gains derived from the sale of listed shares. Law No. 20 of 2008 was replaced by Law No. 17 of 2014, which provides a tax exemption for non-Qatari investors holding shares of companies or units in investment funds listed on the Qatar Stock Exchange. This exemption also extends to profits realized on the sale, transfer or exchange of listed shares or investment fund units.

**Tax incentives.** Tax exemptions may be granted for periods of three to six years for certain companies, regardless of the nationality of the owners. A committee evaluates applications for tax exemptions. It considers factors such as the following in reviewing the applications:

- Whether the company provides social or economic benefits to Qatar
- Whether the company falls within the planned development and economic objectives of the government and has the approval of the appropriate government department
- The extent to which the company contributes to the national economy
- Whether the company uses modern technology
- Whether the company creates employment opportunities for citizens

The income of businesses operating at the Qatar Science and Technology Park (QSTP) is exempt from tax. However, such businesses must file annual tax returns, together with audited financial statements, with the PRTD. QSTP-registered entities must also withhold tax if applicable.

Activities that may be carried out at the QSTP include the following:

- Research and development of new products
- Technology development and development of new processes
- Low-volume, high-value-added specialist manufacturing
- Technology-related consulting services, technology training and promotion of academic developments in the technology fields
- Incubating new businesses with advanced learning

To support financing and investment activities carried on by QFC entities, the QFC tax regulations provide for the establishment of tax-exempt vehicles. A QFC entity that is one of the following exempt vehicles may elect for special tax-exempt status:

- Registered Fund (QFC Scheme or a Private Placement Scheme)
- Special Investment Fund (permitted activities are private equity investments, venture capital investments, investments in property and investments on behalf of a single family)
- Special Funding Company (includes holding company and special-purpose company)
- Alternative Risk Vehicle
- Charity

In addition, the QFC tax regulations introduced a mechanism, which applies to accounting periods beginning after 18 June 2014, under which a newly registered and incorporated QFC company may be able to claim reimbursement in the form of a tax credit with respect to tax losses incurred in the first two accounting periods, subject to meeting all criteria. If a QFC company receives a reimbursement of tax losses, it is automatically precluded for the following three accounting periods from electing special exemption status or the concessionary 0% tax rate.

**Capital gains.** Capital gains are aggregated with other income and are subject to tax at the regular corporate income tax rate. The sale by nonresidents of shares in Qatar tax resident companies is taxable at a rate of 10%. However, the sale of shares in listed companies is exempt from tax.

**Administration.** Within 30 days after beginning a taxable activity in Qatar or registering with the Ministry of Business and Trade, a taxpayer must register with the PRTD and obtain a tax card.

The tax year runs from 1 January to 31 December, and a taxpayer must use this accounting period unless approval is obtained for a different year-end. Approval to use an alternative accounting period is granted in exceptional cases only.

In general, all companies, including tax-exempt companies (see *Corporate income tax*), must file tax declarations within four months after the end of the accounting period. The due date may be extended at the discretion of the PRTD, but the length of the extension may not exceed four months.

Audited financial statements must be submitted together with the tax declaration if any of the following circumstances exist:

- The capital of the taxpayer exceeds QAR100,000.
- The taxpayer's total taxable income exceeds QAR100,000.
- The head office of the taxpayer is located outside Qatar.

The tax declaration must be certified by an accountant in practice in Qatar who is registered with the Ministry of Economy and Finance. If this requirement is not satisfied, the PRTD rejects the

tax declaration. The tax declaration and supporting audited financial statements must be denominated in Qatari riyals.

Tax is payable on the due date for filing the tax declaration. The due date for payment of taxes may be extended if the filing date is extended and if the taxpayer provides reasons acceptable to the PRTD. Alternatively, the PRTD may allow taxes to be paid in installments during the extension period. Tax is payable in Qatari riyals.

Penalties for late filing are levied at a rate of QAR100 per day, subject to a maximum of QAR36,000. The penalty for late payment equals 1.5% of the tax due for each month or part of a month for which the payment is late, up to the amount of the tax due.

The PRTD may issue tax assessments based on a presumptive basis or reassess by applying market prices to certain related-party transactions in certain circumstances. The tax law provides for a structured appeals process with respect to such tax assessments. Correspondence for all appeals must be in Arabic. The appeals procedure consists of the following three stages:

- Correspondence and negotiations with the PRTD
- Formal appeal to an Appeal Committee
- The commencement of a case in the judicial courts

The PRTD may inspect a taxpayer's books and records, which should be maintained in Qatar. The books and records are not required to be maintained in Arabic. The accounting books and records must be maintained for 10 years following the year to which the books, registers and documents are related.

The PRTD has introduced a new tax administration system through which correspondence with the tax authority primarily flows. This includes the filing of tax registration forms, tax return submissions and communications from the PRTD to the taxpayer with respect to inquiries, assessments and appeals.

For QFC entities, including tax-exempt entities, the annual income tax declaration must be submitted and the corresponding tax due must be paid within six months after the end of the accounting period.

For QFC entities, financial sanctions for late submission of the annual tax declaration are levied together with the delay payment charge, which is currently 5% per year, on unpaid tax.

**Withholding taxes.** Qatar Tax Law No. 21 of 2009, which is effective from 1 January 2010, introduced withholding taxes on payments to nonresident entities for activities not connected with a PE (essentially, those without a Commercial Registration and Tax Card issued by the PRTD), and to entities registered in the Commercial Register with the registration linked to a specific project for a period of less than one year. The following are the payments subject to withholding tax and the applicable rates:

- Royalties and technical fees: 5%
- Interest payments (subject to specified exceptions), directors' fees, attendance fees, brokerage, commissions and other payments with respect to contracts for services conducted wholly or partially in Qatar: 7%

Companies or PEs in Qatar that make the above payments must deduct tax at source and remit it to the PRTD by the 15th day of the month following the month in which the payment is made.

**Dividends.** Dividends paid by a Qatar tax resident company are not subject to withholding tax. Income distributed from profits that have already been subject to Qatar taxation are not subject to further taxation in the hands of the recipient. Dividends paid by an entity that has a tax exemption are exempt from tax.

**Foreign tax relief.** A deduction is allowed for income taxes incurred by the taxpayer abroad if the revenues related to the foreign taxes are taxable in Qatar, subject to other deductibility requirements. In addition, foreign tax relief is available under the tax treaties with the countries listed in Section E.

### C. Determination of trading income

**General.** The following are some of the items that are included in taxable income:

- Interest and returns realized outside Qatar from amounts generated by taxable activity carried on in Qatar
- Revenues earned from an activity performed in Qatar including trading, contracting and the provision of services
- Revenues earned from the partial or total performance of a contract in Qatar
- Service fee income received by head offices, branches or related companies
- Certain dividend income and capital gains on real estate located in Qatar
- Interest on loans obtained in Qatar

Normal business expenses are allowable and must be determined under the accrual method of accounting. Branches are limited in the deduction of head office expenses (see *Head office overhead*). Self-employed individuals engaged in a professional activity may choose to deduct a notional expense equal to 30% of their total income instead of all of the expenses and costs that are allowed to be deducted. Expenses for entertainment, hospitality, meals, holidays, club subscriptions and client gifts are subject to restrictions. Guidance contained in supporting executive regulations specifies that these expenses are subject to an allowable ceiling of 2% of net income, up to a maximum of QAR200,000.

**Inventories.** Inventories must be valued using international accounting standards.

**Provisions.** General provisions, such as bad debts and stock obsolescence, are generally not allowed. Specific bad debts that are written off are deductible to the extent that they satisfy conditions set by the PRTD. Deductions by banks for loan-loss provisions are the subject of periodic instructions from the Qatar Central Bank and, in general, provisions are allowable up to a ceiling of 10% of net profits.

**Head office overhead.** In general, charges of a general or administrative nature imposed by a head office on its Qatar branch are allowed as deductions, provided that they do not exceed 3% of turnover less subcontract costs. However, for banks, the limit is 1%. If a project derives income from both Qatari and foreign

sources, the limit is 3% of the total revenues of the project, less subcontract costs, revenues from the supply of machinery and equipment overseas, revenues derived from services performed overseas, value of paid reinsurance premiums and other income not related to activities in Qatar.

**Tax depreciation.** Under the executive regulations relating to the Qatar Income Tax Law, assets must be classified into two groups for tax depreciation purposes. The first group is for high-value assets and consists primarily of buildings, ships, airplanes, drilling instruments and intangible assets. These assets should be depreciated on a straight-line basis using the following annual depreciation rates:

<b>Asset</b>	<b>Rate (%)</b>
Buildings and constructions, including roads, bridges, pipelines, storage tanks and port ducts inside the establishment, excluding ready-made light constructions	5
Ships and boats	10
Airplanes and helicopters	20
Drilling instruments	15
Intangible assets	
Pre-establishment expenses	50
Trademarks, patents and similar items	Amortized over the expected life of the asset, with a maximum annual amortization allowance of 15%

For the second group, which relates to low-value assets, tax depreciation is calculated using the reducing-balance method. The following are the annual depreciation rates for these assets.

<b>Subgroup</b>	<b>Assets</b>	<b>Rate (%)</b>
First	Computer hardware and software and annexes thereof	33.33
Second	Machinery, plant, equipment, electrical devices and means of transportation of goods and persons, including cars, vehicles, trucks and cranes	20
Third	Office furniture, fixtures and fittings and other assets	15

The above depreciation rates must be applied to the written-down tax value of the assets, increased by the cost of current-year additions and decreased by the sales proceeds from current-year disposals. Under the Qatar Income Tax Law, the gain or loss resulting from disposal of low-value fixed assets is no longer considered for income tax purposes. Instead, the sales proceeds are deducted from the tax value of the assets as mentioned above.

Approval of the Minister of Finance is required for departure from the tax depreciation rates noted above. Departures from these rates are normally allowed only for new start-up projects if the project owner requests permission to adopt different depreciation rates based on the presentation of appropriate justifications to the Minister.

The Executive Regulations provide guidance on the deductibility of depreciation. Under the regulations, depreciation is allowed for tax purposes up to the amount contained in the financial statements.

**Relief for losses.** Losses may be carried forward for up to three years. Carryback of losses is not allowed.

**Groups of companies.** No tax regulations cover groups of companies.

## D. Miscellaneous matters

**Foreign-exchange controls.** Qatar does not impose foreign-exchange controls. Equity capital, loan capital, interest, dividends, branch profits, royalties and management fees are freely remittable.

**Transfer pricing and anti-avoidance legislation.** The Qatar Income Tax Law contains anti-avoidance provisions. The PRTD may nullify or alter the tax consequences of any transaction that it has reasonable cause to believe was entered into to avoid or reduce a tax liability.

If a company carries out a transaction with a related party that was intended to reduce the company's taxable income, the income arising from the transaction is deemed to be the income that would have arisen had the parties been dealing at arm's length.

In determining the arm's-length value, the PRTD requires use of the comparable uncontrolled price (CUP) method. Under this method, the price of the service or goods is deemed to be the price that would have been applied if the transaction had been between unrelated parties. If the information required to apply the CUP method is not available, an application to apply a different transfer-pricing method approved by the Organisation for Economic Co-operation and Development (OECD) must be submitted to the PRTD.

Under the QFC tax regime (see Section B), transfer pricing may be determined based on any of the accepted OECD transfer pricing methods.

The Qatar Financial Centre Authority (QFCA) has published a Tax Manual Extract on Transfer Pricing (TP Manual) for taxpayer guidance. A taxpayer's presentation to the QFCA Tax Department of a transfer-pricing study with pricing for related-party transactions, properly benchmarked against valid comparables, is a significant factor in deciding whether an inquiry into a return is necessary.

**Thin-capitalization rules.** The Qatar Income Tax Law does not provide for a safe harbor debt-to-equity ratio.

However, under the QFC tax regime, the following are safe harbor debt-to-equity ratios:

- 2:1 for non-financial institutions
- 4:1 for financial institutions

Although the above ratios are non-statutory and are non-binding on taxpayers and the QFCA Tax Department, they are expected to be accepted as default thresholds by the QFCA Tax Department.

The safe-harbor guidance applies for accounting periods beginning on or after 1 January 2012.

**Supply and installation contracts.** Profits from “supply only” operations in Qatar are exempt from tax because the supplier trades “with” but not “in” Qatar. If a contract includes work elements that are performed partially outside Qatar and partially in Qatar, and if these activities are clearly separated in the contract, only the revenues from the activity performed in Qatar are taxable in Qatar.

Similarly, with respect to an engineering, procurement and construction contract for a project in Qatar, the obligation to perform construction work in Qatar may bring the revenues arising outside Qatar into the Qatar tax net unless the contract clearly includes a split of revenue between work done in Qatar and work done outside Qatar.

**Contract retention.** All ministries, government departments, public and semipublic establishments and other payers must retain final contract payments or 3% of the contract value (after deducting the value of supplies and work done abroad), whichever is greater, due to foreign branches that are registered and that have a registration linked to a specific project with a duration of at least one year. The contract retention payable to the contractor or subcontractor must be retained until the contractor or subcontractor presents a tax clearance from the PRTD confirming that all tax liabilities have been settled.

**Contract reporting.** Ministries and other government bodies, public corporations and establishments, and companies are required to report to the PRTD on contracts concluded with nonresidents without a PE in Qatar, regardless of their value. In addition, contracts concluded with residents or with nonresidents that have a PE in Qatar must also be reported to the PRTD if the contract value amounts to QAR200,000 for service contracts, or to QAR500,000 for contracting, supply, and supply and service contracts. Copies of the contracts must also be submitted together with the statement, except for contracts concluded with nonresidents with no PE in Qatar that have a contract value not exceeding QAR100,000.

## E. Tax treaty withholding tax rates

The table provided below is intended purely for orientation purposes. It does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic law. The following is a table of treaty withholding tax rates.

	Dividends		Interest (a) %	Royalties %
	A %	B %		
Algeria	— (b)	—	— (c)	5
Armenia	10	5 (d)	5	5

A Individuals and companies

B Qualifying companies

- (a) Some treaties provide for an exemption for certain types of interest, such as interest paid to public bodies and institutions. Such exemptions are not considered in this column.
- (b) Income may be taxed in the residence state at the rate provided under its domestic law.
- (c) Income is taxable only in the residence state at the rate provided under its domestic law.
- (d) The 5% rate applies if the beneficial owner has invested capital of more than USD100,000.
- (e) The 5% rate applies if the beneficial owner holds at least 25% of the capital of the company paying the dividends.
- (f) Dividends, interest and royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
- (g) Royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
- (h) This rate applies if the beneficial owner holds at least 10% of the capital of the company paying the dividends.
- (i) The 5% rate applies if the beneficial owner has owned directly or indirectly at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date on which the dividends are declared.
- (j) Dividends, interest and royalties are taxable in the residence state at the rates provided under its domestic law.
- (k) The 5% rate applies if the beneficial owner is an individual who holds directly at least 10% of the capital of the company paying the dividends and who has been a resident of the other contracting state for a period of 48 months immediately preceding the year in which the dividends are paid.
- (l) The 5% rate applies if the beneficial owner is an individual or a company that holds directly at least 10% the capital of the company paying the dividends. Otherwise, a 10% rate applies.
- (m) The 5% rate applies if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.
- (n) The 0% rate applies if the beneficial owner is a company that has its capital wholly or partly divided into shares and that holds directly at least 7.5% of the capital of the company paying the dividends.
- (o) The 10% rate applies if the individual holds at least 10% of the capital of the distributing company. Otherwise, the 15% rate applies.
- (p) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends.
- (q) The income is not taxable in either state.
- (r) The income may be taxed in the source state at the rate provided under its domestic law.
- (s) The 10% rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. Otherwise, the 15% rate applies.
- (t) The income is exempt from tax if it is beneficially owned by the government of the contracting state or a political subdivision or a local authority thereof or by the central bank of the other contacting state.
- (u) Dividends distributed by real estate investment trusts are subject to a 15% withholding tax, unless the beneficial owner is a pension scheme, in which case an exemption applies.
- (v) The treaty provides for several alternative conditions relating to the beneficial owner or the payer of the interest for the application of the 0% rate. This rate applies if one of these conditions is met. Otherwise, the domestic rate in the source state applies.
- (w) The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends or that has invested more than USD10 million or the equivalent in Qatari or Vietnamese currency in the capital of the company paying the dividends.
- (x) The 5% rate applies to royalties paid for the following:
  - The use of, or the right to use, patents, designs or models, plans, or secret formulas or processes
  - The use of, or the right to use, industrial, commercial or scientific equipment
  - Information concerning industrial, commercial or scientific experience.The 10% rate applies in other cases.
- (y) The income is taxable only in the source state at the rate provided under its domestic law.
- (z) The income may be taxed in the source state at the rate provided for under its domestic law.

- (aa) This rate applies if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends.
- (bb) The 0% rate applies if the beneficial owner of the dividends is a company resident in the other contracting state. The 5% rate applies to all other beneficial owners of dividends resident in the other contracting state.
- (cc) See Section B.
- (dd) This rate applies if the beneficial owner of the dividends holds at least 10% of the capital of the company paying the dividends or if the beneficial owner is the state of Portugal, a political or administrative subdivision or a local authority thereof, or the central bank of Portugal.

Qatar is in the process of ratifying treaties with Barbados, Bermuda, Bosnia and Herzegovina, Ethiopia, Fiji, Gambia, Kenya, Kyrgyzstan, Latvia, Mauritania and San Marino.

Qatar is in the process of negotiating, signing and ratifying treaties with Albania, Belgium, Brunei Darussalam, Egypt, Eritrea, Estonia, Finland, Germany, Iceland, Iran, Japan, Kazakhstan, Libya, Lithuania, Mexico, Montenegro, Peru, South Africa, Spain, Thailand, Turkmenistan, Ukraine, Uruguay and Uzbekistan.

Qatar is renegotiating its tax treaties with Morocco and Turkey.

**A. At a glance**

Corporate Income Tax Rate (%)	16 (a)
Capital Gains Tax Rate (%)	16 (a)
Branch Tax Rate (%)	16 (a)
Withholding Tax (%) (b)	
Dividends	16 (c)
Interest	16 (d)(e)(f)
Royalties	16 (d)(f)
Commissions	16 (d)
Certain Services Rendered Abroad	16 (g)
Services Rendered in Romania	16 (d)
Gambling	25
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	7 (h)

- (a) See Section B.
- (b) These withholding tax rates are standard and final. They can be reduced under double tax treaties or European Union (EU) directives.
- (c) This tax may be reduced to nil for dividends paid to a legal entity residing in another EU member state or to a permanent establishment of an entity residing in an EU member state, if certain conditions relating to the dividend recipient and dividend payer are satisfied. These conditions are described in *Dividends* in Section B. Dividends paid by Romanian legal entities to pension funds resident in an EU member state, as defined by the law of such state, are exempt from withholding tax in Romania.
- (d) This withholding tax applies only if the income is not attributable to a permanent establishment in Romania.
- (e) The following types of interest derived by nonresidents are not subject to withholding tax:
- Interest from public debt instruments in national and foreign currency
  - Interest related to instruments issued by the National Bank of Romania to carry out monetary policy
  - Interest paid by Romanian legal entities to pension funds resident in an EU member state, as defined by the law of such state
- (f) The withholding tax rate is 0% for interest and royalties if certain conditions are satisfied, including the following principal conditions:
- The beneficial owner of the interest or royalties is a legal person resident in an EU member state or a permanent establishment of an entity resident in such a state.
  - The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.
- (g) Withholding tax applies for certain types of services rendered abroad, which are management, consultancy, marketing, technical assistance, research and design, advertising and publicity, without taking into account how these services are rendered. It also applies to services provided by lawyers, engineers,

architects, public notaries, auditors and accountants if the income is not attributable to a permanent establishment in Romania. International transport and supplies of services ancillary to such transport are not subject to withholding tax.

- (h) Annual tax losses incurred in 2009 and subsequent years may be carried forward for seven years (five years for losses incurred before 2009) and are not adjusted for inflation.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident entities are subject to tax on their worldwide income. An entity is resident in Romania if it satisfies any of the following conditions:

- It is incorporated in Romania.
- Its place of effective management and control is located in Romania.
- It is a legal entity that has its headquarters in Romania and that is incorporated in accordance with the European legislation.

Associations or consortia, which are not considered separate legal persons in Romania, are tax transparent. For such associations between Romanian legal entities and individuals or foreign entities, the tax is calculated and paid by the Romanian legal entities on behalf of the partners.

Nonresident companies that do not have an effective place of management in Romania are subject to tax on their Romanian-source income only, including capital gains derived from specified transactions (see *Capital gains*).

**Rates of corporate income tax.** The standard rate of income tax for Romanian companies is 16%, regardless of whether the companies have foreign participation. Income derived by companies from night bars, nightclubs, discos and casinos directly or in association is also normally taxable at a rate of 16%, but the amount of the tax payable may not be less than 5% of the gross income derived from such activities.

Nonresident companies that do not have their place of effective management in Romania are taxed in Romania at the standard rate of 16% on earnings derived from their operations in Romania through branches, permanent establishments or certain consortia. A permanent establishment of a foreign company in Romania may be constituted in certain forms, including the following:

- An office
- A branch
- An agency
- A factory
- A mine
- A place of extraction for gas or oil
- A building site that exists for a period exceeding six months
- The place in which an activity continues to be carried out with the assets and liabilities of a Romanian legal person subject to a cross-border reorganization

Foreign companies are also normally taxable in Romania at the standard corporate income tax rate on profits derived in Romania from real estate located in Romania and the exploitation of natural resources, as well as on certain capital gains (see *Capital gains*).

Representative offices are subject to an annual tax equal to the equivalent in Romanian lei of EUR4,000, payable in two installments.

**Microenterprises.** Romanian legal persons fulfilling certain conditions must pay microenterprise tax, which is calculated at a rate of 3% of the taxable revenues with exemptions for certain revenues.

This regime applies to companies that derived income of less than EUR65,000 in the preceding year and derived income from activities other than banking, insurance and reinsurance, capital market (except for intermediaries) and gambling. It also applies if the revenues from consultancy and management are less than 20% of the total revenues.

If during a fiscal year, a taxpayer assessed as microenterprise fulfills the conditions to become a corporate income taxpayer (for example, it has income exceeding EUR65,000), it pays corporate income tax based on revenues and expenses recorded from the beginning of the fiscal year.

A fiscal loss incurred by the taxpayer in the period in which the microenterprise income tax is applied is not taken into account (the taxpayer's fiscal result is not calculated).

Fiscal losses incurred by legal persons before applying the microenterprise tax regime can be carried forward until the legal entity fulfills the conditions to become a corporate income taxpayer, but only within the seven-year period (five-year period for losses incurred before 2009) stated by the law.

**Tax incentives.** Romania offers certain tax incentives, which are summarized below.

*Corporate income tax.* The Fiscal Code contains measures allowing companies to claim accelerated depreciation in certain circumstances.

The Fiscal Code allows "sponsorship" expenses to be claimed as a credit against corporate income tax due, subject to certain limitations. Under the Sponsorship Law, "sponsorship" is defined as "the juridical deed by which two persons agree upon the transfer of the ownership right upon certain material goods or financial means, in order to support the activity without lucrative scope, carried out by one of them." The tax credit for sponsorship expenses is limited to the lower of the following:

- 0.3% of the company's turnover
- 20% of the corporate income tax due

Effective from 1 January 2014, sponsorship expenses that were not used for obtaining a tax credit can be carried forward for seven consecutive years.

Dividends invested for the purpose of securing and creating new jobs for the business development of Romanian legal entities distributing the dividends are exempt from dividend tax. Dividends invested in the share capital of another Romanian legal entity to create new jobs or to develop its activities are exempt from dividend tax.

*Reinvested profit.* Effective from 1 July 2014, the profit invested in the production and/or acquisition of certain technological equipment after 1 July 2014 is exempt from tax if the equipment is put into use on or before 31 December 2016. The reinvested profit represents the balance in the profit-and-loss account, which is the difference between the total income and total expenses

booked in the trial balance of the company beginning with 1 January of the year in which such technological equipment is commissioned. The reserve recognized as a result of the application of this fiscal incentive is taxed at the moment of use in any form (for example, if it is used for increasing the share capital or for covering accounting losses or, in case of reorganization operations carried out according to the law, if the benefiting company does not take over this reserve).

The technological equipment must be retained for at least half of the useful economic life of the equipment, but no longer than five years, with certain exceptions (for example, cases in which the technical equipment is destroyed, lost or stolen). In addition, the accelerated depreciated method cannot be used for the respective technological equipment.

*Research and development costs.* An additional allowance granted for research and development activities equals 50% of eligible costs.

*Industrial parks.* Companies administering industrial parks (administrator companies) may benefit from the following incentives:

- Exemption from taxes due on conversion of agricultural land to be used for industrial parks
- Buildings, constructions and land located inside industrial parks are exempt from building tax and land tax
- Other incentives, which may be granted by the local authorities

*Petroleum companies.* Incentives are available to titleholders of oil and gas concessions. Titleholders are granted the concessions by the government in exchange for the payment of a royalty. The following are the incentives:

- For rehabilitation projects, a deductible provision equal to 10% of the annual exploitation profits derived by titleholders of oil and gas licenses that relate to offshore areas with water deeper than 100 meters (328 feet)
- Exemption from payment of tax on oil and natural gas (consumption tax imposed on the value of oil and gas delivered) for the production extracted and directly exported by producers

*Free-trade zones.* The following tax benefits are available to companies performing activities in free-trade zones:

- Value-added tax (VAT) exemption applies to supplies of non-Community goods to be placed in a free-trade zone and to supplies of the respective goods performed in a free-trade zone.
- Non-Community goods introduced into free-trade zones for storage purposes are not subject to customs duties.
- State aid is available for investments performed in free-trade zones.

*Property taxes.* Local councils may grant building and land tax exemptions to legal entities, subject to the state-aid regulations.

**Capital gains.** Capital gains are included in taxable income and taxed at the normal corporate income tax rate. Capital gains derived by nonresident companies are also subject to the standard 16% tax rate if they are derived from the disposal of the following:

- Immovable property located in Romania
- Participation titles (shares) in a Romanian company, or a company with fixed assets that primarily consist of, directly or indirectly, immovable property located in Romania

Certain exemptions apply to income derived by nonresident collective placement bodies without corporate status (for example, Romanian entities that attract financial resources for investment, according to specific legislation) from the transfer of value titles (securities participation titles in open funds, and other financial instruments, such as derivatives) and participation titles held directly or indirectly in Romanian companies, as well as to income derived by nonresidents from the transfer on a foreign capital market of participation titles held in a Romanian company and of value titles.

Effective from 1 January 2014, income derived from the sale or assignment of shares held in Romanian legal entities or in legal entities from countries with which Romania has entered into a double tax treaty is not included in taxable income if the taxpayer holds for an uninterrupted period of one year at least 10% of the share capital of the legal entity that issued the shares.

**Administration.** In general, the tax year is the calendar year. However, beginning on 1 January 2014, certain companies may opt for a fiscal year other than the calendar year.

Under the corporate income tax law, payers of corporate income tax (for example, companies, branches and permanent establishments) must file tax returns and pay corporate income tax quarterly (computed based on actual numbers) by the 25th day of the first month following the first, second and third quarters.

As an exception to the general rule, the payments made by banks are advance payments based on the corporate income tax for the preceding year, adjusted by the inflation rate. This rule does not apply to newly established banks and banks that recorded a tax loss in the preceding year. These banks apply the 16% rate to the accounting profit of the current quarter.

All other companies may opt for reporting and paying the annual corporate income tax through advance payments made on a quarterly basis.

The annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by 25 March of the following year. For the taxpayers using a non-calendar fiscal year, the annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by the 25th day of the third month following the fiscal year-end. Certain taxpayers, such as nonprofit organizations or taxpayers deriving most of their revenues from cereals and technical plants, must submit the annual corporate income tax return and pay the related tax by 25 February of the following year.

Companies ceasing to exist must submit a final tax return and pay the corporate income tax based on special rules.

The annual financial statements must be submitted within specified time periods after the year-end. The following are the time periods:

- Companies (in general), national companies and research and development institutes: 150 days
- Certain specified legal persons, individuals and bodies: 120 days
- Companies not performing any activities after their formation: 60 days

The failure of a company to file tax returns by the deadline may result in a fine ranging usually from RON1,000 to RON5,000. Companies are liable for the payment of the fines for late filing of returns even if they pay the tax due. For the late payment of tax liabilities, the following late payment interest and late payment penalties are due (except where otherwise provided):

- Late payment interest, computed at 0.03% per day of delay (as of 1 March 2014)
- Late payment penalties, computed at 0.02% per day of delay

**Dividends.** Dividends paid by Romanian companies to resident companies are subject to a 16% withholding tax. The 16% tax is considered a final tax and, accordingly, the dividends are not included in the taxable income of the recipient. However, as a result of Romania's accession to the EU, no tax is imposed on dividends paid by a Romanian resident company to resident companies that held at least 10% of the shares of the payer for an uninterrupted period of at least one year that ended on the date of payment of the dividend.

Dividends paid by Romanian companies and legal entities having their social headquarters in Romania (that is, *societas europeae* registered with the Romanian Trade Registry and set up according to European law) to resident individuals and nonresident companies and individuals are generally subject to a 16% withholding tax. However, dividends paid by a Romanian legal entity to a legal entity resident in another EU member state or to a permanent establishment of an entity residing in an EU member state are not subject to withholding tax if certain conditions relating to the legal entity receiving the dividends and to the Romanian income payer are satisfied. These conditions are described below.

The following conditions must be satisfied with respect to the legal entity receiving the dividends:

- The legal entity receiving the dividends must be established in one of the legal forms provided by the law and must be resident in the respective EU member state and, according to the double tax treaties entered into with third countries, may not be resident outside the EU from a tax perspective.
- The legal entity receiving the dividends must be liable to pay corporate income tax or other similar tax under the tax law in its state of residence without the possibility of exemption or choice of the fiscal treatment.
- The beneficiary of the dividends must own at least 10% of the participation titles in the Romanian legal entity for an uninterrupted period of at least one year ending on the date of the payment of the dividends.

The Romanian entity paying the dividends must satisfy the following conditions:

- It must be a joint stock company, limited partnership or limited liability company.
- It must be liable to pay corporate income tax without the possibility of exemption or choice of the fiscal treatment.

Dividends paid by Romanian legal entities to pension funds, as defined by the law of the respective EU member state, are exempt from withholding tax in Romania.

The deadline for payment of dividend withholding tax is the 25th day of the month following the month in which the dividends are paid. However, if the dividends are distributed but not paid to shareholders by the end of the year in which the annual financial statements are approved, the tax is due on 25 January of the following year.

**Foreign tax relief.** Foreign taxes may be credited against Romanian taxes based on the provisions of a double tax treaty between Romania and the foreign state.

*Permanent establishments.* Romanian permanent establishments of foreign legal entities resident in an EU or European Economic Area (EEA) member state that derive income from another EU or EEA state benefit under certain conditions from a tax credit for the tax paid in the state from which the permanent establishment from Romania derived the income.

### C. Determination of trading income

**General.** In general, all income that is booked as revenue is included in taxable income. However, the following items, among others, are not included in taxable income:

- Dividends received by a Romanian company from another Romanian company or from a foreign legal entity subject to corporate income tax or a similar tax located in a state with which Romania entered into a double tax treaty. Dividends received by a Romanian company from an EU resident subsidiary and dividends received by a Romanian permanent establishment of an EU company are also not taxable if certain conditions are satisfied.
- Increases in the value of shares held in other companies, resulting from the incorporation of reserves, premiums, profits and similar items.
- Revenues from the reversal of expenses and provisions that were previously considered to be nondeductible.
- Income derived from the liquidation of other Romanian legal entities or foreign legal entities located in countries with which Romania has entered into a double tax treaty.

The first and fourth items above apply if the taxpayer holds for an uninterrupted period of one year at least 10% of the share capital of the legal entity distributing the dividends or the legal entity subject to liquidation.

In general, only expenses related to the earning of taxable income are deductible for tax purposes. However, the following items are deductible within specified limits:

- Protocol and entertainment expenses (for example, gifts to clients and business lunches), up to 2% of the adjusted accounting profit before tax
- Employee-related expenses (social expenses), up to 2% of the total salary cost
- Contributions to the legal reserve fund, generally up to 5% of the accounting profit before tax, until the reserve fund reaches 20% of share capital
- Expenses with respect to perishable goods (goods on which a company might incur losses for various reasons, such as from damage suffered during the transport of the goods), which are deductible within the limits set by a government decision

- Provisions (see *Provisions*)
- Interest expenses and foreign-exchange losses related to loans subject to the debt-to-equity limitation, if the debt-to-equity ratio is not exceeded (see Section E)
- Depreciation expenses (see *Tax depreciation*)
- Expenses incurred on behalf of an employee with respect to optional occupational pension and private health insurance schemes, within certain thresholds

The following expenses are not deductible for tax purposes:

- Service expenses, including management, assistance and consultancy expenses, if the taxpayer cannot justify their necessity and no contracts and other documents justifying the expenses are available.
- Expenses relating to insurance, other than insurance relating to risks of work-related accidents and insurance relating to assets owned by the company.
- Interest on loans that are not from financial institutions, to the extent that the interest exceeds the following limits:
  - For loans denominated in lei (RON), the level of the reference interest rate published by the National Bank of Romania (NBR) for the last month of the quarter.
  - For loans denominated in foreign currencies, an annual interest rate of 6% (beginning in 2010).
- Penalties and fines paid to Romanian or foreign authorities.
- Losses from the reduction in the value of inventory and uninsured assets, as well as the related VAT.
- VAT related to certain nondeductible expenses.
- Romanian and foreign corporate income tax (however, a tax credit is allowed for taxes paid in other countries based on the provisions of a double tax treaty between Romania and the foreign state).
- Expenses incurred for the benefit of shareholders or associates, other than payments for goods and services at market value.
- Salary expenses that are not taxed at the level of the individual, unless the law provides otherwise.
- Expenses related to non-taxable income.

Effective from 1 July 2012, the deductibility of car expenses not falling under the full deductibility criteria provided under the Romanian tax law is limited to 50% for certain cars not exclusively used for business purposes.

Sponsorship expenses are also nondeductible, but they may be claimed as a credit against corporate income tax due, subject to certain limitations (see Section B).

#### **Taxpayers applying the international financial reporting standards.**

Beginning in 2012, taxpayers applying international financial reporting standards (IFRS), such as banks and listed companies, must take specific tax rules into consideration in determining the corporate income tax.

**Inventories.** Under Romanian law, inventories of raw materials and merchandise are valued at purchase cost, while inventories of finished goods and work-in-progress are valued at production cost. On the write-off of the inventories, the valuation is calculated using the first-in, first-out (FIFO), weighted average or last-in, first-out (LIFO) methods.

**Provisions.** Under Romanian law, the following provisions are deductible for corporate income tax purposes:

- Bad debt provisions under specified conditions
- Provisions for performance guarantees granted to clients
- Mandatory credit risk provisions, if established by banks, credit institutions or nonbanking financial institutions (leasing companies)
- Special provisions for titleholders of oil and gas concessions

**Tax depreciation.** The following are the permissible depreciation methods:

- Buildings: straight-line depreciation
- Equipment: straight-line, reduced-balance or accelerated depreciation
- Other depreciable assets: straight-line or reduced-balance depreciation

The depreciation method must be applied consistently. Land may not be depreciated.

Under the accelerated depreciation method, the assets are depreciated at a maximum rate of 50% in the year of purchase, and the balance of the value is deducted using the straight-line method during the remaining useful life of the asset. Technological equipment financed from reinvested profit cannot be depreciated using the accelerated depreciation method (see Section B).

Patents, licenses, know-how, manufacturers' brands, trademarks and service marks, as well as other similar industrial and commercial property rights, are depreciated during the contract period or during the period in which the purchaser intends to use the rights.

Expenses for the production or purchase of software programs are deductible on a straight-line basis over three years. The reduced-balance and accelerated depreciation methods may be used for patents.

Goodwill, as well as intangibles with an undetermined operational life according to the accounting regulations, cannot be depreciated for tax purposes.

Effective from 1 February 2013, the deductibility of the fiscal depreciation of certain vehicles is limited to RON1,500 per month per vehicle.

For tax depreciation purposes, useful lives are prescribed by law. The following are the useful lives that are generally applicable to major categories of assets.

<b>Asset</b>	<b>Years</b>
Buildings and constructions (for example, roads and fences)	8 to 60
Machinery and equipment	2 to 24
Furniture and fittings	2 to 15
Motor vehicles	3 to 9

Revaluations of the book value of land and fixed assets carried out before 31 December 2003 are taken into account for tax purposes. Revaluations carried out after 1 January 2007, as well as the part remaining undepreciated as of 31 December 2006 with respect to revaluations carried out between 1 January 2004 and 31 December 2006, are also taken into consideration for tax purposes.

Reserves from the revaluation of fixed assets, carried out after 1 January 2004, which are deducted as tax depreciation or expenses when assets are sold or written off are taxed simultaneously with the deduction of the tax depreciation or expenses (that is, when the assets are sold or written off).

**Relief for losses.** Annual tax losses incurred in 2009 and subsequent years may be carried forward for seven years (five years for losses incurred before 2009) and are not adjusted for inflation. Losses of entities ceasing to exist as a result of a spin-off or merger are recovered by the taxpayers taking over the patrimony of the absorbed or spun-off company, proportionally to the value of the assets and liabilities transferred to the beneficial legal entity.

Losses recorded by taxpayers that do not cease to exist as a result of an operation consisting of the spin-off of a part of their patrimony transferred as a whole are recovered by such taxpayers and by the taxpayers taking over the patrimony of the transferring company, proportionally to the assets and liabilities transferred to the beneficial legal persons, according to the spin-off project, respectively with those maintained by the transferring legal entity.

Losses may not be carried back.

**Groups of companies.** Although the Romanian law provides financial accounting rules for the consolidation of companies, the tax law treats each group company individually for tax purposes. Under certain circumstances, a group of taxable persons established in Romania may be treated as a single taxable person for VAT reporting purposes.

Effective from 1 July 2013, tax consolidation is available for foreign legal entities that have several permanent establishments in Romania. As a result, the taxable profits of one permanent establishment may be offset against the tax losses of another permanent establishment.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; certain enterprises, products and services are exempt, including banks, financial intermediaries and insurance companies	
Standard rate	24
Special rates for certain goods and services	5/9
Special consumption (excise) taxes; imposed, for example, on energy products, beverages, cigarettes and coffee; taxes are imposed at specified amounts per unit on certain products (for example, coffee and alcohol) and at percentage rates for other products	Various
Social security contributions; paid by employers on the total gross realized salaries	
Social Insurance Fund; rate varies according to work conditions	15.8 to 25.8
Health Fund	5.2
Unemployment Fund	0.5

Nature of tax	Rate (%)
National Insurance Fund for Labor Accidents and Professional Diseases	0.15 to 0.85
Fund for Guarantee of Salary Payment Liabilities; this fund finances the payment of salary debts resulting from labor agreements entered into between employees and employers against which an insolvency procedure has begun	0.25
Medical leaves	0.85
Local taxes on land, buildings, cars, certain authorizations and other items	Various
Construction tax; the tax base for construction tax is the value of constructions, other than buildings, booked in the trial balance as of 31 December of the preceding year, which were not subject to building tax; taxpayers subject to construction tax are Romanian legal entities, except for public institutions, national research and development institutes, associations, foundations and other nonprofit legal persons, as per the relevant organization and functioning regulations, foreign legal persons carrying out business in Romania through a permanent establishment, and legal persons having a registered office in Romania set up according to the EU legislation	1

## E. Miscellaneous matters

**Foreign-exchange controls.** The Romanian currency is the leu (RON). Regulation 4/2005, as amended, governs the foreign-exchange regime in Romania.

In Romania, transactions between resident companies or between resident companies and resident individuals must be made in local currency, with certain exceptions. Transactions between residents and nonresidents can be made in domestic as well as in foreign currency. In the free-trade zones (see Section B), transactions between residents can also be performed in foreign currency.

Residents and nonresidents may open foreign-currency accounts in Romanian banks or foreign banks authorized to operate in Romania. Residents are allowed to open accounts in banks located abroad. Romanian legal entities may hold and use hard currency deposited with authorized banks.

Romanian legal entities may make payments in foreign currency to nonresidents without prior approval. Current-account transactions include, among others, imports of goods and services, payments of dividends and repatriation of profits.

Romanian and foreign entities may freely buy and sell hard currency on the interbank foreign-exchange market, but specified documentation is usually required.

**Transfer pricing.** Under the provisions of the Romanian Fiscal Code, for transactions between related parties, the tax authorities may adjust the amount of income or expenses of either party to reflect the market value of the goods or services provided in

the transaction. Such reassessment affects only the tax position of the Romanian entity. It does not affect the entity's financial statements.

The law indicates that in applying the domestic transfer-pricing measures, the Romanian tax authorities must also take into account the Organisation for Economic Co-operation and Development (OECD) Transfer-Pricing Guidelines.

On request, Romanian entities performing transactions with non-resident related parties must make available to the tax authorities a file containing specified transfer-pricing documentation.

**Debt-to-equity rules.** Interest expenses are fully deductible if the debt-to-equity ratio is positive and does not exceed 3:1. Only loans granted for a period of greater than one year are included in the debt-to-equity computation. If the 3:1 threshold is exceeded, interest expenses on such loans and net losses from foreign-exchange differences related to such loans are not deductible, but they may be carried forward to the following tax years until they are fully deducted.

The amount of the carryforward of the deductible interest and net foreign-exchange losses that is transferred to taxpayers that take over assets and liabilities of a company following a reorganization (for example, a merger or spin-off) is determined by the proportion of the value of the assets and liabilities transferred to the beneficiary legal entities.

Interest expenses and net foreign-exchange losses are not subject to the debt-to-equity rules if the loans satisfy any of the following conditions:

- They are granted by international development banks or similar organizations, Romanian or foreign credit institutions, nonbanking financial institutions or legal persons granting credits according to the law.
- They relate to bonds traded on a regulated market.
- They are guaranteed by the state.

## F. Treaty withholding tax rates

The following table shows the applicable withholding rates under Romania's bilateral tax treaties.

	Dividends (gg) %	Interest (hh) %	Royalties (hh) %
Albania	10/15 (a)	10	15
Algeria	15	15	15
Armenia	5/10 (a)	10	10
Australia	5/15 (b)	10	10
Austria	0/5 (a)	0/3 (n)	3
Azerbaijan	5/10 (a)	8	10

- (a) The lower rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer.
- (b) The lower rate applies if the beneficiary of dividends is a company owning at least 10% of the capital of the payer.
- (c) The rate is 0% if the indebtedness on which the interest is paid is guaranteed, insured, or financed by the other state or by a financial institution that is a resident of the other state.
- (d) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
  - The governmental institution or entity of a contracting state
  - A company that is resident in a contracting state and that has at least 25% of its capital owned directly or indirectly by the government or governmental institutions of either contracting state
- (e) The 5% rate applies to royalties paid for patents, brands, designs and models and know-how.
- (f) The 2.5% rate applies to royalties relating to computer software or industrial equipment.
- (g) The 0% applies to interest paid to the German government, Deutsche Bundesbank Kreditanstalt für Wiederaufbau or Deutsche Investitions und Entwicklungsgesellschaft (DEG) and to interest paid on a loan guaranteed by Hermes-Deckung. The 0% rate also applies to interest paid to the Romanian government if it is derived and beneficially owned by certain types of institutions (for example, the Romanian government, an administrative-territorial unit, a local authority, or an agency, bank unit or institution of the Romanian government) or if the debt claims of Romanian residents are warranted, insured or financed by a financial institution wholly owned by the Romanian government. In addition, as long as Germany does not impose taxes on interest, Romania may not tax interest. The protocol to the treaty provides that the following types of interest are taxed only in the state where the interest arises and according to the law of that state, provided that they are deductible in the determination of profits of the interest payer:
- Interest derived from rights or debt claims carrying a right to participate in profits
  - Interest linked to the borrower's profits
  - Interest derived from profit-sharing bonds
- (h) The lower rate applies to dividends paid by companies resident in Romania.
- (i) The lower rate applies to cultural royalties.
- (j) The lower rate applies if the beneficiary of dividends is a company owning at least 40% of the capital of the payer.

- (k) The lower rate applies to payments received for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas and processes, or industrial, commercial or scientific equipment, and for information concerning industrial, commercial or scientific experience.
- (l) The 0% rate applies to the following types of interest:
- Interest paid in connection with sales on credit of industrial, commercial or scientific equipment
  - Interest on loans granted by banks or other financial institutions (including insurance companies)
  - Interest on loans with a term greater than two years
  - Interest on debt-claims guaranteed, insured or directly or indirectly financed by or on behalf of the government of either contracting state
- (m) The 0% rate applies to interest arising in one contracting state with respect to debentures, public funds or similar instruments of the government that is paid to residents of the other contracting state and to interest on loans granted or guaranteed by the National Bank of Romania or by the Bank of Israel. The 5% rate applies to interest paid with respect to sales on credit of merchandise or industrial, commercial or scientific equipment and to interest on loans granted by banks. The 10% rate applies to other interest.
- (n) As long as Austria, under its national law, does not levy withholding tax on interest paid to Romanian residents, the withholding tax rate is 0%.
- (o) The 0% rate applies to dividends paid by a company resident in Malaysia to a Romanian resident; the 10% rate applies to dividends paid by a company resident in Romania to a Malaysian resident.
- (p) The 0% rate applies to interest paid to Romanian residents on long-term loans.
- (q) The 0% rate applies to industrial royalties received from Malaysia by Romanian residents.
- (r) The 5% rate applies to the following:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)
  - Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid with respect to a rental or franchise agreement)
- (s) The 0% rate applies if the beneficiary of the dividends is a company owning at least 25% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- (t) Romania will not impose withholding tax on interest and royalties paid to Dutch residents as long as Dutch domestic law does not impose withholding tax on these types of payments.
- (u) The lower rate applies to interest related to sales on credit of equipment, loans granted by a bank or to public issues of bonds and debentures.
- (v) The 10% rate applies to royalties paid by a company that is registered as a foreign investor and is engaged in an activity in a priority economic field. The 15% rate applies to royalties related to film or television production. The 25% rate applies to other royalties.
- (w) The 10% rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer for an uninterrupted period of two years.
- (x) The 0% rate applies to interest related to sales on credit of industrial and scientific equipment.
- (y) Romania will not impose withholding tax on royalties paid to Swiss residents as long as Swiss domestic law does not impose withholding tax on royalties.
- (z) The 10% rate applies if the beneficiary of the interest is a financial company, including an insurance company. The 20% rate applies to interest with respect to sales on credit. The 25% rate applies to other interest payments.
- (aa) The 0% rate applies to industrial royalties.
- (bb) This treaty is currently applied only to Bosnia and Herzegovina.
- (cc) The 0% rate applies to the following types of interest:
- Interest related to public debt instruments or to instruments issued by the National Bank of Romania with the purposes of reaching monetary policy objectives
  - Interest paid to EU pension funds
- The 16% rate applies to other interest payments.
- (dd) This treaty is not yet in force.
- (ee) The 0% rate applies if the beneficiary of the dividends is a company owning at least 50% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.

- (ff) The 0% rate applies to dividends paid to the government of the other contracting state.
- (gg) In accordance with an EU directive, the following rules apply to dividends paid to companies residing in the EU:
- The withholding tax rate in Romania is 0% if certain conditions are met, such as the beneficiary of the dividends owns at least 10% of the capital of the payer for an uninterrupted period of one year before the payment of the dividends.
  - The withholding tax rate in Romania is 16% if the conditions mentioned in the preceding bullet are not satisfied.
- (hh) The withholding tax rate is 0% for interest and royalties if both of the following conditions are satisfied:
- The beneficial owner of the interest or royalties is a legal person resident in an EU member state or a permanent establishment of an entity resident in such a state.
  - The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.
- (ii) The 0% rate applies to dividends paid to the government or political subdivisions, local authorities or administrative territorial units. The 0% rate also applies to majority state-owned companies (at least 51%) if the minority shareholders are residents of that state.
- (jj) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
  - A governmental institution or entity of a contracting state
- (kk) The 0% rate applies if any of the following circumstances exists:
- The payer of the income from debt-claims is the government of a contracting state or an administrative-territorial unit or an administrative subdivision or a local authority thereof.
  - The income from debt-claims is paid to the government of the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof, or an agency or instrumentality (including a financial institution) wholly owned by the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof.
  - The income from debt-claims is paid to any other agency or instrumentality (including a financial institution) with respect to loans made in application of an agreement between the governments of the contracting states.
  - The income from debt-claims is paid on loans granted, insured or guaranteed by a public institution for purposes of promoting exports.
- (ll) A withholding tax exemption for dividends applies if either of the following circumstances exists:
- The dividends are paid to a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
  - The beneficial owner of the dividends is the government of the contracting state or a governmental institution or entity of a contracting state.
- (mm) The withholding tax exemption for interest applies if either of the following circumstances exists:
- The interest is paid to related parties (that is, direct parent or sister companies) that have a shareholding of 25% or more.
  - The loan is secured by a governmental institution.
- (nn) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is the government, an administrative subdivision, a local authority or an administrative-territorial unit.
  - The beneficial owner is a bank owned by the government, an administrative subdivision, a local authority or an administrative-territorial unit.
  - The loan is guaranteed, assured or financed by a bank entirely owned by the government.
- (oo) This treaty currently applies to Montenegro and Serbia.
- (pp) The 0% rate applies if the interest is derived and beneficially owned by the following:
- The government, an administrative territorial unit, a political subdivision, a local authority or an administrative-territorial unit
  - In the case of Romania, by the National Bank of Romania or the Export-Import Bank of Romania
  - In the case of India, by the Reserve Bank of India, the Export-Import Bank of India or the National Housing Bank
  - Any other institution that may be agreed to through an exchange of letters between the competent authorities
- (qq) This treaty is effective and in force from 1 January 2015.

**A. At a glance**

Corporate Profits Tax Rate (%)	0/15.5/20 (a)(b)
Capital Gains Tax Rate (%)	0/15.5/20 (a)(c)
Branch Tax Rate (%)	15.5/20 (a)
Withholding Tax (%)	
Dividends	0/13/15 (d)
Interest on Certain Types of State and Municipal Securities	15 (e)
Other Interest	20 (e)
Royalties from Patents, Know-how, etc.	20 (e)
Income from the Operation, Maintenance or Rental of Vessels or Airplanes in International Traffic	10 (e)
Payments of Other Russian-Source Income to Foreign Companies	20 (e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 (f)

- (a) The basic corporate profits tax rate consists of a 2% rate payable to the central government and rates ranging from 13.5% to 18% payable to the regional governments. The regional governments set the rates applicable to their respective regions.
- (b) The 0% rate applies to profits of companies performing educational and medical activities. Also, see Section B.
- (c) The 0% rate applies to capital gains realized by Russian companies on the disposal of certain shares or participation interests acquired after 1 January 2011 and held for at least five years. Also, see Section B. The 0% rate also applies to capital gains realized by foreign companies that do not have a permanent establishment in the Russian Federation with respect to the disposal of the following shares:
- Shares in Russian companies in which the value of immovable property does not exceed 50% of the company's total assets
  - Shares in Russian companies that are traded on an organized securities market.
- (d) The 13% rate applies to dividends received by Russian entities or by individuals who are residents of the Russian Federation. The 15% rate applies if the recipient of the dividends is a foreign legal entity. The 0% rate applies to dividends received by Russian companies if the recipient has held at least 50% of the payer's capital for more than 365 days.
- (e) This tax applies to payments to foreign legal entities that are not attributable to a permanent establishment in the Russian Federation. The tax is considered final.
- (f) The time limit does not apply to taxpayers with the status of "resident of an industrial special economic zone." Also, see Section C.

## B. Taxes on corporate income and gains

**Corporate profits tax.** Russian enterprises and foreign legal entities operating through a permanent establishment are subject to tax. The definition of “permanent establishment” is similar to the definition of the same term in the model treaty of the Organisation for Economic Co-operation and Development (OECD). Russian legal entities are subject to tax on their worldwide income. Russian legal entities are those registered in the Russian Federation.

Foreign investment is permitted in various forms, including investment through 100% subsidiaries, share participation in joint stock companies and other types of Russian legal entities, branches and representative offices.

**Tax rates.** For both Russian legal entities and foreign legal entities, the basic corporate profits tax rate consists of a 2% rate payable to the central government and rates ranging from 13.5% to 18% payable to the regional governments. The regional governments set the rates applicable to their respective regions. As a result, the basic corporate profits tax rate varies from 15.5% to 20%, depending on the rate set by the regional government. A 0% tax rate applies to profits of Russian companies performing educational activities and medical activities if they satisfy certain criteria. These criteria include the holding of a license for carrying out the corresponding activities and the receipt of not less than 90% of taxable income from educational, medical or research and development (R&D) activities. The 0% tax rate applies from 1 January 2011 to 1 January 2020.

**Capital gains.** Capital gains are generally included in taxable income and taxed at the regular rates, except for capital gains realized by Russian companies on the disposal of certain shares or participation interests in Russian companies acquired after 1 January 2011 and held for at least five years. The disposal of such shares or participation interests is subject to a 0% rate if shares or participation interests satisfy either of the following conditions:

- They are not circulated on the organized securities market.
- They qualify as shares in a company in the high-technology (innovation) sector.

Capital gains on the disposal of securities are subject to profits tax at the standard tax rate. Specific rules regulate the computation of capital gains on quoted and unquoted securities. Until 31 December 2014, capital losses were available for deduction and carryforward only against gains on similar securities (that is, quoted or unquoted). Effective from 1 January 2015, losses on disposals of exchange-traded securities may be included in the general profits tax base and the tax bases relating to non-exchange-traded securities and non-exchange-traded derivatives are merged into a single tax base.

Losses on sales of fixed assets and other property are generally deductible, subject to certain restrictions. The deductibility of losses on sales of securities is limited.

**Administration.** The tax year is the calendar year. All taxpayers, except foreign legal entities, are required to make advance tax payments monthly. Each payment must equal one-third of the total advance payments for the preceding quarter. Alternatively,

taxpayers may choose to pay tax by the 28th day of each month based on profits actually earned in the preceding month. Foreign legal entities must make quarterly tax payments. The final return for the year and the tax liability are based on actual results. Taxpayers' final returns are due on 28 March following the end of the tax year. Significant penalties are imposed for failure to file returns by this deadline, which cannot be extended.

Taxpayers may apply to have excess payments of tax offset against future tax liabilities or refunded by the tax authorities. Offsets are performed within 10 days and refunds are granted within one month after the written application is received by the tax authorities. However, in practice, refunds may be difficult to obtain.

Taxpayers must register with the tax authorities at the following locations:

- The location where they were organized
- The location of any economically autonomous subdivisions
- The location of any immovable property or means of transport owned by them

**Dividends.** Dividends received are subject to withholding tax and are excluded from taxable profits. Dividends received by Russian entities or by individuals who are residents of the Russian Federation are subject to withholding tax at a rate of 13%. Dividends received by a foreign entity from a Russian entity are taxable at a rate of 15%. Tax withheld from dividends received by a Russian legal entity from another Russian legal entity may be offset against the tax that would normally be withheld from dividends paid to Russian legal entities by the recipient.

Dividends received by Russian legal entities on strategic shareholdings are exempt from tax. Under this regime, dividends are considered to be received from strategic shareholdings if the recipient has held at least 50% of the payer's capital for more than 365 days as of the date of the decision to pay the dividends.

**Foreign tax relief.** Foreign withholding taxes may be credited against Russian tax imposed on the same income, up to the amount of Russian tax on the income.

### C. Determination of trading income

**General.** Taxable profit is determined by computing the profit or loss from business activities and non-selling operations, such as leasing income and capital gains, but excluding dividends received from Russian enterprises. Income received in foreign currency is translated into rubles according to the relevant daily exchange rate determined by the Central Bank.

The Tax Code provides an open list of expenses that are deductible for tax purposes.

The rules discussed in this paragraph apply until 31 December 2014. Interest on debts is deductible if the amount of interest does not deviate by more than 20% from the average level of interest charged on debts issued in the same quarter under comparable conditions. Alternatively, at the taxpayer's option, the maximum deductible interest on ruble loans may be calculated using the official Central Bank of Russia (CBR) refinancing rate multiplied by a factor of 1.1 (for 2010 through 2014, the factor is increased

to 1.8) and the maximum deductible interest on debts in foreign currency is calculated using a rate of 15% (80% of the official CBR refinancing rate in 2011 through 2014). In certain circumstances, the deductibility of interest on intercompany loans is restricted by thin-capitalization measures.

Effective from 1 January 2015, the rules discussed below apply to the recognition of interest as income or an expense.

For transactions recognized as controlled under the transfer-pricing rules, these rules should be taken into account in determining the interest recognized for profits tax purposes. An exception to this general rule applies if one of the parties to a controlled transaction is a bank. In this case the lender has the right to recognize the actual interest on the debt as income if the rate exceeds the lowest value of the range of threshold values that is established by the Tax Code (see table below), while the borrower has the right to recognize the actual interest on the debt obligation as an expense if the rate is lower than the highest value of this same range of threshold values. The following table contains the ranges of threshold values.

<b>Currency of indebtedness</b>	<b>Lower threshold</b>	<b>Upper threshold</b>
Rubles (RUB) in 2015	75% of the CBR rate	180% of the CBR rate
Rubles from 1 January 2016	75% of the CBR rate	125% of the CBR rate
Euro (EUR)	EURIBOR (a) + 4 percentage points	EURIBOR + 7 percentage points
Chinese yuan (CNY)	SHIBOR (b) + 4 percentage points	SHIBOR + 7 percentage points
Pounds sterling (GBP)	LIBOR (c) + 4 percentage points	LIBOR + 7 percentage points
Swiss francs (CHF)	LIBOR + 2 percentage points	LIBOR + 5 percentage points
Japanese yen (JPY)	LIBOR + 2 percentage points	LIBOR + 5 percentage points
Other	LIBOR + 4 percentage points	LIBOR + 7 percentage points

(a) Euro Interbank Offered Rate

(b) Shanghai Interbank Offered Rate

(c) London Interbank Offered Rate

For details on tax depreciation, see *Tax depreciation*.

Certain costs related to research and development (R&D) are deductible in the amount of actual documented costs multiplied by a factor of 1.5.

Foreign legal entities doing business in the Russian Federation through a permanent establishment are taxed on actual profits. The taxable profit equals income received as a result of carrying out activities in the territory of the Russian Federation through a permanent establishment, minus the amount of expenses incurred by the permanent establishment. General and administration expenses allocated by a foreign legal entity's head office to a Russian permanent establishment are deductible only if this is specifically allowed by an applicable double tax treaty. If a permanent establishment of a foreign entity provides services of a preparatory or auxiliary nature to third parties for no charge, the taxable profit derived from such activities is deemed to be 20% of the amount of the expenses incurred by the permanent establishment in such activities.

**Tax depreciation.** All depreciable assets must be allocated to their relevant depreciation group and depreciated over their useful lives. The taxpayer determines the relevant depreciation group by using the "Classifier of Fixed Assets" issued by the Russian government. The "Classifier of Fixed Assets" provides for 10 depreciation groups and useful lives of 1 to more than 30 years for the depreciable assets in the groups. Based on the useful lives, the taxpayer calculates the depreciation deductible for profits tax purposes. Depreciation may be calculated using either the reducing-balance or straight-line methods. The straight-line method is required for assets with a designated useful life of over 20 years.

Otherwise, the reducing-balance method may be applied. Under this method, depreciation must be determined for each depreciation group as a whole. Depreciation must be calculated based on the total balance of each depreciation group. This balance equals the total book value brought forward for all depreciable assets included in the group to which the reducing-balance method applies.

The depreciation method can be changed once in a five-year period.

Enterprises may deduct 10% (30% with respect to fixed assets with a designated useful life of over 3 years and up to 20 years) of the initial book value of newly purchased fixed assets and capital investments in existing fixed assets as current-year expenses (a capital investment allowance). If fixed assets are transferred between interdependent parties within five years after the date of the purchase, the deducted capital investment allowance is recaptured.

**Relief for losses.** Enterprises may carry forward unrelieved operating losses to the following 10 years. This time limit does not apply to the taxpayers with the status of "resident of industrial special economic zone."

**Groups of enterprises.** Related enterprises may not offset profits and losses among members of a group.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods sold and services rendered, excluding exports and charter capital contributions	
Standard rate	18
Certain food products and children's goods	10
Many exports of goods and certain services	0
Assets tax; the tax base is the net book value of fixed assets; maximum rate	2.2
Tariffs	
Export, rate varies by type of good	Various
Import	Various
Social tax on salaries of employees; imposed on employers; tax is imposed on both Russian companies and branches of foreign entities; the effective tax rate varies depending on the amount of gross income received by the employee	
All annual payments to employee of less than or equal to RUB624,000 (approximately USD10,000)	30
All annual payments to employee in excess of RUB624,000	10
Supplementary contributions for workplace accidents; rate varies by industry	0.2 to 8.5
Income tax withholding by employers	
Residents	13
Nonresidents	30
Mineral extraction tax; imposed on the value or volume of extracted commercial minerals	Various
Transport tax	Various

## E. Miscellaneous matters

**Foreign-exchange controls.** Most foreign-exchange restrictions were abolished in 2006. Russian enterprises' foreign-currency receipts must be deposited in bank accounts in the Russian Federation.

**Transfer pricing.** The transfer-pricing rules, which are largely based on the arm's-length principle stipulated by the transfer-pricing guidelines of the OECD, apply to controlled transactions. Controlled transactions include the following:

- Cross-border transactions with related parties
- Domestic transactions with related parties exceeding certain thresholds
- Cross-border transactions involving certain types of commodities (for example, crude oil, oil products, fertilizers and metals)
- Transactions with independent companies located in certain jurisdictions providing beneficial tax regimes

The providing of loans and guarantees is excluded from transfer-pricing control if the agreement entered into force before 1 January 2012 and if no material changes have occurred with respect to the terms and conditions.

The Tax Code contains a specific definition of related parties and transfer-pricing documentation requirements. Interest penalties and fines of 40% (20% for the period of 2014 through 2016) of underpaid tax apply if the price in the controlled transaction is proved to be outside a range of market prices. No fines apply if

the transfer-pricing adjustment relates to 2012 or 2013 or if the taxpayer submits transfer-pricing documentation to the tax authorities within 30 days after the date on which the tax authorities request such documentation. Corresponding transfer-pricing adjustments are available for a Russian party to a transaction if the other party paid additional tax to the tax authorities based on the results of a transfer-pricing audit. Major Russian taxpayers can enter into advance pricing agreements.

**Controlled foreign companies.** Effective from 1 January 2015, controlled foreign company (CFC) rules apply to situations in which a Russian taxpayer (company or individual) controls a company resident in a foreign jurisdiction and that foreign subsidiary has not distributed its profits.

*Definition of CFC.* CFCs are companies that are tax resident in foreign jurisdictions and that are controlled by Russian tax-resident individuals and companies.

The definition of CFCs also covers structures that are not legal entities and that are controlled by Russian tax residents.

Under the CFC rules, the tax base of Russian taxpayers includes certain profits of CFCs if the CFCs do not distribute their profits to the Russian shareholders.

*Definition of control.* Control is defined as the following:

- The ability of a Russian legal entity or individual to exert a decisive influence on decisions affecting a controlled company's distribution of profit
- The ability to influence the entity that manages such structure's assets with respect to decisions on profit distribution (in the case of structures that are not legal entities)

*Controlling persons.* Controlling persons are defined as the following persons:

- A person whose direct and/or indirect participating interest in the organization in conjunction with a spouse, children or other related persons is more than 25%
- A person who directly and/or indirectly owns more than 10% of a company, if all Russian tax residents, jointly with spouses, children and other interdependent persons, have a direct and/or indirect interest of over 50%

During a transitional period (until 1 January 2016), the 25% and 10% thresholds mentioned in the bullets above may be set at 50%.

*Profits of CFCs not subject to Russian profits tax.* The profits are the following CFCs are not subject to Russian profits tax:

- Non-commercial organizations that do not distribute profits.
- Companies in the Eurasian Economic Union.
- Companies registered in jurisdictions that exchange information with the Russian Federation for tax purposes and impose an effective tax rate of over 75% of the weighted average tax rate for tax on profit of organizations that is calculated based on standard Russian corporate tax rates applicable to dividends and other income of CFCs.
- Foreign companies involved in projects under production-sharing, concession and similar agreements, provided that these companies' profits exceed 90% of total income.

- Foreign structures without a legal entity (for example, trusts). Such structures are excluded only if they are unable to distribute profits to participants or beneficiaries under the law or constitutional documents (bylaws or founding documents for the structures).
- Banks or insurance companies operating in a territory that exchanges information with the Russian Federation.
- Eurobond issuers, provided that the interest on the underlying loan is at least 90% of the issuer's income.
- "Active" companies (if no more than 20% of their income is passive income). The list of passive income includes, but is not limited to, dividends, royalties, interest, lease or rental income, capital gains and income from the provision of consulting, marketing, legal and other services. The list of passive income is open-ended.
- Operators of a project on the continental shelf and shareholders of such operators.

*Notification obligations.* The draft law provides two types of notification obligations, which are notification of participation in foreign organizations and notification of CFCs.

Taxpayers must notify the tax authorities of their participation in the following:

- Foreign organizations in which they have an interest of over 10%
- Foreign structures that were not formed as legal entities, including cases in which the taxpayer is a founder of such a structure or is a beneficial owner of income (profit) distributions

*Profits of CFCs Taken into Account.* Profit of CFCs are taken into account in determining the tax base of a shareholder if the profits exceed RUB10 million (approximately USD160,000). The draft law proposes a methodology of calculation that is based on dividing the types of income into "active" and "passive."

The draft law provides that profits of a CFC in a foreign currency must be translated into rubles using the average exchange rate value for the calendar year. The proposed fine for non-payment or underpayment of taxes is 20% of the unpaid tax on the profit of the CFC, but not less than RUB100,000 (approximately USD1,600).

## F. Treaty withholding tax rates

Russian legislation currently states that the double tax treaties of the former USSR are still valid. The withholding rates under the USSR's treaties and the Russian Federation's treaties are listed in the following table. Like most double tax treaties, the treaty rates do not apply if domestic withholding tax rates (see Section A) are lower.

	Dividends %	Interest %	Royalties %

- (a) The 5% rate applies if the recipient of the dividends has invested at least USD40,000 or the equivalent in local currency in the payer's charter capital. The 10% rate applies to other dividends.
- (b) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) holds directly at least 10% of the capital of the payer of the dividends and if the participation exceeds USD100,000. The 15% rate applies to other dividends.
- (c) The 10% rate applies if the beneficial owner of the dividends owns at least 10% of the voting shares of the payer or, in the case of a Russian payer that has not issued voting shares, at least 10% of the statutory capital. The 15% rate applies to other dividends.
- (d) The 0% rate applies to royalties for the following:
- Copyrights of cultural works (excluding films and television rights)
  - The use of computer software
  - The use of patents or information concerning industrial, commercial or scientific experience, if the payer and the beneficiary are not related persons
- The 10% rate applies to other royalties.
- (e) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer more than USD100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.
- (f) The 5% rate applies to dividends paid to shareholders that have invested in the payer at least EUR100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.
- (g) The 0% rate applies if the recipient of the interest is the other contracting state or a bank that is more than 51%-owned by the other contracting state. The 15% rate applies to other interest payments.
- (h) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 30% of the capital of the payer of the dividends and if the foreign capital invested exceeds USD100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable. The 12% rate applies to other dividends.
- (i) The 5% rate applies if the recipient of the dividends has invested in the payer at least FF500,000 (EUR76,225) or the equivalent amount in other currency and if the beneficiary of the dividends is a company that is exempt from tax on dividends in its state of residence. The 10% rate applies if only one of these conditions is met. The 15% rate applies to other dividends.
- (j) The 5% rate applies to dividends paid to corporations that hold a 10% or greater interest in the capital of the payer and have invested in the payer at least EUR80,000 or the equivalent amount in rubles. The 15% rate applies to other dividends.

- (k) The 0% rate applies if the recipient of the interest is the government of the other contracting state, including local authorities thereof, a political subdivision or the central bank. The 15% rate applies to other interest payments.
- (l) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer at least USD100,000 or the equivalent amount in other currency. The 10% rate applies to other dividends.
- (m) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
- (n) The 5% rate applies if the recipient of the dividends directly holds at least 10% of the capital of the payer and has invested in the payer more than EUR80,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.
- (o) The 15% rate applies to royalties for copyrights, including film and radio broadcasts. The 10% rate applies to other royalties.
- (p) The 10% rate applies if the recipient of the dividends has invested more than FF1 million (EUR152,449) in the payer. The 15% rate applies to other dividends.
- (q) Royalties are subject to tax in the country of the payer in accordance with that country's law.
- (r) The 5% rate applies if the beneficial owner of the dividends owns at least USD500,000 of the shares of the payer. The 10% rate applies to other dividends.
- (s) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested at least ECU75,000 or an equivalent amount in local currency. The 15% rate applies to other dividends.
- (t) The 0% rate applies if the recipient of the interest is the government of the other contracting state including local authorities thereof, an instrumentality of that state that is not subject to tax in that state or the central bank. The 10% rate applies to other interest payments.
- (u) The 10% rate applies if the beneficial owner is a company that, for an uninterrupted period of two years before the payment of the dividends, owned directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
- (v) The 0% rate applies if the interest is derived and beneficially owned by the other contracting state, a political or administrative subdivision or a local authority thereof or any institution specified and agreed to in an exchange of notes between the competent authorities of the contracting states in connection with any credit granted or guaranteed by them under an agreement between the governments of the contracting states. The 10% rate applies to other interest payments.
- (w) The 10% rate applies if the beneficial owner of the dividends owns at least 30% of the charter capital of the payer and has directly invested at least USD100,000 in the charter capital of the payer. The 15% rate applies to other dividends.
- (x) The 5% rate applies to dividends paid to corporations that hold at least 30% of the capital of the payer and have invested in the payer at least USD100,000 or the equivalent amount in local currency. The 10% rate applies to other dividends.
- (y) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) has invested at least ECU100,000 in the charter capital of the payer and if the country of residence of the beneficial owner of the dividends does not impose taxes on the dividends. The 10% rate applies if one of these conditions is met. The 15% rate applies to other dividends.
- (z) The treaty does not provide relief for Spanish companies receiving dividends, interest or royalties from Russian sources if more than 50% of the Spanish company is owned (directly or indirectly) by non-Spanish residents.
- (aa) The 10% rate applies if the beneficial owner of the dividends owns at least 25% of the charter capital of the payer. The 15% rate applies to other dividends.
- (bb) The 5% rate applies to corporations that hold 100% (at least 30% if the recipient corporation is a part of a joint venture) of the payer and that have invested in the payer at least USD100,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.
- (cc) If the competent authorities agree, the 0% rate applies to dividends paid to the following:

- A pension fund
  - The government of a contracting state, political subdivision or local authority
  - The central (national) bank
- The 5% rate applies if the recipient of the dividends is a corporation that holds at least 20% of the capital of the payer and if, at the time the dividends become due, the amount of the recipient's investment exceeds CHF 200,000. The 15% rate applies to other dividends.
- (dd) The 5% rate applies to loan interest paid by one bank to another bank. The 10% rate applies to other interest.
- (ee) The 5% rate applies to dividends paid to corporations that have invested in the payer at least USD50,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.
- (ff) The 5% rate applies to dividends paid to corporations holding at least 10% of the voting shares of the payer or, in the case of a Russian payer that has not issued voting shares, at least 10% of the statutory capital. The 10% rate applies to other dividends.
- (gg) The 10% rate applies to dividends paid to shareholders that have invested at least the equivalent of USD10 million in the payer. The 15% rate applies to other dividends.
- (hh) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer at least USD100,000 or the equivalent amount in local currency. The 15% rate applies to other dividends.
- (ii) The 15% rate applies to interest on certain types of state and municipal securities; the 20% rate applies to other interest.
- (jj) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer and have invested in the payer at least USD100,000 or an equivalent amount in local currency. The 15% rate applies to other dividends.
- (kk) The 4.5% rate applies to royalties paid to entities for copyrights of cinematographic films, programs and recordings for radio and television broadcasting. The 13.5% rate applies to royalties paid to entities for copyrights of works of literature, art or science. The 18% rate applies to royalties paid to entities for patents, trademarks, designs or models, plans, secret formulas or processes and computer software, as well as for information relating to industrial, commercial or scientific experience.
- (ll) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer. The 10% rate applies to other dividends.
- (mm) The 0% rate applies if the recipient of the interest is the other contracting state or local authorities and governmental agencies of that state. The 5% rate applies to other interest payments.
- (nn) The 5% rate applies to dividends paid to corporations that hold at least 10% of the capital of the payer and have invested in the payer at least AUD700,000 or an equivalent amount in local currency and if dividends paid by a Russian company are exempt from tax in Australia. The 15% rate applies to other dividends.
- (oo) The 0% rate applies if the following circumstances exist:
- The interest is derived and beneficially owned by the other contracting state, a political or administrative subdivision or a local authority thereof.
  - The interest is derived and beneficially owned by the central bank or a similar institution specified and agreed to in an exchange of notes between the competent authorities of the contracting states.
  - The interest is derived with respect to the deferral of payment under commercial credits.
- The 10% rate applies to other interest payments.
- (pp) The 5% rate applies to royalties paid for the right to use industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (qq) The 0% rate applies if the interest is paid on a long-term loan (seven or more years) issued by a bank or other credit institution or if the recipient of the interest is the government of the other contracting state, a political subdivision or a local authority.
- (rr) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (ss) The 5% rate applies to dividends paid to corporations that hold at least 10% of the capital of the payer and that have invested in the payer at least USD100,000 or the equivalent amount in other currency. The 10% rate applies to other dividends.
- (tt) The 5% rate applies to dividends paid to corporations that hold at least 25% of the capital of the payer.

- (uu) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is a contracting state, a political subdivision or the central bank of a contracting state.
  - The interest is paid by any of the entities mentioned in the preceding bullet.
  - The interest arises in the Russian Federation and is paid with respect to a loan for a period of not less than three years that is granted, guaranteed or insured, or a credit for such period that is granted, guaranteed or insured, by Banco de México, S.N.C., Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco Nacional de Obras y Servicios Públicos, S.N.C., or interest is derived by any other institution, as may be agreed from time to time between the competent authorities of the contracting states.
  - The interest arises in Mexico and is paid with respect to a loan for a period of not less than three years that is granted, guaranteed or insured, or a credit for such period that is granted, guaranteed or insured, by The Bank for Foreign Trade (Vneshtorgbank) or The Bank for Foreign Economic Relations of the USSR (Vnesheconombank), or the interest is derived by any other institution, as may be agreed from time to time between the competent authorities of the contracting states.
- (vv) The 5% rate applies if the beneficial owner of the dividends is the government of the contracting state or if the beneficial owner of the dividends holds directly at least 15% of the capital of the payer of the dividends and has invested in the payer at least USD100,000. The 10% rate applies to other dividends.
- (ww) The 0% rate applies if the beneficial owner of the interest is the government of a contracting state, a government body of a contracting state, the central bank or the Export-Import bank of Thailand. The 10% rate applies if interest is received by an institution that has a license to carry on banking operations (Russian Federation) or a financial institution including an insurance company (Thailand).
- (xx) The 10% rate applies if the beneficial owner of the dividends (except for a partnership) holds directly at least 10% of the capital of the payer of the dividends and if the participation exceeds USD100,000. The 15% rate applies to other dividends.
- (yy) The 0% rate applies if any of the following conditions is met:
- The beneficial owner is a government of a contracting state, the central bank of a contracting state, a political subdivision of a contracting state or a local authority.
  - The interest is paid by the government of a contracting state, the central bank of a contracting state, a political subdivision of a contracting state or a local authority.
  - The interest is paid with respect to a loan granted or guaranteed by a public financial institution with the objective to promote exports and development.
- The 5% rate applies to interest on bank loans. The 10% rate applies to other interest.
- (zz) The 10% rate applies to fees for technical assistance. The 15% rate applies to royalties.
- (aaa) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
- (bbb) The 10% rate applies if the beneficial owner of the dividends holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
- (ccc) The 0% rate applies if the recipient of the interest is the government of the other contracting state or the central bank. The 15% rate applies to other interest.
- (ddd) The 5% rate applies if the beneficial owner of the dividends holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (eee) The 5% rate applies to royalties paid for the right to use industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (fff) The 5% rate applies if the beneficial owner of the dividends (except for a partnership) directly owns at least 25% of the capital of the payer and has invested more than USD75,000 in the capital of the payer. The 10% rate applies to other dividends.
- (ggg) The 0% rate applies if any of the following conditions is met:
- The recipient of the interest is the government of a contracting state, or a political subdivision or local authority of a contracting state.

- The relevant loan is secured by a contracting state, or a political subdivision or local authority of a contracting state.
  - The loan is issued by a bank or other credit institution of a contracting state.
- (hhh) The 0% rate applies if the dividends are paid to the government of a contracting state, a local authority or political subdivision of a contracting state, the central bank or other state institutions, as agreed by the competent authorities.
- (iii) The 0% rate applies if any of the following conditions is met:
  - Interest is paid by the government or local authorities of a contracting state.
  - Interest is paid to the government or local authorities of a contracting state or to the central bank.
  - Interest is paid on loans issued under agreements between the governments.
- (jjj) The 0% rate applies to interest arising in a contracting state and paid to the government of the other contracting state, a political subdivision thereof or an agency (including a financial institution) wholly owned by that government or political subdivision, unless the next sentence applies. Interest from securities, bonds or debentures issued by the government of a contracting state, a political subdivision thereof or an agency (including a financial institution) wholly owned by that government or political subdivision is taxable only in that state.
- (kkk) The 0% rate applies to interest paid to the government of a contracting state, or a political subdivision or local authority of a contracting state.
- (lll) The 0% rate applies to dividends paid to any of the following:
  - The government, a political subdivision or a local authority of a contracting state
  - The central bank
  - Other government agencies or financial institutions, as agreed by the competent authorities
- (mmm) The 10% rate applies if the beneficial owner holds directly at least 20% of the total capital of the company paying the dividends. The 15% applies to other dividends.

The tax treaty with Laos passed all hearings in parliament, but the President rejected its ratification.

The Russian Federation has signed but not yet ratified tax treaties with China, Estonia, Ethiopia, Georgia, Mauritius and Oman.

The Russian Federation is negotiating tax treaties with Barbados, Bosnia and Herzegovina, Ecuador, Fiji and Moldova.

The Russian Federation is renegotiating its tax treaty with the Netherlands.

- (a) This tax is a final tax.  
 (b) A reduced 5% rate applies to dividends received by Rwandan and East African Community citizens from entities listed on the Rwanda Stock Exchange.  
 (c) This is a recoverable advance tax that applies to taxpayers without a tax clearance certificate issued by the Rwanda Revenue Authority.  
 (d) This is a recoverable advance tax that applies to suppliers of goods and services to public institutions.  
 (e) This applies only to construction projects.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax is payable by companies, cooperative societies, foreign companies or their branches, autonomous public enterprises, associations and any other business entities that engage in for-profit business activities. Resident entities are subject to corporate income tax on worldwide income. Nonresident entities are subject to corporate income tax on income derived through a permanent establishment. Nonresident entities

without a permanent establishment in Rwanda are not subject to corporate income tax, but they may be subject to other taxes in Rwanda.

An entity is considered to be resident in Rwanda during a tax year if it satisfies any of the following conditions:

- It is a company or an association established according to Rwandan laws.
- It has its place of effective management in Rwanda at any time during the tax year.
- It is a Rwandan government company.

**Rates of corporate tax.** The corporate tax rate is 30%.

**Capital gains.** Rwanda imposes a separate tax on capital gains arising from the disposal of immovable commercial property. Gains derived from disposals of other business assets are aggregated with other income and are taxed at the normal corporate income tax rate. Gains from disposal of shares listed on the Rwanda Stock Exchange are exempt from tax.

**Administration.** A company's year of assessment (tax year) is the calendar year. A company wishing to maintain a tax year other than the calendar year must obtain prior approval from the Minister of Finance.

Companies must make installment payments, which are each equal to 25% of the tax due for the preceding tax year. The payment dates are 30 June, 30 September and 31 December. The installment payments are subtracted from tax due at the end of the financial year. Any overpayment is generally treated as a prepayment of future income tax liabilities or other tax liabilities. However, a company may seek a refund of the overpayment by a written request to the Commissioner General of Rwanda Revenue Authority.

Companies must file a final tax return accompanied by proof of payment of tax provided by the tax administration within three months after the end of the tax year (31 March for calendar-year taxpayers). The company calculates the tax payable on the tax return form. The tax due equals the tax payable minus installments and recoverable withholding tax paid. Any tax due must be paid with the return.

**Dividends.** Dividends are subject to a final withholding tax at a rate of 15%. However, a reduced 5% rate applies to dividends received by Rwandan and East African Community citizens from entities listed on the Rwanda Stock Exchange.

**Foreign tax relief.** Relief for foreign taxes paid is granted in accordance with tax treaties with other countries. If foreign tax is paid to a country that does not have a tax treaty with Rwanda, the tax paid may be subtracted from tax payable in Rwanda, subject to certain restrictions.

### **C. Determination of trading income**

**General.** Taxable income is accounting income adjusted for non-taxable income and for nondeductible expenses. Expenses are deductible if they are incurred wholly and exclusively in the production of income.

**Provisions.** General and specific provisions, which are reflected in the computation of financial accounting income, are generally not deductible for tax purposes. However, banks and financial institutions may deduct specific provisions for bad and doubtful debts in accordance with the prudential guidelines issued by Rwanda's central bank.

**Tax depreciation.** Depreciation charged in the financial statements is deductible for tax purposes, subject to limits that are set forth in the tax law or are determined by the Minister of Finance from time to time. The following are the current allowable depreciation rates:

Asset class	Rate (%)
Buildings (excluding land) including built-in equipment and plant	5
Intangible assets	10
Computer equipment and accessories	50
All other business assets	25

**Groups of companies.** The income tax law does not allow the filing of consolidated returns, the combining of profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax, on the supply of goods and services in Rwanda and on imports of goods and services	
Standard rate	18%
Other rate	0%
Social security contributions; paid by	
Employer	5%
Employee	3%
Trade licenses; varies by nature and location of business; maximum amount	RWF240,000

#### E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Rwanda is the Rwandese franc (RWF). Rwanda does not impose foreign-exchange controls.

**Debt-to-equity rules.** Interest paid on related-party loans exceeding four times equity does not qualify as a deductible expense for companies other than commercial banks and insurance companies.

#### F. Tax treaties

Rwanda has entered into double tax treaties with Mauritius and South Africa. Its treaty with Mauritius was cancelled in January 2013. However, subsequently in 2013, Rwanda signed a new tax treaty with Mauritius, but this treaty has not yet been ratified.

- (a) This rate applies only to companies that are in good standing with the Inland Revenue Department. Otherwise, the rate is 33.3%.
- (b) This is a final tax.

## **B. Taxes on corporate income and gains**

**Corporate income tax.** Companies that are resident in St. Lucia are subject to corporation tax on their worldwide income, regardless of whether the income is remitted to St. Lucia. Nonresident companies carrying on business through a branch pay tax on St. Lucia-source income only.

A company is considered to be resident in St. Lucia if it is incorporated in St. Lucia. A company incorporated outside of St. Lucia is also considered resident in St. Lucia if its management and control are located in St. Lucia.

Income is considered to be St. Lucia-source if the property that constitutes the source is physically located in St. Lucia. Nonresident companies that derive income from St. Lucia (other than through a branch) are not subject to tax in St. Lucia. However, the income is subject to withholding tax when it is paid.

**Rates of corporate tax.** All domestic companies that are in good standing with the Inland Revenue Department, including branches of nonresident companies, are subject to tax at a basic rate of 30%. Companies that are not in good standing are subject to tax at a rate of 33.3%.

International Business Companies and International Banks established in the International Business and Financial Services Sector may elect to be exempted from income tax or be liable to tax on their gains and profits at a rate of 1%.

No tax is required to be withheld from dividends, interest, royalties, management fees and rents paid to nonresidents by companies operating in the International Business and Financial Services Sector.

**Capital gains.** Capital gains are not taxed in St. Lucia.

**Administration.** The fiscal (income) year is the period for which the accounts of the business are normally prepared.

A corporation is required to determine its own tax liability and to prepare and file a corporation tax return within three months after the end of its fiscal year. If a return is not filed on time, the Comptroller of Inland Revenue may levy a penalty of 5% of the tax charged for that income year.

Corporations must prepay tax in three installments. These installments must be paid by 25 March, 25 June and 25 September in each year, and each tax prepayment must equal one-third of the preceding year's tax. Any balance of tax due is paid when the return is filed. Failure to pay an installment of tax is subject to a penalty of 10% of the amount of unpaid tax as well as interest at a rate of 1.25% per month. Any balance of tax not paid by the due date incurs interest at a rate of 1.25% per year for the period during which it remains unpaid.

**Dividends.** Dividends paid by companies resident in St. Lucia to nonresidents are not subject to withholding tax in St. Lucia. Dividends received by companies resident in St. Lucia from domestic and foreign companies are not included in the companies' taxable income.

**Foreign tax relief.** A tax credit is allowed for taxes paid to foreign jurisdictions by St. Lucia resident companies on profits, income or gains earned from such foreign jurisdictions, regardless of whether St. Lucia has entered into a double tax treaty with the foreign jurisdiction. This credit is allowed up to the amount of the St. Lucia taxes payable on the income.

### C. Determination of trading income

**General.** Taxable income is determined on the basis of accounts prepared in accordance with International Financial Reporting Standards, subject to specific adjustments identified in the Income Tax Act.

**Inventories.** The authorities generally accept a method of valuation of inventory that conforms to standard accounting practice in the trade or business, provided it is applied consistently. Average cost or first-in, first-out (FIFO) are the generally accepted methods.

**Provisions.** Reserves or provisions of a general nature for doubtful accounts receivable, inventory shrinkage, inventory obsolescence and other items are not allowable. However, write-offs of specific amounts or balances are generally allowed if these amounts are calculated in accordance with the guidelines issued by the Inland Revenue Department.

**Tax depreciation.** Depreciation and amortization reported in the financial statements are not allowed as deductions in calculating taxable income. However, a company may claim capital allowances. Annual allowances of between 2.5% and 33.3% are granted on the original cost of fixed assets, calculated on a declining balance. An initial allowance of 20% is also granted with respect to capital expenditure.

**Relief for losses.** Losses may be carried forward five years to offset income derived in those years. However, for any year, the deduction with respect to the prior-year losses may not exceed one-half of the taxable income for that year. Losses may not be carried back.

**Groups of companies.** A member of a group of companies (the surrendering company) may surrender current trading losses to another member of the group (the claimant company). The claimant company may then claim a deduction for the losses in calculating its taxable income. This deduction may not exceed half of the taxable income of the claimant company.

To qualify for group relief, the surrendering company and the claimant company must be resident in St. Lucia and must be members of the same group throughout the fiscal year for which group relief is claimed. Two companies are members of the same group if one is a 51% subsidiary of the other or both are 51% subsidiaries of a third company. In determining whether a company is a 51% subsidiary of another company, share capital is excluded if profits from sales of such shares would be trading receipts of the direct owner of the shares. Share capital is also excluded if it is owned directly or indirectly in a company not resident in St. Lucia. In addition, the parent company must be beneficially entitled to at least 51% of the profits available for

distribution to shareholders of the subsidiary and to at least 51% of the subsidiary's assets available for distribution to shareholders of the subsidiary on a winding up.

Trading losses may not be surrendered to the extent that they include the following:

- The surrendering company's capital allowances
- Expenses payable to a group member that are claimed as deductions but are not included in the income of that group member for the same fiscal year

Group relief is available only if the claimant company has used its capital allowances and offset its loss carryforwards against its current profits. A claim for group relief must be made within two years after the end of the surrendering company's fiscal year, and the surrendering company must consent to the relief. Group relief is not available to International Business Companies, International Banks and other companies granted special tax concessions.

Consolidated group returns may not be filed with the tax authorities.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the supply of goods and services in St. Lucia and on goods imported into St. Lucia	
Standard rate	15
Hotel accommodation and specified goods and services supplied by providers in the tourism sector	10
Basic food items	0
Excise tax, on imports of vehicles; this tax is imposed in addition to the VAT	15 to 85
Import duty	5 to 45
National insurance contributions, on monthly insurable earnings up to XCD5,000; paid by	
Employer	5
Employee	5
Self-employed individual	10

#### E. Miscellaneous matters

**Foreign-exchange controls.** St. Lucia does not impose foreign-exchange controls.

**Debt-to-equity rules.** St. Lucia does not impose thin-capitalization rules.

**Anti-avoidance legislation.** Anti-avoidance provisions may be applied to transactions effected for the main purpose of avoidance or reduction of tax liability.

#### F. Treaty withholding tax rates

The following treaty withholding tax rates apply to income received in St. Lucia.

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Caribbean Community and Common Market (a)	0	15	15
Switzerland (b)	– (c)	– (d)	0

- (a) This is the Caribbean Community and Common Market (CARICOM) double tax treaty. Income is taxed in the country of source only.
- (b) This is the 1954 treaty between the United Kingdom and Switzerland, which was extended by exchange of notes to St. Lucia under Article XXI.
- (c) The treaty does not contain a dividend article. Consequently, the normal Swiss withholding tax rate applies.
- (d) The treaty does not contain an interest article. Consequently, the normal Swiss withholding tax rate applies.

For payments from St. Lucia, the following treaty withholding tax rates apply (however, see the paragraph after the footnotes).

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Caribbean Community and Common Market (a)	0	15	15
Switzerland (b)	0 (c)	15 (d)	25
Non-treaty countries	0	15	25

- (a) This is the CARICOM double tax treaty. Income is taxed in the country of source only.
- (b) This is the 1954 treaty between the United Kingdom and Switzerland which was extended by exchange of notes to St. Lucia under Article XXI.
- (c) The treaty does not contain a dividend article. Consequently, the normal withholding tax rate applies.
- (d) The treaty does not contain an interest article. Consequently, the normal withholding tax rate applies.

No tax is withheld from dividends, interest, management fees and royalties paid to nonresidents by International Business Companies or International Banks.

**A. At a glance**

Corporate Income Tax Rate (%)	
Companies Engaged in Natural Gas Investment Activities	30 to 85 (a)
Entities Engaged in Oil and Other Hydrocarbon Production	85
Other Companies	20
Capital Gains Tax Rate (%)	20
Withholding Tax (%) (b)	
Dividends	5
Interest	5
Royalties	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (c)

(a) For further details, see Section B.

(b) For further details and a complete listing of withholding taxes, see Section B. The withholding tax rates in Saudi Arabia range from 5% to 20%.

(c) See Section C.

**B. Taxes on corporate income and gains**

**Income tax.** Income tax is assessed on profits of the following:

- A resident capital company (only on profits attributable to shares owned by non-Saudi or non-Gulf Cooperation Council [GCC] shareholders; see below)
- A resident non-Saudi or non-GCC natural person who carries on a business in Saudi Arabia
- A nonresident company that carries on business in Saudi Arabia through a permanent establishment
- A person engaged in the field of natural gas investment
- A person engaged in the production of oil and hydrocarbon materials
- A nonresident that derives income subject to tax from sources in Saudi Arabia (tax is assessed through withholding tax)

Partners in personal companies (that is, general partnerships, unincorporated joint ventures and limited partnerships) are subject to tax rather than the personal companies themselves.

For income tax purposes, non-Saudis do not include citizens (nationals) of countries that are the members of the Gulf Cooperation Council (GCC). Members of the GCC are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates. The share of profits attributable to interests owned by GCC nationals in a company is subject to *zakat* (see Section D). The share of profits attributable to interests owned by non-GCC nationals in that company is subject to income tax.

**Rates of tax.** Natural Gas Investment Tax (NGIT) applies to natural or legal persons (including GCC nationals and entities) engaged

in natural gas, natural gas liquids and gas condensates investment activities in Saudi Arabia. NGIT does not apply to a company engaged in the production of oil and other hydrocarbons.

The NGIT rate ranges from 30% to 85% and is determined on the basis of the internal rate of return on cumulative annual cash flows. The NGIT rate includes income tax of 30%.

Companies engaged in the production of oil and other hydrocarbons are subject to tax at a rate of 85%.

Companies not subject to NGIT or the 85% tax are taxed at a rate of 20%.

The tax holidays that were available under the previous Foreign Capital Investment Regulations have been withdrawn. However, projects that were granted tax holidays under the previous regulations continue to benefit from the tax holidays for the approved period.

**Withholding tax.** A Saudi resident entity is required to withhold tax from payments made to nonresidents that do not have a legal registration or a permanent establishment in Saudi Arabia with respect to income earned from a source in Saudi Arabia. This rule applies regardless of whether the payer is considered to be a taxpayer under the regulations and whether such payments are treated as a tax-deductible expense in the Saudi resident entity's tax declaration. Nonresident GCC nationals and entities are also subject to withholding tax rather than the *zakat* withholding tax, which applied under the previous rules.

The following are the withholding tax rates.

<b>Type of payment</b>	<b>Rate (%)</b>
Rent, payments made for technical and consulting services to unrelated parties, payments for air tickets, payments for freight or marine shipping, payments for international phone calls, dividends, interest (see next paragraph), and insurance or reinsurance premiums	5
Royalties, payments for technical and consulting services to related parties, and payments made to the head office or affiliated companies for services	15
Management fees	20
Payments for other services	15

Loan fees (interest expenses and commissions) on interbank deposits paid to nonresident banks are exempt from Saudi withholding tax if such deposits remain with the Saudi resident borrower banks for a maximum period of 90 days. Resident borrower banks are required to submit an annual statement attested by the Saudi Arabian Monetary Authority listing the names of the nonresident lending banks, their addresses, periods of lending and the amount of loan fees paid.

The party withholding the tax must register with the Department of Zakat and Income Tax (DZIT) before the settlement of the first tax payment. The party withholding the tax must settle the tax

withheld with the DZIT within the first 10 days of the month following the month in which the taxable payment is made and issue a certificate to the nonresident party. A delay fine of 1% for each 30 days of delay is computed beginning 30 days from the due date of tax until the date the tax is paid. An annual withholding tax return must be filed within 120 days following the end of the tax year.

**Capital gains.** In general, capital gains are treated as ordinary income and taxed at the regular corporate rates. Capital gains realized by nonresident shareholders on the disposal of shares in a Saudi Arabian company are subject to tax at a rate of 20%.

However, capital gains arising on the sale by non-Saudi shareholders of shares in a Saudi joint stock company traded on the Saudi stock exchange are exempt from tax if the shares (investments) were acquired after the effective date of the new tax regulations (30 July 2004).

Gains on the disposal of property other than assets used in a business activity are also exempt from tax.

**Administration.** All persons subject to tax (excluding nonresidents who derive income from a source in Saudi Arabia and are subject to final withholding tax) are required to register with the DZIT before the end of their first fiscal year. Failure to register with the DZIT results in the imposition of a fine ranging from SAR1,000 to SAR10,000.

A taxable entity that has a permanent establishment or commercial registration in Saudi Arabia must file its annual tax declaration with the DZIT based on its accounting books and records within 120 days following the end of the tax year and pay the income tax due with the tax declaration. However, the DZIT may and generally does request audited financial statements before issuing the final tax assessments.

The Saudi Arabian Income Tax Regulations require certification of annual tax declarations reporting taxable revenue in excess of SAR1 million. A locally licensed chartered accountant is required to certify the validity of the information contained in the taxpayer's return and also certify the following:

- The information contained in the declaration is taken from the taxpayer's books and records (maintained in Arabic and in Saudi Arabia) and is in accordance with such records.
- The return is prepared according to the standards, requirements and provisions of the Saudi Arabian Income Tax Regulations.

The partners of a personal company are subject to tax rather than the personal company itself. However, a personal company is required to file an information declaration within 60 days following the end of the tax year.

Fines for non-submission of tax declarations by the due date may be imposed at a rate of 1% of the total revenue, with a maximum fine of SAR20,000. A fine is also calculated based on percentages of the underpaid tax. Such a fine is payable if it exceeds the amount of the fine based on total revenue. The following are the percentages applied to underpaid tax:

- 5% of the underpaid tax if the delay is up to 30 days from the due date

- 10% of the underpaid tax if the delay is more than 30 and not more than 90 days from the due date
- 20% of the underpaid tax if the delay is more than 90 and not more than 365 days from the due date
- 25% of the underpaid tax if the delay is more than 365 days from the due date

An advance payment on account of tax for the year is payable in three installments. The installments are due by the end of the 6th, 9th and 12th months of the tax year. Each installment of advance payment of tax is calculated in accordance with the following formula:

$$25\% \times (A - B)$$

For the purposes of the above calculation, A equals the taxpayer's liability as per the tax declaration for the preceding year and B equals tax withheld at source for the taxpayer in the preceding year.

A taxpayer is not required to make advance tax payments in a year if the tax liability for the preceding year was less than SAR2 million.

A delay fine of 1% for each 30 days of delay is computed beginning 30 days from the due date of tax until the date the tax is paid.

**Dividends.** Dividends paid to nonresident shareholders are subject to withholding tax at a rate of 5% (see *Withholding tax*).

**Foreign tax relief.** Relief is not provided for foreign taxes paid (unless covered by a double tax treaty).

### C. Determination of tax payable

**Taxable profits.** Tax liabilities are assessed by the DZIT on the basis of the audited financial statements, as adjusted for tax purposes. In certain cases (for example, foreign airlines and foreign freight and land and marine transport companies operating in Saudi Arabia), tax may be assessed under the "presumptive basis." Under the presumptive basis, no financial statements are presented, and the tax liability is assessed on deemed profit calculated at rates specified in the tax regulations.

**Nondeductible expenses.** Certain expenses are not deductible in calculating taxable profit, including the following:

- Expenses not connected with the earning of income subject to tax
- Payments or benefits to a shareholder, a partner or their relatives if they constitute salaries, wages, bonuses or similar items or if they do not represent an arm's-length payment for property or services
- Entertainment expenses
- Expenses of a natural person for personal consumption
- Income tax paid in Saudi Arabia or another country
- Financial penalties and fines paid or payable to any party in Saudi Arabia except those paid for breach of contractual terms and obligations
- Payments of bribes and similar payments, which are considered criminal offenses under the laws of Saudi Arabia, even if paid abroad

**Allocation of overhead and indirect expenses.** A branch of a non-resident company cannot claim deductions for head office costs that are allocated to the branch on an estimated or allocation basis. However, certain certifiable direct costs incurred abroad are deductible.

**Technical costs.** For tax purposes, in general, technical costs are expenses that relate to engineering, chemical, geological or industrial work and research even if incurred wholly abroad by the main office or other offices. These costs are generally allowed as deductions if they can be substantiated by certain documents, such as technical services agreements, head office auditors' certificates and invoices.

Under the tax regulations, payments for technical and consultancy services rendered by third parties (including foreign shareholders, regardless of whether they are enjoying a tax holiday) are subject to withholding tax at a rate of 5%, regardless of the place of performance of services (for details regarding withholding taxes, see Section B).

**Agency fees.** In a meeting on 30 July 2001, the Council of Ministers cancelled the law governing the relationship between a foreign contractor and a Saudi service agent. A foreign contractor may now operate in Saudi Arabia and contract with government agencies without appointing a Saudi service agent. In some cases, the DZIT has contested deductions for agency fees paid to Saudi agents with respect to contracts entered into with government bodies after 30 July 2001 on the basis that they are no longer a necessary cost of doing business in Saudi Arabia.

**Contributions to foreign social insurance, pension and savings plans.** Any charge with respect to payments for foreign social insurance, employee pension plans and savings plans, and contributions to Saudi social insurance with respect to an employee's share are not deductible from Saudi-source revenue.

**Provisions and reserves.** Provisions for doubtful debts, termination benefits and other similar items are not deductible. Specific write-offs and actual employment termination benefit payments that comply with Saudi Arabian labor laws are deductible. Provisions for doubtful debts are allowed as deductible expenses for banks if they are confirmed by the Saudi Arabian Monetary Agency.

**Interest deductibility.** Deductions may be claimed for loan fees (interest expenses and commissions) incurred with respect to the earning of income subject to tax. However, the maximum deduction for loan fees is restricted to the lower of the following:

- Loan fees paid during the year
- Total of loan income plus 50% of tax-adjusted profits (excluding loan fees and loan income)

Loan fees exceeding this restriction are disallowed as a deduction and may not be carried forward to future years. Banks are excluded from the above limitation.

Saudi Arabian tax law does not contain any specific provisions on thin capitalization other than the limit on the interest deduction described above.

**Depreciation.** Depreciation is calculated for each group of fixed assets by applying the prescribed depreciation rate to the remaining value of each group at the fiscal year-end.

The remaining value for each group at the fiscal year-end is calculated as follows:

The total remaining value of the group at the end of the preceding fiscal year	X
– The depreciation charge for the preceding year	(X)
+ 50% of the cost of assets added during the current year and the preceding year	X
– 50% of the proceeds from assets disposed of during the current year and the preceding year, provided that the balance is not negative	(X)
= Remaining value for the group	<u>X</u>

The tax law provides the following depreciation rates.

Asset	Rate (%)
Land (non-depreciable)	0
Fixed buildings	5
Industrial and agricultural movable buildings	10
Factories, plant, machinery, computer hardware and application programs (computer software) and equipment, including cars and cargo vehicles	25
Expenses for geological surveying, drilling, exploration expenses and other preliminary work to extract natural resources and develop their fields	20
All other tangible and intangible depreciable assets that are not included in the above groups, such as furniture, aircraft, ships, trains and goodwill	10

Assets acquired under build-operate-transfer (BOT) or build-operate-own-transfer (BOOT) contracts must be depreciated over the period of contract or the remaining period of contract.

Cost of repairs or improvements of fixed assets are deductible, but the deductible expense for each year may not exceed 4% of the remaining value of the related asset group at year-end. Excess amounts must be added to the remaining value of the asset group and depreciated.

**Relief for losses.** Losses may be carried forward indefinitely. However, the maximum loss that can be offset against a year's profit is 25% of the tax-adjusted profits for that year. Saudi tax regulations do not provide for the carryback of losses.

If a change of 50% or more occurs in the underlying ownership or control of a capital company, no deduction is allowed for the non-Saudi share of the losses incurred before the change in the tax years following the change.

#### D. Zakat

*Zakat* is a religious levy imposed on the shareholders in Saudi Arabian companies that are Saudi or GCC nationals. In practice,

*zakat* is calculated and paid by a Saudi Arabian resident capital company on behalf of its individual or corporate shareholders. *Zakat* is levied on the *zakat* base of a resident capital company at a rate of 2.5%. The *zakat* base is broadly calculated as capital employed (for example, share capital and retained earnings) that is not invested in fixed assets, long-term investments and deferred costs, as adjusted by net results of operations for the year that is attributable to Saudi or GCC shareholders. Complex rules apply to the calculation of *zakat* liabilities, and it is therefore suggested that *zakat* payers seek specific advice suited to their circumstances.

## E. Miscellaneous matters

**Foreign-exchange controls.** Saudi Arabia does not impose foreign-exchange controls.

**Supply and erection contracts.** Profits from “supply only” operations to Saudi Arabia are exempt from income tax (whether the contract is made inside or outside Saudi Arabia) because the supplier trades “with” but not “in” Saudi Arabia. The net profits of operations that include supply, erection or maintenance are subject to tax, and the contractors are required to register with the DZIT and submit a tax declaration in accordance with the tax regulations.

The following information must generally be submitted in support of the cost of imported materials and equipment:

- Invoices from the foreign supplier
- Customs clearance document
- If the supplying entity is the head office of the Saudi Arabian branch, a certificate from the external auditor of the head office confirming that the cost claimed is equal to the international market value of the equipment supplied (usually the contracted selling price)

In general, no profit results in the Saudi Arabian books on materials and equipment supplied, because the revenue from the sale of equipment equals the cost based on the sales value declared for customs.

**Subcontractors.** Payments to subcontractors, reported by a taxpayer in its tax return, are subject to close scrutiny by the DZIT. The taxpayer is expected to withhold tax due on payments to nonresident subcontractors and to deposit it with the DZIT, unless the taxpayer can provide a tax file number or tax clearance certificate as evidence that such subcontractor is settling its tax liability.

Tax is not required to be withheld from payments to subcontractors resident in Saudi Arabia. However, government procurement regulations provide for the retention of 10% of the contract value until the completion of the statutory formalities including the submission of the certificate from the DZIT.

**Imports from head office and affiliates.** A Saudi mixed company is expected to deal on an arm’s-length basis with its foreign shareholders or any company affiliated with its foreign shareholders. The company may be required to submit to the DZIT a certificate from the seller’s auditors confirming that the materials and goods supplied to the Saudi Arabian company were sold at the

international market price prevailing at the date of dispatch. This requirement also applies to foreign branches importing materials and goods from the head office for the fulfillment of their Saudi contracts.

## **F. Tax treaties**

Saudi Arabia has entered into double tax treaties with Austria, Bangladesh, Belarus, China, Czech Republic, France, Greece, India, Ireland, Italy, Japan, Korea (South), Malaysia, Malta, the Netherlands, Pakistan, Poland, Romania, the Russian Federation, Singapore, South Africa, Spain, Syria, Tunisia, Turkey, Ukraine, the United Kingdom, Uzbekistan and Vietnam. These tax treaties are in effect.

Saudi Arabia has signed double tax treaties that are in force but not yet effective with Hungary and Luxembourg. These tax treaties are expected to become effective in the near future.

Saudi Arabia is negotiating treaties with Albania, Algeria, Australia, Barbados, Bosnia and Herzegovina, Ecuador, Egypt, Ethiopia, the Hong Kong SAR, Jersey, Jordan, Kazakhstan, Kyrgyzstan, Mexico, Morocco, Portugal, Sri Lanka, Sudan, Tajikistan, Turkmenistan and Venezuela.

Saudi Arabia has also entered into limited tax treaties with the United Kingdom, the United States and certain other countries for the reciprocal exemption from tax on income derived from the international operation of aircraft and ships.

The Ministry of Finance has announced its prescribed method for the availing of tax treaty benefits such as reduced withholding tax rates or exemptions with respect to payments to residents in a country with which Saudi Arabia has entered into a double tax treaty. Circular 3328/19 requires that tax is withheld on all payments to nonresidents at the rates required under domestic tax law (without recourse to the double tax treaty). To benefit from a reduced withholding tax rate or exemption, the Saudi Arabian resident taxpayer (that is, the withholder) must submit a request for refund of "overpaid" tax to the DZIT together with supporting materials (for example, the tax residency certificate of the non-resident).

In August 2013, the DZIT issued Circular 5068/16/1434, which allows Saudi resident entities to claim exemption or withhold tax based on the beneficial rates specified in the tax treaties by submitting prescribed documents. The circular has provided significant relief to the Saudi entities because it allows them to claim treaty benefits by submitting prescribed documents as opposed to settling withholding tax and requesting a refund from the DZIT as per the earlier Circular 3328/19.

The table below shows the maximum withholding rates for dividends, interest and royalties provided under Saudi Arabia's double tax treaties that were available at the date of writing. To benefit from the advantageous rates under the double tax treaties, additional conditions may be required (for example, the recipient is required to be the beneficial owner of the related gain). Readers should obtain detailed information regarding the treaties before engaging in transactions.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Austria	5	5 (a)	10
Bangladesh	10	7.5	10
Belarus	5	5	10
China	5	5	10
Czech Republic	5	0	10
France	0/5 (b)	0/5 (b)	0/15 (b)
Greece	5	5	10
India	5	10	10
Ireland	5	0	5/8 (c)
Italy	5	5	10
Japan	5	10	5/10 (c)
Korea (South)	5	5	5/10 (c)
Malaysia	5	5	8
Malta	5	0	5/7 (c)
Netherlands	5	5	7
Pakistan	5	10	10
Poland	5	5	10
Romania	5	5	10
Russian Federation	5	5	10
Singapore	5	5	8
South Africa	5	5	10
Spain	0/5 (d)	5	8
Syria	0	7.5	15
Tunisia	5	2.5/5 (h)	5
Turkey	5	10	10
Ukraine	5	10	10
United Kingdom	5/15 (e)	0	5/8 (c)
Uzbekistan	7	7	10
Vietnam	5/12 (f)	10	7.5/10 (g)
Non-treaty countries	5	5	15

- (a) A 0% rate generally applies to payments to Austrian government bodies.
- (b) These rates do not apply if the income is effectively attached to activities carried on by the recipient in Saudi Arabia.
- (c) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (d) The 0% rate applies if the Spanish company receiving the dividends owns at least 25% of the share interests in the Saudi Arabian company.
- (e) The 5% rate applies to dividends beneficially owned by the central bank or by an entity that is wholly owned by the government of a contracting state.
- (f) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 50% of the capital of the company paying the dividends or has invested USD20 million or more or any equivalent currency in the capital of the company paying the dividends.
- (g) The 7.5% rate applies to royalties paid for the rendering of services or assistance of a technical or managerial nature. The higher rate applies to other royalties.
- (h) The 2.5% rate applies to interest paid to banks.

## A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (b)
Branch Tax Rate (%)	30 (a)
Withholding Tax (%)	
Dividends and Nondeductible Expenses	10 (c)
Directors' Fees	16
Interest	6/8/16/20 (d)
Royalties from Patents, Know-how, etc.	20
Payments to Nonresidents for Certain Services and Activities	20 (e)
Branch Remittance Tax	10 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) If the company does not derive a taxable profit for a given year, minimum tax applies. The minimum tax equals 0.5% of the turnover of the preceding tax year. For example, the minimum tax for 2015 is determined based on the annual turnover for 2014. The minimum tax may not be less than XOF500,000 or more than XOF5 million.
- (b) In certain circumstances the tax is deferred or reduced (see Section B).
- (c) See Section B for special rules applicable to certain dividends, and see Section C for a list of nondeductible expenses.
- (d) The 6% rate applies to interest on long-term bonds. The 8% rate applies to bank interest. The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.
- (e) This tax applies to technical assistance fees and other types of remuneration paid to nonresident companies and nonresident individuals that do not have a permanent establishment in Senegal. The rate is 15% for payments to French individuals or corporations.
- (f) This rate may be modified by a tax treaty. See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Senegalese companies are taxed on the basis of the territoriality principle. As a result, companies carrying on a trade or business outside Senegal are not taxed in Senegal on the related profits. Foreign companies developing activities in Senegal are subject to Senegalese corporate tax on Senegalese-source profits only.

**Tax rates.** The corporate income tax rate is 30%. The minimum tax (*impôt minimum forfaitaire*, or IMF) payable equals 0.5% of the annual turnover. The minimum tax may not be less than XOF500,000 or more than XOF5 million.

Unless otherwise stipulated in a double tax treaty, the profits realized in Senegal by branches of foreign companies that have not been reinvested in Senegal are deemed to be distributed and are accordingly subject to a 10% withholding tax.

**Capital gains.** Capital gains are generally taxed at the regular corporate tax rate. The tax, however, can be deferred if the proceeds are used to acquire new fixed assets in Senegal within three years or in the event of a merger (or other corporate acquisition).

If the business is totally or partially transferred or discontinued, only one-half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gain is taxed if the event occurs five years or more after the business was begun or purchased.

Capital gains on sales or transfers of land and buildings are also subject to land tax (see Section D).

**Administration.** The tax year is the calendar year. Companies must file their tax returns by 30 April of the year following the tax year.

Corporate tax must be paid in two installments (each equal to one-third of the preceding year's tax) by 15 February and 30 April. The 15 February installment may not be less than the amount of the minimum tax. The balance must be paid by 15 June.

Late payments are subject to interest at a rate of 5% of the tax due. Each additional month of delay results in additional interest of 0.5%.

**Dividends paid.** Dividends paid are subject to a 10% withholding tax.

Dividends distributed by a Senegalese parent company that consist of dividends received from a Senegalese subsidiary that is at least 10% owned are not subject to dividend withholding tax on the second distribution.

**Foreign tax relief.** In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Senegalese tax under the territoriality principle is taxable net of the foreign tax. However, the tax treaty with France provides a tax credit for French tax paid on dividends.

## **C. Determination of taxable income**

**General.** Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the Accounting Plan of the Organization for the Harmonisation of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are partially deductible or nondeductible:

- Foreign head-office expenses, of which the deduction is limited to 20% of Senegalese taxable profits before deduction of foreign head-office expenses (unless otherwise provided for by tax treaties)
- The amount of interest paid to shareholders in excess of three percentage points above a standard annual rate set by the central bank and the amount of interest on loans in excess of the capital stock amount
- Certain specific charges over specified limits
- Taxes, penalties and gifts

**Inventories.** Inventory is normally valued at the lower of cost or market value.

**Provisions.** In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they are related to clearly specified losses or to expenses that are probably going to be incurred and if they appear in the financial statements and in a specific statement in the tax return.

**Participation exemption.** A parent company may exclude from its tax base for corporate income tax purposes 95% of the gross dividends received from a subsidiary if all of the following conditions are met:

- The parent company and the subsidiary are either joint stock companies or limited liability companies.
- The parent company has its registered office in Senegal and is subject to corporate income tax.
- The parent company holds at least 10% of the shares of the subsidiary.
- The shares of the subsidiary are subscribed to or allocated when the subsidiary is created, and they are registered in the name of the parent company or, alternatively, the parent company commits to holding the shares for two consecutive years in registered form. The letter containing such commitment must be annexed to the corporate income tax return.

**Tax depreciation.** Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated. The straight-line method is generally allowed. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Commercial and industrial buildings	3 to 5
Office equipment	10 to 15
Motor vehicles	20 to 25
Plant and machinery	10 to 20

In certain circumstances, plant and machinery as well as other assets may be depreciated using the declining-balance method or an accelerated method.

**Relief for tax losses.** Losses may be carried forward three years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

**Groups of companies.** No fiscal integration system equivalent to tax consolidation or fiscal unity exists in Senegal.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; on goods sold and services rendered in Senegal	18
Business license tax ( <i>patente</i> ), based on the business rental value of tangible assets and equipment and the number of employees	Various
Registration duties, on transfers of real property or businesses	1 to 10
Land tax, on capital gains resulting from sales or transfers of land and buildings	10
Payroll taxes paid by the employer for both Senegalese and foreign employees	3
Social security contributions	
Paid by the employer on each employee's annual gross salary, up to XOF756,000	1 to 5
Regular pension, paid on each employee's gross salary, up to XOF3,072,000; paid by	
Employer	8.4
Employee	5.6
Additional pension, paid on an executive's gross salary, up to XOF9,216,000; paid by	
Employer	3.6
Employee	2.4

## E. Miscellaneous matters

**Foreign-exchange controls.** Exchange-control regulations exist in Senegal for financial transfers outside the West African Economic and Monetary Union (WAEMU).

**Transfer pricing.** The Senegalese tax law contains specific transfer-pricing documentation requirements. Transactions between associated enterprises must be documented. Such documentation must include at a minimum a description of the terms of the transactions, the entities involved, a functional analysis and a detailed description of the chosen methodology to determine the applied transfer prices. The documentation must establish how transfer prices were determined and whether the terms of the intercompany transactions would have been adopted if the parties were unrelated. If such information is not available on request in an audit or a litigation, the tax authorities may assess the taxable income based on information at their disposal.

## F. Treaty withholding tax rates

Senegal has entered into a multilateral tax treaty with the other member states of the WAEMU, which are Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo. The principal provisions of this tax treaty took effect on 1 January 2010. Senegal has entered into bilateral tax treaties with Belgium, Canada, France, Italy, Mauritania, Mauritius, Morocco, Norway, Qatar and Tunisia.

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Belgium	10	16	10
Benin	10	15	15
Bissau Guinea	10	15	15
Burkina Faso	10	15	15
Canada	10	16/20 (a)	15
Congo	10	16	0
Côte d'Ivoire	10	15	15
France	10	15	15
Gabon	10	16	0
Italy	10	15	15
Mali	10	15	15
Mauritania	10	16	0
Mauritius	0	0	0
Morocco	10	10	10
Niger	10	15	15
Norway	10	16	16
Qatar	0	0	0
Togo	10	15	15
Tunisia	10	16	0
Non-treaty countries	10	6/8/16/20 (b)	20

(a) The 20% rate applies to interest on deposit receipts. The 16% rate applies to other interest payments.

(b) For details, see footnote (d) to Section A.

Senegal has signed tax treaties with China, Lebanon, Portugal and Taiwan, but these treaties have not yet been ratified.

*The Union of Serbia and Montenegro ceased to exist on 25 May 2006. The following chapter provides information on taxation in the Republic of Serbia only.*

## A. At a glance

Corporate Income Tax Rate (%)	15
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	15
Withholding Tax (%)	
Dividends	20 (a)
Interest	20 (a)
Royalties from Patents, Know-how, etc.	20 (b)
Capital Gains and Leasing Fees	20 (c)
Payments to Listed Countries with Preferable Tax Regimes	
Interest	25
Royalties	25
Leasing Fees	25
Services	25
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This tax applies to nonresident companies. Under the Personal Income Tax Law, dividends and interest paid to resident and nonresident individuals are taxed at a rate of 15%.
- (b) This tax applies to nonresident companies. Under the Personal Income Tax Law, royalties paid to resident and nonresident individuals are taxed at a rate of 20%.
- (c) This tax applies to nonresident companies. Under the Personal Income Tax Law, individuals are taxed at a rate of 20% on rent fees and at a rate of 15% on capital gains.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies resident in the Republic of Serbia (RS) are subject to tax on their worldwide income. A company is resident in the RS if it is incorporated in the RS or if its central management and control is actually exercised in the RS. Nonresident companies are subject to tax only on their income derived from the RS. Nonresident companies are companies registered in other countries that have a permanent place of business in the RS. Foreign representative offices may not derive profits from their activities in the RS. However, if they do derive such profits, the profits are subject to tax in the RS.

**Rate of corporate income tax.** The rate of corporate income tax in the RS is 15%.

**Tax incentives.** A company qualifies for a 10-year tax exemption if it invests RSD1 billion (approximately EUR9 million) in its own fixed assets and if it employs at least 100 new workers in the period of investment.

Under the Personal Income Tax Law and the Law on Compulsory Social Security Contributions, companies may be partially exempted from paying salary tax and employer social security contributions for newly employed individuals and disabled persons under the conditions specifically mentioned in the legislation.

**Capital gains.** Capital gains derived from the disposal of the following are included in taxable income and are subject to tax at the regular corporate income tax rate:

- Real estate that the taxpayer used as a fixed asset in its business activities
- Industrial property rights
- Capital participations and shares and other securities that are, according to International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), long-term financial investments (except certain bonds issued by government bodies or by the national bank)
- Investment units purchased by investment funds, in accordance with the law regulating investment funds

Capital gains tax is also imposed on income derived by nonresident companies from disposals of the aforementioned assets (except industrial property rights) and real estate in the RS that were not used as fixed assets in conducting business activities. These gains were previously subject to a 20% tax rate.

Capital gains realized by resident companies may be offset against capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years.

**Administration.** The tax year is the calendar year. Exceptionally, at the taxpayer's request, the tax period may be set within any 12 months, subject to the tax authorities' approval.

Companies must file annual tax returns within 180 days after the expiration of the period for which the tax liability is determined (usually by 30 June of the year following the tax year), except in cases of statutory changes, liquidation and bankruptcy, when

companies must file returns by the 15th day after the date prescribed for submission of financial statements.

Companies must make monthly advance payments of tax by the 15th day of the month following the month for which the payment is due. Companies determine advance payments based on their tax return for the preceding year. Under a self-assessment system, companies must correctly assess their tax liabilities to avoid the imposition of significant penalties.

Companies may submit an interim tax return during the tax year to increase or decrease their monthly advance payments of tax if significantly changed circumstances exist, such as changes to the company's activities or to the tax rules.

At the time of submission of the annual tax return, companies must pay any positive difference between the tax liability calculated by the company and the total of the advance payments. They may receive a refund of any overpayment, or the overpayment may be treated as a prepayment of future monthly payments.

**Dividends.** Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount can be carried forward for offset against corporate profit tax in the following five years. This tax credit applies only to dividends received by companies with a shareholding of 10% or more in the payer for at least one year before the tax return is submitted.

A 20% withholding tax is imposed on dividends paid to non-residents.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

**Foreign tax relief.** Companies resident in the RS that perform business activities through permanent establishments outside the RS may claim a tax credit for corporate income tax paid in other jurisdictions, up to the amount of domestic tax payable on such income. In addition, resident companies are entitled to a tax credit for tax on interest income, income from lease fees, royalty income and dividend income (shareholding less than 10%) that is withheld and paid by nonresident income payers in other jurisdictions. The tax credit is available up to the amount of domestic tax payable on a tax base equal to 40% of foreign-source income that is included in the total income of the resident company.

### **C. Determination of trading income**

**General.** The assessment is based on the profit or loss shown in the financial statements prepared in accordance with International Accounting Standards and domestic accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. For tax purposes, income consists of income from the following:

- Sales of products, goods and services
- Financial income
- Capital gains
- Income resulting from transfer-pricing adjustments

Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see *Tax depreciation*) and donations, entertainment and marketing expenses are deductible up to specified limits. Impairment of assets may not be deducted unless the assets were alienated or damaged as a result of force majeure.

**Inventories.** Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

**Bad debt provisions and write-offs.** Legal entities may deduct as expenses write-offs of receivables if such actions are in conformity with the Accounting Law. This conformity exists if the following conditions are satisfied:

- Receivables were included in the taxpayer's revenues.
- Receivables have been written off from the taxpayer's accounting books as uncollectible.
- The taxpayer has sued the debtor or claimed the debt in a liquidation or bankruptcy procedure, or the execution procedure has been initiated.

Write-offs of receivables that were not recorded as revenues in the taxpayer's accounting records are also tax-deductible expenses if the second and third conditions above are met.

Bad debt provisions are tax-deductible expenses if at least 60 days have elapsed since the due date for the payment of receivables.

**Tax depreciation.** Intangible and fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. The straight-line method must be used for the first group, while the declining-balance method must be used for the assets in the other groups.

The following are the depreciation and amortization rates.

Group of assets	Rate (%)
I	2.5
II	10
III	15
IV	20
V	30

Group I includes immovable assets.

In addition, if the assets are acquired from a related party, the depreciation base is the lower of the following two amounts:

- Purchase price for the transfer of the fixed assets
- Acquisition price of fixed assets determined by applying the arm's-length principle

**Relief for losses.** Tax losses incurred in business operations may be carried forward for five years. Loss carrybacks are not allowed.

**Groups of companies.** Under group relief provisions, a group of companies consisting only of resident companies may offset profits and losses for tax purposes. The group relief provisions are

available if a parent company holds directly or indirectly at least 75% of the shares in subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If tax consolidation is allowed, the group companies must apply tax-consolidation rules for five years. Each group company files its own annual income tax return, and the parent company files a consolidated tax return based on the subsidiaries' tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on supplies of goods and services in the RS and on imports of goods; certain tax exemptions with or without the right to deduct input VAT are granted; VAT taxpayers are legal entities and entrepreneurs who had turnover of goods and services in excess of RSD8 million (approximately EUR70,000) in the preceding 12 months or who expect to have annual turnover greater than the threshold	
Standard rate	20
Lower rate	8
Property tax, paid on ownership rights over immovable property in the RS (including residential and business buildings, apartments, garages and other underground and surface buildings) and on usage rights over city construction land; certain tax exemptions are prescribed; tax base equals the market value of the property; taxpayers that maintain accounting records self-assess and pay the tax quarterly; taxpayers that do not maintain accounting records pay tax quarterly based on a ruling issued by the local authority	
Tax rates applicable to taxpayers that are required to maintain accounting records	0.4
Tax rates applicable to taxpayers that are not required to maintain accounting records	0.4 to 2
Transfer tax; paid on transfers of ownership rights over immovable property, intellectual property rights, ownership rights over motor vehicles (with certain exemptions) and usage rights over city construction land; certain transfers are exempt; tax base is the contract price, unless the market value is higher	2.5
Payroll taxes, on monthly gross salaries	
Tax on salary; paid by employee	10
Social security contributions (for health, pension and unemployment funds); paid by	
Employer	17.9
Employee	19.9

## E. Miscellaneous matters

**Foreign-exchange controls.** In the RS, the local currency is the dinar (RSD).

In the RS, all payments, collections and transfers must generally be effected in dinars, but a “currency clause” may allow conversion from hard currency on the date of payment. In addition, the following transactions may be effected using foreign currencies:

- Sale and rental of immovable property
- Granting loans in the RS for the payment of imported goods and services and acquisition of immovable property
- Insurance premiums and transfers based on life insurance contracts
- Purchasing receivables and accepting payables specified in the law
- Payments of deposits representing collateral
- Donations for charitable, cultural and scientific purposes in accordance with the donation legislation
- Transactions involving guarantees specified by the law, if the underlying transaction is in foreign currency
- Allowances for business trips abroad
- Salary payments to resident individuals sent on temporary work abroad based on an agreement on investment projects, as well as to individuals employed at diplomatic and consular missions, United Nations organizations and international financial institutions in the RS

Residents and nonresidents may open foreign-currency accounts in RS banks or in foreign banks authorized to operate in the RS. Foreign currency may be held in such accounts and used for payments out of the RS, such as dividends and payments for purchases of imports, as well as for authorized foreign-currency payments in the RS.

**Transfer pricing.** Under general principles, transactions between related parties must be made on an arm’s-length basis. The difference between the price determined by the arm’s-length principle and the taxpayer’s transfer price is included in the tax base for purposes of the computation of corporate income tax. Taxpayers must submit transfer-pricing documentation together with their corporate income tax return.

**Thin-capitalization rules.** Related party interest expenses and related expenses are limited to 4 times the value of the taxpayer’s equity (10 times value for banks and financial-leasing organizations).

## F. Treaty withholding tax rates

The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the former Federal Republic of Yugoslavia and the former Yugoslavia that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Albania	5/15	10	10

## A. At a glance

Corporate Income Tax Rate (%)	33 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	33 (a)
Withholding Tax (%)	
Dividends	15 (b)
Interest	0 to 33 (c)
Royalties from Patents, Know-how, etc.	15
Management Fees	15 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This is the maximum rate. For details regarding the rates, see Section B.
- (b) This withholding tax applies to dividends paid to nonresidents. The withholding tax is considered to be a final tax. See Section B.
- (c) A 15% rate applies to interest paid by non-financial institutions to residents and nonresidents other than banks, finance companies or other enterprises that are principally engaged in the business of lending money. The withholding tax is considered to be a final tax for nonresidents.
- (d) Management and technical fees payable to nonresidents are taxable at a rate of 15%. Management fees paid by financial institutions to nonresidents are subject to withholding tax at a rate of 33%. The withholding tax is considered to be a final tax.

## B. Taxes on corporate income and gains

**Corporate income tax.** Under the Business Tax Act, resident and nonresident corporate and non-corporate businesses are subject to business tax on their income derived from the Seychelles.

A company is a resident of the Seychelles if it is incorporated there. In addition, a company not incorporated in the Seychelles that carries on business in the Seychelles is a resident if its central management and control are located in the Seychelles or if its voting power is controlled by shareholders who are residents of the Seychelles.

**Rates of corporate income tax.** Corporations and trustees are subject to business tax at a rate of 25% on the first SCR1 million of taxable income and at a rate of 30% on the balance.

For telecommunications service providers, banks, insurance companies, and alcohol and tobacco manufacturers, the rate of business tax is 25% on the first SCR1 million of taxable income and 33% on the remainder.

Companies listed in the Seychelles securities exchange are subject to business tax at a rate of 25%.

The Tourism Investment Act 2003 has been repealed. The Eighth Schedule to the Business Tax Act offers various tax incentives to certain businesses to encourage investment in the Seychelles. These incentives include reduced rates of business tax, tax credits, special deductions and accelerated depreciation. The businesses listed in the schedule include, but are not limited to, farming entities, agricultural processors, fisheries processors, boat owners and persons carrying on the businesses of hotels, guest houses or self-catering.

**Capital gains.** Capital gains are not taxable in the Seychelles.

**Administration.** The tax year is the calendar year.

Annual tax returns are due on 31 March.

The tax shown on the annual tax return is payable on submission of the return.

Companies must make monthly provisional tax payments during the tax year, based on the income for the preceding year. The payments are due by the 21st day of the month following the month for which a payment is due. At the beginning of each tax year, the Revenue Commissioner issues a provisional tax assessment, which sets out the required provisional payments.

**Dividends.** Withholding tax is not imposed on dividends paid to resident persons. Dividends paid to nonresidents are subject to withholding tax at a rate of 15%. Dividends received from non-resident companies are not taxable.

**Foreign tax relief.** Seychelles does not grant relief for foreign taxes paid.

### C. Determination of trading income

**General.** Taxable income is the income reported in companies' financial statements, subject to adjustments required by the tax law.

Expenses incurred to earn taxable income are deductible, unless they do not pertain to the business of the taxpayer.

**Inventories.** For tax purposes, inventory may be valued at the lower of cost or market value, or at replacement cost.

**Provisions.** Provisions are not deductible for tax purposes.

**Tax depreciation.** Under the Business Tax Act, hotels are depreciated at a rate of 20% for the first year and 10% for the following eight years. Other buildings, ships and aircraft are depreciated at a straight-line rate of 4%. Computers, research and development expenditure, data handling equipment and approved environmental machinery is depreciated at a rate of 40%. For other assets, normal depreciation is calculated using the following straight-line rates.

Asset	Rate
Plant and machinery	20%
Office equipment	20%
Vehicles	20%

Capital expenditure of up to SCR100,000 on the assets described above is fully deductible in the year of expenditure.

**Relief for losses.** Business tax losses may be carried forward for five years for relief against future income of the same trade. Tax losses may not be carried back.

**Groups of companies.** Consolidated returns are not allowed. Each company must submit its own tax return.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard rate	15
Rate for items listed in the First Schedule of the Value-Added Tax Act	0
Contributions to Seychelles Pension Fund, on monthly salaries and allowances paid to employees; paid by	
Employer	2
Employee	2
Trades Tax (customs duty), on imported goods	Various
Tourism Marketing Tax; payable on annual turnover by tourism operators listed in the Eighth Schedule of the Business Tax Act, banks, insurers and telecommunication service providers, if they have annual turnover of SCR1 million or more	0.5
Corporate social responsibility tax; payable by businesses with annual turnover of SCR1 million or more; tax payable at rate of 0.50% of monthly turnover, but businesses may elect to pay 0.25% of monthly turnover and claim a 0.25% offset for donations, sponsorships or projects paid for by the business during the current year of payment and approved by the Corporate Social Responsibility Committee; alternatively, the business may remit the entire 0.50% of monthly turnover to the Seychelles Revenue Commission	0.5

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Seychelles currency is the Seychelles rupee (SCR).

Seychelles does not impose exchange controls. However, under the Foreign Exchange Act, a person, other than an authorized dealer, may not as a business buy foreign currency from or sell foreign currency to any person other than an authorized dealer.

Payments to, receipts from and transfers to and from a person outside Seychelles with respect to international transactions must be made through authorized dealers.

**Debt-to-equity rules.** Seychelles does not impose any thin-capitalization rules.

**Transfer pricing.** Seychelles does not have transfer-pricing regulations. However, the Business Tax Act requires transactions between related parties to be conducted using internationally approved transfer-pricing guidelines.

## F. Treaty withholding tax rates

(a) Various tax exemptions and reductions are available (see Section B).

(b) See Section F.

(c) See Section B.

(d) See Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Income tax is imposed on all income derived from sources in Singapore, and on income from sources outside Singapore if received in Singapore. However, a nonresident company that is not operating in or from Singapore is generally not taxed on foreign-source income received in Singapore. A company is resident in Singapore if the control and management of its business is exercised in Singapore; the place of incorporation is not relevant.

Remittances of foreign income in the form of dividends, branch profits and services income (specified foreign income) into Singapore by companies resident in Singapore are exempt from tax if prescribed conditions are met. For remittances of specified foreign

income that does not meet the prescribed conditions, companies may be granted tax exemption under specific scenarios or circumstances on an approval basis.

**Rates of corporate income tax.** The standard corporate income tax rate is 17%. Seventy-five percent of the first SGD10,000 of normal chargeable income is exempt from tax, and 50% of the next SGD290,000 is exempt from tax. The balance of chargeable income is fully taxable at the standard rate of 17%. A corporate income tax rebate of 30% of the corporate income tax payable capped at SGD30,000 per tax year is granted for three tax years, from the 2013 tax year through the 2015 tax year.

**Tax incentives, exemptions and reductions.** The following tax incentives, exemptions and tax reductions are available in Singapore.

*Pioneer companies and pioneer service companies.* The incentive for pioneer companies and pioneer service companies is aimed at encouraging companies to undertake activities that have the effect of promoting economic or technological development in Singapore. A pioneer enterprise is exempt from income tax on its qualifying profits for a period of up to 15 years.

*Development and Expansion Incentive.* The Development and Expansion Incentive (DEI) is available to companies that engage in high value-added operations in Singapore but do not qualify for pioneer incentive status and to companies whose pioneer incentive status has expired. DEI companies enjoy a concessionary tax rate of not less than 5% on their incremental income derived from the performance of qualifying activities. The maximum initial relief period is 10 years, with possible extensions not exceeding 5 years at a time, subject to a maximum total incentive period of 20 years. However, if the DEI company engages in one or more qualifying activities, and oversees, manages or controls the conduct of any activity on a regional or global basis, its total incentive period may on approval be extended beyond 20 years, with possible extensions not exceeding 10 years at a time, subject to a maximum incentive period of 40 years.

*Investment allowances.* On approval, investment allowances are available to companies that engage in qualifying projects. Such allowances are granted in addition to the normal tax depreciation allowances, and are based on a specified percentage (up to 100%) of expenditure incurred on productive equipment.

*Approved royalties, technical assistance fees, and contributions to research and development costs.* Approved royalties, technical assistance fees, and contributions to research and development (R&D) costs paid to nonresidents may be exempted from withholding tax.

All the above incentives are also available under the Headquarters Programme (see *Headquarters Programme*).

*Tax exemption scheme for new companies.* Subject to certain conditions, a newly incorporated and tax-resident Singapore company or a Singapore company limited by guarantee may qualify for a full tax exemption on the first SGD100,000 of chargeable income and a 50% tax exemption on the next SGD200,000 of chargeable income. The exemption applies only to the qualifying company's

first three consecutive tax years. However, the scheme does not apply to new start-ups undertaking property development or investment holding.

*Productivity and Innovation Credit.* Businesses that incur qualifying expenditure on the following six activities qualify for an enhanced deduction or allowance, known as a Productivity and Innovation Credit (PIC), from the 2011 tax year to the 2018 tax year:

- R&D
- Eligible design activities
- Acquisition and in-licensing of intellectual property rights
- Registration of patents, trademarks, designs and plant varieties
- Acquisition or leasing of PIC information technology (IT) and automation equipment
- External training and qualifying in-house training

All businesses can claim a deduction or allowance of 400% of the first SGD400,000 of their expenditures per tax year on each of the above activities from their taxable income, subject to the following caps:

- For the 2011 and 2012 tax years: a combined cap of SGD800,000 of eligible expenditure for each activity
- For the 2013 to the 2015 tax years: a combined cap of SGD1,200,000 of eligible expenditure for each activity
- For the 2016 to the 2018 tax years: a combined cap of SGD1,200,000 of eligible expenditure for each activity

A PIC+ scheme is also available to support small and medium enterprises that are making more substantial investments to transform their businesses. Under the scheme, which is effective for expenditure incurred in the 2015 to 2018 tax years, the expenditure cap is increased from SGD400,000 to SGD600,000 per qualifying activity per tax year, and the expenditure caps may also be combined. To qualify, the entity's annual turnover must not exceed SGD100 million or it must not employ more than 200 workers; the criterion is applied at the group level if the entity is part of a group.

Qualifying persons with at least three local employees have the option to convert up to SGD100,000 of eligible expenditure for each tax year into a non-taxable cash grant. The conversion rate is 60% for the 2013 to 2018 tax years (30% for the 2011 and 2012 tax years).

Businesses that invest a minimum of SGD5,000 per tax year in PIC qualifying expenditure receive a dollar-for-dollar matching cash bonus from the Singapore government, subject to conditions. The bonus is capped at SGD15,000 over three tax years, from the 2013 tax year to the 2015 tax year.

*R&D incentives.* Liberalized R&D deductions are available from the 2009 tax year through the 2025 tax year. A tax deduction can be claimed for undertaking R&D in any area (that is, the R&D is no longer required to be related to the trade or business carried on by the company), and an additional 50% tax deduction is allowed for certain qualifying R&D expenditure. If the companies outsource their R&D activities to an R&D organization in Singapore, the tax deduction available is at least 130% of the amount of R&D

expenses incurred. Businesses that incur qualifying R&D expenditure may qualify under the PIC scheme (see *Productivity and Innovation Credit* above).

*Tax certainty on gains on disposal of equity investments.* To provide upfront tax certainty, and with certain exceptions, gains derived from the disposal of ordinary shares by companies during the period of 1 June 2012 through 31 May 2017 are not taxed if the qualifying divesting company had legally and beneficially owned at least 20% of the ordinary shares in the investee company for a continuous period of at least 24 months before the disposal of the shares.

*Headquarters Programme.* The Headquarters Programme consists of an International Headquarters (IHQ) Award and a Regional Headquarters (RHQ) Award. The Headquarters Programme applies to entities incorporated or registered in Singapore that provide headquarters services to their network companies on a regional or global basis. Under the IHQ and RHQ Awards, companies may enjoy incentive rates of 0% to 15% for a specified period on qualifying income, depending on the amount of commitment to Singapore. This commitment is demonstrated by various factors, including headcount, business spending and quality of people hired.

*Finance and treasury center incentive.* The finance and treasury center (FTC) incentive is aimed at encouraging companies to use Singapore as a base for conducting treasury management activities for related companies in the region. Income derived from the provision of qualifying services to approved network companies and from the carrying on of qualifying activities on its own account is subject to tax at a rate of 10% or other concessionary rate for a period of up to 10 years, with possible extensions of up to 10 years at a time. Approved network companies are offices and associated companies of the company granted the tax incentive that have been approved by the relevant authority for purposes of the incentive.

A sunset clause of 31 March 2016 applies to the FTC scheme.

*Financial sector incentive.* The financial sector incentive (FSI) is designed to encourage the development of high-growth and high value-added financial activities in Singapore. A 5% or 12% concessionary tax rate applies to income derived from carrying on qualifying activities by approved FSI companies in Singapore.

*Maritime sector incentives.* Ship operators, maritime lessors and providers of certain supporting shipping services may enjoy tax incentives under the Maritime Sector Incentive (MSI), which consists of the following three broad categories:

- International shipping enterprise
- Maritime (ship or container) leasing
- Supporting shipping services

The tax benefits include tax exemptions or concessionary tax rates of 5% and 10%.

Shipping companies that either own or operate a fleet of foreign vessels can apply for the MSI-Approved International Shipping Enterprise (MSI-AIS) award. Successful applicants are granted

either MSI-AIS status or the MSI-AIS (Entry Player) [MSI-AIS (Entry)] status, depending on the company's scale of operations. Under this scheme, income derived from the operation of non-Singapore flagged vessels plying in international waters and other qualifying income are exempt from tax. An MSI-AIS award may be granted for a renewable period of 10 years (extendible up to 40 years), while MSI-AIS (Entry) status may be granted for a non-renewable period of 5 years, with the option of graduating to the MSI-AIS status if qualifying conditions are met. Applications for MSI-AIS (Entry) can be made from 1 June 2011 to 31 May 2016.

Under the MSI-Maritime Leasing (Ship) award, approved shipping investment enterprises (Singapore-incorporated ship leasing companies, shipping funds, business trusts or partnerships) may enjoy tax exemption on their qualifying income, which includes income from the chartering or finance leasing of seagoing ships to qualifying persons for use outside the port limits of Singapore. Approved shipping investment managers may also enjoy a 10% concessionary tax rate on income derived from the management of an approved shipping investment enterprise, and prescribed services and activities. Applications can be made from 1 March 2011 to 31 May 2016, and successful applicants are granted the status for a period of five years.

Under the MSI-Maritime Leasing (Container) award, approved container investment enterprises (Singapore-incorporated companies, business trusts or partnerships) may enjoy a concessionary tax rate of 5% or 10% on their qualifying income, which includes income from the operating or finance leasing of sea containers that are used for the international transportation of goods. Approved container investment managers may also enjoy a 10% concessionary tax rate on income derived from the management of an approved container investment enterprise and prescribed services and activities. Applications can be made from 1 March 2011 to 31 May 2016, and successful applicants are granted the status for a period of five years.

The MSI-Supporting Shipping Services (MSI-SSS) award aims to promote the growth of ancillary shipping service providers and encourage shipping conglomerates to set up their corporate services functions in Singapore. An approved MSI-SSS company enjoys a 10% concessionary tax rate on incremental income derived from the provision of approved supporting shipping services, such as ship broking, forward freight agreement trading, ship management, ship agency, freight forwarding and logistics services. Applications can be made from 1 June 2011 to 31 May 2016, and successful applicants are granted the MSI-SSS award for a period of five years.

*Global Trader Programme.* The Global Trader Programme (GTP) is aimed at encouraging international companies to establish and manage regional or global trading activities with Singapore as their base. Under the GTP, approved companies enjoy a concessionary tax rate of 5% or 10% on qualifying transactions conducted in qualifying commodities and products (including energy, agricultural, building, industrial, electrical and consumer products, and carbon credits), qualifying transactions in derivative instruments and qualifying structured commodity financing activities.

In addition, the 5% concessionary tax rate applies to income derived from qualifying transactions in liquefied natural gas, as specified by the relevant authority. A sunset clause of 31 March 2021 applies to the GTP scheme.

*Venture capital funds incentive.* The venture capital funds incentive aims to encourage a thriving venture capital industry in Singapore. Gains derived from the disposal of approved investments, interest from approved convertible loan stocks and dividends derived from approved investments are exempt from tax or taxed at a concessionary rate of not more than 10% for a period of up to 10 years. Extension periods of up to five years each may be available, but the maximum total incentive period is 15 years.

**Capital gains.** Capital gains are not taxed in Singapore. However, in certain circumstances, the Singapore Revenue considers transactions involving the acquisition and disposal of real estate, stocks or shares to be the carrying on of a trade, and, as a result, gains arising from such transactions are taxable. The determination of whether such gains are taxable is based on a consideration of the facts and circumstances of each case.

**Administration.** The tax year, known as a year of assessment, runs from 1 January to 31 December. The period for which profits are identified for assessment is called the basis year. Therefore, income earned during the 2014 basis year is assessed to tax in the 2015 year of assessment. For companies engaged in business in Singapore that adopt an accounting period other than the calendar year, the assessable profits are those for the 12-month accounting period ending in the year preceding the year of assessment.

An estimate of the chargeable income (ECI) of a company must be filed within three months after the end of its accounting year. However, companies are not required to file an ECI if their annual revenue is not more than SGD1 million for the financial year and if their ECI is nil.

The statutory deadline for filing the income tax return is 30 November. No extension of time to file the return is allowed.

Income tax is due within one month after the date of issuance of the notice of assessment. In certain circumstances, companies may pay tax in monthly installments on the ECI, up to a maximum of 10, with the first installment payable one month after the end of the accounting period. No installments are allowed if the ECI is submitted more than three months after the end of the relevant accounting period.

A late payment penalty of 5% of the tax due is imposed if the tax is not paid by the due date. If the tax is not paid within 60 days of the imposition of the 5% penalty, an additional penalty of 1% of the tax is levied for each complete month that the tax remains outstanding, up to a maximum of 12%.

The tax law provides that it is an offense for a person chargeable to tax in Singapore not to file an income tax return with the tax authority. On conviction of such offense, a penalty of up to SGD1,000 is imposed for late filing of tax returns. In default of payment, the person may be liable to imprisonment for a term not exceeding six months. On conviction, a further penalty of SGD50

per day is imposed for each day that the tax return remains unfiled. If a person fails or neglects without reasonable excuse to file a tax return for a tax year for two years or more, a higher penalty of double the amount of tax assessed for the relevant tax year and a fine of not exceeding SGD1,000 is imposed on conviction. In default of payment, the person may be liable to imprisonment for a term not exceeding six months. The Singapore Revenue may compound any of these offenses.

**Dividends.** Dividends paid by a Singapore tax-resident company are exempt from income tax in the hands of shareholders, regardless of whether the dividends are paid out of taxed income or tax-free gains.

**Foreign tax relief.** Singapore has entered into comprehensive double tax treaties with more than 70 countries, but notably not with the United States. Under Singapore rules, a foreign tax credit is limited to the lower of the foreign tax paid and the Singapore tax payable on that income. The foreign tax credit (FTC) is granted on a country-by-country, source-by-source basis unless the resident taxpayer elects to claim FTC under the pooling method, subject to meeting certain conditions.

A unilateral tax credit system, similar to FTC relief, is also available for income derived from countries that have not entered into tax treaties with Singapore.

### C. Determination of taxable income

**General.** In general, book profits reported in the financial statements prepared under generally accepted accounting principles are adjusted in accordance with the Singapore tax rules to arrive at taxable income.

If a company maintains its financial accounts in a functional currency other than Singapore dollars, as required under the financial reporting standards in Singapore, it must furnish tax computations to the Singapore Revenue denominated in that functional currency in a manner as prescribed by the law.

For expenses to be deductible, they must meet all of the following conditions:

- They must be incurred wholly and exclusively in the production of income.
- They must be revenue in nature.
- They must not be specifically prohibited under the Singapore tax law.

To facilitate business start-ups, it is specifically provided that businesses may deduct revenue expenses incurred on or after the first day of the accounting year (not exceeding a 12-month period) immediately preceding the accounting year in which they earn their first dollar of trade receipts.

Special rules govern the deductibility of expenses for investment holding companies.

Expenses attributable to foreign-source income are not deductible unless the foreign-source income is received in Singapore and subject to tax in Singapore. In general, offshore losses may not be offset against Singapore-source income.

No deduction is allowed for the book depreciation of fixed assets, but tax depreciation (capital allowances) is granted according to statutory rates (see *Capital allowances [tax depreciation]*).

**Double deductions.** Double deductions are available for certain expenses relating to approved trade fairs, exhibitions or trade missions, maintenance of overseas trade offices, overseas investment development, logistics activities, and research and development.

**Renovation or refurbishment deduction.** A tax deduction is allowable on due claim, for qualifying renovation or refurbishment (R&R) expenditure incurred for the purposes of a trade, profession or business. The allowable R&R costs are capped at SGD300,000 for every three-year period, beginning with the basis period in which the deduction is first allowed. Any unused R&R deduction is allowed as a loss carryback or loss carryforward (see *Relief for trading losses*) or for group relief (see *Groups of companies*).

**Inventories.** Trading inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not accepted.

**Provisions.** Impairment losses for debts computed in accordance with Singapore financial reporting standards may be deducted, but only to the extent that the debts arose from the trade carried on by the taxpayer.

### **Capital allowances (tax depreciation)**

*Plant and machinery.* Tax depreciation or capital allowances are given for capital expenditures incurred on the acquisition of plant and machinery used for the purposes of a trade or business. Qualifying plant and machinery are normally written off in equal amounts over three years when claimed. Alternatively, expenditures on such assets may be claimed in one year if each item costs no more than SGD5,000. However, the total claim for all such assets may not exceed SGD30,000 for a tax year.

The cost of the following may be written off in the year of acquisition:

- Computers or other prescribed automation equipment
- Generators
- Robots
- Certain efficient pollution-control equipment
- Certified energy-efficient equipment or approved energy-saving equipment
- Certain industrial noise- and chemical hazards-control equipment

Businesses that incur expenditure on the acquisition of qualifying IT and automation equipment may also qualify for the PIC scheme (see Section B).

Expenditures on automobiles (other than commercial vehicles and cars registered outside Singapore and used exclusively outside Singapore) generally do not qualify for capital allowances.

*Industrial buildings.* An initial allowance of 25% plus an annual straight-line allowance of 3% are granted for industrial buildings or structures used for specified purposes.

However, the industrial building allowance (IBA) was phased out after 22 February 2010. IBA is not allowed with respect to capital expenditure incurred after 22 February 2010 on the construction or purchase of industrial buildings or structures except in specified scenarios, subject to meeting certain conditions. Capital expenditure incurred on or before 22 February 2010 continues to qualify for IBA until the expenditure is fully written down or the asset is disposed of.

*Land intensification allowance incentive.* The land intensification allowance (LIA) incentive grants an initial allowance of 25% and an annual allowance of 5% on qualifying capital expenditure incurred on or after 23 February 2010 by businesses on the construction or renovation of qualifying buildings or structures if certain conditions are met. The user of the building or structure must carry out one of the specified qualifying activities as its principal activity in the building or structure. The application window period for the LIA incentive is from 1 July 2010 through 30 June 2020.

*Intellectual properties.* Writing-down allowances (WDAs) are granted for capital expenditure incurred on the acquisition of specified categories of intellectual property (IP) on or before the last day of the basis period for the 2020 tax year if the legal and economic ownership of the IP lies with Singapore companies. The allowances are calculated on a straight-line basis over five years. The legal ownership requirement may be waived for IP rights acquired on or after 17 February 2006 if the Singapore company has substantial economic rights over the IP, while the foreign parent holds the legal title.

On approval, an accelerated WDA over two years is granted to an approved media and digital entertainment (MDE) company with respect to the acquisition of approved IP rights for MDE content (pertaining to films, television programs, digital animations or games, or other MDE content) on or before the last day of the basis period for the 2018 tax year.

Businesses that incur qualifying expenditure on the acquisition or in-licensing of IP rights may also qualify under the PIC scheme (see Section B).

*Disposal of plant and equipment and industrial buildings.* Allowances are generally subject to recapture on the sale of qualifying plant and equipment and industrial buildings if the sales proceeds exceed the tax-depreciated value. If sales proceeds are less than the tax-depreciated value, an additional corresponding allowance is given.

**Relief for trading losses.** Trading losses may be offset against all other chargeable income of the same year. Unused losses may be carried forward indefinitely, subject to the shareholding test (see below). Excess capital allowances can also be offset against other chargeable income of the same year and carried forward indefinitely subject to the shareholding test and to the requirement that the trade giving rise to the capital allowances continues to be carried on (same trade test).

A one-year carryback of up to an aggregate amount of SGD100,000 of current year unused capital allowances and trade losses (collectively referred to as “qualifying deductions”) may be allowed,

subject to the meeting of certain conditions and compliance with specified administrative procedures.

The carryforward and carryback of losses and capital allowances are subject to the shareholders remaining substantially (50% or more) the same at the relevant comparison dates (shareholding test). If the shareholder of the loss company is itself another company, look-through provisions apply through the corporate chain to the final beneficial shareholder.

The carryback of capital allowances is subject to the same trade test that is applicable to the carryforward of unused capital allowances.

The Singapore Revenue has the authority to allow companies to deduct their unused tax losses and capital allowances, notwithstanding a substantial change in ownership at the relevant dates, if the change is not motivated by tax considerations (for example, if the change is caused by the nationalization or privatization of industries or if the shareholding of the company or its parent changes substantially as a result of the shares being widely traded on recognized exchanges). If allowed, these losses and capital allowances may be offset only against profits from the same business.

**Groups of companies.** Under group relief measures, current-year unused losses, capital allowances and donations may be transferred by one company to another within a group, subject to meeting certain qualifying conditions. A group generally consists of a Singapore-incorporated parent company and all of its Singapore-incorporated subsidiaries. Two Singapore-incorporated companies are members of the same group if one is 75% owned by the other, or both are 75% owned by a third Singapore-incorporated company.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST) on any supply of goods and services, except an exempt supply, made in Singapore by a taxable person (a business is taxable if its annual supplies exceed SGD1 million) in the course of or furtherance of business and on imports of goods into Singapore unless the imports qualify for import reliefs	0/7
Social security contributions (Central Provident Fund [CPF]); foreigners holding work passes are exempt	
For employees up to age 50, on monthly ordinary wages (lower rates apply if employee is older than age 50); the monthly salary ceiling for contributions is SGD5,000 for ordinary wages; contributions paid by Employer (limited to SGD850 a month)	17
Employee (limited to SGD1,000 a month)	20
Contributions on additional wages, such as bonuses and non-regular payments (limited to SGD85,000 less the total ordinary wages	

<b>Nature of tax</b>	<b>Rate (%)</b>
subject to CPF contributions in the year); paid by	
Employer	17
Employee	20
(For both contributions on ordinary wages and contributions on additional wages, the employer's contribution rate for workers aged from above 50 to 55 is 16%; lower contribution rates apply to individuals older than age 55. The employee's contribution rate for workers aged from above 50 to 55 is 19%; lower contribution rates apply to individuals older than age 55. For employees who earn total wages of less than SGD750 per month, different rates apply.) Skills development levy; payable by employer for all employees; based on the first SGD4,500 of monthly gross remuneration; subject to a minimum of SGD2	0.25

## **E. Miscellaneous matters**

**Foreign-exchange controls.** Singapore does not impose any restrictions on the remittance or repatriation of funds in or out of Singapore.

**Debt-to-equity ratios.** Singapore does not impose any specific debt-to-equity restrictions.

**Anti-avoidance legislation.** The tax legislation allows the Singapore Revenue to disregard or vary any arrangement that has the purpose or effect of altering the incidence of taxation or reducing or avoiding Singapore tax liability. The Singapore Revenue may also tax profits of a nonresident in the name of a resident as if the latter is an agent of the nonresident, if the profits of the resident from business dealings with the nonresident are viewed as lower than expected as a result of the close connection between the two parties.

**Transfer pricing.** Specific legislation governs the arm's-length principle to be applied to related-party transactions. The Singapore Revenue may make adjustments to profits for income tax purposes in cases in which the terms of commercial relations or financial relations between two related parties are not at arm's length. The Singapore Revenue has revised its guidance on transfer pricing (TP) matters. The revised guidance is summarized below.

*TP principles and fundamentals* provide guidance on the arm's-length principle and TP documentation requirements in Singapore. The guidelines on the application of the arm's-length principle are broadly consistent with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, which endorse the arm's-length principle. Specific guidance, including a recommendation to adopt a three-step approach (conduct a comparability analysis, identify the most appropriate TP method and tested party, and determine the arm's-length results) to apply the arm's-length principle, is provided together with specific requirements relating to external benchmarking searches and the application of results.

The Singapore Revenue expects companies to maintain contemporaneous TP documentation to support their transactions with related parties. Specifically, the Singapore Revenue has included dollar-value thresholds for related-party transactions (subject to certain exceptions). TP documentation must be prepared if these thresholds are exceeded. The Singapore Revenue does not require TP documentation to be submitted together with the tax returns but taxpayers have 30 days to submit the documents on the Singapore Revenue's request. Failure to prepare contemporaneous documentation or the inability of taxpayers to substantiate transfer prices may result in the imposition of penalties for not keeping proper records, upward adjustment, ineligibility to invoke competent authority assistance, rejection of an Advance Pricing Arrangement (APA) application and disallowance of self-initiated adjustments. The TP documentation must be organized at the group level and entity level.

*TP administration* provides information and guidance on the TP consultation program and the avoidance and resolution of TP disputes. The TP consultation process involves the Singapore Revenue selecting taxpayers based on various risk indicators and reviewing and auditing their TP methods and documentation. The guidelines also provide details on the step-by-step processes for the Mutual Agreement Procedure (MAP) and APAs, including sample documents for the MAP and APAs. Double tax treaties provide for the MAP to resolve instances of double taxation. MAP is a dispute-resolution process used by the competent tax authorities to resolve disputes arising under the application of tax treaties.

Discussion and guidance is also provided with respect to TP adjustments, related-party loans, services and attribution of profits to permanent establishments (PEs).

### **Reorganizations**

*Amalgamations of companies.* For corporate amalgamations, a tax framework is available. This framework seeks to minimize the tax consequences arising from qualifying amalgamations and align it with the consequences provided in the Companies Act. On election, the tax treatment applies to two or more amalgamating companies and an amalgamated company in a qualifying amalgamation. Under the framework, the amalgamated company is treated as continuing the existing businesses of the amalgamating companies (and, accordingly, an acquisition of new businesses by the amalgamated company is not deemed to occur) for tax purposes.

*Deduction for acquisitions of shares of companies.* A Singapore company may claim a deduction if it and/or any one or more acquiring subsidiaries incur capital expenditure during the period of 1 April 2010 to 31 March 2015 (both dates inclusive) in acquiring the ordinary shares in another company, subject to specified conditions. The amount of the deduction granted is 5% of the capital expenditure, to be written off over five years. For this purpose, the capital expenditure is capped at SGD100 million for all qualifying acquisitions that have acquisition dates within one basis period. A 200% tax deduction is granted for certain transaction costs incurred on the qualifying acquisition, subject to an expenditure cap of SGD100,000 per relevant tax year.

## F. Domestic and treaty withholding tax rates

In general, withholding tax at a rate of 15% is imposed on interest and other payments with respect to loans or indebtedness paid to nonresidents. However, interest paid by approved banks in Singapore on deposits held by nonresidents is exempt from tax if the nonresidents do not have a PE in Singapore and do not carry on business in Singapore by themselves or in association with others, or do not use the funds from the operation of a PE in Singapore to make the deposit. In addition, interest paid on certain qualifying debt securities issued on or before 31 December 2018 to nonresidents who do not have a PE in Singapore is exempt from tax. This exemption also applies to nonresidents who have a PE in Singapore, but do not use the funds obtained from the operations of the PE to acquire the debt securities. Payments for arrangements, management or services relating to loans or indebtedness performed by nonresidents outside Singapore or guarantees with respect to loans or indebtedness provided by nonresident guarantors are not subject to withholding tax. Interest and qualifying payments made by banks, finance companies and certain approved entities to nonresident persons are also exempt from withholding tax during the period of 17 February 2012 through 31 March 2021 if the payments are made for the purpose of their trade or business and not with the intent of avoiding tax in Singapore.

A 10% withholding tax is imposed on the following types of payments to nonresidents:

- Royalties for the use of, or the right to use, intangible property
- Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information

However, payments made to a nonresident and borne by a person resident in Singapore or a Singapore PE for use of or the right to use software, information or digitized goods, but not involving the right to commercially exploit the copyright, are not subject to withholding tax. Examples are shrink-wrap software, software downloaded from the internet by end users and software bundled with computer hardware.

A 15% withholding tax is imposed on rent and other payments to nonresidents for the use of movable property. Effective from 17 February 2012, payments made to nonresidents (excluding PEs in Singapore) for the charter hire of ships are exempt from tax.

Payments made to nonresident professionals for services performed in Singapore are subject to a final withholding tax of 15% on their gross income, unless the nonresident professionals elect to be taxed at 20% of net income.

For payments made to nonresident public entertainers, the withholding tax rate is reduced from 15% to 10% for payments from 22 February 2010 through 31 March 2020.

In general, a 17% withholding tax is imposed on payments to nonresident companies for assistance or services rendered in connection with the application or use of scientific, technical, industrial or commercial knowledge or information, and for management or assistance in the management of any trade, business or profession. If services are performed outside Singapore, such services are not subject to withholding tax.

Payers no longer need to withhold tax on the above payments that are due on or after 21 February 2014 to PEs that are Singapore branches of nonresident companies. These branches in Singapore continue to be assessed for income tax on such payments received and must declare such payments in their annual income tax returns.

Tax treaties may override the above withholding tax rules. However, if the rate under the domestic tax law is lower than the treaty rate (see below), the domestic tax rate applies.

Singapore does not levy a withholding tax on dividends (see Section B).

The rates of withholding tax on interest and royalties may be reduced under the terms of a double tax treaty, and details of the rates applicable to treaty jurisdictions are set out below.

- (a) Exempt under certain specified circumstances.
- (b) The rate is 7% for interest paid to banks or financial institutions.
- (c) The 10% rate applies to interest paid to financial institutions. The 15% rate applies to other interest.
- (d) The rate is 5% for interest paid to banks.
- (e) The rate is 8% for interest paid to banks or financial institutions.
- (f) The rate is 10% for interest paid by industrial undertakings to financial institutions in Sweden.
- (g) Payments received as consideration for the use of, or the right to use, industrial, commercial or scientific equipment constitute business profits (that is, not royalties).
- (h) The rate is 7.5% for interest paid to financial institutions.
- (i) In certain circumstances, the reduced rates do not apply to royalties for copyrights of literary or artistic works, including cinematographic films and films or tapes for radio or television broadcasting. Reference should be made to the applicable tax treaty.
- (j) The 10% rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience. The 15% rate applies in all other cases.

- (k) Royalties approved under the Economic Expansion Incentives (Relief from Income Tax) Act are exempt.
- (l) This rate does not apply to royalties with respect to the operation of mines or quarries or the exploitation of natural resources. A contracting state may exempt or reduce the tax on industrial royalties in accordance with its domestic laws.
- (m) The 5% rate applies if the interest is received by a bank or financial institution.
- (n) The treaty between Singapore and Taiwan does not contain an interest article.
- (o) The lower rate applies to payments relating to patents, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.
- (p) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (q) The tax rate on royalties in the recipient's country is limited to 20%.
- (r) The 10% rate applies to interest arising in the Philippines with respect to the public issuance of bonds, debentures or similar obligations.
- (s) In the case of the Philippines, the 15% rate applies to royalties paid by enterprises registered with the Philippine Board of Investments (BOI) and engaged in preferred activities. It also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting. The 25% rate applies in all other cases, except for those covered by footnote (k).
- (t) The 15% rate applies to payments relating to copyrights of scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, industrial, commercial or scientific equipment or experience or information concerning industrial or scientific experience. The 20% rate applies to literary or artistic works, including cinematographic films or tapes for television or broadcasting.
- (u) The 0% withholding tax rate does not apply to persons incorporated under the International Companies Act if their income or profits are not taxed at the normal rate of corporate income tax in Mauritius or any income tax comparable thereto.
- (v) The 10% rate applies to interest paid to financial institutions. The 25% rate applies to other interest.
- (w) The treaty entered into force on 25 April 2014 and is effective from 1 January 2015.
- (x) The treaty entered into force on 25 July 2014 and is effective from 1 January 2015.
- (y) The treaty entered into force on 15 January 2014 and is effective from 1 January 2015.
- (z) A protocol amending the treaty entered into force on 12 September 2014 and is effective from 1 January 2015.
- (aa) A revised treaty entered into force on 6 February 2014 and is effective from 1 January 2015.
- (bb) The rate also applies to payments for the use of industrial, commercial or scientific equipment, which includes transport vehicles for cargo transportation.
- (cc) The rates are three-tiered, which vary according to the nature of the payment.

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Sint Maarten, with the understanding that references in the laws to “the Netherlands Antilles” should now read “Sint Maarten.” This chapter provides information on taxation in Sint Maarten only. Chapters on the BES-Islands and Curaçao also appear in this guide.

### A. At a glance

Corporate Income Tax Rate (%)	34.5 (a)
Capital Gains Tax Rate (%)	34.5 (a)
Branch Tax Rate (%)	34.5 (a)

Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 (b)

- (a) A surtax of 15% is levied on a rate of 30%, resulting in an effective tax rate of 34.5%.
- (b) Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Sint Maarten offshore tax regime may carry forward tax losses for five years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporate income tax is levied on resident and nonresident entities (including trusts as of April 2014). Resident entities are those incorporated under former Netherlands Antilles or current Sint Maarten law, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Sint Maarten. For resident entities, corporate income tax is, in principle, levied on the aggregate amount of net profits earned from all sources during the entity's accounting period. Nonresident entities are subject to tax on specific Sint Maarten income items, such as profits earned through a permanent establishment and income related to real estate property in Sint Maarten, including interest derived from a mortgage on such real estate property.

**Tax rates.** The net profits earned by resident and nonresident entities, including branches of foreign entities, are taxed at a standard rate of 34.5%. However, other rates may apply to companies qualifying for tax holidays, E-zone companies, offshore companies, tax-exempt companies, and taxed private foundations and trusts.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

**Tax incentives.** Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism and land development.

*Offshore companies.* The offshore tax regime was abolished in 2001. However, under grandfathering rules, special incentives are available for qualifying offshore companies in existence before 1 January 2002. Offshore companies are resident companies owned by nonresidents that perform their business activities abroad; that is, they earn mostly foreign-source income. Income derived by offshore companies (for example, royalty, financing, holding, portfolio investment, mutual fund, real estate and service activities) is taxed at corporate income tax rates of 2.4% to 3%. For trading and service companies, offshore status may result in reduced rates. Capital gains on securities, loans, intellectual property and immovable property are exempt from corporate income tax. In addition, advance tax rulings can be obtained for determining the offshore tax status and method of calculating the taxable basis of offshore companies. Profits derived from real estate located outside Sint Maarten are exempt from corporate income tax. The offshore tax rates are guaranteed through 2019.

*Tax-exempt companies.* Tax-exempt companies (TECs) are exempt from Sint Maarten corporate income tax. Only private limited liability companies incorporated under former Netherlands Antilles or current Sint Maarten law may qualify as TECs. TECs are allowed to solely or practically solely (more than 90%) engage in the extending of loans, investing in securities and deposits and licensing of intellectual and industrial property rights and similar property rights. To qualify as a TEC, a written request must be submitted to the Tax Inspector and certain conditions must be satisfied. TECs are not eligible for benefits under the Tax Regulation for the Kingdom of the Netherlands or for benefits under any other double tax treaty of the former Netherlands Antilles or Sint Maarten. However, exchange-of-information provisions in this tax regulation, tax treaties and tax information exchange agreements apply to TECs. If a TEC loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income, and it receives a tax-free step-up in basis.

*Taxed private foundations and trusts.* As of April 2014, the corporate income tax law provides an option for private foundations and trusts to be subject to a reduced effective corporate income tax rate of 10% (including surtax). In principle, Sint Maarten private foundations and trusts are fully exempt from corporate income tax if they do not conduct an enterprise. After the option is exercised, the reduced effective rate of 10% applies for a period of at least three full fiscal years. After this three-year period, the private foundation can request that it no longer be subject to the reduced effective rate of 10%.

*Ruling policy.* Sint Maarten has an extensive advance tax ruling practice. These rulings include the following:

- Cost-plus rulings for intercompany support activities
- Minimum gross margin rulings for finance activities
- Participation exemption rulings for holding activities
- Informal capital (or cost-plus) rulings for intercompany trading activities

These rulings are usually valid for a three-year period, with an option for extension.

*Other incentives.* Sint Maarten also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Sint Maarten.

**Capital gains.** Under the current corporate income tax rules, in general, except for offshore companies, no distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the applicable corporate income tax rate (34.5%). Taxation of capital gains on qualifying share interests (participation exemption) is discussed in Section C.

**Administration.** The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Companies must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An

extension of time to file the return and pay the tax is not granted. On request of the company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return. An extension for filing the final tax return on a later date can be obtained.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally 25% or 50%.

In general, offshore companies must file their tax returns within six months following the end of the financial year. In practice, the tax authorities do not strictly enforce this deadline for offshore companies.

**Dividends.** Sint Maarten does not levy dividend withholding tax on dividend distributions.

**Foreign tax relief.** A 100% exemption from Sint Maarten corporate income tax is available for foreign business profits. For this purpose, foreign profits are profits earned in another country through a permanent establishment or a permanent representative in the other country, or profits earned from immovable property located in a foreign country, including the rights related to the property that is part of the business activities of the taxpayer but is deemed to be part of the foreign business. If the foreign profits are derived from a business that can be considered a low-taxed portfolio investment, a reduced exemption of 70% applies.

### **C. Determination of taxable income**

**General.** Taxable profit must be calculated in accordance with “sound business practices.”

All expenses incurred with respect to conducting a business are, in principle, deductible. However, if expenses exceed normal arm’s-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. Only 80% of representation expenses, as well as expenses incurred on meals, beverages, gifts, courses and seminars, is deductible.

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s-length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted.

**Participation exemption.** In principle, a 100% participation exemption applies for all qualifying share interests held by Sint Maarten corporate taxpayers.

In general, a shareholding qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least USD500,000. In addition, any member of a cooperative association can apply for the participation exemption.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The qualifying participation is subject to a (nominal) profit tax rate of 10% (subject-to-tax clause).
- Dividends, interest or royalties received from other sources than the business of the participation do not account for 50% or more of the gross income of the participation (non-portfolio-investment clause).

The above conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower participation exemption of 70% applies to dividends. The subject-to-tax clause and the non-portfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are not deductible if the income is 100% tax-exempt.

**Tax depreciation.** In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

Asset	Rate (%)	Residual value (%)
Buildings	2 to 2.5	10
Office equipment	10 to 50	Nil
Motor vehicles	10 to 33	15
Plant and machinery	10	10

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company.

Fixed company assets acquired by companies operating in Sint Maarten may qualify for accelerated depreciation at a one-time maximum annual rate of 33 $\frac{1}{3}$ % of the acquisition costs of the assets. Fixed company assets are assets used for a business process for at least one business cycle, unless the assets are intended to be processed or sold.

An investment allowance deduction of 8% (12% for new buildings or restorations of buildings) is granted for acquisitions of fixed assets exceeding approximately USD2,800. The allowance is deducted from taxable income in the year of the investment and in the following year. The investment allowance deduction is

recaptured in the year of sale and the subsequent year if the asset is sold within 6 years (15 years for buildings) of the date of the investment.

**Groups of companies.** On written request, Sint Maarten resident companies may form a fiscal unity (tax-consolidated group) for corporate income tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated under Dutch law that has its place of effective management in Sint Maarten. The whole group is taxed for corporate income tax purposes as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to corporate income tax.

Advantages for corporate income tax purposes of fiscal unity treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for corporate income tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for revenue tax purposes.

**Relief for losses.** Losses in a tax year may be carried forward for 10 years. No carryback is available. Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in a business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Sint Maarten offshore tax regime can carry forward tax losses for five years.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Revenue tax; levied on turnover generated from goods sold and services rendered in Sint Maarten	
Standard rate	5
Real estate transfer tax	4
Import duties	0

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Sint Maarten is the Antillean guilder (ANG).

For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Sint Maarten Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange regulations imposed by the Sint Maarten Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

**Transfer pricing.** In general, intercompany charges should be determined on an arm's-length basis.

## **F. Tax treaties**

Provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Regulation for the Kingdom of the Netherlands (consisting of Aruba, Curaçao, the Netherlands, and Sint Maarten). Under a measure in the Tax Regulation for the Kingdom of the Netherlands, dividend distributions by a qualifying Dutch subsidiary to its Sint Maarten parent company are effectively subject to an 8.3% Dutch dividend withholding tax. Sint Maarten does not impose withholding tax on payments from Sint Maarten to residents of other countries.

The Netherlands Antilles has entered into tax information exchange agreements with Antigua and Barbuda, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Costa Rica, the Czech Republic, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles. Negotiations are ongoing with the United Kingdom.

Under the latest published Organisation for Economic Co-operation and Development (OECD) list, Sint Maarten qualifies as a white-listed jurisdiction.

The government of the former Netherlands Antilles entered into bilateral agreements with the European Union (EU) member states with respect to the application of the EU Council Directive on taxation of savings income. The Sint Maarten (former Netherlands Antilles) law to implement the directive took effect in July 2006.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Sint Maarten.

Sint Maarten also signed the OECD Convention on Mutual Administrative Assistance in Tax Matters.

Sint Maarten is negotiating a tax regulation with the Netherlands.

*The chapter below is based on the existing law in the Slovak Republic as of 1 January 2015. Because further changes to the 2015 tax rules are possible, readers should obtain updated information before engaging in transactions.*

## A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (a)
Branch Tax Rate (%)	22 (a)
Withholding Tax (%) (b)	
Dividends	0
Interest	19 (c)(d)

Royalties	19 (b)(d)(e)
Income from Media	19 (d)(f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	4 (g)

- (a) This rate applies for tax years beginning on or after 1 January 2014.
- (b) The rates may be reduced by an applicable double tax treaty.
- (c) See Section B.
- (d) A withholding tax rate of 35% applies to income paid to the residents of non-treaty countries or countries that have not signed the Convention on Mutual Administrative Assistance in Tax Matters.
- (e) This tax applies to nonresidents only. For resident companies, royalties are included in taxable income subject to corporate tax.
- (f) This tax applies to income received by authors (individuals) for contributions to newspapers, radio and television. It is possible for the author and the payer of the income to agree that no withholding tax be applied; in such case the income is taxed through the tax return of the author.
- (g) The tax loss may be carried forward proportionally during a period of up to four consecutive years.

## B. Taxes on corporate income and gains

**Corporate income tax.** Slovak (resident) companies are subject to corporate income tax on their worldwide income. Slovak companies are those incorporated or having their place of management in the Slovak Republic. Foreign (nonresident) companies are subject to corporate income tax only on their Slovak-source income, such as income attributable to a permanent establishment.

Under Slovak law, a permanent establishment is a fixed place or facility for nonresidents to carry out activities in the Slovak Republic. A permanent establishment includes an administrative location, branch, office, workshop, sales location, technical facility or location for research and extraction of natural resources. The fixed place or the facility is considered to be permanent if the activities are carried out continuously or repeatedly. In the case of one-off activities, the place or facility is considered to be permanent if the duration of the activities exceeds six months, either continuously or divided into 2 or more periods in the course of 12 consecutive calendar months. A building site, construction site or assembly works site (as described in the Commentary to Article 5, Paragraph 3 of the Organisation for Economic Co-operation and Development [OECD] Model Tax Treaty) is regarded as a permanent establishment only if the duration of the activities exceeds six months. A permanent establishment also includes the activity of an agent who negotiates or enters into agreements on behalf of a nonresident company under a power of attorney. The provision of services in the Slovak Republic by an enterprise through its employees or other personnel is considered to create a “service permanent establishment” if the provision of services exceeds 6 months in any consecutive 12-month period.

**Rates of corporate tax.** The corporate income tax rate is 22%, except for withholding tax (see Section A).

**Tax license.** A concept of a minimum tax, which is in the form of a tax license, is payable by legal persons in three different amounts, depending on the annual turnover. The following are the amounts:

- Non-value-added tax (VAT) payers with annual turnover of EUR500,000 or less: EUR480

- VAT payers with annual turnover of EUR500,000 or less: EUR960
- All legal persons with annual turnover exceeding EUR500,000, regardless of VAT status: EUR2,880

**Incentives.** To promote investments, the Slovak government provides potential local and foreign investors with investment incentives that are proportionate to their activities in the Slovak Republic. The maximum limits for state aid are determined by the European Union (EU) regulations and are driven by the relative development of the country or region in which an investment project is located and the unemployment rate in that region. The limits are set as a percentage of eligible costs of an investment project.

The Slovak Republic provides the following indirect forms of incentives:

- Tax relief
- Transfer of immovable assets owned by the state or municipality at a price lower than the market price

The Slovak Republic provides the following direct forms of incentives:

- Cash grants on acquisitions of fixed assets
- Cash grants on newly created jobs
- Cash grants on training

*Tax relief.* Under the Investment Aid Act, companies may apply for a 100% tax reduction (full tax relief) for 10 consecutive tax years. The tax relief can be provided for newly established companies (new production) and also for existing companies (extension of existing production).

*Transfers of immovable assets owned by the state or municipality at a price lower than the market price.* In exceptional circumstances, as part of regional aid, the government may award a financial grant or discount from the market price with respect to a transfer of immovable assets (usually land and buildings) to investors by the state or municipalities.

*Cash grants for the acquisition of fixed assets.* Cash grants can be made for the acquisition of tangible fixed assets (for example, land, buildings, and plant and machinery) and intangible fixed assets (for example, patents, licenses, know-how or unpatented technical knowledge).

*Cash grants for newly created jobs.* Cash grants for newly created jobs are made based on the anticipated wage costs related to newly created jobs and the regional location of the project (taking into account the regional unemployment rate).

*Cash grants on training.* The amounts of cash grants for training are expressed as a percentage of eligible training costs and vary according to region (grants for the Bratislava region are lower than grants for the rest of the country) and type of training (general or specific).

*General conditions.* To qualify for investment aid, applicants must meet the general and specific conditions under the Slovak Investment Aid Act and the European legislation. The following are the general conditions:

- An applicant must submit its investment intention (plan) before the start of the projected works.
- An applicant must prove its ability to cofinance the project costs (at least 25%) through its own resources or external financing (free of any investment aid or subsidy).
- The project must be completed within three years.
- The project must comply with all conditions attached to the approval of the investment aid within three years after the issuance of the approval.
- All subsidized job positions must be filled within three years after the completion of the projects and maintained for a period of five years.
- The project operation must be maintained for a minimum period of five years from its completion without change of its location.

*Specific conditions.* The specific conditions vary according to the type of project.

The following are the specific conditions for manufacturing projects:

- Fixed assets with a total value of at least EUR14 million (lower thresholds apply in regions with high unemployment) must be acquired, and at least 50% of the value of the assets must be covered by the applicant's own resources.
- New machinery for production purposes must be acquired, and the machinery costs must represent at least 60% of the overall costs of the acquired assets. The machinery must be bought on arm's-length conditions, must not have been depreciated before the acquisition and must not be older than three years.
- The realization of the investment results in the creation of new jobs.

The following are the specific conditions for technology centers:

- Fixed assets with a total value of at least EUR500,000 must be acquired, and at least 50% of the value of the assets must be covered by the applicant's own resources.
- The realization of the investment results in the creation of new jobs.
- At least 70% of the total number of employees must have a university degree.

The following are the specific conditions for shared-service centers:

- Fixed assets with a total value of at least EUR400,000 must be acquired, and at least 50% of the assets must be covered by the applicant's own resources.
- The realization of the investment results in the creation of new jobs.
- At least 60% of the total number of employees must have a university degree.

*Approval of the aid.* No legal entitlement to any investment aid exists. An applicant must submit an investment aid intent to the relevant authorities (that is, the Ministry of the Economy and other relevant aid providers), which review compliance with both the general and specific conditions under the Investment Aid Act. If the conditions are met, the Ministry of the Economy issues an official offer to the applicant and, as of the date of issuance of the offer, the applicant may officially begin the project. Following

receipt of the official offer, the investor must submit an investment aid application. The investment aid application is submitted to the Slovak government for approval. If the project capital expenditures exceed EUR50 million, approval of the European Commission is also required.

*Other national and local incentives.* The Slovak Republic is entitled to draw support from the Structural Funds and Cohesion Fund during the period of 2014 through 2020. Most of the funds will be drawn by public institutions (for example, municipalities, cities, nonprofit-making companies), while only a minor part will be available for businesses. The incentives available for companies are mainly focused on tourism, enhancing research and development (R&D) and employee training.

Investors may benefit from infrastructure (for example, electricity, water, gas and sewage) fully or partially financed by the state and/or municipality. The municipality may also offer minor tax exemptions (real estate tax and other local taxes). In general, most of this support qualifies as regional state aid.

Municipalities are entitled to use state budget funding for the development of industrial parks. At the predevelopment stage, investors are typically requested to sign a letter of intent with the relevant municipality. Benefiting from advantages offered by industrial parks does not, in general, qualify as state aid.

**Capital gains.** Capital gains are subject to income tax at a rate of 22%.

**Administration.** The tax year is usually the calendar year. However, if a company informs the tax authorities in advance, it may use its accounting year as the tax year.

Tax returns for each tax year must be filed within three months after the end of the tax year. The filing period may be extended by a maximum of three months based on a written announcement filed with the tax authority before the expiration of the regular filing deadline. Another extension of an additional three months may be granted by the tax authority if the company received income from foreign sources.

In general, monthly or quarterly prepayments of tax are required, depending on the amount of tax liability for the preceding year.

**Dividends.** Profits distributed by companies to their shareholders are not subject to tax in the Slovak Republic. Special rules apply to dividends distributed out of profits realized before 2004.

**Interest and royalties.** Under Slovak law, interest and royalty payments satisfying the conditions contained in Council Directive No. 2003/49/EC are exempt from Slovak withholding tax.

**Foreign tax relief.** Under applicable double tax treaties, a foreign tax relief is available to Slovak residents for foreign tax paid on income earned abroad.

### **C. Determination of trading income**

**General.** Corporate tax is based on the statutory accounting profit as adjusted for certain items prescribed by the tax law.

Dividends are not included in the tax base.

Items that are specifically deductible for tax purposes include, among others, tax depreciation (see *Tax depreciation*) and certain expenses relating to health and safety at work and environmental protection.

Nondeductible items include the following:

- Entertainment and travel allowances in excess of the statutory limits
- Penalties and fines
- Taxes paid on behalf of other taxpayers
- Damages exceeding compensation received, unless the damage arose as a result of natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police
- Most accruals and provisions (see *Provisions*)
- Write-offs of debts, unless specific conditions are met

**Inventories.** Inventories may be valued using the first-in, first-out (FIFO) or average-cost methods. Costs include all costs necessary to convert the inventory to its current condition and to transport it to its current location. Shortages and damages are not tax deductible, unless the damage resulted from a natural disaster, or it was caused by a person or persons unknown and this is confirmed by the police.

**Provisions.** Accruals and provisions are generally not deductible, with certain exceptions specified by law.

Special rules apply to banks and insurance companies.

**Tax depreciation.** Under the Income Tax Act, tangible assets are divided into four categories, each of which specifies a period (a specified number of years, which range from 4 to 40) over which all assets in the category are depreciated. Intangible assets are depreciated over their actual useful life.

It is possible to split assets and depreciate separable parts of the assets. Each separable part must have an acquisition price higher than EUR1,700, and separate evidence must be maintained. Only parts of assets specified by the Corporate Income Tax Act can be depreciated based on separate parts (for example, specific buildings and machinery).

Tax depreciation may be calculated by using either the straight-line method or the accelerated method. A company chooses the method on an asset-by-asset basis and, after the method is chosen, it cannot be changed during the depreciation period.

**Research and development.** To support entities performing research and development (R&D), a new allowance is available, effective from 1 January 2015. The new allowance consists of the following:

- 25% of real costs incurred for R&D
- 25% of wage costs for newly hired graduates, deductible in the year in which the graduates are hired
- 25% of the year-to-year increase of costs incurred for R&D

**Relief for losses.** Companies may carry forward losses and offset them against income proportionally during a period of up to four consecutive years following the tax year of the loss. If the tax

period is shorter than 1 months (for example, if the company is liquidated or changes its financial year), the tax loss that would normally be deductible is fully deductible in that tax period.

**Groups of companies.** Slovak law does not contain any provisions regarding the corporate taxation of groups in the Slovak Republic.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Pharmaceutical products and books	10
Other	20
Social security contributions; imposed on monthly wages with a monthly cap on wages of EUR4,120; contributions are deductible for employers; paid by	
Employer	35.2
Employee	13.4
Local taxes (tax on land, tax on buildings and apartments, and motor vehicle tax); rates vary depending on location	Various

#### E. Miscellaneous matters

**Thin-capitalization rules.** New thin-capitalization rules apply to domestic and foreign related parties, effective from 1 January 2015. The maximum amount of tax-deductible interest is set at 25% of earnings before interest, tax, depreciation and amortization. These new rules also apply to contracts signed before 1 January 2015. They do not apply to financial institutions.

**Transfer pricing.** If the price agreed between related parties differs from the usual market price and if this difference cannot be satisfactorily justified, the tax authorities may adjust the tax base to reflect the usual market price.

The transfer-pricing rules apply to personally or economically related persons, as well as to other related persons.

Persons are economically or personally related if one person participates in the ownership, control, or administration of another person, if such persons are under the control or administration of the same person, or if the same person has a direct or indirect equity interest in the persons. Participation in ownership or control exists if the direct or indirect participation in the basic capital of, or voting rights in, one company by another company is higher than 25%. Participation in the administration is a relationship between members of statutory bodies or supervisory boards of the companies. Other relationships are defined as relationships created for the purpose of decreasing the tax base or increasing the tax loss.

Under the Slovak transfer-pricing measures, an advance ruling on the transfer-pricing method may be obtained through an agreement with the tax authorities at least 60 days before the tax year in which the transfer-pricing method will be used.

The Slovak transfer-pricing measures specify the acceptable transfer-pricing methods, which conform to the methods included in the OECD Transfer-Pricing Guidelines.

Taxpayers must provide transfer-pricing documentation within 15 days after an official request by the tax authorities.

**Tax regime for business combinations.** Effective from 2010, the Slovak Corporate Income Tax Act addresses in more detail the taxation of the sale of all or part of an enterprise, the taxation of non-monetary contributions to registered capital and the taxation of mergers and divisions of companies.

## F. Treaty withholding tax rates

The Slovak Republic honors the bilateral tax treaties that were concluded by the former Czechoslovakia. The withholding rates under these treaties, and the treaties entered into by the Slovak Republic are listed in the following table.

In general, treaty rates apply if the recipient is the beneficial owner of the income. To obtain the benefit of the reduced treaty rates, the beneficial owner must be in a position to provide a tax residency certificate.

Dividends are exempt from tax. Consequently, the treaty rates do not apply to dividends paid by Slovak companies.

	Dividends %	Interest %	Royalties %

- (a) The 5% rate applies to dividends paid to a company that owns more than 10% of the capital of the payer of the dividends.
- (b) The lower rate applies if the beneficial owner is a company that controls at least 10% of the voting power of the payer.
- (c) The lower rate applies to interest on government loans.
- (d) The lower rate applies if the recipient is a company that directly holds at least 25% of the capital of the payer of the dividends.
- (e) If the corporate tax rate in a contracting state on distributed profits is 20% lower than the corporate tax rate on undistributed profits, the withholding tax rate may be increased to 25%.
- (f) This rate also applies to fees for technical services.
- (g) The 10% rate applies if the recipient is a company that owns at least 25% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividends.
- (h) The 15% rate applies to dividends paid by Slovak companies to Sri Lankan recipients. The 0% rate applies to dividends paid by Sri Lankan companies to Slovakian recipients, except for Sri Lankan income tax and additional tax under Sri Lanka's tax law. A maximum tax rate of 6% applies to the additional tax.

- (i) The 0% rate applies to royalties relating to copyrights and films derived from sources within one of the contracting states.
- (j) The 0% rate applies the following:
- Interest paid on bank loans
  - Interest paid on loans for the purchase of goods or industrial, trade and scientific equipment
  - Other interest paid if, for a period of at least two years before the interest payment, the payer and recipient of the interest are mutually connected by a direct share of at least 25% in ownership or if a third entity has a direct share of at least 25% in both the payer and recipient for a period of at least two years before the interest payment
- The 5% rate applies to other interest payments.
- (k) The 10% rate applies if the recipient is the beneficial owner of the interest and if the interest is paid on a loan granted by a bank for a period of at least 10 years in connection with the sale of industrial equipment or the installation or furnishing of scientific units or public works.
- (l) The lower rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films.
- (m) The higher rate also applies to payments for the right to use transport vehicles.
- (n) The lower rate applies if the recipient is a company (other than a general partnership) directly holding at least 10% of the capital of the payer.
- (o) The 0% rate applies to interest paid to banking institutions, interest paid on government loans and interest paid by the government or other state institutions.
- (p) The 25% rate applies to royalties paid for trademarks.
- (q) The 5% rate applies if the royalties are taxable in Spain. Otherwise, the rate is determined in accordance with the law of the source country. The 0% rate applies to cultural royalties, except for royalties for films.
- (r) The lower rate applies to industrial royalties.
- (s) The lower rate applies to the following types of interest:
- Interest paid on commercial debt claims (including debt claims represented by commercial paper) that result from deferred payments for goods, merchandise or services supplied by an enterprise
  - Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports
  - Interest paid on current accounts or loans that are not represented by bearer instruments between banks or public credit institutions of the contracting states
  - Interest paid to the other contracting state, public subdivision or local authority
- (t) The 2% rate applies to interest on government loans. The 5% rate applies to interest paid to financial institutions.
- (u) The tax in Malta on dividends may not exceed the tax on the profits out of which the dividends are paid.
- (v) The 5% rate applies to dividends paid to a company that owns more than 25% of the voting power of the payer of the dividends.
- (w) The 1% rate applies to payments under a financial lease of equipment. The 5% rate applies to payments under an operating lease of equipment, as well as to payments for the right to use cinematographic films and software for personal computers.
- (x) Dividends may be taxed in both contracting states in accordance with the domestic laws in the states.
- (y) The 0% rate applies to interest on government loans and on loans for the purchase of goods or industrial, trade and scientific equipment.
- (z) These rates are based on a multilateral treaty, which the former Czechoslovakia entered into with the other members of the Council for Mutual Economic Assistance (Comecon or CMEA).
- (aa) See Section B.
- (bb) The lower rates apply only if the recipient is one of the following:
- An individual
  - A contracting state or a political subdivision or local authority of the state
  - A recipient engaged in the active conduct of a trade or business in the United States (other than the business of making or managing investments, unless these activities are banking or insurance activities carried on by a bank or insurance company) if the income derived from the Slovak Republic is derived in connection with, or is incidental to, that trade or business
  - A company whose principal class of shares is substantially and regularly traded on a recognized securities exchange or is wholly owned, directly or indirectly, by a resident of the company's state whose principal class of shares is substantially and regularly traded on a recognized securities exchange

- A not-for-profit organization
- A person who satisfies both of the following conditions:
  - More than 50% of the beneficial interest in such person is owned, directly or indirectly, by persons entitled to the lower rates according to the treaty.
  - Not more than 50% of the gross income of such person is used directly or indirectly, to meet liabilities (including liabilities for interest or royalties) to persons not entitled to the lower rates according to the treaty.
- (cc) The lower rate applies if the recipient is a company that holds directly at least 30% of the capital of the payer of the dividends.
- (dd) The 5% rate applies if the recipient is a company that holds directly at least 70% of the capital of the payer of the dividends.
- (ee) The 5% rate applies to royalties paid for patents. The 10% rate applies to royalties paid for trademarks. The 15% rate applies in all other cases.
- (ff) The 0% rate applies to the following types of interest:
  - Interest paid to the other contracting state, public subdivisions or local authorities with respect to loans, debt-claims or credits
  - Interest paid on loans made, guaranteed or insured by public entities that are intended to promote exports
- (gg) The lower rate applies if the recipient is a company that directly holds at least 10% of the capital of the payer of the dividends.
- (hh) The 0% rate applies to cultural royalties, which are defined as the right to use copyrights of literary, artistic or scientific works, including cinematographic films. The 0% rate also applies to other royalties if, for a period of at least two years before the royalty payment, the payer and recipient of the royalty are mutually connected by a direct share of at least 25% in ownership or if a third entity has a direct share of at least 25% in both the payer and recipient for a period of at least two years before the royalty payment.
- (ii) The 0% rate applies to the following types of interest:
  - Interest paid on loans made, guaranteed or insured by the government, a local authority or national bank of a contracting state
  - Interest paid on loans made, guaranteed or insured by institutions established according to public law whose assets are fully owned by the government of a contracting state
  - Interest paid on loans made, guaranteed or insured by Eximbank SR, Slovak Guarantee and Development Bank (Slovakia), Kuwait Investment Authority, Kuwait Petroleum Corporation, Public Institution for Social Security or the Kuwait Fund for Arab Economic Development (Kuwait)

## A. At a glance

Corporate Income Tax Rate (%)	17
Capital Gains Tax Rate (%)	17
Branch Tax Rate (%)	17
Withholding Tax (%)	
Dividends	15 (a)
Interest	15 (a)
Royalties from Patents, Know-how, etc.	15 (a)
Services	15 (b)
Rentals	15 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (d)

(a) This tax applies to payments to residents and nonresidents.

- (b) Specified categories of service payments (consulting, marketing, market research, human resources, legal, administrative and information technology services) are subject to a 15% withholding tax if the payments are made to persons with a head office outside the European Union (EU) and if the country of the head office is on the list published by the Ministry (list of black-listed countries).
- (c) A 15% withholding tax applies to cross-border payments for the lease of real estate located in Slovenia.
- (d) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** In general, all companies resident in Slovenia are subject to tax on their worldwide income (but see *Foreign tax relief*). A company is resident in Slovenia if it has its legal seat or effective place of management in Slovenia. Nonresident companies are subject to tax on their Slovenian-source income only (income derived from or through a permanent establishment and other Slovenian-source income subject to withholding tax).

The definition of a “permanent establishment” of a nonresident company in Slovenia generally follows the definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and Capital 2010.

**Rates of corporate income tax.** The standard corporate income tax rate is 17%.

The corporate income tax rate for qualified venture capital companies is 0%, subject to specific conditions.

Investment funds that distribute 90% of their operating profits for the preceding tax year by 30 November of the current tax year are taxed at a rate of 0%.

Pension funds established in accordance with the Pension and Disability Insurance Act are taxed at a rate of 0%.

Insurance undertakings that are authorized to implement the pension scheme in accordance with the act regulating pension and disability insurance must pay tax with respect to the activities relating to such implementation at a rate of 0% of the tax base if a separate tax calculation is compiled only for this pension scheme.

**Capital gains.** Fifty percent of a capital gain from the disposal of shares is exempt from tax if certain conditions are met. The other 50% is treated as ordinary business income and is subject to tax at the regular corporate rate. However, in such circumstances, the expenses of a taxpayer are decreased by 5% of the exempt amount of capital gains. The same principle applies to capital losses (only 50% of a capital loss is deductible for tax purposes).

If a capital gain is realized from disposal of shares acquired with respect to venture capital investments in a venture capital company that is established in accordance with the act regulating venture capital companies, the total amount of such gain may be exempt from tax if the company had the status of a venture capital company for the entire tax period and if the company had the status of venture capital company for the entire period of the holding of the shares by the taxpayer. Losses incurred on the transfer of shares acquired under a venture capital scheme are not deductible for tax purposes.

**Administration.** The tax year is the calendar year. However, a company may select its financial year as its tax year if the selected year does not exceed a period of 12 months and if it informs the tax authorities regarding its selection of the tax year. The selected tax year may not be changed for a period of three years.

Annual tax returns must be filed within three months after the end of the tax year.

Companies must make advance payments of corporate income tax. Monthly advance payments of corporate income tax are required if the total amount of the advance payments exceeds EUR400, based on the tax calculated in the tax return for the preceding tax year. Companies must make quarterly advance payments if the total amount of the advance payments is less than EUR400, based on the tax calculated in the tax return for the preceding tax year. Advance payments of corporate income tax are due on the 10th day of the month following the period to which the advance tax payment relates. The balance of tax due must be paid within 30 days after the annual tax return is filed with the tax authorities. If the total amount of advance payments of corporate income tax exceeds the amount of tax due for the year, the overpaid tax is refunded to the company.

**Dividends.** In principle, dividends paid to residents and nonresidents are subject to withholding tax at a rate of 15%. The tax does not apply to dividends paid to a resident or to a permanent establishment of a nonresident if the dividend recipient informs the dividend payer of its tax number.

Measures implementing the EU Parent-Subsidiary Directive are in effect in Slovenia. Under these measures, dividend distributions are exempt from withholding tax if all of the following conditions are satisfied:

- The recipient of the dividends owns at least 10% of the equity capital or voting power of the payer of the dividends.
- The duration of the recipient's ownership in the payer is at least two years.
- The recipient of dividends is a taxable company that has one of the prescribed legal forms, is a resident of an EU member state and is a taxpayer for one of the taxes for which the common system of taxation applies.

If, at the time of payment of a dividend, the duration of ownership of the recipient is shorter than two years and all other requirements are met, a withholding tax exemption is still possible if the payer or its agent provides an appropriate bank guarantee to the tax authorities.

Dividends paid to EU/European Economic Area (EEA) residents are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient.

Dividends and interest paid to EU/EEA resident pension funds, investment funds and insurance companies performing pension plans are exempt from withholding tax if a tax credit is not available in the country of residence of the recipient and if the recipient of such income is not a Slovenian branch of such persons.

Dividends received by Slovenian taxable persons are generally subject to a full participation exemption.

**Foreign tax relief.** Income tax paid abroad can be credited against the final tax liability of a company if the income on which the tax has been paid abroad is included in the tax base. The foreign tax credit may not exceed the lower of the amount of foreign tax on foreign income that was paid or the amount of tax that would have been paid under Slovenian law on the foreign income if the credit had not been granted. To claim the tax credit, the taxpayer must submit appropriate documentation together with the tax return.

### C. Determination of trading income

**General.** Taxable income is based on the profits reported in the annual financial statements prepared in accordance with International Financial Reporting Standards (IFRS) or Slovenian accounting standards, which generally follow IFRS. For tax purposes, profits are adjusted, primarily for nondeductible expenses.

In general, only those expenses that are directly required for the generation of taxable revenues are allowed as deductible expenses.

The law specifies that certain expenses are not deductible, including the following:

- Incentives paid to the management board and to the board of directors
- Pecuniary penalties (fines paid to government agencies)
- Donations
- Bribes

Only 50% of entertainment expenses and fees paid to the supervisory board is deductible for tax purposes.

Interest on loans to related entities is deductible up to the amount computed by applying the acknowledged interest rate at the time of the loan approval. The Ministry of Finance publishes the acknowledged interest rate. It is possible for a taxable person to prove that a contractual interest rate exceeding the acknowledged interest rate is an arm's-length rate. The measure described in the preceding sentence applies to interest accrued after 7 June 2008 and to loan agreements entered into after January 2007.

A deduction for bad debts can be claimed if specified conditions are met.

**Inventories.** Inventories may be valued using any of the methods prescribed by the applicable accounting standards. Permissible methods include first-in, first-out (FIFO), average cost and other methods. The last-in, first-out (LIFO) method is not allowed. Inventories are measured at the lower of cost or net realizable value.

**Provisions.** The following provisions are deductible for tax purposes up to an amount equal to 50% of the provisions established in accordance with the accounting standards:

- Provisions for warranties
- Provisions for restructurings
- Provisions for expected losses from onerous contracts
- Provisions for pensions
- Provisions for termination benefits with respect to employees
- Provisions for jubilee benefits

Other provisions established based on applicable accounting standards are 100% tax deductible when they are set aside.

Specific provisions established by a bank for specific risks are deductible up to the amount prescribed by the Banking Act. Technical provisions that insurance companies are required to establish under the law are deductible up to the amount prescribed by the Insurance Companies Act. Special provisions that are required for stockbrokerage companies are deductible up to the amount prescribed by the Securities Market Act.

**Revaluation expenses.** In general, subject to special conditions and limitations, revaluations of the following items are deductible for tax purposes:

- Receivables
- Financial assets and financial instruments measured at fair value through profit or loss
- Goodwill
- Debts, receivables, investments and cash receivables, provided that the revaluations are based on changes in the exchange rate

**Tax depreciation.** Depreciation calculated using the straight-line method is deductible for tax purposes. The tax law sets the maximum depreciation rates. The following are some of the prescribed maximum straight-line depreciation rates.

<b>Assets</b>	<b>Rate (%)</b>
Buildings, including investment property	3
Parts of buildings, including investment property	6
Equipment, vehicles and machinery	20
Parts of equipment and equipment for research activities	33.3
Computer equipment, hardware and software	50
Crops lasting several years	10
Breeding animals	20
Other investments	10

**Tax relief for investments.** A taxable person may claim a reduction of the tax base in the amount of 40% of the amount invested in equipment and intangible assets (subject to certain limitations). The reduction may not exceed the amount of the tax base, and the unused portion of the tax relief can be carried forward to the next five tax periods.

For 2010 through 2015, a special regulation applies in the region of Pomurje. Taxable persons may claim a reduction of the tax base in the amount of 70% of salaries paid to employees (under certain conditions). The reduction may not exceed the amount of the tax base. In addition, taxable persons may reduce their tax base by up to 70% of the amount invested in equipment and intangible assets, under certain conditions.

**Tax relief for research and development expenditure.** Tax relief is available for research and development (R&D) expenditure.

The tax base may be decreased by 100% of the expenditure incurred in R&D activities.

The taxable person may also carry forward the unused portion of the tax relief to the following five fiscal periods.

Such tax relief may not be granted for R&D that is financed by government funding or the EU.

Tax relief for R&D expenditure excludes the use of the tax relief for investments.

**Tax relief for the hiring of employees.** An employer who hires certain employees may claim relief in the amount of 45% of the salary of such employees for the first 24 months of employment, but not exceeding the amount of the tax base. To be eligible for the relief, all of the following conditions must be met:

- The employee must be younger than 26 years old or older than 55 years old.
- The employee must have been registered as unemployed at the Employment Service of Slovenia for more than six months before the commencement of employment.
- The employee was not employed by the employer seeking the tax relief or a related party in the past 24 months.
- Agreement is reached on an employment contract for an indefinite time period.
- The overall number of employees employed at the employer in the tax period increased.

**Hidden profit distributions.** Hidden profit distributions are non-deductible expenditures and are subject to withholding tax as deemed dividends. The following items are treated as hidden profit distributions to a shareholder owning directly or indirectly at least 25% of the capital in the payer (or controlling the payer on the basis of the contract or having influence over the payer):

- Providing assets or performing services, including the discharge of debts, without consideration or at a price that is lower than the comparable market prices
- Payments for the purchase of assets and services at a price that is higher than the comparable market prices
- Payments for assets that were not transferred or for services that were not rendered
- Interest on loans granted at an interest rate that differs from the acknowledged interest rate if the taxpayer cannot prove that an unrelated entity would have agreed to the interest rate
- Interest on loans exceeding the thin-capitalization limit (see Section E)

**Relief for losses.** Assessed tax losses may be carried forward for an unlimited time period. It is possible to use tax losses carried forward from previous years, up to a maximum of 50% of the tax base for a tax period. The right to carry forward tax losses is lost if the ownership of share capital or voting rights changes by more than 50% during a tax year, as compared to the beginning of the tax year, and if the taxpayer did not conduct any business activity for two years or the business activity was significantly changed in the two-year period before or after the change of ownership (unless the business activity was significantly changed to maintain jobs or to restore business operations).

Loss carrybacks are not allowed.

**Groups of companies.** The formation of groups of companies for tax purposes is not allowed.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard rate	22
Reduced rate	9.5
Transfer tax on immovable property	2
Motor vehicle tax	
Petrol cars	0.5 to 28 and 0 to 16
Diesel cars; rate based on the level of exhaust emissions	1 to 31 and 0 to 16
Motorcycles	1.5 to 5 and 0 to 5
Camper vans; rate based on the power of the engine	6 to 18
Water Vessel Tax; amount of the tax depends on the length of the vessel (minimum of five meters) and the power of the engine	Various
Tax on insurance premiums	6.5
Property tax; levied on premises such as buildings, parts of buildings and land	0.1 to 0.75
Social security contributions, on monthly salary	
Health insurance, paid by	
Employer	6.56
Employee	6.36
Pension and disability, paid by	
Employer	8.85
Employee	15.5
Unemployment insurance, paid by	
Employer	0.06
Employee	0.14
Maternity benefits, paid by	
Employer	0.1
Employee	0.1
Workers' compensation insurance (for occupational injuries and diseases), paid by employer	0.53

## E. Miscellaneous matters

**Foreign-exchange controls.** The official Slovenian currency is the euro (EUR).

Legal entities with their head office in Slovenia and subsidiaries of foreign commercial companies that are registered in the Court Registry in Slovenia may maintain foreign-currency accounts or foreign-currency deposit accounts at authorized banks in Slovenia. Slovenian and foreign enterprises and their subsidiaries may freely perform one-sided transfers of property to or from Slovenia. Profits may be freely transferred abroad in foreign currency.

Resident enterprises may obtain loans from nonresident enterprises in their own name and for their own account. They are required to report selected loan transactions with nonresident enterprises to the Bank of Slovenia. For this purpose, loan transactions include the following:

- Pledges of real estate and other security
- Purchases by nonresidents of accounts receivable arising from transactions between resident enterprises

- Purchases by residents of accounts receivable arising from transactions between nonresident enterprises
- Certain other transactions between resident and nonresident enterprises if the economic purpose of the transaction is effectively the granting of a loan

**Transfer pricing.** Transfer prices are determined by referring to market prices of the same or comparable assets or services charged between unrelated parties (comparable market prices). Comparable market prices are determined by one of the five methods prescribed by the OECD guidelines.

A resident or nonresident and a foreign legal entity or foreign partnership are deemed to be related parties if any of the following circumstances exist:

- The taxable person directly or indirectly holds 25% or more of the value or number of shares or equity holdings, or control over management or supervision or voting rights of the foreign person or controls the foreign person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
- The foreign person directly or indirectly holds 25% or more of the value or number of shares or equity holdings or control over management or supervision or voting rights of a taxable person, or controls the taxable person on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
- The same person at the same time, directly or indirectly, holds 25% or more of the value or number of shares or holdings or participates in the management or supervision of the taxable person and the foreign person or two taxable persons or they are under the same person's control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be agreed to between unrelated parties.
- The same natural persons or members of their families directly or indirectly hold 25% or more of the value or number of shares or holdings or control over the management or supervision of the taxable person and the foreign person or two resident entities or they are under their control on the basis of contract or transaction terms that differ from terms that are or would in the same or comparable circumstances be achieved between unrelated parties.

Taxpayers must maintain transfer-pricing documentation continuously. The transfer-pricing documentation requirements are based on the masterfile concept. Under this concept, which is recommended by the European Community (EC) Council and the EU Joint Transfer Pricing Forum, the transfer-pricing documentation consists of a general part and a country-specific part. A prescribed abstract of the documentation must be enclosed with the tax return when the tax return is filed with the tax authorities. The transfer-pricing documentation must be archived for a period of 10 years after the year to which it relates.

The transfer-pricing rules can apply to transactions between domestic related parties in specific circumstances.

**Debt-to-equity rules.** Interest on loans from shareholders, who directly or indirectly at any time during a tax year hold at least 25% of capital or voting rights of the taxable person (with the exception of banks and insurance companies as borrowers), is deductible only if it is attributable to the part of the loan that does not exceed a specified multiple of the value of the share capital owned (debt-to-equity ratio). Loans from shareholders are also considered loans from related persons of the taxable person if the shareholder directly or indirectly at any time during a tax year holds at least 25% of shares, holdings or voting rights in the lender and the taxable person. For example, this applies to loans obtained from sister companies. For 2014, the applicable debt-to-equity ratio is 4:1.

## F. Treaty withholding tax rates

Most of Slovenia's double tax treaties follow the OECD model convention. The following table shows the withholding tax rates under Slovenia's tax treaties.

	Dividends %	Interest %	Royalties %
Albania	5/10 (a)	7 (s)	7
Armenia	5/10 (a)	0/10 (m)	5
Austria	5/15 (a)	0/5 (m)	5
Azerbaijan	8	0/8 (x)	5/10 (y)
Belarus	5	5 (t)	5
Belgium	5/15 (a)	10	5

- (a) The lower rate applies if the recipient of the dividends is a company that holds at least 25% of the capital of the payer of the dividends.
- (b) The 0% rate applies to interest paid to the government including local authorities or the national bank. In certain treaties, the 0% rate applies to interest paid to national export companies and other institutions, subject to additional conditions.
- (c) The lower rate applies to royalties paid for the use of, or the right to use, the following:
- Copyrights of literary, artistic or scientific works (not including cinematographic works)
  - Industrial, commercial or scientific equipment
- (d) The 0% rate applies if the recipient of the dividends is a company that holds at least 20% of the capital of the payer of the dividends.
- (e) Interest arising in a contracting state and paid to the government of the other contracting state is exempt from tax in the state of the payer. In the case of Slovenia, interest arising in Norway and paid with respect to a loan guaranteed or insured by Slovene Export and Development Bank Inc., Ljubljana on account of the Republic of Slovenia as authorized in accordance with the domestic law is exempt from tax in Norway.
- (f) For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends holds at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Canadian companies, the 5% rate applies if the recipient of dividends holds at least 10% of the voting power of the payer of the dividends. The 15% rate applies to other dividends paid by Canadian companies.
- (g) For dividends paid by Slovenian companies, the 5% rate applies if the recipient of dividends owns at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends paid by Slovenian companies. For dividends paid by Maltese companies to Slovenian resident beneficiaries, the withholding tax rate may not exceed the tax imposed on the profits out of which dividends are paid.
- (h) The 5% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic works, and films or tapes used for radio or television broadcasting.
- (i) The 10% rate applies to interest paid to financial institutions, including insurance companies.
- (j) The 10% rate applies to royalties paid for the following:

- The use of, or the right to use, copyrights of literary or artistic works, including motion pictures, live broadcasting, films and tapes
  - Other means for use or reproduction in connection with radio and television broadcasting
  - The use of, or the right to use, industrial, commercial or scientific equipment
- (k) Subject to additional conditions, the 0% rate applies to the following:
- Interest paid with respect to indebtedness of the government or local authorities
  - Interest paid to an entity that was established and operates exclusively to administer or provide benefits under pension, retirement or other employee benefit plans
- Interest arising in Slovenia (Canada) and paid to a resident of Canada (Slovenia) is taxable only in Canada (Slovenia) if it is paid with respect to loans made, guaranteed or insured by the Export Development Corporation (Slovenian Export Company).
- (l) Interest paid by a company that is a resident of a contracting state is taxable only in the other contracting state if the beneficial owner of the interest is one of the following:
- The other state
  - Political subdivision
  - Local government
  - Local authority
  - Central bank
  - Recognized pension fund
  - Abu Dhabi Investment Authority
  - Abu Dhabi Investment Council
  - Emirates Investment Authority
  - Mubadala Development Company
  - International Petroleum Investment Company
  - Dubai World
  - Investment Corporation of Dubai
  - Any other institution created by the government, a political subdivision, a local authority or a local government of that other state that is recognized as an integral part of that government, as agreed through an exchange of letters by the competent authorities of the contracting states
- Interest arising in the United Arab Emirates and paid on a loan guaranteed or insured by the Slovenian Export and Development Bank (Slovenska Izvozna in Razvojna Banka, or SID Bank) Inc. Ljubljana, on behalf of the Republic of Slovenia as authorized by the domestic law is exempt from tax in the United Arab Emirates.
- (m) The 0% applies if any of the following circumstances exists:
- The interest is paid to the government including local authorities or the national bank.
  - The payer of the interest is the government including local authorities or the national bank.
  - The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized under internal law to act as an export financing institution on behalf of the contracting state.
- (n) The tax treaty between Slovenia and the former Union of Serbia and Montenegro is expected to continue to apply to the republics of Serbia and Montenegro. The treaty does not apply to Kosovo.
- (o) The 5% rate applies if the recipient of the dividends is a company that holds at least 10% of the capital of the payer of the dividends.
- (p) The 0% rate applies if the recipient of dividends owns more than 20% of the capital voting rights of the payer of the dividends.
- (q) The 0% rate applies if either of the following circumstances exists:
- The interest is paid to the government including local authorities or the national bank.
  - The payer and the recipient are both companies and one of the companies owns directly at least 20% of the capital of the other company, or a third company that is a resident of a contracting state holds directly at least 20% of the capital of both the payer company and the recipient company.
- (r) The 0% rate applies if any of the following circumstances exists:
- The recipient of dividends owns more than 15% of the capital voting rights of the payer of the dividends.
  - In the case of Norway, the beneficial owner of the dividends is a resident of Norway who is a partner in a Norwegian partnership and alone or together with the other partners holds directly at least 15% of the capital of the company paying the dividends.
  - The dividends are derived and beneficially owned by the government of a contracting state.

- (s) A 0% rate applies if any of the following circumstances exists:
- The payer of the interest is the government of a contracting state, political subdivision, local authority or central bank of such state.
  - The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.
  - The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law on insurance and financing of international business transactions.
- (t) A 0% rate applies if either of the following circumstances exists:
- The payer of the interest is the government of a contracting state, or a political subdivision, local authority or central bank of such state.
  - The interest is paid to the government of the other contracting state or a political subdivision, local authority or central bank of such state.
- (u) The lower rate applies to royalties paid for the use, or the right to use, patents, patterns, models, plans, and secret formulas or procedures or for information regarding industrial, commercial or scientific experience.
- (v) The 0% rate applies if the beneficial owner of the income is a resident of the other contracting state and is one of the following:
- The government of that contracting state or a political subdivision or local authority thereof or the central bank
  - A governmental institution created in that contracting state under public law such as a corporation, fund, authority, foundation, agency or similar entity
  - An entity established in that contracting state, all the capital of which has been provided by that contracting state or a political subdivision or local authority thereof or any governmental institution mentioned in the bullet above together with other states
- (w) A 0% rate applies if the beneficial owner of the interest is a resident of the other contracting state and is one of the following:
- The government of that contracting state, a political subdivision or local authority thereof or the central bank
  - A governmental institution created in that contracting state under public law such as a corporation, fund, authority, foundation, agency or similar entity
  - An entity established in that contracting state, all the capital of which has been provided by that contracting state or a political subdivision or local authority thereof or a governmental institution as defined in the bullet above, together with other states
- (x) A 0% rate applies if any of the following circumstances exists:
- The payer of the interest is the government of that contracting state or an administrative-territorial or political subdivision or a local authority or the central bank.
  - The interest is paid to the government of the other contracting state or an administrative-territorial or political subdivision or a local authority or the central bank.
  - The interest is paid with respect to a loan made, approved, guaranteed or insured, on behalf of the Republic of Slovenia, by the Slovenian Export and Development Bank (Slovenska Izvozna in Razvojna Banka, or SID Bank) Inc. Ljubljana, which is authorized under the domestic legislation of the Republic of Slovenia for insuring and financing international business transactions.
  - The interest is paid to the State Oil Fund of the Republic of Azerbaijan.
- (y) The lower rate applies to royalties paid for the use of, or the right use, computer software, patents, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.
- (z) A 0% rate applies if the beneficial owner of the dividends is one of the following:
- A company (other than a partnership) that is a resident of the other contracting state and that holds directly at least 25% of the capital in the company paying the dividends
  - A pension scheme
- (aa) Interest arising in a contracting state and paid to a resident of the other contracting state that is the beneficial owner of the interest is taxable only in that other state to if any of the following circumstances exist:
- It is paid by the government of a contracting state, a political subdivision, a local authority or the central bank.
  - It is paid to the government of a contracting state, a political subdivision, a local authority or the central bank.
  - It is paid with respect to a loan made, approved, guaranteed or insured by an institution that is authorized in accordance with internal law to insure and finance international business transactions.
  - It is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.
  - It is paid by a bank to a bank of the other contracting state.

- It is paid by a company to a company of the other contracting state if the recipient company is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital or if both companies are held by a third company that is resident of an EU member state or Switzerland and that has directly a minimum holding of 25% in the capital of the first company and in the capital of the second company.
- (bb) Royalties paid by a company that is a resident of a contracting state to a resident of the other contracting state is taxable in only the other state if the beneficial owner is a company that is affiliated with the company paying the royalties by a direct minimum holding of 25% in the capital or if both companies are held by a third company that is resident of an EU member state or Switzerland and that has directly a minimum holding of 25% in the capital of the first company and in the capital of the second company.
- (cc) The lower rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
- (dd) A 0% rate applies if any of the following circumstances exists:
  - The payer of the interest is the government of that contracting state or a political subdivision, local authority or the central bank.
  - The interest is paid to the government of the other contracting state or a political subdivision, local authority or the central bank.
  - The interest is paid with respect to a loan made, approved, guaranteed or insured by an institution of the other contracting state on behalf of that state as authorized by a special domestic law on insuring and financing of international business transactions.
- (ee) Interest arising in a contracting state and paid to a resident of the other contracting state that is the beneficial owner of the interest is taxable only in that other state if any of the following circumstances exists:
  - The interest is paid the government of the other contracting state, a political subdivision or a local authority thereof, or to the central bank of the other contracting state.
  - The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.
  - The interest is paid in connection with the sale on credit of merchandise by one enterprise to another enterprise.
- (ff) Dividends paid by a company that is a resident of a contracting state is taxable only in the other contracting state if the beneficial owner of the dividends is one of the following:
  - The other state
  - Political subdivision
  - Local government
  - Local authority
  - Central bank
  - Recognized pension fund
  - Abu Dhabi Investment Authority
  - Abu Dhabi Investment Council
  - Emirates Investment Authority
  - Mubadala Development Company
  - International Petroleum Investment Company
  - Dubai World
  - Investment Corporation of Dubai
  - Any other institution created by the government, a political subdivision, a local authority or a local government of the other state that is recognized as an integral part of that government as agreed through an exchange of letters by the competent authorities of the contracting states
- (gg) The treaty enters into force on 1 January 2015.

*Certain amendments to the tax law have been proposed, but not yet enacted. Because of the expected changes to the tax law, readers should obtain updated information before engaging in transactions.*

### A. At a glance

Corporate Income Tax Rate (%)	28 (a)
Capital Gains Tax Rate (%)	18.648 (b)
Branch Tax Rate (%)	28 (a)
Withholding Tax (%)	
Dividends	15 (c)
Interest	0 (d)(e)
Royalties from Patents, Know-how, etc.	12/15 (e)

Services	15 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (g)

- (a) The mining income of gold mining companies is taxed under a special formula, and the non-mining income of such companies is taxed at a rate of 28%. Special rules apply to life insurance companies, petroleum and gas producers and small business corporations. See Section B.
- (b) This is the effective rate. See Section B.
- (c) Dividend withholding tax (DWT) was introduced, effective from 1 April 2012. Previously, a tax known as the secondary tax on companies (STC) was levied at a rate of 10%. The DWT applies to dividends declared by South African-resident companies. Certain dividends are exempt from the withholding tax, such as dividends received by South African-resident companies and public benefit organizations. A decreased rate may apply under a double tax treaty. See Section B.
- (d) Interest withholding tax at a rate of 15%, which will take effect on 1 March 2015, will apply to nonresidents only. Certain interest income will be exempt from this withholding tax, such as interest with respect to government debt instruments, listed debt instruments and debt instruments owed by banks. A decreased rate may apply under a double tax treaty.
- (e) The rate of 15% will apply to royalties paid (or due and payable) on or after 1 January 2015. Until this date, the 12% rate applies. This withholding tax applies to nonresidents only.
- (f) Services withholding tax at a rate of 15%, which will take effect on 1 January 2016, will apply only to payments made to nonresidents with respect to South African-source services not otherwise subject to normal tax after taking into account tax treaties.
- (g) See Section C.

## B. Taxes on corporate income and gains

**Company tax.** A residence-based tax system applies in South Africa. Companies are considered to be resident in South Africa if they are incorporated or have their place of effective management in South Africa.

South African-resident companies are taxed on their worldwide income (including capital gains).

Under complex look-through rules, the foreign operating income of nonresident subsidiaries derived from “non-business establishment” operations in foreign countries is taxed in the hands of the immediately cross-border South African-resident parent company on an accrual basis (see the discussion on controlled foreign companies [CFCs] in Section E). The income of nonresident subsidiaries with business establishments in foreign countries is generally exempt from the look-through rules. Dividends paid by foreign companies that are not CFCs are taxable unless the shareholding of the South African-resident recipient is 10% or more (see the discussion of foreign dividends in *Dividends*). The participation exemption amendment reducing the participation percentage from 20% to 10% took effect on 1 April 2012.

Nonresident companies are taxed on their South African-source income only.

**Tax rates.** The basic corporate tax rate is 28%. Branch profits tax at a rate of 28% is imposed on South African-source profits of nonresident companies.

*Secondary tax on companies and new dividend withholding tax.* The secondary tax on companies (STC) has been abolished. It was effective until 31 March 2012. STC was imposed on the company,

not on the shareholders, and was regarded as a tax on income. It was not similar to a withholding tax and consequently did not qualify for relief under dividends' articles in treaties.

The STC was replaced by a withholding tax imposed at a rate of 15% on dividends declared on or after 1 April 2012. The tax is levied on dividends declared and paid by South African-resident companies or by foreign companies listed on the Johannesburg Stock Exchange (JSE). Dividend withholding tax is a tax levied on the recipient of a dividend.

The declaring company must withhold the tax from the dividend paid and pay the tax to the South African Revenue Service (SARS) on behalf of the recipient. In the case of a listed company, a regulated intermediary withholds the tax.

Dividends are not subject to the withholding tax if any of the following circumstances exists:

- The beneficial owner is a resident company.
- The beneficial owner is a local, provincial or national government.
- The beneficial owner is a specified tax-exempt entity.
- The dividend is paid to certain regulated intermediaries who in turn are liable to administer the tax on behalf of the declaring company.
- The dividend is paid by a micro business, up to ZAR200,000.
- The dividend is paid by a foreign company listed on the JSE to a nonresident beneficial owner.
- The dividend is paid by a headquarter company.
- The dividend is paid to a portfolio of a collective-investment scheme in securities.
- The dividend is taxable in nature or was subject to STC.

A paying company may not withhold the dividends tax if the beneficial owner has supplied it with a written declaration stating the following:

- It is exempt from the dividends tax.
- It will inform the company when it is no longer the beneficial owner of the shares.

If the beneficial owner is a nonresident that wants to rely on a reduced dividends tax rate under a double tax treaty between South Africa and its country of residence, it must provide the company with a written declaration that the reduced rate applies and specified undertakings.

A dividend is any amount transferred or applied by a company for the benefit of its shareholders, whether by way of a distribution or as consideration for a share buyback, excluding the following:

- Amounts that result in a reduction of the contributed tax capital of the company
- Shares in the company
- An acquisition by a listed company of its own shares through a general repurchase of shares in accordance with the JSE listing requirements

STC credits that were available to a company on 31 March 2012 are carried forward into the dividend tax regime for set-off against dividends in determining the net dividend subject to the tax. The STC credit is increased by dividends received after the

introduction of the dividends tax from another company that had used its own STC credits when paying the dividends concerned and that had notified the recipient company of the amount of credits used. A company's STC credits are available for a period of three years after the introduction of the dividends tax (that is, until 31 March 2015).

**Special types of companies.** Gold mining companies may elect to have their mining income taxed under a special formula, while the non-mining income of such companies is taxed at a rate of 28%.

Petroleum and gas production is taxed in accordance with the usual provisions of the Income Tax Act, as modified by a special schedule applicable to prospecting and development expenses, as well as to farm-ins. A fiscal stability regime can be agreed to with the Minister of Finance. The tax rate is capped at a maximum of 28% for both South African-resident and nonresident companies. Dividends tax need not be withheld from dividends paid out of oil and gas income, and interest withholding tax need not be withheld from interest paid with respect to loans used to fund oil and gas expenditure.

Life assurance companies are subject to special rules that separate the taxation of policyholders' and corporate funds and apply different tax rates to such items.

Small business corporations (SBCs) are taxed at the following rates on their taxable income:

- 0% on the first ZAR67,111 of taxable income
- 7% of the amount of taxable income exceeding ZAR67,111 but not exceeding ZAR365,000
- ZAR20,852 plus 21% on taxable income exceeding ZAR365,000 but not exceeding ZAR550,000
- ZAR59,702 plus 28% on taxable income exceeding ZAR550,000

To qualify as an SBC, a company must satisfy all of the following requirements:

- Its gross income for the year must not exceed ZAR20 million.
- Its shares must be held by individuals who do not hold interests in other companies (except for certain specified interests such as interests in South African-listed companies).
- Its total personal service and investment income must not exceed 20% of its gross income.
- It is not an employment entity.

**Capital gains.** Capital gains derived by resident companies are subject to capital gains tax (CGT) at an effective rate of 18.648% (66.6% of the normal corporate tax rate).

Resident companies are subject to CGT on capital gains derived from disposals of worldwide tangible and intangible assets.

Nonresidents are subject to CGT on capital gains derived from disposals of fixed property (land and buildings) and interests in fixed property located in South Africa, and assets of a permanent establishment located in South Africa. An interest in fixed property includes a direct or indirect interest of at least 20% in a resident or nonresident company if, at the time of disposal of the interest, 80% or more of the market value of the assets of the company is attributable to fixed property located in South Africa that is held as capital assets.

A capital gain is equal to the amount by which the disposal proceeds for an asset exceed the base cost of the asset. A capital loss arises if the base cost exceeds the disposal proceeds. Capital losses may offset capital gains, and regular income losses may offset net capital gains. However, net capital losses may not offset regular income.

The base cost for an asset includes the sum of the following:

- The amount actually incurred to acquire the asset
- Cost of the valuation of the asset for the purposes of determining the capital gain or loss
- Expenditure directly related to the acquisition or disposal of the asset, such as transfer costs, advertising costs, costs of moving the asset from one location to another and cost of installation
- Expenditure incurred to establish, maintain or defend the legal title to, or right in, the asset
- Expenditure on improvement costs (if the improvement is still in existence)

The base cost is reduced by any amounts that have been allowed as income tax deductions. It is also reduced by the following amounts if such expenditure was originally included in the base cost:

- Expenditure that is recoverable or recovered
- Amounts paid by another person
- Amounts that have not been paid and are not due in the tax year

Inflation indexation of the base cost is not allowed.

Special rules apply to the base cost valuation of an asset acquired before 1 October 2001. Subject to loss limitation rules, in principle, a taxpayer may elect to use the market value of such asset on 1 October 2001 as the base cost of the asset (the asset must have been valued before 30 September 2004) or, alternatively, it may use a time-apportionment basis, which is determined by a formula, effectively splitting the gain between the components from before 1 October 2001 and after that date.

A disposal is defined as an event that results in, among other things, the creation, variation or extinction of an asset. It includes the transfer of ownership of an asset, the destruction of an asset and the distribution of an asset by a company to a shareholder. For CGT purposes, a company does not dispose of assets when it issues shares or when it grants an option to acquire a share or debenture in the company.

The proceeds from the disposal of an asset by a taxpayer are equal to the amount received by, or accrued to, the taxpayer as a result of the disposal less any amount that is or was included in the taxpayer's taxable income for income tax purposes. If a company makes a dividend distribution of an asset to a shareholder, it is deemed to have disposed of the asset for proceeds equal to the asset's market value.

Rollover relief is available in certain circumstances including destruction of assets and scrapping of assets.

All related-party transactions are deemed to occur at market value, and restrictions are imposed on the claiming of losses incurred in such transactions.

Corporate emigration, which occurs when the effective management of the company is moved outside South Africa, triggers a deemed disposal at market value of the assets of the company, followed by a deemed dividend in specie.

Subject to certain exceptions, disposals of equity shares in foreign companies to nonresidents are exempt from CGT if the disposing party has held at least 10% of the equity in the foreign company for at least 18 months.

**Administration.** The Tax Administration Act, which took effect on 1 October 2012, governs the administration of most taxes in South Africa.

The tax year for a company is its financial year. A company must file its annual tax return in which it calculates its taxable income and capital gains, together with a copy of its audited financial statements, within 60 days after the end of its financial year. Extensions of up to 12 months after the end of the financial year are usually granted. No payment is made with the annual return.

The tax authorities issue an official tax assessment based on the annual return. The company must pay the balance of tax due after deduction of provisional payments within a specified period after receipt of the assessment.

Companies must pay provisional tax in two installments during their tax year. The installments must be paid by the end of the sixth month of the tax year (the seventh month if the tax year begins on 1 March) and by the end of the tax year. The second payment must generally be accurate to within 80% of the actual tax for the year. A third (“topping up”) payment may be made within six months after the end of the tax year. If this payment is not made and if there is an underpayment of tax, interest is charged from the due date of the payment. A 20% penalty is charged if the total provisional tax paid for the year does not fall within certain prescribed parameters.

Tax penalties fall into two broad categories, which are non-compliance (for which penalty amounts can range between ZAR250 and ZAR16,000) and understatement (for which penalty amounts can range between 5% and 200% of the shortfall).

An e-filing system allows provisional payments and tax returns to be submitted electronically.

## **Dividends**

*South African dividends.* Dividends paid by South African-resident companies are generally exempt from mainstream tax in the hands of the recipients and, accordingly, recipients may not deduct expenses relating to the earning of these dividends, such as interest and other expenses incurred on the acquisition of their shares.

*Foreign dividends.* Foreign dividends are dividends paid by non-resident companies and headquarter companies. Most foreign dividends accruing to or received by South African residents are taxable. The following foreign dividends are exempt from tax:

- Dividends paid by a foreign company to a South African resident holding at least 10% of the equity and voting rights in the foreign company

- Dividends paid by a controlled foreign company (CFC) to a South African resident (subject to certain limitations)
- Dividends paid by a foreign company that is listed on the JSE
- Dividends paid by a foreign company to another foreign company that is resident in the same country as the payer

For dividends that are not exempt, a rebate may be claimed. The rebate is limited to the amount of South African tax attributable to the foreign dividend. Any excess of the foreign tax over the allowable rebate may be carried forward for a period of seven years. The excess taxes are available for set-off against foreign-source income in subsequent years (the calculation is done on a pooled basis).

A South African resident (company or individual) holding 10% or more of the equity share capital of a nonresident company is exempt from tax on all dividends (including those on preferred shares) received from the nonresident. The reduced participation rate of 10% took effect on 1 April 2012 for companies and on 1 March 2012 for individuals and applies to dividends received or accrued on or after that date.

Recipients of dividends that are not exempt are taxed on a formula basis.

*Withholding tax.* Dividend withholding tax at a rate of 15% is imposed, subject to applicable treaty rates. For further details, see *Secondary tax on companies and new dividend withholding tax*.

**Foreign tax relief.** In the absence of treaty relief provisions, unilateral relief is granted through a credit for foreign taxes paid on foreign income, foreign dividends, foreign taxable capital gains, or income attributed under the CFC rules (see Section E), limited to the lesser of the actual foreign tax liability and the South African tax on such foreign income. The credit may be claimed only if the income is from a non-South African source. Excess credits may be carried forward, but they are lost if they are not used within seven years.

A credit may be claimed with respect to tax on income from services rendered in South Africa. These credits cannot be carried forward.

Foreign taxes that cannot be claimed as a tax credit can generally be claimed as a deduction from taxable income.

### C. Determination of trading income

**General.** The assessment to tax is based on taxable income determined in accordance with the Income Tax Act. Taxable income normally approximates profit calculated in accordance with International Financial Reporting Standards, before adjustment for specific allowances and nondeductible items.

To be eligible for deduction, expenditures must be incurred in the production of income and for purposes of trade, and must not be of a capital nature.

Prepayments of insurance, rent and certain other items may not be deducted in full in the tax year of payment unless either of the following applies:

- The related service or other benefit is enjoyed within six months after the end of the tax year of payment.
- The aggregate of such expenditure is less than ZAR100,000.

Nonresident companies are exempt from tax on South African-source interest income unless at any time during that year it carried on business in South Africa through a permanent establishment. Withholding tax on interest at a rate of 15% will be introduced on 1 March 2015. Relief may be available in treaties.

**Inventories.** Inventory is valued at the lower of cost or net realizable value. Last-in, first-out (LIFO) is not an acceptable method of valuation for tax purposes. Appropriate overhead expenses must be included in the valuation of inventory. Special rules apply to construction work in progress. Consumable stores and spare parts are included in inventory.

### **Tax depreciation (capital allowances)**

*Industrial plant and machinery.* New plant and machinery that is brought into use in a manufacturing or similar process by other businesses is depreciated at a rate of 40% in the first year and at a straight-line rate of 20% for the second, third and fourth years. Used machinery or plant used in such a process qualifies for a 20% allowance per year over five years. The same allowances apply to foundations for plant and machinery if they are built specifically for particular machines and have a useful life limited to the life of the relevant machine.

SBCs (see Section B) qualify for a 100% deduction of the cost of new or used plant or machinery that is first brought into use on or after 1 April 2001 in a manufacturing or similar process. For other plant or machinery of an SBC, the following allowances are granted:

- 50% in the first year of use
- 30% in the second year of use
- 20% in the third year of use

*Industrial buildings.* A 5% annual straight-line allowance is granted on the cost of the construction of, and improvements to, industrial buildings erected by a taxpayer. Purchased industrial buildings generally qualify for annual straight-line allowances on the purchase price paid, excluding the amount attributable to the land, at the following rates:

- 2% if originally constructed before 1 January 1989
- 5% if constructed during the period of 1 January 1989 through 30 June 1996
- 10% if constructed during the period of 1 July 1996 through 31 March 2000
- 5% if constructed after 1 April 2000

*Hotels.* Construction of and improvements to hotels qualify for a 5% straight-line allowance. However, capital expenditure on the internal renovation of hotels qualifies for straight-line depreciation at an annual rate of 20%.

*Urban renewal.* The cost of erection of new buildings or renovation (including extension) of old buildings in certain depressed urban areas qualifies for allowances if the building is used by the taxpayer for the taxpayer's own trade or is leased for commercial

or residential purposes. If the building is new or significant extensions are made to an existing building, the allowance is 20% in the year of first occupation and 8% per year for the following 10 years. If a building is renovated and if the existing structural or exterior framework is preserved, the allowance is 20% per year for five years.

*Other commercial buildings.* An allowance of 5% of the cost is generally available on commercial buildings not qualifying for any of the above allowances.

*Wear-and-tear allowance for movables.* An annual "wear-and-tear" tax depreciation allowance on movable items may be calculated using the declining-balance method or the straight-line method, but the straight-line method is generally preferred by the Inland Revenue. The allowance may be claimed based on the value (generally the cost) of movable non-manufacturing machinery and equipment used by the taxpayer for the purposes of its trade. Rates for the wear-and-tear allowance are not prescribed by statute, but certain periods of depreciation are generally accepted by the tax authorities. The following are some of the acceptable periods of straight-line depreciation.

<b>Asset</b>	<b>Years</b>
Aircraft (light passenger, commercial and helicopters)	4
Computers (mainframe)	5
Computers (personal computers)	3
Computer software (mainframes)	
Purchased	3
Self-developed	1
Computer software (personal computers)	2
Furniture	6
Passenger cars	5
Heavy duty trucks	3

Apportionment of the wear-and-tear allowances is required for assets acquired during the course of a year.

Any asset costing ZAR7,000 or less may be written off in the year of acquisition of the asset.

*Special capital allowances.* Subject to the approval of the Minister of Science and Technology, the cost of developing and registering patents, designs, copyrights or similar property, and related know-how and of discovering novel scientific and technological information qualifies for a 150% deduction in the year in which the costs are incurred.

The acquisition cost of patents, copyrights and similar property (other than trademarks) and of related know-how is deductible at a rate of 5% per year. The cost of designs is deductible at a rate of 10% per year.

The cost of goodwill and trademarks (acquired on or after 1 January 2004) is not depreciable for tax purposes.

Deductions with respect to restraint of trade payments are allowed over the period of restraint, with a minimum period of three years.

A 10% annual allowance is granted for the cost of new and unused pipelines used for transportation of natural oil, gas and refined products.

A 5% annual allowance is granted for the following:

- Water pipelines and electrical lines
- Railway lines used for the transportation of persons, goods and other items

Other special capital allowances are provided for expenditures on ships and aircraft, hotel equipment, scientific research, employee housing, plant and machinery of small business corporations (see Section B), aircraft hangars, aprons, runways and taxiways, and solar, wind and tidal equipment for the generation of electricity, as well as for certain capital expenditures for mining and agriculture, which are deductible in full against mining and agricultural income.

*Recapture.* The amount of tax depreciation claimed on an asset may be recouped (recaptured) when the asset is sold. In general, the amount recouped is the excess of the selling price over the tax value, but it is limited to the amount of tax depreciation claimed.

**Groups of companies.** Companies in a group may not share their tax losses with other profitable companies in the group.

Special rules provide income tax and CGT relief for transactions between 70%-held group companies and between shareholders and their companies. These transactions include the following:

- Asset-for-share transactions
- Amalgamation transactions
- Intragroup transactions
- Unbundling transactions
- Transactions relating to the liquidation, winding up and deregistration of companies

**Relief for losses.** Tax losses may not be carried back but may be carried forward indefinitely, provided there is trading in every tax year.

Foreign tax losses may be offset against foreign income only. If a foreign tax loss exceeds foreign income, the excess may be carried forward to offset foreign income in future years for an unlimited period.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, levied on supply of a wide range of goods and services	
Standard rate	14
Disposals of going concerns and certain exports	0
Skills development levy, on remuneration	1
Securities transfer tax (stamp duty); levied on the transfer of listed and unlisted securities	0.25

## E. Miscellaneous matters

**Foreign-exchange controls.** Measures were introduced in the 1960s to stem the outflow of capital from South Africa and to ensure a measure of stability in currency markets.

Permission must be obtained from the South African Reserve Bank (SARB) for the remittance of management fees. Royalties are freely remittable if the license agreement has been approved by the SARB (see *Debt-to-equity rules*). South African companies raising loan financing offshore must obtain the authorization of the SARB regarding the terms and conditions. Foreign-equity investments are not restricted but share certificates must be endorsed “nonresident” by the SARB.

**Debt-to-equity rules.** The tax law includes measures that counter thin capitalization by adjusting both the interest rate and the amount of a loan based on arm’s-length principles. These measures previously contained a debt-to-equity ratio safe harbor of 3:1. However, the tax authorities have moved away from this ratio to require each company to consider its debt-equity mix on an arm’s-length basis. In certain circumstances, the thin-capitalization rules do not apply to headquarter companies. In addition, pending legislation will further limit deductions to 40% of taxable income (with adjustments largely intended to match cash flow). This 40% limit applies from 1 January 2015.

**Transfer pricing.** The South African tax law includes transfer-pricing provisions, which are based on the internationally accepted principles of transfer pricing. These provisions allow the South African tax authorities to treat any term or condition of a cross-border related-party transaction differently, but only to the extent that the term or condition differs from those that would exist between unrelated parties. In addition, exchange control regulations discourage unreasonable pricing by requiring that many foreign contracts, such as license agreements, be approved by the Department of Trade and Industry before payment is allowed.

**Anti-avoidance legislation.** In addition to transfer-pricing rules (see *Transfer pricing*), South African law contains general anti-avoidance provisions that target “impermissible tax avoidance arrangements.” Broadly, an impermissible tax avoidance arrangement is an arrangement that seeks to achieve a tax benefit as its sole or main purpose and was entered into in a manner that would not normally be employed for bona fide business purposes, lacks commercial substance or misuses or abuses other provisions of the tax law. The South African Revenue Service has wide powers in determining the tax consequences of an impermissible tax avoidance arrangement.

**Personal service companies.** The interposition of a corporate entity (personal service company) to disguise employment income does not prevent the imposition of employee withholding tax on fees earned. These companies are taxed at a rate of 28% and may claim only certain deductions, such as salaries, legal expenses, bad debts, contributions by the employer to pension and provident funds and medical aids, tax depreciation, rental expenses, finance charges, insurance, repairs, and fuel and maintenance for assets.

The expenses with respect to premises and assets are allowed as deductions only if they are incurred wholly or exclusively for purposes of trade.

**Controlled foreign companies.** Legislation regulates the taxation of certain income of controlled foreign companies (CFCs). Key aspects of the legislation are described below.

Net foreign income, including capital gains, derived by a CFC may be attributed proportionately to any South African-resident beneficial owner of the CFC (other than a headquarter company) that has an interest of 10% or more in the CFC. The net foreign income is calculated using South African tax principles, but generally ignoring passive income flows between CFCs in a 70%-held group.

A company is considered to be a CFC if more than 50% of the participation or voting rights of the company is held directly or indirectly by South African residents. In determining whether a company is a CFC, the participation rights and voting rights of a headquarter company (see *Headquarter companies*) are ignored. In addition, for a foreign listed company or a collective-investment portfolio, any person who holds less than 5% of the participation rights of the foreign company is deemed not to be a resident unless connected parties hold more than 50% of the participation rights or voting rights of the company. The CFC attribution rules do not apply to a resident if the resident (together with any connected person) holds less than 10% of the participation rights and voting rights.

A CFC's income is not attributed to a South African resident to the extent that the income is effectively connected to a business operation carried on through a "foreign business establishment" (FBE). In broad terms, an FBE is a fixed place of business that is suitably equipped with on-site operational management, employees, equipment and other facilities for the purpose of conducting the primary operations of the business and that is used for a bona fide business purpose and not for tax avoidance (the place of business may be located elsewhere than in the CFC's home country). Several anti-avoidance exceptions exist with respect to the measure described in this paragraph. Also, if the tax payable to a foreign government equals at least 75% of the tax liability that would have arisen in South Africa, no income needs to be imputed into the resident's taxable income.

See Section B for information regarding foreign attributable tax credits and carryforward rules.

**Headquarter companies.** The headquarter company regime was introduced to encourage foreign companies to use South Africa as their base for investing in Africa. Broadly, headquarter companies are exempt from dividend and royalty withholding tax and from interest withholding tax (after it takes effect on 1 March 2015).

A headquarter company is a South African-resident company that has elected to be treated as a headquarter company and that satisfies all of the following conditions:

- Each shareholder (alone or together with its connected persons, whether resident or nonresident) holds 10% or more of the equity shares and voting rights in the headquarter company.

- At least 80% of the cost of the headquarter company's assets (excluding cash) is attributable to investments in equity shares, amounts loaned or advanced and intellectual property in non-resident companies in which at least a 10% equity interest is held.
- If the gross income of the company exceeds ZAR5 million, at least 50% of that gross income must consist of rentals, dividends, interest, royalties, service fees received from foreign companies, or proceeds from the sale of equity shares or intellectual property in such foreign companies.

A headquarter company must submit an annual report to the Minister of Finance.

The CFC imputation rules do not apply to headquarter companies, unless 50% or more of its shares are held by South African residents. As a result of this concession, the net income of the headquarter company's foreign subsidiaries is not taxed in its hands, but in the hands of the ultimate shareholders if they are South African residents.

Headquarter companies are also exempt from the transfer-pricing and thin-capitalization rules if they on-lend loan proceeds received from their offshore shareholders to their foreign subsidiaries in which they hold at least 10%. The transfer-pricing rules also do not apply to back-to-back royalties under licenses from nonresidents.

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the withholding rate under domestic tax law.

	Dividends (a) %	Interest (b) %	Royalties (c) %
Algeria	10/15 (s)	0/10 (aa)	10 (e)

Zimbabwe	15	15	15 (c)(qq)
Non-treaty countries	15	15	15

(a) Effective from 1 April 2012, dividends are subject to withholding tax in South Africa at a standard rate of 15%, unless reduced by tax treaties as shown in the table above.

(b) Interest withholding tax at a rate of 15%, which will be effective from 1 March 2015, will apply to nonresidents only.

- (c) In general, royalties are exempt from withholding tax if they are subject to tax in the recipient's country. Otherwise, the rate is 12% until 31 December 2014, and 15%, effective from 1 January 2015. These rates may be reduced by tax treaties as shown in the table above.
- (d) In general, royalties are exempt if they are subject to tax in Israel. Otherwise, the rate is in accordance with South African domestic law, as discussed in footnote (c).
- (e) The rate applies only if the recipient is the beneficial owner of the royalties.
- (f) The 6% rate applies to royalties paid for copyrights of literary, dramatic, musical or other artistic works (excluding royalties with respect to motion picture films, works on film or videotape or other means for use in connection with television broadcasting), as well as for the use of, or the right of use, computer software, patents or information concerning industrial, commercial or scientific experience (excluding information provided in connection with a rental or franchise agreement). The 10% rate applies to other royalties.
- (g) The 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, tapes, discs, patents, know-how, trademarks, designs, models, plans or secret formulas. The 10% rate applies to the "adjusted amount" of royalties paid (that is, 70% of the gross amount of royalties) for industrial, commercial or scientific equipment. This effectively provides a 7% rate on the gross royalties paid.
- (h) The 5% rate applies to royalties paid for copyrights of literary, artistic and scientific works. The 7% rate applies to royalties paid for patents, trademarks, designs, models, plans or secret formulas, as well as for industrial, commercial or scientific equipment.
- (i) The 5% rate applies to royalties paid for copyrights of cultural, dramatic, musical or other artistic works or for industrial, commercial and scientific equipment. The 10% rate applies to other royalties.
- (j) The 15% rate applies to royalties paid for the use of trademarks. The 10% rate applies to other royalties.
- (k) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 10% rate applies to other dividends.
- (l) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.
- (m) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 10% rate applies to other dividends.
- (n) The 7.5% rate applies if the beneficial owner is a company that owns at least 25% of the shares or voting power. The 15% rate applies to other dividends.
- (o) The 8% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.
- (p) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to qualifying dividends paid by a property investment company that is a resident of a contracting state. The 10% rate applies to other dividends.
- (q) The 5% rate applies if the beneficial owner is a company that owns at least 20% of the shares. The 15% rate applies to other dividends.
- (r) The 7.5% rate applies if the beneficial owner is a company that owns at least 10% of the shares or voting power. The 10% rate applies to other dividends.
- (s) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 15% rate applies to other dividends.
- (t) The 5% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to other dividends.
- (u) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares. The 20% rate applies to other dividends.
- (v) The 10% rate applies if the beneficial owner is a company that owns at least 15% of the shares. The 20% rate applies to other dividends.
- (w) The 10% rate applies if the beneficial owner is a company that owns at least 10% of the shares. The 15% rate applies to other dividends.
- (x) The 5% rate applies if the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends during the six-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 15% rate applies to other dividends.
- (y) The 10% rate applies if the beneficial owner is a company that owns at least 25% of the shares for an uninterrupted period of two years before the payment of the dividend. The 15% rate applies to other dividends.
- (z) The 10% rate applies if the beneficial owner is a company that owns at least 30% of the shares in the company paying the dividends, and holds a minimum direct investment of USD100,000 in that company. The 15% rate applies to other dividends.

- (aa) The 0% rate applies to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.
- (bb) The 5% rate applies to banks or other financial institutions. The 10% rate applies in all other cases.
- (cc) The 0% rate applies to commercial debt claims, public financial institutions or public entities under a scheme for the promotion of exports, loans and deposits with banks and interest paid to the other contracting state. The 10% rate applies in all other cases.
- (dd) The 10% rate applies to government institutions. The 15% rate applies in all other cases.
- (ee) The 0% rate applies to government institutions. The 5% rate applies in all other cases.
- (ff) The 10% rate applies to government institutions.
- (gg) The 0% rate applies to government institutions. The 10% rate applies in all other cases.
- (hh) The 0% rate applies to government institutions. The 12% rate applies in all other cases.
- (ii) The 0% rate applies to government institutions. The 8% rate applies in all other cases.
- (jj) The 5% rate applies to banks. The 10% rate applies in all other cases.
- (kk) The 0% rate applies to government institutions and interest paid on loans or credits for periods of no less than three years that are granted, guaranteed or insured by a financial or credit institution that is wholly government-owned.
- (ll) The 0% rate applies to government institutions. The 7.5% rate applies in all other cases.
- (mm) The 5% rate applies to government institutions and interest paid on long-term loans (seven years or more) granted by banks or other credit institutions that are resident in a contracting state.
- (nn) The 0% rate applies to government institutions. The 10% rate applies to financial institutions (including insurance companies). The 15% rate applies in all other cases.
- (oo) The 0% rate applies to government institutions. The 5% rate applies to banks. The 12% rate applies in all other cases.
- (pp) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment, or transport vehicles. The 10% rate applies in all other cases.
- (qq) The exemption of royalties from tax in a contracting state if they are taxable in the other contracting state does not apply to an amount paid with respect to the operation of a mine, oil well or quarry or any other extraction of natural resources.

South Africa has ratified comprehensive tax treaties with Chile, Gabon, Germany (renegotiated), Kenya, Mauritius (renegotiated) and Sudan and protocols to existing comprehensive tax treaties with Botswana and Norway.

South Africa has signed a protocol to the existing comprehensive tax treaty with India. However, this agreement has not yet been ratified.

South Africa is currently negotiating comprehensive tax treaties with Cameroon, Cuba, the Hong Kong Special Administrative Region (SAR), the Isle of Man (limited treaty), Morocco, Qatar, Senegal, Syria, the United Arab Emirates and Vietnam, and protocols to existing comprehensive tax treaties with Austria, Belgium, Brazil, Cyprus, Germany, Indonesia, Kuwait, Luxembourg, Mozambique, Netherlands, Swaziland, Switzerland, Thailand and Turkey, but these instruments have not yet been signed.

South Africa is currently renegotiating tax treaties with Lesotho, Malawi, Namibia, Singapore, Zambia and Zimbabwe, but the renegotiated treaties have not yet been signed.

## A. At a glance

Corporate Income Tax Rate (%)	10/15/20 (a)
Capital Gains Tax Rate (%)	10/15/20 (a)(b)
Branch Tax Rate (%)	10/15/20 (a)(c)
Withholding Tax (%)	
Dividends	10 (e)
Interest	10 (d)(e)
Royalties	10 (d)
Rent	10 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) For details regarding these rates, see Section B.  
(b) Capital gains are recognized as business income, while capital losses are recognized as business losses.  
(c) The taxation of a branch is similar to that of a company or subsidiary.  
(d) This withholding tax applies to payments to both residents and nonresidents.  
(e) This is considered to be a final tax.

## B. Taxes on corporate income and gains

**Corporate income tax.** Business organizations pay South Sudan corporate income (business profits) tax. Business organizations are organizations that are required to be registered under the provisions of the Taxation Act except for insurance companies and individuals.

A resident taxpayer is a company, partnership or other entity that is established in South Sudan or that has its place of effective management in South Sudan. Taxable profit for a resident taxpayer is the taxable profit from South Sudan and foreign sources.

**Corporate tax rates.** The corporate income tax rates range from 10% to 20%, depending on the level of turnover. The following are the rates for resident and nonresident companies.

Type of business	Annual turnover (USD)*	Tax rate (%)
Small business enterprises	Up to 316,456	10
Medium business enterprises	From 316,456 to 23,734,177	15
Large business enterprises	Above 23,734,177	20

\* The exchange rate for the South Sudanese pound (SSP) against the US dollar (USD) is SSP3.16 = USD1.

To encourage industrial growth and attract foreign investment, certain incentives are available to certified investors under the Investment Promotion Act of 2009.

**Capital gains.** Capital gains are recognized as business income, while capital losses are recognized as business losses.

**Administration.** The tax period is the calendar year. A company must notify the Directorate of Taxation if its financial accounting year is not the calendar year.

A company must make payments for each quarter by 15 April, 15 July, 15 October and 15 January. The months of payment may be adjusted if the financial year is not the calendar year. The payments are estimated on a current-year basis. The tax balance, if any, must be paid by 1 April of the following year or an equivalent date if the financial year is not the calendar year.

A company must file the tax return on or before 1 April of the year following the tax year or the equivalent date if the financial year is not the calendar year.

Late filing of a return results in a penalty of 5% of the tax reportable on the return per month, up to a maximum of 25% of the tax reportable. Late payment of tax results in a penalty of 5% per month until the tax is paid. The interest rate payable on late payment of tax is published annually by the Directorate of Taxation and is 120% of the prime commercial rate (this is the average rate that commercial banks in South Sudan charge other banks and financial institutions).

**Dividends and interest.** A 10% withholding tax is imposed on payments of dividends and interest. This tax is deemed to be a final payment of tax.

**Foreign tax relief.** Tax paid by resident taxpayers that derive profits from business activities outside South Sudan through permanent establishments is allowed as a foreign tax credit if the jurisdiction (country) in which the permanent establishment is located allows similar treatment for tax paid in South Sudan.

Relief for foreign taxes paid will also be granted in accordance with tax treaties with other countries. However, South Sudan has not yet signed any tax treaties.

### C. Determination of business profits

**General.** Business profit is accounting income adjusted for certain non-taxable income and nondeductible expenses, such as depreciation. Expenses are deductible if incurred wholly and exclusively in the production of income.

Representation costs are all costs related to the promotion of the business or its products. These are allowed as deductible expenses, up to a maximum of 2% of gross income.

**Inventories.** The normal accounting basis of the lower of cost or net realizable value is generally accepted for tax purposes.

**Bad debts.** Bad debts are allowable deductions if they meet the stipulated conditions contained in the Taxation Act.

**Tax depreciation.** Depreciation charged in the financial statements is not deductible for tax purposes. It is replaced by the following tax depreciation allowances.

Asset class	Description	Rate (%)	Method
Category 1	Buildings and other structures	10	Straight line (a)
Category 2	Vehicles, office equipment and computers	33	Reducing balance (b)
Category 3	All other property	25	Reducing balance (b)

- (a) The initial cost for buildings and other structures includes taxes, duties and interest attributable to the property before they are placed in service.  
 (b) Expenditure on property in Categories 2 and 3 of less than SSP1,000 is allowed as a current expense.

Amounts expended on repair, maintenance or improvement of a category of capital assets are allowed as deductions, up to a maximum of 5% of the written-down value of that category of capital assets.

**Relief for losses.** Business losses can be carried forward for up to five successive tax periods and may be claimed as a deduction against any income in those years.

**Groups of companies.** The income tax law does not permit consolidated returns combining the profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax; on the production and importation of goods into South Sudan and on the supply of specified services	
General rate	5
Austerity rate (applicable to periods in which no oil is produced)	15
Social security scheme	8/17
(The country has not yet set up a national social security scheme. However, deductions of 8% from wages and employer contributions of 17% of wages are required.)	

#### E. Miscellaneous matters

**Foreign-exchange controls.** The Bank of South Sudan imposes certain foreign-exchange controls.

**Transfer pricing.** The arm's-length price should be determined under the comparable uncontrollable price method. If this is not possible, the resale-price method or the cost-plus method can be used.

**Debt-to-equity rules.** No debt-to-equity ratio restrictions are imposed.

## **F. Tax treaties**

South Sudan has not yet signed double tax treaties with other countries.

- (a) Other rates apply to specified entities. See Section B.  
 (b) The rate will be 25% for 2016.  
 (c) Certain capital gains are exempt from tax or are subject to tax at a reduced rate. See Section B.  
 (d) See Section B.  
 (e) The rate will be 19% for 2016.  
 (f) Certain dividends, interest and royalties are exempt from tax. See Section B.  
 (g) Exceptions may apply to this rate. See Section B.  
 (h) Effective from the 2015 tax year, tax loss carryforwards do not expire.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Corporate tax is imposed on the income of companies and other entities and organizations that have a separate legal status. Resident entities are taxable on their worldwide income. The following entities are considered to be resident entities:

- An entity incorporated under Spanish law
- An entity having its legal headquarters in Spain or its effective place of management in Spain

In addition, the tax authorities may presume that an entity resident in a tax haven or in a country with no income taxation is tax resident in Spain if any of the following circumstances exist:

- The majority of its assets is directly or indirectly located in Spain.
- A majority of its rights should be exercised in Spain.
- The principal activity of the entity is carried out in Spain.

The above measure does not apply if business reasons justify the effective performance of operations and exercise of management in such foreign jurisdiction.

Nonresident entities are taxable only on Spanish-source income, which includes income from any kind of business activity conducted in Spain through a branch, office or other permanent establishment. Nonresident companies or individuals must appoint a fiscal representative if they are conducting business activities in Spain through a permanent establishment or if certain other specified circumstances occur.

**Tax rates.** The general tax rate for residents and nonresidents that conduct business activities in Spain through a permanent establishment is 25%. However, an interim 28% rate applies for the 2015 tax year. Entities that earned (on a group basis) net revenue of less than EUR10 million in the immediately preceding tax year are also taxed at a rate of 25%, except for 2015 in which they are taxed at a rate of 25% on the tax base up to EUR300,000, and at a rate of 28% on the tax base exceeding this amount. The tax rate applicable to small and medium-sized enterprises with fewer than 25 employees that maintain or increase the number of employees and that have net revenues of less than EUR5 million is 25% in the 2015 and 2016 tax years.

Effective from 1 January 2013, newly incorporated entities carrying out business activities were taxed at a rate of 15% on the tax base up to EUR300,000 and at a 20% rate on the tax base exceeding that amount. Effective from 1 January 2015, these entities are taxed at a rate of 15%, regardless of the amount of the tax base. The special tax rates generally apply in the first fiscal year in which the entity has a positive tax base and in the following year. However, this special tax rate does not apply in certain cases, such as newly incorporated entities carrying out economic activities previously carried out by related entities and newly incorporated companies belonging to a group of companies. It also does not apply to entities qualifying as passive entities.

In addition to other tax benefits, companies licensed to operate in the Canary Islands Special Zone (Zona Especial Canaria, or ZEC) are subject to a reduced tax rate of 4% if certain conditions are satisfied. This reduced rate applies up to a maximum amount of taxable income, equaling the lesser of the following:

- The ratio of income derived from qualified ZEC transactions with respect to total income
- The amount resulting from the sum of the following amounts:
  - EUR1, 800,000 for those entities within the ZEC that fulfill the minimum job creation requisites (that is creation of three or five jobs annually, depending on the island)
  - An additional EUR500,000 for each job created exceeding the minimum job creation requirements, up to 50 jobs

The tax reduction resulting from the application of the above rule (this reduction is calculated by comparing the corporate income tax paid to the tax that would have been due under the general corporate income tax rate) cannot be greater than the following:

- 17.5% of the ZEC entity's turnover for an entity in the industrial sector
- 10% of the ZEC's entity's turnover for an entity in a different sector

In general, nonresidents operating in Spain without a permanent establishment are taxable at a general rate of 24%. This tax rate is reduced to 20% for the 2015 fiscal year and to 19% for the 2016

fiscal year for income derived obtained by European Union (EU) or European Economic Area tax residents with which an effective exchange of tax information agreement is in place. Nonresidents without a permanent establishment that operate in Spain may deduct any expense allowed by the Personal Income Tax Law, as provided in Law 36/2006, 28 November (this law also refers to the Corporate Income Tax Law to determine the net tax base in the case of economic activities), if the taxpayer is resident in an EU member state and can prove that these expenses are directly linked to their Spanish-source income and have a “direct and fully inseparable nexus” with the activity performed in Spain.

Dividends and interest received by nonresidents are subject to a final withholding tax at a rate of 20% for the 2015 tax year and 19% for the 2016 tax year. As a result of a change in the Spanish Personal Income Tax Law, share premium distributions made to non-Spanish resident shareholders may be treated as dividend distributions instead of a return of basis and therefore subject to withholding tax under the general rules.

The tax rate applicable to income from reinsurance operations is 1.5%. A 4% tax rate applies to Spanish-source income generated by companies resident abroad operating ships and aircraft in Spain.

Interest income is exempt from tax if the recipient is resident in an EU member state (or if the recipient is an EU permanent establishment of a resident in another EU member state) that is not on the Spanish tax haven list. Interest paid to nonresidents on Spanish Treasury obligations is exempt from tax. Income derived by nonresidents without a permanent establishment in Spain from bonds issued in Spain by nonresidents without a permanent establishment in Spain and from bank accounts is exempt from tax in Spain.

Distributions by Spanish subsidiaries to parent companies in EU member states that are not on the Spanish tax haven list are exempt from withholding tax if the parent company owns directly or indirectly at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision applies in situations in which the ultimate shareholder is not an EU resident.

Effective from 1 July 2011, royalties paid to associated EU resident companies or permanent establishments are exempt from tax in Spain if specific conditions are met.

In addition to nonresident income tax at a rate of 25% (28% for the 2015 fiscal year), nonresidents operating in Spain through a permanent establishment are subject to a branch remittance tax at a rate of 20% for the 2015 tax year and 19% for the 2016 tax year, unless one of the following exemptions applies:

- Branches of EU resident entities, other than tax-haven residents, are exempt from the tax.
- A branch can be exempt from tax if Spain and the country of residence of its head office have entered into a double tax treaty that does not provide otherwise and grants reciprocal treatment.

**Capital gains.** Spanish law generally treats capital gains as ordinary income taxable at the regular corporate tax rate.

Capital gains realized by nonresidents without a permanent establishment in Spain are taxed at a rate of 20% for the 2015 tax year. Capital gains on movable property, including shares, are exempt from tax if the recipient is resident in an EU country that is not on the Spanish tax haven list, unless the gains are derived from the transfer of shares and any of the following circumstances exists:

- The company's assets directly or indirectly consist primarily of Spanish real estate.
- For an EU shareholder who is an individual, he or she has held at least a 25% interest in the Spanish company at any time during the prior 12 months
- For an EU shareholder that is a legal person, it has not held a minimum ownership percentage of 5% or its acquisition cost was less than EUR20 million and a one-year minimum holding period in the subsidiary has not been met.

If a nonresident that does not have a permanent establishment in Spain disposes of Spanish real estate, a 3% tax is withheld by the buyer from the sale price, with certain exceptions. The tax withheld constitutes an advance payment on the final tax liability of the seller.

Capital gains derived by nonresidents without a permanent establishment in Spain from the reimbursement of units in Spanish investment funds or from the sale of shares traded on a Spanish stock exchange are exempt from tax in Spain if the seller is resident in a jurisdiction that has entered into a tax treaty with Spain containing an exchange of information clause.

**Administration.** The tax year is the same as the accounting period, which may be other than a calendar year. The tax year may not exceed 12 months. The tax return must be filed within 25 days after six months following the end of the tax year. In April, October and December of each calendar year, companies and permanent establishments of nonresident entities or individuals must make payments on account of corporate income tax or nonresidents income tax, respectively, equal to either of the following:

- Eighteen percent of the tax liability for the preceding tax year.
- An amount calculated by applying 5/7 of the corporate income tax rate (however, see next paragraph) to the profits for the year as of the end of the month preceding the date of the payment and then subtracting from the result tax withheld from payments to the company and advance payments of tax previously made. This alternative is compulsory for companies with turnover of more than EUR6 million in the immediately preceding tax year.

For 2012, 2013, 2014 and 2015 tax years, the tax rate mentioned in the second bullet above (that is, 5/7 of the corporate income tax rate) is increased for certain taxpayers, in accordance with their revenue in the immediately preceding tax year. The following are the tax rates:

- Revenue between EUR10 million and EUR20 million: 15/20 of the corporate income tax rate
- Revenue between EUR20 million and EUR60 million: 17/20 of the corporate income tax rate
- Revenue exceeding EUR 60 million: 19/20 of the corporate income tax rate

For 2012, 2013, 2014 and 2015 tax years, for taxpayers with revenue exceeding EUR20 million, their prepayment must not be lower than 12% of the positive earnings figure recorded in the profit-and-loss account, subtracting only the advance payments of tax previously made (that is, the so-called minimum prepayment). The minimum prepayment rate is 6% if the relevant entity derives at least 85% of its income from dividends or capital gains exempt under the participation exemption regime (see *Participation exemption regime and foreign tax relief*) or through foreign permanent establishments that are also exempt from tax in Spain.

*Statute of limitations.* Although the Spanish tax law provides that the statute of limitations period is four years, the new Corporate Income Tax Act provides that tax losses and tax credits may be subject to tax audit for a period of 10 years from the tax year of generation. It also contains provisions enabling the tax auditors to review transactions implemented in statute-barred years if they produce effects in non-statute barred periods.

**Participation exemption regime and foreign tax relief.** The exemption method may be used to avoid double taxation on dividends received from Spanish-resident and non-Spanish resident subsidiaries and on capital gains derived from transfers of shares issued by such companies if the following requirements are met:

- At the time of the distribution of the dividend or the generation of the capital gain, the Spanish company has owned, directly or indirectly, at least 5% of the share capital of the resident or non-resident company for an uninterrupted period of at least one year or the acquisition cost of the subsidiary exceeds EUR20 million. Up to 2014, for a foreign portfolio holding company (*entidades de tenencia de valores extranjeros* or ETVE; see *Foreign portfolio holding company regime*), investments over EUR6 million qualified for the participation exemption rules. Under a transitional regime, investments made by ETVEs before 1 January 2015 that meet the EUR6 million threshold but do not meet the EUR20 million requirement qualify for the participation exemption regime. For dividends, the one-year period can be completed after the distribution. In addition, the time period in which the participation is held by other group entities is taken into account for purposes of the computation of the one-year period.
- For foreign companies only, a minimum level of (nominal) taxation of 10% is required under a foreign corporate tax system similar to Spain's corporate tax system. This requirement is considered to be met if the subsidiary is resident in a country that has entered into a double tax treaty with Spain containing an exchange-of-information clause.
- The foreign company is not resident in a country identified by the Spanish tax authorities as a tax haven.

The new Spanish Corporate Income Tax Act eliminates the so-called "business activity test", commonly referred to as the 85/15 rule. However, the potential impact of the new controlled foreign company (CFC) rules (see Section E) need to be taken into account because capital gains derived from the transfer of shares may not benefit from the participation exemption regime if the subsidiary has registered CFC income in excess of certain thresholds. In addition, a new anti-hybrid measure prevents the application of the participation exemption if the dividend constitutes a deductible expense for the payer.

If the exemption method does not apply, a tax credit is allowed for underlying foreign taxes paid by a subsidiary on the profits out of which dividends are paid and for foreign withholding taxes paid on dividends.

The credit method (see below) and exemption method cannot be used with respect to the same income. Tax credits granted under the credit method may be carried forward indefinitely.

A tax credit is available for resident entities deriving foreign-source income that is effectively taxed abroad. Such credit is equal to the lesser of the following:

- The Spanish corporate tax payable in Spain if the foreign income had been obtained in Spain
- The tax effectively paid abroad on the foreign-source income (in accordance with applicable double tax treaty provisions)

**Foreign portfolio holding company regime.** A special tax regime applies to companies that have foreign portfolio holding company (*entidades de tenencia de valores extranjeros* or ETVE) status. ETVEs are ordinary Spanish companies engaged in the administration and management of participations in the equity of nonresident entities. ETVEs may also be engaged in other activities. In addition to the general exemption for dividends and capital gains derived from shares in qualifying foreign companies as described in *Participation exemption regime and foreign tax relief*, an ETVE benefits from certain other tax advantages, including the following:

- No withholding tax is imposed on distributions made by ETVEs out of reserves derived from tax-exempt foreign-source dividends and capital gains to nonresident shareholders who are not tax-haven residents.
- Capital gains derived by foreign shareholders of ETVEs from transfers of shares in ETVEs are not taxed to the extent that the capital gain corresponds to qualifying exempt dividends and gains (realized or unrealized) derived at the ETVE level if the shareholder is not resident in a tax haven.

### C. Determination of taxable income

**General.** Taxable income is the company's gross income for the tax year, less certain deductions. It is determined from the annual financial statements prepared under Spanish generally accepted accounting principles (Spanish GAAP), as adjusted for certain statutory tax provisions. Spanish GAAP follows several criteria contained in International Financial Reporting Standards (IFRS).

In general, all necessary expenses incurred in producing income during the year and depreciation on income-producing property may be deducted from gross income to arrive at taxable income.

Certain items are not deductible from gross income, such as the following:

- Penalties and fines
- Corporate income tax payments
- Gifts and donations (effective from 1 January 2015, gifts to customers are deductible up to an amount equal to 1% of a company's turnover)
- Expenditures for the improvement or enhancement of capital assets

- Amounts directly or indirectly remunerating own equity (for example, dividends and other payments made by entities in favor of their shareholders)
- Expenses related to services carried out by persons or entities that are resident in a listed tax haven, unless the taxpayer can prove that the expense relates to an effectively performed transaction
- Depreciation charges that exceed the maximum rates prescribed by law, unless it can be demonstrated that the rates used correspond to the actual depreciation incurred
- Interest expenses on intragroup financing related to the acquisition (or equity increase) of a participation in group entities, unless valid business reasons for such transactions are proven
- Losses from foreign permanent establishments, unless the permanent establishment is transferred or closed down
- Losses from members of Temporary Business Alliances (Uniones Temporales de Empresas) operating abroad, unless the interest is transferred or the relevant Temporary Business Alliance is closed down

Effective from 1 January 2015, losses on the impairment of tangible, intangible and real estate assets, which were previously tax deductible under certain circumstances as well as shareholdings in subsidiaries (these losses were previously a tax-deductible item under the worthless stock deduction regime, which was abolished, effective from the 2013 fiscal year) are deductible only if they are sold to third parties or if they are depreciated during their useful life.

**Capitalization reserve.** Effective from 1 January 2015, Spanish law contains a capitalization reserve provision. Under this provision, taxpayers may reduce their tax base by an amount equal to 10% of the increase of their net equity in a given year if they book a non-distributable reserve corresponding to the tax base reduction and keep it in their balance sheet for five fiscal years.

The reduction is calculated as 10% of the difference between the net book value of the company at the beginning of the year (excluding the preceding year's accounting result) and the net book value at the end of the financial year after deducting negative adjustments, up to a maximum limit of the positive taxable base before the utilization of any tax loss carryforward. Any amount exceeding this limit will be carried forward to the following two years.

**Hybrid instruments.** The new Spanish Corporate Income Tax Act introduces certain amendments to anti-abuse rules in accordance with the Organisation of Economic Co-operation and Development (OECD) Base Erosion Profit Shifting (BEPS) project. In this regard, a special anti-abuse provision for hybrid instruments prevents the deductibility of expenses incurred in transactions with related parties in which as a result of different tax characterizations, any of the following circumstances would exist:

- Income would not be subject to tax.
- No income would be generated.
- The income would be subject to a nominal tax rate below 10%.

In addition, intra-group profit-sharing loans are characterized as equity instruments for Spanish tax purposes. Consequently, interest

expenses derived from profit participating loans are tax deductible for the borrower. In line with such treatment, interest income derived from intra-group profit-sharing loans qualifies as a dividend that is exempt for the lender under the participation exemption regime (see Section B).

**Inventories.** The corporate tax law does not prescribe permissible methods for the valuation of inventory. Consequently, any valuation method allowed under the Spanish accounting rules may be used for tax purposes. Weighted average price is the generally accepted method, but first-in, first-out (FIFO) is also accepted. A common method is required with regard to inventories of the same nature and use.

**Provisions.** Provisions that are properly recorded are generally tax-deductible except for those specified by law.

**Depreciation.** All fixed or movable tangible assets (except land) that are owned by and used in the trade or business of a company are depreciable if their useful life exceeds a tax year. Intangible assets, such as patents, may be amortized if they depreciate and have a limited useful life. For the 2012, 2013 and 2014 tax years, they are generally amortized at an annual rate of 10%, unless it can be proved that their useful life is shorter than 10 years. Effective from 1 January 2015, intangible assets with a limited useful life are amortized according to their useful life. Under certain circumstances, goodwill and intangible assets with an indefinite life are amortizable for tax purposes. Effective from 1 January 2015, the maximum annual depreciation rate is 5%. However, for the 2015 tax year, the maximum annual depreciation rate is 2% for intangible assets and 1% for goodwill. Effective from 1 January 2015, it is possible to deduct goodwill amortization even in the case of an acquisition by group companies.

For fiscal years beginning in 2013 and 2014 for entities with revenue exceeding EUR10 million, a temporary restriction applies to the amortization or depreciation for tax purposes of fixed, intangible and real estate assets. Under this restriction, the tax-deductible expense is limited to 70% of the maximum depreciation or amortization amount, in accordance with the corporate income tax regulations. This limitation also applies for purposes of estimating the corporate income tax interim payments. However, it does not apply to assets benefiting from a special depreciation or amortization plan approved by the Spanish tax authorities. The depreciation expense not taken in the 2013 and 2014 tax years may be carried forward, and can be deducted beginning in the 2015 tax year on a linear basis over a 10-year period or during the remaining useful life of each of the respective assets. To prevent the decrease in the corporate income tax rate from impeding the full recovery of the deferred tax assets resulting from this temporary restriction, a tax credit for the amounts deducted applies. The rates of the tax credit are 2% for 2015 and 5% for 2016 and future years. Unused tax credits may be carried forward indefinitely.

Under certain conditions, Spanish-resident entities may amortize for tax purposes the financial goodwill embedded in shares of qualified foreign subsidiaries with respect to the following acquisitions:

- Acquisitions carried out before 21 May 2011 in non-EU countries if it can be proven that cross-border mergers cannot be accomplished
- Other acquisitions carried out before 21 December 2007

The amortization of financial goodwill is set at a maximum rate of 5%. However, for the 2011, 2012, 2013, 2014 and 2015 tax years, the maximum rate is 1%.

Depreciation methods are restricted to the straight-line method and the declining-balance method. The straight-line method may be used for any depreciable asset. The declining-balance method may be used only for certain new tangible assets (industrial and farming machinery, vehicles, information systems and so forth) that have an anticipated useful life of three years or more.

The basis for depreciation is the acquisition price of assets purchased by the company or the manufacturing cost of assets manufactured by the company. The acquisition price includes all related costs, such as customs duties, transportation costs and installation expenses.

Maximum depreciation rates for tax purposes are fixed by law. The rates vary depending on the industry. The following are general straight-line rates and periods of depreciation for certain assets.

<b>Asset</b>	<b>Maximum rate</b> %	<b>Maximum period of depreciation</b> years
Commercial buildings	2	100
Industrial buildings	3	68
Office equipment	10 or 15	20 or 14
Motor vehicles	16	14
Plant and machinery	10 or 12	20 or 18
Computers	25	8

Companies may use higher rates if they can demonstrate that the actual depreciation is in excess of that allowed by law.

To be deductible, the depreciation amount must be recorded in the company's accounting books (some exceptions to this requirement may apply) and must be "effective," that is, it must correspond to the actual depreciation of the asset. The second condition is met if the depreciation amount is calculated in accordance with the rates prescribed by law or with other rates that have been expressly approved by the tax authorities. Otherwise, the "effectiveness" of the depreciation must be demonstrated. On request, the tax authorities may grant approval for accelerated depreciation if the company presents a plan specifying the assets, the date and price of the acquisition, the depreciation rates and the annual depreciation allowance desired, and reasons to support the adoption of such a plan.

Investments in new tangible assets and real estate in Spain or abroad carried from 2009 through 31 March 2012 may qualify for a free tax depreciation allowance. For investments made during tax years that began during 2009 and 2010, such tax benefit is conditioned on the maintenance of the level of employment. Any depreciation allowance on such assets that was pending to be fully accelerated by 31 March 2012 will still be available for use but

will be subject to certain limitations for the 2012, 2013, 2014 and 2015 tax years. Effective from 1 January 2015, new fixed assets can be freely depreciated on an annual basis if their unit cost is below EUR300, with an overall cap of EUR25,000.

Net income (or capital gains) derived from certain intangible assets may be reduced by 60% for tax purposes if certain criteria are met. The following intangibles are subject to this special regime:

- Patents
- Drawings
- Models and blueprints
- Formulas or secret procedures
- Rights regarding information pertaining to industrial, commercial or scientific experiences

**Relief for losses.** The new Spanish Corporate Income Tax Act abolishes the prior 18-year expiration period for net operating losses and establishes an annual limit of 60% of the positive tax base before the application of the capitalization reserve tax reduction (see *Capitalization reserve*), effective for the tax year beginning on 1 January 2016 (the limitation applies to losses in excess of EUR1 million). The percentage limit is increased to 70% for tax years beginning in or after 2017.

Effective for the 2012, 2013, 2014 and 2015 tax years, the following transitory restrictions on the compensation of tax losses carried forward are imposed on taxpayers with revenue exceeding EUR20 million in the immediately preceding year:

- If revenue within the 12 months before the beginning of the tax year ranged from EUR20 million to EUR 60 million, tax losses carried forward may be offset up to a maximum amount of 50% of taxable income.
- If revenue in the period mentioned above exceeded EUR60 million, the limitation equals 25% of taxable income.

In addition, the new Spanish Corporate Income Tax Act reinforces the change-in-control rules for entities with tax loss carryforwards by introducing new circumstances resulting in restrictions on the use of loss carryforwards. In particular, under the new rules, the use of tax losses is restricted if the entity that is transferred engages in a different or additional activity within the two years after the change of ownership and if the net turnover derived from such activities in those years is greater than 50% of the average turnover of the prior two years.

**Groups of companies.** A group of companies may file a consolidated tax return if the election to apply this regime is carried out before the beginning of the tax year in which the regime is to be applied and if the tax authorities are notified of the election. After the group elects taxation under the consolidated regime, the regime applies indefinitely, provided that certain requirements are satisfied.

Before 2015, for tax purposes, a group of companies was defined as a group of corporations resident in Spain controlled by a parent corporation that was resident in Spain and that was not controlled by another resident company. However, effective from 1 January 2015, in line with several EU court cases, Spanish legislation has extended the scope of the tax group concept in order to allow the following:

- Subsidiaries held indirectly through a foreign intermediary company can form part of the tax group.
- Horizontal tax consolidation is allowed, so that Spanish direct or indirect subsidiaries of a common foreign parent company are able to form a Spanish tax group.

For this purpose, Spanish corporations include stock companies (*sociedades anónimas*), limited liability companies (*sociedades limitadas*) and limited partnerships (*sociedades comanditarias por acciones*). The parent company may adopt any of these legal forms or otherwise it must have legal personality and be subject to and not exempt from corporate income tax, if resident in Spanish territory, or if resident abroad, subject to a similar corporate tax system as in Spain. Registered branches of nonresident entities may qualify as controlling top entities in consolidated groups if certain requirements are met.

Effective from 1 January 2015, a company is deemed to control another company if, on the first day of the tax year for which the consolidated regime applies, it satisfies the following requirements:

- It owns, directly or indirectly, at least 75% of the other company's share capital (70% for companies quoted on the stock exchange) and it maintains such ownership and a minimum 50% of voting rights in such entities for the entire tax year of consolidation.
- It is not subject to the special tax regimes applicable to Domestic and European Economic Interest Groupings (*Agrupaciones de Interés Económico*) or Temporary Business Alliances (*Uniones Temporales de Empresas*).
- It is not a subsidiary of another company fulfilling the requirements to be regarded as the controlling company.

Tax-exempt companies, companies taxed at a different rate than the parent company and companies in specified legal situations, such as bankruptcy, may not be part of a group of companies.

Pre-consolidation losses can be used only up to the amount of the individual positive tax base that is aggregated to the consolidated tax base.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax (VAT), levied on goods delivered and services rendered within the Spanish territory (excluding the Canary Islands, Ceuta and Melilla), on imports from EU and non-EU member states, and on certain services rendered by foreign suppliers to persons subject to Spanish VAT	
Standard rate	21
Rate on certain necessary products and services	10
Rate on basic products	4

Nature of tax	Rate (%)
Special annual tax on real estate owned by companies resident in tax havens; assessed on the government's official value on 31 December	3
Social security and employee-related fund contributions, calculated on an employee's total compensation, with certain limitations; paid by	
Employer	29.9
Employee	6.35
Capital duty on reductions and liquidations of companies	1

## E. Miscellaneous matters

**Foreign-exchange controls.** Exchange controls are administered by the Bank of Spain and the Ministry of Economy and Finance. Exchange controls were liberalized several years ago. As a result, only a few, simple reporting requirements are now imposed, primarily for statistical purposes.

**Restrictions on the deduction of financial expenses.** Effective for tax years beginning in 2012 and future tax years, the thin-capitalization rule (debt-to-equity ratio of 3:1) is abolished and other limitations on the deductibility of financial expenses have been introduced. In general, net interest expenses exceeding 30% of earnings before interest, tax, depreciation and amortization (EBITDA), with some adjustments, may not be claimed as a deduction for tax purposes in the year of their accrual (with some exceptions, such as a minimum allowance of EUR1 million per year). The excess may be carried forward indefinitely. This restriction applies regardless of whether the interest is paid to a related party or an unrelated lender. In addition, as mentioned in *General* in Section C, interest expense on intragroup financing related to the acquisition (or equity increase) of participation in group entities is disallowed unless valid business reasons for such transactions are proven.

Effective from 1 January 2015, an additional rule has been established for leveraged acquisitions, which limits the deductibility of interest on loans to purchase shares (acquisition debt) to 30% of the operating profit of the acquiring entity. Under the new law, the limitation applies if the acquired and acquiring entities are merged within a four-year period or if new entities join the tax group in which the acquiring and acquired entity are included. The limitation does not apply to transactions implemented before 20 June 2014. Under an escape clause in the law, the limitation does not apply in the year of the acquisition if the acquisition debt does not exceed 70% of the consideration paid for the shares. In the following years, the limitation will not apply if the acquisition debt is proportionally amortized within an eight-year period until it is reduced to 30% of the total consideration.

**Anti-avoidance legislation.** To prevent fraud, the tax code contains several anti-avoidance measures in various chapters. Substance-over-form principles apply.

**Controlled foreign companies.** Under controlled foreign company (CFC) rules contained in the corporate income tax law, Spanish

resident companies must include in their tax base certain passive income derived by their foreign subsidiaries if certain control and effective taxation conditions are satisfied. Significant exceptions apply to these rules.

These rules do not apply to EU-controlled subsidiaries if the Spanish shareholder proves that the incorporation of the foreign entity was undertaken for sound business reasons and such entity carries on business activities.

Effective from 1 January 2015, certain amendments to CFC rules are introduced. These include, among others, additional substance requirements to be met by the foreign subsidiary in order to avoid the imputation of the foreign low-taxed income.

**Transfer pricing.** Spanish law includes the arm's-length principle and the requirement of documenting all related-party transactions. The arm's-length principle applies to all transactions carried out by taxpayers with related parties. The following are the principal aspects of the law:

- Taxpayers must use arm's-length values in their tax returns. As a result, taxpayers bear the burden of proof on transfer-pricing issues.
- OECD guidelines and pricing methodology apply.
- The law provides for secondary adjustments. Under this measure, if the agreed value in a transaction differs from the normal market value, the difference between the values is recharacterized by following a substance-over-form approach. In particular, for a transaction between a company and a shareholder, the difference (proportionally to the participation in the entity) is considered a dividend if such difference is in favor of the shareholder or a contribution by the shareholder to the entity's equity if the difference is in favor of the entity.
- Advance Price Agreements (APAs) may be negotiated. They apply to the current year, the preceding year and the following four years. Effective from 1 January 2015, the law allows APAs to have retroactive effect within the statute-of-limitations period.
- Statutory documentation requirements in line with the guidelines of the EU Joint Transfer Pricing Forum entered into force on 19 February 2009. This documentation is required to support the taxpayer's transfer-pricing policy regarding domestic and international transactions.
- Penalties and delay interest may be imposed. If the documentation is correct, the tax authorities do not impose a penalty with respect to a transfer-pricing assessment. However, the absence (or incompleteness) of documentation is subject to penalties, even if no adjustments are assessed.

The new Spanish Corporate Income Tax Act provides the following three exceptions to the obligation to prepare statutory transfer-pricing documentation:

- When the transaction takes place between entities that form part of a Spanish tax consolidated group
- When the transaction is carried out between members of an Economic Interest Grouping (Agrupaciones de Interés Económico) or a Temporary Business Alliance (Uniones Temporales de Empresas)
- When the transaction is carried out within the scope of a public stock offering

- When transactions with the same entity do not exceed EUR250,000 per year

Effective from 1 January 2015, simplified documentation requirements apply to entities that are not members of the same mercantile group and whose turnover does not exceed EUR45 million. For the 2012, 2013 and 2014 tax years, total transactions with the same entity not exceeding EUR100,000 per year do not need to be documented if the company is deemed a “small or medium-sized enterprise.”

Some specified transactions must be documented in any case, such as transactions performed with group “related parties” that are tax resident in a tax-haven jurisdiction. Article 18.2 of the Spanish Corporate Income Tax Act provides a definition of “related parties.”

In addition, transactions performed with related or unrelated residents of listed tax havens must comply with the arm’s-length principle and are subject to statutory documentation requirements.

## F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

- 
- (a) Distributions by Spanish subsidiaries to parent companies in EU member states are exempt from withholding tax if the parent company owns at least 5% of the subsidiary for an uninterrupted period of at least one year and if certain other requirements are met. The one-year holding period requirement may be satisfied at the date of the distribution or subsequent to such date. An anti-avoidance provision also applies in situations in which the ultimate shareholder is not an EU resident.
- (b) Interest paid to an EU resident without a permanent establishment in Spain is exempt from tax if the EU country is not on the Spanish tax haven list.
- (c) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 75% of the capital of the distributing company. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company.
- (d) Certain interest payments are not subject to withholding tax.
- (e) The treaty withholding rate tax is increased to 15% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.
- (f) A 14% rate applies to royalties paid for artistic, scientific or literary works.
- (g) Interest paid to the government or central bank of the other contracting state is exempt from tax if the recipient is the beneficial owner of the interest. The government of the state of the payer may authorize an exemption for interest paid to a beneficial recipient other than the government or central bank of the other contracting state.
- (h) See Section B.
- (i) The treaty provides for a tax sparing in favor of Armenia for the five years following the entry into force of the treaty.
- (j) The 0% rate applies if all of the following conditions are satisfied:
- The recipient of the dividends is the beneficial owner of the income.
  - The direct or indirect shareholding is equal to or higher than 25%.
  - A minimum two-year shareholding period has been fulfilled.
  - Dividends are not subject to tax in the state of residency of the recipient of the dividends.
- (k) The 5% rate applies to royalties for copyrights of literary, artistic or scientific works (including films and videotapes used for its reproduction on television or radio).
- (l) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 25% of the capital of the distributing company.
- (m) The 0% rate applies if all of the following conditions are satisfied:
- The recipient of the dividends is a corporation.
  - The shareholding is equal to or higher than 25%.
  - Exemption is allowed under the rules of the state of residence of the subsidiary.
- The rate is 15% if the effective beneficiary is a resident of the other contracting state.
- (n) A 15% rate applies if the shareholding is less than 20%.
- (o) A 10% rate applies to interest paid to financial institutions for long-term (10 or more years) loans for goods or equipment.
- (p) A 10% rate applies to royalties paid for copyrights of literary, artistic or scientific works (including films and videotapes produced by a resident of a contracting state).
- (q) A 5% rate applies if the effective beneficiary of the dividends is a corporation that controls at least 20% of the capital of the distributing company.
- (r) A 5% rate applies to interest derived from loans granted by banks and insurance companies, from bonds and securities traded on a recognized stock exchange and from sales on credit of machinery and equipment.
- (s) A 5% rate applies to royalties paid for the use of industrial, commercial and scientific equipment.
- (t) The 0% rate applies if the dividends are received by a company that holds a direct or indirect shareholding of at least 20% in the capital of the distributing company.
- (u) The protocol includes a most-favored-nation clause under which Costa Rica automatically will provide similar tax treatment to Spanish residents if Costa Rica enters into a treaty with a third country that enters into force and that offers more beneficial tax treatment for dividends, interest, royalties and/or income from personal independent services.
- (v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 20% of the capital of the distributing company.

- (w) The 5% rate applies to loans with a maturity exceeding five years.
- (x) A 15% rate applies if the shareholding is less than 25%.
- (y) Certain copyright royalties are exempt.
- (z) Spain honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
- (aa) A 5% rate applies to certain loans.
- (bb) A 5% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).
- (cc) A 12% rate applies if the shareholding is less than 25%.
- (dd) The 12% rate applies if the shareholding is less than 50%.
- (ee) A 5% rate applies to royalties paid for industrial, commercial or scientific equipment.
- (ff) No withholding tax is imposed if the recipient is a company that is subject to corporate income tax and that holds a participation of at least 10% in the payer.
- (gg) A 10% rate applies if the shareholding is at least 25%, but less than 50%. A 15% rate applies if the shareholding is less than 25%.
- (hh) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 10% of the capital of the distributing company.
- (ii) The withholding tax rate is 5% if the effective beneficiary of the dividends is a corporation and if the shareholding is equal to or higher than 25%. The withholding tax rate is 10% for other dividends.
- (jj) Withholding tax is not imposed if the recipient is the beneficial owner of the interest and if the interest is beneficially owned by a contracting state, or a political subdivision or local authority of the contracting state.
- (kk) The 20% rate applies to certain royalties.
- (ll) The 10% rate applies if the shareholding is less than 20%.
- (mm) A 5% rate applies to royalties paid for copyrights of musical compositions and literary, dramatic or artistic works. An 8% rate applies to royalties paid for the following:
- Motion picture films
  - Films, tapes and other means of transmission or reproduction of sounds
  - Industrial, commercial or scientific equipment
  - Copyrights of scientific works
- (nn) A 5% rate applies to interest paid with respect to sales of industrial, commercial, scientific equipment, or on loans from financial institutions. A 0% rate applies to interest paid to the government or central bank of the other contracting state.
- (oo) A 5% rate applies to royalties paid for copyrights of musical compositions, and literary, dramatic or artistic works, and to amounts paid for the use of industrial, commercial or scientific equipment.
- (pp) The rate is 4% for royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).
- (qq) The 10% rate applies if the shareholding is less than 25%.
- (rr) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly or indirectly controls at least 10% of the capital of the distributing company.
- (ss) The treaty withholding tax rate is increased to 10% in certain circumstances if the recipient is not a corporation or if the shareholding does not exceed a certain percentage.
- (tt) A 5% rate applies if the effective beneficiary of the dividends is a corporation that controls at least 25% of the capital of the distributing company.
- (uu) A 15% rate applies if the shareholding is less than 10%.
- (vv) A 0% rate applies if the beneficial owner holds at least 10% of the share capital of the distributing entity for at least one year and if certain other conditions are met.
- (ww) A 5% rate applies to income derived from the rendering of technical services.
- (xx) A 5% rate applies if the shareholding is less than 25%.
- (yy) The withholding tax rate is 10% if the effective beneficiary of the interest is a financial entity.
- (zz) The 0% rate applies if the dividends are received by a company that holds directly or indirectly a shareholding of at least 50% in the capital of the distributing company. A 5% rate applies if the direct shareholding is more than 25% but less than 50%. Otherwise, a 10% rate applies.
- (aaa) The withholding rate is 5% if the recipient is not subject to Dutch tax on the dividends and if the 10% rate would otherwise apply.

- (bbb) The 5% rate applies if the beneficial owner of the dividends is a company that has owned directly for the six-month period ending on the date on which entitlement to the dividends is determined at least 50% of the voting shares of the distributing company. The 7.5% rate applies if the beneficial owner of the dividends is a company that has owned directly for the period of six months ending on the date on which entitlement to the dividends is determined at least 25% of the voting shares of the distributing company.
- (ccc) Certain interest payments are not subject to withholding tax.
- (ddd) Tax treaty provisions do not apply if the dividend, interest or royalties paid by a Panamanian resident are sourced in Spain or in a country that has not entered into a tax treaty with Spain and if such income has not been effectively taxed in Panama.
- (eee) The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 80% of the capital of the distributing company and if certain conditions are satisfied. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly controls at least 40% of the capital of the distributing company.
- (fff) A 10% rate applies to interest paid with respect to sales of industrial equipment or publicly traded bonds.
- (ggg) A 20% rate applies to royalties paid with respect to films, television or radio. A 10% rate applies to royalties derived in preferred areas of activities.
- (hhh) A 0% rate applies to royalties paid for copyrights of literary, dramatic, musical or artistic works (excluding motion picture films and television films or videotapes).
- (iii) The withholding tax rate is 5% if the effective beneficiary of the dividends is a company that has invested at least ECU100,000 in the share capital of the payer and if the dividends are exempt from tax in the other contracting state. The withholding tax rate is 10% if only one of these requirements is met. The withholding tax rate is 15% for other dividends.
- (jjj) No withholding tax is imposed on interest paid to and beneficially owned by financial institutions with respect to long-term (seven years or more) loans and certain other debts.
- (kkk) A 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 25% of the capital of the distributing company.
- (lll) A most-favored-nation clause applies.
- (mmm) The 5% rate applies to royalties paid for the use of copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting, but excluding computer software. The 10% rate applies to royalties paid for the use of patents, trademarks, designs or models, plans, secret formulas or processes and computer software, for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
- (nnn) The 5% rate applies if the distributing company is a stock-listed real estate investment company and if the beneficial owner of the dividends directly or indirectly controls less than 10% of the capital of the distributing company.
- (ooo) A 0% rate applies to interest paid to financial institutions for long-term (seven years or more) loans.
- (ppp) A 0% rate applies if certain conditions are met.
- (qqq) A limitation-of-benefits clause in the treaty may apply.
- (rrr) A 5% rate applies to loans over seven years.
- (sss) A 5% rate applies to certain dividend distributions.
- (ttt) A 10% rate applies to interest derived from loans granted by banks or in connection with sales on credit of merchandise or equipment.
- (uuu) Spain honors the double tax treaty with the former USSR with respect to Belarus, Kyrgyzstan, Tajikistan and Ukraine.
- (vvv) A 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the entity paying the dividends.
- (www) The 0% rate applies if the beneficial owner of the dividends is a capital company that directly controls at least 75% of the capital of the distributing company.
- (xxx) The 5% rate applies to royalties paid for copyrights of literary, artistic or scientific works.
- (yyy) A 4.95% rate applies to interest paid to financial institutions.

- (zzz) The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the distributing company.
- (aaaa) The 0% rate applies to dividends paid to a company that controls, directly or indirectly, at least 10% in the equity of the distributing company, provided that the recipient of the dividends is the beneficial owner. The 15% rate applies to dividends paid out of income (including capital gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempt from tax. The 10% rate applies in all other cases.
- (bbbb) The 20% rate applies to EU residents in jurisdictions with which an exchange of information agreement is in place.

Spain is in the process of negotiation, ratification or signature of its tax treaties with Azerbaijan, Bahrain, Belarus, Cape Verde, India, Montenegro, Namibia, Nigeria, Oman, Peru, Qatar, Senegal, Syria, the United States and Uzbekistan. Spain is negotiating agreements on the exchange of tax information with Bermuda, the Cayman Islands, the Cook Islands, Guernsey, the Isle of Man, Jersey, Macau, Monaco, St. Lucia and St. Vincent, and the Grenadines. The agreement between Spain and the United States for the improvement of international tax compliance and the implementation of the Foreign Account Tax Compliance Act entered into force on 1 July 2014.

Spain is renegotiating its tax treaties with Austria, Belgium, Canada, Mexico and the Netherlands.

Spain has authorized the signature of its treaty with Andorra and protocols to its tax treaties with India and the United States.

*This chapter reflects amendments based on budget proposals announced on 24 October 2014. At the time of writing, these amendments had not been enacted. After enactment, these amendments will be effective from 1 April 2015, unless specified otherwise.*

## A. At a glance

Corporate Income Tax Rate (%)	28 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	28 (a)
Withholding Tax (%)	
Dividends	10 (b)
Interest	10 (c)
Royalties from Patents, Know-how, etc.	10
Management Fees	5
Sale Price of Gems at Gem Auctions	2.5
Reward Payments, Lottery Winnings and Gambling Winnings	10 (d)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

- (a) This is the standard rate. For other rates, see Section B.
- (b) This tax, which is a final tax, is imposed on dividends paid to residents and nonresidents. A deemed dividend tax is imposed on companies if the dividend distributed is less than 10% of the company's distributable profits. For details, see Section B.
- (c) The 10% rate applies to interest paid on deposits. Companies may offset the 10% withholding tax against their annual income tax liability.
- (d) This withholding tax applies to amounts exceeding LKR500,000.
- (e) See Section C.

## **B. Taxes on corporate income and gains**

**Corporate income tax.** Companies resident in Sri Lanka are subject to income tax on their worldwide income. Nonresident companies are subject to tax on their profits and income derived from Sri Lankan sources. A company is considered to be a resident company if its registered or principal office is in Sri Lanka or if the control and management of its business are exercised in Sri Lanka.

**Rates of corporate tax.** The standard rate of corporate income tax is 28%.

If the income tax rate following the expiration of a tax holiday, as specified in a Board of Investment (BOI) agreement, is higher than the income tax rate under the Inland Revenue Act, the lower rate prevails.

Companies in the business of the import, manufacture and sale of liquor or tobacco are subject to tax at a rate of 40%.

Profits derived from priority sectors are taxed at a rate of 12%. The 12% rate applies to the following priority sectors:

- Construction
- Exports (including organic tea in bulk)
- Tourism

Export profits derived by direct and indirect exporters from products that include more than 65% value addition and that are sold with a brand name registered in Sri Lanka with patents rights reserved in Sri Lanka are subject to tax at a rate of 10%.

Profits from agriculture are taxed at a rate of 10%, effective from 1 April 2011.

Venture capital companies and petroleum exploration companies are subject to tax at a rate of 12%.

Undertakings for the operation and maintenance of storage facilities, local software development or the supply of labor are subject to tax at a rate of 10%.

Profits and income from educational services are taxed at a rate of 10%.

Profits and income of an undertaking engaged in the manufacturing of articles or the provision of services that has turnover of less than LKR750 million (non-group company) are taxed at a rate of 12%.

Profits and income of newly established branches of commercial banks dedicated to development banking are taxed at a rate of 24%.

A 12% rate applies to manufacturing income attributable to the amount of tea purchased for manufacturing by a joint venture entered into by a grower and manufacturer of tea with a tea exporter, for the purpose of exporting pure Sri Lankan tea in value-added form with a Sri Lankan brand name.

Profits and income from the local manufacturing of handloom products are taxed at a rate of 12%.

Profits and income derived from healthcare services are taxed at a rate of 12%.

Profits and income from poultry farming are taxed at a rate of 10%.

Profits and income paid in foreign currency from the supply of goods manufactured in Sri Lanka or services to foreign ships are taxed at a rate of 12%

Profits and income derived from the operation of a mini hydro-power project or other alternative energy source are taxed at a rate of 12%.

Profits and income from the sale of products manufactured in Sri Lanka that are received in foreign currency through a foreign exchange earning account authorized by the Central Bank of Sri Lanka are taxed at a rate of 12%.

Export-oriented companies manufacturing garments or ceramic products that are permitted to increase domestic sales up to 40% are subject to tax at a rate of 12% on such sales.

Profits and income arising to an export-oriented BOI company from the sale of goods to a BOI company enjoying a tax holiday under Sections 16C, 16D or 17A of the Inland Revenue Act No. 10 of 2006 (most recently amended by the Amendment Act No. 8 of 2012) or to a company engaged in a Strategic Development Project are taxed at a rate of 12%.

Profits and income derived from the supply of services to exporters of goods or services or directly to foreign principals are taxed at a rate of 12%.

Unit trust management companies are taxed at a rate of 10%.

Clubs and associations are subject to tax at a rate of 10%.

Nonresident companies may qualify for the 12% rate in the priority sectors, except for construction. Foreign-currency banking units of banks are subject to income tax at a rate of 28% on their offshore and onshore profits.

Local manufacturers that commenced business in the 1970s and sustained competitiveness through imports and by entering export markets qualify for a reduction of 10% on the income tax payable on profits and income from sale of manufactured products in the local market.

Companies in the local sugar industry are subject to income tax at a rate of 12%, including on the manufacturing of sugar.

Existing enterprises in the business of manufacturing products other than liquor and tobacco are granted a 50% reduction on the

income tax payable on a maximum income of LKR500 million per year for five years if they satisfy both of the following conditions:

- They are currently liable to income tax at a rate of 28%.
- They expand in any province other than the Western Province by investing more than LKR300 million on or after 1 April 2015 and before 31 March 2017 in the acquisition of fixed assets on which depreciation allowances are claimable.

A company that registers with the Inland Revenue Department on or before 31 December 2015 with a committed investment in excess of LKR500 million in a manufacturing business other than liquor and tobacco within a period specified by the Commissioner General of Inland Revenue is entitled to a 50% reduction on the applicable tax rate for a period of seven years from the beginning of commercial operations.

**Tax incentives.** All of the income tax incentives offered have been streamlined and are now included in the Inland Revenue Act.

The BOI incentives are limited to those relating to customs duties, exchange-control restrictions and certain other items.

Significant tax incentives currently offered include the incentives described below.

A four-year tax holiday is granted to new enterprises engaged in agriculture and/or agro-processing, animal husbandry and/or processing, fisheries and/or fish processing or creative work, with a minimum investment of LKR25 million.

Medium-scale enterprises engaged in specified activities are eligible for tax holidays based on the amount of the investment. The following are the tax holidays:

Investment		Length of tax holiday Years
Exceeding LKR millions	Not exceeding LKR millions	
50	100	4
100	200	5
200	–	6

Large-scale enterprises engaged in specified activities, including processing and solid-waste management, are eligible for tax holidays based on the amount of the investment. The following are the tax holidays:

Investment		Length of tax holiday Years
Exceeding LKR millions	Not exceeding LKR millions	
300	500	6
500	700	7
700	1,000	8
1,000	1,500	9
1,500	2,500	10
2,500	–	12

A five-year tax holiday, followed by a concessionary tax rate of 12%, is granted to new enterprises engaged in the production of certain items to replace imports that make the following investments.

<b>Products</b>	<b>Investment (USD millions)</b>
Cement	50
Steel	30
Milk powder	30
Pharmaceuticals	10
Fabric	5

A concessionary tax rate of 12% is granted to existing enterprises that are engaged in the production of the above-mentioned products to replace imports and make the above-mentioned investments.

Profits and income derived from undertakings for the operation of port terminals in Sri Lanka are exempt from income tax.

Profits and income derived from services rendered in ports in Sri Lanka in the course of business carried on in the ports are exempt from income tax.

Profits and income of undertakings for the construction of ports in Sri Lanka are exempt from tax.

A five-year tax holiday is granted to a new company that invests from USD5 million to USD10 million in a new undertaking engaged in specified activities with respect to the development of the national economy.

A five-year tax holiday beginning on 1 April 2011 is granted for investments in fishing, cultivation and primary processing of agricultural seeds or planting materials.

A tax exemption is granted for profits earned in foreign currency by manufacturers of textiles, leather products, footwear and handbags from supplies made to foreign purchasers that establish headquarters in Sri Lanka for management, finance, supply chain and billing.

A five-year income tax holiday beginning 1 April 2011 is granted to the Ceylon Electricity Board, National Water Supply and Drainage Board, Ceylon Petroleum Corporation and Sri Lanka Ports Authority.

A 10-year income tax holiday beginning 1 April 2011 is granted to the Sri Lankan Airlines and Mihin Lanka (a budget airline in Sri Lanka).

Profits and income (other than interest and dividends) of the Institute of Certified Management Accountants of Sri Lanka and the Child Protection Authority are exempt from income tax.

Unit trusts and mutual funds are taxed at a rate of 10% on their income. Income derived by unit trusts from investments in listed debentures and equity is exempt from income tax.

Income earned by resident companies or partnerships for services provided in or outside Sri Lanka to persons or partnerships outside Sri Lanka (other than commissions, discounts or similar receipts) is exempt from income tax if such income is remitted to Sri Lanka through a bank.

A three-year tax exemption is granted to new undertakings that are engaged in the manufacturing of articles other than liquor and

tobacco and that have a minimum investment of LKR50 million before 31 March 2012.

A three-year tax exemption is granted to new undertakings that have a minimum investment of LKR50 million before 31 March 2015 and that are engaged in agriculture and/or agro-processing, animal husbandry and/or processing, fisheries and/or fish processing, information technology, business or knowledge process outsourcing, healthcare, education, beauty care, cold room storage, tourism, sports and fitness centers and creative work including artwork.

A three-year tax holiday is granted to businesses providing manor houses or thematic bungalows to tourists.

A three-year tax holiday is granted to venture capital companies investing in ordinary shares of companies engaged in projects of a pioneering nature.

A five-year tax holiday is granted to new undertakings of companies engaged solely in research and development (R&D) with an investment of more than LKR2 million made before 31 March 2014.

A five-year tax holiday is granted for profits and income of cooperative societies.

A 7- or 10-year tax holiday is granted for income derived from the exhibition of cinematographic films in new cinemas or upgraded cinemas, respectively.

Income derived from exports of gold, gems (exported after the cutting and polishing of imported gems in raw form) and jewelry is exempt from tax. The value of gems sold at the gem auction conducted by the State Gem Corporation of Sri Lanka is taxed at a rate of 2.5%, which is the final tax on such sales.

Dividends, interest and fees derived from investments from outside Sri Lanka are exempt from income tax if the income is remitted to Sri Lanka.

For years of assessment beginning after 1 April 2009, half of the income of persons derived from the production of a drama for a period of one year from the date of the first public performance is exempt from tax.

Export development rebates paid to exporters by the Export Development Board of Sri Lanka under the Export Development Reward Scheme are exempt from income tax.

Profits and income derived from the sale after 1 April 2009 of Sri Lanka Development Bonds are exempt from income tax.

Profits and income derived by persons or partnerships from investments in Economic Resurgence Certificates with monies that were contained in an account approved by the Central Bank of Sri Lanka and that were deposited in such account after 1 February 2009 are exempt from income tax.

Income earned in foreign currency by resident companies from services rendered outside Sri Lanka for the carrying out of construction projects is exempt from income tax.

Income derived by nonresident companies outside Sri Lanka from the supply of plant, machinery or equipment to the government of Sri Lanka, public corporations or government institutions or from projects approved as essential for the economic development of Sri Lanka is exempt from income tax.

Income and profits derived by undertakings from the construction and sale of houses for low-income families with a floor area exceeding 500 square feet are exempt from income tax if the sale takes place before 1 April 2013.

Profits earned in foreign currency by consignors or consignees that are resident companies or partnerships from the export of goods that are not subject to any manufacturing process other than repacking or labeling are exempt from income tax.

Profits derived from sales of shares are exempt from income tax.

Profits derived from sales of foreign-currency sovereign bonds to nonresident persons or licensed commercial banks in Sri Lanka are exempt from income tax, effective from 21 October 2008.

Royalties received from outside Sri Lanka are exempt from income tax if remitted to Sri Lanka through a bank.

Profits and income from the redemption of units of unit trusts or mutual funds are exempt from income tax.

Profits and income from the administration of sports grounds, sports stadiums or sports complexes are exempt from income tax.

Profits and income (other than interest and dividends) of the College of General Practitioners of Sri Lanka are exempt from income tax.

Profits and income (other than interest and dividends) of the Sri Lanka Social Security Board are exempt from income tax.

Profits and income (other than interest and dividends) of the Sri Lanka Savings Bank are exempt from income tax.

Profits and income (other than interest and dividends) of a government-assisted private school under specified conditions are exempt from income tax.

Profits and income (other than interest and dividends) of certain public corporations are exempt from income tax.

Profits and income (other than interest and dividends) of the Lanka Puthra Development Bank are exempt from income tax.

Profits and income (other than interest and dividends) of the following institutions are exempt from income tax:

- National Enterprise Development Authority
- Sri Lanka Institute of Marketing
- The Institute of Physics, Sri Lanka

Profits and income of companies that obtain quotations on the Stock Exchange of Sri Lanka before 1 April 2014 by floating and maintaining a minimum of 20% of shares among the public are entitled to a 50% relief on income tax payable for three years. The period of the concessionary rate is extended for an additional three years for companies that pay income tax at a rate of 28%.

Profits and income earned from a business in which goods are purchased from one country and transferred to another country other than Sri Lanka are exempt from income tax, effective from 1 April 2012.

Profits and income of an undertaking for the cultivation of renewable energy crops in agricultural land are exempt from income tax for 10 years.

Profits and income from the manufacturing, distribution and marketing of organic fertilizers and pesticides are exempt from income tax and all indirect taxes.

Profits and income accruing to a company, partnership or body of persons outside Sri Lanka on payments for use of computer software made by Sri Lankan Airlines Ltd or Mihin Lanka (Pvt) Ltd are exempt from income tax if no double tax agreement exists between Sri Lanka and the respective country or if no tax is payable in the respective country on such profits and income.

Royalties or payments made for designing that are paid by a company that has entered into an agreement with the BOI of Sri Lanka to a nonresident company during the tax holiday period under Sections 16A and 17D of the Inland Revenue Act No. 10 of 2006 (most recently amended by the Amendment Act No. 8 of 2012) are exempt from income tax if the payer company has invested more than USD50 million from funds sourced overseas. The services for which payments are made must be essential for carrying out activities in Sri Lanka and must not be obtainable in Sri Lanka.

A person that has annual turnover not exceeding LKR300 million per year from all trades and businesses carried on for a period ending before 1 April 2011 and that has not complied with the income tax laws is exempt from income tax if the past earnings are invested before 31 March 2014 in a trade or business and is compliant thereafter. The profits and income earned from such investments are exempt from income tax for five years.

An income tax holiday for a specific period is granted to headquarters and regional head offices of international institutions if they are relocated to Sri Lanka.

Royalties with respect to internationally recognized intellectual property received in foreign currency is exempt from income tax for a specific period.

A 10% reduction in the amount of income tax payable is granted to a ship operator or agent of a foreign ship with respect to the skills development of trainees, based on the number of trainees.

Profits and income of unit trusts from investments made after 1 January 2015 in securities denominated in US dollars that are listed on a foreign stock exchange are exempt from income tax.

Profits and income of a company, partnership or body of persons outside Sri Lanka from royalties received with respect to a specific requirement (for example, a license or trademark) of an information technology or business process outsourcing (BPO) company in Sri Lanka is exempt for a period of two years from the commencement of such information technology or BPO company.

BOI companies are exempt from customs duty on disposals of machinery used for more than 10 years.

**Incentives for hub services.** Under commercial hub regulations, specified business activities are exempted from the provisions of the Customs Ordinance, Imports and Exports Act, Exchange Control Act and certain other legislation. The following are significant aspects of the regulations:

- The regulations designate free ports and bonded areas for the carrying out of specified activities and provide minimum investment limits and other criteria
- Business activities for new enterprises are entrepôt trade, off-shore business, providing front-end services, headquarters operations and logistic services.
- The minimum investment ranges from USD1 million to USD5 million, with at least 65% of the investment from foreign sources.
- Annual re-export turnover ranging from USD10 million to USD20 million must be achieved over a five-year period.
- Foreign ownership of 100% is permitted for businesses that are limited to 40% foreign ownership under exchange-control regulations.

**Capital gains.** Capital gains tax is not imposed in Sri Lanka.

**Administration.** The normal fiscal year (year of assessment) runs from 1 April to 31 March. A company may select a different fiscal year if it obtains prior permission from the Department of Inland Revenue. Income tax is payable in four quarterly installments, which are due one and a half months after the end of each quarter. The final tax return must be submitted by 30 November after the fiscal year. Any balance of income tax due must be paid by 30 September following the end of the fiscal year.

If a company files the final tax return by 30 November, the statute of limitations for the issuance of an assessment expires 18 months from the statutory date of filing the return, effective from the year of assessment beginning 1 April 2013. For returns filed after 30 November, the statute of limitations expires four years after the statutory date of filing the return.

Separate sets of accounts must be maintained for different activities of a trade or business that are exempt or subject to tax at different tax rates.

An advance ruling system is available for investors eligible for tax exemptions to ensure consistency in the application of provisions of the tax laws. Interpretations of the Inland Revenue Act must be provided to taxpayers within six months of the date of the request for a ruling.

A refinance facility repayable within five years at an interest rate of 6% is provided to enable settlement of arrears after 2010 of tax, Employees Provident Fund contributions and Employees Trust Fund contributions.

**Dividends.** A dividend tax of 10% (also known as the Dividend Tax at Source) is withheld from dividends distributed out of profits included in taxable income. The 10% tax is the final tax on dividends paid to residents and nonresidents. Dividends paid by

a resident company to a resident or nonresident company are not included in the assessable income of the recipient if any of the following apply:

- A withholding has been made for dividend tax.
- The dividend is exempt from income tax.
- The dividend consists of any part of the amount of dividends received by the payer from another resident company.

Dividends received from nonresident companies are exempt from income tax.

Dividends distributed out of dividends received from nonresident companies outside Sri Lanka are exempt from income tax if the distribution is made within one month after the receipt of the dividends from the nonresident companies.

Dividends distributed by BOI companies (companies that have entered into agreements with the BOI under which tax holidays have been granted) are subject to the dividend tax if the agreement between the BOI and the company was entered into after 6 November 2002.

A company that distributes dividends that total less than 10% of its distributable profits for the preceding fiscal year is subject to a deemed dividend tax at a rate of 15% on the difference between 33 $\frac{1}{3}$ % of the distributable profits and the total dividends distributed. The calculation of distributable profits is specified in the law.

Dividends declared by a new undertaking engaged in the manufacturing and exporting of a product with an investment of more than USD2 million in the acquisition of fixed assets are exempt from dividend tax for five years from the commencement of commercial operations. Such undertakings are also exempt from deemed dividend tax for the same period.

The definition of dividends has been expanded to include scrip dividends.

**Interest.** The following are significant aspects of the taxation of interest:

- Withholding tax at a rate of 10% is imposed on interest paid to companies on bank deposits. Companies may offset this withholding tax against their annual income tax liability.
- Withholding tax at a rate of 10% is imposed on interest payable to residents and nonresidents on corporate debt securities at the time of issuance of the security. For such instruments with a floating rate of interest, withholding tax is deductible at the beginning of each reviewing period. If no upfront deduction of withholding tax is made, the tax must be withheld at the time of payment of interest.
- Tax at a rate of 10% is withheld at the point of issuance of government securities, bonds and similar instruments by the Central Bank of Sri Lanka.
- Interest income on secondary market transactions and income on corporate debt securities that are included in business income are grossed up by  $\frac{1}{9}$ , and a notional credit of 10% is granted against tax liability.

- Interest income received by a bank in Sri Lanka on loans is exempt from income tax if the loans are granted to a company for investment in or the meeting of expenditure incurred by a newly formed company outside the Colombo and Gampaha districts or by a company relocating outside the Colombo and Gampaha districts.
- Interest on investments made outside Sri Lanka is exempt from income tax.
- Interest accruing on funds invested in Sri Lanka Development Bonds and Reconstruction Bonds that are denominated in U.S dollars and issued by the Central Bank of Sri Lanka is exempt from income tax.
- Interest income on foreign-currency sovereign bonds paid to nonresident persons or licensed commercial banks in Sri Lanka is exempt from income tax.
- Interest accruing to persons or partnerships outside Sri Lanka on loans granted to persons or partnerships in Sri Lanka is exempt from income tax.
- Interest earned by banks or financial institutions on loans granted from Investment Fund Accounts (banks and financial institutions that are liable to value-added tax [VAT] on financial services must transfer specified amounts to Investment Fund Accounts) is exempt from income tax.
- Interest earned on listed corporate debt instruments is exempt from income tax.
- Interest on bonds issued by the Municipal Council is exempt from income tax.
- Interest income accruing to banks from the providing of loan facilities for the construction of residential apartments for professionals is taxed at 50% of the applicable tax rate.
- Interest accruing to persons from investments made after 1 January 2015 in corporate debt securities issued by the Urban Development Authority is exempt from income tax.

**Foreign tax relief.** Foreign tax relief is available under various double tax treaties. In general, Sri Lankan tax payable (other than dividend tax) is allowed as a credit against any foreign tax computed by reference to the same income. Similar relief is available for foreign tax paid in the other treaty country.

### C. Determination of trading income

**General.** The assessment is based on financial statements prepared in accordance with generally accepted accounting principles.

Nonresident companies may pay income tax on a deemed profit negotiated with the Inland Revenue Department. However, they must be taxed on at least 6% of their turnover.

All expenses incurred in the production of income are allowable unless specifically prohibited. In addition, certain expenses that are specifically authorized are permitted as deductions. Nondeductible expenses include capital expenditures, personal and domestic expenses, and losses from appropriation of profits.

The following restrictions apply to the deductibility of expenses:

- 25% of advertising expenses is disallowed (other than advertising outside Sri Lanka with respect to the export trade or the

- provision of services for payment in foreign currency). Specific sponsorship of international sports events approved by the Minister of Sports is fully allowed, effective from 1 August 2012.
- Entertainment expenses are disallowed.
  - The deductibility of head office expenses is restricted to the lower of the actual expenditure or 10% of the profits or income of the nonresident company.
  - Foreign travel expenses relating to business and foreign training expenses can be claimed up to a maximum of 2% of the preceding year's statutory income.
  - Debt-to-equity rules restrict the deduction of interest paid (see Section E).
  - Hire or rental expenses included in traveling expenses are disallowed.
  - The deduction for management fees is limited to LKR2 million or 1% of turnover, whichever is less.
  - Listing expenses of a company are allowed up to a maximum of 1% of the value of the initial public offer.
  - Tax borne on behalf of employees is disallowed.

Expenses with respect to vehicles provided to employees are deductible regardless of whether such vehicle benefits are taxable in the hands of the employees.

Local or foreign travel expenses incurred by companies exclusively providing services of design development, product development or product innovation are allowable expenses.

Maintenance or management expenses incurred by a company with respect to sports grounds, stadiums or sports complexes are allowable expenses.

Pre-commencement expenses incurred by new small-and-medium scale enterprises with expected turnover of less than LKR500 million are allowed as a deduction from statutory income in the year of commercial production.

Nation Building Levy (see Section D) paid is an allowable expense.

An enterprise that incurs expenditure on R&D carried out through a government or private institution is eligible for a triple deduction or a double deduction, respectively.

Special levies payable to the government by public corporations or government-owned business undertakings are allowable expenses.

The acquisition cost of internationally recognized intellectual property earning foreign currency through royalties is fully allowed as deduction in the year of acquisition.

The main company in an acquisition or merger of financial companies may deduct the cost of the transaction within three years after the year of assessment of the acquisition or merger.

A triple deduction is granted to persons registered with the Tertiary Vocational Education Commission with respect to expenses incurred on standard skill development training provided to trainees.

A triple deduction is granted for expenditure incurred on research, innovation and brand promotion by exporters.

**Qualifying payments.** Companies may claim a deduction for qualifying payments, which include donations to the government and approved investments. The deduction for qualifying payments is limited to one-fifth of assessable income.

Donations to the government in cash are deductible in full. Unlimited qualified payment deductions are also available for investments in relocated companies outside the Colombo and Gampaha districts and for investments in housing projects for shanty dwellers.

Qualifying payment deductions for donations to approved charities established for the provision of institutional care for the sick and needy are limited to LKR500,000 or one-fifth of the assessable income, whichever is less. Qualifying payment deductions for investments in the production of a film are restricted to LKR35 million. Qualifying payment deductions for investments in companies located outside the Colombo and Gampaha districts are restricted to LKR100 million.

The investment of a minimum of LKR50 million made before 31 March 2014 by an existing enterprise in itself for expansion can be claimed as a qualifying payment, subject to 25% of the investment being maintained for four years of assessment.

Expenses incurred under community development projects in the most difficult villages identified and published in the *Government Gazette* can be claimed as a qualifying payment, up to a maximum of LKR10 million.

**Inventories.** Inventories are normally valued at the lower of historical cost or net realizable value. For agricultural produce, inventories are valued at subsequent sale prices. Cost is usually determined on a first-in, first-out (FIFO) formula or a weighted average cost formula.

**Provisions.** In general, no deductions are allowed for reserves or provisions. However, provisions may be deducted if the expenses provided for are paid within three years after the year of assessment.

For banks, the deductibility of a specific provision for bad debts is limited to 1% of aggregate outstanding loans of the bank at the end of the fiscal year.

**Depreciation.** Depreciation allowances are granted to the owner of the asset from the fiscal year in which the asset is first used. The allowance is computed using the straight-line method at the following rates, which are effective from 1 April 2011.

Asset	Rate (%)
Buildings	6.67 (a)
Buildings constructed after 1 April 2011 for commercial use	10
Bridges, reservoirs, electricity and water distribution lines, toll roads	6.67
Plant and machinery or equipment	33.33
Plant and machinery for certain businesses, such as health care, paper printing, gem cutting, polishing and packaging commodities for commercial purposes and rice milling	33.33

Asset	Rate (%)
Construction machinery	25
Ships (only for the owner)	33.33
Commercial motor vehicles	20
Furniture	20
Computer hardware and software	
General rate	25
Computer software developed in Sri Lanka	100
Calculating equipment	25
Intangible assets (excluding goodwill)	10 (b)
High technology energy efficiency machinery and equipment	50
New technology or upgrades of technology machinery and equipment for apparel and other manufacturing industries	50 (c)
Plant, machinery and equipment providing more than 30% of power generation out of alternative energy resources	100 (c)
Plant, machinery and equipment for establishment of broker back office system	100 (c)
Plant, machinery and equipment for export industry	50 (c)
Plant, machinery and equipment for new export undertakings	100 (d)

(a) This rate applies to constructed buildings and purchased industrial buildings and hotels, including condominium property acquired or constructed to be used as a commercial unit, hotel building or industrial building.

(b) For assets other than software, acquisition and assembling expenditure qualifies for the allowance.

(c) This rate applies to assets acquired on or after 1 April 2013.

(d) This rate applies if investments in fixed assets that qualify for depreciation allowances exceed USD2 million.

Depreciation allowances are generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Any amounts recaptured are subject to tax at the regular corporate tax rate. Losses on the sale of a depreciable asset may be claimed as trade losses.

If a capital asset is disposed of and replaced within one year, the allowance is granted on the acquisition cost, less the profit on sale of the old asset.

**Relief for losses.** A loss incurred is deductible if, had there been a profit instead of the loss, such profit would have been assessable. Losses may be carried forward for an unlimited number of years. However, a loss carryforward may offset only 35% of the total statutory income. The balance of the losses may be carried forward to offset income in future years. Losses incurred by foreign-currency banking units and losses from horse racing may offset profit from the same source only.

Losses from a leasing business may be offset only against profits from the same business.

Insurance companies may set off general losses and life losses only against the same source of profits.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on all goods and services supplied in, or imported into, Sri Lanka, other than certain exempt items including the supply and import of motor vehicles, cigarettes and liquor (effective from 25 October 2014, these items are liable to the Excise [Special Provisions] Duty, which replaces VAT at the point of import); VAT exemption limited to 25% of total supplies for wholesalers and retailers; VAT applies if taxable supplies per year exceed LKR15 million; effective from 1 January 2015, wholesale and retail trading businesses with quarterly turnover exceeding LKR100 million (for a company that is a part of a group, LKR100 million refers to the aggregate turnover of the group) are liable to VAT at the standard rate; input tax credit is subject to certain limitations or actual input, whichever is less (with certain exceptions)	
Standard rate	11%
Exports and international transportation	0%
VAT on financial services (VATFS); imposed on the supply of financial services by specified institutions carrying on the business of financial services, including the provision of financial leasing facilities; unit trusts and mutual funds are exempt	12%
Economic Service Charge (ESC); imposed on turnover; if the turnover exceeds LKR50 million per quarter, the maximum charge is LKR30 million per quarter; airlines and shipping lines, dealers in lottery, unit trusts, mutual funds, distributors (as defined in ESC Act) and proceeds from the sale of foreign-currency sovereign bonds are exempt from ESC; ESC chargeable only on turnover of businesses that are benefiting from tax exemption or that are incurring losses	
Standard rate	0.25%
Nation Building Levy (NBT); applies if turnover exceeding LKR15 million per year; threshold of LKR25 million per quarter for operation of hotels and similar businesses, local educational institutions, supply of labor (manpower) and local value-added agricultural, rice-based products; specific exemptions granted; levy is imposed on the entire amount of turnover if the amount of turnover exceeds the threshold	2%
Share transaction levy; on turnover from listed share transactions	0.3%
Betting and gaming levy; annual amounts of the levy	
Betting business	LKR2 million
Racing business with live telecasts	LKR250,000
Racing business without live telecasts	LKR25,000

Nature of tax	Rate
Gaming business (a business involving individuals playing a game for a stake)	LKR100 million
Instead of all indirect taxes other than the levies mentioned above; imposed on gross monthly collections from bookmaking and gaming	10%
Telecommunication levy	
Standard rate	25%
Services provided through internet and broadband	10%
Levy for Crop Insurance Scheme; on banking, finance and insurance institutions; imposed on annual profits	1%
Excise duty; on specified imports and locally manufactured products	5% to 115%
Import duty	
Essential inputs that are not manufactured locally	0%
Raw materials and semi-raw materials	7.5%
Intermediate goods	15%
End-user products	25%
Cess on specified imported items	Various
Stamp duty	
On transfers of immovable property	3%/4%
On specified instruments	Various
On receipts exceeding LKR25,000 (imposed on all transactions other than transfers of immovable property and transactions involving specified instruments)	LKR25
Port and airport development levy; imposed on declared Cost, Insurance, Freight (CIF) value of all cargo	5%
(Exports, the film industry, imports of goods for specified projects with foreign funds donations received by the government, imports of artificial limbs, crutches and similar items and yarns and fabrics are exempt.)	
Tourism Development Levy; imposed on turnover of tourist establishments	1%
Construction Industry Guarantee Fund Levy; imposed on the value of construction contracts that exceeds LKR15 million; levy is imposed on the entire value if the value exceeds the threshold; approved special projects are exempt	0.25% to 1%
Special Commodity Levy	Various
Social security contributions, on employees' gross earnings	
Employees' Provident Fund (EPF); paid by Employer	14%
Employee	8%
Employers' Trust Fund; paid by employer	3%

## E. Miscellaneous matters

**Foreign-exchange controls.** Foreign-exchange regulations are governed by the Exchange Control Act and other directives issued by the Central Bank of Sri Lanka. The regulations include the following:

- Dividends may be remitted to nonresident shareholders on the production of an Auditors' Certificate.
- Authorized dealers are permitted to maintain nonresident accounts, which may be held by non-nationals resident outside Sri Lanka, companies registered outside Sri Lanka, foreign banks and so forth.
- Facilities are provided for resident non-nationals to maintain accounts in designated foreign currencies with commercial banks in Sri Lanka.
- Foreign investors may acquire shares representing up to 49% of a company's issued capital and repatriate profits and sales proceeds (the Ministry of Finance may approve a larger percentage of up to 100%, depending on the type of investment). Subject to the approval of the Central Bank, foreign ownership of 100% is allowed in retail and wholesale trading with a minimum investment of USD150,000 or in non-deposit financial services, such as merchant banking and venture capital companies.
- Companies approved by the Board of Investment of Sri Lanka may freely remit capital and profits.
- No restrictions are imposed on current-account transactions.
- Exporters with adequate protection against foreign-currency fluctuations may engage in foreign borrowing free of exchange-control restrictions.
- Corporate entities may borrow up to USD10 million per year for the next three years without Department of Exchange Control approval.
- Licensed commercial banks may borrow up to USD50 million per year without Department of Exchange Control approval.
- Persons providing services to tourism and foreign businesses may accept foreign currency if such earnings are deposited in a bank within seven working days.
- Foreign beneficiaries may invest in rupee-denominated debentures.
- Foreign companies may open places of business in Sri Lanka.
- Foreigners touring Sri Lanka or engaged in business in Sri Lanka may open foreign-currency accounts in Sri Lanka.
- Staff of foreign embassies may open foreign-currency accounts in Sri Lanka.
- Holders of Foreign Exchange Earners Accounts may obtain foreign-currency loans.
- It is generally permissible to repatriate capital gains from sales of residential properties by nonresidents (subject to certain conditions).
- The amount of foreign-currency notes that may be issued for travel purposes is USD5,000.
- No exchange-control approvals are required for the opening of bank accounts by dual citizens.
- An upfront tax of 15% is imposed on foreigners who lease state or private lands, subject to specified exemptions.

- A tax clearance certificate from the Inland Revenue Department is required for the remittance of specified payments such as royalties, and payments for communication services, computer software and information services.

**Transfer pricing.** Under the Inland Revenue Act, if significant pricing discrepancies are considered “artificial,” the tax authorities may determine a commercially acceptable price for tax purposes. Profits and losses from transactions between associated undertakings are determined taking into account the arm’s-length principle.

Currently, transfer-pricing regulations apply equally to local and foreign transactions.

Advance pricing agreements may be entered into with the Department of Inland Revenue with regard to “international transactions.” The arm’s-length price is determined using methods prescribed for this purpose.

**Debt-to-equity rules.** For group companies, a debt-to-equity ratio of 3:1 applies to manufacturing companies, and a 4:1 ratio applies to other types of companies. Interest paid on loans in excess of the debt-to-equity ratio is not deductible for tax purposes.

**Purchase of land by foreigners.** The purchase of land by foreign companies and companies incorporated in Sri Lanka with direct or indirect foreign shareholding exceeding 50% is restricted. Exemptions are available.

An upfront tax of 15% on the total rental payable for the duration of a lease is imposed on the foreign entities referred to above that lease state or private land. A concessionary rate of 7.5% is available for specified transactions. The tax is effective retroactively from 1 January 2013.

## F. Treaty withholding tax rates

The following table lists the maximum withholding tax rates under Sri Lanka’s double tax treaties.

	Dividends %	Interest %	Royalties %
Australia	15	10	10
Bahrain	5/7.5/10	—	10
Bangladesh	15	15	15
Belarus	7.5/10	10	10
Belgium	15	10	10

United Kingdom	15	10	10
United States	15	10	5/10 (g)
Vietnam	15	10	10
Non-treaty countries	10	10	10 (f)

- (a) The lower rate applies to royalties for copyrights and cinematographic films. The higher rate applies to other royalties.
- (b) The 10% rate applies if the recipient holds at least 25% of the payer. The 15% rate applies to other dividends.
- (c) The 10% rate applies to interest received by a financial institution. The 25% rate applies to other interest.
- (d) The 10% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- (e) The 10% rate applies to interest paid to banks. The 15% rate applies to other interest.
- (f) The tax applies to payments exceeding LKR50,000 per month or LKR500,000 per year.
- (g) Rent paid for the use of tangible movable property is taxed at the rate of 5%.

Sri Lanka has also entered into agreements covering international air transport with the Hong Kong SAR, Oman, Saudi Arabia and the United Arab Emirates.

## Suriname

ey.com/GlobalTaxGuides  
ey.com/TaxGuidesApp

Please direct all requests regarding Suriname to the persons listed below in the Curaçao office:

- Bryan D. Irausquin (office telephone: +599 (9) 430-5075; mobile telephone: +599 (9) 660-0707; fax: +599 (9) 465-6770; email: bryan.irausquin@an.ey.com)
- Kimberly N. Schreuders (office telephone: +599 (9) 430-5072; fax: +599 (9) 465-6770; email: kimberly.schreuders@an.ey.com)

### A. At a glance

Corporate Income Tax Rate (%)	36
Capital Gains Tax Rate (%)	36
Branch Tax Rate (%)	36
Withholding Tax (%)	
Dividends	25
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	7*

\* Losses incurred by companies during their first three years of business may be carried forward indefinitely.

### B. Taxes on corporate income and gains

**Income tax.** Income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Suriname law, even if their management is located abroad, as well as companies incorporated under foreign law, but effectively managed and controlled in Suriname.

For resident companies, income tax is, in principle, levied on the aggregate amount of net income earned from all sources during the company's accounting period. In principle, nonresident companies are subject to Suriname income tax on the following specific Suriname income items:

- Income derived from a permanent establishment in Suriname
- Income derived from real estate located in Suriname and/or debt claims secured by mortgages on real estate located in Suriname
- Income derived from rights to the profit of an enterprise of which the management is located in Suriname

Nonresident companies are deemed to derive income from a permanent establishment in Suriname if they derive income from, among other activities, acting as an insurer and the exploration and exploitation of natural resources, such as oil and gas.

**Tax rates.** Resident and nonresident companies, including branches of foreign companies, are taxed at a standard effective rate of 36%.

**Tax incentives.** Tax incentives, such as tax holidays, may be granted to new business enterprises engaged in certain activities. Business enterprises engaged in, among other activities, mining and tourism may apply for several tax incentives such as accelerated depreciation, investment allowance deduction and fiscal unity. A written letter of request for the granting of a tax incentive must be filed with the Suriname tax authorities.

**Capital gains.** No distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the income tax rate of 36%.

**Administration.** The taxable amount is the profit realized in a fiscal year or calendar year.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time the final return is filed. Companies must file a provisional tax return before 15 April of the current calendar year or within two and one-half months after the beginning of the current fiscal year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return.

In principle, the tax due on this provisional tax return must be paid in four equal installments, by 15 April, 15 July, 15 October and 31 December or within two and one-half months after the beginning of the current fiscal year and subsequently by the end of every three months.

An extension of time to file the return and pay the tax later than 31 December is not granted. On request of a company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments may be imposed if insufficient tax is levied when tax returns are filed or when arbitrary assessments are imposed. Depending on the degree of wrongdoing, a penalty of up to 100% of the additional tax due may be levied.

**Dividends.** In principle, a 25% withholding tax is imposed on dividends distributed by resident companies. Dividends distributed by resident companies to qualifying resident companies are exempt from Suriname dividend withholding tax. For this purpose, the following are qualifying resident companies:

- Investment companies conducted as limited liability companies that exclusively or almost exclusively aim to acquire, hold, manage and sell shares
- Other Suriname resident companies that continuously held the shares in the payer of the dividends from the beginning of the year in which the dividend is distributed

Withholding tax is not imposed on remittances of profits by branches to their foreign head offices.

**Participation exemption.** In principle, dividend distributions received from qualifying resident companies and qualifying non-resident companies are exempt from Suriname income tax. For dividends received from qualifying nonresident companies, the participation exemption applies if the following conditions are met:

- The share interest held in the nonresident company is in line with the business activities of the company receiving the dividend distribution. The share interest held in the nonresident company is regarded to be in line with the business activities of the company receiving the dividend distribution if the recipient holds at least 10% of the share capital of the payer of the dividends.
- The nonresident company is subject to tax in its country of residence.

**Foreign tax relief.** No foreign tax relief is available under domestic law. Foreign tax relief may be available under the tax treaties entered into with Indonesia and the Netherlands.

### C. Determination of taxable income

**General.** Taxable income must be calculated in accordance with “sound business practices.”

In principle, all expenses incurred with respect to the conducting of a business are deductible. However, if expenses exceed normal arm’s-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend).

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s-length basis.

No thin-capitalization requirements apply in Suriname under the Suriname tax legislation.

**Inventories.** Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted-average methods.

**Depreciation.** Depreciation may be calculated using the straight-line, declining-balance or other methods that are in accordance with “sound business practices.”

**Relief for losses.** Losses in a financial year may be carried forward for seven years. No carryback is available. Losses incurred by companies during their first three years of business may be carried forward indefinitely.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax in Suriname; a general consumption tax on the delivery of services by an entrepreneur as part of its business in Suriname, the delivery of goods produced in Suriname by a Suriname producer and the importation of goods into Suriname.	
Delivery and importation of goods	10
Delivery of services	8
Import duties	0 to 50

## E. Miscellaneous matters

**Foreign-exchange controls.** The currency in Suriname is the Suriname dollar (SRD).

In general a foreign-exchange permit is required for the movement of capital with respect to certain transactions including, but not limited to, the following:

- Loans issued by nonresidents of Suriname
- Real estate transactions in which one of the parties is a nonresident of Suriname
- Capital proceeds (profits and dividends)
- Incorporation of a limited liability company in accordance with the laws of Suriname if the company is located in Suriname and if one of the incorporators or shareholders is a nonresident of Suriname
- Purchase or sale of the shares of a limited liability company established in Suriname by a nonresident of Suriname.

Specific guidelines for exchange control apply in the case of a petrol agreement: an agreement concluded between a state enterprise and a contractor for the survey, exploration and exploitation of petrol in specified areas of Suriname.

**Transfer pricing.** In general, intercompany charges must be determined on an arm's-length basis.

## F. Tax treaties

Suriname has entered into tax treaties with Indonesia and the Netherlands. These treaties contain provisions to avoid double taxation between Suriname and these countries regarding taxes on income.

## Swaziland

ey.com/GlobalTaxGuides  
ey.com/TaxGuidesApp

Please direct all inquiries regarding Swaziland to Rendani Neluvhalani of the Johannesburg, South Africa, office (office telephone: +27 (11) 772-3948; mobile telephone: +27 82-603-0591; fax: +27 (11) 772-4000; email: rendani.neluvhalani@za.ey.com) or Josephine Banda of the Gaborone, Botswana, office (office telephone: +267 397-4078; mobile telephone: +267 7167-9011; fax: +267 397-4079; email: josephine.banda@za.ey.com).

### A. At a glance

Corporate Income Tax Rate (%)	27.5
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	27.5
Withholding Tax (%) (a)	
Dividends	15 (b)
Interest	10
Royalties from Patents, Know-how, etc.	15
Management Charges	15
Nonresident Contractors and Professionals	15 (c)
Nonresident Entertainers and Sports Persons	15
Branch Remittance Tax	15 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) For purposes of the withholding taxes, nonresident companies are companies that are neither registered nor incorporated in Swaziland.
- (b) This withholding tax applies to dividends paid to nonresidents. See Section B.
- (c) This withholding tax is imposed on the payment after deduction of direct costs of materials used in construction operations.
- (d) This tax is imposed on the deemed repatriated income of the branch of a nonresident company. However, for the branch of a company registered in Botswana, Lesotho, Mozambique, Namibia or South Africa, the rate of the tax is reduced to 12.5%.

### B. Taxes on corporate income and gains

**Corporate income tax.** Domestic and foreign companies are taxed on all income received or accrued from a source in Swaziland or deemed to be from a source in Swaziland.

**Rate of corporate tax.** The corporate tax rate is 27.5%.

**Administration.** The tax year runs from 1 July to 30 June. Corporate taxpayers may obtain permission to pay tax on a different fiscal year-end. Tax returns are due within 30 days after the notice given by the Commissioner of Taxes. Taxpayers unable to submit returns within 30 days must apply for an extension and submit an estimate of their income for the year.

Companies must pay provisional tax based on their estimated annual tax liability in two installments during their financial year. The installments must be paid by the end of the sixth month of the financial year and by the end of the financial year. A third (“topping-up”) payment of any balance of tax due must be made within six months after the end of the financial year.

**Dividends.** Dividends paid to resident companies are exempt from tax. A 15% withholding tax is imposed on dividends paid to non-residents, including companies. The rate is reduced to 12.5% if the dividend is paid to a company incorporated or registered in the Southern African Customs Union (SACU; the SACU consists of Botswana, Lesotho, Namibia, South Africa and Swaziland), provided the company is not a subsidiary or branch of a company incorporated or registered outside the SACU.

**Foreign tax relief.** No specific provisions for foreign tax relief exists, except under double tax agreements.

### **C. Determination of trading income**

**General.** Income tax is levied on all taxable income received by or accrued to any person from a source within Swaziland or deemed to be within Swaziland. Taxable income includes all income other than capital gains and losses and exempt income.

Expenses, other than those of a capital nature, incurred in Swaziland for the production of income may be deducted from income. Expenses incurred outside Swaziland in the production of income are deductible at the discretion of the Commissioner of Taxes.

Expenses specifically allowed include interest on business-related loans, repairs and maintenance, and bad and doubtful debts. In general, expenses that are not wholly or necessarily incurred in the production of income are not deductible.

**Inventories.** In general, inventories are valued using the last-in, first-out (LIFO), first-in, first-out (FIFO) or weighted-average methods.

**Provisions.** Provisions are not normally allowed as deductions in computing taxable income.

**Depreciation.** An annual depreciation allowance, calculated using a declining-balance method, is available for most capital expenditures. An annual depreciation allowance is also available for industrial buildings and hotels. The straight-line method may be used if prior permission is obtained from the Commissioner of Taxes.

An initial allowance of 50% is granted for investments in plant and machinery used in manufacturing, industrial buildings and hotels.

**Relief for trading losses.** Trading losses are deductible in the year sustained and may be carried forward without limitation. Losses may not be carried back.

### **D. Value-added tax**

Value-added tax (VAT) is charged on the supply of goods and services in Swaziland as well as on the importation of goods and services. The VAT rates are the standard rate of 14% and a 0% rate.

### **E. Foreign-exchange controls**

Foreign-exchange controls are not imposed within the Common Monetary Area, which includes Lesotho, South Africa and Swaziland. Transactions outside this area are regulated by the Central

Bank of Swaziland in cooperation with authorized dealers. Residents outside the Common Monetary Area may open nonresident accounts.

Foreign-exchange controls are imposed on imports as well as on the repatriation of capital, profits, interest, royalties, fees and income of expatriate personnel. These transactions require prior approval from the Central Bank of Swaziland, but approval is generally granted.

**A. At a glance**

Corporate Income Tax Rate (%)	22
Capital Gains Tax Rate (%)	22
Branch Tax Rate (%)	22
Withholding Tax (%)	
Dividends	30 (a)
Interest	0
Royalties from Patents, Know-how, etc.	0 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) This withholding tax applies to nonresidents. In general, no withholding tax is imposed on dividends paid to a foreign company that is similar to a Swedish limited liability company (*aktiebolag*) and that is not regarded as a tax-haven company. If the payer is a company listed on the stock exchange, an exemption is granted only if the recipient holds at least 10% of the voting rights of the payer for more than one year.
- (b) Royalties paid to nonresidents are not subject to withholding tax, but are taxed as Swedish-source income at the normal corporate rate of 22% of the net income. However, under most treaties, the tax rate is reduced. Sweden has enacted legislation implementing the European Union (EU) directive on interest and royalties (2003/49/EC), effective from 1 January 2004. In implementing the directive, Sweden considered the most recent amendments adopted by the European Council.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Income from all business activities is aggregated as one source of income — income from business. In principle, corporate income tax (CIT) is levied on all corporate income of a company incorporated in Sweden (resident corporation), except for certain domestic and foreign dividends (see *Dividends*). If a Swedish company markets abroad directly or through a branch office, the foreign profits are also subject to Swedish tax, unless a treaty provides otherwise. Nonresident corporations are subject to tax on Swedish-source income only.

**Rate of tax.** Companies pay CIT at a rate of 22%. No local income taxes are levied on corporate profits.

**Capital gains.** No separate regime exists for capital gains, but special rules apply to the calculation of the amount of capital gains and losses.

In general, capital gains on shares held for business purposes are exempt from tax (for details regarding shares held for business purposes, see *Dividends*). Effective from 1 January 2010, the participation exemption regime was expanded to cover interests in partnerships and shares held by partnerships. Corresponding losses on interests in partnerships are nondeductible. However, capital gains on interests in partnerships domiciled outside the

European Economic Area (EEA) are not covered by the participation exemption.

Taxable capital gains are aggregated with other corporate business income. Capital gains are subject to tax when transactions are closed, regardless of the holding period or when payment is received.

**Administration.** A company may choose its financial year, but is assigned an income year for tax filing purposes, depending on when the financial year ends. The following table provides the assigned income years and dates of filing of the tax return.

Financial year	Assigned income year	Filing of tax return
1 February–31 January, 1 March–28 February, 1 April–31 March or 1 May–30 April	1 May–30 April	1 November
1 June–31 May or 1 July–30 June	1 July–30 June	15 December
1 August–31 July or 1 September–31 August	1 September– 31 August	1 March
1 October–30 September, 1 November–31 October, 1 December–30 November or 1 January–31 December	1 January– 31 December	1 July

A financial year may be extended for up to 18 months in certain circumstances, such as for a company's first or last financial year or if a company changes its financial year.

Advance tax payments are made in monthly installments during the year to which they relate. The final tax assessment must be issued by the Swedish Tax Agency before the 15th day of the 12th month after the end of the assigned income year. Any balance of tax due must be paid within 90 days after the final tax assessment.

**Dividends.** In general, dividends received from Swedish companies on shares held for business purposes are exempt from tax. Dividend distributions on other shares are fully taxable. Shares are deemed to be held for business purposes if they are not held as current assets and if any of the following conditions is satisfied:

- The shares are unlisted.
- The shares are listed and the recipient of the dividends owns at least 10% of the voting power of the payer for more than one year.
- The shares are held for organizational purposes (important to the business of the holder or a company in the same group as the holder).

Dividends received from foreign companies are exempt from tax if the dividends satisfy the conditions for exemption with respect to dividends on shares in Swedish companies and if the distributing foreign company is equivalent to a Swedish limited liability company (*aktiebolag*).

Shares held in a company resident in an EU member state are considered to be shares held for business purposes if both of the following conditions are satisfied:

- The company owning the shares holds 10% or more of the share capital of the payer (it is irrelevant whether the shares are held as current assets).
- The payer is listed in the European Community (EC) Directive 90/435/EEC and is required to pay one of the taxes listed in the directive.

Partnerships may receive tax-exempt dividends to the extent that the dividends would be exempt if received directly by the owners of the partnership interests.

**Foreign tax relief.** Under Swedish law, a Swedish company may usually claim a credit against CIT liability for comparable taxes paid abroad. Sweden applies a so-called “overall” tax credit system. However, certain tax treaties may override internal foreign tax credit rules and instead exempt foreign-source income from Swedish tax.

### C. Determination of trading income

**General.** Corporate income tax is based on taxable business income computed according to the accrual method of accounting. Taxable business income generally includes all worldwide income earned by a corporation. The major exceptions are capital gains and dividends on shares held for business purposes (see Section B).

**Inventories.** Inventories are valued at the lower of acquisition cost or actual value. Acquisition cost is determined using the first-in, first-out (FIFO) method. An obsolescence provision of 3% is allowed when using acquisition cost to value inventories.

**Reserves.** A profit allocation reserve allows a 25% deduction of the taxable income for the financial year. Each year’s reserve must be added back to taxable income no later than six years after the year of the deduction. The oldest remaining reserve must always be reversed first. The reserve is based on net income before tax and includes any amounts from the allocation reserve that are added back to taxable income.

Tax is imposed annually on fictitious interest income with respect to the deferred tax amounts.

**Depreciation.** Equipment with a life of three years or less may be written off in the year of purchase. Machinery and equipment may be written off either on a straight-line basis at 20% of cost annually or on a declining-balance basis at 30% of the current tax value. In any one year, the same method must be used for all machinery and equipment. However, companies can switch to a different method each year. The above methods may be used only if the same depreciation method is used in the financial statements. If this condition is not satisfied, a third method, which is also based on the remaining depreciable value, is available. Under this method, companies may choose any percentage, up to a maximum of 25%. The same amortization rules that govern machinery apply to patents, trademarks, purchased goodwill and other intangible property.

Depreciation of buildings is straight-line over the building’s expected life. In general, commercial buildings may be depreciated at 2% to 5% annually, factory buildings at 4% and office buildings at 2%. Buildings subject to greater wear and tear may be depreciated at higher rates.

If depreciable machinery and equipment are sold, the proceeds reduce the depreciable base for the remaining machinery and equipment.

**Relief for losses.** Losses may be carried forward indefinitely. Losses may not be carried back.

The tax law includes rules restricting the use of old tax losses of acquired companies.

In general, the possibility of offsetting the losses of an acquired company through a group contribution (see *Groups of companies*) may in certain circumstances be restricted during a five-year period. The rules also include a restriction under which the amount of losses that may be used is limited to twice the amount paid for the shares. Special restrictions also apply to the possibility of using losses with respect to mergers.

**Groups of companies.** There is no consolidated treatment whereby all companies in a group may be treated as a single taxable entity. However, rules permit income earned by companies in a corporate group to be distributed within the group through the use of group contributions, which are deductible for the paying company and taxable income for the receiving company. In general, group contributions may be made between Swedish group companies if ownership of more than 90% exists during the entire financial year. This rule applies even if a foreign parent or subsidiary is in the group structure. A Swedish permanent establishment of a foreign company resident in an EEA state is treated as a Swedish company for purposes of the group contribution rules.

In certain circumstances it is possible for Swedish companies to claim deductions of losses in foreign subsidiaries.

#### D. Other significant taxes

The following table describes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods (including imported goods but excluding exported goods) and services, unless specifically exempt by law; based on sales price excluding VAT	
Standard tax rate	25
Rate on hotel services, food served in restaurants and foodstuffs	12
Rate on books and newspapers, entry to movie theaters, cultural and sports events, passenger transportation and copyrights	6
Social security contributions, on salaries, wages and the assessed value of benefits in kind; paid by employer	
General rate	31.42
Rate for employees aged up to 26	15.49
Pension contribution on salaries, wages and the assessed value of benefits in kind; paid by employee on amounts up to SEK440,000	7
Special salary tax, on earnings not included in the base for social security contributions; paid by the employer	24.26

## E. Miscellaneous matters

**Controlled foreign companies.** A Swedish company that holds or controls, directly or indirectly, at least 25% of the capital or voting rights of a foreign low-taxed entity (controlled foreign company, or CFC) is subject to current taxation in Sweden on its share of the foreign entity's worldwide profits if the ownership or control exists at the end of the Swedish company's fiscal year. Foreign entities are considered to be low-taxed if their net income is taxed at a rate of less than 12.1% (55% of the effective corporate income tax rate) on a base computed according to Swedish accounting and tax rules. However, the CFC rules do not apply to foreign entities that are resident and subject to corporate income tax in jurisdictions on the so-called "white list." If Sweden has entered into a tax treaty with a jurisdiction on the white list, an additional requirement for the exemption is that the foreign entity and its income must be eligible for treaty benefits.

**Anti-avoidance legislation.** A general anti-avoidance act applies in Sweden. The act is considered a source of insecurity to taxpayers because it limits the predictability of the tax law. Under the act, a transaction may be adjusted for tax purposes if all of the following conditions are met:

- The transaction, alone or together with other transactions, is part of a procedure that provides a substantial tax advantage to the taxpayer.
- The taxpayer, directly or indirectly, participated in the transaction or transactions.
- Taking into account all of the circumstances, the tax advantage can be considered to be the predominant reason for the procedure.
- A tax assessment based on the procedure would be in conflict with the purpose of the tax law, as it appears from the general design of the tax rules, the rules that are directly applicable or the rules that have been circumvented through the procedure.

**Transfer pricing.** The Swedish law on transfer pricing is based on the arm's-length principle. As a result, in general, the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines apply. Under the transfer-pricing law, the Swedish Tax Agency may adjust the income of an enterprise if its taxable income in Sweden is reduced as a result of contractual provisions that differ from those that would be agreed to by unrelated parties and if the following three additional conditions are met:

- The party to which the income is transferred is not subject to tax in Sweden.
- It is reasonably established that a community of economic interest exists between the parties.
- It is clear from the circumstances that the contractual provisions were not agreed upon for reasons other than the community of economic interest.

If the conditions under the law are met, the Swedish Tax Agency may increase the income of an enterprise by the amount of the reduction resulting from the contractual provisions that were not determined at arm's length.

Under Swedish rules, a Swedish company must have formal transfer-pricing documentation in place with respect to cross-border transactions.

**Debt-to-equity rules.** No thin-capitalization rules exist in Sweden. However, the Companies Act requires the compulsory liquidation of a company if more than 50% of the share capital is lost without replacement of new capital.

Effective from 1 January 2013, the earlier Swedish interest deduction limitation rules were expanded. The main rule now limits deductibility of interest expense relating to all loans between related parties. However, the main rule has two exemptions, which are the 10% rule and the “business reasons exemption.”

The 10% rule provides that interest expenses are deductible if the interest income related to the loan is taxable at a rate of 10% in the hands of the beneficial owner of the interest income. To determine whether the rate is 10%, the interest income is considered on a stand-alone basis; that is, as if the interest income is the only income recognized by the beneficial owner. In addition to satisfying the 10% test, the taxpayer must show that the predominant reason for establishing the debt relationship is not to provide the group with a substantial tax advantage. Specific rules with respect to situations in which the recipient is subject to yield tax exist.

The “business reasons exemption” provides that interest expenses are deductible if the debt relationship is predominately motivated by business reasons. If the debt relationship relates to an acquisition of shares or share-based instruments from a related company, or to an acquisition of shares or share-based instruments in a company that becomes related after the acquisition, it is also required that the acquisition be motivated predominantly by business reasons. In addition, the beneficial owner of the income must be resident in an EEA state or, under certain circumstances, a state with which Sweden has a tax treaty. The rules also provide that it should be taken into consideration whether the financing could have been made through contributions by direct or indirect shareholders or by the lender.

## F. Treaty withholding tax rates

Interest payments are not subject to withholding tax under Swedish internal law. Consequently, the table below provides treaty withholding tax rates for dividends and royalties only. However, under Swedish domestic law, no dividend withholding tax is levied on dividends paid by a Swedish company to a “foreign company,” as defined under Swedish law, if certain holding requirements are met. A “foreign company” is defined as a foreign legal entity that is subject to taxation equivalent to that of a Swedish company. In addition, a foreign legal entity qualifies as a “foreign company” if it is resident and liable to income tax in a country with which Sweden has entered into a comprehensive tax treaty and if it is eligible for the treaty benefits.

Residence of recipient	Dividends		Royalties (a) %
	Normal treaty rate %	Reduced rate (b)(d) %

Venezuela	10	5	7/10 (s)
Vietnam	15	10 (c)	5/15 (m)
Zambia	15	5	10
Zimbabwe	20	15	10
Non-treaty countries	30	—	0

- (a) Royalties paid to nonresidents are not subject to withholding tax but are taxed as Swedish-source income at the normal corporate tax rate of 22%. However, under certain treaties, the tax rate may be reduced.
- (b) The reduced tax rate applies if the parent company owns at least the minimum percentage of the paying company as prescribed by the relevant treaty.
- (c) The rate of tax is further reduced if specific conditions are satisfied.
- (d) Under Swedish domestic law, dividends paid to a “foreign company” (as defined under Swedish law) are exempt from withholding tax if the shares are held for business purposes. Unlisted shares in Swedish companies are normally considered to be held for business purposes unless they are regarded as inventory. If the shares are listed, they must also be held for at least 12 months and the holding must amount to at least 10% of the voting rights. A special exemption also applies if the recipient fulfills the conditions in Article 2 of the EC Parent-Subsidiary Directive and if the holding is at least 10% of the share capital.
- (e) Sweden applies the treaty with the former Czechoslovakia to the Czech Republic and the Slovak Republic.
- (f) Sweden applies the treaty with the former Yugoslavia to Bosnia and Herzegovina, Croatia, Montenegro, Serbia and Slovenia.
- (g) The rates are 3% on news royalties, 5% for copyright (excluding films and certain other items) royalties, 10% for industrial royalties and 15% in other cases.
- (h) The higher rate applies if the Austrian company owns more than 50% of the capital of the Swedish company. The EU Interest and Royalties Directive may be more beneficial in this respect.
- (i) In practice, the domestic Swedish rate of 22% applies to all royalties because the treaty rate of 25%, which applies to trademarks, is higher and the treaty withholding tax rate of 15% for all other royalties has expired.
- (j) The rates are 3% for patent royalties, 5% for leasing royalties and 10% for other royalties.
- (k) The lower rate applies to leasing, and the higher rate applies to other royalties.
- (l) The rates are 0% for copyright royalties and 5% for other royalties.
- (m) The lower rate applies to industrial royalties.
- (n) The lower rate applies to leasing and know-how royalties.
- (o) The reduced treaty rate does not apply to mining royalties and cinematographic film royalties.
- (p) The lower rate applies to copyright royalties.
- (q) The domestic rate applies.
- (r) The 0% rate applies to copyright royalties. The domestic rate applies to mining royalties. The 20% rate applies to all other royalties.
- (s) The 10% rate applies to copyright royalties.

------------------	---

**A. At a glance**

Corporate Income Tax Rate (%)	12 to 24 (a)
Capital Gains Tax Rate (%)	– (b)
Branch Tax Rate (%)	12 to 24 (a)
Withholding Tax (%) (c)	
Dividends	35
Interest	0/35 (d)
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (e)
Carryforward	7 (e)

- (a) The rates reflect the maximum aggregate effective tax burden of ordinarily taxed companies and are composed of federal, cantonal and communal (municipal) taxes. Approximately 7.8% of the rates relate to the federal tax. The rates depend on the canton and commune in which the taxable entity performs its activities. Lower rates are available for privileged companies described in Section E.
- (b) See Section B.
- (c) The withholding tax rates may be reduced under the Switzerland-European Union (EU) agreement (see Section E) and under double tax treaties (see Section F).
- (d) Withholding tax is levied on bank interest, but normally not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.
- (e) Income of the current year may be offset against losses incurred in the preceding seven years. Losses may not be carried back (see Section C).

**B. Taxes on corporate income and gains**

**Income tax.** Switzerland is a confederation of 26 cantons (states). Taxes are levied at the federal and cantonal/communal levels. As a result of this multilayered tax system, no standard tax rates exist. Under the Swiss income tax system, earnings are taxed at the corporate level and, to the extent profits are distributed as dividends, again at the shareholder's level. However, see *Dividends* for details regarding the participation exemption.

In general, a resident corporation is a corporation that is incorporated in Switzerland. In addition, a corporation incorporated in a foreign country is considered a resident of Switzerland under Swiss domestic law if it is effectively managed and controlled in Switzerland.

Resident companies are subject to corporate tax on worldwide income. Income realized by a foreign permanent establishment of a Swiss company or derived from foreign real estate is excluded from taxable income. Losses incurred by a foreign permanent establishment are deductible from taxable income. However, if a foreign permanent establishment of a Swiss company realizes profits in the seven years following the year of a loss and if the permanent establishment can offset the loss against such profits in the foreign jurisdiction, the Swiss company must add the amount of losses offset in the country of the permanent establishment to its Swiss taxable income.

A company not resident in Switzerland is subject to Swiss income tax if it has a permanent establishment in Switzerland.

*Tax Harmonization Act.* The Tax Harmonization Act (THA) sets certain minimum standards for cantonal/communal taxes. However, cantonal/communal tax rates are not harmonized under the THA.

**Rates of corporate tax.** The federal corporate income tax is levied at a flat rate of 8.5% of taxable income. Because taxes are deductible, the effective federal corporate income tax rate is approximately 7.8%.

Cantonal/communal tax rates vary widely. The cantonal/communal tax rates are usually a certain percentage (known as “multipliers”) of the relevant cantonal statutory tax rates. The total effective maximum tax burden, which consists of federal, cantonal and communal taxes, ranges from 12% to 24%, depending on the canton and commune in which the taxable entity is located.

**Tax incentives.** In Switzerland, tax incentives are granted to companies either by the cantons or by both the cantons and the federation. Except for the limitation on the duration of tax incentives to a maximum period of 10 years, the cantons are autonomous in granting cantonal/communal tax incentives to the following:

- Newly established enterprises
- Existing companies that substantially change their business if such change corresponds to the incorporation of a new enterprise

Tax incentives at the federal level require approval of the federation. Incentives at the federal level are governed by the federal law on regional policy. The following are the criteria for granting federal incentives:

- Establishment of new business activities in a qualifying area of economic development
- The performance by the applying company of industrial activities or services that have a close nexus to production activities
- Creation of new jobs either directly or indirectly (through its suppliers and/or partners) or preservation of existing long-term jobs in a changing business environment
- Particular economic relevance of the planned project for the area

The federation and the cantons grant partial or full tax holidays. The federation only grants holidays in qualifying areas of Switzerland.

**Capital gains.** Capital gains are generally taxed as ordinary business income at regular income tax rates. Different rules may apply to capital gains on real estate or to real estate companies at the cantonal/communal level.

Capital gains derived from dispositions of qualifying investments in subsidiaries qualify for the participation exemption. Under the participation exemption rules for capital gains, the parent company must sell a shareholding of at least 10% and, at the time of the disposal, it must have held the shares for at least one year (for further details regarding the participation exemption, see *Dividends*).

**Administration.** Income tax is generally assessed on the income for the current fiscal year, which corresponds to the corporation's financial year. The financial year need not correspond with the calendar year. Corporations are required to close their books once a year and file annual returns. This rule does not apply to the founding year. Consequently, the first fiscal year can be extended up to a maximum of nearly two years.

The cantonal deadlines for filing the corporate tax return vary, and extensions may be obtained. The federal and cantonal tax returns are generally filed together.

Corporations pay income tax in one lump-sum payment or in installments. The deadline for the payment of federal income tax is 31 March of the year following the fiscal year. The deadline for cantonal/communal taxes is usually between 30 June and 31 December.

**Dividends.** Dividends received are taxable as ordinary income. However, under the participation exemption rules, the federal tax liability is reduced by a proportion of dividend income (as defined by the law) to the total taxable income if the recipient of dividends satisfies any of the following conditions:

- The recipient owns at least 10% of the shares of the distributing corporation.
- The recipient has a share of at least 10% of the profits and reserves of the distributing corporation.
- The recipient holds shares with a market value of at least CHF1 million.

The participation exemption also applies at the cantonal/communal level. However, income received by qualifying holding, domiciliary or mixed companies is fully exempt from cantonal/communal corporate income taxes (see Section E).

Swiss companies distributing dividends or proceeds from liquidation exceeding the nominal share capital and the capital contribution reserves are generally required to withhold tax at a rate of 35%. Under the Net Remittance Procedure, Swiss companies distributing qualifying dividends may apply the treaty withholding rates prospectively without making the full 35% prepayment. The Net Remittance Procedure applies to dividends distributed on "substantial participations." These are participations that qualify for an additional reduction or a full exemption from Swiss withholding tax under a comprehensive income tax treaty or under the Switzerland-EU agreement (see Section E). To distribute dividends under the Net Remittance Procedure, companies must file

an application with the Swiss Federal Tax Administration before distributing dividends, as well as a notification form no later than 30 days after the due date of the dividend.

Under the capital contribution principle, which entered into force on 1 January 2011, contributions to equity made by a shareholder on or after 31 December 1996 can be distributed without triggering withholding tax consequences, provided certain requirements are met.

**Intercantonal tax allocation.** If a company operates in more than one canton, that is, the head office is in one canton and permanent establishments are in other cantons, its taxable earnings are allocated among the different cantons. The allocation method depends on the type of business of the company. The determination of the method is based on case law, which is governed by a constitutional guarantee against intercantonal double taxation.

**Foreign tax relief.** Income from foreign permanent establishments of a Swiss company is not taxable in Switzerland. The international allocation of profit is based on intercantonal rules, unless a tax treaty provides for a different method. For the treatment of losses of foreign permanent establishments, see *Income tax*.

### C. Determination of taxable income

**General.** The net profit shown in commercial financial statements generally serves as the basis for income taxation. However, the tax authorities may require adjustments to correct for certain items such as excessive depreciation and provisions.

Federal and cantonal/communal corporate taxes paid or due are deductible for corporate income tax purposes.

**Inventories.** Any system of inventory pricing that is in accordance with accepted business practice and is used consistently by the taxpayer is presumed to be acceptable by the tax authorities.

**Provisions.** Swiss federal and cantonal regulations provide that a company may record a general tax-deductible reserve amounting to one-third of the inventory valuation.

Provisions to cover doubtful accounts receivable and expected liabilities are generally allowed for tax purposes if they are commercially justifiable.

In general, a reserve of 5% of accounts due from Swiss debtors and 10% of those due from foreign debtors is allowed, without substantiation. In addition, provisions for specific accounts may be established if economically justifiable.

**Depreciation.** Depreciation may be calculated using the straight-line or the declining-balance method. For federal tax purposes, the following are some of the maximum rates set forth in the official guidelines.

Asset	Method	
	Declining-balance (%)	Straight-line (%)
Commercial buildings	3 to 4	1.5 to 2
Industrial buildings	7 to 8	3.5 to 4
Office furniture	25	12.5
Office machines	40	20

Asset	Method	
	Declining-balance (%)	Straight-line (%)
Data-processing equipment	40	20
Machinery	30	15
Motor vehicles	40	20
Intangibles	40	20

Some cantons have particularly favorable provisions (for example, immediate or one-time depreciation).

**Relief for losses.** Income of the current year may be offset against losses incurred in the preceding seven years, to the extent that such losses have not yet been used to absorb profits of prior years. No loss carryback is allowed.

**Groups of companies.** Except for value-added tax purposes, the concept of a consolidated or group return is unknown in Swiss tax law. Each corporation is treated as a separate taxpayer and files its own return.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on deliveries of goods and services, including imports of goods and the purchase of services and (in very specific cases) of goods from foreign businesses that are not registered for VAT in Switzerland	
Standard rate	8
Hotel and lodging services (overnight stays only)	3.8
Preferential rate (applicable to items such as foodstuffs, farming supplies, agricultural products, medicines and newspapers)	2.5
Exports	0
Net equity tax	
Federal rate	0
Cantonal/communal rates (varies among the cantons and depends on the relevant tax regime and, if applicable, the multiplier applied by the canton/commune); the cantons can provide that the corporate income tax can be credited against the cantonal/communal equity tax	0.001 to 0.525
Payroll taxes	
Social security contributions, on gross salary; paid by	
Employer	5.15
Employee	5.15
Company pension fund; rate varies by plan (compulsory and optional), gender and age of employee; paid by	
Employer (must bear at least one-half of the contribution)	3.5 to 9
Employee	3.5 to 9

Nature of tax	Rate (%)
Unemployment insurance, imposed on annual gross salary	
Gross salary up to CHF126,000; paid by	
Employer	1.1
Employee	1.1
Gross salary from CHF126,001	
(uncapped); paid by	
Employer	Additional 0.5
Employee	Additional 0.5
Family allowance; paid on salary by employer;	
imposed by various cantons at different rates	0.1 to 4
Maternity insurance (only for some cantons)	Various
Accident insurance; rates vary depending on extent of coverage and the risk of the business;	
imposed on annual gross salary of up to	
CHF126,000	
Occupational; paid by employer; for extremely high risks, rates vary depending on various factors (for example, industrial sector of the employer)	Various
Non-occupational; employer may elect to charge all or part of these premiums to employees; for extremely high risks, rates vary depending on various factors (for example, industrial sector of the employer)	Various
Stamp duties	
One-time capital contribution tax, on Swiss shares (the rate is 0% for shares issued within the scope of qualified mergers and reorganizations, as well as for financial reorganizations, provided specific requirements are met); for incorporations and capital increases, the first CHF1 million is exempt from tax	1
Securities turnover tax; on the sale or exchange of taxable securities involving a Swiss-registered securities dealer (as defined by the law) that acts in the capacity of a broker or dealer or that trades on its own account; the onus for payment of the securities turnover tax is on the Swiss securities dealer, but it is customary that the securities turnover tax be charged to the ultimate buyer and/or seller; several types of parties are exempt, including investment fund managers and foreign companies listed on a recognized stock exchange; several types of transactions are exempt, including the brokering of foreign bonds between foreign parties and qualifying internal group transactions	
Securities issued by a Swiss party	0.15
Securities issued by a foreign party	0.3
Stamp duty, on redeemable capital insurance with single premium for Swiss policyholders	2.5

## E. Miscellaneous matters

**Domiciliary and mixed companies.** Domiciliary and mixed companies are primarily engaged in activities abroad. The profits derived by these companies from non-Swiss sources are taxed at

substantially reduced rates at the cantonal/communal level. Domiciliary and mixed companies can be used for sales, financing, holding of intellectual property and other activities focusing primarily on non-Swiss markets. Relief at the federal level is available for principal companies (see *Principal companies*) with sufficient substance.

Under the THA (see Section B), for cantonal taxes, the following tax rules apply to domiciliary and mixed companies:

- Income derived from a qualifying participation (10% of the share capital, 10% of the profit and reserves or fair market value of CHF1 million), including capital gains resulting from step-ups in the tax basis of such investments, is exempt from tax.
- Income derived from Swiss sources not described in the item above is taxed at ordinary rates (this rule applies only to mixed companies because domiciliary companies do not derive Swiss-source income).
- Income derived from non-Swiss sources is also taxed at ordinary rates. However, the tax base is substantially reduced by the application of rules that take into account the significance of administrative activities performed by the Swiss company (this depends on the intensity of its physical presence in Switzerland and the level of its economical affinity to Switzerland). As a result of these rules, approximately 10% to 30% of the non-Swiss income is subject to the ordinary cantonal and municipal tax, while the remaining non-Swiss income is exempt from tax.

**Holding companies.** Holding companies may take advantage of a special status for cantonal and communal tax purposes. At the cantonal/communal level, in general, holding companies are exempt from corporate income tax (only income from Swiss real estate is ordinarily taxed). Consequently, all types of income derived from financial participations, such as dividends, interest and capital gains, are exempt at the cantonal/communal level. At the federal level, tax relief is granted with respect to qualifying dividends and capital gains (see Section B).

Currently, holding companies are prohibited from performing any commercial activities in Switzerland (this implies that they could do so abroad; however, this is rare).

**Service companies.** For Swiss resident companies providing coordination or management services to a multinational group (technical, administrative or scientific assistance including research and promotion activities), Swiss tax law requires that a share of the profits accruing to the group be allocated to the Swiss company. Switzerland applies the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

**Principal companies.** Federal guidelines provide special rules for international profit allocation of principal companies at the federal level. A Swiss company within an international group is treated as a principal company if it assumes risks and responsibilities for certain activities, including the following:

- Purchasing
- Planning of research and development (R&D), manufacturing and distribution
- Development of marketing strategies
- Logistics

- Treasury
- Finance
- Administration

In structures involving principal companies, manufacturing is typically performed outside of Switzerland by group companies or third parties on a contract manufacturing or cost-plus basis on the instruction of and for the account of the principal. Sales are made exclusively in the name of international group distribution companies for the account of the principal company. These distribution companies must act exclusively as agents with the authority to conclude contracts on behalf of the principal company (commissionaires) or as limited-risk (stripped-buy/sell) distributors because of the related risks borne by the principal.

The federal guidelines can result in an attractive combined federal and cantonal/communal effective tax rate that may be as low as approximately 5% to 10%, depending on the particular set-up and the location. In addition, depending on the substance and the location, principal companies may qualify for tax holidays of up to 10 years.

The cantonal tax authorities are responsible for assessing and collecting the federal income tax in Switzerland and therefore grant tax rulings regarding the taxation of Swiss principal companies. However, the principal rulings must also be submitted to the Swiss Federal Tax Administration (SFTA) for approval. In 2014, the SFTA confirmed new interpretation guidelines for the cantonal tax authorities to ensure a consistent application of the existing SFTA's circular letter 8, dated 18 December 2001, which contains the guidelines for the taxation of Swiss principal companies for federal income tax purposes.

The new interpretation guidelines refer to the following:

- Exclusivity of distributors
- Remuneration of distributors
- Outsourcing of principal functions
- Mutual agreement procedures and advance pricing agreements (APAs)

**Debt-to-equity rules.** Under the federal thin-capitalization guidelines which are also applied by most cantons, the minimum capitalization is calculated based on the maximum indebtedness of all of the assets. For each type of asset, only a specified percentage may be financed with debt from related parties (directly or indirectly). Consequently, the debt-to-equity ratio results from the sum of the maximum amount of indebtedness of all of the assets. The following are examples of the maximum percentages of indebtedness:

- Cash: 100%
- Accounts receivable: 85%
- Participations: 70%
- Manufacturing plants: 70%
- Intangibles: 70%

The required equity is calculated at the end of the year based on the balance sheet or on the fair market value of all assets, if higher.

For finance companies, the maximum indebtedness is 6/7 of the assets.

Interest rates may not exceed arm's-length rates (the Swiss Federal Tax Administration publishes safe haven rates periodically).

In certain cantons, specific debt-to-equity rules apply to real estate companies.

**Foreign-exchange controls.** Switzerland does not impose foreign-exchange controls.

**Transfer pricing.** Switzerland does not have statutory transfer-pricing rules. Intercompany charges should be determined at arm's length. The tax authorities accept the transfer-pricing methods described by the OECD guidelines. In particular, cost-plus charges should be justified and documented with appropriate ranges of mark-ups for each individual case. For the provision of financial and management services, the cost-plus method is accepted in exceptional cases only.

Special guidelines apply concerning minimum and maximum interest on loans granted to or from shareholders or related parties.

Companies may discuss transfer-pricing issues with the tax authorities and confirm the outcome in binding rulings. In complex cases, they may apply for APAs. Rulings are more common.

**Reorganizations.** The Swiss Merger Law of 3 October 2003 authorizes companies to carry out tax-neutral reorganizations (mergers, demergers and transformations) if certain conditions are met, including the following:

- Liability to Swiss tax continues after the reorganization.
- Assets and liabilities are transferred and acquired at their previous value for income tax purposes.

**Double tax treaties.** Switzerland has entered into more than 90 treaties for the avoidance of double taxation. The treaties generally follow the OECD model treaty.

In 1962, the federal council issued an anti-abuse decree (BRB 62) under which the Swiss tax authorities unilaterally restricted the use of the Swiss tax treaty network by Swiss companies that are controlled by foreign residents. The BRB 62 regulations were substantially loosened by a circular letter in 1999 and amendments in 2001. This circular letter substantially relaxed the restrictions for the following companies:

- Companies that are engaged in an active business
- Holding companies
- Companies of which at least 50% of their shares (by voting rights and nominal value) is quoted and regularly traded on a Swiss stock exchange or on a foreign stock exchange with identical or comparable regulations and standards
- Companies of which at least 50% of their shares (by voting rights and nominal value) is held directly by a Swiss company or several Swiss companies and the Swiss company or all of the Swiss companies are quoted and regularly traded on a Swiss stock exchange or on a foreign stock exchange with identical or comparable regulations and standards

If a company that remains subject to the anti-abuse decree receives dividends, interest or royalties from sources in a country having a double tax treaty with Switzerland and if foreign withholding tax is reduced as a result of the applicable tax treaty, no

more than 50% of this income may be diverted to persons outside Switzerland.

The Federal Tax Administration published another circular letter on 1 August 2010 with respect to BRB 62 and the changes made in 1999 and 2001. This circular letter further relaxed the anti-abuse decree. It provides that, as of 1 August 2010, the anti-abuse regulations set forth in the new double tax treaties (including the extended administrative assistance clause in accordance with Article 26 of the OECD Model Convention) supersede the regulations set forth in BRB 62 and the amendments of 1999 and 2001. For all treaties without anti-abuse clauses, BRB 62 remains applicable. The 2010 circular letter also states that the following Swiss companies (in addition to the ones already specified in 1999 and 2001) are considered engaged in active business and therefore are no longer subject to the restrictions imposed in 1962:

- Finance companies if their activities are conducted by highly qualified employees and a real value-added is generated. The actual activities carried out and the risks assumed are relevant rather than the number of employees.
- Intellectual property (IP) companies. The same factors as mentioned above for finance companies are taken into account.
- Holding companies with a participation of at least 10% in the affiliate.

For further relief, the personnel of another Swiss group company may be considered when determining whether a company is active.

**Switzerland-European Union agreement.** The Switzerland-EU agreement on savings taxation took effect on 1 July 2005. In general, it provides for Switzerland measures equal to those contained in the European Community (EC) Parent-Subsidiary Directive of 1990. Under these measures, dividends paid (similar rules also apply to intercompany interest and royalties) are not subject to tax in the country of source if the following conditions are satisfied:

- The parent company has a direct minimum holding of 25% of the capital of the payer of the dividends (subsidiary) for at least two years.
- Both the parent company and the subsidiary are subject to corporate tax without being exempted and both are in the form of a limited company.
- One company is tax resident in an EU member state and the other company is tax resident in Switzerland.
- Neither company is tax resident in a third state under a double tax treaty with that state.

Existing double tax treaties between Switzerland and EU member states that provide for more favorable tax treatment remain applicable.

The Switzerland-EU agreement applies to all EU member states, including the following jurisdictions:

- Guadeloupe, Guyana, Martinique and Reunion (France)
- Gibraltar (United Kingdom)
- Azores and Madeira (Portugal)
- Canary Islands (Spain)

The Switzerland-EU agreement will be extended to other territories that join the EU in the future.

Relief from withholding tax under the Switzerland-EU agreement requires filing and approval of Form 823C by the Swiss Federal Tax Administration. The Swiss Federal Tax Administration uses beneficial ownership or substance as a criterion for its examination of Form 823C. An approval remains valid for a three-year period. Reimbursements of Swiss withholding tax on dividends paid before the completion of the two-year minimum holding period requires filing and approval of Form 70 after the completion of the two-year holding period.

The Switzerland-EU agreement also applies to all interest payments made by a paying agent in Switzerland to an individual resident for tax purposes in an EU member state. Switzerland applies a withholding tax at a rate of 35%. The Switzerland-EU agreement allows foreign bank customers to choose between the withholding tax and a declaration to the tax authorities (voluntary declaration).

### F. Treaty withholding tax rates

Effective from 1 July 2005, Switzerland benefits from measures equivalent to those found in the EC Parent-Subsidiary Directive and the EC Directive on a common system of taxation applicable to interest and royalty payments made between associated companies of different Member States. Subject to fulfillment of the respective requirements, the taxpayer may apply either the Switzerland-EU agreement or an applicable double tax treaty.

- (a) Withholding tax is imposed only on bank interest and on interest from publicly offered bonds, debentures and other instruments of indebtedness issued by a Swiss borrower, but not on interest on commercial loans, including loans from foreign parents to Swiss subsidiaries.
- (b) Under Swiss domestic law, no withholding tax is imposed on royalties, management fees, rents, licenses and technical assistance fees and similar payments.
- (c) A 5% general rate and a 0% rate on interest paid between related parties (as defined in the double tax treaty) apply to interest paid on or after 1 July 2013. A 10% rate applies to interest paid on or before 30 June 2013.
- (d) This rate applies if the shareholding by a corporation is at least 25%. A 15% rate applies to all other dividends.
- (e) The renegotiated treaty entered into force on 4 November 2010. The 0% rate generally applies if the shareholding of a corporate recipient of dividends is at least 10%. The rate is increased to 15% if the shareholding of a corporate recipient is less than 10% or if the corporate recipient is controlled by persons that are not in the contracting states unless the corporate recipient demonstrates that the participation rights are not solely intended to profit from the advantages mentioned above. The 15% rate also applies to dividends paid to individuals and all other dividends.
- (f) The 5% rate applies to dividends paid to corporations with a shareholding and voting stock of at least 10% in the payer. A 15% rate applies to other dividends.
- (g) The 5% rate applies to dividends paid to corporations with a shareholding of at least 10% in the payer. A 15% rate applies to other dividends.
- (h) This rate applies to dividends paid to corporations holding at least 10% of the capital and to dividends paid to pension funds or other similar institutions providing pension schemes. A 15% rate applies to other dividends.
- (i) The 5% rate applies if the recipient of the dividends is a corporation with a shareholding of at least 15%. A 15% rate applies to other dividends.
- (j) The 0% rate generally applies if the recipient of the dividends is a corporation that has a shareholding of at least 10% and if the participation has been held for at least one year. A 15% rate applies if the recipient of the dividends is a corporation that has a shareholding of less than 10% or if the recipient of the dividends is an individual.
- (k) A rate of 5% applies to interest on bank loans.
- (l) Rate is applicable if shareholding by a corporation is at least 10%. The net treaty withholding rate is increased to 20% if shareholding is less than 10%.
- (m) A 0% rate applies to interest on bank loans.
- (n) The 0% rate applies to the following interest payments:
  - Interest paid to the other contracting state in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
  - Interest on a loan granted by a bank or to the other contracting state or a political subdivision or a local authority thereof
- (o) The 5% rate applies if the recipient of the dividends is a corporation with a shareholding of at least 20%. The rate is increased to 15% in all other cases.
- (p) For interest paid to banks, the withholding tax rate is reduced to 5%.
- (q) The 0% rate applies to dividends paid to corporations with direct ownership of at least 10% and a holding period of two years and to dividends paid to pension funds or other similar institutions. A 5% rate applies to corporations with direct ownership of at least 10% before the two-year holding period has elapsed. A 15% rate applies in all other cases.

- (r) The 0% rate applies to the following interest payments:
- Interest paid with respect to a loan made, guaranteed or insured by the government of the other state or an instrumentality or agency thereof
  - Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
  - Interest on a loan granted by a bank
- (s) This rate applies to dividends paid to corporations holding at least 10% of the voting power of the payer. A 15% rate applies to other dividends.
- (t) This rate applies if the shareholding of the recipient is at least 20%. For other dividends, the rate is 15%.
- (u) The 0% rate applies to interest on special trade credits or loans. The 10% rate applies to interest paid to banks or insurance companies. The 15% rate applies to other interest.
- (v) This rate applies if the shareholding of the recipient is at least 50%. The rate is 10% if the shareholding of the recipient is at least 25% but less than 50%. The rate is 15% for other dividends.
- (w) The China treaty does not cover the Hong Kong SAR.
- (x) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) directly owning shares representing at least 10% of the capital of the company paying the dividends for at least one year before the payment of the dividends
  - A pension fund or scheme
  - The central bank
- (y) This rate applies if the direct shareholding of the corporate recipient is at least 10%. For other dividends, the rate is 15%.
- (z) The rate is 10% if the shareholding of the recipient is less than 25%.
- (aa) The 0% rate applies to interest on certain government bonds. The 5% rate applies to other interest.
- (bb) This rate applies if the shareholding of the recipient is at least 10%. A 15% rate applies to all other dividends.
- (cc) A 0% rate applies to interest on bank loans and in certain other special cases.
- (dd) The 5% rate applies if the shareholding by a corporation is at least 20%. The treaty withholding tax rate is increased to 15% if the shareholding is less than 20%.
- (ee) The 10% rate applies to dividends paid to corporations holding participations of at least 20% in other enterprises. A 20% rate applies to other dividends.
- (ff) The 0% rate applies to the following interest payments:
- Interest paid to a contracting state or a political subdivision or local authority thereof
  - Interest paid to the central bank of the other contracting state or any institution owned by the government
  - Interest paid to a bank, insurance company, securities dealer or pension fund or scheme
- (gg) A 0% rate may apply under the Switzerland-EU agreement (see the paragraph preceding the treaty withholding tax rate table). The rates shown in the table are the treaty withholding tax rates.
- (hh) The 0% rate applies if the recipient is a company (other than a partnership) that owns directly at least 10% (previously 25%) for a period of at least one year (previously two years) of the capital of the company paying the dividends or if the recipient is a pension fund or pension scheme. The 15% rate applies to other dividends.
- (ii) The 0% rate applies if the recipient is a company (other than a partnership) that owns directly at least 25% of the capital of the company paying the dividends, a governmental institution, a pension fund or a central bank authority. A 15% rate applies to other dividends.
- (jj) The 5% rate applies if the corporate recipient of the dividends holds a shareholding of at least 20% in the distributing entity and has invested at least USD200,000 in the country of the distributing entity. The treaty withholding tax rate is increased to 15% if the shareholding is less than 20%.
- (kk) The 0% rate applies to interest paid to certain government agencies or in connection with the purchase of industrial, commercial or scientific equipment on credit. The 5% rate applies to interest paid to banks or in connection with the purchase of goods on credit. The 10% rate applies to other interest.
- (ll) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid on the sale of goods between corporate entities
  - Interest paid on certain bank loans
- A 10% rate applies to all other interest payments.

- (mm) The 5% rate applies if, at the time the dividends become due, the corporate recipient of the dividends holds a shareholding of at least 25% in the distributing entity and the value of the participation is at least CHF200,000 (or the equivalent in foreign currency). The treaty withholding tax rate is 15% if these conditions are not met.
- (nn) On 25 July 2014, a treaty for the avoidance of double taxation with respect to income and capital between Switzerland and Cyprus was signed. It appears that this treaty will not enter into force before 1 January 2016. However, the Swiss-EU Savings Tax Agreement is available (for further details, see footnotes [qqq] and [sss]).
- (oo) The 0% rate generally applies if the shareholding of a corporate recipient of dividends is at least 10%. The rate is increased to 10% if the shareholding of a corporate recipient is less than 10%.
- (pp) A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or pension funds. The 5% rate applies to dividends paid to corporate recipients if the shareholding is at least 10%. A 10% rate applies if the recipient is an individual with a shareholding of at least 10%. For other dividends, the rate is 15%.
- (qq) These treaties have been renegotiated and signed and will enter into force on 1 January of the year following the year of the notifications of each contracting state. It appears that these treaties will not enter into force before 1 January 2016.
- (rr) The treaty between Denmark and Switzerland was extended to the Faroe Islands as of 22 September 2009. The extension and the revised protocol between Denmark and Switzerland entered into force in November 2010.
- (ss) On 10 October 2011, an amending protocol entered into force. The protocol did not change the withholding tax rates. However, if after the date of signing of the amending protocol, India and a third state that is an OECD member sign a convention, agreement or protocol and if under this convention, agreement or protocol, India limits its taxation at source of dividends, interest, royalties or fees for technical services to a rate lower than the rate provided for in the double tax treaty between Switzerland and India, the lower rate will also apply under the double tax treaty between Switzerland and India, effective from the date on which such convention, agreement or protocol enters into force.
- (tt) The 0% rate applies if the dividends are paid to corporations with a shareholding of at least 10% in the capital of the payer and the shareholding is held for at least two years or if the dividends are paid to pension funds or similar institutions. A 15% rate applies in all other cases.
- (uu) The 0% rate applies to interest paid to the other contracting state or certain government agencies of the contracting state or in connection with financing transactions, the purchase of industrial, commercial or scientific equipment or the construction of industrial, commercial, scientific or public facilities on credit. The 10% rate applies to all other interest.
- (vv) The 5% rate applies to interest paid on bank and insurance loans, on bonds and other securities that are traded on a stock exchange and in certain other special transactions. The 15% rate applies to all other interest payments.
- (ww) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
  - A company that has owned directly or indirectly for at least six months shares representing at least 50% of the capital or voting power of the company paying the dividends
  - A pension fund or scheme
The 5% rate applies to corporate recipients if the direct or indirect shareholding represents at least 10% of the capital or voting power and if the participation has been held for six months. A 10% rate applies to all other dividends.
- (xx) The 0% rate applies to dividends that are paid to the Bank of Canada or qualifying pension schemes.
- (yy) The 0% rate applies to interest payments if the beneficial owner of the interest is a resident of Canada and is not related to the payer.
- (zz) The 0% rate applies if the beneficial owner of the dividends is the other contracting state, a political subdivision or a local authority of the other contracting state or a pension fund or scheme.
- (aaa) The 0% rate applies to dividends paid to the Monetary Authority of Singapore or the Government of Singapore Investment Corporation Pte Ltd. The 5% rate applies to dividends paid to a corporation (other than a partnership) holding directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
- (bbb) The 0% rate applies to interest paid by a banking enterprise to a banking enterprise in the other contracting state or interest arising in Switzerland and paid to the Monetary Authority of Singapore. The 5% rate applies to other interest.

- (ccc) This treaty has been renegotiated and signed. The revised treaty will enter into force after each country has completed the domestic law procedures for ratification and complied with the respective provisions of the treaty.
- (ddd) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that has owned directly or indirectly shares representing at least 10% of the capital or voting power of the company paying the dividends
  - A pension fund or scheme
- The 15% rate applies to other dividends.
- (eee) The 0% rate applies to dividends paid to a corporation with a direct shareholding of at least 10% in the capital of the payer and to dividends paid to a governmental institution, pension fund or central banking authority. A 15% rate applies to other dividends
- (fff) The 0% rate applies to interest paid to the state or the central bank. The 5% rate applies to interest paid with respect to a loan or credit made, guaranteed or insured for the purposes of promoting export by an Eximbank or similar institution. The 10% rate applies to interest derived by a bank. A 15% rate applies in all other cases.
- (ggg) On 16 January 2012, the government of Argentina issued a note directed to the Swiss ambassador in Argentina regarding the immediate termination of the provisional application of the treaty for avoidance of double taxation with respect to taxes on income and capital between Switzerland and Argentina and the related protocols. On 20 March 2014, Argentina and Switzerland signed a new income and capital tax treaty. The exchange of notes of 1950 concerning the taxation of shipping and air transport companies is suspended and will not be effective as long as the Argentina and Switzerland treaty is in effect.
- (hhh) The 5% rate applies if the recipient of the dividends holds a shareholding of at least 20% in the distributing entity and if the value of the participation is at least CHF200,000 (or the equivalent in foreign currency). A 15% rate applies to other dividends (in specific cases the 0% rate applies; see footnote [ooo]).
- (iii) The 0% rate applies to the following interest payments:
- Interest paid with respect to a loan made, guaranteed or insured by the government of the other state or an instrumentality or agency thereof
  - Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid in connection with the sale on credit of merchandise by one enterprise to another enterprise
  - Interest paid to the other contracting state
- (jjj) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid on bank loans
  - Interest paid to a bank, insurance company or pension fund or scheme
  - Interest paid to a contracting state, a political subdivision or local authority thereof, or a central bank
  - Interest paid between enterprises that are associated by a stake of at least 25% held for at least two years or that are both held by a third company that directly holds at least 25% of the capital of both companies for at least two years
- (kkk) A 0% rate applies to dividends paid to the other contracting state or a political subdivision or local authority thereof, the central bank or a pension fund.
- (lll) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid on the sale of goods between corporate entities
  - Interest paid on bank loans
- In addition, the 0% rate applies if the interest is paid between enterprises that satisfy all of the following conditions:
- They are associated by a stake of at least 10% held for at least one year or they are both held by a third company that directly holds at least 10% of the capital of both companies.
  - They are resident in a contracting state and, under any double tax agreement with any third state, none of the companies is resident in that third state.
  - They are subject to corporation tax and are not exempt from tax on interest payments.
  - They are both limited companies.
- The 10% rate applies to other interest payments.

- (mmm) The 0% rate applies if the direct shareholding of the corporate recipient is at least 10% and if the participation has been held for at least one year. For other dividends, the rate is 15%.
- (nnn) The 0% rate applies to the following interest payments:
- Interest paid to a contracting state or a political subdivision, local authority, administrative-territorial unit or export financing institution thereof
  - Interest paid between enterprises that are associated by a stake of at least 25% or that are both held by a third company that directly holds at least 25% of the capital of both companies
- (ooo) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A pension fund or scheme
  - The government of the other state, or a political subdivision or local authority thereof
  - The central bank
- (ppp) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) directly owning shares representing at least 10% of the capital of the company paying the dividends
  - A pension fund or scheme
  - The central bank
- The 10% rate applies to other dividends.
- (qqq) This rate applies if the following conditions are satisfied:
- The parent company has a direct minimum holding of 25% of the capital of the payer of the dividends (subsidiary) for at least two years.
  - Both the parent company and the subsidiary are subject to corporate tax without being exempted and are in the form of a limited company.
  - One company is tax resident in an EU member state and the other company is tax resident in Switzerland and neither company is tax resident in a third state under a double tax treaty with that state.
- (rrr) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest on a loan granted by a bank
- (sss) This rate applies if the following conditions are satisfied:
- The interest is paid between associated companies or their permanent establishments and such companies are affiliated by a direct minimum holding of 25% for at least two years or both are held by a third company that has directly a minimum holding of 25% in both the capital of the first company and in the capital of the second company for at least two years.
  - One company is tax resident or has a permanent establishment in an EU member state and the other company is tax resident or the other permanent establishment is located in Switzerland.
  - Neither company is tax resident, and none of the permanent establishments are located in a third state under a double tax treaty with that state.
  - All of the companies are subject to corporate tax without being exempted from tax on interest and each is in the form of a limited company.
- (ttt) The 0% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of equipment, merchandise or services
  - Interest paid on bank loans
  - Interest paid with respect to pension schemes
  - Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
  - Interest paid between companies that are associated by a direct stake of at least 10% held for at least one year or by a direct holding of a third company of at least 10% for at least one year of the capital of both companies
- The 5% rate applies to other interest payments.
- (uuu) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 25% of the capital of the company paying the dividends
  - A pension fund or scheme
- (vvv) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least one year

- A pension fund or central bank
- (www) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is either of the following:
- A company (other than a partnership) that directly owns shares representing at least 10% of the capital of the company paying the dividends
  - A pension scheme
  - The central bank
- The 15% rate applies to other dividends.
- (xxx) The 0% rate applies to the following interest payments:
- Interest paid to the government of the other state, a political subdivision or local authority thereof, or the central bank
  - Interest paid on specific bank loans of international business transactions
  - Interest paid in connection with the sale on credit of equipment, merchandise or services
  - Interest paid between companies that are associated by a direct stake of at least 25% or by a direct holding of a third company (resident in the EU or Switzerland) of at least 25% of the capital of both companies
- The 5% rate applies to other interest payments.
- (yyy) A 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- A pension fund or scheme
  - The central bank
- (zzz) The 10% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is a company (other than a partnership) that holds directly at least 10% of the capital and of the voting power of the company paying the dividends.
- (aaaa) The 10% rate applies to the following interest payments:
- Interest paid in connection with the sale on credit of industrial, commercial or scientific equipment
  - Interest paid on bank loans
- (bbbb) The 0% rate applies to dividends if the beneficial owner is a resident of the other contracting state and is one of the following:
- The government of the other state, or a political subdivision or local authority thereof
  - An institution or fund wholly owned by that other state as agreed by mutual agreement of the competent authorities of the contracting states
  - The central bank
- The 5% rate applies if the recipient is a company (other than a partnership) that owns directly at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (cccc) The 0% rate applies to dividends if, in the case of Australia, the beneficial owner of the dividend is a company that owns directly no more than 10% of the voting power of the company paying the dividends or, in the case of Switzerland, owns directly no more than 10% of the capital of the company paying the dividends and if the beneficial owner is one of the following:
- A contracting state, a political subdivision or local authority thereof
  - The national bank
  - In the case of Australia, a resident of Australia deriving such dividends from the carrying on of complying superannuation activities
  - In the case of Switzerland, a pension scheme whose investment income is exempt from Swiss tax
- The 5% rate applies to dividends paid to corporations holding at least directly 10% of the voting power of the payor in the case of Australia or 10% of the capital of the payor in the case of Switzerland. A 15% rate applies to other dividends.
- (dddd) The 10% rate applies to interest payments. However, exemptions apply to, among others, the following:
- The government of the other contracting state, and several governmental bodies and institutions thereof
  - The national bank

At the time of writing, Switzerland had signed new double tax treaties or protocols to existing double tax treaties with Argentina, Belgium, Estonia and Iceland. Switzerland has initialed but not yet signed new double tax treaties with Costa Rica, Korea (North), Liechtenstein and Oman.

## A. At a glance

Corporate Income Tax Rate (%)	17 (a)
Capital Gains Tax Rate (%)	17 (a)(b)
Branch Tax Rate (%)	17 (a)
Withholding Tax (%)	
Dividends	
Paid to Residents	0
Paid to Nonresident Corporations and Individuals	20 (c)
Interest	
Paid to Resident Corporations	10 (d)
Paid to Resident Individuals	10 (e)
Paid to Nonresident Corporations and Individuals	15/20 (f)
Royalties	
Paid to Resident Corporations and Individuals	10 (g)
Paid to Nonresident Corporations and Individuals	20
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10

(a) For details, see Section B.

(b) Effective from 1 January 1990, income from securities transactions is not subject to regular corporate income tax. Such income is subject to alternative minimum tax. See Section B.

(c) For details and the definition of a nonresident corporation, see Section B.

(d) Payments in connection with securities issued under the Financial Asset Securitization Act or Real Estate Securitization Act and interest derived from short-term commercial paper are subject to a 10% withholding tax. In addition, they are included in the computation of the resident corporation's taxable income and are taxed at a rate of 17%.

(e) Interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and repurchase agreements underlying such financial instruments is not included in the tax computation in a resident individual's tax return but is subject to a 10% withholding tax.

(f) The applicable tax rate for interest arising from short-term commercial paper, asset-backed securities, bonds, structured products and interest arising from repurchase agreements is 15%. Other types of interest are subject to a tax rate of 20%.

(g) The withholding of tax is not required if the licensor issues a Government Uniform Invoice (GUI).

## B. Taxes on corporate income and gains

**Corporate income tax.** A domestic profit-seeking enterprise is subject to corporate income tax on all of its income regardless of source. All profit-seeking enterprises, including subsidiaries of foreign companies that are incorporated under the Company Law of Taiwan, are considered domestic profit-seeking enterprises. A foreign profit-seeking enterprise is subject to tax only on income sourced in Taiwan.

**Tax rates.** The taxing threshold for taxable income is TWD120,000, and the total net income exceeding TWD120,000 is subject to corporate income tax at a rate of 17%. However, the income tax payable may not exceed one-half of the taxable income minus the TWD120,000 threshold amount.

**Alternative minimum tax.** The alternative minimum tax (AMT) applies to domestic profit-seeking enterprises and foreign profit-seeking enterprises that have a fixed place of business or business agent in Taiwan, if the enterprise's base income exceeds TWD500,000. The AMT is calculated in accordance with the following formula:

$$\text{AMT} = (\text{basic income} - \text{deduction of TWD500,000}) \times 12\%$$

Basic income equals the sum of the following items:

- Taxable income
- Tax-exempt income under the Statute for Upgrading Industries and other credit regulations
- Income from transactions in securities and futures
- Tax-exempt income of offshore banking units

If the regular income tax equals or exceeds the AMT, only the regular income tax is payable. The regular income tax equals tax payable calculated under the Income Tax Law, less tax credits. If the regular income tax is less than the AMT, the difference between regular income tax and the AMT is payable in addition to the regular income tax. The additional tax payment cannot be off-set by tax credits.

**Tax incentives.** A new Statute for Industry Innovation (SII) was announced and published on 12 May 2010 to replace the old Statute for Upgrading Industries (SUI), which expired on 31 December 2009. In comparison to the SUI, the SII retains only the tax incentive for expenditure spent on research and development (R&D) activities and offers other non-tax subsidies for various qualified activities. Under the SII, enterprises may claim up to 15% of their R&D expenditures as a credit to offset against their corporate income tax payable in the current year only, with a maximum credit of 30% of the tax payable. The unused R&D tax credits obtained under the SII cannot be carried over to the future years. The SII is effective from 1 January 2010 through 31 December 2019. The tax incentives obtained before the expiration of SUI remain effective after the expiration of SUI.

**Capital gains.** For profit-seeking enterprises, effective from 1 January 1990, income from securities transactions is not subject to regular income tax. Such income is subject to AMT. A securities transaction tax of 0.3% or 0.1% is imposed based on the transaction value.

During the period of 1 January 2010 through 31 December 2016, trading in corporate bonds and financial bonds (as defined in the Banking Law of Taiwan) is exempt from securities transaction tax. The suspension of income tax on securities transactions applies only to securities issued and certified in accordance with the law of Taiwan. Gains derived from disposals of securities that are not issued or certified in accordance with Taiwan regulations are subject to income tax.

Gains on sales of land are exempt from income tax, but are subject to land value increment tax (see Section D).

**Administration.** The tax year is normally the calendar year. Permission must be obtained to use any other period. An annual tax return must be filed during the fifth month of the year following the tax year. An extension to file a tax return is not available.

In general, the late filing penalty is 10% of the tax due. It may not exceed TWD30,000 or be less than TWD1,500. A delinquent reporting surcharge is 20% of the tax assessed by the authorities. It may not exceed TWD90,000 or be less than TWD4,500. A taxpayer that fails to pay the tax within the prescribed time limit is subject to a surcharge for delinquent payment and interest on a daily basis at the prevailing interest rate provided by the Directorate General of Postal Remittances and Savings Bank (PRSB). Underreporting of taxable income is subject to a penalty of up to two times the underpayment of tax. In the event of a failure to file the annual income tax return after expiration of the prescribed period, the tax authorities may make a provisional assessment of the amount of income and tax payable on the basis of available tax data or the profit standard of the same trade. In the event that other tax information is subsequently obtained by the tax authorities, the taxpayer is subject to a penalty of up to three times the tax shortfall, in addition to the delinquent reporting surcharge.

During the month of September, a profit-seeking enterprise (excluding a sole proprietor, partnership, prescribed small-size enterprise or tax-exempted entity) must pay an interim tax equal to 50% of the preceding year's tax liability. Under the Income Tax Law, qualified enterprises may pay interim tax based on the income derived in the first six months of the current year. If the interim tax payment is made after 30 September but before 31 October, late payment interest accrues on a daily basis at the prevailing interest rate provided by the PRSB. If the interim payment is not made by 31 October, the tax authorities assess one month's interest at the prevailing interest rate provided by the PRSB.

**Dividends.** Effective from 1 January 2010, the dividend withholding tax rate is 20% for nonresident corporations or nonresident individuals, regardless of whether the investments are approved by the Taiwan government pursuant to the Statute for Investment by Foreign Nationals or the Statute for Investment by Overseas Chinese. Withholding tax is not imposed on dividends paid to residents.

Under an imputation system, which took effect on 1 January 1998, a 10% surtax is imposed on the undistributed profits of companies in the second year following the year in which the profits are

earned. This tax is in addition to the normal corporate income tax imposed on the profits. Resident individuals who receive dividends from resident companies must include the dividends in their taxable income and are granted tax credits for the corporate income tax and the 10% surtax paid by the distributing company in Taiwan. For nonresident individuals and corporations, the tax credit is limited to 10% of the franked dividends (dividends paid out of company profits on which the 10% surtax has been imposed). Cash refunds for excess credits are granted to shareholders who are resident individuals. However, for earnings distributed on or after 1 January 2015, foreign shareholders may credit only half of the surtax paid by the companies against the dividend withholding tax.

Companies must maintain an imputation credit account and calculate the imputation credits that are allocated to shareholders. These accounts are designed to limit the credit to the amount of corporate income tax and surtax paid in Taiwan. The total tax credit available is determined by multiplying the dividends received by the ratio of total tax paid at the corporate level to accumulated retained earnings since 1998. Similar to the surtax credit, for dividends declared on or after 1 January 2015, resident shareholders can only claim half of the tax credit against their personal income tax.

Dividends received by resident companies from other resident companies are exempt from corporate income tax. However, imputation credits cannot be used by resident companies and must be passed on to individual shareholders. The tax credits are passed through to the company's individual shareholders by adding the tax credits received to the numerator of the ratio described in the preceding paragraph.

**Foreign tax relief.** A tax credit is allowed for foreign income tax paid directly by a domestic profit-seeking enterprise, but it may not exceed the additional amount of the Taiwan tax resulting from the inclusion of the foreign-source portion in the profit-seeking enterprise's total income.

### C. Determination of trading income

**General.** Income for tax purposes is computed according to Taiwan's generally accepted accounting principles, adjusted for certain provisions included in the tax code.

Necessary and ordinary expenses of a profit-seeking enterprise are deductible, provided these are adequately supported by documentation. The guidelines of Examination of Income Tax of Profit-Seeking Enterprises, promulgated by the Ministry of Finance, provide guidance for determining deductible business expenses. Transactions must conform to regular business practice; otherwise, tax authorities may assess tax based on standard profit margins derived from industry statistics.

If the income of a company consists of both taxable income and exempt income, the costs, expenses or losses, except for those that are attributable to the taxable income and exempt income in a direct, reasonable and definite way, must be allocated to taxable income and exempt income based on certain permitted methods.

**Tax exemptions.** A foreign enterprise engaging in international transportation that derives income in Taiwan is exempt from tax if Taiwan and the home country of the foreign enterprise have entered into an international transportation income tax agreement, which provides reciprocal treatment to Taiwan international transportation enterprises operating in the foreign country.

Income derived by profit-seeking enterprises or individuals from the sale of land is exempt from income tax.

On approval from the competent authority, royalties paid to a foreign enterprise for the use of its patent rights or trademarks, or for the licensing of other special rights, may be exempt from tax if the licensed rights are used to introduce new production technology or products, improve product quality or reduce production cost. In addition, service fees received by a foreign enterprise for rendering technical services in the construction of a factory for an emerging strategic important enterprise (ESIE) and royalties for the licensing of know-how to the ESIE may also be exempt from tax on approval. However, such exemption treatment applies only to licenses or service contracts signed on or before 31 December 2010. The new rules applicable to license contracts signed after 2010 are still under discussion by the competent authorities and have not yet been issued.

A foreign-based corporate taxpayer that is engaged in international transportation, construction contracting, technical service provision, or machinery and equipment leasing may apply to use a deemed-profit-rate method (15% in general, and 10% for international transportation business) in determining its taxable income in Taiwan if it is difficult to calculate the costs and expenses arising from the conduct of the business in Taiwan.

Interest received by a foreign financial institution for offering financing facilities to its Taiwan branch offices or other financial institutions in Taiwan is exempt from tax. With the approval of the Ministry of Finance, interest received by a foreign financial institution for extending loans to legal entities in Taiwan for financing important economic construction projects is also exempt from tax.

**Inventories.** Inventories are valued for tax purposes at the lower of cost or net realizable value. In determining the cost of goods sold, specific identification, first-in, first-out (FIFO), weighted average, moving average, or any other method prescribed by the competent authority may be used. However, the use of two different cost methods in one fiscal year is not allowed.

**Provisions.** Provisions for a retirement fund approved by the authorities are deductible in amounts up to 15% of the total payroll. The applicable percentage depends on whether the fund is managed separately from the business entity and whether it conforms to the provisions of the Labor Standards Law.

Allowance for bad debts is limited to 1% of the balance of outstanding trade accounts and notes receivable (secured or unsecured) at year-end.

**Tax depreciation, depletion and amortization.** A taxpayer may claim a depreciation deduction for most property (except land) used in a trade or business. Depreciation may be computed using the

straight-line, fixed percentage on diminishing book value method, working-hour method, sum-of-the-years'-digits method or production-unit method. Under the working-hour method, depreciation is computed based on the number of working hours that a depreciable asset is used in a tax year. The time periods over which an asset may be depreciated are specified by the tax authorities. The following are some of the applicable time periods.

<b>Assets</b>	<b>Years</b>
Commercial buildings	10 to 50
Industrial buildings	5 to 35
Office equipment	3 to 5
Motor vehicles and vessels	3 to 18
Plant and machinery	2 to 20

Companies may use the accelerated depreciation method if they meet certain criteria.

Depletion of assets in the form of irreplaceable resources can be computed either based on the production units or methods provided by the Table of Depletion Assets promulgated by the Ministry of Finance. This method must be applied consistently from year to year. In addition, a taxpayer may claim an amortization deduction for intangibles and organizational expenses. Business rights (for example, commercial rights for operating public utility, telephone, public transportation, shipping and air transportation businesses) and copyrights are amortized over 10 years and 15 years, respectively. Trademarks, patents and franchises must be amortized over the period prescribed by the respective laws governing the granting of these rights. Organizational and preoperating expenditures incurred during the period from the planning phase to the first year in which significant revenue is generated from the main business activities must be expensed on occurrence.

**Relief for losses.** If certain requirements are met, companies may carry forward for up to 10 years losses that have been approved by the tax authorities and not yet expired. Loss carrybacks are not permitted.

**Groups of companies.** In general, associated or related companies in a group are taxed separately for corporate income tax purposes and may not file consolidated tax returns. However, a financial holding company that holds 90% or more of the shares of subsidiaries in Taiwan for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

In addition, a company that acquires 90% or more of the shares or capital of its subsidiaries through a merger, spin-off or other acquisition under the Business Merger and Acquisition Law and holds such shares for at least 12 months may elect to file a consolidated profit-seeking enterprise income tax return under its own name.

A 10% surtax on the undistributed consolidated retained earnings applies in addition to the corporate income tax on consolidated net income.

An election to file a consolidated profit-seeking enterprise return applies only to corporate income tax and, as a result, qualifying parent companies and their subsidiaries must calculate all other taxes separately.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on sales and services	5
Business tax for financial industry	1/2/5
Land value increment tax, on unearned increase in the value of land, payable by the seller at the time of ownership transfer	20 to 40
Registration fee, on original or additional capital contributions	0.025

#### E. Miscellaneous matters

**Foreign-exchange controls.** Under foreign-exchange control regulations, registered business entities or adults legally residing in Taiwan may remit out (in) unlimited funds for the import (export) of goods and services. However, prior declaration to the Central Bank of China (Taiwan) is required for the following:

- An individual who has accumulated inward or outward remittances exceeding USD5 million in a year
- A business entity with accumulated inward or outward remittances exceeding USD50 million in a year
- A single remittance by an individual exceeding USD500,000
- A single remittance by a business entity exceeding USD1 million

In addition, supporting documents, such as transaction contracts, must be submitted at the time of remittance for the Central Bank's audit purposes.

**Debt-to-equity rules.** On 26 January 2011, the President of Taiwan announced the thin-capitalization rule enacted into Article 43-2 of the Income Tax Act. On 22 June 2011, the Ministry of Finance announced the enforcement rules for the thin-capitalization rule. The enforcement rules contain a debt-to-equity ratio of 3:1 (excluding companies in the financial industries). Interest on the excess portion of loans is not deductible. The enforcement rules do not apply to enterprises satisfying any of the following conditions:

- Total net current annual operating income and non-operating income is less than TWD30 million.
- Total annual interest expenses and total interest expenses derived from intercompany loans in the current year are both less than TWD4 million.
- Before including the interest expenses in the taxable income calculation, the current year's taxable income is negative and such tax losses are not eligible for the tax loss carryforward regime under Article 39 of the Income Tax Act.

**Controlled foreign companies.** Taiwan does not currently have a controlled foreign company (CFC) measure. Income derived by foreign subsidiaries of Taiwan companies is not subject to Taiwan income tax until it is repatriated to Taiwan in the form of dividends. However, the Taiwan government is considering the introduction of a CFC regime. Under the draft bill currently under

review by the Legislative Yuan, a nonresident company is considered a CFC if it is 50%-or-more directly or indirectly owned by a Taiwan resident company. A resident company that holds an interest of 50% or more in a CFC is taxed on the company's share of the profits of the CFC, regardless of whether a dividend has been declared.

**Anti-avoidance legislation.** The Taiwan tax laws contain rules that deal with tax evasion and tax avoidance. The general rule is that the tax authorities may ignore transactions that constitute an abuse of the law and assess taxes with respect to each transacting party based on the economic substance of the transactions as well as on the attribution of the economic benefits. The same rule applies to sham transactions designed to conceal the economic reality of the transaction. In addition, under a draft bill currently under review by the Legislative Yuan, the Taiwan government is considering the introduction of rules of place of effective management into the anti-avoidance rules.

**Transfer pricing.** The Taiwan Transfer Pricing Examination Guidelines (the TP Guidelines) took effect on 30 December 2004. Except for immaterial amounts from related-party transactions, extensive contemporaneous documentation is required. Under the TP Guidelines, on filing the annual income tax return, a profit-seeking enterprise must have the transfer-pricing report and relevant documents prepared and ready for audit, if requested. In addition, in the event of a tax audit, a profit-seeking enterprise must provide the tax authorities with all required documents within one month of a request for such documents. The TP Guidelines provide that the tax authorities may impose a maximum penalty of 200% of the tax shortfall resulting from improper transfer prices.

## F. Treaty withholding tax rates

Taiwan has entered into double tax treaties with the countries listed in the table below.

Taiwan has entered into international transportation income tax agreements with Canada, the European Union, Germany, Israel, Japan, Korea (South), Luxembourg, the Macau SAR, the Netherlands, Norway, Sweden, Thailand and the United States.

The following table lists the withholding tax rates under Taiwan's double tax treaties. The rates apply only if the recipient is the beneficial owner of the income.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Australia	10/15 (a)	10	12.5
Belgium	10	10	10
Denmark	10	10	10
France	10	10	10
Gambia	10	10	10
Germany	10	10/15 (h)	10
Hungary	10	10	10
India	12.5	10	10
Indonesia	10	10	10
Israel	10	7/10 (i)	10
Kiribati	10	10	10
Luxembourg	10/15 (b)	10/15 (j)	10

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Macedonia	10	10	10
Malaysia	12.5	10	10
Netherlands	10	10	10
New Zealand	15	10	10
Paraguay	5	10	10
Senegal	10	15	12.5
Singapore	– (c)	– (k)	15
Slovak Republic	10	10	5/10 (n)
South Africa	5/15 (d)	10	10
Swaziland	10	10	10
Sweden	10	10	10
Switzerland	10/15 (e)	10	10
Thailand	5/10 (f)	10/15 (l)	10
United Kingdom	10	10	10
Vietnam	15	10	15
Non-treaty countries	20 (g)	15/20 (m)	20

- (a) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 25% of the capital of the payer. The 15% rate applies in all other cases.
- (b) The 15% rate applies if the beneficial owner of the dividends is a collective-investment vehicle established in Luxembourg and treated as a body corporate for tax purposes in Luxembourg. The 10% rate applies in all other cases.
- (c) For dividends paid to Singapore residents, the withholding tax on the dividends and the corporate income tax payable on the profits of the payer may not exceed 40% of the taxable income of the payer out of which the dividends are paid.
- (d) The 5% rate applies if the beneficial owner of the dividends holds directly at least 10% of the capital of the payer. The 15% rate applies in all other cases.
- (e) The 10% rate applies to dividends paid to a company (other than a partnership) holding directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.
- (f) The 5% rate applies if the beneficial owner of the dividends holds at least 25% of the capital of the payer. The 10% applies in all other cases.
- (g) The 20% rate applies to dividends paid to nonresident corporations and non-resident individuals, effective from 1 January 2010 (see Section B).
- (h) The 15% rate applies to interest on real estate investment trusts and real estate asset trusts. The 10% rate applies in all other cases.
- (i) The 7% rate applies to interest on bank loans. The 10% rate applies in all other cases.
- (j) The 15% rate applies if the beneficial owner of the interest is a collective-investment vehicle established in Luxembourg and treated as a body corporate for tax purposes in Luxembourg. The 10% rate applies in all other cases.
- (k) The Singapore treaty does not provide a preferential withholding tax rate for interest payments.
- (l) The 10% rate applies to interest received by financial institutions (including insurance companies). The 15% rate applies in all other cases.
- (m) The 15% rate applies to interest on financial instruments (see Section A).
- (n) The 5% rate applies to the royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies in all other cases.

## A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (b)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	5/10 (c)
Interest	10 (d)
Royalties	15 (e)
Management and Professional Fees (Service Fees) or Technical Services Fees for Mining, Oil or Gas	5/15 (f)
Supply of Goods	2 (g)
Insurance Premiums	5 (h)
Rent	10 (e)
Money Transfer Commission	10 (i)
Other payments	15
Branch Remittance Tax	10 (j)

## Net Operating Losses (Years)

Carryback	0
Carryforward	Unlimited

- (a) The corporate income tax rate is reduced to 25% for three years for companies that are newly listed on the Dar es Salaam Stock Exchange and that issue at least 30% of their share capital to the public. Companies reporting tax losses for three consecutive years must pay alternative minimum tax at a rate of 0.3% on annual turnover.
- (b) Capital gains are treated as business income for companies and are taxed at the regular corporate income tax rate.
- (c) The 10% rate applies to dividends paid by unlisted companies to residents and nonresidents. The 5% rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and for dividends paid by a resident company to a resident company owning 25% or more of the shares in the payer of the dividends.
- (d) This tax applies to residents and nonresidents. Resident companies may credit the withholding tax against their annual corporate income tax. Interest paid by strategic investors to nonresident banks and resident financial institutions is exempt from withholding tax.
- (e) This withholding tax applies to both residents and nonresidents.
- (f) The 5% rate applies to residents, and the 15% rate applies to nonresidents. The withholding tax on management and professional fees (services fees) for resident persons is an advance tax creditable against the final income tax. The withholding tax on technical services provided to mining, oil or gas companies is a final tax. Also, see Section B.
- (g) This withholding tax applies to all supplies of goods to the government.
- (h) This tax applies to nonresidents only.
- (i) This tax applies to residents who pay a money transfer commission to a money transfer agent.
- (j) This tax applies to branches of foreign companies. Tax is levied on an annual deemed profit repatriation basis. Special rules apply to the calculation of the base.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies are considered resident for tax purposes if either of the following applies:

- They are incorporated or formed under the laws of Tanzania.
- Management and control of the affairs of the company are exercised in Tanzania at any time during the year of income.

Resident companies are subject to tax on their worldwide income. Nonresident companies are subject to tax on their Tanzanian-source income only.

**Rates of corporate tax.** Both resident and nonresident companies are subject to tax at a rate of 30%.

The corporate income tax rate is reduced from 30% to 25% (for the first three years) for companies that are newly listed on the Dar es Salaam Stock Exchange and that issue at least 30% of their share capital to the public.

Companies operating in the Export Processing Zone (EPZ) are exempt from corporate tax for the first 10 years. They are also exempt from withholding tax on dividends, interest and rental payments.

**Alternative minimum tax.** Companies reporting tax losses or utilizing loss carryforwards for three consecutive years must pay alternative minimum tax at a rate of 0.3% on annual turnover.

**Capital gains.** Capital gains are treated as business income for companies and are taxed at the regular corporate income tax rate. Direct and indirect share transfers are subject to capital gains tax.

**Administration.** A company's year of income is the calendar year. Companies may apply to the Commissioner of Income Tax for approval of a different year of income.

Companies must file provisional tax returns by the end of the third month of their year of income and file their final tax returns within six months after the end of the year of income. The estimated tax must be paid in four equal installments, as set forth in the provisional return. The remaining balance of tax due (the difference between the actual tax and tax paid in installments) must be paid by the due date of filing the final return. The taxpayer's estimate of taxable income may not be less than 80% of the company's taxable income as finally determined for the year of income. The Commissioner of Income Tax may allow a lower estimate if justified by the facts and circumstances of the case. Companies may revise their provisional return and file a revised return in the 6th, 9th or 12th month of the year of income if new developments suggest an increase or decrease in income.

A penalty is imposed for a failure to file a return. Fraud related to a return may be subject to a penalty of up to 100% of the underpaid tax.

**Dividends.** A final withholding tax is imposed on dividends. A 10% rate generally applies to residents and nonresidents. A 5% rate applies to dividends paid by companies listed on the Dar es Salaam Stock Exchange and to dividends paid to resident companies that hold 25% or more of the shares in the payer of the dividends.

**Special tax for the extractive industry.** Technical services provided by resident companies or branches to the extractive industry in mining or oil and gas are subject to a final withholding tax of 5%. For nonresident service providers, the withholding tax rate is 15%.

### C. Determination of trading income

**General.** The audited financial statements serve as the starting point for computing taxable income. Expenses and losses are generally not deductible unless they are incurred wholly and exclusively in the production of income.

**Inventories.** Inventories are valued at the lower of cost or net realizable value. The last-in, first-out (LIFO) method is not allowed.

**Provisions.** Provisions may not be deducted.

**Depreciation.** Depreciation computed for financial statement purposes is not deductible, but capital allowances are provided for depreciable assets, which are allocated to one of the eight classes. The following are the classes and the rates of the capital allowances.

Class	Assets	Rate
1	Computers and data handling equipment, together with peripheral devices; automobiles, buses and minibuses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tons; and construction and earth-moving equipment	37.5% (reducing-balance)

Class	Assets	Rate
2	Buses with a seating capacity of 30 or more passengers; heavy general purpose or specialized trucks, trailers and trailer-mounted containers; railroad cars, locomotives and equipment; vessels, barges, tugs and similar water transportation equipment; aircraft; other self-propelling vehicles; plant and machinery used in agriculture, manufacturing or mining operations; specialized public utility plant and equipment; and machinery irrigation installations and equipment	25% (reducing-balance)
3	Office furniture, fixtures and equipment; and any assets not included in another class	12.5% (reducing-balance)
4	Natural resources exploration and production rights and assets referred to in Subparagraph (3) with respect to natural resource prospecting, exploration and development expenditure	20% (straight-line)
5	Buildings, structures and similar works of a permanent nature used in agriculture, livestock farming or fish farming	20% (straight-line)
6	Buildings, structures and similar works of a permanent nature other than those mentioned in Class 5	5% (straight-line)
7	Intangible assets other than those in Class 4	$1/\text{useful life}$
8	Plant and machinery (including windmills, electric generators and distribution equipment) used in agriculture; electronic fiscal devices purchased by non-value-added tax registered traders; and equipment used for prospecting and exploration of minerals or petroleum	100%

Plant and machinery in Categories 2 and 3 qualify for an initial capital expenditure allowance of 50% for the first year if they satisfy any of the following conditions:

- They are fixed in a hotel used for tourism services.
- They are fixed in a factory used for manufacturing.
- They are used in fish farming.

The maximum depreciable amount for a non-commercial automobile is TZS15 million.

Mining companies may deduct 100% of qualifying expenditure in the year in which the expenditure is incurred.

**Relief for tax losses.** Companies may carry forward tax losses indefinitely. No carryback is allowed. Special rules for long-term contracts may apply.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	18
Customs duties (imports may also be subject to VAT)	
Raw material or capital goods	0
Semifinished goods	10
Finished goods	25
Property tax; imposed by local governments on the value of real property	0.15
Skills and Development Levy; imposed on gross remuneration (excluding benefits-in-kind)	5
Social security; imposed on basic salary; rates depend on the respective fund; paid by	
Employer	10/15
Employee	5/10
Workers' Compensation Fund; imposed on employers' annual wage bill (effective from 1 July 2014); collection procedures yet to be determined	1

#### E. Foreign-exchange controls

Tanzania does not impose foreign-exchange controls on current-account transactions, but the Bank of Tanzania must be notified of foreign capital-account transactions.

#### F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Canada	10	15	20
Denmark	10	12.5	20
Finland	10	15	20
India	10	12.5	20
Italy	10	12.5	15
Norway	10	15	20
South Africa	10	10	10
Sweden	10	15	20
Zambia	0	0	0
Non-treaty countries	10	10	15

The East African countries, which are Burundi, Kenya, Rwanda, Tanzania and Uganda, have signed a tax treaty, which has not yet been ratified.

Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

\* Certain types of interest are exempt from tax [see footnote (a) to Section F].

## B. Taxes on corporate income and gains

**Corporate income tax.** Thai resident companies are subject to corporate income tax on their worldwide income. Thai resident companies are those incorporated in Thailand. Branches of foreign corporations are subject to Thai tax on Thailand-source income only.

**Rates of corporate tax.** Thai resident companies and branches of foreign corporations are subject to corporate income tax at a flat rate of 20% on taxable profits.

Progressive corporate income tax rates of 0%, 15% and 20% apply to locally incorporated companies with paid-up capital of not more than THB5 million and revenue of not more than THB30 million per year.

**Capital gains.** Capital gains are treated as ordinary business income subject to income tax.

**Administration.** Corporate income tax returns, together with the audited financial statements, must be filed with the Revenue Department within 150 days after the accounting year-end. Corporate income tax payments are due on the filing date.

Mid-year (interim) tax returns must be filed with interim tax payments within two months after the end of the first half of the accounting year. Listed companies, financial institutions and companies approved by the Director-General of the Revenue Department compute their interim tax based on actual operating results for the first half-year. Other companies compute their interim tax based on one-half of the estimated annual profit. These companies do not have to submit audited or reviewed financial statements. The interim tax is creditable against the annual tax payable at the end of the year.

### **Dividends**

*Received from resident companies.* In general, one-half of dividends received by resident companies from other resident companies may be excluded from taxable income. However, the full amount of the dividends may be excluded if either of the following applies:

- The recipient is a company listed on the Stock Exchange of Thailand.
- The recipient owns at least a 25% equity interest in the distributing company, provided that the distributing company does not own a direct or indirect equity interest in the recipient company.

These rules apply if the related shares are acquired not less than three months before receiving the dividends and are not disposed of within three months after receiving the dividends.

*Received from foreign companies.* A Thai company that owns an equity interest of at least 25% in a foreign company can exclude dividends received from such foreign company from its taxable profit if, on the date of receipt of the dividend, it has held the investment for at least six months and if the profit out of which the dividends are distributed is subject to income tax in the hands of the foreign company at a rate of at least 15%.

**Foreign tax relief.** Thailand has entered into double tax treaties with 56 countries. In general, under the treaties, foreign tax relief is limited to the lower of the foreign tax and the amount of Thai tax calculated on such income.

Foreign tax payable in non-treaty countries may be credited against Thai tax, limited to the Thai tax computed on the foreign income, provided the foreign tax meets the conditions set forth in the relevant measure. If the foreign tax is not used as a credit, it may be claimed as a deduction for income tax purposes.

### C. Determination of trading income

**General.** Corporate income tax is based on audited financial statements, subject to certain adjustments.

In general, expenses are tax-deductible if they are incurred wholly and exclusively for the purpose of generating income. However, expenses created by means of provisions or allowances, such as those for bad debts or stock obsolescence, are not tax-deductible until they are actually used.

**Inventories.** Inventories must be valued at the lower of cost or market value. Cost may be determined using any generally accepted accounting method. After a method is adopted, a change to another method may be made only with approval of the Director-General of the Revenue Department.

**Depreciation and amortization allowance.** A company may depreciate its fixed assets under any generally accepted accounting method, provided the number of years of depreciation under the selected method is not less than the minimum prescribed period. However, after a method is adopted, it may not be changed unless prior consent has been obtained from the Director-General of the Revenue Department. The following are the minimum prescribed periods applicable to some major fixed assets.

Asset	Time period
Buildings	20 years
Furniture, fixtures, machinery, equipment and motor vehicles	5 years
Trademarks, goodwill, licenses, patents and copyrights (including software)	Over period of use (or 10 years if no period of use)
Computer hardware and operating software	3 years

**Relief for losses.** Operating losses may be carried forward for a period of five years. Loss carrybacks are not allowed.

**Groups of companies.** The Thai tax law does not include any provisions for consolidated treatment under which companies within a group may be treated as one tax entity. Each individual company must file its income tax return and pay its tax.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods sold, services rendered and imports	7
Specific business tax, on financial service and real estate businesses	Various

### E. Miscellaneous matters

**Foreign-exchange controls.** On presentation of supporting documents, virtually all foreign-exchange transactions may be processed by a commercial bank.

**Transfer pricing.** Under transfer-pricing guidelines issued by the Thai Revenue Department, all sales or service transactions must be executed at an arm's-length price, and the taxpayer is required to prepare and maintain contemporaneous documentation to substantiate the price. Acceptable transfer-pricing methods include the comparable uncontrolled price method, the resale price method, the cost-plus method and other internationally accepted methods. If the taxpayer fails to prove that a transaction challenged by the tax authorities was executed on an arm's-length basis, additional tax can be assessed. Transactions between related parties are subject to particular scrutiny.

## F. Treaty withholding tax rates

The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends	Interest (a)(b)	Royalties
	%	%	%
Armenia	10	15 (c)	15
Australia	10	15 (c)	15
Austria	10	15 (c)	15

Vietnam	10	15 (c)	15
Non-treaty countries	10	15	15

- (a) The following types of interest are exempt from tax:
- Interest paid to a financial institution wholly owned by another state
  - Interest on certain foreign-currency loans brought into Thailand between 1 May 1979 and 28 February 1990
  - Interest paid by the government or a financial institution established by a specific law of Thailand for the purpose of lending money to promote agriculture, commerce and industry
  - Interest paid by the central bank or state enterprises on loans approved by the Ministry of Finance
- (b) The rate is reduced to 10% if the interest is paid to banks, financial institutions or insurance companies of the treaty countries.
- (c) Interest paid to the government, subdivisions of contracting states or a central bank is exempt from tax.
- (d) The withholding rate is 3% for interest on loans or credits granted for at least four years with the participation of a public financing institution to a statutory body or enterprise of the other contracting state, in relation to sales of equipment, or in relation to the survey, installation or supply of industrial, commercial or scientific premises, or public works.
- (e) Interest paid to a financial institution wholly owned by the other contracting state is exempt.
- (f) The withholding rate is 5% (10% for Pakistan) for royalties for copyrights of literary, artistic or scientific works.
- (g) The withholding rate is 10% for royalties paid for patents, trademarks, designs, models, plans, or secret formulas or processes.
- (h) Royalties and similar payments paid to the other contracting state or a state-owned company for films or tapes are exempt.
- (i) Interest paid to residents of Switzerland with respect to loans guaranteed or insured under the Swiss provisions regulating the Export or Investment Risk Guarantee is exempt.
- (j) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services. Interest on debt obligations guaranteed or insured by the government is exempt.
- (k) The withholding rate is 5% (10% for Slovenia) for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software and motion pictures and works on films, tape or other means of reproduction for use in connection with radio or television broadcasting. The withholding rate is 8% (10% for Slovenia) for royalties for the use of, or the right to use, industrial, commercial or scientific equipment.
- (l) The withholding rate is 5% for royalties paid for the use of, or the right to use, copyrights of literary, dramatic or scientific works, excluding cinematographic films or films or tapes used for radio or television broadcasting. The withholding rate is 8% for amounts paid under financial leases for the use of, or the right to use, industrial, commercial or scientific equipment.

- (m) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of equipment, merchandise or services, except for sales between persons not dealing with each other at arm's length. Under the New Zealand treaty, interest derived by the government of New Zealand or its central bank from the investment of official reserves is exempt from tax.
- (n) The withholding tax rate is 10% for royalties paid for the following:
  - The use of or right to use, copyrights, industrial, scientific or commercial equipment, motion picture films, films or videotapes or other recordings for use in connection with television, and tapes or other recordings used in connection with radio broadcasting
  - For the reception of, or the right to receive, visual images or sounds transmitted to the public by satellite, cable, optic fiber or similar technology
  - For the use of, or right to use, in connection with television or radio broadcasting, visual images or sounds transmitted by cable, optic fiber or similar technology
- (o) Interest on loans made, guaranteed or insured by the government, central bank, agency or body wholly owned or controlled by the government is exempt from tax.
- (p) Interest is exempt from tax if it is paid on loans made, guaranteed or insured by the contracting state or by an authorized body of the state on behalf of the state or if it is paid on other debt claims or credits guaranteed or insured on behalf of the contracting state by an authorized body of the state.
- (q) The rate is reduced to 10% for interest paid on indebtedness resulting from sales on credit of industrial, commercial, or scientific equipment or from sales on credit of merchandise between enterprises.
- (r) A withholding tax rate of 5% applies to royalties for the use of, or the right to use, copyrights of literary, dramatic, musical, artistic or scientific works, including software, cinematographic films and films or tapes used for radio or television broadcasting. A withholding tax rate of 10% applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.
- (s) The withholding tax rate is 10% for royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (t) The rate is reduced to 10% if the loan or debt claim generating the interest is guaranteed by the government, central bank, state general reserve fund, local authorities, or a body wholly owned by the government.
- (u) The withholding tax rate is 10% for royalties paid for copyrights of literary, artistic or scientific works and the right to use industrial, commercial and scientific equipment.
- (v) The withholding tax rate is 10% for royalties paid for managerial or consultancy services or for information concerning commercial, industrial, or scientific experience.
- (w) The withholding tax rate is reduced to 5% if the beneficial owner holds directly at least 25% of the dividend-paying company.

Carryforward	Unlimited

- (a) A business levy and a green fund levy are also imposed. The rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Upstream petroleum operations are taxed under a separate regime. See Section B.
- (b) See Section B.
- (c) These withholding taxes apply to payments to nonresidents only.
- (d) The 5% rate applies to dividends paid to corporations owning 50% or more of the voting power of the distributing company. The 10% rate applies to other dividends.
- (e) Applicable to payments to companies and individuals.
- (f) Applicable to deemed remittances of profits to overseas head office.

## B. Taxes on corporate income and gains

**Corporation tax.** Resident companies are subject to tax on their worldwide income from all sources. Relief from taxation of foreign-source income may be available under a double tax treaty.

Nonresident companies engaged in business in Trinidad and Tobago are subject to tax on income directly or indirectly accruing in or derived from Trinidad and Tobago.

**Rates of tax.** For the 2015 year of income, the basic rate of corporation tax is 25%.

A business levy at a rate of 0.2% is imposed on the annual gross sales or receipts of companies, including branches of nonresident companies operating in Trinidad and Tobago. This levy is credited against the corporation tax liability. It is the final liability if the corporation tax liability is less than the business levy. Certain companies are exempt from the levy, including the following:

- Companies or statutory corporations exempt from corporation tax under any act
- Certain government corporations under the jurisdiction of the Public Utilities Commission or exempted by order of the President
- Companies subject to tax under the Petroleum Taxes Act

A company is not subject to the business levy for the first 36 months following the date of registration of its business.

A green fund levy at a rate of 0.1% is imposed on the gross receipts of companies engaged in business in Trinidad and Tobago.

The corporation tax rate for companies engaged in the downstream petrochemical sector and related sectors is 35%. Companies engaged in upstream petroleum operations are subject to various taxes and imposts, of which the most significant are petroleum profits tax of 50%, unemployment levy of 5% and supplemental petroleum tax at rates based on the weighted average crude oil price. Upstream petroleum companies are also subject to a different system of tax administration.

The long-term insurance business of an assurance company is subject to tax at a rate of 15%.

**Capital gains.** Capital gains are generally not subject to tax. Depending on the class of asset and the nature of the company's business activities, however, the profit or loss on depreciable assets disposed of after being held for more than 12 months may require a balancing adjustment (see Section C).

Short-term capital gains are profits on the disposal of assets within 12 months of their acquisition. Although these gains are of a capital nature, they are generally subject to tax. Profits derived from the partial disposal of an asset within 12 months of acquisition are also subject to tax.

**Administration.** The tax year is the calendar year. Tax is calculated on the profits for the accounting period that ends during the tax year. For each quarter, a company is required to pay a green fund levy installment, as well as either a corporation tax or business levy installment, whichever is greater. The quarterly payments must be made by 31 March, 30 June, 30 September and 31 December in each tax year. Quarterly payments of corporation tax are determined based on the taxable income for the preceding accounting period. Business levy and green fund levy installments are based on the actual gross sales or receipts of the company for the relevant quarter. The business levy calculation excludes income that

is exempt for corporation tax purposes such as dividends received from Trinidad and Tobago resident companies, but the green fund levy calculation takes into account such income.

If the current year's profits exceed the preceding year's profits, a company must pay by 31 December the sum of the tax liability on the preceding year's taxable profits plus 80% of the increase in tax liability over the preceding year. Annual tax returns must be filed by 30 April in the year following the tax year, and any balance of tax due is payable at that time.

If the balance of tax due is not paid by the 30 April deadline, interest accrues at a rate of 20% on the outstanding amount beginning on 1 May. A grace period to 31 October is granted for the filing of the tax return. If the return is not filed by 31 October, a penalty of TTD1,000 accrues beginning 1 November for each six-month period or part of such period that the return remains outstanding.

**Dividends.** Dividends received from nonresident companies out of profits not derived from or accruing in Trinidad and Tobago are subject to tax. Dividends received by resident companies from other resident companies are tax-exempt.

Dividends paid to nonresident companies and individuals are generally subject to a withholding tax of 10%. The rate is reduced to 5% if the recipient is a corporation owning 50% or more of the voting power of the distributing company.

**Double tax relief.** Bilateral agreements have been entered into between the government of Trinidad and Tobago and the governments of certain other countries to provide relief from double taxation. These agreements assure taxpayers that their trade or investment in the other countries is free from the deterrent of double taxation. Relief from double taxation is achieved by one of the following two methods:

- Exemption or a reduced rate on certain classes of income in one of the two countries concerned.
- Credit if the income is fully or partially taxed in the two countries. The tax in the country where the income arises is allowed as a credit against the tax on the same income in the country where the recipient is resident. The credit is the lower of the Trinidad and Tobago tax or the foreign tax on the same income.

### C. Determination of taxable income

**General.** The assessment is based on financial statements prepared according to international accounting standards, subject to certain adjustments.

To be deductible, expenses must be incurred wholly and exclusively in the production of income. The deduction for business meals and entertainment expenses is limited to 75% of actual expenses. Deductions for management charges (now more broadly defined) paid to a nonresident company may not exceed 2% of the payer's total expenses, exclusive of such charges and capital allowances.

Donations made under a registered deed of covenant to an approved charity that are actually paid during the year of income are deductible, up to a maximum of 15% of the total income of the company (as defined in the law).

**Inventories.** Inventory may be valued at cost or market value, whichever is lower. A method of stock valuation, once properly adopted, is binding until permission to change is obtained from the Board of Inland Revenue.

**Bad debts.** Trading debts that have become bad, and are proven to be so to the satisfaction of the Board of Inland Revenue, may be deducted from taxable income. In addition, doubtful debts are deductible to the extent that they have become bad during the year. If these debts are subsequently collected, they are included in taxable income in the year of recovery.

### **Tax depreciation (capital allowances)**

*Depreciation (wear-and-tear) allowances.* Depreciation is calculated on the depreciated value of fixed assets at the beginning of each accounting year.

Industrial buildings qualify for a depreciation allowance of 10% under the declining-balance method. Buildings completed before 1 January 1995 that are used in retail or wholesale trade or as office buildings or rental properties are not entitled to any depreciation allowances, unless they are used exclusively to house plant and machinery and the amounts claimed for the depreciation allowance are reasonable.

Buildings or structures completed on or after 1 January 1995 and capital improvements made to buildings or structures on or after that date qualify for a 10% depreciation allowance under the declining-balance method.

Other assets are depreciated using the declining-balance method. The depreciation rates vary depending on when the assets were acquired. The following are the applicable rates for assets acquired on or after 1 January 1995.

<b>Asset</b>	<b>Rate (%)</b>
Office equipment	25
Motor vehicles	25
Computers	33.3
Plant and machinery	
Light	25
Heavy	25 or 33.3
Rigs	33.3
Aircraft	40

*Balancing adjustments.* Proceeds from disposals of assets are deducted from the residual value of the pool for that particular class of assets. Under the pool system, balancing charges or balancing allowances arise only on the disposal of all of the assets in a particular class.

*Initial allowance.* A 10% initial allowance is granted on acquired industrial buildings that are used in manufacturing. Machinery and equipment used in manufacturing also qualify for an initial allowance at a rate of 90%. Lessees of plant and machinery may also claim the initial allowance if the lease transfers substantially all of the risks and rewards of ownership to the lessee. The rate of the initial allowance is reduced to 20% for plant and machinery used in the production of sugar, petroleum or petrochemicals or in an industry enjoying concessions under the Fiscal Incentives Act.

The initial allowance reduces the asset's value for purposes of depreciation in subsequent periods.

**Relief for losses.** Losses carried forward can be written off to the full extent of taxable profits for the tax year. The unrelieved balance can be carried forward indefinitely. No loss carryback is allowed.

**Groups of companies.** Under group relief provisions in the tax law, a member of a group of companies (the surrendering company) may surrender current trading losses (exclusive of capital allowances) to another member of the group (the claimant company). The claimant company may then claim deductions for the losses in calculating its taxable income. To qualify for group relief, the surrendering company and the claimant company must be resident in Trinidad and Tobago and must be members of the same group throughout the respective accounting periods of each of the companies. Two companies are members of the same group if one is a wholly owned subsidiary of the other or both are wholly owned subsidiaries of a third company. The reduction in tax payable by the claimant company is limited to 25% of the tax that would have been payable if the relief had not been granted.

Group relief is available only if the claimant company has used all of its available capital allowances and offset its loss carryforwards against its current income.

#### **D. Value-added tax**

A value-added tax (VAT) applies to most products supplied and services rendered in Trinidad and Tobago. The standard rate is 15%. A 0% rate applies to certain items, including exports. Imports of inputs by highly capital intensive manufacturing corporations are exempt from VAT if the corporation is declared an approved enterprise under the Fiscal Incentives Act.

Companies and other businesses are required to register for the tax if their turnover exceeds TTD360,000 a year.

The Value-Added Tax Act allows the tax authorities to offset VAT refunds against any other tax liability, such as corporation tax or income tax.

#### **E. Miscellaneous matters**

**Foreign-exchange controls.** The Trinidad and Tobago dollar floats. Commercial banks and licensed foreign-exchange dealers set the exchange rate. Residents may hold foreign currencies for their own account. Profits may be repatriated without the approval of the Central Bank of Trinidad and Tobago.

**Debt-to-equity rules.** In general, no thin-capitalization rules are imposed in Trinidad and Tobago. However, if a local company pays or accrues interest on securities issued to a nonresident company and if the local company is a subsidiary of, or a fellow subsidiary in relation to, the nonresident company, the interest is treated as a distribution and may not be claimed as a deduction against the profits of the local company.

#### **F. Treaty withholding tax rates**

The following table lists the withholding tax rates under Trinidad and Tobago's tax treaties. If the treaty rates are higher than the rates prescribed in the domestic law, the lower domestic rates apply.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
CARICOM treaty (f)			
Antigua and Barbuda	0	15	15
Barbados	0	15	15
Belize	0	15	15
Brazil	10/15 (h)	15	15
Dominica	0	15	15
Grenada	0	15	15
Guyana	0	15	15
Jamaica	0	15	15
Montserrat	0	15	15
St. Kitts and Nevis	0	15	15
St. Lucia	0	15	15
St. Vincent and the Grenadines	0	15	15
Canada	5/15 (d)	10	10
China	5/10 (c)	10	10
Denmark	10/20 (c)	15	15
France	10/15 (d)	10	10
Germany	10/20 (c)	10 (a)	10
India	10	10	10
Italy	10/20 (c)	10	5
Luxembourg	5/10 (g)	7.5/10 (e)	10
Norway	10/20 (c)	15	15
Spain	0/5/10 (i)	8	5
Sweden	10/20 (c)	10 (a)	20
Switzerland	10/20 (d)	10	10
United Kingdom	10/20 (c)	10	10
United States	10/25 (d)	15 (a)	15
Venezuela	5/10 (c)	15	10
Non-treaty countries	5/10 (b)	15	15

- (a) The rate applies to interest paid to banks and financial institutions. Interest paid to other recipients is taxed at 15%.
- (b) See footnote (d) to Section A.
- (c) The lower rate applies if the recipient is a corporation owning 25% or more of the voting power of the distributing company.
- (d) The lower rate applies if the recipient is a corporation owning 10% or more of the voting power of the distributing company.
- (e) The lower rate applies to interest paid on deposits, commercial debts and borrowings from banking enterprises.
- (f) The listed countries have ratified the Caribbean Community and Common Market (CARICOM) double tax treaty.
- (g) The lower rate applies if the recipient is a company holding directly at least 10% of the capital of the distributing company.
- (h) The lower rate applies if the recipient is a company holding directly or indirectly at least 25% of the capital of the distributing company.
- (i) The 0% rate applies if the recipient is a company holding directly at least 50% of the capital of the distributing company. The 5% rate applies if the recipient is a company holding directly at least 25% of the capital of the distributing company.

## A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%)	
Dividends	5 (b)
Interest	20 (b)(c)(d)
Royalties	15 (b)(e)
Gross Rents	5/15 (b)(f)
Management Fees	0/1.5/5/15 (b)(g)
Branch Remittance Tax	0 (b)(h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This is the standard rate of corporate income tax. Oil service companies, banks, financial institutions (for example, insurance companies) and telecommunication companies are subject to corporate income tax at a rate of 35%. Handicraft, agricultural and fishing companies are subject to corporate income tax at a rate of 10%. For companies that have completed their full exemption period or that have been established since 2014, benefits from exportations realized on or after 1 January 2014 are subject to corporate income tax at a rate of 10%.
- (b) Payments to beneficiaries resident in tax havens are subject to a 25% rate.
- (c) This tax applies to payments to residents and nonresidents.
- (d) The rate is 5% for interest paid on loans made by nonresident banks.
- (e) This tax applies to payments to nonresidents. For further details, see Section B.
- (f) The applicable rate depends on the nature of the beneficiary and service.
- (g) Management fees paid to residents are subject to withholding tax at a rate of 0% if the amount does not exceed TND1,000 and if they do not represent fees. Management fees paid to residents are subject to withholding tax at a rate of 1.5% if the amount is greater than TND1,000 and if they do not represent fees. If management fees paid to resident are related to fees, they are subject to withholding tax at a rate of 5%. Managements fees paid to nonresidents are subject to withholding tax at a rate of 15%, subject to the provisions in double tax treaties.
- (h) See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Companies are subject to tax on profits derived from establishments located in Tunisia and on profits that are deemed to be derived in Tunisia under double tax treaties.

Tunisian-source income that is not realized within the framework of a Tunisian establishment, such as interest and royalties, is subject only to final withholding taxes (see *Royalties*).

**Tax rates.** The standard rate of corporate income tax is 25%. Oil service companies, banks, financial institutions (for example, insurance companies) and telecommunication companies are subject to corporate income tax at a rate of 35%. For companies that have completed their full exemption period or that have been established since 2014, benefits from exportations realized on or after 1 January 2014 are subject to corporate income tax at a rate of 10%.

The minimum tax payable is 0.2% of annual local turnover and 0.1% of exportation turnover.

The 0.2% minimum tax paid in 2014 may be credited against the corporate income tax payable for the next five financial years, but it is not refundable. The 2015 Financial Law eliminates the possibility of deducting the 0.2% minimum tax in the fifth year.

Tax benefits, such as exemptions from certain taxes and duties, may be granted to companies established in a Tunisian Free Zone and to companies engaged wholly or partly in exporting.

**Capital gains.** Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate. For nonresident and non-established companies in Tunisia, capital gains derived from the sale of shares is subject to withholding tax at a rate of 25%, which is levied on the difference between the sales price and the acquisition price, reduced by the expenses incurred on the sale including the share premium. In all cases, the tax on capital gains may not exceed 5% of the sales price.

As an option, a tax return on capital gains may be filed.

**Administration.** The financial year is generally the calendar year.

Tax returns must be filed by the 25th day of the third month following the end of a company's financial year. Consequently, for companies using the calendar year as their financial year, tax returns are due by 25 March. For companies subject to mandatory audit, this return can be considered a temporary tax return and a definitive return must be submitted by 25 June.

Starting from the second year of their activities, companies must pay tax in three installments. Each installment is equal to 30% of the corporate income tax due for the preceding financial year. The installments are payable by companies during the first 28 days of the sixth, ninth and twelfth months following the end of the financial year. The balance of tax due must be paid when a tax bill (a document that specifies the amount of tax due and when the tax must be paid) is filed.

**Dividends.** Effective from 2015, dividends paid to resident and nonresident individuals and nonresident entities in Tunisia are subject to a 5% withholding tax.

Profits realized in Tunisia by Tunisian establishments of foreign companies are assumed to be distributed for the benefit of the partners not resident in Tunisia and are accordingly subject to the 5% withholding tax for distributions. This withholding tax is imposed at a rate of 25% if the establishments have their head offices in tax havens.

**Royalties.** Subject to the provisions of double tax treaties, a 15% withholding tax is imposed on royalties paid to nonresidents. This tax applies to the following types of payments:

- Copyright royalties
- Payments for the use of, or the right to use, patents, trademarks, designs, models, plans, formulas, manufacturing processes and movies, including proceeds received from sales of such items
- Payments for the use of, or the right to use, industrial, commercial, agricultural, harbor or scientific equipment, except for amounts paid to charter a plane or vessel for international operations
- Payments for information concerning industrial, commercial or scientific experience
- Payments for technical or economic studies or for technical assistance

**Foreign tax relief.** Tunisia does not grant any relief for foreign taxes.

### C. Determination of trading income

**General.** Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles, subject to certain adjustments.

Business expenses are generally deductible unless specifically disallowed by the tax law. The following expenses are deductible:

- All types of expenses relating to production or the operation of a business, such as salaries and wages, and raw materials
- Tax depreciation (see *Tax depreciation*)
- Attendance fees paid to members of the board of directors or the supervisory board, limited to the amount of expenses incurred by these individuals in carrying out their duties
- Interest paid to shareholders on loans if the amount of the loan does not exceed 50% of authorized capital, if the interest rate does not exceed 8% and if the share capital is fully paid up
- Donations and subsidies paid to charities and organizations established for the public good that are engaged in philanthropic, educational, scientific, social or cultural activities, up to a maximum deduction of 0.2% of gross turnover
- Amounts paid to social funds established for employees in accordance with the law
- Gifts and meal expenses, up to a maximum deduction of the lower of 1% of annual gross income or TND20,000

**Inventories.** Inventories are valued at cost.

**Provisions.** Doubtful debts of up to TND100 (TND500 for banks) per debtor are deductible if they were due at least one year prior to the date on which they were written off and if the company has had no further business relationship with the debtor.

The following provisions are deductible, up to a maximum deduction of 50% of taxable income:

- Reserves for doubtful debts for which recovery is being pursued in the courts
- Provisions for finished goods
- Provisions for depreciation of shares of listed companies

Banks may deduct bad debt provisions from their tax base without any limit. This deduction can result in a tax loss.

**Tax depreciation.** Under the Tunisian Tax Code, depreciation must be computed using the straight-line method. Depreciation is deductible only if it is recorded in the accounts.

The following are some of the standard rates of depreciation allowed in Tunisia.

Asset	Rate (%)
Patents and trademarks	20
Capitalized research and development costs	20
Buildings	5
Office furniture and equipment	20
Equipment and machinery	15
Cars	20
Movable equipment	10/20
Engines	15/20/33.33
Ships	6.25
Computer hardware and software	33.33

For equipment other than transportation equipment, the depreciation rates may be increased by 50% if the equipment is used at least 16 hours a day and may be doubled if it is used 24 hours a day.

The costs of setting up a business may be amortized at a rate of 33% if the costs are very high. Otherwise, 100% of the costs may be deducted in the year of expenditure. Assets worth less than TND200 are fully deductible in the year of acquisition.

**Relief for losses.** Losses may be carried forward five years, but may not be carried back. However, losses related to depreciation may be carried forward indefinitely.

**Groups of companies.** Tunisian law provides for the fiscal integration of related parties equivalent to a consolidated filing position if certain conditions are satisfied.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax, on all transactions carried on in Tunisia, including imports	
Normal rate	18%
Other rates	6%/12%
Local tax (TCL); imposed on local turnover and exportations	
Local turnover	0.2%
Exportations	0.1%
Professional training tax, on salaries, allowances and fringe benefits paid by an employer	1%/2%

Nature of tax	Rate
Housing tax (FOPROLOS); on salaries, allowances and fringe benefits paid by employers	1%
Social security contributions, on employee's annual salary; paid by	
Employer	16.57%
Employee	9.18%
Registration duties	
Work contracts	TND20 per contract
Business contracts	0.5% of the contract value
Company formation	TND20 per copy of the articles of association

### E. Foreign-exchange controls

For companies wholly or partially owned by nonresidents, the remittance of benefits, dividends, attendance fees and interest payments to nonresidents is guaranteed. Tunisian branches of foreign companies may freely remit their after-tax profits. Remittances must be made through a registered intermediary, which is generally a bank. Tunisian banks may obtain foreign loans not exceeding TND10 million a year. Tunisian companies other than banks may obtain foreign loans up to TND3 million per year.

- (a) The rate is 10% if the recipient is a company that holds at least 25% of the capital of the payer.
- (b) Tunisia applies a 15% rate instead of the highest rate.
- (c) Dividends are taxed at the domestic rate of the country from which the dividends originate.
- (d) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 50% of the capital of the payer.
- (e) The rate is 15% if the recipient is a company that owns at least 25% of the capital of the payer.
- (f) The rate is 12% if the recipient is a company that owns at least 25% of the capital of the payer.
- (g) The rate is 12% if the beneficial owner is a company that controls directly at least 25% of the voting power of the payer.
- (h) The rate is 14% if the recipient is a company that owns at least 25% of the capital of the payer.
- (i) Taxed at the domestic rate of the country of domicile of the recipient.
- (j) The 10% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties paid for the use of or right to use the following:
- Technical and economic studies
  - Cinematographic and television films
  - Patents, trademarks, designs and models, plans, and secret formulas and processes
  - Industrial, commercial and scientific equipment
  - Information concerning agricultural, industrial, commercial or scientific experience
- (k) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works. The 15% rate applies to royalties or other amounts paid for the use of or right to use the following:
- Patents, designs and models, plans, and secret formulas and processes
  - Information relating to industrial, commercial or scientific experience
  - Technical and economic studies
  - Technical assistance relating to the use of the items mentioned above
- The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.
- (l) The 20% rate applies to royalties paid for the use of or right to use trademarks, cinematographic and television films or videotapes for television, and industrial, harbor, commercial or scientific equipment. The 15% rate applies to other royalties.
- (m) The 0% rate applies to amounts paid to a public body of the other contracting state for the use of cinematographic films or radio and television broadcasts. The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of the following:

- Patents, designs and models, plans, and secret formulas and processes
- Information relating to industrial, commercial or scientific experience
- Technical and economic studies

The 20% rate applies to royalties or other amounts paid for the use of or right to use trademarks, cinematographic and television films, and agricultural, industrial, harbor, commercial or scientific equipment.

- (n) The 10% rate applies to royalties or other amounts paid for the use of or right to use the following:
- Copyrights of literary, scientific or artistic works, but not including cinematographic and television films
  - Information concerning agricultural, industrial, commercial or scientific experience
  - Economic and technical studies
- The 15% rate applies to royalties paid to use patents, trademarks, designs and models, plans, secret formulas and processes, and cinematographic and television films.
- (o) The 5% rate applies to royalties relating to literary, scientific or artistic works. The 16% rate applies to royalties relating to trademarks, cinematographic and television films, or industrial, commercial or scientific equipment. The 12% rate applies to other royalties.
- (p) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, but not including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the use of patents, designs and models, plans, and secret formulas and processes; information relating to industrial, commercial or scientific experience; or technical or economic studies. The 20% rate applies to royalties or other amounts paid for the use of or the right to use trademarks; cinematographic and television films; and agricultural, industrial, harbor, commercial or scientific equipment.
- (q) The 5% rate applies to royalties paid for the use of or right to use copyrights of literary, scientific or artistic works, not including motion picture and television films. The 15% rate applies to other royalties.
- (r) The 10% rate applies to royalties paid for the use of or the right to use industrial, commercial or scientific equipment, or to remuneration for the performance of accessory technical assistance for the use of property or rights described above, to the extent such technical assistance is performed in the contracting state where the payment for the property or right has its source. The 15% rate applies to royalties or other amounts paid for the use of or right to use copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts; patents, trademarks, designs and models, plans, and secret formulas and processes; and information relating to industrial, commercial or scientific experience.
- (s) The 10% rate applies if the beneficial owner of the interest is a bank or other financial institution. The 12% rate applies to other interest.
- (t) Under Tunisian domestic law, dividends are not subject to tax. Consequently, withholding tax is not imposed on dividends paid from Tunisia to other countries.
- (u) A 5% rate applies to interest paid to banks.
- (v) The rate is 0% if the beneficiary of the dividends owns at least 10% of the payer.
- (w) For further details, see Section B.
- (x) Interest is taxed at the domestic rate of the country from which the interest originates.
- (y) Royalties are taxed at the domestic rate of the country from which the royalties originate.
- (z) The 5% rate applies to interest paid to banks.
- (aa) The 5% rate applies to payments for technical and economic studies as well as for technical assistance.
- (bb) The 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.
- (cc) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, scientific or artistic works including cinematographic and television films. The 15% rate applies to royalties or other amounts paid for the following:
- The use of patents, designs and models, plans, and secret formulas and processes
  - Information relating to industrial, commercial or scientific experience
  - Technical or economic studies
  - Technical assistance
  - The use of, or the right to use, trademarks and industrial, commercial or scientific equipment

- (dd) Dividends are exempt from tax if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer.
- (ee) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer.
- (ff) This rate is 25% if the beneficiary is resident in a jurisdiction listed as a tax-haven country in a decree. The tax-haven list includes the following jurisdictions.

Anguilla	Dominica	St. Kitts and Nevis
Antigua and Barbuda	Gibraltar	St. Lucia
Aruba	Grenada	St. Martin
Barbados	Guernsey	St. Vincent and the Grenadines
Belize	Jersey	Samoa
Bermuda	Liberia	Sint Maarten
British Virgin Islands	Marshall Islands	Samoa
Cayman Islands	Montserrat	Turks and Caicos Islands
Curaçao	Nauru	Uruguay
Cook Islands	Niue	Vanuatu
Costa Rica	Panama	
Delaware (United States)	Philippines

*This chapter reflects the tax law as of 24 October 2014. However, a draft income tax law has been shared with the public. This draft law proposes substantial changes with respect to capital gains, disguised capital, transfer pricing and anti-avoidance measures. Because of these possible changes, readers should obtain updated information before engaging in transactions or making any decisions.*

**A. At a glance\***

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	20
Withholding Tax (%)	
Dividends	15
Interest	
From Repurchase (REPO) Agreements	15
From Deposit Accounts	10/12/13/15/18
From Loans	0/10
From Turkish Government Bonds and Bills and Private Sector Bonds	0/10
From Private Sector Bonds	
Issued in Turkey	0/10
Issued Abroad	0/3/7/10
Royalties from Patents, Know-how, etc.	20
Professional Fees	
Petroleum-Exploration Activities	5
Other Activities	20
Progress Billings on Long-Term Construction and Repair Contracts	3
Payments on Financial Leases	1
Real Estate Rental Payments	20
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

\* The rates in the table are for illustrative purposes only. For detailed information, please contact EY in Turkey.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Companies whose legal or business headquarters (as stated in their articles of association) are located in Turkey or whose operations are centered and managed in Turkey are subject to corporation tax on their worldwide income. In Turkish tax legislation, they are described as full liability taxpayers; they are also known as resident companies.

Taxable income of limited liability taxpayers (nonresident companies or taxpayers other than full liability taxpayers) is comprised of the following:

- Professional fees obtained in Turkey
- Profits from commercial, agricultural and industrial enterprises in Turkey (if they have an establishment or a permanent representative in Turkey)

- Income arising from rental of real estate, rights and movable property in Turkey
- Income obtained in Turkey from various types of securities
- Other income and revenue obtained in Turkey

**Rates of corporate tax.** The effective corporate tax rate is 20%. However, incentive programs provide for reduced corporate tax rates for income from the investments supported (see *Tax incentives*).

**Tax incentives.** Incentive regulations provide for a wide range of incentive and support elements for certain investments with incentive certificates, including reduced corporate tax rates, government support for interest on loans, government support for employees' and employers' shares of social security premiums, government support for income tax for wages, value-added tax (VAT) and customs duty exemptions, VAT refund support and allocation of treasury-owned lots.

The incentive and support elements vary according to the type, sector, subject, size and place of the investment.

Fifty percent of the following types of income with respect to inventions resulting from research, development, innovation and software development activities performed in Turkey are exempt from corporate tax under certain conditions:

- Income derived from leasing.
- Income derived from transfers or sales.
- Income derived from marketing through mass production in Turkey. Based on the draft Communiqué for the incentive, this refers to the sales of an item that is mass produced in Turkey and that has a license or beneficial model certificate. The Turkish Patent Institute grants a license under an examination system. It grants a beneficial model certificate as a result of a research report.
- Income pertaining to a license or beneficial model certificate for an invention that is included in the income obtained from the sale of the products produced in Turkey through the use of this invention in the production process.

In addition, the leasing, transfer and sale of intangible assets pertaining to a license or beneficial model certificate for an invention is exempt from VAT if the invention is produced as a result of research and development (R&D), innovation and software activities.

The corporate tax and VAT exemptions described in the preceding two paragraphs apply to income derived on or after 1 January 2015.

### **Participation exemption**

*Dividend income derived from Turkish (resident) participations.* Turkish tax law provides a participation exemption for dividends derived by companies from Turkish (resident) participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption, a Turkish resident company need only hold a participation in another Turkish resident company.

*Dividend income derived from foreign (nonresident) participations.* The Turkish tax law also provides a participation exemption for dividends derived by companies from foreign participations. Dividends qualifying for the participation exemption are fully exempt from corporate tax.

To qualify for the participation exemption for dividends derived from foreign participations, all of the following conditions must be satisfied:

- The Turkish company must have owned at least 10% of the paid-in capital of the foreign company for an uninterrupted period of at least one year as of the date of receiving the dividend.
- The foreign company must be a limited or joint stock company.
- The foreign company must be subject to corporate tax at an effective rate of at least 15% (for corporations whose principal activity is the procurement of finance, including financial leasing, insurance or investment in marketable securities, the rate must be at least the rate of corporation tax in Turkey, which is 20%).
- The dividends must be transferred to Turkey by the due date of filing of the annual corporate tax return (25 April).

The effective corporate tax is determined in accordance with the following formula:

$$\text{Effective corporate tax rate} = \frac{\text{Corporate tax}}{\text{Distributable corporate income} + \text{corporate tax}}$$

Special participation exemption rules apply to companies established in foreign countries whose principal purpose is construction, repair, assembly and technical services. If, under the laws of a foreign country, the establishment of a corporation is necessary to undertake these activities, dividends repatriated by the foreign subsidiary to the Turkish parent company qualify for the participation exemption, regardless of whether the conditions described above for the participation exemption are satisfied.

The participation exemption also applies to income derived from permanent establishments (PEs) and permanent representative resident abroad if the following conditions are met:

- The PE or permanent representative is subject to corporate tax at an effective rate of at least 15% in the country where the PE or permanent representative is located. For PEs whose principal activities are the procurement of finance, including financial leasing, or investment in marketable securities and insurance, the rate must be at least the rate of corporation tax in Turkey, which is 20%.
- Income derived from foreign PEs must be transferred to Turkey by the due date of filing of the annual corporate tax return (25 April).

A participation exemption also applies to capital gains. For details, see *General* in Section C.

**International holding companies.** A special regime applies to international holding companies.

International holding companies may benefit from the participation exemption with respect to dividends derived from foreign

participations if they satisfy the conditions applicable to other entities (see *Participation exemption*). They also may benefit from the participation exemption with respect to capital gains, but different conditions apply. Turkish international holding companies benefit from the participation exemption with respect to capital gains if foreign participations account for at least 75% of the non-cash assets of the international holding company and if the international holding company has held a shareholding of 10% or more in the foreign limited or joint stock company for at least two years.

Dividends distributed by international holding companies to non-resident companies out of profits derived from their foreign participations are subject to a withholding tax rate equal to one-half of the general withholding tax rate on dividends. As a result, the withholding tax rate is 7.5%.

**Capital gains.** Capital gains derived by all companies, including branches of foreign companies, are included in ordinary income and are subject to corporation tax. Capital gains are generally computed by subtracting the cost of the asset, including the related expenses paid by the seller, from the selling price.

Capital gains derived from sales of depreciable fixed assets are not taxable to the extent the gains are reinvested in new fixed assets. However, the amount of gains used to acquire new assets is subtracted from the depreciable cost of the new asset. Capital gains that will be used for reinvestment are transferred to a special reserve account. If the special reserve is not used to finance the purchase of similar new assets in the following three years, the balance in the reserve is included in taxable income.

Capital gains derived from sales of resident companies' shares by nonresident companies without a permanent establishment in Turkey are subject to corporation tax. In computing these gains, changes in exchange rates are not taken into account.

Seventy-five percent of capital gains derived by corporate taxpayers from the disposal of shares owned for at least two years qualify for corporate tax exemption if the gains for which exemption is claimed are recorded as a special fund under the shareholder's equity account in the balance sheet until the end of the fifth year following the year of sale.

**Administration.** Companies file tax returns based on their financial accounting year.

Tax returns must be submitted to the relevant tax office by the 25th day of the 4th month after the end of the accounting period. The return must be accompanied by the balance sheet, income statement and other required documents.

Corporation tax due must be paid by the end of the fourth month following the end of the accounting period.

Companies must make quarterly payments of advance corporation tax during the tax year. These payments are each equal to 20% of the taxable income for the quarter. The advance tax may be offset against the tax shown on the annual corporation tax return.

If advance corporation tax exceeds the final tax payable, the excess amount can be offset against the company's other tax liabilities or it can be refunded.

**Dividends.** Dividends received by resident companies from other resident companies are not subject to corporation tax.

Dividends received from foreign companies are included in taxable income. However, certain dividends received from foreign companies may qualify for exemption from corporation tax under the participation exemption or the international holding regime (see *Participation exemption* and *International holding companies*).

Withholding tax at a rate of 15% is imposed on dividends paid by resident corporations to the following recipients:

- Resident individuals
- Resident recipients who are not subject to corporation tax and income tax, or are exempt from such taxes
- Nonresident individuals
- Nonresident corporations (excluding those receiving dividends through a PE or permanent representative in Turkey)
- Nonresident recipients who are exempt from corporation tax and income tax

A branch remittance tax is imposed at a rate of 15% on profits remitted by nonresident corporations that have a PE or permanent representative in Turkey to their headquarters.

**Foreign tax relief.** Corporation tax and similar taxes paid abroad on income that is derived abroad and that is included in the Turkish accounts may be offset against the corporation tax that is assessed on such income in Turkey.

In cases in which the controlled foreign company (CFC) rules are applied, the taxes similar to income and corporation taxes that the foreign affiliate has paid can be set off against the corporation tax that is calculated on the basis of the earnings of the foreign company.

Resident companies that have a direct or indirect participation in shares or voting rights of 25% or more in foreign subsidiaries can claim a tax credit for the corporate or income tax paid by foreign subsidiaries in their jurisdictions on profits out of which dividend distributions were paid to the resident companies. The credit is limited to the tax in Turkey that is attributable to the dividend distributions. As a result, the credit applies only to dividends that do not qualify for the participation exemption.

Amounts that are set off against the taxes that are assessed in Turkey on the income derived from the foreign countries may not exceed the tax amount that would be calculated by applying the local corporation tax rate (20%) to such earnings.

Foreign taxes that cannot be offset against the corporate tax in Turkey because of insufficient corporate income may be carried forward for a period of three years. The tax credit can also be offset against advance tax payments.

### **C. Determination of trading income**

**General.** The corporate tax base is determined by deducting expenses from the revenue of an enterprise. However, the following items are not subject to corporation tax:

- Revenue derived by corporations, including nonresident companies, from participations in the capital of other corporations that are subject to full corporate taxation, excluding shares of profits from participation certificates of investment funds and stocks in investment partnerships
- Proceeds derived by corporations from the sale of their preferred shares, and profits derived by joint stock companies from the sale of their shares at the time of the establishment of the company and from the sale of their shares at a price exceeding the par value of the shares when they are increasing their capital
- Seventy-five percent of profits derived from disposals of shares, preferred shares, preemptive rights, bonus shares or real estate owned for at least two years if the profit is placed in a reserve account and not distributed for five years

Corporation tax exemptions are available under the participation exemption and the international holding regime (see Section B). In addition, the following corporate tax exemptions apply to Turkish and foreign investment funds and companies:

- Profits derived by mutual funds (excluding foreign-exchange funds) and trusts from transactions involving their operating portfolio
- Profits derived by risk capital investment funds or companies from transactions involving their operating portfolio
- Profits derived by real estate investment funds or companies from transactions involving their operating portfolio
- Profits derived by designated private pension investment funds

All business-related expenses are deductible, with the following exceptions:

- Interest on shareholder's equity or on advances from shareholders.
- Reserves set aside from profits (except technical reserves of insurance companies and doubtful debts from debtors against whom legal proceedings have been instituted).
- Corporation tax and all monetary and tax penalties and interest imposed on such tax.
- Discounts or other losses arising from selling the corporation's own securities for less than par value.
- For nonresident companies, commissions, interest and other charges paid to headquarters or other offices outside Turkey on purchases or sales made on their behalf, as well as allocated charges to contribute to losses or expenses of headquarters or branches outside Turkey. However, charges are deductible if they are made in accordance with allocations keys that are in compliance with the arm's-length principle and if they are related to the generation and maintenance of business income in Turkey.
- Interest, foreign-exchange differences or comparable expenses that are calculated or paid on disguised capital (see *Debt-to-equity rules* in Section E).
- Disguised profit distribution through improper transfer pricing.

For enterprises (except loan institutions, financial organizations, financial leasing, factoring and financing companies) whose current liabilities exceed their equities, the portion determined by the Council of Ministers that does not exceed 10% of the total expenses and costs incurred as interest, commissions, maturity differences, delay interest, dividends, exchange-rate differences and similar items relating to liabilities (except financing expenses added to investment costs) used within the enterprise may not be

deducted from corporate profit. However, the amount exceeding this percentage is deductible.

**Provisions.** Tax-deductible provisions include provisions for bad debts, for abandoned claims and for insurance technical reserves.

**Tax depreciation.** Assets that are used in a company for more than one year and that are subject to wear and tear are depreciated.

The useful life concept is used for the depreciation of fixed assets. The Ministry of Finance has issued Communiqués, which set forth the useful lives of different types of fixed assets. The following are examples of the useful lives for various fixed assets.

<b>Asset</b>	<b>Useful life (years)</b>
Buildings	50
Office furniture, office equipment and automobiles	5
Computers	4
Computer software and cellular phones	3

The taxpayers may select the straight-line method or the declining-balance method to calculate depreciation. A company may change from the declining-balance method to the straight-line method (but the reverse change is not permitted) at any time during the useful life of a fixed asset. A company may exercise this option on an asset-by-asset basis.

Fixed assets can be depreciated beginning in the year of capitalization (the year in which an asset becomes ready to use). For fixed assets that are purchased as ready to use, the depreciation begins in the year of the acquisition of the fixed asset. For fixed assets that need to be constructed or assembled, the depreciation begins in the year in which the construction or assembly is completed and the assets become ready to use.

In general, an asset qualifies for full-year depreciation in the year of capitalization, regardless of the date of capitalization. For example, even if a fixed asset is capitalized in the last month of the accounting year, full-year depreciation is calculated. The only exception to this general rule is for passenger cars. Depreciation for passenger cars begins in the month in which the cars are purchased. For example, if a passenger car that was purchased for TRY1,000 is depreciated using a straight-line depreciation rate of 20%, the regular depreciation for a full year is TRY200. Under the applicable rules, if such an automobile is acquired in November, tax-deductible depreciation for the year of acquisition is calculated as follows:

$$\frac{2 \text{ months}}{12 \text{ months}} \times \text{TRY}200 = \text{TRY}33.33$$

The balance of the regular depreciation for the year of acquisition is deductible in the last year of depreciation of the asset, together with the regular depreciation for the last year.

**Investment allowance.** Effective from 1 January 2006, the investment allowance was abolished. However, companies can carry forward investment allowance amounts due on or before 31 December 2005.

**Research and development expenditures.** One hundred percent of R&D expenditures may be deducted from the tax base if certain conditions are fulfilled. This is an incentive that is granted in addition to the ordinary depreciation expense recognition of capitalized R&D expenditures. The incentive covers the following expenses:

- Raw materials and supplies' expenses
- Personnel expenses
- General expenses
- Payments for benefits and services provided by outsourcing companies
- Taxes, duties and fees
- Depreciation and depletion
- Financial expenses

Companies that are not able to deduct R&D expenditures because of insufficient taxable income may deduct the unused amount in the following years.

In addition, to support R&D activities, the Turkish Scientific and Technological Research Institution (TUBITAK) may provide monetary aid to companies with respect to their R&D activities under certain conditions. A new law regulating R&D took effect on 1 April 2008. This law provides various types of incentives such as R&D deductions, wage income withholding exemptions, social security premium support, stamp duty exemption and capital aid for technological enterprises.

**Relief for losses.** In general, losses may be carried forward for five years. Losses cannot be carried back. An order of priority applies for the use of losses and exemptions to offset taxable income for the year. Past years' losses are used after exemptions that apply even in the event of a loss. After the losses are used, the other exemptions that apply in profitable years are administered (investment allowance, R&D deduction, tax-deductible donations and others).

Resident companies may deduct the losses incurred in business activities performed abroad if the foreign losses are approved by auditors authorized under the laws of the relevant jurisdiction. Foreign losses from foreign activities cannot be deducted if income arising from such activities is exempt from corporation tax in Turkey.

#### D. Other significant taxes

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate (%)</b>
Value-added tax; imposed on goods delivered and services rendered, including imported goods and services, communications, conveyances by pipeline and certain leases; exports are exempt	
General rate	18
Rates on other items	1/8
Local withholding taxes, on amounts paid to nonresident corporations	Various

Nature of tax	Rate (%)
Banking and insurance transactions tax; imposed on all types of payments received by banking and insurance companies with respect to all types of transactions, except financial leasing transactions	
Interbank deposit accounts	1
REPO transactions	1
Sale of government bonds and treasury bills	1
Cambio transactions	0
Other payments	1/5
Special consumption tax; imposed on the delivery, importation or the initial acquisition of certain goods	
Petroleum products, solvents and similar goods (fixed amount per measurement unit depending on the type of goods)	Various
Cars	10 to 145
Buses	1
Midibuses and minibuses	4/9
Planes	0.5
Sailboats	6.7/8
Beverages (minimum fixed amount per measurement unit depending on the kind of goods)	0 to 63
Tobacco products; tax equals fixed amount plus variable amount; variable amount cannot be less than minimum fixed amount per measurement unit, which depends on the kind of goods	65.25
Luxury goods	3/6.7/20/25
Social security contributions; imposed on salaries of Turkish citizens; premiums are paid within monthly upper and lower limits and are calculated as a percentage of gross salary; from 1 July 2014 through 31 December 2014, the monthly lower limit is TRY1,134 and the upper limit is TRY7,371	
Employer	20.5
Employee	14
Unemployment insurance contributions; paid on same base as social security contributions	
Employer	2
Employee	1

## E. Miscellaneous matters

**Foreign-exchange controls.** Turkey has a liberal foreign-exchange regime, which allows local foreign-exchange accounts.

Law No. 4875 guarantees the remittance of profits. The company's bank may transfer profits, provided the company subsequently submits to the bank its approved tax statement and its tax accrual and payment slips. This law also guarantees the remittance of the proceeds from the liquidation of an investment.

Fees and royalties from management agreements, technical services agreements and license contracts may be remitted abroad, and applicable withholding tax must be paid.

Foreign investment partnerships and funds may invest in Turkish securities and freely remit dividends, interest, profits and capital.

Turkish resident companies may grant loans to related parties residing abroad.

**Transfer pricing.** The Turkish Corporate Tax Code contains transfer-pricing regulations, which include the arm's-length principle and the requirement for documentation of all related-party transactions. The arm's-length principle applies to all transactions carried out by taxpayers with related parties. Under Turkish transfer-pricing rules, the traditional transfer-pricing methods recommended in the Organisation for Economic Co-operation and Development (OECD) model guidelines are acceptable. The main methods that can be applied by the taxpayers in the determination of the arm's-length price are the comparable uncontrolled price method, the cost-plus method and the resale price method.

However, taxpayers may select other transfer-pricing methods if they can establish that the traditional methods are not suitable for their transactions. It is possible to enter into advance-pricing agreements with the tax authorities.

Transfer-pricing rules apply to both domestic and foreign related-party transactions. Commercial transactions conducted by companies resident in low-tax jurisdictions (tax havens) are considered to be related-party transactions.

The Ministry of Finance has issued Communiqués clarifying the transfer-pricing rules and documentation requirements. Under these Communiqués, taxpayers must prepare annual transfer pricing forms, reports and other documentation.

**Debt-to-equity rules.** Under the new thin-capitalization rules, a "related party" is a person holding, directly or indirectly, at least 10% of the shares or voting rights of the other party.

Borrowings from related parties that exceed a debt-to-equity ratio of 3:1 are considered to be disguised capital. For borrowings from related parties that are banks or financial institutions, half of the borrowings are taken into consideration in performing the calculation for disguised capital. Total borrowings from all related parties are treated collectively.

The equity at the beginning of the taxpayer's fiscal year applies for thin-capitalization purposes. Interest paid or accounted for and foreign-exchange differences related to disguised capital are regarded as nondeductible expenses in determining the corporate tax base. Interest related to disguised capital is treated as a dividend distribution and is subject to dividend withholding tax.

**Controlled foreign companies.** The controlled foreign company (CFC) rules apply if resident individuals and corporate taxpayers jointly or severally have a direct or indirect participation of 50% or more in the shares, dividend rights or voting rights in a foreign company that meets all of the following conditions:

- Twenty-five percent or more of the foreign company's gross income is of a passive nature (portfolio investment income). If the business activities of the company are not commensurate with the capital, organization or the work force of the company,

income derived from commercial, agricultural or independent personal services may be regarded to be of a passive nature.

- The foreign company is subject to effective corporate taxation at a rate of less than 10%.
- The gross revenue of the foreign company exceeds TRY100,000 (approximately USD55,000).

If the foreign company falls within the scope of the Turkish CFC measures, Turkish resident taxpayers declare corporate income of the foreign company attributable to them. In the event of a dividend distribution by the foreign company, the recipient of the dividend is taxed only to the extent that the amount has not been taxed in accordance with the CFC rules.

**Anti-avoidance measures.** Turkish resident taxpayers are subject to a 30% withholding tax on all payments made in cash or on account that relate to transactions with companies resident in countries that the Council of Ministers considers to be in harmful tax competition. The Council of Ministers has not yet identified these countries. The principal, interest or profit contributions corresponding to debts to financial institutions established outside Turkey and payments to insurance and reinsurance companies established outside Turkey are not subject to the 30% withholding tax. The Council of Ministers has the authority to reduce the withholding tax rate to 0% for transactions that are considered to be performed at arm's length.

The payments taxed in accordance with the rules described in the preceding paragraph are not subject to further corporate tax or income tax.

The Turkish tax law includes anti-abuse rules. The principal rule is the substance-over-form rule, which is contained in Article 3 of the Tax Procedural Law.

**Mergers and acquisitions.** Mergers, acquisitions and demergers may be tax-free if the transaction involves two resident companies and if the assets are transferred at book value.

## F. Treaty withholding tax rates

The table below shows the maximum withholding rates for dividends, interest and royalties provided under Turkey's double tax treaties.

To benefit from the advantageous rates under the double tax treaties, additional conditions may be required (for example, the recipient is required to be the beneficial owner of the related gain). Readers should obtain detailed information regarding the treaties before engaging in transactions.

- (a) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
- (b) The 5% rate applies if the recipient owns more than 20% of the payer of the dividends or if the recipient is the central bank or an entity that is wholly owned by the government. The 10% rate applies to other dividends.
- (c) The 10% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
- (d) The 5% rate applies to dividends distributed by Belgian companies. The 10% rate applies to dividends distributed by Turkish companies.
- (e) The 15% rate applies if the recipient owns more than 25% of the payer of the dividends. The 20% rate applies to other dividends.
- (f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (g) The 15% rate applies if the recipient owns more than 10% of the payer of the dividends. The 20% rate applies to other dividends.
- (h) The 10% rate applies to interest on loans granted by banks and financial institutions. The 15% rate applies to other interest payments.
- (i) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest payments.
- (j) The 10% rate applies to interest paid with respect to a loan or other debt claim with a term exceeding two years. The 15% rate applies to other interest payments.
- (k) The 7% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
- (l) For Luxembourg recipients, the 10% rate applies if the recipient owns more than 25% of the payer of the dividends and the 20% rate applies to other dividends. For Turkish recipients, these rates are applied as 5% and 20%, respectively.
- (m) The 10% rate applies to interest on loans with a term exceeding two years. The 15% rate applies to other interest payments.
- (n) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends. The 10% rate applies to other dividends.
- (o) The 10% rate applies if the recipient owns more than 15% of the payer of the dividends. The 15% rate applies to other dividends.
- (p) The 5% rate applies to dividends distributed by Dutch companies. The 10% rate applies to dividends distributed by Turkish companies if dividends received by Dutch resident companies from Turkish resident companies are not subject to tax in the Netherlands.
- (q) The rate is 5% of the gross amount of the dividends if either of the following circumstances exists:
- The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and the dividends are exempt from tax in the other state.

- The dividends are derived by the government pension fund in the case of Norway or by the government social security fund in the case of Turkey.
- (r) The 7.5% rate applies to interest on loans paid by financial institutions. The 10% rate applies to other interest payments.
- (s) The 5% rate applies to dividends to the extent they are paid out of profits that have been subject to tax as specified in the tax treaty and if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
- (t) The 10% rate applies to interest on loans granted by banks. The 15% rate applies to other interest payments.
- (u) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and recordings for radio and television. The 15% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.
- (v) The 10% rate applies to interest on loans granted by banks, financial institutions and insurance companies. The 15% rate applies to other interest payments.
- (w) The 12% rate applies if the recipient owns more than 25% of the payer of the dividends. The 15% rate applies to other dividends.
- (x) The 5% rate applies if the recipient of the dividends is the government, a public institution wholly owned by the government or a political subdivision or local authority of the other contracting state. The 10% rate applies if the recipient owns more than 25% of the payer of the dividends. The 12% rate applies to other dividends.
- (y) The 10% rate applies to interest derived from loans granted by financial institutions, such as banks, savings institutions or insurance companies. The 15% rate applies to other interest payments.
- (z) The 5% rate applies if the recipient owns more than 25% of the payer of the dividends for an uninterrupted period of at least two years. The 15% rate applies to other dividends.
- (aa) For Irish recipients, the 5% rate applies if the dividends are paid out of the profits that have been subject to tax in Turkey and if the recipient owns more than 25% of the voting rights of the payer of the dividends. The 10% rate applies if the recipient owns more than 25% of the voting rights of the payer of the dividends, and the 15% rate applies to other dividends. For Turkish recipients, these rates are applied as 5%, 5% and 15%, respectively.
- (bb) The 10% rate applies to interest received by financial institutions or paid with respect to loans or other debt claims with a term exceeding two years. The 15% rate applies to other interest payments.
- (cc) Interest paid to the government and central bank is exempt.
- (dd) A new treaty between Turkey and Norway was signed on 15 January 2010. This new treaty is effective from 1 January 2012. Under the new treaty, the dividend withholding tax rate may be reduced to 5%. The withholding tax rate for interest ranges from 5% to 10%. The withholding tax on royalties is 10% if certain conditions are satisfied.
- (ee) A new treaty between Turkey and Finland, which was signed on 6 October 2009, is effective from 1 January 2013.
- (ff) A treaty between Turkey and Germany, which was resigned by the countries on 19 September 2011, is effective retroactively from 1 January 2011.
- (gg) Interest paid from Turkey to the government of Brazil, the Central Bank of Brazil or the National Bank for Economic and Social Development (BNDES) is exempt from Turkish tax. Interest paid from Brazil to the government of Turkey, the Central Bank of Turkey (Turkiye Cumhuriyet Merkez Bankasi) or the Turkish Export/Import Bank (Eximbank) is exempt from tax.
- (hh) The tax rate is 15% of the gross amount of the royalties arising from the use of, or the right to use, trademarks. The rate is 10% of the gross amount of royalties in all other cases
- (ii) The rate is 5% of the gross amount of interest with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by the Finnish Export Credit (FINNVERA) or similar Turkish public entities that have the objective of promoting exports. The rate is 10% of the gross amount of interest derived by banks. The rate is 15% of the gross amount of interest in all other cases.
- (jj) The rate is 5% of the gross amount of the following types of interest:
  - Interest paid to the government pension fund or the Norwegian Guarantee Institute for Export Credits (Eksportfinans ASA) if the interest is wholly or mainly passed on to the government of Norway under the 108 Agreement between Eksportfinans ASA and the government of Norway
  - Interest paid to the Turkish social security fund or the Turkish Eximbank. The rate is 10 % for interest paid to banks. The rate is 15% in all other cases.

- (kk) For Swiss recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends and if relief from Swiss tax is granted for such dividends through an abatement of the profits tax in a proportion corresponding to the ratio between the earnings from participations and total profits or through equivalent relief. The rate is 15% in all other cases for Swiss recipients. For Turkish recipients, the rate is 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends. The rate is 15% in all other cases for Turkish recipients.
- (ll) The rate is 5% for interest paid with respect to a loan or credit made, guaranteed or insured for the purpose of promoting exports by an Eximbank or a similar institution that has the objective of promoting exports. The rate is 10% in all other cases.
- (mm) For Australian recipients, the 5% rate applies if the beneficial owner of the dividends is a company that owns directly more than 25% of the capital of the company and if the dividends are paid out of profits that have been subject to corporation tax in Turkey. The 15% rate applies to other dividends paid to Australian recipients. For Turkish recipients, the 5% rate applies if the beneficial owner of the dividends is a company that owns directly more than 10% of the voting power of the company. The 15% rate applies to other dividends paid to Turkish recipients.
- (nn) A new treaty between Turkey and Korea (South) is under negotiation.
- (oo) Please consult the treaty for further details because exemptions may be provided for interest on loans obtained from certain institutions, such as central banks and governments of the contracting states or their subdivisions.
- (pp) Various rates apply.

On 11 July 2014, Cameroon and Turkey initialed a tax treaty. On 8 July 2014, Turkey and Vietnam signed an income tax treaty. On 11 February 2014, Gambia and Turkey signed an income tax treaty. The Turkish Council of Ministers ratified the income tax treaty and protocol between Turkey and the Philippines, signed on 18 March 2009, through Decree No. 2011/1467, published in the *Official Gazette* of 10 April 2011. The treaty will enter into force after the exchange of instruments of ratification is completed. On 17 December 2013, Mexico and Turkey signed a tax treaty.

Turkey has signed the Exchange of Information Agreements Relating to Tax Matters with Bermuda, Gibraltar, Guernsey, the Isle of Man and Jersey. The Exchange of Information Agreement Relating to Tax Matters with Bermuda and Jersey entered into force as of September 2013. Negotiations are continuing with the Bahamas and Barbados.

Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0 (i)
Carryforward	Unlimited

- (a) For mining companies, the tax rate ranges from 25% to 45%, depending on the profitability of the mine.
- (b) Applicable to capital gains on business assets only.
- (c) Applicable to residents and nonresidents (see Section B for further details).
- (d) The rate is 10% for dividends paid by companies listed on the stock exchange to individuals.
- (e) The rate is 20% for interest paid on government securities.
- (f) Applicable to nonresidents.
- (g) This withholding tax is imposed on resident professionals who are not exempt from withholding tax.
- (h) This withholding tax is imposed on payments in excess of UGX1 million to any person in Uganda who is not exempt from withholding tax for goods and services supplied to, or under a contract with, the government, a local authority, an urban authority, a company controlled by the government of Uganda or any person designated in a notice by the Minister.
- (i) In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident companies are subject to tax on their worldwide income, but tax credits are granted for taxes paid on foreign-source income (see *Foreign tax relief*). Nonresident companies are subject to tax on income derived from sources in Uganda.

A company is resident in Uganda if any of the following applies:

- It is incorporated in Uganda.
- The management and control of its affairs are exercised in Uganda during the tax year.
- During the tax year, it performs the majority of its operations in Uganda.

**Rates of corporate tax.** The regular corporate income tax rate is 30%. For mining companies, the tax rate ranges from 25% to 45%, depending on the profitability of the mine. Oil and gas exploration and production entities are taxed at the normal rate of 30%.

Rental income earned in Uganda is taxed separately from other income and taxed at a rate of 30% for companies. It is no longer consolidated with other income.

**Capital gains.** Capital gains on business assets are subject to tax at a rate of 30%.

**Administration.** Companies must file provisional income tax returns within six months after the beginning of the accounting period. This return includes an estimate of the income that will be earned by the company during the accounting period. The tax liability shown in the provisional return must be paid in two equal installments, which are due 6 months and 12 months after the beginning of the accounting period. A final tax return must be filed within six months after the end of the accounting period, and any balance of tax due must be paid when this return is filed.

Penalties are imposed if the final tax liability for the year exceeds the tax liability shown in the provisional return by more than 10%. However, the penalty for underestimating provisional tax does not apply to companies engaged in agricultural, plantation or horticultural farming.

**Dividends.** Dividends paid to residents and nonresidents are subject to withholding tax at a general rate of 15%. However, the withholding tax does not apply if the recipient of the dividends is a resident company that controls at least 25% of the voting power in the payer. The withholding tax rate is 10% for dividends paid by companies listed on the stock exchange to individuals. The withholding tax on dividends paid to nonresidents and to resident individuals is considered a final tax.

**Interest.** Interest paid to residents and nonresidents is subject to a withholding tax at a rate of 15%. The withholding tax rate for interest paid on government securities is 20%. The withholding tax on interest does not apply if either of the following circumstances exist:

- The recipient is a financial institution (except with respect to interest from government securities).
- The interest is paid by a natural person to a resident.

The withholding tax for interest paid on government securities is considered a final tax. Interest paid by resident companies to nonresident financial institutions with respect to debentures is exempt from tax.

**Other withholding taxes.** Royalties rent, natural resource payments, reinsurance premiums and management fees paid to nonresidents are subject to a 15% final withholding tax.

A resident person who purchases an asset from a nonresident person must withhold a 10% tax from the gross payment for the asset.

**Foreign tax relief.** A foreign tax credit is granted for foreign tax paid on foreign-source income taxable in Uganda. The credit is limited to the equivalent of the Uganda tax on such income.

### C. Determination of trading income

**General.** Taxable income is the income reported in the companies' financial statements, subject to certain adjustments. Expenses are deductible to the extent that they are incurred in the production of taxable income.

**Inventories.** For tax purposes, inventory is valued at the lower of cost or market value.

**Provisions.** Only financial institutions and insurance companies may deduct specific provisions for bad debts.

Bad trade debts may be deducted when they are written off if all reasonable steps have been taken to recover the debt without success.

**Tax depreciation.** Depreciation charged in companies' financial statements is not deductible for tax purposes, but capital allowances are granted at specified depreciation rates ranging from 20% to 40%.

Capital expenditure on buildings that are designated as industrial buildings, excluding the cost of the land, qualifies for an annual industrial building allowance of 5%. Commercial buildings constructed on or after 1 July 2001 qualify for a straight-line commercial building deduction of 5%. Wear-and-tear allowances (tax depreciation), calculated using the declining-balance method, are granted for plant and machinery at the following rates.

Class	Assets	Rate (%)
I	Computers and data handling equipment	40
II	Automobiles, buses and minibuses with a seating capacity of less than 30 passengers, goods vehicles designed to carry or pull loads of less than 7 tons, and construction and earth-moving equipment	35
III	Buses with a seating capacity of 30 or more passengers, goods vehicles designed to carry or pull loads of more than 7 tons, specialized trucks, tractors, trailers and trailer-mounted containers, and plant and machinery used in farming, manufacturing or mining operations	30

Class	Assets	Rate (%)
IV	Railroad cars, locomotives, equipment vessels, barges, tugs and similar water transportation equipment, aircraft, specialized public utility plant, equipment and machinery, office furniture, fixtures and equipment, and depreciable assets not included in another class	20

The initial allowance was abolished, effective from 1 July 2014.

**Relief for losses.** Losses may be carried forward for an indefinite period of time to offset future profits.

In general, loss carrybacks are not allowed. However, for long-term construction contracts that result in a loss in the final year, a loss carryback for an unlimited number of years is allowed.

**Groups of companies.** No provisions exist for filing consolidated returns or for relieving losses within a group.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	18
Social security contributions to the National Social Security Fund (NSSF), on salaries; the contributions are not tax deductible; paid by Employer	10
Employee	5

#### E. Miscellaneous matters

**Foreign-exchange controls.** The foreign-exchange market is now fully liberalized. A company can freely transfer foreign exchange into and out of Uganda without restriction. A company can prepare financial statements in foreign currency if it obtains approval from the tax authorities.

**Transfer pricing.** Transfer-pricing regulations apply to a controlled transaction (transaction between associates) of at least UGX500 million (approximately USD200,000) in a year if a person who is party to the transaction is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda. The regulations require a person to record in writing sufficient information and analysis to verify that a controlled transaction is consistent with the arm's-length principle.

For an income year, this documentation must be in place before the due date for the filing of the income tax return for that year.

**Thin-capitalization rules.** The debt-to-equity ratio for the thin-capitalization restriction is now 1:1.

## F. Treaty withholding tax rates

The table below lists treaty withholding tax rates. Tax treaty provisions that lower Ugandan tax or provide exemptions from Ugandan tax for nonresident persons apply only if the nonresident is a resident of the state that has a tax treaty with Uganda and if at least 50% of the underlying ownership of the nonresident person is held by an individual or individuals who are themselves tax residents of that state.

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Belgium	5/15 (a)	10	10
Denmark	10/15 (b)	10	10
India	10	10	10
Italy	15	15	10
Mauritius	10	10	10
Netherlands	0/5/15 (c)	10	10
Norway	10/15 (b)	10	10
South Africa	10/15 (b)	10	10
United Kingdom	15	15	15
Non-treaty countries	15	15	15

- (a) The 5% rate applies if the recipient owns at least 10% of the company paying the dividends. The 15% rate applies to other dividends.
- (b) The 10% rate applies if the recipient is a company resident in the other contracting state that owns at least 25% of the capital of the payer. The 15% rate applies to other dividends.
- (c) The 0% rate applies if the recipient holds at least 50% of the capital of the company paying the dividends. The 5% rate applies if the recipient holds less than 50% of the capital of the company paying the dividends. The 15% rate applies if the beneficial owner of the dividends is not a tax resident of the Netherlands.

*Unless otherwise indicated, the information presented in this chapter refers to the tax rules, effective from 1 January 2015. Ukrainian corporate profit tax accounting rules are changed significantly, effective from 1 January 2015, and are expected to be further developed.*

## A. At a glance

Corporate Income Tax Rate (%)	18 (a)
Capital Gains Tax Rate (%)	18
Branch Tax Rate (%)	18
Withholding Tax (%)	
Dividends	15
Interest	15
Royalties	15

Freight	6
Advertising	20 (b)
Income from Discount Bonds	18 (c)
Insurance	0/4/12 (b)(d)
Other Ukrainian-Source Income	15
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

- (a) Special tax rates exist for insurance companies.
- (b) In essence, the tax on advertising services and insurance payments is not a withholding tax, because the tax applicable to fees paid to nonresidents for advertising services and the tax on insurance payments is not withheld from the payments remitted to the nonresident recipient, but is paid at the expense of the Ukrainian company making the payments (that is, the economic burden of paying the tax is borne by the Ukrainian party).
- (c) The tax base is calculated as the difference between the nominal value of the discount bonds and the acquisition value (purchase price) of the bonds on the primary or secondary stock market.
- (d) The 0% rate applies to the following:
- Insurance and reinsurance payments to financially reliable nonresidents
  - Insurance payments with respect to civil aviation passenger transportation
  - Insurance payments to nonresident individuals under mandatory insurance agreements
  - Insurance payments under Green Card insurance agreements (mandatory third-party liability insurance for car owners of states participating in the Green Card system)
- The 4% rate applies to insurance payments to nonresidents under insurance agreements covering risks outside Ukraine (subject to exceptions). The standard 12% rate applies in all other cases.
- (e) Exceptions apply (see Section C).

## B. Taxes on corporate income and gains

**Corporate profit tax.** Ukrainian legal entities and their separate subdivisions (except for representative offices) are subject to corporate profit tax (CPT) on their worldwide income and gains. Foreign legal entities (except for organizations with diplomatic privileges or immunities) are subject to CPT if they receive Ukrainian-source income. CPT also applies to permanent establishments of nonresidents receiving income from Ukrainian sources or performing agency services or certain other services for the benefit of nonresidents.

**Rates of tax.** The CPT rate is 18%.

Tax holidays until 2016 are available for certain companies that have limited turnover and engage in certain activities.

**Capital gains.** Capital gains are included in taxable profit and generally taxed at the regular CPT rate.

Special tax rules apply to capital gains derived from trading in securities. Profits from trading in securities are included in taxable profit. Losses from trading in securities can be carried forward indefinitely to offset future income from such trading.

**Administration.** Taxpayers with annual income for the previous year exceeding UAH10 million must make monthly CPT prepayments in the current (reporting) year. Under the general rule, each CPT prepayment cannot be less than 1/12th of the CPT “accrued for payment” in the final annual tax return of the preceding year. However, this general rule does not apply to newly created companies, agricultural producers and nonprofit organizations.

Taxpayers making CPT prepayments submit a final annual tax return with calculation of CPT prepayments for the next 12 months. Each 12-month cycle of CPT prepayments begins in March of the current (reporting) year and continues until February of the following year.

Newly created companies, nonprofit organizations and companies with annual income less than UAH10 million do not make the CPT prepayments described above. Such taxpayers report and pay their CPT liabilities after the year-end based on the final annual tax return.

If a taxpayer does not make CPT prepayments because in the previous year it did not have any profit or reported a loss, but has derived a profit in the first quarter of the current year, the taxpayer must submit quarterly CPT returns beginning in the second quarter of the current year and must pay CPT on a quarterly basis.

Taxpayers that file only an annual return must submit it by 1 June of the following year. If a taxpayer files tax returns quarterly, both quarterly tax returns and the final annual tax return must be submitted within 40 days after the quarter or the year-end. Quarterly tax returns are prepared on a cumulative basis. Tax is payable within 10 days after the deadline for submitting the tax return.

**Dividends.** A company distributing dividends to its shareholders must pay an 18% advance corporate profit tax (ACPT) on the positive difference between the amount of dividends and taxable profit for the reporting year for which dividends are paid, provided that the tax liability for the year is settled (if unsettled, ACPT is levied on the whole amount of dividends). The tax is paid either before or at the moment of the dividend distribution. The ACPT is paid at the expense of the dividend payer and does not decrease the amount of dividends due to shareholders. In general, ACPT can be offset against the CPT liability of the taxpayer in the current period.

Exemption from ACPT on dividends applies to the following dividends:

- Dividends paid to individuals
- Dividends paid by joint investment vehicles
- Dividends paid to shareholders of the taxpayer's parent company, up to the amount of dividends received by the parent company from third companies
- Dividends paid to companies whose profits are exempt from tax, up to the amount of such exempt profits in the period for which dividends are paid

Dividends distributed to nonresidents are subject to withholding tax at a rate of 15%, unless an applicable double tax treaty provides otherwise.

Ukrainian CPT payers do not include dividends received from other Ukrainian CPT taxpayers in their taxable profit.

**Foreign tax relief.** Ukrainian enterprises may credit foreign tax paid with respect to foreign-source profits against Ukrainian tax imposed on the same income, up to the amount of such Ukrainian tax. The credit is granted only if the taxpayer submits a written

confirmation from the tax authorities of the foreign country that certifies payment of the foreign tax.

### C. Determination of taxable profit

**General.** Taxable profit is defined as the financial result before tax, determined under Ukrainian accounting standards or under International Financial Reporting Standards, subject to several adjustments. Add-back adjustments increasing the financial result for tax purposes include the following:

- Thirty percent of the cost of goods, fixed assets, works and services purchased from nonresidents registered in low-tax and non-transparent jurisdictions, or from nonprofit organizations. This limitation does not apply if the taxpayer substantiates the arm's-length level of the expenses by preparing transfer-pricing documentation.
- Royalties paid to nonresidents exceeding the sum of royalty income and 4% of the taxpayer's net sales income for the preceding reporting year (excluding value-added tax [VAT] and excise tax). In some cases, royalties are added back in full. The limitation does not apply if the taxpayer substantiates the arm's-length level of the royalties by preparing transfer-pricing documentation.
- Transfer-pricing adjustments.
- Provisions and allowances accrued for financial accounting purposes (except salary provisions).
- Bad-debt allowances.
- Funds or cost of goods, works, or services provided to nonprofit organizations, if they exceed 4% of taxable profit for the preceding year.
- Impairment of fixed assets and intangible assets.
- Losses from participation in the equity of other companies.

Industry-specific adjustments apply for banks and financial institutions.

Tax-loss carryforwards decrease the pre-tax financial result for CPT purposes.

If a taxpayer's income does not exceed UAH20 million, the taxpayer may opt not to make any adjustments to the financial result before tax for CPT purposes.

**Depreciation.** For purposes of tax depreciation, fixed assets are defined as assets that are designated for use in a taxpayer's business activity for more than one year and that have a value exceeding UAH2,500. The Tax Code provides for 16 groups of tangible fixed assets, 6 groups of non-tangible fixed assets and 5 methods of tax depreciation. Similar to financial accounting, tax depreciation is accrued per each item.

The list of depreciation methods is in line with methods stipulated for financial accounting, except for the unit-of-production method, which may not be used. The following are the methods:

- Straight-line
- Declining-balance
- Accelerated declining-balance
- Sum-of-the-years' digits

Depreciation of an asset is accrued on a monthly basis throughout the useful life cycle of the asset. The following table shows the minimum allowable term of the useful lives of assets.

Group	Assets	Minimum term of useful life Years
2	Capital expenditure on land improvements, not related to construction	15
3	Buildings	20
	Facilities	15
	Transmission devices	10
4	Machinery and equipment	5
	Electronic and computer equipment	2
5	Transport facilities	5
6	Tools, appliances and equipment (furniture)	4
7	Animals	6
8	Perennial plants	10
9	Other fixed assets	12
12	Temporary facilities	5
14	Returnable containers	6
15	Rental objects	5
16	Long-term biological assets	7

Assets of Group 1 (land plots) and Group 13 (natural resources) are not subject to depreciation.

The minimum term of useful life is not determined for the assets of Group 10 (library holdings) and Group 11 (tangible assets of small value).

Taxpayers should use the longer of the tax accounting or financial accounting depreciation terms.

**Relief for losses.** In general, the Tax Code allows the unlimited carryforward of losses. A limitation applies to losses accumulated before 1 January 2012. Under this limitation, the losses reported in the annual tax return for 2011 can only be carried forward gradually during the period of 2012 through 2015. The annual amount allowed to be carried forward cannot exceed 25% of the reported losses. After 2015, the remaining tax losses can be carried forward without limitation. The limitation applies only to taxpayers that had taxable profit in 2011 equaling or exceeding UAH1 million. It is advisable to monitor further developments in the tax laws as ad-hoc restrictions and adverse interpretations of the law are possible.

The law does not allow tax losses to be carried back (that is, offsetting the tax loss of the current year against the taxable profit of previous years to reduce tax payments). However, for taxpayers that determine tax payable based on quarterly tax returns, the carryback of a tax loss within a year may be technically possible because tax returns are completed cumulatively.

**Groups of companies.** The Ukrainian tax law does not provide for the grouping of different legal entities.

## D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	20
Import and supply of pharmaceuticals	7
Exports of goods and certain services	0
Excise tax	Various
Customs duties	Various
Environmental tax	Various
Rent tax	Various
Property tax	Various

## E. Miscellaneous matters

**Foreign-exchange controls.** The Ukrainian currency is the hryvnia (UAH). The official exchange rate of the hryvnia against the US dollar can be found at the National Bank of Ukraine (NBU) web site ([www.bank.gov.ua](http://www.bank.gov.ua)); the retail exchange rate may differ from the official exchange rate. A wide variety of controls are imposed with respect to the use, circulation and transfer of foreign currency within Ukraine and abroad. These controls, which affect almost all international business transactions, include the following:

- In general, transactions between Ukrainian residents and cash settlements within Ukraine may not be carried out in foreign currency.
- All statutory accounting and tax reporting, as well as tax payments, must be in Ukrainian currency.
- Wages and salaries paid to Ukrainian citizens must be in Ukrainian currency.
- Ukrainian currency may be used to purchase foreign currency.
- Ukrainian enterprises must obtain an individual license (permission) from the NBU to engage in certain business transactions, including the opening of bank accounts abroad and investing abroad.
- Ukrainian enterprises must collect their foreign currency proceeds for goods, works or services supplied by them within 90 days from the date of exportation or supply of services. Similarly, foreign currency prepayments for goods, works or services must not exceed 90 days.
- Seventy-five percent of Ukrainian residents' foreign currency proceeds are subject to mandatory sale on the Ukrainian inter-bank currency market. The NBU sets the percentage of mandatory sale on an ad hoc basis and, as a result, the percentage could change.
- Payments for services rendered by nonresidents, as well as cross-border lease and royalty payments, are subject to price-evaluation review if the total amount of the contract (or the total annual amount payable under several contracts for similar services between the same parties) exceeds EUR25,000 (or its equivalent in another foreign currency). The governmental informational-analytical center for monitoring foreign commodities markets conducts the price-evaluation reviews.
- Several temporary restrictions are imposed on cross-border payments in foreign currency.

**Debt-to-equity ratios and other restrictions on the deductibility of interest.** If a taxpayer's debt to a nonresident related party is at least 3.5 times (10 times for financial and leasing companies) the amount of its equity, interest payable by such taxpayer may be deductible in an amount of up to 50% of the sum of its financial result before taxation, financial expenses and financial accounting depreciation for the reporting year. The remaining interest, annually reduced by 5%, may be carried forward indefinitely, subject to the same limitation.

**Transfer pricing.** Effective from 1 January 2015, new transfer-pricing rules took effect in Ukraine.

Under the new rules, controlled transactions include the following:

- Transactions with nonresident related parties
- Transactions with nonresidents registered in low-tax or non-transparent jurisdictions on the list approved by the government
- Commission sales through nonresident commissioners
- Transactions between related parties through unrelated intermediaries that do not undertake significant functions, use significant assets or assume significant risk

Transactions are controlled if both of the following circumstances exist:

- The group's annual taxable profit exceeds UAH20 million (approximately USD855,000).
- The group's annual transactions with an entity exceed UAH1 million (approximately USD43,000) or 3% of the group's taxable profit for the reporting tax year.

The Tax Code provides for the following five methods for determining the arm's-length price for controlled transactions:

- Compared uncontrolled price (the preferred method)
- Resale-minus
- Cost-plus
- Transactional net margin
- Profit-split

Special rules apply to the export or import of quoted goods with respect to nonresidents registered in low-tax or non-transparent jurisdictions.

Taxpayers that perform controlled transactions must file a transfer-pricing report by 1 May of the year following the reporting year.

## **F. Treaty withholding tax rates**

Ukraine honors the double tax treaties of the former USSR, except for treaties that have been superseded by new treaties concluded directly by Ukraine or renounced by the other party to the treaty. Ukraine is not a member of the Organisation for Economic Co-operation and Development (OECD). As a result, the Ukrainian tax authorities are not bound by the commentary of the OECD model convention. The rates in the following table reflect the lower of the treaty rate and the rate under domestic tax law for dividends, interest and royalties paid from Ukraine to residents of treaty countries. Exceptions or conditions may apply, depending on the terms of the particular treaty.

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Algeria	5/15 (d)	0/10 (e)	10

Non-treaty countries	15	15	15

(a) The 0% rate applies to dividends paid to one or more companies that are the beneficial owners of these dividends and if either of the following conditions is satisfied:

- The recipient company or companies hold directly or indirectly at least 50% of the capital of the company paying the dividends, and the total amount of their investments in the paying company is not less than 5 million French francs.
- The investments of the recipient companies in the company paying the dividends are guaranteed or insured by the other state, the central bank of such state or a person acting on behalf of such state.

The 5% rate applies to dividends paid to companies that own at least 20% of the capital of a Ukrainian resident payer or 10% of the capital of a French resident payer. The 15% rate applies to other dividends.

(b) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights for literary, dramatic, musical or artistic works. The higher rate applies to other royalties.

(c) The 10% rate applies to the following:

- Payments for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
- Payments for copyrights of scientific works; payments for the use of, or the right to use, industrial, commercial or scientific equipment
- Payments for information concerning industrial, commercial or scientific experience

The 15% rate applies to payments for the use of, or the right to use, cinematographic films, or tapes for radio or television broadcasting, and to payments for copyrights of literary or artistic works.

(d) The lower rate applies to dividends paid to companies owning a minimum percentage of the capital of the payer (under the treaties, this percentage ranges from 10% to 50%). The higher rate applies to other dividends.

(e) The 0% rate may apply to interest paid to or, in some cases, by government institutions of the contracting states. In some cases, the 0% rate also applies to the following:

- Interest paid to entities authorized by government institutions
  - Interest on debt claims that are warranted, insured or directly or indirectly financed by the state or a financial institution wholly owned by the state
- Specific institutions are named in some treaties. The higher rate applies to other interest.

(f) The 0% rate applies to payments for the use of, or the right to use, computer software. The 10% rate applies to other royalties.

(g) The 0% rate applies to payments for the use of, or right to use, secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.

(h) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with

respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state. The 2% rate applies to interest on loans from banks or financial institutions and to interest with respect to sales on credit of merchandise or services between enterprises or sales of industrial, commercial or scientific equipment. The higher rate applies to other interest.

- (i) The 0% rate applies to dividends paid to companies (other than partnerships) that hold directly at least 50% of the capital of the payer of the dividends and have made an investment in the capital of the payer of at least USD300,000 or the equivalent in the currencies of the contracting states. The 0% rate also applies to dividends paid to companies whose investment in the capital of the payer is guaranteed or insured by government institutions or an agency or instrumentality owned or controlled by the government. The 5% rate applies to dividends paid to companies owning at least 20% of the payer. The 15% rate applies to other dividends.
- (j) The 0% rate applies to interest paid to the state or an agency owned or controlled by the state and to interest paid to a resident of a contracting state with respect to a loan or other debt claim or credit granted, guaranteed or insured by public entities owned or controlled by the state. The 2% rate applies to the following:
- Interest paid on loans granted by banks or other financial institutions of the other state, including investment banks, savings banks and insurance companies
  - Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment, or with respect to the sale or furnishing on credit of goods or merchandise or services by an enterprise to another enterprise
- The 10% rate applies to other interest.
- (k) The 0% rate applies to payments for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, and secret formulas or processes, as well as to information concerning industrial, commercial or scientific experience. The higher rate applies to other royalties.
- (l) The 0% rate applies to royalties paid for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or right to use, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, and films or tapes for television or radio broadcasting, or trademarks.
- (m) The 0% rate applies to dividends paid by a company resident in Ukraine to a company that is resident in Finland and that is the beneficial owner of the dividends if either of the following circumstances exists:
- The Finnish Guarantee Board has issued an investment guarantee for dividends paid or for the capital invested on which the dividends are paid.
  - The recipient of the dividends has made an investment of at least USD1 million in the capital of the payer and holds at least 50% of the equity capital of the company paying the dividends.
- The 0% rate is allowed with respect to dividends paid for any tax year within the period for which the above-mentioned guarantee is in force or, if no such guarantee is made, with respect to dividends paid for the first three years following the year in which the investment is made. The 5% rate applies to dividends paid to companies owning at least 20% of the capital of the payer. The 15% rate applies to other dividends.
- (n) The 0% rate applies if the interest is paid to the State of Finland, or a local authority or a statutory body thereof, the Bank of Finland, the Finnish Fund for Industrial Co-operation Ltd (FINNFUND) or the Finnish Export Credit Ltd or any similar institution. The 0% rate also applies to interest paid to a resident of Finland on a loan guaranteed by any of the bodies mentioned in the preceding sentence or by the Finnish Guarantee Board and paid to a resident of Finland. The 5% rate applies to interest related to commercial credit. The 10% rate applies to other interest.
- (o) The 5% rate applies to dividends paid to companies that have invested at least USD50,000 in the capital of the payer or an equivalent amount in the currencies of the contracting states. The 15% rate applies to other dividends.
- (p) The 0% rate applies to the following types of interest:
- Interest paid to government institutions
  - Interest on loans granted by banks
  - Interest paid with respect to sales on credit of merchandise, or industrial, commercial or scientific equipment
- The 10% rate applies to other interest.

- (q) The 10% rate applies to dividends paid to the beneficial owner if, for an uninterrupted period of two years before the payment of the dividend, the beneficial owner owned directly at least 25% of the capital stock of the company paying the dividends. The higher rate applies to other interest.
- (r) The 0% rate applies to payments for the use of, or the right to use, software, patents, trademarks, designs or models, plans, or secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (s) The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 15% rate applies to other royalties.
- (t) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the voting power of the payer of the dividends and if at least 50% of the voting power of the company that is the beneficial owner of the dividends is held by residents of the beneficial owner's contracting state.
- (u) The 0% rate applies to the following:
- Interest paid on loans provided, guaranteed or insured by a government of a state where the beneficial owner of the interest is located, or interest on loans made, guaranteed or insured on behalf of such government by an authority thereof that is so entrusted
  - Interest with respect to indebtedness arising on sales on credit by enterprises of merchandise or industrial, commercial or scientific equipment to an enterprise of another contracting state, unless the sale or indebtedness is between related persons
- The 10% rate applies to other interest payments.
- (v) The 0% rate applies to royalties paid for patents concerning industrial and manufacturing know-how or processes, agriculture, pharmaceuticals, computers, software, building constructions, secret formulas or processes, as well as for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (w) The 0% rate applies to interest derived by the government, a political subdivision or a local authority, central bank of a contracting state or other financial institution established and owned by the government to promote trade and investment, as well as to interest paid to residents of a contracting state with respect to debt-claims guaranteed or insured by the government, a local authority thereof, the central bank or other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid on loans granted by banks or other financial institutions, including investment banks, savings banks and insurance companies. The 15% rate applies to other interest payments.
- (x) The 5% rate applies to royalties paid for the use of, or the right to use, patents, plans, secret formulas or processes, as well as for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (y) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, central bank or other state financial institution. The 5% rate applies to dividends paid to companies owning at least 10% of the capital of the payer.
- (z) Notwithstanding the provisions allowing the 5% reduced rate (see footnote [d]), the 10% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends and if the dividend payer is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax.
- (aa) A discrepancy exists between the Ukrainian and English texts of the Belgium treaty with respect to the withholding tax rates for interest and royalties. In the Ukrainian version, the highest treaty rate is 5%, while in the English version, it is 10%. The English version prevails in accordance with Paragraph (e) of the protocol to the treaty.
- (bb) The treaty does not apply to the Hong Kong Special Administrative Region (SAR).
- (cc) The 0% rate applies to dividends paid to the government, a political subdivision or local authority, the central bank or other state financial institution. The 5% rate applies to all other dividends.
- (dd) The 0% rate applies to interest paid on loans granted by the government of a contracting state, including its political subdivisions and local authorities, the central bank or financial instrumentalities of that government. The 5% rate applies to interest paid on loans granted by banks. The 10% rate applies to all other interest payments.

- (ee) If a resident of a contracting state has a permanent establishment in the other state, such permanent establishment may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that permanent establishment after payment of the corporate tax on the profits.
- (ff) Interest arising in a contracting state and paid to the government of the other contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or a political subdivision is exempt from tax in the state where the income arises, unless the rule mentioned in the following sentence applies. Interest on securities, bonds or debentures issued by the government of a contracting state, political subdivisions thereof or agencies (including financial institutions) wholly owned by that government or political subdivision thereof is taxable only in that state.
- (gg) The 5% rate applies to royalties paid for the use of, or right to use, scientific works, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary or artistic works, including cinematographic films, and tapes for television or radio broadcasting.
- (hh) Interest derived by the government of the contracting state including local authorities thereof, a political subdivision, the central bank or any financial institution controlled by such government, the capital of which is wholly owned by the government of the contracting state, is exempt from tax.
- (ii) The treaty rates do not apply to residents of a contracting state who perform their activity outside of this state if the income and profits of such persons are exempt from tax or are taxed at a substantially lower rate in such state.
- (jj) The 0% rate applies if interest is received and actually held by the government or a political subdivision. Interest paid to and held by a resident of one contracting state is exempt from tax in the other contracting state if it is paid with respect to a loan made, guaranteed or insured or with respect to any other debt claim or credit, if the loan, debt claim or credit is guaranteed or insured on behalf of the first-mentioned state or by an authorized organ.
- (kk) The 0% rate also applies if the interest is paid by a purchaser to a seller with respect to commercial credit resulting from deferred payments for goods, merchandise, equipment or services, unless the sale or indebtedness is between associated persons.
- (ll) The 0% rate also applies to interest paid to an institution (including a financial institution) with respect to a loan made under an agreement between the governments of the contracting states.
- (mm) The reduced rates apply if the beneficial owner of the dividends is subject to tax with respect to such dividends.
- (nn) The 0% rate also applies to interest arising in a contracting state and paid to a resident of the other contracting state that was established and operated exclusively to administer or provide benefits under one or more pension, retirement or other employee benefits plans if the following conditions are satisfied:
- The recipient is the beneficial owner of the interest and is generally exempt from tax in the other state.
  - The interest is not derived from the carrying on of a trade or a business or from a related person.
- (oo) The 0% rate also applies to interest paid with respect to indebtedness incurred in connection with the sale on credit of industrial, commercial or scientific equipment by an enterprise that is resident of one contracting state to an enterprise resident in the other contracting state, unless the sale or indebtedness is between associated enterprises.
- (pp) Tax imposed on the earnings of a company attributable to a permanent establishment in a contracting state in addition to the tax that would be chargeable on the earnings of a company that is a national of that state may not exceed 5% of the amount of such earnings.
- (qq) If a resident of a contracting state has a permanent establishment in the other state, such permanent establishment may be subject to a withholding tax under the law of that other state. However, this tax may not exceed 10% of the amount of the profits of that permanent establishment after payment of the corporate tax on the profits. This measure does not affect provisions contained in production-sharing contracts and contracts of work (or any other similar contracts) relating to the oil and gas sector or other mining sector entered into by the government of Indonesia, its instrumentalities, its relevant state oil and gas company or any other entities of the government of Indonesia, with a person that is a resident of the other contracting state.

- (rr) The 0% rate applies to the interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank.
- (ss) The 0% rate applies to dividends if the beneficial owner of the dividends is the government, the central bank, or other government institutions or statutory bodies. The 5% rate applies to dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.
- (tt) The 10% rate applies to dividends paid to the beneficial owner of the dividends if the beneficial owner owns directly at least 25% of the capital stock of the company paying the dividends. The 15% rate applies to other dividends.
- (uu) The 0% rate applies to interest received and belonging to the government, political subdivisions, local authorities or the central bank.
- (vv) The double tax treaty with Yugoslavia applies to Serbia and Montenegro.
- (ww) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting. The 10% rate applies to the royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
- (xx) The 5% rate applies to dividends paid to the beneficial owner of the dividends if such owner holds at least 20% of the capital of the company paying the dividends or has invested in the acquisition of the shares or other rights of the company the equivalent of at least EUR100,000. The 15% rate applies in all other cases.
- (yy) The 5% rate applies to royalties with respect to copyrights of scientific works, patents, trademarks, secret formulas, processes or information concerning industrial, commercial or scientific experience. The 10% rate applies in other cases.
- (zz) The 0% rate applies to the following types of interest:
- Interest paid to or by the state, political subdivision or central bank
  - Interest arising and paid with respect to a loan granted for a term over three years that is guaranteed or insured or to a credit granted for a term over three years that is guaranteed or insured by the authorized state institutions
- The 10% rate applies in other cases. The procedure for application of these restrictions will be set by the competent authorities of Mexico and Ukraine.

Ukraine has ratified a double tax treaty with Cuba, but this treaty is pending.

Ukraine has signed double tax treaties with Ireland and Malta, but these treaties have not yet been ratified.

Ukraine signed a tax treaty with Luxembourg, but the Ukrainian parliament did not ratify it.

The Ukrainian government authorized the Minister of Finance to sign a double tax treaty with Sri Lanka.

Ukraine is negotiating double tax treaties with Guinea and Tunisia.

## A. At a glance

Corporate Income Tax Rate (%)	0*
Capital Gains Tax Rate (%)	0*
Branch Tax Rate (%)	0*
Withholding Tax (%)	0*

\* No taxes are imposed by the federal government of the United Arab Emirates. See Section B for further information.

## B. Taxes on corporate income and gains

**Corporate income tax.** Although no federal taxation currently exists in the United Arab Emirates (UAE), each of the individual Emirates (Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al Khaimah, Sharjah and Umm Al Quwain) has issued corporate tax decrees that theoretically apply to all businesses established in the UAE. However, in practice, these laws have not been applied. Taxes are currently imposed at the Emirate level only on oil and gas producing companies in accordance with specific government concession agreements, and on branches of foreign banks under specific tax decrees or regulations or in accordance with agreements with the Rulers of the Emirates in which the branches operate.

The preceding paragraph describes how the practice has evolved in the UAE. No general exemption is contained in the law. Investors in the UAE should be aware of the risk that the law may be more generally applied in the future and of the remote risk that it may be applied retroactively.

**Tax incentives.** Several of the Emirates have free zones which offer tax and business incentives aimed at making the UAE a global financial and commercial center. The incentives usually include tax exemptions for a guaranteed period, the possibility of 100% foreign ownership, absence of customs duty within the free zone and a “one-stop shop” for administrative services. The free zones include, but are not limited to, the Dubai Airport Free Zone (DAFZ), Dubai International Financial Centre (DIFC) (typically for financial services), Dubai Internet City (DIC), Dubai Media City (DMC), Dubai Multi Commodities Centre (DMCC), Dubai World Central (DWC) and Jebel Ali Free Zone (JAFZ). Approximately 30 free zones are located in the Emirate of Dubai alone.

## C. Customs duties

The UAE is a member of the Gulf Cooperation Council (GCC), together with Bahrain, Kuwait, Oman, Qatar and Saudi Arabia. On 22 December 2002, the GCC member states approved regulations for the implementation of the GCC Customs Law, which unifies customs procedures in all GCC customs administrations and establishes a unified GCC customs union. All GCC member states have enacted the GCC Customs Law. However, the practical implementation of the law is not completely consistent.

Under the GCC Customs Law, most foreign imports are subject to customs duty of 5% of the Cost, Insurance and Freight (CIF) invoice value of the imported goods, except tobacco, alcohol and the items on the exemption list. This import duty is levied at the first point of entry to the GCC. No export duty is imposed on goods leaving the GCC.

In general, goods do not incur customs duty on import into a UAE free zone, and no export duty is imposed on goods removed from a UAE free zone. However, if the goods leave the free zone for a destination within the GCC, customs duty is levied on the import at the first point of entry into the GCC.

#### **D. Foreign-exchange controls**

Neither the federal government of the UAE nor the individual Emirates impose foreign-exchange controls.

#### **E. Tax treaties**

The UAE has approximately 60 tax treaties currently in force, including treaties with Algeria, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Canada, China, Cyprus, the Czech Republic, Egypt, Estonia, Finland, France, Georgia, Germany, Hungary, India, Indonesia, Ireland, Italy, Kazakhstan, Korea (South), Latvia, Lebanon, Luxembourg, Malaysia, Malta, Mauritius, Mexico, Morocco, Mozambique, the Netherlands, New Zealand, Pakistan, Panama, Philippines, Poland, Portugal, Romania, the Russian Federation (limited), Serbia, Seychelles, Singapore, Spain, Sri Lanka, Sudan, Switzerland, Syria, Tajikistan, Thailand, Tunisia, Turkey, Turkmenistan, Ukraine, Venezuela, Vietnam and Yemen.

In addition, treaties with the following countries are in various stages of negotiation, renegotiation, signature, ratification, translation or entry into force.

Albania	Hong Kong SAR	Mongolia
Argentina	Japan	Montenegro
Bangladesh	Jordan	Nigeria
Barbados	Kenya	Palestinian
Benin	Kyrgyzstan	Authority
Brunei Darussalam	Libya	Peru
Croatia	Lithuania	Slovak Republic
Ecuador	Macedonia	Slovenia
Fiji	Malawi	Uruguay
Greece	Moldova	Uzbekistan
Guinea

- (a) The small profits rate of corporation tax is 20%. Effective from 1 April 2015, the main rate of corporation tax will decrease to 20%, while the small profits rate will remain at 20%. The main rate will decrease by a further 1% to 20%, effective from 1 April 2015. As of that date, the small profits and the main rate will be unified. The main rate of corporation tax for ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the UK continental shelf) is 30% (small profits rate of 19%). The rates for ring-fence profits will not change on 1 April 2015.
- (b) The small profits rate of 20% applies in certain circumstances if taxable profits are below GBP300,000. This benefit is phased out for taxable profits from GBP300,000 to GBP1,500,000. These limits are reduced if associated companies exist. Effective from 1 April 2015, these limits are only relevant for ring-fence profits.
- (c) Capital gains are subject to tax at the normal corporation tax rate. See Section B for details concerning the taxation of capital gains derived by non-residents.
- (d) This tax applies to payments to nonresidents and non-corporate residents.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Companies that are resident in the United Kingdom are subject to corporation tax on their worldwide profits, but several exemptions have the effect of focusing corporation tax on UK-related activities. Tax is imposed on the total amount of income earned from all sources in the company's accounting period, including any chargeable capital gains. However, a company can elect to exempt non-UK branch income and losses from UK corporation tax, subject to transitional rules that govern entry into the regime. This election is irrevocable and takes effect from the accounting period after the one in which the election is made.

Nonresident companies are subject to UK corporation tax only if they carry on a trade in the United Kingdom through a permanent establishment. A permanent establishment arises either from a fixed place of business in the United Kingdom through which the nonresident company carries on its business, or from an agent exercising authority to do business in the United Kingdom on behalf of the nonresident company. The amount of profit attributable to a permanent establishment is computed in accordance with the separate enterprise principle.

A company is resident in the United Kingdom if it is incorporated in the United Kingdom or if the central management and control of the company is exercised there. However, companies regarded as resident under domestic law, but as nonresident under the tie-breaker clause of a double tax treaty, are regarded as nonresident for all corporation tax purposes.

**Rates of corporation tax.** The main rate of corporation tax for large companies (companies with taxable profits above GBP1,500,000) is 21% for the financial year beginning 1 April 2014. The rate will decrease to 20% for the financial year beginning 1 April 2015. The rate is 30% for companies with ring-fence profits (that is, profits from oil extraction and oil rights in the United Kingdom and the UK continental shelf). If an accounting period does not coincide with the financial year, the profits for the accounting period are time-apportioned and the appropriate rate applied to each part. A company may claim the small profits rate of corporation tax, which is 20% (19% on ring-fence profits of companies) if its taxable profits for an accounting period are less than GBP300,000. For the financial year beginning 1 April 2014, the effective marginal rate for companies with non-ring-fence profits between GBP300,000 and GBP1,500,000 is 21.25%. These limits are divided by one plus the number of associates if a company has associated companies (subsidiaries or fellow subsidiaries), regardless of whether they are in or outside the United Kingdom. For the financial year beginning 1 April 2015, the marginal rate will no longer be relevant for non-ring-fence profits as a result of the unification of the small profits and main rates.

**Capital gains.** Gains on chargeable assets are subject to corporation tax at the corporation tax rate. For UK tax purposes, a capital gain is usually the excess of the sale proceeds over the original cost plus any subsequent qualifying capital expenditure incurred on the chargeable asset being disposed of. If chargeable assets acquired before 31 March 1982 are disposed of, only the portion of the gain after that date is usually taxable. An allowance is available for inflation; the amount of the reduction is based on the increase in the retail price index. This indexation allowance may be used only to eliminate a gain; it may not be used to create or increase an allowable loss.

The Substantial Shareholdings Exemption (SSE) broadly exempts from UK tax any capital gain on disposals made by trading companies or groups with substantial shareholdings (more than 10%) in other trading companies or groups. The following three sets of conditions must be satisfied:

- The substantial shareholding requirement
- Conditions relating to the “investing” company or group
- Conditions relating to the “investee” company or subgroup

Broadly, both the investing company and the investee company must be a trading company, group or subgroup for 12 months before the disposal and immediately afterwards.

Tax on capital gains is not generally levied on nonresidents; consequently, no tax is levied on a gain on the sale of shares in a UK subsidiary by the foreign nonresident parent company. However, gains on the sale of assets situated in and used in a trade carried on by a permanent establishment in the United Kingdom are subject to corporation tax at the corporation tax rate. In addition, from 6 April 2013, capital gains tax at a rate of 28% may be charged on the disposal of residential property by companies (both UK and non-UK resident). The tax is designed to prevent tax avoidance through the wrapping of residential property in corporate or other “envelopes.” Affected properties are those

worth over GBP2 million. Several reliefs are available to reduce the impact of this tax on genuine business transactions.

Special provisions permit the deferral of the capital gains charge on qualifying business assets if the sales proceeds are reinvested. There are numerous other special rules relating to capital gains.

Capital losses may be offset against capital gains of the same accounting period or carried forward indefinitely, but may not be carried back. Capital losses may not be used to reduce trading profits.

**Administration.** Tax returns, accounts and computations must be filed within 12 months after the end of the accounting period.

Large companies must make quarterly installment payments of their corporation tax. The first installment is due six months and thirteen days after the first day of the accounting period, and the last installment is due three months and fourteen days after the end of the accounting period. These payments are based on the estimated tax liability for the current year. Fewer payments may be required for shorter accounting periods.

All other companies must pay estimates of their corporation tax liability within nine months after the end of their accounting period.

Companies not complying with the filing and payment deadlines described above are subject to interest and penalties.

A self-assessment system requires companies to assess correctly their tax liabilities or face significant penalties. In addition, the tax authority (Her Majesty's Revenue & Customs, or HMRC) has extensive investigative powers.

*Inward Investments Support.* Significant inward investors can apply under HMRC's Inward Investments Support service for written confirmation of the UK tax treatment of specific transactions or events. In this context, "significant" is regarded as an investment of GBP30 million or more, but smaller investments are considered if they are potentially of importance to the national or regional economy.

**Dividends.** Dividends paid by UK resident companies are not subject to withholding tax. For dividends received by UK resident companies, the United Kingdom has a dividend exemption regime. A dividend or other income distribution received on or after 1 July 2009 is generally exempt from UK corporation tax if all of the following conditions are satisfied:

- The distribution falls within an exempt class or, if the recipient is a "small" company, the payer is resident in the United Kingdom or a qualifying territory.
- The distribution is not of a specified kind.
- No deduction is allowed to a resident of any territory outside the United Kingdom under the law of that territory with respect to the distribution.

UK resident shareholders other than companies are subject to income tax on the distribution received plus a deemed tax credit. The deemed tax credit attaching to dividends is equal to 1/9 of

the net dividend. Under several of the United Kingdom's double tax treaties, a foreign shareholder in a UK company may claim payment of part or all of this deemed tax credit that would have been available to a UK individual. However, in most cases, the benefit is eliminated or reduced to a negligible amount.

**Interest.** Interest payments on "short loans" (loans with a duration that cannot exceed 364 days) may be made without the need to account for withholding tax. All interest payments by UK resident companies may be made without the imposition of withholding tax if the paying company reasonably believes that the interest is subject to UK corporation tax in the hands of the recipient.

**Foreign tax relief.** Foreign direct tax on income and gains of a UK resident company other than that relating to a non-UK branch for which an exemption election has been made (see *Corporate income tax*) may be credited against the corporation tax on the same profits. The foreign tax relief cannot exceed the UK corporation tax charged on the same profits.

If a company receives a dividend from a foreign company in which it has at least 10% of the voting power, it may also obtain relief for the underlying foreign tax on the profits out of which the dividend is paid. Foreign tax relief does not apply if the dividend satisfies the conditions for the dividend exemption (see *Dividends*).

### C. Determination of trading income

**General.** The assessment is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments and provisions. Effective from 1 January 2015, most UK entities (with limited exceptions) must report either under International Financial Reporting Standards or the new Financial Reporting Standard in the United Kingdom and Republic of Ireland (FRS 102). Adoption of either standard may have a significant impact on cash taxes payable in the United Kingdom because the tax assessment is heavily influenced by the accounting result reported in the statutory financial statements.

In general, expenses must be incurred wholly and exclusively for the purposes of the trade. However, specific reliefs and prohibitions exist for certain expenses. For example, no deduction is allowed for entertainment expenses, except for the entertaining of company employees (in certain circumstances).

**Corporate and government debt and foreign-exchange differences.** The rules under the "loan relationships" regime are designed to allow the tax treatment of interest, discounts and premiums on debt instruments to follow the accounting treatment in most circumstances. However, the regime includes many anti-abuse measures as well as other measures, such as the Worldwide Debt Cap, which can restrict the allowable deductions (for further details, see Section E).

Foreign-exchange differences on most monetary items are taxable or relievable in accordance with GAAP. Specific rules apply to foreign-exchange differences arising on loans that hedge exchange risk on shareholdings.

**Inventory.** Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out basis; the last-in, first-out basis is not currently acceptable under either “old” or “new” UK GAAP.

**Provisions.** HMRC allows specific provisions made in accordance with GAAP to be deductible for tax purposes unless specific legislation provides to the contrary. However, no expenditure may be relieved more than once.

**Leased assets.** If leases of plant or machinery function essentially as financing transactions (long-funding leases), they are taxed as such and the following rules apply:

- The lessor includes only the finance element of the rentals arising under the lease income.
- The lessee deducts only the finance element of the rentals payable over the life of the lease and is entitled to capital allowances.

This regime applies to finance leases and certain operating leases. With the exception of some hire-purchase transactions, leases of less than five years are not affected.

### **Tax depreciation (capital allowances)**

*Plant and machinery.* Expenditure on plant and machinery, including some cars bought after April 2009, is pooled together (the main pool) and allowances are given at 18% on a reducing-balance basis. Assets with a useful life of 25 years or more (long-life assets) are depreciated at 8% on a reducing-balance basis. Integral features to a building also qualify for the 8% rate of capital allowances. An annual investment allowance (AIA) of 100% is available for the first GBP500,000 of investment in plant and machinery (other than cars) to all businesses, regardless of size. This increased allowance applies to qualifying investment made in the period of 1 April 2014 through 31 December 2015. Following this period, the allowance is intended to revert to the pre-1 January 2013 amount of GBP25,000. One AIA is available to each individual business or corporate group.

A 100% first-year allowance rate applies to expenditure before 1 April 2015 on electric cars and cars with CO<sub>2</sub> emissions of less than 95g/km. Cars emitting no more than 130g/km are added to the main pool, and the 18% rate applies. Cars emitting above 130g/km are added to the special-rate pool, and the 8% rate applies. For leased cars with CO<sub>2</sub> emissions above 130g/km, 15% of the lease cost is disallowed for tax purposes. The 100% first-year allowance rate does not apply to cars that will be leased.

*Energy-saving assets.* A 100% first-year allowance is available to businesses for expenditure on gas-refueling infrastructure, water-efficient technologies and energy-saving technologies. Lists of qualifying technologies are reviewed regularly. Companies may surrender losses derived from these enhanced capital allowances in return for a cash payment.

*Renovation of business premises in disadvantaged areas.* A first-year allowance of 100% is available for individuals and companies that convert, renovate or repair a commercial building or structure located in a designated disadvantaged area.

*Industrial and agricultural buildings.* Allowances for industrial buildings and agricultural buildings were fully withdrawn on 1 April 2011.

*Other.* Capital allowances are usually subject to recapture on the disposal of an asset on which capital allowances have been claimed. Capital allowances are also available for expenditure on mineral extraction.

**Relief for trading losses.** Trading losses may be used to relieve other income and capital gains of the year in which the loss was incurred and of the preceding year, provided the same trade was then carried on. Losses may also be carried forward, without time limit, for relief against future profits from the same trade. A company that ceases trading may carry back trading losses and offset them against profits of the preceding 36 months.

**Groups of companies.** UK law does not provide for tax consolidation. However, a trading loss incurred by one company within a 75%-owned group of companies may be grouped with profits for the same period realized by another member of the group. Similar provisions apply in a consortium situation to allow a transfer of a proportion of the losses; for this purpose, a UK resident company is owned by a consortium if 75% or more of its ordinary share capital is owned by other companies, none of which individually has a holding of less than 5%. However, the consortium-owned company must not be a 75%-owned subsidiary of any company. In both situations, anti-avoidance provisions that aim to prevent artificial arrangements exist.

Capital losses cannot be grouped with capital gains of other group members under the above provisions. However, the seller of an asset and another group company may jointly elect to transfer a capital gain or allowable loss to enable offset of capital gains and capital losses. A transferred capital loss can be carried forward in the transferee company.

In a 75%-worldwide group, the transfer of assets between group companies does not result in a capital gain if the companies involved are subject to UK corporation tax. This rule applies regardless of the residence status of the companies or their shareholders. The transferee company assumes the transferor's original cost of the asset plus subsequent qualifying expenditure and indexation. However, under an anti-avoidance provision, if the transferee company leaves the group within six years after the date of the transfer of the asset, that company is deemed to have disposed of and reacquired the asset at its market value immediately after the transfer. In certain circumstances, the chargeable gain or allowable loss that arises is added to or deducted from the proceeds of a share sale that caused the company to leave the group in the first place. The resulting gain or loss can then potentially be exempted or disallowed under the SSE (see *Capital gains*). If this provision does not apply, the gain or loss remains in the company that has left the group, but the gain or loss can be transferred by election to another company in the group. Anti-avoidance provisions that aim to prevent artificial arrangements exist.

#### **D. Other significant taxes**

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); on any supply of goods or services, other than an exempt supply, made in the United Kingdom by a taxable person in the course of business (for businesses established in the United Kingdom only); taxable if annual supplies exceed GBP81,000	0%/5%/20%
Stamp duty; imposed on transfers of shares, securities and interests in certain partnerships; duty charged on the stampable consideration	0.5%
Stamp duty land tax (SDLT); imposed on transfers of land and buildings and certain partnership transactions; tax is charged on the final consideration, but this may be replaced by market value in certain circumstances	
Residential property (effective from 4 December 2014, SDLT is charged at increasing rates for each portion of the price paid)	
Portion up to GBP125,000	0%
Portion between GBP125,001 and GBP250,000	2%
Portion between GBP250,001 and GBP925,000	5%
Portion between GBP925,001 and GBP1,500,000	10%
Portion above GBP1,500,000	12%
Acquisitions by companies and certain other bodies	
Consideration up to GBP500,000	Rates as above
Consideration exceeding GBP500,000	15%
Nonresidential or mixed-use property (SDLT is charged at a single rate for the entire price of a property.)	
Up to GBP150,000 (provided that annual rent is less than GBP1,000; otherwise a charge is payable)	0%
GBP150,001 to GBP250,000	1%
GBP250,001 to GBP500,000	3%
More than GBP500,000	4%
(Scotland will introduce its own Land and Buildings Transaction Tax [LBTT], replacing SDLT, effective from 1 April 2015. LBTT will be a progressive tax similar to SDLT on residential property. It is likely that LBTT and SDLT will have different rates.	
Social security contributions, on employees' salaries and wages; payable on weekly wages by	
Employer; imposed on employees' weekly wages exceeding GBP153	13.8%
Employee; imposed on employees' weekly wages	
On first GBP153	0%
On next GBP652	12%
On balance of weekly wage	2%

Nature of tax	Rate
Bank levy; based on the total chargeable equity and liabilities (subject to various exclusions) as reported in relevant balance sheets at the end of a chargeable period; a half-rate applies to long-term amounts and a nil rate allowance is granted for the first GBP20 million	0.156%/0.078%
Annual tax on enveloped dwellings; levied on certain higher value residential property held by companies and partnerships with a corporate member; several reliefs are available to exempt genuine property development and investment rental businesses from the tax; the tax is levied at a flat rate per year	
Properties worth more than GBP2 million and not more than GBP5 million	GBP15,000
Properties worth more than GBP5 million and not more than GBP10 million	GBP35,000
Properties worth more than GBP10 million and not more than GBP20 million	GBP70,000
Properties worth more than GBP20 million	GBP140,000
Properties worth more than GBP1 million and not more than GBP2 million (additional band from 1 April 2015)	GBP7,000
Properties worth more than GBP500,000 and not more than GBP1 million (additional band from 1 April 2016)	GBP3,500

## E. Miscellaneous matters

**Foreign-exchange controls.** Foreign-exchange regulations were suspended in 1979 and subsequently abolished. No restrictions are imposed on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with any accrued capital gains or retained earnings, at any time, subject to company law or tax considerations.

**Anti-avoidance legislation.** UK tax law contains several anti-avoidance provisions, which include the substitution of an arm's-length price for intercompany transactions (including intercompany debt) with UK or foreign affiliates, the levy of an exit charge on companies transferring a trade or their tax residence from the United Kingdom and the recharacterization of income for certain transactions in securities and real property. Some of these anti-avoidance provisions apply only if the transaction is not carried out for bona fide commercial reasons. Specific anti-arbitrage provisions applying to both deductions and receipts may be relevant to cross-border transactions.

In certain situations, legislation provides a facility for an advance clearance to be obtained from HMRC. If legislation does not provide this facility, a non-statutory clearance facility exists under which companies may apply to HMRC in advance of a transaction for a written confirmation of HMRC's view on how the tax law will apply to that transaction. HMRC undertakes to provide advance clearance within 28 days if evidence exists that the transaction is genuinely contemplated. It also aims to respond within this

time period if certainty is sought for a transaction that has already taken place. HMRC does not provide clearance if it believes that the arrangements are primarily intended to obtain a tax advantage.

The United Kingdom has implemented a system requiring the disclosure of certain transactions and arrangements to HMRC. As a direct result of this disclosure regime, tax-planning schemes are frequently disclosed in advance to HMRC.

A new general anti-abuse rule (GAAR) entered into force on 17 July 2013. The GAAR targets artificial and abusive tax-avoidance schemes and is intended to apply to the main taxes but not VAT.

**Transfer pricing.** UK tax law contains measures that substitute an arm's-length price for certain intercompany transactions with UK or foreign affiliates. Companies are required to prepare their tax returns in accordance with the arm's-length principle, and retain adequate records or other documentation to support their compliance with that principle, or otherwise suffer substantial penalties. These rules have other far-reaching consequences, and taxpayers should seek specific advice concerning their circumstances.

If both parties to a transaction are subject to UK corporation tax, and one is required to increase its taxable profits in accordance with the arm's-length principle, the other is usually allowed to decrease its taxable profits through a corresponding adjustment. Companies that were dormant as of 31 March 2004 and remain dormant are exempt from the transfer-pricing rules. Although small and medium-sized companies (unless they elect otherwise) are exempt from the rules with respect to transactions with persons in qualifying territories (broadly, the United Kingdom and those countries with which the United Kingdom has entered into a double tax treaty containing a non-discrimination article), they can be subject to the issuance of a transfer pricing notice by HMRC. However, for small companies, this notice can be issued only if the company has undertaken a non-arm's-length transaction with an affiliate that is taken into account in determining profits under the Patent Box regime (see *Patent Box*).

Persons that are otherwise independent but collectively control a business and have acted together with respect to the financing arrangements for the business are also subject to the UK transfer-pricing regime.

**Interest restrictions.** The United Kingdom's transfer-pricing measures apply to the provision of finance (as well as to trading income and expenses). As a result, companies must self-assess their tax liability on financing transactions using the arm's-length principle. Consequently, HMRC may challenge interest deductions on the grounds that, based on all of the circumstances, the loan would not have been made at all or that the amount loaned or the interest rate would have been less, if the lender was an unrelated third party acting at arm's length.

*Worldwide Debt Cap.* The Worldwide Debt Cap (WWDC) is a cap on allowable interest deductions in addition to thin-capitalization restrictions and other anti-avoidance provisions. The WWDC provisions are designed to restrict the UK tax deduction available for financing expenses of large groups based on the gross financing expense of the worldwide group. The WWDC legislation applies to accounting periods beginning on or after 1 January 2010.

The WWDC provisions include a gateway test. If the gateway test is satisfied, the UK group falls outside of the remaining provisions. Under the gateway test, broadly, the WWDC applies only if a group's UK net debt exceeds 75% of the worldwide gross debt.

If the WWDC applies and if the tested expense amount exceeds the available amount, the excess amount is disallowed. Broadly, the tested expense amount is the aggregate net finance expense of all UK group companies that have a net finance expense above GBP500,000, and the available amount is the group's external worldwide finance expense which is taken from the consolidated financial statements. If a disallowance arises, some interest income may be exempted from UK tax. The amount of the exempted income is limited to the lower of the aggregate net finance income of all UK group companies (above GBP500,000) and the total disallowed amount. It is possible to elect to not apply the GBP500,000 threshold mentioned above to avoid anomalies that could otherwise result.

**Controlled foreign companies.** The controlled foreign company (CFC) regime was significantly revised in 2012, effective for accounting periods beginning on or after 1 January 2013. The regime applies to non-UK resident companies that are controlled by UK residents. It also applies to non-UK branches of UK resident companies for which an exemption election has been made.

The regime is similar to the prior regime in that, if a CFC has profits that do not meet any of the exemptions, those profits are taxed on any UK resident companies having a 25% or more interest in the CFC. However, the new regime is much more focused on identifying artificial movements of profits out of the United Kingdom.

The new regime has an initial "gateway" test that eliminates certain companies from the scope of a CFC charge, and it is possible to seek a clearance from HMRC as to whether a particular company meets this gateway. The gateway test eliminates companies if any of the following four conditions is met:

- The CFC's purpose is not mainly to achieve a UK tax advantage.
- The management and control of the CFC's "risks and assets" is not carried out in the United Kingdom, other than through a UK permanent establishment of the CFC.
- The CFC can carry out its activities independently of the United Kingdom.
- The CFC has only property business and/or non-trading finance profits.

If none of these conditions are met, the more detailed provisions of the CFC regime need to be considered.

Profits arising from lending activities may be subject to a CFC charge if they derive from UK activity or capital investment from the United Kingdom. However, a full or partial exemption may be available for profits derived from lending to other CFCs within the group. The full exemption is available in limited circumstances if the loan is funded out of existing resources, but the partial exemption may be more widely available and can effectively exempt 75% of the profits from UK taxation. Both exemptions are subject to anti-avoidance restrictions.

Special rules apply to banks, financial traders and insurance companies.

Further exemptions apply if any of the following circumstances exist:

- The CFC's local tax liability is 75% or more of the equivalent UK liability.
- The CFC has low profits or a low profit margin.
- The CFC is resident in certain qualifying territories.
- A foreign company has become a CFC for the first time.

If the CFC does not qualify for any of the exemptions, a CFC charge arises to the extent that profits from any assets or risks of the CFC are attributable principally to Significant People Functions (SPFs) in the United Kingdom, based on the profit that would arise in a hypothetical UK permanent establishment containing those assets or risks. That profit itself is subject to further exclusions if any of the following circumstances exist:

- The CFC has business premises in its local territory, its business does not principally relate to the United Kingdom, and its profits from intellectual property (if any) are not significantly based on intellectual property transferred from the United Kingdom.
- Over 20% of the value to the group from holding that asset or risk in the CFC relates to a purpose other than the tax saving.
- The function performed by the UK SPF could have been performed by an independent party.

The new regime is complex, and the assistance of specialists is required to determine the extent to which profits arising outside the United Kingdom are subject to a charge in the United Kingdom under these rules.

**Patent Box.** The Patent Box regime was introduced in 2012, and is effective for accounting periods beginning on or after 1 April 2013. The regime taxes qualifying income relating to patents and certain other intellectual property at a rate of 10%, but this rate is being phased in over five years. The regime will be amended for new entrants from 30 June 2016 and for all taxpayers from 30 June 2021.

The Patent Box regime can apply to patents granted by UK and European patent offices and certain other patent offices in the European Economic Area, as well as to patent applications that cannot be published for reasons of national security or public safety. Other innovative intellectual property found in the medicinal, veterinary and agriculture industries is also included, such as regulatory data, marketing exclusivity, supplementary protection certificates and plant variety rights.

The 10% effective tax rate is achieved by creating an additional deduction from taxable profits and applies to all income arising from the patents, including royalties and income from the sale of the patent. Significantly, it also applies to income from the sale of products with embedded patents. Accordingly, for example, income from the sale of cars manufactured with a combination of patented and unpatented components can qualify in full. The Patent Box regime is therefore potentially of very wide application.

**Dual-resident companies.** A dual-resident company that is not a trading company loses the right to surrender its losses to fellow group members and is prevented from enjoying certain other

reliefs. These rules effectively prevent such dual-resident companies from obtaining a double deduction for interest costs in both countries of residence.

### Impact of decisions of the Court of Justice of the European Union.

The UK tax system is currently subject to significant external influence in the form of binding decisions rendered by the Court of Justice of the European Union (CJEU). These decisions have held that many UK domestic tax measures are contrary to European Fundamental Freedoms (for example, the decisions in *Marks & Spencer*, *Test Claimants in the Franked Investment Income Group Litigation*, *Cadbury Schweppes* and *Philips Electronics UK Limited*).

At this stage, it is impossible to reach a definitive conclusion on the ultimate impact of the CJEU decisions, because, among other reasons, the cases are likely to continue for years. A CJEU decision does not necessarily lead to law changes in the United Kingdom, but new UK legislation was enacted as a result of the *Marks & Spencer*, *Cadbury Schweppes* and *Philips Electronics* cases. Also, UK legislation has been amended following CJEU decisions that concern the tax system in another EU member state, when an equivalent tax provision exists in UK domestic law (for example, *National Grid Indus BV*). Because these cases and several other cases have held that some fundamental aspects of the domestic law in the United Kingdom or other EU member states are contrary to EU law, it is possible that CJEU decisions will lead to further changes in the UK tax system in the future.

**Devolution of tax powers.** Although certain tax-raising powers have been devolved to the Scottish Parliament and Welsh Assembly, power over corporation tax has not been devolved.

### F. Treaty withholding tax rates

The rates in the following table reflect the lower of the treaty rate and the rate under domestic tax law. The table is for general guidance only.

Residence of recipient	Payments by UK companies of		
	Dividends (a)	Interest (b) %	Royalties (b) %
Albania	(2)	0/6 (cc)	0

Non-treaty countries	- (e)	20	20

- (a) Under UK domestic law, withholding tax is not imposed on dividends. As explained in Section B, under existing law, a UK resident individual receiving a dividend obtains a tax credit of 1/9 of the dividend; this satisfies his or her basic rate income tax liability on the grossed up amount. The United Kingdom's double tax treaties fall into the following four general categories concerning dividends:
- (1) Treaties that give no tax credit to companies resident in the other state possessing more than a portfolio holding of the company paying the dividend (usually more than 10% of the voting power), but give a full credit to other shareholders resident in the other state, subject to a reduction based on the total of the dividend and the tax credit.
  - (2) Treaties that give no tax credit to residents of the other state.
  - (3) Treaties that give no tax credit to corporations, but give a full credit to other shareholders resident in the other state, subject to a reduction of 15% of the total of the dividend and the tax credit.
  - (4) Treaties that give the following to residents of the other state:
    - (i) A half tax credit to companies possessing 10% or more of the voting power of the company paying the dividend, subject to a reduction of 5% of the total of the dividend and credit.
    - (ii) A full credit to other shareholders, subject to a reduction of 15% of the total of the dividend and the tax credit. However, effective from 6 April 1999, the tax credit available to shareholders resident in the other state is eliminated. This results from the reduction of the tax credit available to UK shareholders to 1/9.
- (b) Under a European Union (EU) directive, payments of interest and royalties made between, broadly, associated companies resident in EU member states are exempt from withholding tax. Numerous conditions and transitional rules apply, including some that delay the application of the rules for several years.
- (c) Anti-avoidance provisions restrict the tax credit repayment or other treaty benefits in certain circumstances.
- (d) No withholding tax is imposed on royalties paid for copyrights of literary, dramatic, musical or artistic works (except motion pictures, films, videotapes and certain other items), payments for patents or commercial or industrial experience or payments for the use of computer software.
- (e) See Section B.
- (f) The lower rate applies to interest paid with respect to the following: loans from banks and insurance companies; securities quoted on a stock exchange; and certain sales of machinery and equipment.
- (g) The higher rate applies to cinematographic royalties.
- (h) The higher rate applies to industrial, commercial, scientific, technical and technological royalties, and royalties with respect to patents, trademarks, designs or models, plans, and secret formulas or processes.
- (i) The lower rate applies to payments for the use of, or right to use, industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (j) The lower rate applies to payments for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (k) The 5% rate applies to royalties for patents, trademarks or processes as well as to royalties for know-how concerning industrial, commercial or scientific experience. The 7% rate applies to royalties for copyrights of literary, artistic or scientific works.
- (l) The standard rate of withholding tax on interest is 12%. Interest is exempt from withholding tax if any of the following apply:
- The state is the payer of the interest.
  - The interest is paid on a loan made, guaranteed or insured by the other contracting state.
  - The interest is paid on a loan granted by a bank to an unrelated party at preferential rates and the loan is repayable over a period of not less than five years.
  - The interest is paid on a debt resulting from either of the following:
    - Sales on credit of industrial, commercial or scientific equipment by a resident of the other contracting state (excluding sales between related persons).
    - Purchases of industrial, commercial or scientific equipment financed through a leasing contract.
- (m) The 3% rate applies to royalties for the right to use news. The 5% rate applies to royalties for copyrights of artistic works. The 10% rate applies to royalties for patents or payments for industrial experience, including the rendering of technical assistance. The 15% rate applies to other royalties.
- (n) The lower rate applies to copyright royalties.

- (o) The lower rate (the 7% rate under the Mongolia treaty and the 10% rate under the India and Thailand treaties) applies to interest paid to banks and other financial institutions.
- (p) The higher rate applies if the recipient is a Malawi company that controls more than 50% of the voting power in the UK company that makes the payment.
- (q) The 10% rate applies to interest on listed bonds.
- (r) The higher rate applies to cinematographic, television and radio broadcasting royalties.
- (s) The applicability to Bosnia and Herzegovina of the treaty entered into with the former Yugoslavia is uncertain. The UK tax authorities request that claims for relief be examined by their Tax Treaty Team. The UK tax authorities consider the former Yugoslavia treaty to be applicable to Montenegro and Serbia. Croatia has committed to honoring the tax treaties of former Yugoslavia. New agreements have been entered into with Macedonia and Slovenia. Kosovo does not accept the application of the UK-Yugoslavia treaty.
- (t) The 5% rate applies to patent royalties and motion picture royalties.
- (u) In the United Kingdom, this treaty is generally effective from 6 April 2012, but for withholding tax purposes, it is effective from 1 January 2013.
- (v) The lower rate applies to the right to use industrial, commercial or scientific equipment.
- (w) The lower rate applies to copyright royalties. The higher treaty rate applies to all other royalties payable with respect to rights granted after the signing of the double tax treaty.
- (x) Detailed conditions apply, in particular to exclude from the treaty rate unquoted companies if less than 25% of their shares are held by residents of Bahrain.
- (y) A new treaty with Tajikistan was signed in July 2014 but is not yet in force. The previous treaty has been terminated.
- (z) The lower rate applies to interest on loans between enterprises (20% relationship required in the case of Slovenia), interest paid to a pension scheme (some treaties) or to a state or political subdivision.
- (aa) The lowest rate applies, depending on the treaty, to interest paid to a state or political subdivision or the central bank. Some treaties also apply this rate to interest guaranteed by or paid by the state.
- (bb) The lower rate applies if any of the following circumstances exists:
- The interest is paid to a state or political subdivision or the central bank.
  - The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of either country.
  - The interest is paid as a result of financing provided in connection with agreements concluded between the two governments.
  - The beneficial owner of the interest is a pension scheme.
- (cc) The 0% rate applies if any of the following circumstances exists:
- The recipient and beneficial owner of the interest is the other state or the central bank or a political subdivision or local authority thereof, a financial institution or a pension scheme.
  - The interest is paid by the state in which the interest arises or by a political subdivision, or local authority thereof, or the interest is paid with respect to a loan, debt claim or credit that is owed to or made, provided, guaranteed or insured by that state or a political subdivision, local authority or export financing agency thereof.
  - The interest is paid with respect to indebtedness arising as a result of the sale on credit of equipment, merchandise or services.

The United Kingdom has also entered into tax treaties with Algeria, Brazil, British Virgin Islands, Cameroon, Cayman Islands, Congo (Democratic Republic of), Iran and Lebanon. These treaties do not have articles covering dividends, interest or royalties. Payments to these countries are subject to withholding tax at the non-treaty countries' rates set forth in the above table.

The United Kingdom has new treaties, amendments or protocols to treaties with Algeria, Belgium, Canada, Croatia, Germany, Iceland, Tajikistan and Zambia.

**A. At a glance**

Corporate Income Tax Rate (%)	15 to 39 (a)
Corporate Capital Gains Tax Rate (%)	15 to 39
Branch Tax Rate (%)	15 to 39 (a)
Withholding Tax (%) (b)	
Dividends	30 (c)
Interest	30 (c)(d)
Royalties from Patents, Know-how, etc.	30 (c)
Branch Remittance Tax	30 (e)
Net Operating Losses (Years)	
Carryback	2 (f)
Carryforward	20 (f)

- (a) In addition, many states levy income or capital-based taxes. An alternative minimum tax is also imposed on corporations. See Section B.
- (b) Rates may be reduced by treaty.
- (c) Applicable to payments to non-US corporations and nonresidents.
- (d) Interest on certain "portfolio debt" obligations issued after 18 July 1984 and non-effectively connected bank deposit interest are exempt from withholding tax.
- (e) This is the branch profits tax applicable to non-US corporations (see Section D).
- (f) Special rules apply to certain types of losses and entities. For details, see Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** US corporations are subject to federal taxes on their worldwide income, including income of foreign branches (whether or not the profits are repatriated). In general, a US corporation is not taxed by the United States on the earnings of a foreign subsidiary until the subsidiary distributes dividends or is sold or liquidated. Numerous exceptions to this deferral concept may apply, resulting in current US taxation of some or all of a foreign subsidiary's earnings.

Foreign corporations generally are taxable in the United States on income that is effectively connected with a US trade or business and on certain US-source income. However, if the foreign corporation is resident in a country having an income tax treaty with the United States, business profits are taxable by the United States only to the extent the income is attributable to a permanent establishment in the United States and rates of tax on certain US-source income may be reduced or eliminated.

**Rates of corporate tax.** A corporation's taxable income not exceeding USD335,000 is taxed at marginal rates ranging from 15% to 39%. Corporations with taxable income between USD335,000 and USD10 million are effectively taxed at 34% on all taxable income. Corporations with taxable income exceeding USD10 million are taxed at 35%, with amounts exceeding USD15 million but not exceeding USD18,333,333 subject to an additional tax of 3%. As a result, corporations with taxable income in excess of USD18,333,333 are effectively subject to tax at a rate of 35% on all taxable income. These rates apply both to US corporations and to the income of foreign corporations that is effectively connected with a US trade or business.

**Alternative minimum tax.** The alternative minimum tax (AMT) is designed to prevent corporations with substantial economic income from using preferential deductions, exclusions and credits to substantially reduce or eliminate their tax liability. To achieve this goal, the AMT is structured as a separate tax system with its own allowable deductions and credit limitations. The tax is imposed on alternative minimum taxable income (AMTI), less a phased-out exemption amount, at a flat rate of 20%. It is an "alternative" tax because corporations are required to pay the higher of the regular tax or the AMT. To the extent the AMT exceeds regular tax, a minimum tax credit is generated and carried forward to offset the taxpayer's regular tax to the extent it exceeds the AMT in future years.

In general, AMTI is computed by making adjustments to regular taxable income and then adding back certain nondeductible tax preference items. The required adjustments are intended to convert preferential deductions allowed for regular tax (for example, accelerated depreciation) into less favorable alternative deductions that are allowable under the parallel AMT system. In addition, an adjustment based on "adjusted current earnings" can increase or decrease AMTI. Net operating losses may reduce AMT by up to 90% (subject to modifications; see Section C), compared to a potential reduction of 100% for regular tax purposes. Foreign tax credits may reduce AMT by up to 100%.

An AMT exemption applies to small business corporations that meet certain income requirements.

**Capital gains and losses.** A corporation's gains are taxed at the same rates as ordinary income. In general, capital losses may offset only capital gains, not ordinary income. Subject to certain restrictions, a corporation's excess capital loss may be carried back three years and forward five years to offset capital gains in such other years.

**Administration.** The annual tax return for domestic corporations is due by the 15th day of the third month after the close of the company's fiscal year. A corporation is entitled, upon request, to an automatic six-month extension to file its return. In general, 100% of a corporation's tax liability must be paid through quarterly estimated tax installments during the year in which the income is earned. The estimated tax payments are due on the 15th day of the 4th, 6th, 9th and 12th months of the company's fiscal year.

**Foreign tax relief.** A tax credit is allowed for foreign income taxes paid, or deemed paid, by US corporations, but the credit is generally limited to the amount of US tax incurred on the foreign-source portion of a company's worldwide taxable income. Separate limitations must be calculated for passive income and for "general" category income (most types of active business income).

### C. Determination of taxable income

**General.** Income for tax purposes is generally computed according to generally accepted accounting principles, as adjusted for certain statutory tax provisions. Consequently, taxable income typically does not equal income for financial reporting purposes.

In general, a deduction is permitted for ordinary and necessary trade or business expenses. However, expenditures that create an asset having a useful life longer than one year may need to be capitalized and recovered ratably.

**Depreciation.** A depreciation deduction is available for most property (except land) used in a trade or business or held for the production of income, such as rental property. Tangible depreciable property that is used in the United States (whether new or used) and placed in service after 1980 and before 1987 is generally depreciated on an accelerated basis (ACRS). Tangible depreciable property that is used in the United States and placed in service after 1986 is generally depreciated under a modified ACRS basis. In general, under the modified ACRS system, assets are grouped into six classes of personal property and into two classes of real property. Each class is assigned a recovery period and a depreciation method. The following are the depreciation methods and recovery periods for certain assets.

Asset	Depreciation method	Recovery period (years)
Commercial and industrial buildings	Straight-line	39 (a)
Office equipment	Double-declining balance or straight-line	7 or 12
Motor vehicles and computer equipment	Double-declining balance or straight-line	5 or 12
Plant and machinery	Double-declining balance or straight-line	7 or 12 (b)

(a) 31.5 years if placed in service before 13 May 1993.

(b) These are generally the recovery periods.

With respect to certain qualified property (for example, long-production-period property and certain aircraft placed in service before 1 January 2015), a first-year depreciation deduction equal to 50% of the property's adjusted basis may be taken. Instead of the above methods, a taxpayer may elect to use the straight-line method of depreciation over specified longer recovery periods or the methods prescribed for AMT purposes, which would avoid a depreciation adjustment for AMT.

The cost of intangible assets developed by a taxpayer may be amortized over the determinable useful life of an asset. Certain intangible assets, including goodwill, going concern value, patents and copyrights, may generally be amortized over 15 years if they are acquired as part of a business.

Tax depreciation is generally subject to recapture on the sale of a depreciated asset to the extent that the sales proceeds exceed the tax value after depreciation. The amounts recaptured are subject to tax as ordinary income.

**Net operating losses.** If allowable deductions of a US corporation or branch of a foreign corporation exceed its gross income, the excess is called a net operating loss (NOL). In general, NOLs may be carried back 2 years and forward 20 years to offset taxable income in those years. A specified liability loss (including a product liability loss) may be carried back 10 years. A real estate investment trust (REIT) may not carry back an NOL arising in a tax year in which the entity did not operate as a REIT. Farming business losses may be carried back five years. Limitations apply in utilizing NOLs of acquired operations.

**Inventories.** Inventory is generally valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most common inventory flow assumptions used are last-in, first-out (LIFO) and first-in, first-out (FIFO). The method chosen must be applied consistently. Uniform capitalization rules require the inclusion in inventory costs of many expenses previously deductible as period costs.

**Dividends.** In general, dividends received by a US corporation from other US corporations qualify for a 70% dividends-received deduction, subject to certain limitations. The dividends-received deduction is generally increased to 80% of the dividend if the recipient corporation owns at least 20% of the distributing corporation. Dividend payments between members of an affiliated group of US corporations qualify for a 100% dividends-received deduction. In general, an affiliated group consists of a US parent corporation and all other US corporations in which the parent owns, directly or indirectly through one or more chains, at least 80% of the total voting power and value of all classes of shares (excluding non-voting preferred shares).

**Consolidated returns.** An affiliated group of US corporations (as described in *Dividends*) may elect to determine its taxable income and tax liability on a consolidated basis. The consolidated return provisions generally allow electing corporations to report aggregate group income and deductions in accordance with the requirements for financial consolidations. Consequently, the net operating losses of some members of the group can be used to offset the taxable income of other members of the group, and transactions between group members, such as intercompany sales and dividends, are generally deferred or eliminated until there is a transaction outside the group. Under certain circumstances, losses incurred on the sale of consolidated subsidiaries are disallowed.

**Foreign subsidiaries.** Under certain circumstances, undistributed income of a foreign subsidiary controlled by US shareholders is taxed to the US shareholders on a current basis, as if the foreign subsidiary distributed a dividend on the last day of its taxable year.

This may result if the foreign subsidiary invests its earnings in “US property” (including loans to US shareholders) or earns certain types of income (referred to as “Subpart F” income), including certain passive income and “tainted” business income.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Branch profits tax, on branch profits (reduced by reinvested profits and increased by withdrawals of previously reinvested earnings); the rate may be reduced by treaty	30%
Branch interest tax, on interest expense paid by a branch (unless the interest would be exempt from withholding tax if paid by a US corporation); the rate may be reduced by treaty	30%
Personal holding company (PHC) tax, applies to a corporation that satisfies a passive-income test; in addition to regular tax or AMT; imposed on undistributed income	15%
Accumulated earnings tax; penalty tax levied on a corporation (excluding a PHC) accumulating profits to avoid shareholder-level personal income tax; assessed on accumulated taxable income exceeding a calculated amount (at least USD250,000 or USD150,000 for certain personal services corporations)	15%
State and local income taxes, imposed by most states and some local governments	Various
State and local sales taxes, imposed by many states and some local governments	Various
Payroll taxes	
Federal unemployment insurance (FUTA); imposed on first USD7,000 of wages	6.0% and 0.6% (assuming full credit of 5.4%)
Workmen’s compensation insurance; provisions vary according to state laws; rates vary depending on nature of employees’ activities	Various
Social security contributions (including 1.45% Medicare tax); imposed on	
Wages up to USD118,500 (for 2015); paid by Employer	7.65%
Employee	7.65%
Wages in excess of USD118,500 (for 2015; Medicare tax); paid by	
Employer	1.45%
Employee	1.45%
(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of USD200,000 for taxpayers who file as single or head of household. For married taxpayers filing jointly and surviving	

<b>Nature of tax</b>	<b>Rate</b>
spouses, the additional 0.9% Medicare tax applies to the couple's combined wages in excess of USD250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax.)	

## **E. Miscellaneous matters**

**Foreign-exchange controls.** The United States currently has no foreign-exchange control restrictions.

**Debt-to-equity rules.** The United States has thin-capitalization principles under which the Internal Revenue Service (IRS) may attempt to limit the deduction for interest expense if a US corporation is thinly capitalized. In such case, funds loaned to it by a related party may be recharacterized by the IRS as equity. As a result, the corporation's deduction for interest expense may be disallowed, and principal and interest payments may be considered distributions to the related party and be subject to withholding tax as distributions.

Although the United States has no fixed rules for determining whether a thin-capitalization situation exists, a facts and circumstances test may be applied based on US case law.

A deduction is disallowed for certain "disqualified" interest paid on loans made or guaranteed by related foreign parties that are not subject to US tax on the interest received. This disallowed interest may be carried forward to future years and allowed as a deduction. No interest deduction is disallowed under this provision if the payer corporation's debt-to-equity ratio does not exceed 1.5:1. If the debt-to-equity ratio exceeds this amount, the deduction of disqualified interest is deferred to the extent of any "excess interest expense." "Excess interest expense" is defined as the excess of interest expense over interest income, minus 50% of the adjusted taxable income of the corporation plus any "excess limitation carryforward." Special rules apply to corporate partners in partnerships for purposes of determining disallowances.

In addition, interest expense accrued on a loan from a related foreign lender must be actually paid before the US borrower can deduct the interest expense.

**Transfer pricing.** In general, the IRS may redetermine the tax liability of related parties if, in its discretion, this is necessary to prevent the evasion of taxes or to clearly reflect income. Specific regulations require that related taxpayers (including US persons and their foreign affiliates) deal among themselves on an arm's-length basis. Under the best-method rule included in the transfer-pricing regulations, the best transfer-pricing method is determined based on the facts and circumstances. Transfer-pricing methods that may be acceptable, depending on the circumstances, include uncontrolled price, resale price and profit-split. It is possible to reach transfer-pricing agreements in advance with the IRS.

If the IRS adjusts a taxpayer's tax liability, tax treaties between the United States and other countries usually provide procedures for allocation of adjustments between related parties in the two countries to avoid double tax.

**F. Treaty withholding tax rates**

The following are US withholding tax rates for dividends, interest and royalties paid from the United States to residents of various treaty countries.

	<b>Dividends</b>	<b>Interest</b>	<b>Patent and know-how royalties</b>
	%	%	%
Australia	0/5/15 (a)	0/10 (b)	5
Austria	5/15 (c)	0	0
Bangladesh	10/15 (c)	5/10 (d)	10
Barbados	5/15 (c)	5	5
Belgium	0/5/15 (a)	0	0
Bulgaria	5/10 (c)	5	5
Canada	5/15 (c)	0	0/10 (e)
China	10	10 (x)	10
Cyprus	5/15 (c)	10	0
Czech Republic	5/15 (c)	0	0/10 (f)

Venezuela	5/15 (c)	4.95/10 (t)	5/10 (kk)
Non-treaty countries	30	30 (w)	30

Various exceptions (for example, for governmental entities and REITs) or conditions may apply (for example, a limitation-on-benefits provision), depending upon the terms of the particular treaty.

- (a) The 0% rate applies if dividends are paid by an 80%-owned US corporation to its parent company (80% ownership must be for at least a 12-month period ending on the date the dividend is declared or the entitlement is determined) and if certain other conditions are met. The 5% rate applies to dividends paid to a company that directly owns at least 10% of the voting power (or share capital, if applicable) of the payer. The 15% rate applies to other dividends.
- (b) The 10% rate applies to all interest payments with the following exceptions:
  - Interest derived by the government of a contracting state
  - Interest derived by certain financial institutions
- (c) The withholding rate is reduced to 5% (10% in the case of Bangladesh, Indonesia, Jamaica, Korea (South), Morocco, Spain, Thailand and Trinidad and Tobago; 12.5% in the case of Israel; 14% in the case of Tunisia; 15% in the case of India, Pakistan and Turkey; and 20% in the case of the Philippines) if, among other conditions, the recipient is a corporation owning a specified percentage of the voting power of the distributing corporation.
- (d) The 5% rate applies to interest paid to banks or financial institutions and interest related to the sale on credit of industrial, commercial or scientific equipment or of merchandise.
- (e) The 0% rate applies to royalties for cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.
- (f) The 0% rate applies to royalties paid for copyrights. The 10% rate applies to royalties paid for patents, trademarks, and industrial, commercial or scientific equipment or information.
- (g) The 5% rate applies to royalties paid for the use of commercial, industrial or scientific equipment.
- (h) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works, cinematographic films, sound or picture recordings, or software.
- (i) The exemption does not apply if the recipient controls directly or indirectly more than 50% of the voting power in the paying corporation.
- (j) The United States and Hungary have signed a new income tax treaty, which will enter into force on the exchange of the instruments of ratification.
- (k) The treaty provides for a general exemption from withholding tax on royalties. A 5% withholding tax rate applies to royalties for trademarks and motion pictures.
- (l) The 10% rate applies to interest paid on loans granted by banks carrying on bona fide banking business and similar financial institutions.
- (m) The 10% rate generally applies to royalties for the use of industrial, commercial or scientific equipment.
- (n) The 10% rate applies to interest on bank loans. The 17.5% rate applies to other interest.
- (o) The 10% rate applies to copyright and film royalties.

- (p) The exemption applies to the following:
- Interest paid to qualified governmental entities, provided the entity owns, directly or indirectly, less than 25% of the payer of the interest
  - Interest paid with respect to debt guaranteed or insured by a qualified governmental entity
  - Interest paid or accrued with respect to the sale of goods, merchandise or services
  - Interest paid or accrued on a sale of industrial, commercial, or scientific equipment
- (q) The 0% rate applies to royalties paid for the use of certain copyright materials. The 5% rate applies to royalties paid for the use of computer software and industrial, commercial or scientific equipment. The 8% rate applies in all other cases.
- (r) The 10% rate applies to royalties paid for copyrights or rights to produce or reproduce literary, dramatic, musical, or artistic works and to royalties paid for motion picture films.
- (s) The rate is 0% for dividends paid by a company resident in Luxembourg if the beneficial owner of the dividends is a company that is a resident of the United States and if, during an uninterrupted period of two years preceding the date of payment of the dividends, the beneficial owner of the dividends has held directly at least 25% of the voting shares of the payer.
- (t) The 4.95% rate applies to interest paid on loans made by financial institutions and insurance companies. The 10% rate applies to other interest.
- (u) The 0% rate applies to the following dividends:
- Dividends paid to certain recipients that own at least 80% of the voting shares of the payer of the dividends
  - Dividends paid to certain pension plans
- The 5% rate applies if the conditions for the 0% rate are not met and if the recipient owns at least 10% of the payer of the dividends. The 10% rate applies if the 10% ownership threshold is not met. A protocol to the treaty provides an exemption from the 5% “dividend equivalent amount” tax if certain conditions are met (the conditions are similar to those that apply with respect to the 0% withholding tax rate on dividends).
- (v) The 4.9% rate applies to interest paid on loans (except back-to-back loans) made by banks and insurance companies and to interest paid on publicly traded securities. The 10% rate applies to interest paid by banks and to interest paid by sellers to finance purchases of machinery and equipment. The 15% rate applies to other interest.
- (w) Interest on certain “portfolio debt” obligations issued after 18 July 1984 and non-effectively connected bank deposit interest are exempt from withholding tax.
- (x) Interest paid to state-owned enterprises in China is exempt from withholding tax.
- (y) The general withholding tax rate for interest may be increased to 10% if both Norway and the United States tax interest paid to nonresidents under their domestic tax laws. Norway does not impose tax on interest paid to nonresidents and, consequently, a 0% rate applies to US-source interest under the treaty. The treaty also provides that a 0% rate applies to certain types of interest, such as interest paid on bank loans.
- (z) The 10% rate applies to interest derived by a resident of one of the contracting states from sources in the other contracting state with respect to public issuances of bonded indebtedness.
- (aa) The tax imposed by the source state may not exceed, in the case of the Philippines, the lowest of the following:
- 25%
  - 15% if the royalties are paid by a corporation registered with the Philippine Board of Investments and engaged in preferred areas of activities
  - The lowest rate of Philippine tax that may be imposed on royalties of the same kind paid under similar circumstances to a resident of a third state
- (bb) The United States and Poland signed a new income tax treaty on 13 February 2013 to replace the 1974 treaty. As of 31 December 2014, the proposed treaty had yet not received US Senate advice and consent to ratification.
- (cc) A reduced rate may apply if the beneficial owner of the dividend is a Portuguese company that owns at least 25% of the capital of the dividend-paying company.
- (dd) On 24 January 2013, the United States and Japan signed a new income tax protocol that would amend the existing treaty between the countries. As of 31 December 2014, the proposed protocol had not yet received US Senate advice and consent to ratification.

- (ee) The lower rate applies to cultural royalties, which are defined as payments for the right to use copyrights of literary, artistic or scientific works, including cinematographic films.
- (ff) The 5% rate applies to royalties paid for copyrights of musical compositions or literary, dramatic or artistic works. The 8% rate applies to royalties paid for the following:
- Motion picture films, and films, tapes and other means of transmission or reproduction of sounds
  - Industrial, commercial or scientific equipment
  - Copyrights of scientific works
- (gg) The 5% rate applies to rent paid for the use of tangible movable property.
- (hh) The 10% rate applies to interest on loans granted by financial institutions. The 15% rate applies to other interest.
- (ii) On 14 January 2013, the United States and Spain signed a new income tax protocol that would amend the current 1990 treaty and protocol. As of 31 December 2014, the proposed protocol had not yet received US Senate advice and consent to ratification.
- (jj) The 10% rate applies to the following:
- Royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment
  - Remuneration for the performance of accessory technical assistance with respect to the use of the property or rights described above, to the extent that such technical assistance is performed in the contracting state where the payment for the property or right has its source
- The 15% rate applies to royalties or other amounts paid for the following:
- The use of, or right to use, copyrights of literary, artistic and scientific works, including cinematographic and television films and videotapes used in television broadcasts
  - Patents, trademarks, designs and models, plans, and secret formulas and processes
  - Information relating to industrial, commercial or scientific experience
- (kk) The 5% rate applies to payments for the right to use industrial, commercial or scientific equipment. The 10% rate generally applies to other royalties.
- (ll) The US Department of Treasury has announced that the income tax treaty between the United States and the USSR, which was signed on 20 June 1973, continues to apply to the former republics of the USSR, including Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan, until the United States enters into tax treaties with these countries. The United States has entered into tax treaties with Estonia, Kazakhstan, Latvia, Lithuania, the Russian Federation and Ukraine. The withholding tax rates under these treaties are listed in the above table.
- (mm) The 0% rate applies if the dividends are paid by US companies to UK companies that owned 80% or more of the voting shares of the payer of the dividends for a 12-month period preceding the declaration of the dividends and if either of the following additional conditions is met:
- The 80% test was met before 1 October 1998.
  - The recipient is a qualified resident under certain prongs of the limitation-on-benefits provision in the treaty.
- The 0% rate also applies to US-source dividend payments made to UK pension schemes. The 5% rate applies if the beneficial owner of the dividends is a company owning 10% or more of the payer. For other dividends, the 15% rate applies.
- (nn) Withholding tax may be imposed at the full domestic rate on interest paid in certain circumstances.

The United States and Chile signed their first income tax treaty in February 2010. It includes a general limitation-on-benefits provision and reductions in withholding rates. As of 31 December 2014, the proposed treaty had not yet received US Senate advice and consent to ratification.

## US Virgin Islands

[ey.com/GlobalTaxGuides](http://ey.com/GlobalTaxGuides)  
[ey.com/TaxGuidesApp](http://ey.com/TaxGuidesApp)

Please direct all inquiries regarding the US Virgin Islands to Teresita Fuentes (office telephone: +1 (787) 772-7066; mobile telephone: +1 (787) 671-6468; fax: +1 (787) 753-0813; email: [teresita.fuentes@ey.com](mailto:teresita.fuentes@ey.com)) of the San Juan, Puerto Rico, office.

### A. At a glance

Corporate Income Tax Rate (%)	38.5 (a)
Capital Gains Tax Rate (%)	38.5 (a)
Branch Tax Rate (%)	38.5 (a)
Withholding Tax (%) (b)	
Dividends	11 (c)
Interest	11 (c)
Royalties from Patents, Know-how, etc.	11 (c)
Branch Remittance Tax	11 (c)(d)
Net Operating Losses (Years) (e)	
Carryback	2
Carryforward	20

- (a) This is the maximum rate. The rate includes a 10% surcharge.  
 (b) The statutory rate for each withholding tax is 10%. The US Virgin Islands Bureau of Internal Revenue has taken the position that the 10% surcharge also applies to each withholding tax, and consequently the withholding rate is 11%.  
 (c) Under certain circumstances, these taxes may not apply to US corporations doing business in the US Virgin Islands.  
 (d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn (see Section B).  
 (e) These periods apply to losses incurred in tax years beginning after 5 August 1997. A three-year carryback period is available in certain circumstances. Small businesses may elect to carry back net operating losses incurred in 2008 for up to the five preceding years.

### B. Taxes on corporate income and gains

**Corporate income tax.** The system of corporate income taxation in force in the US Virgin Islands is generally a mirror image of the US Internal Revenue Code (IRC). The applicable law is the IRC with “US Virgin Islands” substituted for all references to the “United States.” Significant differences between US and US Virgin Islands taxation are discussed below.

US Virgin Islands corporations are subject to income tax on their worldwide income. A foreign corporation, which is a corporation organized outside the US Virgin Islands, is subject to income tax only on its income from US Virgin Islands sources and on its income that is effectively connected with the conduct of a trade or business in the US Virgin Islands.

Under Section 937(b) of the IRC, rules similar to those for determining US-source income or income effectively connected with the conduct of a trade or business in the United States must be used to determine if income is from sources within the US Virgin Islands or effectively connected with the conduct of a trade or business within the US Virgin Islands.

**Rates of corporate income tax.** Corporations are taxed at the rates specified in the IRC, except that the US Virgin Islands imposes an additional 10% surcharge on the tax liability of all domestic and foreign corporations. This increases the maximum effective income tax rate to 38.5%.

US Virgin Islands corporations may benefit from the tax exemptions and reductions indicated below.

*Economic development program.* Qualifying corporations are exempt from income tax on up to 90% of their income. In addition, they are exempt from real property, gross receipts and certain excise taxes. Other reductions in various taxes may apply.

*Exempt companies.* Qualifying corporations that are foreign-owned and do not carry on a trade or business in the United States or in the US Virgin Islands may elect a 20-year exemption from substantially all US Virgin Islands taxes.

*Development of renewable and alternative energy-generation sources.* Individuals and businesses that install a new solar water heating system, wind energy system, photovoltaic energy system or other renewable energy system may claim a rebate from the Virgin Islands Energy Office. In addition, the new legislation provides that equipment or component parts brought into the US Virgin Islands for the purpose of manufacturing solar water heaters or wind or solar energy systems are exempt from the payment of custom duties and excise taxes. Also, revenues derived from the installation or construction of a renewable or alternative energy electric power or production plant or device are exempt from the gross receipts tax.

**Alternative minimum tax.** The alternative minimum tax rules in the US Virgin Islands are the same as those in the United States.

**Branch profits tax and branch interest tax.** The branch profits tax (BPT) and branch interest tax (BIT) rules in the US Virgin Islands are similar to those in the United States, except that the BPT and BIT rates are 11% (including the 10% surcharge) instead of 30%. Under certain circumstances, these taxes may not apply to US corporations doing business in the US Virgin Islands.

**Capital gains and losses.** The provisions applicable to capital gains and losses in the US Virgin Islands are the same as those in the United States.

**Administration.** The annual income tax return is due by the fifteenth day of the third month after the close of the company's fiscal year. On request, a corporation receives an automatic three-month extension to file its return. In general, 100% of a corporation's tax liability must be paid through estimated tax installments during the year in which the income is earned.

Domestic and foreign corporations file their returns with the Bureau of Internal Revenue (BIR).

**Foreign tax relief.** The provisions related to foreign tax credits are similar to those in the United States.

**Foreign Investment in Real Property Tax Act.** The Foreign Investment in Real Property Tax Act (FIRPTA) applies to corporations owning real property interests in the US Virgin Islands. Under

this act, a foreign corporation (including a US corporation) pays tax attributable to its gain from the sale of US Virgin Islands property to the US Virgin Islands treasury.

### C. Determination of trading income

**General.** The rules for determining trading income are the same as those in the United States.

**Groups of companies.** A US Virgin Islands corporation may not file a consolidated income tax return with a related US tax entity. However, a group of US Virgin Islands corporations may file a consolidated return with the BIR if they meet the requirements set by the IRC provisions for consolidated returns.

### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Gross receipts tax, on total business receipts	4
Excise tax, on imported goods, merchandise and commodities for sale or for processing in the US Virgin Islands unless exempt by law; tax is computed on invoice value plus a 5% mark-up	2 to 35
Real property tax; imposed on the assessed value of the property as determined by the tax assessor	
Unimproved non-commercial property	0.49
Residential property	0.38
Commercial property	0.71
Timeshares	1.4
Franchise tax, imposed annually on capital stock of domestic and foreign corporations qualified to do business in the US Virgin Islands; minimum tax is USD150	0.15
Stamp tax, on transfer of real or personal property located in the US Virgin Islands	2 to 3.5
Payroll taxes	
Federal unemployment insurance (FUTA), imposed on first USD7,000 of wages	6
US Virgin Islands unemployment insurance (creditable against FUTA; each employer must pay USD25 annually per employee for interest accrued on the Virgin Islands Federal Trust Fund Loan)	5.4
Workmen's compensation insurance, varies depending on classification of employee's activities	Various
Social security contributions; subject to the same limitations as in the United States; imposed on	
Wages up to USD118,500 (for 2015); paid by	
Employer	7.65
Employee	7.65
Wages in excess of USD118,500 (for 2015); paid by	
Employer	1.45

<b>Nature of tax</b>	<b>Rate (%)</b>
Employee (subject to an additional 0.9% of Medicare tax for wages in excess of USD200,000; no employer matching contribution for Medicare Tax)	1.45
Insurance premium tax, on gross premiums received by insurers for insurance policies covering risks in the US Virgin Islands; certain exceptions apply	5

### **E. Miscellaneous matters**

**Foreign-exchange controls.** The US Virgin Islands has not enacted any specific foreign-exchange controls, but US laws concerning cash transaction reporting and other financial matters are applicable.

**Debt-to-equity rules.** The US Virgin Islands debt-to-equity rules are the same as those in the United States.

### **F. Treaty withholding tax rates**

The US Virgin Islands does not have tax treaties with foreign governments.

## A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	7 (a)(b)
Interest	12 (a)(b)
Royalties	12 (a)(b)
Equipment Rent	12 (a)(b)
Technical Assistance Payments and Service Fees	12 (a)(b)
Branch Remittance Tax	7 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) Applicable to nonresidents and resident individuals. Nonresident corporations are corporations not incorporated in Uruguay.  
(b) See Section B.

## B. Taxes on corporate income and gains

**Corporate income tax.** Corporations are taxed on Uruguay-source income, defined as income derived from activities performed, property situated or economic rights used in Uruguay. Any profits, including capital gains, are taxable.

**Rate of corporate tax.** The corporate tax rate is 25%.

**Capital gains.** Capital gains are included in ordinary income and taxed at the regular corporate rate.

**Administration.** Corporations are required to make monthly advance payments. These payments are calculated by applying to monthly gross income a fraction with a numerator equal to income tax for the prior tax year and a denominator equal to the corporation's gross income for that year. For the months of the current year prior to filing the income tax return, however, the income tax and gross income used are from the corresponding months of the

prior year. Filing of tax returns and payment of the balance must be made by the fourth month after the end of the accounting period, which is the company's tax year-end.

**Dividends and branch remittances.** Dividends paid to resident companies are exempt from tax. Dividends paid to resident individuals are subject to personal income tax at a rate of 7% if the dividends are paid out of income subject to corporate income tax. Dividends paid to nonresident companies and individuals and branch remittances are subject to withholding tax at a rate of 7% if they are paid out of income subject to corporate income tax. Dividends and branch remittances paid out of income not subject to corporate income tax are exempt from tax. Dividends subject to withholding tax cannot exceed the taxable profit of the company.

**Withholding tax on certain payments to nonresidents.** In general, a 12% withholding tax is imposed on the following payments to nonresidents:

- Interest
- Royalties
- Technical assistance payments
- Service fees
- Equipment rent

### C. Determination of trading income

**General.** Tax is imposed on taxable profit, which is accounting profit earned in the accounting period after tax adjustments. An inflation adjustment is applied. All Uruguay-source income is taxable. Expenses are deductible to the extent that they are incurred in producing or maintaining taxable income, are documented, and are accrued in the fiscal year.

In general, payments to nonresidents are fully deductible as expenses if the effective income tax rate of the country of the recipient is 25% or higher (to be proved through a specific certificate). If the effective tax rate of the country of the recipient is lower than 25%, only a percentage of the expenses is deductible. The percentage equals the ratio of the nonresident withholding tax rate of 12% plus the effective income tax rate of the country of the nonresident to the corporate income tax rate of 25% in Uruguay. If the nonresident withholding tax of 12% applies, the minimum percentage of deduction is 48% (the ratio of the withholding tax rate of 12% to the corporate income tax rate of 25%).

**Inventories.** Stock is valued according to cost of purchases or production costs. Last-in, first-out (LIFO), first-in, first-out (FIFO), average cost and market price are acceptable methods. The corporation can choose which method to use, but may not change the method without prior authorization.

**Provisions.** Only deductions for expenses already incurred are allowed. Provisions for bad debts and severance pay are not allowed. Bad debts may be written off if the debtor goes bankrupt or if 18 months have elapsed since the obligation to pay the debt became due.

**Depreciation.** A depreciation deduction may be taken on tangible assets based on their useful lives using the straight-line method. The following are some of the applicable rates.

Asset	Rate (%)
Commercial and industrial buildings	2/3 (a)
Motor vehicles	10
Office equipment	10 (b)
Machinery and equipment	10 (b)

- (a) The 2% rate applies to buildings in urban areas; the 3% rate applies to buildings in rural areas.
- (b) This is the usual rate. The rate for a particular asset depends on its estimated useful life.

For some assets, the units-of-production method may be used. Goodwill may not be depreciated.

**Relief for losses.** The general rule is that losses may be carried forward for five years and deducted from income without limit. No carryback is possible.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the sale of products and most services and on imported goods	
Standard rate	22
Rate on basic foodstuffs and pharmaceuticals	10
Net worth tax, on corporate net worth, computed using values used for tax purposes; up to 50% of this tax may be credited against corporate income tax (the current discount is 1%)	
Banks and credit card corporations	2.8
Others	1.5
Social security contributions, on salaries and wages; imposed on	
Salaries and wages up to approximately USD4,500; paid by	
Employer; standard rate	12.625
Employee	18.125 to 23.125
Salaries and wages exceeding approximately USD4,500; paid by	
Employer	5.125
Employee	3.125 to 8.125
(The salary threshold for social security contributions is updated in February of each year.)	

#### E. Miscellaneous matters

**Foreign-exchange controls.** Uruguay does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited. Nonresidents may repatriate capital, together with accrued capital gains and retained earnings, subject to applicable withholding taxes and company law considerations (for example, the requirement that companies transfer a portion of their annual income to a reserve).

Import and export operations are transacted at a free rate determined by the market.

**Debt-to-equity rules.** No specific debt-to-equity rules apply in Uruguay.

## F. Treaty withholding tax rates

The maximum withholding tax rates under Uruguay's double tax treaties are set forth below.

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Ecuador	10/15	15	10/15
Finland	5/15	10	5/10
Germany (a)	5/15	0/10	10
Hungary	15	15	15
India	5	0/10	10
Korea (South)	5/15	10	10
Liechtenstein	5/10	10	10
Malta	5/15	10	5/10
Mexico	5	10	10
Portugal	5/10	10	10
Spain	0/5	0/10	5/10
Switzerland	5/15	0/10	10
Non-treaty countries	7 (b)	12	12 (b)

(a) These are the rates under a renegotiated treaty between Germany and Uruguay.

(b) See Section B.

## A. At a glance

Corporate Profits Tax Rate (%)	7.5 (a)
Capital Gains Tax Rate (%)	7.5 (a)
Permanent Establishment Tax Rate (%)	7.5 (a)
Branch Profits Tax Rate (Additional Tax) (%)	10 (b)
Withholding Tax (%) (c)	
Dividends	10 (d)
Interest	10 (d)
Royalties, Service Fees and Capital Gains	20 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (f)

- (a) This is the general corporate profits tax rate. For commercial banks, the rate is 15%.
- (b) This tax is imposed on the net profits of permanent establishments after deduction of the profits tax.
- (c) The withholding taxes are generally considered to be final taxes.
- (d) The withholding tax is imposed on payments to Uzbek companies and individuals and to foreign companies without a permanent establishment in Uzbekistan.
- (e) The withholding tax is imposed on payments to foreign companies without a permanent establishment in Uzbekistan.
- (f) See Section C.

## B. Taxes on corporate income and gains

**Corporate profits tax.** Most enterprises in Uzbekistan, including Uzbek companies with foreign participation, are subject to the general profits tax regime. Small businesses and retail and wholesale trading companies are subject to different regimes. Foreign companies that are deemed by the tax authorities to have a permanent establishment (PE) in Uzbekistan are taxable on profits derived from business activities of the PE in Uzbekistan (the taxable profits of a PE should not be less than 10% of deductions). The definition of a PE in Uzbek legislation is somewhat similar to the definition of a PE in the model treaty of the Organisation

for Economic Co-operation and Development (OECD), with certain exceptions. However, the legislation regarding the taxation and treatment of PEs in Uzbekistan is undeveloped.

**Rates of corporate tax.** The regular corporate profits tax rate is 7.5%. This rate also applies to Uzbek enterprises with foreign participation and to PEs of foreign companies. For commercial banks, the profits tax rate is 15%.

PEs are also subject to a 10% tax on their net profits after deduction of the corporate profits tax.

Foreign legal entities without a PE in Uzbekistan are subject to withholding tax on income derived from their activities in Uzbekistan. The following are the withholding tax rates.

Nature of payment	Rate (%)
Dividends and interest	10
International communication and freight fees	6
Insurance premiums	10
Royalties, capital gains, rent and service fees not connected with an Uzbek PE	20

**Capital gains.** Capital gains are generally included in taxable profits and are subject to tax at the regular corporate tax rate. Capital losses are generally deductible only if they are incurred on fixed assets used in production for at least three years. Capital gains derived by nonresidents from disposals of shares in Uzbek resident legal entities or real estate located in Uzbekistan are subject to withholding tax at the general rate of 20%.

**Administration.** The tax year is the calendar year.

Tax declarations must be filed quarterly by the 25th day of the month following the reporting quarter and annually by 15 February of the year following the tax year. Companies must file financial statements together with the tax declarations. Companies with foreign participation and PEs of foreign companies must file the annual declaration by 25 March.

The final tax liability must be paid by the deadline for filing the tax declarations. Quarterly estimates of the tax payable must be made by the 10th day of the 1st month of the quarter. Tax installment payments based on the estimates are required to be made by the 10th day of each month. Companies generating profits of less than 200 minimum monthly wages per reporting quarter (approximately USD10,000) are subject to profits tax based on actual quarterly profits and are not required to pay installments of profits tax.

On written request, excess payments of tax must be refunded within a 30-day period or be offset against other tax liabilities. In practice, it is difficult to obtain refunds of overpayments of tax.

**Dividends.** Dividends, including those paid to domestic enterprises, are subject to a withholding tax at a rate of 10%. Dividends received by a legal entity and reinvested into the charter capital of the payer of the dividends are exempt from tax (unless withdrawn or liquidated within a year after the exemption).

**Foreign tax relief.** Under the double tax treaties of Uzbekistan, a foreign tax credit is available for foreign tax paid on income earned abroad (subject to certain documentary requirements).

### C. Determination of trading income

**General.** Taxable profits are equal to the annual net profits disclosed in the company's Uzbek financial statements, as adjusted by the tax law. Financial statements must be prepared on an accrual basis and be supported by documentation. The following are the most significant items that are not deductible for tax purposes:

- Nonbusiness expenses
- Entertainment, business travel and voluntary insurance expenses in excess of (low) statutory limits
- Interest on overdue and deferred loans (in excess of normal loan interest rate)
- Losses resulting from misappropriations of funds or assets
- Audit expenses, if an annual audit was conducted more than once for the same period
- Certain benefits to employees
- Charitable donations
- Litigation expenses
- Penalties

**Special deductions.** Taxable profits may be reduced by certain special deductions, including the following:

- Amounts reinvested in main production in the form of new construction and reconstruction of buildings and facilities used for production needs and new technological equipment (less current depreciation) over a certain time period, subject to other conditions, up to 30% of taxable profits
- Charitable donations of up to 2% of taxable profits

**Provisions.** Banks may deduct loan loss provisions within the limits established by the Central Bank of the Republic of Uzbekistan.

**Tax depreciation.** The following are the applicable depreciation rates in Uzbekistan.

<b>Assets</b>	<b>Rate (%)</b>
Buildings and structures	5
Trains, ships, airplanes, pipelines, communication equipment and electric power lines and equipment	8
Production machinery and equipment	15
Cars, computers and office equipment	20
Perennial plants	10
All other assets	15

Intangible assets are amortized for tax purposes over the useful life of an asset, the life of the company or five years (if useful life cannot be determined), whichever is less.

**Relief for losses.** Tax losses can be carried forward for five years. However, the amount of losses carried forward that may be deducted each year is subject to a limit of 50% of taxable profits for the year. Losses incurred during a profits tax exemption period cannot be carried forward.

**Groups of companies.** The tax law does not allow the offsetting of profits and losses among members of a tax group.

**D. Other significant taxes**

The following table summarizes other significant taxes.

<b>Nature of tax</b>	<b>Rate</b>
Value-added tax (VAT), on the supply of all goods and services, including imports, unless they are zero-rated or exempt	20%
Excise tax; imposed on an extensive number of specified goods produced in Uzbekistan or imported into Uzbekistan; goods subject to tax include oil and gas products, alcohol, tobacco, confectionery products, electronics, furniture and cars	Various
Property tax; imposed on the annual average depreciated value of tangible fixed assets and certain other assets; land is exempt	4%
Infrastructure development tax; imposed on net (after-tax) profits	8%
Subsurface use tax; imposed on the extraction of natural resources; tax imposed on the sales price of extracted natural resources and components and on waste derived from the extraction or processing of natural resources	
Sales	2.6% to 30%
Waste	0.78% to 9%
Excess profits tax; imposed on the difference between the actual net sales price and the established threshold price for certain natural resources and products	Various
Tax on signing and commercial discovery bonuses for subsurface users	Various
Road Use Fund contribution; imposed on sales turnover, excluding VAT and excise tax, and on purchases of motor vehicles	
General rate on turnover	1.4%
Purchases of cars	Various (minimum rate of 3% for new cars produced in the Russian Federation, Ukraine and Uzbekistan and minimum rate of 6% for other cars)
Purchases of other vehicles	Various (minimum rate of 20%)
Water use tax; rates per cubic meter	
Surface water	UZS61.9 (approximately USD0.0256)
Underground water	UZS78.6 (approximately USD0.0325)
Land tax; imposed at a fixed rate per hectare, which varies depending on the location, quality and purpose of the land plot; rate in Zone 1 of Tashkent	UZS86,250,000 (approximately USD35,605)

Nature of tax	Rate
Education and Healthcare Development contribution; imposed on sales turnover, excluding VAT and excise tax	0.5%
Social fund contributions	
Pension Fund; paid by	
Employers; imposed on sales, excluding VAT and excise tax	1.6%
Employees (withheld from salaries of local employees)	7%
Unified Social Payment; payable by employers	
On the total payroll of small businesses	15%
On the total payroll of all other entities	25%
Contributions to individual accumulative pension accounts of citizens (maintained at Peoples Bank); payable by employers on salaries of local employees; amounts of the contributions are deducted from the amounts of accrued individual income tax	1%

### E. Foreign-exchange controls

The currency in Uzbekistan is the Uzbek soum (UZS).

Uzbekistan imposes various foreign-exchange controls, including the following:

- Restrictions on purchases of foreign currencies, which are subject to the availability of foreign currencies in authorized banks
- Mandatory sales of 50% of foreign-currency revenues of companies to their servicing banks (with some exceptions)
- Mandatory exchange rates set weekly by the Central Bank of the Republic of Uzbekistan for accounting, reporting, tax and customs duty calculations
- Strict control over payments in foreign currencies to parties outside Uzbekistan
- Limitations on the circulation of foreign currencies in Uzbekistan, and limitations on the domestic foreign currencies markets

Uzbek resident individuals may freely export up to the equivalent of USD2,000 of foreign currency. Nonresident individuals may export any cash legally imported and supported by a customs declaration. These limits may be increased by amounts withdrawn from foreign-currency accounts in Uzbekistan if proper documentation is provided.

### F. Treaty withholding tax rates

The following table lists the withholding rates under Uzbekistan's tax treaties.

Payee resident in	Dividends (I)	Interest (I)	Royalties
	%	%	%
Austria	5/15 (a)	10	5
Azerbaijan	10	10	10
Bahrain	8	8	8
Belarus	15 (I)	10	15
Belgium	5/15 (a)	10	5
Bulgaria	10	10	10
Canada	5/15 (a)	10	5/10 (e)
China	10	10	10
Czech Republic	5/10 (b)	5	10

Payee resident in	Dividends (I) %	Interest (I) %	Royalties %
Estonia	5/10 (b)	5	10
Finland	5/15 (a)	5	0/5/10 (f)
France	5/10 (a)	0/5 (d)	0
Georgia	5/15 (b)	10	10
Germany	5/15 (b)	5	3/5 (g)
Greece	8	10	8
Hungary	10	10	10
India	10	10	10
Indonesia	10	10	10
Iran	8	10	5
Ireland	5/10 (a)	5	5

Italy	10	5	5
Japan (k)	15 (l)	10	0/10 (i)
Jordan	7/10 (b)	10	20
Kazakhstan	10	10	10
Korea (South)	5/15 (b)	5	2/5 (j)
Kuwait	5/10 (b)	8	20
Kyrgyzstan	5	5	15
Latvia	10	10	10
Lithuania	10	10	10
Luxembourg	5/15 (b)	10	5
Malaysia	10	10	10
Moldova	5/15 (a)	10	15
Netherlands	5/15 (b)	10	10
Oman	7	7	10
Pakistan	10	10	15
Poland	5/15 (c)	10	10
Romania	10	10	10
Russian Federation	10	10	0
Saudi Arabia	7	7	10
Singapore	5	5	8
Slovak Republic	10	10	10
Switzerland	5/15 (c)	0/5 (d)	5
Thailand	10	10/15 (l)	15
Turkey	10	10	10
Turkmenistan	10	10	10
Ukraine	10	10	10
United Arab Emirates	5/15 (b)	10	10
United Kingdom	5/10 (a)	5	5
Vietnam	15 (l)	10	15
Non-treaty countries	10	10	20

- (a) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the payer of the dividends.
- (b) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the payer of the dividends.
- (c) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 20% of the payer of the dividends.
- (d) The 0% rate applies to interest with respect to the following:
- Loans made, guaranteed or insured by the government of the other contracting state or an instrumentality or agency thereof
  - Sales on credit of industrial, commercial or scientific equipment
  - Sales on credit of merchandise between enterprises
  - Bank loans
- (e) The 5% rate applies to royalties paid for certain cultural works (with exceptions) as well as for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (know-how), with exceptions.

- 
- (f) The 0% rate applies to royalties for the use of, or the right to use, computer software, patents, designs or models, or plans. The 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties paid for trademarks or certain cultural works.
  - (g) The 3% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, patents, trademarks, designs or models, plans, or secret formulas or processes, as well as for the disclosure of industrial, commercial, or scientific knowledge. The 5% rate applies to royalties paid for certain cultural works.
  - (h) The 5% rate applies to royalties paid for certain cultural works (with exceptions).
  - (i) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including motion picture films.
  - (j) The 2% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment.
  - (k) These are the withholding tax rates under the USSR-Japan treaty, which is honored by Uzbekistan.
  - (l) The domestic withholding tax rate for dividends and interest in Uzbekistan is 10%. Consequently, the withholding tax rate of 15% for dividends and interest under treaties does not apply to payments made by Uzbek companies.

- (a) This is the maximum progressive rate, which applies to income exceeding 3,000 tax units. Effective from 19 February 2014, the value of a tax unit is VEF127. For further details, see Section B. Petroleum companies and income from petroleum-related activities are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.
- (b) For details, see Section B.
- (c) The withholding tax applies to payments over VEF10,583.33. The tax is imposed on the payment minus VEF317.5.
- (d) This withholding tax applies to payments over VEF25.
- (e) For interest associated with a loan invested in an income-generating activity, the withholding tax is imposed on 95% of the gross payment. Consequently, the effective withholding tax rate is 32.3% (95% x 34%). For other cases, the tax base is the gross interest payment.
- (f) In general, the withholding tax rate is determined under Tariff No. 2 (see Section B), which provides for a maximum tax rate of 34%. It is applied to 95% of the gross interest payment associated with a loan invested in an income-generating activity. For other cases, the tax base is the gross interest payment. Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to withholding tax at a flat rate of 4.95%.
- (g) The law does not explicitly set forth any withholdings for royalties paid to residents. However, in practice, it is possible that the Tax Administration could consider the operation to be a provision of services and, accordingly, a 1% or 2% rate of withholding tax would apply.

- (h) Royalties paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts.
- (i) Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the effective withholding tax rate is 30.6% (90% x 34%).
- (j) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because royalties paid to nonresidents are taxed on a deemed profit element (see footnote (h) above), the maximum effective withholding tax rate is 30.6% (90% x 34%).
- (k) Professional fees paid to nonresidents are taxed on a deemed profit element, which is 90% of gross receipts. Consequently, the effective withholding tax rate is 30.6% (90% x 34%).
- (l) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%.
- (m) Payments to nonresidents for technical assistance are taxed on a deemed profit element, which is 30% of gross receipts.
- (n) Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the effective withholding tax rate is 10.2% (30% x 34%).
- (o) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technical assistance are taxed on a deemed profit element (see footnote (m) above), the maximum effective withholding tax rate is 10.2% (30% x 34%).
- (p) Payments to nonresidents for technological services are generally taxed on a deemed profit element, which is 50% of gross receipts.
- (q) Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (p) above), the effective withholding tax rate is 17% (50% x 34%).
- (r) The withholding tax rate is determined under Tariff No. 2, which provides for a maximum tax rate of 34%. Because payments to nonresidents for technological services are taxed on a deemed profit element (see footnote (o) above), the maximum effective withholding tax rate is 17% (50% x 34%).
- (s) This tax applies to transfers of shares of corporations domiciled in Venezuela that are not traded on national stock exchanges. The withholding tax rates are applied to the sale price.

**B. Taxes on corporate income and gains**

**Corporate income tax.** Companies domiciled in Venezuela are subject to income tax on their net annual income from Venezuelan and foreign sources. Companies organized in Venezuela are deemed to be domiciled in Venezuela. In addition, Venezuelan permanent establishments of foreign companies are also considered to be domiciled in Venezuela. However, only income attributable to a permanent establishment is taxable in Venezuela.

**Rates of corporate income tax.** Domestic corporations and branches of foreign corporations are subject to the corporate income tax rates of Tariff No. 2, which are progressive and are expressed in tax units. Effective from 19 February 2014, the value of a tax unit is VEF127. The Venezuelan Budget Law may change the value of the tax unit each year. The following are the corporate income tax rates provided in Tariff No. 2.

Taxable income		Rate %
Exceeding tax units	Not exceeding tax units	
0	2,000	15
2,000	3,000	22
3,000	—	34

Net income arising from mining and related activities is taxed under Tariff No. 2. Petroleum companies and income from petroleum-related activities, such as transportation and exploitation, are taxed at a rate of 50%. Mining royalties and transfers of such royalties are subject to tax at a rate of 60%.

Interest paid to foreign financial institutions that are not domiciled in Venezuela is subject to a 4.95% withholding tax.

**Capital gains.** Capital gains are not taxed separately, but are taxable as business profits. For the computation of gains from sales of shares, the tax basis is zero if such shares had been received as a result of a dividend paid with new shares of the payer of the dividend.

**Administration.** Companies must file an annual income tax return, self-assess and pay any resulting balance of tax due, within three months after the end of their fiscal year.

Companies must make estimated tax payments during their fiscal year.

**Dividends.** Dividends paid by Venezuelan companies and profits remitted by permanent establishments of foreign companies to the countries of their home offices are taxable to the extent that “net income” exceeds its “net taxable income.” For this purpose, “net income” is the financial income approved by the shareholders’ meeting based on the financial statements, and “net taxable income” is the resulting income subject to tax after the tax reconciliation. The tax reconciliation is the procedure for determining the income tax liability. However, the tax does not apply to remittances paid by permanent establishments of foreign companies if the permanent establishment can prove that the excess amount is reinvested in Venezuela for at least five years.

The tax is withheld at source. The applicable rate depends on the business of the payer of the dividends. For dividends paid by hydrocarbon or mining companies subject to the 50% or 60% rates of corporate income tax (see *Rates of corporate income tax*), the dividend tax rate is the corporate tax rate applicable to the company. For dividends paid by other companies, the dividend tax rate is 34%.

**Foreign tax relief.** A credit is granted for income taxes paid on foreign-source income, up to the amount of Venezuelan tax payable on such income.

### **C. Determination of trading income**

**General.** Corporate tax is based on the annual net taxable accounting profits calculated in accordance with generally accepted accounting principles, subject to certain adjustments for non-taxable income and nondeductible expenses defined by law.

To determine the net taxable income, deductions are subtracted from gross income. In general, most expenses, including cost of production, are deductible, provided that they are normal and necessary for the earning of the income.

Under reconciliation rules, the determination of the Venezuelan and foreign-source income is made separately (two baskets). The reconciliation rules include detailed measures for the allocation of allowances and deductions to the two baskets.

**Inventories.** Inventories may be valued using any method in accordance with generally accepted accounting principles. The method chosen must be applied consistently. Because of tax indexation (see *Tax indexation*), inventory is effectively valued using the last-in, first-out (LIFO) method, adjusted for inflation.

**Tax indexation.** Companies must apply an annual inflation adjustment. A company carries out this adjustment by adjusting its non-monetary assets, some of its non-monetary liabilities and its equity to reflect the change in the consumer price index from the preceding year. These adjustments affect the calculation of depreciation and cost of goods sold. The net effect of these adjustments is recorded in an inflation adjustment account and is added to taxable income or allowed as a deduction.

Effective for tax years beginning after 22 October 1999, the tax indexation rules apply only to the reconciliation of Venezuelan-source income. Therefore, foreign-source non-monetary assets and liabilities are not subject to tax indexation.

**Provisions.** Provisions for inventory obsolescence and accounts receivable are not deductible; amounts are deductible only when inventories or accounts receivable are effectively written off.

**Depreciation.** In general, acceptable depreciation methods are the straight-line and the units-of-production methods. The declining-balance method and accelerated depreciation are not accepted. Venezuelan law does not specify depreciation rates. If the estimated useful life of an asset is reasonable, the depreciation is accepted. Estimated useful lives ranging from 3 to 10 years are commonly used.

**Relief for tax losses.** Operating losses may be carried forward for three years. No carryback is permitted.

Losses in the foreign-source basket (see *General*) may not offset Venezuelan-source income. Such foreign-source losses may be carried forward three years to offset foreign-source income only.

Losses attributable to tax indexation may be carried forward one year.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), imposed on goods and services, including imports; the National Executive may exonerate from tax acquisitions of goods and services; the law provides an indexation system for input VAT during the preoperational period for enterprises engaged in certain industrial activities; input VAT generated during the preoperational phase of industrial projects intended primarily for export is refunded	12
Municipal tax; business activity tax, usually based on gross receipts or sales; rate varies depending on the industrial or commercial activity and the municipal jurisdiction	0.5 to 10
Social security contributions, on monthly salary of each employee, up to five minimum salaries; paid by	
Employer	11/12/13
Employee	4

Nature of tax	Rate (%)
National Institute of Cooperative Education; contributions required if employer has five or more employees; paid by	
Employer, on total employee remuneration	2
Employee, on profit share received, if any, from employer at year-end	0.5
Housing policy contributions, on the integral salary (any remuneration, benefit or advantage received by an employee in consideration for services rendered, provided it can be evaluated in terms of cash value) of each employee; paid by	
Employer	2
Employee	1
Unemployment and training contributions, on the monthly salary of each employee, up to five minimum salaries; paid by	
Employer	2
Employee	0.5

## E. Miscellaneous matters

**Foreign-exchange controls.** Under the foreign-exchange control system in Venezuela, the purchase and sale of currency in Venezuela is centralized by the Central Bank of Venezuela. This limits foreign-currency trade in Venezuela and other transactions.

**Debt-to-equity rules.** For fiscal years beginning on or after 16 February 2007, a new law disallows deductions to companies for interest payments to related parties domiciled abroad if the average of the companies' debts (owed to related and unrelated parties) exceeds the average amount of their fiscal equity for the respective fiscal year.

**Transfer pricing.** Under transfer-pricing rules, cross-border income and expense allocations in transactions with related parties are subject to analysis and special filings. The rules contain a list of related parties and provide a list of acceptable transfer-pricing methods.

**Controlled foreign corporations.** Under controlled foreign corporation (CFC) rules, income derived by a CFC (as defined) domiciled in a low income tax jurisdiction is taxable to its Venezuelan shareholders. The tax authorities have issued a list of low income tax jurisdictions.

## F. Treaty withholding tax rates

	Dividends %	Interest (a) %	Royalties %

- (a) Under Venezuelan domestic law, a reduced withholding tax rate of 4.95% applies to interest paid to financial institutions not domiciled in Venezuela.
- (b) The 5% rate applies to dividends paid to a parent company that owns at least 25% of the capital of the payer of the dividends. Under the Denmark and Sweden treaties, to benefit from the 5% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).
- (c) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 15% of the capital of the payer of the dividends. Under the treaties with Austria, Czech Republic and Iran, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 15% of the capital of the payer of the dividends. The higher rate applies to other dividends (portfolio dividends).
- (d) The 5% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends. Under the treaties with China, Korea and Norway, to benefit from the 5% rate, the beneficial owner of the dividends must have direct control of at least 10% of the capital of the payer of the dividends. The higher rate applies to other dividends.
- (e) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 5% of the capital of the payer of the dividends. The higher rate applies to other dividends.
- (f) The 0% rate applies to dividends paid to certain recipients who own at least 25% of the voting shares of the payer of the dividends. Under the treaty with Switzerland, to benefit from the 0% rate, the recipient of the dividends must have direct control of at least 25% of the voting shares of the payer of the dividends. The higher rate applies to other dividends.
- (g) The 0% rate applies if the beneficial owner of the dividends is a company that directly controls at least 10% of the capital of the payer of the dividends. The 10% applies to other dividends.
- (h) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends. Under the treaty with Cuba, to benefit from the 10% rate, the beneficial owner of the dividends must have direct control of at least 25% of the capital of the payer of the dividends. The 15% rate applies to other dividends.

- (i) The 10% rate applies if the beneficiary of the dividends is a company that owns at least 10% of the capital of the payer of the dividends and if it has an investment in the payer of at least USD100,000. The 15% rate applies to other dividends.
- (j) The 10% rate applies if the beneficiary of the dividends is a company that controls at least 20% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
- (k) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the payer of the dividends. The 15% rate applies if the beneficiary of the dividends is a resident of Venezuela that receives from a company resident in France dividends that would give rise to a tax credit (*avoir fiscal*). For dividends received by a resident of France, the recipient has a right to a payment from the French Treasury in an amount equal to the *avoir fiscal*. The 5% rate applies in all other cases.
- (l) The 10% rate applies if the beneficiary of the dividends is a company that controls directly at least 10% of the voting power of the distributing company. The 15% rate applies to other dividends.
- (m) The 4.95% rate applies to interest paid to banks. The 10% rate applies to other interest payments.
- (n) The 4.95% rate applies to interest paid to financial institutions. The 10% rate applies to other interest payments.
- (o) The 5% rate applies to interest paid to banks. The higher rate applies to other interest payments.
- (p) The 0% rate applies to interest paid to the Eximbank, Federal Reserve Bank, Private Investment Corporation, Foreign Trade Bank, Central Bank of Venezuela and Venezuelan Investment Fund. The 4.95% rate applies to interest paid to financial institutions or insurance companies. The 10% rate applies to other interest payments.
- (q) The 4.95% rate applies to interest paid to banks or insurance companies. The 10% rate applies if the beneficial owner of the interest is not one of the entities mentioned in the preceding sentence and if either of the following additional conditions is satisfied:
- The interest is paid by banks.
  - The interest is paid on bonds or other credit securities that are traded regularly and substantially on a recognized securities market.
- The 15% rate applies to other interest payments.
- (r) The following interest payments are exempt:
- Interest paid to the government of the other contracting state, or a local authority or central bank of such state
  - Interest paid for the sale on credit of industrial, commercial or scientific equipment
  - Interest on bank loans
- The 5% rate applies to other interest payments.
- (s) The 10% rate also applies to technical assistance fees.
- (t) The 15% rate applies to royalties related to copyrights, trademarks, know-how, literary, artistic or scientific works, or films. A protocol to the treaty provides that payments for technical assistance services are treated as royalties and are therefore also subject to the 15% rate.
- (u) The 5% rate applies to the following:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)
  - Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons
- The 10% rate applies to other royalties.
- (v) The 12% rate also applies to technical assistance fees.
- (w) The 5% rate applies to technical assistance fees resulting from the rendering of technical, managerial or consultancy services if such services make available technical knowledge, experience, skills, know-how or processes. The 10% rate applies to the following royalties:
- Royalties paid as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, patents, trademarks, designs or models, plans, and secret formulas or processes
  - Royalties for information concerning industrial, commercial or scientific experience
- (x) The 10% rate applies to payments for technical assistance. The 20% rate applies to royalties.
- (y) This rate applies to royalties and to amounts paid for technical assistance services.

- (z) The 7% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films, or works on film, videotape or other means of reproduction for use in connection with television broadcasting); and royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including royalties paid in connection with rental or franchise agreements) if the payer and the beneficial owner of the royalties are not related persons. The 10% rate applies to other royalties.
- (aa) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to other royalties.
- (bb) The 0% rate applies to royalties paid for technical services, scientific, geological or technical studies, engineering works, consulting or supervision services, if the recipient does not have a permanent establishment. The 5% rate applies to royalties paid for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for the following:
- Patents, designs or models, plans, or secret formulas or processes
  - Industrial, commercial or scientific know-how
  - Trademarks
  - Copyrights with respect to literature, arts or sciences, motion pictures, or movies and tapes for radio or television broadcasting
- (cc) The 5% rate applies to payments for the following:
- Patents, designs or models, plans, or secret formulas or processes
  - The use of, or the right to use, industrial, commercial, or scientific equipment
  - Information concerning industrial, commercial or scientific experience
- The 7% rate applies to amounts paid for trademarks or trade names. The 10% rate applies to amounts paid for copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting.
- (dd) The lower rate applies to payments for technical assistance. The 12% rate applies to royalties.
- (ee) The 10% rate applies to technical assistance fees, which are all payments in consideration for the rendering of technical, managerial or consultancy services, if such services make available technical knowledge, experience, skills, know-how or processes. The 15% rate applies to royalties.
- (ff) The 10% rate applies to royalties related to literary, artistic or scientific works, or films. The 7% rate applies to other royalties.
- (gg) This is the general rate. Certain special rules apply.
- (hh) The 5% rate applies to royalties for patents, trademarks, designs or models, plans, or secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 7% rate applies to royalties for copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for radio or television broadcasting.
- (ii) For details, see Section B.
- (jj) See Section A.
- (kk) This treaty has been signed, but it has not yet been ratified and is not yet in force.
- (ll) The 4.95% rate applies to interest paid to financial institutions. The 5% rate applies to other interest payments.
- (mm) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of scientific works, software and trademarks, and to payments for the use of, or the right to use, equipment and transportation vehicles. The 10% rate applies to other royalties.
- (nn) The 4.95% rate applies to interest paid to banks. The 15% rate applies to other interest payments.
- (oo) The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, cinematographic films, patents, trademarks, designs or models, plans, or secret formulas or processes, and to payments for the use of, or the right to use, industrial, commercial, or scientific equipment or for information (know-how) concerning industrial, commercial or scientific experience. It also applies to gains derived from the alienation of such rights or property to the extent that such gains are contingent on the productivity, use or disposition of such property.
- (pp) The 4.95% rate applies to interest paid to banks. The 5% rate applies to other interest payments.

Venezuela has signed other tax treaties that cover only air and maritime transportation.

Branch Tax Rate (%)	22
Withholding Tax (%)	
Dividends	0
Interest	5
Royalties	10
Branch Remittance Tax	0

**Net Operating Losses (Years)**

Carryback	0
Carryforward	5 (c)

- (a) The standard corporate income tax rate will be reduced to 20%, effective from 1 January 2016, unless tax incentives apply. Petroleum companies and mining companies exploiting rare precious natural resources are subject to tax at a rate ranging from 32% to 50%. For details, see Section B.
- (b) Gains derived from sales of fixed assets are treated as taxable profits and are subject to tax at the normal corporate income tax rate. Gains derived from sales of capital or shares in an entity are subject to tax at a rate of 22% (the tax rate will be reduced to 20%, effective from 1 January 2016). Transfers of securities by foreign investors are subject to presumptive tax of 0.1% on total sales proceeds, regardless of whether the transfer is profitable. For details, see Section B.
- (c) See Section C.

**B. Taxes on corporate income and gains**

**Corporate income tax.** The following types of enterprises are subject to corporate income tax:

- Enterprises established under the Law on Enterprises, the Law on Investment, the Law on Credit Organisations, the Law on Insurance Business, the Law on Securities, the Law on Oil and Gas, the Trade Law and other legal entities including joint stock companies, limited liability companies, partnerships, private businesses, law offices, private public notary offices, parties to business cooperation contracts, parties to oil and gas product sharing contracts, and joint operation companies
- Public and non-public organizations engaged in business
- Organizations established under the Law on Cooperatives
- Businesses established under foreign laws that have a permanent establishment in Vietnam
- Other organizations conducting production and business activities that generate taxable income

**Rates of corporate income tax.** The current standard corporate income tax rate is 22% (20% from 2016), unless tax incentives apply.

The rate of corporate income tax ranges from 32% to 50% for the exploration and exploitation of oil and gas and the exploitation of rare precious natural resources by mining companies. The rate varies according to the specific project and the aspects of business development (exploitation of rare precious natural resources).

**Tax incentives**

*Incentive tax rates.* Preferential tax rates of 10% or 20% (reduced to 17%, effective from 1 January 2016) may be available to eligible foreign investment projects in industries or locations that are encouraged by the government.

A 10% rate for the 15-year period beginning with the first year of revenue may be available for the following:

- Income from new investment projects in areas with especially difficult socioeconomic conditions, and in economic zones and high-technology zones
- Income from new investment projects that are engaged in scientific research and technological development, application of high technologies in the list of prioritized high technologies provided by the Law on High Technology, cultivation of high

technologies, cultivation of high-technology enterprises, high-risk investment in the development of high technologies in the list of prioritized high technologies provided by the Law on High Technology, investment in crucial infrastructure of the state, software production, production of composite materials, light building materials, rare materials, renewable energy, clean energy and energy from waste destruction, development of biological technology or environmental protection

- Income of high-technology enterprises and agricultural enterprises that apply high technologies according to the Law on High Technology
- Income from new investment projects that make products supportive of the high-technology industry in line with the Law on High Technology or products supportive of certain industries, including textile and garment, footwear, electronics, information technology, automobile assembly and mechanics, and that are not domestically produced as of 1 January 2015 or meet the quality standard of the European Union or an equivalent standard
- Income from new investment projects in the production sector (except for projects producing goods subject to special sales tax and mineral exploitation projects) that have investment capital of at least VND6 trillion, if the capital is disbursed within three years from the date of the investment certificate and if either of the following conditions is satisfied:
  - The project's total revenue reaches VND10 trillion per year within three years from the first year of revenue.
  - The project employs more than 3,000 employees.
- Large-scale manufacturing projects (excluding projects manufacturing products subject to special sales tax or exploiting mineral resources) if all of the following conditions are satisfied:
  - The investment capital must be at least VND12 trillion.
  - The technology used must be certified in accordance with the Law on High Technology and the Law on Science and Technology.
  - The capital disbursement must be made within five years of the licensing date.

A 10% rate applies for the entire period of operation for enterprises in the sectors of education and training, occupational training, health care, culture, sports, environment, social housing, forestry, agriculture, fishing, salt production and publishing. However, this incentive is subject to detailed conditions provided separately by the prime minister.

A 20% rate for the 10-year period beginning with the first year of revenue may apply to the following:

- Income from new investment projects based in areas with difficult socioeconomic conditions
- Income from new investment projects that are engaged in the production of high-qualified steel or energy-saving products, the manufacturing of machinery and equipment serving agriculture, forestry, aquaculture, salt production, production of irrigation equipment, the production of foodstuff for cattle and the development of traditional trades

A 20% rate for the entire operational period applies to people's credit funds and micro financial institutions established under Vietnamese laws on credit institutions.

Income from mining activities of enterprises established and licensed to carry out mining activities from 1 January 2009 is not eligible for corporate income tax incentives. This does not retroactively affect any incentives granted to such enterprises established before 1 January 2009.

If, within an assessment period, an enterprise has both incentivized activities and normal activities, it must conduct a separate accounting for income from each activity to declare and pay tax separately. Otherwise, taxable income must be prorated according to the ratio of revenue or deductible expenses of each activity to the total revenue or deductible expenses.

Income and losses from incentivized activities and normal activities (except for transfers of mineral exploratory, mining and processing rights) may be netted against each other before the tax rate of the activity with the highest amount of income is applied.

Tax incentives previously granted as a result of the export ratio are repealed, effective from 1 January 2012. Affected taxpayers can adopt either tax incentives for the remaining incentive period based on the prevailing regulations effective at the time they were licensed or those effective from 31 December 2011. Taxpayers are required to notify the tax authorities regarding the tax incentive option selected.

*Tax exemptions and tax reductions.* The following are exempt from corporate income tax for a maximum period of four years and benefit from a 50% reduction of the amount of corporate income tax payable for a maximum period of nine subsequent years:

- Income from new investment projects in areas with especially difficult socioeconomic conditions and in economic zones and high-technology zones
- Income from new investment projects that are engaged in scientific research and technological development, application of high technologies in the list of prioritized high technologies provided by the Law on High Technology, cultivation of high technologies, cultivation of high-technology enterprises, high-risk investment in the development of high technologies in the list of prioritized high technologies provided by the Law on High Technology, investment in crucial infrastructure of the state, software production, production of composite materials, light building materials, rare materials, renewable energy, clean energy and energy from waste destruction, development of biological technology, and environmental protection
- Income of high-technology enterprises and agricultural enterprises that apply high technologies according to the Law on High Technology
- Income from new investment projects that make products supportive of the high-technology industry in line with the Law on High Technology or products supportive of certain industries, including textile and garment, footwear, electronics, information technology, automobile assembly and mechanics, and that are not domestically produced as of 1 January 2015 or meet the quality standard of the European Union or an equivalent standard
- Income from new investment projects in the production sector (except for projects producing goods subject to special sales tax and mineral exploitation projects) that have investment capital

of at least VND6 trillion, if the capital is disbursed within three years from the date of the investment certificate and if either of the following conditions is satisfied:

- The project's total revenue reaches VND10 trillion per year within three years from the first year of revenue.
- The project employs more than 3,000 employees.
- Large-scale manufacturing projects (excluding projects manufacturing products subject to special sales tax or exploiting mineral resources) if all of the following conditions are satisfied:
  - The investment capital must be at least VND12 trillion.
  - The technology used must be certified in accordance with the Law on High Technology and the Law on Science and Technology.
  - The capital disbursement must be made within five years of the licensing date.
- Newly established enterprises operating in the sectors of education and training, occupational training, health care, culture, sports or the environment

The following are exempt from corporate income tax for a period of two years and benefit from a 50% reduction of the amount of corporate income tax payable for a maximum period of four subsequent years:

- Income from new investment projects based in industrial zones (except for industrial zones located in big urban areas with favorable socioeconomic conditions)
- Income from new investment projects in areas with difficult socioeconomic conditions
- Income from new investment projects that are engaged in the production of high-qualified steel and energy-saving products, the manufacturing of machinery and equipment serving agriculture, forestry, aquaculture, salt production, production of irrigation equipment, foodstuff for cattle and the development of traditional trades

The duration of the tax exemption and reduction described above is calculated from the first year in which the enterprise has taxable income. If an enterprise does not have taxable income in the first three years in which it has turnover, the period for the tax exemption and reduction is calculated from the fourth year.

The tax incentive for investment expansion has been revived, subject to certain conditions. Under this incentive, enterprises currently operating in the areas and business sectors subject to tax incentives that expand their investment projects may choose one of the following preferential tax methods:

- Tax incentives provided to currently operating projects for the remaining period (if any).
- Tax exemption or reduction on any incremental income. The duration of the exemption or reduction equals the duration of the tax exemption or reduction for new investment projects in the same tax-incentive geographical areas and business sectors.

**Capital gains.** Gains derived from sales of shares or assignments of capital in enterprises are subject to tax at a rate of 22% (the tax rate will be reduced to 20%, effective from 1 January 2016). The taxable income equals the transfer price less the sum of the purchase price of the transferred capital and expenses incurred with respect to the transfer.

Foreign investors transferring securities (for example, shares of public companies) are subject to presumptive tax at a rate of 0.1% on total sale proceeds, regardless of whether the transfer is profitable.

**Administration.** Enterprises normally use the calendar year as their tax year. Enterprises that have their own particular characteristics of operational organization may choose a financial year of 12 months according to the Gregorian calendar and they must notify the local authorities of such year.

Enterprises must pay their quarterly income tax due within 30 days after the last day of the quarter. Enterprises must file a final income tax return and pay any balance of income tax due within 90 days after the end of the tax year.

A fraudulent return or a return filed with the intent to avoid tax is subject to a penalty of up to three times the amount involved. An under declaration is subject to only a late-payment fine if it is self-corrected by the taxpayer. Otherwise, a penalty of 20% of the under-declared tax is imposed. Late payments of tax are subject to interest at a rate of 0.05% of the unpaid amount per day if the payment is overdue for 90 days or less and at a rate of 0.07%, as of 1 January 2015.

**Dividends.** Dividends and branch remittances are not subject to withholding tax.

**Withholding taxes on interest and royalties.** The rate of withholding tax on interest paid under loan contracts is 5%, effective from 1 March 2012.

A withholding tax at a rate of 10% is imposed on royalties paid to foreign legal entities with respect to technology transfers and licensing.

**Foreign tax relief.** Vietnam has signed tax treaties with several countries that provide relief from double taxation (see Section F).

### C. Determination of taxable income

**General.** The taxable income of an enterprise is the income shown in the financial statements, subject to certain adjustments. Taxable income includes income derived by branch operations from business and other activities.

An enterprise may deduct expenses if the following conditions are satisfied:

- The expenses are actually incurred and related to the production and business activities of the enterprise.
- The expenses are accompanied by complete invoices and source vouchers as required by law.
- Expenses of VND20 million or more must be supported with cashless payments (for example, bank transfers and payments with cards).

Certain expenses are not deductible in determining taxable income, including the following:

- Provisions that do not conform to the regulations of the Ministry of Finance.

- Accrued expenses not corresponding to taxable turnover that has been recognized.
- The compensated value of damaged goods resulting from expiration or biochemical processes.
- Bonuses and life insurance expenses for employees that are not clearly stated in the labor contracts, the collective labor contracts, the financial regulations of the company or the reward regulations promulgated by the chairman of the board of management.
- Interest payments on loans corresponding to equity that is not contributed.
- Interest payments on loans borrowed from lenders that are not credit institutions or economic organizations that exceed 150% of the basic interest rate quoted by the State Bank of Vietnam at the time of the loan agreement.
- Expenses sourced from other funding and expenses paid from the Science and Technology Development Fund of the enterprise.
- The portion of expenses that are permitted to be recovered and that exceed the ratio provided in an approved petroleum contract. If a petroleum contract does not provide the recoverable expenses ratio, the ratio is deemed to equal 35%.
- The portion of business management expenses allocated by a foreign company to its resident establishment in Vietnam (for example, head office charges allocated to the Vietnam branch) that exceeds the level allowed under the regulations.
- Input value-added tax (VAT) that has been credited or refunded, input VAT on the value of a car of nine seats or less that exceeds VND1,600,000,000, corporate income tax (except for the corporate income tax that a Vietnamese company pays on behalf of a foreign contractor under a net contract) and personal income tax (unless the employer pays net salary to employees).
- Expenses that do not correspond to taxable revenue.
- Exchange-rate loss as a result of the revaluation of the year-end balance of money items in foreign currencies, except for the revaluation of payables in foreign currencies.
- Exchange-rate loss arising in the process of capital construction of fixed assets, which is governed by a separate regulation of the Ministry of Finance.

**Inventories.** Inventory valuation should be consistent with the accounting principles and standards selected by the company and approved by the MOF. No specific guidelines have been established by the tax authorities.

**Tax depreciation.** Depreciation of fixed assets is normally computed using the straight-line method. The MOF has issued guidelines setting forth the minimum and maximum years for depreciation of various assets, but companies may apply to the MOF for permission to use different time periods. The following are the minimum and maximum years of depreciation for certain categories of assets.

<b>Asset</b>	<b>Years</b>
Intangible assets	Up to 20
Buildings and factories	5 to 50
Tools and machinery	3 to 20
Transportation vehicles	6 to 30
Other fixed assets	2 to 40

Depreciation at rates exceeding those allowed by the MOF is not deductible for tax purposes. For cars with nine seats or less purchased by enterprises for business other than passenger transportation, hotel or tourism, the depreciable amount is capped at VND1,600,000,000.

**Relief for losses.** Enterprises that incur losses may carry forward the losses to the following five years and claim such losses as deductions from taxable income. Losses must be wholly carried forward to consecutive years (including the year of a tax holiday).

Enterprises that incur losses from real-property transfers may carry forward the losses to offset income from all of their activities.

Carrybacks of losses are not allowed.

**Groups of companies.** Dependent production establishments of a company operating in different areas of Vietnam must declare and pay tax with the local tax authorities where the dependent establishments' offices are located based on the ratio of the expenses of the dependent establishment to the total expenses of the company. The offsetting of losses and profits between parents and subsidiaries is not allowed.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on all goods and services consumed in and imported into Vietnam, including goods and services subject to special consumption tax, except for non-taxable items	
General rate	10%
Exports of goods and services	0
Certain goods and services, such as water supply, agricultural goods, medical goods and teaching aids	5%
Special consumption tax; imposed on imported or domestically produced cigarettes, beer, spirits, motor vehicles, fuel and air conditioners, and various services including casinos, betting, golf courses and various places of entertainment	10% to 70%
Social insurance, health insurance and unemployment insurance contributions, on salaries (generally applicable to Vietnamese employees only); paid by Employer	
Social insurance; the contribution is based on the salary and other allowances of the employees as provided in the labor contract but not exceeding 20 times the minimum salary	18%
(The rate of 18% consists of a 3% contribution to the maternity and illness fund, a 1% contribution to the labor and professional accident fund and a 14% contribution to the pension and death fund.	

Nature of tax	Rate
Health insurance; calculated on the same base as social insurance	3%
Unemployment insurance	1%
Employee	
Social insurance	8%
Health insurance	1.5%
Unemployment insurance	1%
Foreign contractor tax; rate depends on type of business activity	1% to 10%
Land rent (land-use tax); imposed annually for the use of land; tax base is calculated by multiplying the amount of square meters of the land by land price rates, which vary by location; the higher land price rates apply to land in Hanoi, Ho Chi Minh City and other urban locations	Various
Non-agricultural land use tax; taxable objects include residential land in all areas and land used for business purposes, except for certain cases	
Residential land	0.03% to 0.15%
Non-agricultural land used for business purposes	0.03%
Land not used in accordance with granted purposes	0.15%
Environmental Tax; taxable objects consist of petroleum, oil, lubricants, black coal, hydrochlorofluorocarbon (HCFC) solutions, taxable plastic bags, herbicide termite insecticides, forest products protective agents and warehouse insecticides	
Petroleum, oil, and lubricants	VND300 to VND4,000 per liter/kilogram
Black coal	VND10,000 to VND50,000 per ton
HCFC solution	VND1,000 to 5,000 per kilogram
Taxable plastic bags	VND30,000 to VND50,000 per kilogram
Herbicide (restricted use category)	VND500 to VND2,000 per kilogram
Termite insecticide (restricted use category)	VND1,000 to VND3,000 per kilogram
Forest products protective agents (restricted use category)	VND1,000 to VND3,000 per kilogram
Warehouse insecticides (restricted use category)	VND1,000 to VND3,000 per kilogram
Natural Resources Tax (NRT); payable by industries exploiting Vietnam's natural resources; taxable objects include metallic minerals, nonmetallic minerals, products of natural forests, natural marine products, natural mineral water, other natural resources and petroleum; tax base for NRT calculation includes the output of royalty-liable	

Nature of tax	Rate
natural resources, royalty-liable price of a unit of natural resource and royalty rate	
Metallic minerals	10% to 18%
Nonmetallic minerals	3% to 22%
Products of natural forests	5% to 35%
Natural marine products	2% to 10%
Natural mineral water and natural water	1% to 8%
Other natural resources	10% to 20%
Crude oil	
Encouraged investment projects	7% to 23%
Other projects	10% to 29%
Natural gas and coal gas	
Encouraged investment projects	1% to 6%
Other projects	2% to 10%

## E. Miscellaneous matters

**Foreign-exchange controls.** Enterprises with foreign-owned capital must open accounts denominated in a foreign currency or the Vietnamese dong (VND) at a bank located in Vietnam and approved by the State Bank of Vietnam (SBV). All foreign-exchange transactions, such as payments or overseas remittances, must be in accordance with policies set by the SBV.

Enterprises with foreign-owned capital and foreign parties may purchase foreign exchange from a commercial bank to meet the requirements of current transactions or other permitted transactions, subject to the bank having available foreign exchange.

The government may guarantee foreign currency to especially important investment projects or assure the availability of foreign currency to investors in infrastructure facilities and other important projects.

**Transfer pricing.** The Vietnamese tax authorities may recalculate the purchase or sales price to reflect the domestic or foreign market price. The methods permissible under the regulation closely resemble the methods provided for by the Organisation for Economic Co-operation and Development guidelines. The following are the permissible methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transaction net margin method

A declaration of related-party transactions must be filed together with the final corporate income tax return within 90 days after the year-end. A contemporaneous transfer pricing documentation report must be prepared and maintained on an annual basis and submitted to the tax authorities within 30 working days of a written request.

The amended Law on Tax Administration provides for the application of Advance Pricing Agreements (APAs), effective from July 2013. An APA is an agreement between the Vietnam tax authority, tax authorities in other jurisdictions (for bilateral and multilateral APAs) and the taxpayer with respect to the pricing or margin in transactions between associated enterprises.

**F. Treaty withholding tax rates**

The withholding rates under Vietnam's double tax treaties are listed in the following table.

	<b>Dividends</b> %	<b>Interest</b> %	<b>Royalties</b> %
Australia	10	10	10
Austria	5/10/15 (a)	10	10
Bangladesh	5	5	5
Belarus	15	10	15
Belgium	5/10/15 (a)	10	15
Brunei Darussalam	10	10	10
Bulgaria	15	10	15
Canada	5/10/15 (a)	10	7.5/10
China	10	10	10
Cuba	5/10/15 (a)	10	10
Czech Republic	10	10	10
Denmark	5/10/15 (a)	10	5/15
Finland	5/10/15 (a)	10	10
France	7/10/15 (a)	– (b)	10
Germany	5/10/15 (a)	10	7.5/10
Hong Kong SAR	10	10	7/10
Hungary	10	10	10
Iceland	10/15 (a)	10	10
India	10	10	10
Indonesia	15	15	15
Ireland	5/10	10	5/10/15
Israel	10	10	5/15
Italy	5/10/15 (a)	10	7.5/10
Japan	10	10	10
Korea (North)	10	10	10
Korea (South)	10	10	5/15
Kuwait	10/15	15	20
Laos	10	10	10
Luxembourg	5/10/15 (a)	10	10
Malaysia	10	10	10
Mongolia	10	10	10
Myanmar	10	10	10

Norway	5/10/15 (a)	10	10
Oman	5/10/15 (a)	10	10
Pakistan	15	15	15
Philippines	10/15 (a)	15	15
Poland	10/15 (a)	10	10/15
Qatar	5/12.5	10	5/10
Romania	15	10	15
Russian Federation	10/15 (a)	10	15
Saudi Arabia	5/12.5	10	7.5/10
Serbia	10/15	10	10
Seychelles	10	10	10
Singapore	5/7/12.5 (a)	10	5/10
Slovak Republic	5/10	10	5/10/15
Spain	7/10/15 (a)	10	10
Sri Lanka	10	10	15
Sweden	5/10/15 (a)	10	5/15
Switzerland	7/10/15 (a)	10	10
Taiwan	15	10	15

	<b>Dividends</b>	<b>Interest</b>	<b>Royalties</b>
	<b>%</b>	<b>%</b>	<b>%</b>
Thailand	15	10/15	15
Tunisia	10	10	10
Ukraine	10	10	10
United Arab Emirates	5/15	10	10
United Kingdom	7/10/15 (a)	10	10
Uzbekistan	15	10	15
Venezuela	5/10 (a)	10	10
Non-treaty countries	0	5	10

(a) The rates vary depending on the percentage of the payer's capital that is owned by the recipient of the dividends.

(b) The treaty with France does not cover the taxation of interest.

Vietnam has signed double tax treaties with Algeria, Egypt, Kazakhstan, Mozambique, New Zealand, the Palestinian Authority and San Marino, but these treaties have not yet been ratified or have not yet taken effect.

## A. At a glance

Corporate Income Tax Rate (%)	0 to 40 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0 to 40 (a)
Withholding Tax (%) (b)	
Dividends	15 (c)
Interest	15 (d)
Royalties	20 (e)
Management Fees	20 (f)
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 or 10 (g)

- (a) For details, see Section B.  
(b) These withholding taxes apply to payments to resident and nonresident companies and individuals.  
(c) For resident and nonresident companies and individuals, this is a final tax. Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated companies against withholding tax payable on their own distributions of dividends.  
(d) This rate applies to interest paid to companies. This is a final tax for nonresident companies. Resident companies may credit the withholding tax against their income tax.  
(e) For individuals and nonresident companies, this is a final tax. Resident companies may credit the withholding tax against their income tax.  
(f) This is a final tax applicable to nonresident companies and individuals. Resident companies and individuals include management fees in their taxable income and do not suffer withholding tax on these fees.  
(g) See Section C.

## B. Taxes on corporate income and gains

**Corporate income tax.** Resident and nonresident companies are subject to tax on their income derived from Zambian sources. Resident companies are also subject to tax on profits derived from a business carried on partly inside, and partly outside, Zambia. A

company is considered resident in Zambia if it is incorporated in Zambia or if the central management and control of the company's business or affairs are exercised in Zambia.

**Tax rates.** The following are the standard corporate tax rates.

Source	Rate (%)
Farming	10
Export of non-traditional products	15
Manufacturing	35
Banking income	35
Mobile telephone operators	
Profits up to ZMW250 million	35
Profits exceeding ZMW250 million	40
Royalties	35 (a)
Income from mining operations	0 (b)
Trading and other sources	35

(a) A 20% final withholding tax is imposed on royalties paid to nonresidents.

(b) A mining operation is any operation carried out under a mining right referred to in Section 6 of the Mines and Minerals Development Act, but does not include any operations carried out under a prospecting permit or prospecting license or any operations involving only mineral processing. Mining operations are subject to a mineral royalty (see Section D).

A tax incentive is available to companies that are newly listed on the Lusaka Stock Exchange. A two percentage point reduction of each corporate tax rate is granted to such companies. In addition, a reduction of five percentage points (for a total reduction of seven percentage points) of each corporate tax rate is available to companies with more than 33% of their shares owned by Zambians. The incentive applies for one year only, and a company may claim the incentive only once.

**Capital gains.** Capital gains are not subject to tax in Zambia, but depreciation recaptured for tax purposes (see *Tax depreciation*) is taxable at the regular corporate tax rates. In addition, a property transfer tax is imposed (see Section D).

**Administration.** The Zambia Revenue Authority administers the Income Tax Act. The tax year runs from 1 January to 31 December. Annual tax returns must be filed by 30 June of the following tax year.

Companies must make four advance payments of tax, which are due on 14 April, 14 July, 14 October and 14 January. The installments are based on an estimate of the tax due for the year. The balance of tax due must be paid by the due date for filing the annual tax return.

A company may apply to the Commissioner-General to use an accounting year other than the standard tax year. However, the due dates described above for filing returns and advance payments of tax also apply to companies with an accounting year-end other than 31 December.

**Dividends.** A 15% withholding tax is imposed on dividends paid. For resident and nonresident companies and individuals, this is a final tax. Dividends received from subsidiaries are also subject to a 15% withholding tax.

Zambian-incorporated companies may offset the withholding tax imposed on dividends received from other Zambian-incorporated

companies against withholding tax payable on their own distributions of dividends.

Dividends received from foreign companies are not subject to tax.

**Foreign tax relief.** A foreign tax credit is available to resident companies for foreign taxes paid on foreign income subject to Zambian tax. The amount of the tax credit is the lower of the Zambian tax payable on the foreign income and the foreign tax paid on the same income.

### C. Determination of trading income

**General.** Taxable income is the net profit reported in the companies' financial statements, adjusted by certain tax law provisions.

Expenses are deductible to the extent they are incurred wholly and exclusively for the purposes of the business.

Companies engaged in fishing or farming for two consecutive tax years may elect to calculate taxable income or loss for the two tax years by averaging the taxable income earned or loss incurred in each of the two tax years. This election must be filed with the Commissioner-General before the end of the tax year following the second consecutive tax year. The election is not allowed in certain circumstances.

**Inventories.** Inventories are valued at the lower of cost or net realizable value.

**Provisions.** Specific identifiable provisions are allowed for tax purposes, but general provisions are not allowed.

**Tax depreciation.** Industrial buildings qualify for an initial allowance of 10%. The initial allowance is not deductible from the cost of the assets. Annual wear-and-tear allowances, which are calculated using the straight-line method, are available for the following assets.

Asset	Rate (%)
Industrial buildings	
Low-cost housing (buildings used to provide housing for the purposes of a business with a cost per unit of up to ZMW20,000 [USD4,000])	10
Others	5
Commercial buildings	2
Implements and plant and machinery used in farming, tourism and manufacturing	50
Other implements and plant and machinery, and commercial vehicles	25
Other vehicles	20

The amount of depreciation claimed on an asset may be recaptured when the asset is sold. In general, the amount recaptured is the excess of the sales price over the tax value, but it is limited to the amount of depreciation claimed.

**Relief for losses.** Tax losses may be carried forward five years to offset income from the same source. Mining operations and companies operating in the hydro- and thermo-generation sector may carry forward losses for a period of 10 years. In general, losses may not be carried back.

**Groups of companies.** There are no provisions for filing consolidated returns.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods and services, other than an exempt supply, made in Zambia and on taxable imports; exports are zero-rated	16
National Pensions Scheme Authority (NAPSA; social security system) contributions on monthly wages; maximum contribution of ZMW586,984.60 per month for both employers and employees	
Employer	5
Employee	5
Property transfer tax, on transfers of shares of companies incorporated in Zambia, and land, buildings and structures located in Zambia	10
Property transfer tax on transfer of mining rights	10
Royalty on the extraction, production and selling of ore	
Open-cast mining	20
Deep mining	8

#### E. Foreign-exchange controls

The Zambian currency is the kwacha (ZMW). The exchange rate of the kwacha against foreign currencies fluctuates.

Zambia does not impose foreign-exchange controls.

#### F. Treaty withholding tax rates

- (a) Special tax rates apply to certain enterprises. For details, see Section B.
- (b) An AIDS levy of 3% is imposed on income tax payable (excluding tax on income subject to special rates).
- (c) Tax is imposed on capital gains on sales of immovable property and listed and unlisted marketable securities. See Section B.
- (d) A capital gains withholding tax is imposed on the proceeds from sales of listed and unlisted marketable securities and immovable property. The 1% withholding tax on the disposal of securities listed on the Zimbabwe Stock Exchange is a final tax. See Section B.
- (e) The 10% rate applies to dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresidents. The 15% rate applies to other dividends paid to resident individuals and nonresidents.
- (f) This is a final withholding tax imposed on residents. The following types of interest are exempt from income tax and withholding tax:
- Interest paid by the People's Own Savings Bank
  - Interest on building society Class C (tax-free) shares
- The 5% rate applies to interest on fixed-term deposits of at least 90 days with financial institutions.
- (g) This is a final tax imposed on the income to maturity of treasury bills, bankers' acceptances and discounted instruments traded by financial institutions that are purchased by resident investors who are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument.
- (h) These withholding taxes are imposed on nonresidents. The income is also subject to income tax unless a tax treaty provides that the withholding tax is a final tax.
- (i) This is a final tax imposed on remittances transferred from Zimbabwe by nonresidents for technical, managerial, administrative or consulting expenditures incurred outside Zimbabwe in connection with a trade carried on in Zimbabwe.
- (j) The 15% rate applies to payments by residents to nonresidents of technical, managerial, administrative and consulting fees. The 20% rate applies to payments for non-executive directors' fees and property and insurance commissions paid to resident and nonresidents who are not employees. The tax withheld is deductible from income tax payable. However, the 15% tax is a minimum tax.
- (k) This tax is withheld from all payments made under contracts for more than a specified threshold to resident and nonresident suppliers who cannot provide a tax-clearance certificate.
- (l) Only remittances of head office technical, managerial, administrative and consulting expenditures are subject to the 15% withholding tax.
- (m) Mining losses are ring fenced to specific locations and may be carried forward indefinitely.

## B. Taxes on corporate income and gains

**Corporate income tax.** Income tax is levied on all amounts (other than capital) received or accrued from a Zimbabwean source or a deemed Zimbabwean source, less expenditures not of a capital nature incurred in the production of income or for business purposes. Certain specific types of income are exempt.

Foreign interest and dividends accruing to taxpayers that are ordinarily resident in Zimbabwe are deemed to be from a source in Zimbabwe. A corporation is ordinarily resident in Zimbabwe if it is managed and controlled in Zimbabwe.

**Rates of corporate tax.** Resident and nonresident companies are subject to income tax at a rate of 25%. Residents are subject to income tax at a rate of 20% on gross foreign dividends receivable.

An AIDS levy of 3% is imposed on income tax payable (excluding tax on income subject to special rates).

*Special tax rates.* Special tax rates apply to the following enterprises.

<b>Type of enterprise</b>	<b>Rate (%)</b>
Licensed investors operating in export-processing zones and licensed before the year of assessment beginning on 1 January 2007	25
Special mining lease operations	15 (plus additional profits tax)
Build-own-operate-transfer (BOOT) and build-operate-transfer (BOT) projects	
Years 1 through 5	0
Years 6 through 10	15
Year 11 and thereafter	25*
Industrial park developers that commenced operations before the year of assessment beginning 1 January 2010	
First five years	0
Thereafter	25
Manufacturing enterprises exporting 50% or more of their production	20

\* The 3% AIDS levy is also payable.

Interest received by residents on deposits with Zimbabwean financial institutions and building societies is exempt from income tax, but it is subject to a final withholding tax at a rate of 15%. A final withholding tax at a rate of 15% is also imposed on the income to maturity of treasury bills, bankers' acceptances and discounted instruments traded by financial institutions that are purchased by resident investors that are not financial institutions. The tax is imposed at the time of disposal or maturity of the instrument. No deduction for expenses and losses is permitted from interest subject to the final taxes described above. Other interest received by residents is taxable at the regular corporate income tax rate and may be offset by expenses and losses.

*Tax concessions.* In the past, export-processing zones were designated in the major business centers and border areas of Zimbabwe.

Concessions are restricted to licenses issued before 1 January 2007 to certain investors to operate in these zones. The concessions are in the form of reduced rates or an exemption with respect to the following taxes:

- Income tax on profits (0% rate for five years and 15% rate for subsequent years)
- Capital gains tax
- Nonresident and resident shareholders taxes on dividends
- Nonresident taxes on remittances, fees and royalties
- Customs duty
- Value-added tax on goods and services (refundable)

Foreign entities that provide finance for development in Zimbabwe are exempt from income tax and capital gains tax.

Receipts and accruals of financial institutions that relate to mortgage financing provided by them are exempt from income tax.

**Capital gains.** Withholding tax is imposed on the gross proceeds derived from sales of listed and unlisted marketable securities and immovable property. The withholding tax rates on the disposal of assets acquired before 1 February 2009 are 1% for listed marketable securities and 5% for unlisted marketable securities and immovable property. The withholding tax rates on disposal of assets acquired on or after 1 February 2009 are 1% for listed marketable securities, 5% for unlisted marketable securities and 15% for immovable property. This tax is offset against any capital gains tax assessed on the transaction.

Capital gains derived from the disposal of immovable property and unlisted securities acquired before 1 February 2009 are taxed at the greater of 5% of the gross sale proceeds and the amount of the withholding tax withheld on disposal.

Capital gains derived from disposals of immovable property and unlisted marketable securities acquired after 1 February 2009 are taxed at a rate of 20%. Gains are determined by deducting from the selling price the cost plus an allowance of 2.5% per year on the cost from the date the cost was incurred to the date of disposal. Capital allowances recaptured for income tax purposes (see Section C) are excluded from gains. Capital gains withholding tax is offset against any capital gains tax assessed on the transaction.

Capital gains derived from the disposal of listed securities are exempt from capital gains tax, effective from 1 August 2009, but the gross sale proceeds are subject to 1% capital gains withholding tax which is a final tax.

Capital gains derived from the disposal of shares to an approved indigenization partner or community share ownership trust or scheme is based on the amount paid regardless of the fair market value.

**Administration.** Zimbabwe's tax year ends on 31 December. Tax returns must be filed by 30 April. The Revenue Authority prefers that companies use accounting years ending in September, October, November or December of a given tax year. Self-assessment has been introduced for specified taxpayers.

Corporate tax must be paid during the relevant tax year. Provisional payments equaling specified percentages of the estimated total tax payable are due on the following dates:

- 25 March: 10%
- 25 June: 25%
- 25 September: 30%
- 20 December: 35%

Penalties can be imposed for late or incorrect returns, and late payments are subject to interest at a rate of 10% per year.

Withholding taxes that are not considered final taxes are credited to the income tax imposed on the income from which the tax has been withheld.

**Dividends.** Dividends received by a resident corporation from another resident corporation are exempt from withholding tax and income tax. A 10% withholding tax is imposed on dividends paid by companies listed on the Zimbabwe Stock Exchange to resident individuals and nonresidents. A 15% withholding tax is imposed on other dividends paid to resident individuals and nonresidents. Gross dividends received from foreign companies are subject to tax at a rate of 20%.

**Foreign tax relief.** If relief is not provided by a treaty, a unilateral tax credit is given for foreign withholding tax. The tax credit may not exceed the Zimbabwean income tax imposed on the income.

### C. Determination of trading income

**General.** Income tax is levied on all income from a source in Zimbabwe or deemed to be in Zimbabwe. The following types of interest are exempt from income tax:

- People's Own Savings Bank interest
- Interest from certain building society investments

Interest on deposits with financial institutions and income from treasury bills, bankers' acceptances and discounted instruments traded by financial institutions is subject to a final withholding tax at a rate of 15%. For further details regarding this withholding tax, see Section B.

Expenses incurred for business purposes are generally deductible. The following expenses are not deductible:

- Expenses incurred in the production of exempt income or income not derived or deemed to be derived from Zimbabwe
- Pension fund contributions in excess of a specified amount
- Cost of attending trade missions and conventions in excess of a specified amount
- Rent or repairs for premises not occupied for purposes of trade
- Payments in restraint of trade
- Entertainment expenses
- Payments in excess of a specified amount for the lease of passenger motor vehicles (as defined)
- Interest relating to excess debt in a company with a debt-to-equity ratio that exceeds 3:1
- General administration expenses charged by a holding or subsidiary company or foreign head office that exceed 0.75% of expenditure incurred during the preproduction phase or 1% of tax-deductible expenditure incurred after the beginning of trading or the production of income

Donations of up to a specified threshold for the construction, maintenance or operation of hospitals and schools run by the state, local authorities or religious organizations and donations to approved research institutions are deductible.

A double tax deduction is allowed for specified export market development expenditure.

Amounts contributed to approved scientific and educational bodies for industrial research or scientific experimental work are also deductible for tax purposes.

Under the Indigenisation and Economic Empowerment Act, the following amounts are deductible for tax purposes:

- Contributions or donations to an approved community share ownership trusts or schemes are deductible.
- Loans by corporate taxpayers to acquire shares that are repayable from dividends foregone by the taxpayers on those shares are deductible in equal annual installments over the period of the loan.

**Inventories.** The only acceptable inventory valuation methods for tax purposes are cost, using the first-in, first-out (FIFO) method, and market value.

**Provisions.** In general, only specific provisions are deductible for tax purposes.

**Tax depreciation.** Depreciation charged in the financial statements is not deductible; instead, a 25% special initial allowance is granted on the cost of certain assets. A wear-and-tear allowance of 25% of cost is granted in the following three years. The special initial allowance is granted on the cost of construction or additions to fixed assets other than land and certain buildings and also on the purchase price of movable property. If the special initial allowance is not claimed, a wear-and-tear allowance at varying rates is granted on these assets. The following are the rates and the methods of computing this wear-and-tear allowance for certain assets.

Asset	Method	Rate (%)
Commercial buildings	Straight-line	2.5
Industrial buildings*	Straight-line	5
Office equipment	Declining-balance	10
Motor vehicles	Declining-balance	20
Plant and machinery	Declining-balance	10

\* Toll roads and toll bridges declared to be such under the Toll Roads Act are included in this category.

All capital allowances are subject to recapture on the disposal of assets on which such allowances have been claimed. Any amounts recaptured are subject to tax at the regular corporate tax rate. The full sale price of mining assets on which capital allowances have been granted is subject to tax at the corporate tax rate for mining.

**Relief for losses.** Mining losses are ring fenced to specific locations and may be carried forward indefinitely. Other losses may be carried forward for six years. Losses may not be carried back.

**Groups of companies.** Zimbabwean law does not contain measures for filing consolidated returns or for relieving losses within a group.

Transfers of assets in a merger or group reconstruction between companies under common control may be made at the tax value for both income tax and capital gains tax purposes. On the subsequent disposal of such assets outside the group, the gain or loss to the seller is computed with reference to the cost to the first transferor within the group.

#### D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; on the supply and importation of goods and services; certain items are exempt, including, financial services, medical services, fuel, tobacco, educational or training services, long-term residential leases and transport of passengers by road or rail; suppliers of qualifying goods and services with an annual value in excess of a specified threshold must register; the annual threshold is currently USD60,000	
Standard rate	15
Exports, prescribed drugs and services supplied by designated tourist facilities to tourists that are paid for with foreign currency, as well as certain other items	0

Presumptive taxes on different bases and at various rates are imposed on informal traders, small-scale miners, and operators of taxicabs, omnibuses, goods vehicles, driving schools, hair-dressing salons, cottage industries, waterborne vessels, fishing rigs and licensed and unlicensed bottle stores and restaurants.

#### E. Miscellaneous matters

**Foreign-exchange controls.** The legislation and regulations with respect to foreign-exchange controls are currently under review. The present rules are discussed below.

The government still imposes broad controls over all transactions involving a nonresident. Applications through commercial banks are required for the approval of most transactions of this nature. Commercial banks refer exceptional items to the Reserve Bank of Zimbabwe.

Foreign investment of up to 35% in primary issues of shares and bonds is permitted if funded by inward transfers of foreign exchange. Purchases and disposals by foreign investors in the secondary market require specific approval from the authorities.

Agreements relating to foreign borrowings require registration with the commercial banker of the borrower before implementation. Borrowings in excess of specified limits require the approval of the Reserve Bank of Zimbabwe. The approvals are granted based on the merits of the borrowings in accordance with guidelines set by the External Loans Coordinating Committee. The guidelines provide that foreign borrowings may be approved only if they are used to fund productive, export-oriented ventures that have the potential to generate sufficient foreign currency for loan principal and interest repayments without recourse to the foreign-

currency market. Foreign loans to purchase shares, existing companies or real estate, or to fund private consumption, personal loans or retail inventories, are generally discouraged.

With the approval of the authorities, 100% of after-tax normal trading profits may be remitted to nonresident shareholders within one year after the accrual of the profits.

After-tax dividends and capital gains derived from investments on the Zimbabwe Stock Exchange are fully remittable.

**Debt-to-equity rules.** Debt-to-equity rules apply to all companies (see Section C).

## F. Treaty withholding tax rates

The rates shown in the table reflect the lower of the treaty rate and the rate under domestic tax law.

	<b>Dividends (a)</b>	<b>Interest</b>	<b>Royalties</b>	<b>Fees</b>
	%	%	%	%
Botswana (b)	5/10	0	10	10
Bulgaria	10	0	10	10
Canada	10	0	10	10
Congo (Democratic Republic of) (b)	0	0	0	0
France	10	0	10	10
Germany	10	0	7.5	7.5
Iran (b)	5	0	5	5
Kuwait (b)	0/5/10	0	10	0
Malaysia	10	0	10	10
Mauritius	10	0	15	15
Namibia (b)	5/10	0	10	15
Netherlands	10	0	10	10
Norway	15	0	10	10
Poland	10	0	10	15
Serbia (b)	5	0	10	10
South Africa	10/15	0	15	15
Sweden	15	0	10	10
United Kingdom	5	0	10	10
Non-treaty countries	10/15	0	15	15

(a) Except for the Iran treaty, the reduced treaty rates apply only if the recipient is a company that controls at least 25% of the voting power of the payer company.

(b) The entry into force of these treaties has not yet been published.

### About EY

EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit [ey.com](http://ey.com).

### About EY's Tax Services

Your business will only succeed if you build it on a strong foundation and grow it in a sustainable way. At EY, we believe that managing your tax obligations responsibly and proactively can make a critical difference. Our 38,000 talented tax professionals, in more than 140 countries, give you technical knowledge, business experience, consistency and an unwavering commitment to quality service – wherever you are and whatever tax services you need.
